(2) *The list restricting travel should be expanded.*—None of the East European Soviet satellites is now on the restricted list. Yet their diplomats and nationals at the U.N. pose an obvious and serious security threat to the U.S. The same is true for Nicaragua. The status of the People's Republic of China is ambiguous. Its New York-based diplomats already enjoy special privileges: they are free of all travel restrictions to 29 "open cities" embracing virtually every major metropolitan area in the U.S. This would not be curtailed by the Roth-Hyde Amendment. Although China is no Soviet satellite, official U.S. sources confide that Beijing's agents in the U.S. are deeply engaged in industrial espionage.

(3) *The size of some U.N. missions should be reduced.*—The Soviet Mission to the U.N. totals 295—when Byelorussia and the Ukraine are added, the total is 327. By contrast, the U.S. Mission to the U.N. gets by with about one-third this number. Surely, Moscow is taking advantage of the U.S. in its role as host country. Similarly, Cuba has a staff of 56 at its U.N. mission, about the same size as major West European nations whose involvement in U.N. official business is generally much heavier than Havana's. The matter has run out of control. The State Department immediately should define "reasonable ranges" for mission size, based on such generally accepted U.N. criteria as a country's population and wealth, and the scale of assessed contributions to the U.N. budget. This would force a cut back mainly in Soviet bloc missions and thus reduce the number of potential spies.

(4) *The U.S. should stop subsidizing espionage against the U.S.*—The U.S. currently pays 25 percent of the salaries of U.N. employees. This includes, of course, those who receive and submit to instructions from their governments (including instructions to spy). This is in clear violation of Article 100 of the U.N. Charter. Another related Charter abuse that the U.S. tolerates is "secondment," by which the Soviets assign their nationals to the Secretariat on contract and replace them at will. This puts an effective lock on certain key positions—in personnel, public information and Political and Security Council Affairs, for example, whose chief always is a Soviet national—and enables the Soviets to establish permanent espionage outposts within the U.N. Secretariat. The U.S. should demand that the Secretary General put an end to these Charter violations. Failing prompt, effective action, the U.S. should withhold the appropriate portion of its annual assessment.

INCREASING U.S. COUNTERINTELLIGENCE RESOURCES

Even without the U.N.-related security threat, strengthening U.S. counterintelligence capibilities is an urgent priority for the FBI, CIA and other law enforcement agencies. The espionage charges against the Walker family make this clear. U.S. counterintelligence must be rebuilt after its systematic destruction during the 1970s. It is a long and slow process. Of all intelligence specialties, none is more demanding or dependent on experience than counterintelligence. Since 1981, the U.S. has begun to rebuild; more must be done. Such as:

(1) *FBI counterintelligence forces in New York should be increased substantially.*—More FBI agents are urgently required in New York City to monitor potential espionage activities related to the U.N. The U.S. is now in the first year of a five-year FBI expansion program, which will increase the FBI counterintelligence force by about 50 percent nationwide. Exactly how many agents the FBI needs, and how many should be posted in New York, is classified information. The President, the Attorney General and the Congress—the two Intelligence Committees in particular—have the obligation to assure themselves and the American people that the U.S. is spending what it must to rebuild a counterintelligence capability fully in line with the Soviet threat, including the U.N.-related part of the threat—and on the fastest possible track.

(2) *Adequate support staff and services should be provided.*—More agents alone will not get the job done. Required, too, are telecommunications equipment, data banks, stenotypists, and surveillance and other specialists. The simple lack of an adequate motor pool, for example, can abort an entire U.S. counterintelligence operation. In addition, collaboration among all American law enforcement and intelligence agencies is essential. Currently in New York, cooperation is excellent among the FBI, U.S. mission security staff and the superb New York City Police counterintelligence forces. The President and Congress must ensure the same high level of teamwork within the U.S. intelligence community, particularly between the CIA and the FBI. Almost by definition, Soviet-directed espionage at the U.N. is a cross-border matter, justifying CIA involvement.

(3) *Counterintelligence laws and guidelines should be reviewed.*—A key element of the systematic attack of the 1970s on U.S. intelligence capabilities was the Foreign Intelligence Surveillance Act of 1974 (FISA). This was supplemented by Department of Justice guidelines. Most U.S. law enforcement and intelligence officials say that neither FISA (which established a special U.S. court to pass on the legality of wiretaps) nor the Justice Department guidelines seriously inhibit effective counterintelligence operations. Yet outside experts and former counterintelligence agents insist that FISA and the guidelines have a "chilling effect." Among other things, they discourage agents from even requesting especially sensitive surveillance efforts. Thus, while the special court almost always says "yes" to requests, it does so in part because it never gets the really tough ones. The President, the Attorney General and Congress must review the law and guidelines for just such crippling defects.

(4) *The U.S., presence within the U.N. Secretariat should be strengthened.*—Increased presence within the U.N. Secretariat of tough-minded fully qualified U.S. professionals could inhibit the activities of Soviet bloc spies. Americans inside the Secretariat, moreover, could monitor the situation better than any outside agents. They could spot suspicious behavior—sometimes nothing more than a Bulgarian or Russian who almost never turns up in the office. And they could report their observations to appropriate U.S. officials without compromising their roles as legitimate international civil servants.

THE "UNIVERSAL" SOLUTION

Another way to bring potential Soviet agents at the U.N. under more effective control would be to break up the routine, predictable pattern of the U.N. operation. A useful first step would be to keep moving the annual three-month session of the U.N. General Assembly; one year it could convene in Moscow, the next in Geneva, following that in Nairobi, and so on. This was proposed in 1981 by former U.N. Ambassador Jeane Kirkpatrick and endorsed in principle by President Reagan. By rotating the U.N. venue, the bulk of the U.N. missions and the massive U.N. bureaucracy would be operating outside New York and the U.S. for at least three months annually. The U.N. sanctuary for espionage targeted against the U.S. would be severely disrupted.

If all else fails, then the U.S. must protect itself against U.N.-based espionage by pressing for the ultimate option: moving the U.N. out of the U.S. altogether and inviting the organization to find a new home elsewhere. From the perspective of U.S. national security, it makes a great deal of sense.

The State Department and its supportive "establishment" would, of course, argue that by such an act the U.S. would be turning its back on its worldwide responsibilities. In Moscow or Geneva or Nairobi, however, as in New York, the U.S. would be able to play whatever role it wished to play in the U.N., which might even become more serious and businesslike.

CONCLUSION

All of the above recommendations are mutually reinforcing. If all were pursued, the security threat posed by the privileged sanctuary for spies provided by the U.N. could be brought under effective control.

Restrictions on Soviet and bloc diplomats' freedom to move at will within the U.S., now extended by the Roth-Hyde Amendment to Soviet bloc U.N. bureaucrats, should be rigorously enforced; the list of countries under restriction should be expanded to include the entire East European bloc; suspiciously overstaffed U.N. missions should be cut back; and the U.S. should stop paying its 25 percent share of the salaries of U.N. employees who clearly are under the control of their governments. These actions would begin to reduce the number of potential spies to manageable proportions.

The problem can be managed, moreover, by increased U.S. counterintelligence resources, adequately supported by staff and services, further backed up by a strong U.S. presence inside the U.N. secretariat and rid of unnecesary restraints on their operational freedom.

If the U.S. is really serious about turning back the U.N.-related Soviet threat to its national security, an arsenal of varied and effective weapons is at hand.

CLOSING LOOPHOLES SHOULD BE GOAL OF TAX REFORM

(Mr. KLECZKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. KLECZKA. Mr. Speaker, when President Reagan sent his comprehensive tax reform proposal to the Congress earlier this year, I sensed a bipartisan willingness to take on the special interests by closing the loopholes, broadening the tax base and lowering tax rates.

Since that time, those of us who strongly favor tax reform have been urged to "keep our powder dry" as the bill works its way through the committee system. But, while many of us have tried to do just that, the special interests have been far from silent. The loophole lobby has unloaded broadside after broadside on the committee while we held back.

Let us consider what has happened as we kept our powder dry.

Commercial banks, hardly among the truly need in our economy, have a new, improved, wider loophole by which they can avoid paying their fair share of taxes. Instead of going forward with tax reform, we appear to be moving backward.

Millions of unemployed workers will now see taxes levied on all their unemployment compensation benefits.

Perhaps the money raised from this tax increase will finance the tax dodges of those who raise and breed race horses. As the tax committee voted to raise taxes on the jobless, it acted to preserve tax breaks for horse racers.

Is this tax reform? I ask my colleagues: How many of your constituents define tax reform as new loopholes for banks, a new tax on unemployment benefits and a preservation of tax breaks for the horsey set?

If we want real tax reform, we have to be willing to curtail loopholes, not widen them. That means we will have to stand up to powerful special interests. In so doing, we can bring about a fairer and simpler tax system.

If this is what Congress has in mind when it talks about tax reform, count me in.

If tax reform is defined by what we have seen thus far, count me out.

At this point, Mr. Speaker, I would like to include in the RECORD a description of the successful tax reform effort in my State of Wisconsin which appeared in a recent issue of people and taxes. I believe Congress can learn from this example of progressive tax reform.

WISCONSIN PIONEERS TAX REFORM

(By Diane Sherwood and Kristin Franklin)

"As Maine goes, so goes the nation" is a popular election-year truism. But where taxes are concerned, Wisconsin seems to be the state to watch—it's the state that first established a state personal income tax, workman's compensation, and an unemployment tax. Now Wisconsin has passed a landmark tax simplification measure that one scribe calls "the income tax development of the year . . . [whose] positive significance . . . shows the political feasibility of tax reforms."

The new Wisconsin tax system, finalized in July, does what many federal reformers can only dream of—it eliminates many tax deductions, reduces the number of tax brackets from eight to four, and lowers marginal rates. It also cuts taxes for six out of every ten Wisconsin taxpayers.

"We're excited about the tax reform," raves Michael Vlaisavljevich, Research Director for the Wisconsin Revenue Department. "And I think that as word gets out, there will be increasing interest because right now it is the major example of genuine tax reform that has already been enacted."

GOOD-BYE WISCONSIN

Impetus for Wisconsin's personal income tax reform came from a good news-bad news situation facing the state. It began when Kimberly Clark, a prominent Wisconsin-based corporation, informed Democratic Gov. Anthony Earl that the firm was considering leaving the state. Such glum news sounded painfully familiar—Wisconsin has lost more corporate headquarters than any other state in the nation, according to a state study. "Old Milwaukee beer isn't even from Milwaukee anymore," one state official laments. The good news was that Wisconsin had mopped up its budget deficit and was sitting on a $500 million budget surplus.

Gov. Earl created the Wisconsin Strategic Development Commission, composed of private and public sector citizens, whose mandate was to determine how Wisconsin could enhance its business climate. Half of the commission's $500,000 came from the private sector. One of the group's major findings was that Wisconsin had lost an estimated 134,000 jobs since 1979.

Yankelovich, Skelly & White, a national public opinion research firm headquartered in New York, conducted a key study which concluded that high personal state income taxes were "a major irritant" to business executives, particularly those in high income brackets, according to Fred Shaffer, legislative counsel for the Wisconsin Association of Business and Manufacturers. Wisconsin's top personal tax rate of 10 percent was one of the highest in the nation. When combined with other state and local taxes, Wisconsin residents in 1983 bore the sixth heaviest tax burden in the country, according to the Advisory Commission on Intergovernmental Relations.

"The whole thrust was that we needed tax reductions," says Sue Engeleiter, Republican Minority Leader in the Wisconsin state Senate. Engeleiter and her fellow-Republicans were skeptical about tax reform from start to finish. "Nobody was particularly interested in tax reform. People wanted tax reductions. It was the governor, and just about only the governor, whose agenda was reform," she says.

Earl's original reform proposal boldly called for only three tax brackets and elimination of deductions for interest, including home mortgage interest, charitable donations, medical expenses and political contributions. The package was "99.44 percent pure" and a "radical beginning" when it was introduced, and became "maybe a fraction less pure" as it maneuvered through the political process, a spokesman for the governor boasts.

"It wasn't well-received even by people in his own party," recalls Engeleiter, the Senate Republican leader. Wisconsin legislators forced Earl to restore write-offs for medical expenses, home interest payments, charitable contributions, and other interest payments up to $1,200.

But in a novel twist—the first of its kind in the nation, according to Wisconsin legislators—the write-offs for personal expenses will be limited to a 5 percent tax credit. For example, a taxpayer earning $30,000 will receive an automatic standard deduction of $2,400. If personal write-offs exceed $2,400, the taxpayer will be allowed to multiply the difference (personal write-offs minus standard deduction) by 5 percent, and add that figure to the standard deduction.

"I like the idea of a credit better than a deduction," explains the man who proposed the idea, Assemblyman Dismas Becker. Becker is a Democrat from Milwaukee's inner city. "This tax credit plan would definitely work on the federal level."

State Republicans, in contrast, disparage the credit as "screwy." It "is going to make accountants rub their heads and say, 'What's going on in Wisconsin?'" Engeleiter complains.

Wisconsin's four new tax rates will range from 5 percent to 7.9 percent, with intermediate brackets of 6.6 percent and 7.5 percent. A sliding scale standard deduction will range from $7,200 for a low-income married couple to no deduction for a single person earning more than $77,500. During negotiations, Republicans say they supported the sliding scale standard deduction only as a way "to bring down the top rates."

WISCONSIN'S TAX BURDEN

State-local tax revenue as percent of personal income

1. New York	15.3
2. District of Columbia	14.4
3. Minnesota	13.2
4. WISCONSIN	13.1

5. Hawaii	12.8
6. Montana	12.5
7. Michigan	12.4
8. Vermont	12.1

Note: Does not include Alaska and Wyoming, which receive large revenues from oil and severance taxes.

DISPUTED CUTS

Initial estimates claim that the largest tax cuts—average reductions of 23 percent—will go to those earning $5,000-$10,000 and to those earning more than $300,000. All other income brackets will receive an average tax cut of 5.6 percent to 15.7 percent. Total tax cuts will equal $171 million.

The measure squeaked past the Assembly in a virtual party-line vote, 52-47. The Senate than adopted the tax reform 21-12 in another partisan split. Mike Youngman, assistant to the Democratic Speaker of the Assembly, charges that Democrats worked hard to make the reform proposal bipartisan by increasing Republicans' membership on the tax-writing committees. Youngman complains that Republicans withheld their support in an unsuccessful effort to show voters that Democrats could not "take control."

Republican officials claim that tax reductions should have taken priority over tax reform, and that the tax reduction is inadequate. They point out that 40 percent of the state's residents will receive no income tax cut, and 287,000 filers—particularly those in higher brackets who will lose some deductions—will probably experience a tax increase.

"It clobbers the (corporate) decisionmakers, people who make the decisions to move companies," Engeleiter warns. "The biggest segment hit will be two-wage earner middle-income families. There's no justification for anybody to pay more when you have a $500 million budget surplus."

"Tax simplification creates winners and losers," acknowledges Shaffer, of the Business and Manufacturing Association. "There is no telling if any given person in any given bracket will be a winner or loser . . . The benefit of simplicity must be weighed against the different impacts that occur within the same income group. It (the tax bill) will be beneficial for lots of people, but it is difficult to guarantee that any given individual will benefit."

Gov. Earl, meanwhile, speaks of Wisconsin's tax reform as an epic event. "It is the most far-reaching tax reform since our state pioneered progressive income tax in 1911," he says. "This reform makes taxes not only lower but simpler and fair. It restores progressivity and integrity; it makes the way we finance government not ony more progressive, but more faithful to our tradition and the expectations of our citizens."

Tax reform in Wisconsin was driven in part by a desire to simplify the state's income tax system, lower the top rates, and make the system more fair—concerns that are repeated on the federal level, points out Rindert Kiemel of the Wisconsin Taxpayers Alliance. The trail blazed by Wisconsin also offers innovative tax ideas for federal reformers, such as converting deductions to tax credits, and the sliding scale standard deduction. The state has a proud history of pioneering ideas that are later used on a national level.

Is the Wisconsin experience a harbinger of national tax reform? Unhappily for federal tax reformers, the national debate is not entirely analogous to Wisconsin's. Unlike Wisconsin, Congress can only hope to pass tax reform legislation on a bipartisan basis. Federal reform will likely fail if it degenerates into partisan politics. Nor can the federal government afford to lose more revenues, point out William Bechtel, director of Wisconsin's Office of State-Federal Relations.

Acknowledges Bechtel, "It is easier to pass a tax reform bill which reduces taxes, rather than to pass one which is revenue neutral."

RECOMMENDATIONS OF DEMOCRATIC TASK FORCE ON TRADE

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and include extraneous material.)

Mr. ALEXANDER. Mr. Speaker, in Boston last Tuesday and Wednesday the Democratic Task Force on Trade heard from more than 20 witnesses from business, management, and academia in the New England regional hearing on trade. We learned from each of these groups the sad story that America is no longer competitive in the international markets and that our markets are being flooded by cheap imports, which in effect is causing a deindustrialization of our country.

Later in the week the Task Force on Trade, led by the chairman, the gentleman from Washington [Mr. BONKER], submitted an alternative trade policy for our country to make us competitive again. It deals with seven points: The inflated dollar, export financing, economic adjustment, export controls, farm exports, natural resource subsidies, and foreign industrial targeting.

I commend the work of the Trade Task Force and of the leadership of the chairman, the gentleman from Washington [Mr. BONKER], and urge my colleagues to give serious study to this proposal in order to make America competitive again in international markets.

DEMOCRATIC TASK FORCE ON TRADE PROPOSAL VERSUS REAGAN PLAN

	Democratic task force plan	Reagan plan
1. The inflated dollar	Convening of an international monetary conference as a prerequisite for a new round of GATT talks. Expanded and coordinated intervention to bring the dollar down to a level consistent with current account balance. Establishment of a strategic capital reserve.	Limited intervention to promote stability. [For the past 4 years the Reagan administration has hailed the inflated dollar as a sign of American strength.]
2. Export financing	$500 million for a mixed credit program within Eximbank and AID. $1.8 billion for Eximbank direct lending in fiscal year 1986 and more in the future.	$300 million for mixed credits within the Treasury Department. [The administration had consistently opposed mixed credits and earlier this year called for the elimination of Eximbank direct lending.]
3. Economic adjustment	Long-term reauthorization of Trade Adjustment Assistance, with financing through a nominal import fee. Expansing of TAA retraining benefits and eligibility criteria. Establishment of a national computerized job bank. Establishment of a permanent Council on Industrial Competitiveness. Development of industry and community adjustment plans in conjunction with temporary import relief under section 201.	A study by the Secretary of Labor on how to improve Trade Adjustment Assistance. [The administration has consistently supported elimination of the program.]
4. Export controls	Stringent limitations on Defense Department involvement in export licensing. Strict adherence to foreign availability standards of the revised Export Administration Act. Narrow interpretation of contract sanctity provision of the Export Administration Act.	[The administration has significantly expanded the scope of export restrictions, adding unnecessary and costly burdens to America's exporters.]
5. Farm exports	$5 billion for export guarantees, with origination fees no greater than one-third of 1 percent. $325 million for Export Credit Program. $500 million set-aside within the Intermediate Credit Program for exports. Reauthorization of the Export Credit Revolving Fund. An expanded and fully competitive Export Enhancement Program.	[The administration has proposed terminating the Export Credit Program and imposing a prohibitive origination fee for export guarantees. The administration has shackled its own BICEP Program with restrictive criteria.]
6. Natural resources subsidies.	Inclusion of natural resource subsidies within the countervailing duty law.	
7. Foreign industrial targeting.	Inclusion of foreign industrial targeting within the reciprocity law (section 301).	

THE SANCTUARY MOVEMENT

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GONZALEZ. Mr. Speaker, today in Arizona, our Government begins its prosecution of 12 church workers who are charged with providing sanctuary to Salvadoran refugees. There has been very little publicity on this case considering its tremendous impact on the 500,000 Salvadoran refugees and the thousands of American church workers in the United States because the trial judge imposed a gag order on

the defendants this past summer. But there are some serious questions about the Government's activities in this case that ought to be considered very carefully.

In order to gather the evidence against the church workers, the Government sent undercover agents into churches to pose as religious congregants and supporters of the sanctuary movement. These false parishioners needed no prior clearance with a magistrate before infiltrating the church. They never approached a neutral judge with justification for their proposed undercover operation—and they didn't have to. Under the law, undercover operations need prior judicial approval only when they involve wiretapping or electronic surveillance. This leaves the infiltration of activities—such as church meetings—completely at the discretion of the police.

Our Government was formed as a triumverate—a system of checks and balances. In the Arizona sanctuary case, there were no checks and balances because, under the law, the Justice Department could act on its own without the usual protections afforded by having an impartial third party consider the propriety of its actions.

It sets a dangerous precedent to allow law enforcement agencies to act without restraint. If our law enforcement agencies are allowed to continue to act unilaterally and without exercising reasonable discretion, our freedom is jeopardized. The Arizona case is exemplary, and we should all be concerned that the outcome of the trial reflect a return to the basic tenets on which our most fair system or government was founded.

Mr. Speaker, I include the following article from the Washington Post by Nat Hentoff:

UNDERCOVER AGENTS GO TO CHURCH

Although the use of undercover agents has become as American as light beer, until now no government agency has admitted to planting them in a church. In trying to make a case against sanctuary workers in Arizona, however, the U.S. government conducted a 10-month undercover investigation, Operation Sojourner, which led to the indictment of 16 people (later reduced to 12). The charges include bringing undocumented aliens illegally into the United States and then concealing them.

The government's case is based on about 100 covert tape recordings, many of them made in church, by two paid government informants, who had disguised themselves as ardently religious supporters of the refugees. Among the tapes are Bible study classes and prayer services.

During recent pretrial hearings in Phoenix, U.S. District Judge Earl Carroll has not appeared particularly impressed with defense arguments based on the state of human rights in Central America or the notion that international law can transcend American immigration rules. Judge Carroll has, however, been disturbed by testimony about the government's creation of a new frontier for undercover agents. Sending "people paid to do it and wired to do it into places of religious activity," the judge said, means "the whole process has been sullied in a sense."

An argument is being made by lawyers for the American Civil Liberties Union and the Center for Constitutional Rights, among other attorneys involved in the case, that all the "sullied" evidence obtained by the false congregants should be thrown out.

The question, they say, is not whether the government can never send an informant into a church. Crimes can be flaunted in holy places, as is richly evident in the histories of England and Russia. But in this country, can covert agents constitutionally be sent into a church without first going before a neutral magistrate—a judge who hears the government's probable cause for planting the informants and then decides whether the government has shown compelling, specific reason to compromise the holy place?

As it is now, no undercover agent, whether he slips into a church or a congressman's office, needs a warrant. Responsible for this largest hole in the ever more tattered fabric of the Fourth Amendment is the Supreme Court, which has never understood that a covert informant is far more intrusive than a wiretap or bug.

The constitutional significance of the sanctuary workers' case is that it may finally produce some warrant requirement for undercover operatives, at least in a church setting. At issue and at risk are First Amendment protections for free exercise of religion and, within that context, for freedom of speech and association. The informants, it should be kept in mind, did not tape only meetings in which those "conspiring" to smuggle aliens were present. They picked up the conversations of a lot of other church members. Yet, only the government handlers of the government informants decided what was to be taped and when. No detached magistrate was supervising Operation Sojourner.

The defense maintains that the warrant clause of the Fourth Amendment must be invoked whenever the government intends to use undercover informants in ways that may threaten significant First Amendment values. Like sending them into a church to pick up anything they can.

During the pretrial hearings in Phoenix, Pastor Eugene Lefebvre of the Sunrise Presbyterian Church testified that a woman who took part in a church discussion that was later found to have been surreptitiously taped is now afraid that the FBI has opened a file on her and that she could be targeted when she applies for a teaching position.

And James Oines, pastor of Alzona Lutheran Church, said from the stand that he no longer holds Bible study classes because some members of his congregation are afraid to come to the church. They no longer have faith that the person sitting next to them is revealing his true heart.

Oines added: "The deepest aspect of their faith and trust was violated. It turned out that we were as gentle as doves but not so wise as serpents."

Among the defendants are a Protestant minister, Roman Catholic priests and nuns, a social worker, a college student and a Quaker rancher. The lawyer for one of them, James Brosnahan, told the National Catholic Reporter that "the government has not made a practice of invading church buildings to apprehend people. I would like to think of it as an aberration that will never happen again."

It all depends on what the courts say. This, after all, is an administration convinced that God, being on its side, would not consider an undercover agent to be trespassing in one of His churches under these circumstances.

A PROPOSAL TO STAGGER TAX RETURN FILING DATES BASED ON A TAXPAYER'S BIRTHDAY MONTH

The SPEAKER pro tempore (Mr. KANJORSKI). Under a previous order of the House, the gentleman from Pennsylvania [Mr. GEKAS] is recognized for 5 minutes.

Mr. GEKAS. Mr. Speaker, I repeat that Halloween of 1985 began on April 15, when the horror stories began to emanate from the taxpayers of the country on the mismanagement of their returns, or nonmanagement of their returns by the IRS in the various regional offices.

Particularly in my section of the country, where the Philadelphia office has been undergoing tremendous problems, they indicate, with their new computer setup. We have been besieged in every district office with hundreds of complaints and shrieks of horror, as it were, on what has been happening to individual taxpayers.

We have had hospitals receive notification that accounts are frozen, and that their assets are to be subjects of liens and other legal actions by the IRS, all to the shock of the managers of that hospital; it has happened more than one time.

There is no excuse for that kind of thing occurring, and we cannot place the blame totally on the fact of computer goblins or gremlins or Halloween ghosts or monsters. The chief cause in the estimation of many for the recurring problems that our taxpayers have been facing has been the crush of filing because of the deadline, the artificial, arbitary deadline that has been with us so long, of April 15.

I have proposed to the Committee on Ways and Means, and have received some favorable comment already from members thereof, that they consider through the tax simplification process that they are now pursuing, that they consider spreading out, throughout the entire calendar year, the filing date for our taxpayers through their birthdates.

In other words, no longer, if my plan should be accomplished, would we all have to file by April the 15th, but rather to file our returns based on our individual birthdates, the month of our birth dates.

Now I yield to the Speaker pro tempore to let me know what month he celebrates his birthday in?

The SPEAKER pro tempore. April 2.

Mr. GEKAS. You have ruined my whole example. My birthday is April 14, so I have the same difficulty.

Now, I happen to know that the lady at the clerk's desk, Mrs. Topper, celebrates her birthday on May 29. Under my system, she would not have to file her income tax return until May 30 of every calendar year.

Now this is the way it would work: If she had a refund coming, she could file the moment she received her W-2, just as she can do now, but she would not have to file by April 15, but rather the last day of the month of May for her particular case. So if she owes money, she would not have to pay until that month.

Now for the first year that this goes into practice, she has received 1 month's grace period, but ordinarily she could get an extension from the IRS anyway to file her tax return, so that is no big deal.

So if every taxpayer after April 15, the first 4 months, we will all have to file between January 1 and April 30. Under this staggered system, that would relieve the IRS of a gigantic crush; would relieve each taxpayer of the necessity of having to line up on April 15, at some post office to file a tax return and thus, we would have an orderly system that would prevent the chaos that is now occurring.

Some people would say, "Well, what happens to a joint return, what if we have two birthdays in a joint return?" There there would have to be an election made as to which birthday would be preferable to the couple filing the tax return. Thus we would have a very simple system, and effective system, spreading out the IRS impact for a full year.

There is ample precedent, by the way, in the States and the District of Columbia, as I understand it, in the registration fees for automobiles. In Pennsylvania no longer do we have the lineups for the artificial deadline for getting a registration; it goes by birth date; and it has worked handsomely. I understand the same system works in the Washington, DC, area. So we have some precedent for doing so.

This would not change the W-2 system at all; the employers would not have to know the birth date of their employees and give them a W-2 that is comparable to that particular birth date; they would continue with the present system; it is simply that the taxpayer would hold the W-2 until the month of his or her birth date.

We have got to do something. I will not tolerate an answer by IRS that this cannot work, that they cannot put it in their computer. With all the other computer problems they have, I am willing to risk another computer problem to straighten the mess out.

I urge the Members of the House to consider strongly contacting members of the Committee on Ways and Means, and ask them to fully consider this.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. NELSON] is recognized for 5 minutes.

Mr. NELSON of Florida. Mr. Speaker, due to official business, I was unable to be present for rollcall vote 359, on October 16, 1985. Had I been present, I would have voted "aye" on the motion to approve the House Journal.

□ 1520

WE NEED MORE TIME TO ANALYZE THE RELATIONS IN THE WAKE OF THE "ACHILLE LAURO"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington [Mr. LOWRY] is recognized for 5 minutes.

Mr. LOWRY of Washington. Mr. Speaker, I do not come to the special order with any prepared text, or certainly I am lacking very much in knowledge of the subject that concerns me which has been that many of the statements on this floor and within the media in our country ever since the action taken against the four terrorist hijackers of the Italian ship, what I am specifically referring to are statements made against our strong allies or our valued allies, outstanding allies, specifically, the President of Egypt, Mr. Mubarak, whom I have observed to be a thoughtful world leader, and I think we all realize he is a valuable ally of the United States.

Well, I have also realized that the Egyptian-Israeli Camp David accords are one of the most important foreign policy questions, objectives, and progress that has been made in one of the most difficult regions of the world in many, many years.

While I am seeking more information as to specifics of what went on in the negotiations relative to the action taken of forcing down the Egyptian commercial airliner, as to what was known by the leadership of Israel, Egypt, or anybody else, I want to make it clear that I do not know, I do not know. I am looking forward to finding out more. But I really hope that as we discuss this extremely difficult question of terrorism on which we are all united, as against those coward terrorists, and we are all united in having the right action taken against terrorists, I have never met a thinking human being who does not want to do that, I want to also be very cognizant of how important it is that we work with our allies in doing that. Again, in saying that, I am not saying that we did it in this instance, but as I read more and more accounts and as I watched the President of Egypt on, I believe, television on Sunday, and the strength of the statements, and the way he was saying it, I am concerned, and I hope that we are all dedicated toward maintaining a strong alliance with the people of Egypt, a stong commitment, continuing commitment, toward the hopes of the Camp David-Israeli-Egyptian accords and also a strong realization of how important Italy is to us as one of our important NATO allies.

I think we are in agreement on that. I just wanted to make that statement and hope that we are all thinking in that direction.

Mr. Speaker, I yield back the balance of my time.

THE LESSONS OF GRENADA—UPDATED

The SPEAKER pro tempore (Mr. HAYES). Under a previous order of the House, the gentleman from Pennsylvania [Mr. RITTER] is recognized for 60 minutes.

Mr. RITTER. Mr. Speaker, in one captured message, Marshal Ogarkov, then head of the Soviet military, said:

> Nineteen years ago we had only Cuba; today we have Cuba, Nicaragua, and Grenada, and the battlefield is El Salvador. We are making progress.

This week we celebrate the "Lessons of Grenada Week." I would like to commend my colleagues, Representatives NEWT GINGRICH and IKE SKELTON, for introducing a resolution, House Resolution 313, to authorize the President to proclaim the week of October 20, 1985, "The Lessons of Grenada Week."

Grenada is an awfully important place. No, it is not important because it is one of the larger countries in our hemisphere; it is not because it is one of the most economically powerful countries in our hemisphere; it is not important because it has a very large population. No, Grenada is important because Grenada is a symbol.

What does Grenada symbolize? I have here a synopsis of documents. The overall number of documents reaches from the floor to the ceiling and comprised thousands upon thousands of pieces of paper. This synopsis of documents, called "The Grenada Documents, an Overview and Selection," underpins the symbolism of Grenada for all the world to see.

Grenada was the location where the Soviet Union and where the Cubans sought to develop a Marxist-Leninist government. What we have in these Grenada documents are the details of how this process occurred. What we

have are documents in Russian, what we have are documents in Korean, what we have are documents in the languages of the Soviet international fighting force, that state the reality of what was happening in Grenada for those years during the Bishop leadership, up until the date of liberation.

Grenada is important to the American people because it points out how, in detail, the Communist government, supported by the Soviet Union, using the Cubans as surrogates, come to power and then sought to extend their influence elsewhere.

I had the pleasure, or should I say the intriguing experience, of traveling to Grenada with a group of Congressmen directly after the liberation.

While in Fort Frederick, which is where Bishop and some of his supporters were brutally murdered by the usurping Coard faction, I had the opportunity to come across some documents of my own. Our own intelligence services had barely been through this location and the various countries involved in the liberation had barely cleaned up the floors. This document that I have, which is a diary, I believe says a great deal about what was going on in Grenada. Let me just quote from a few of these pages. On one page of the diary, which also has the budget of its owner in there, the monthly budget of its owner, who, I might add, turned out to be a member of the Central Committee, Mr. Liam James. One of the line item entries in this budget is his stipend. This stipend comes from the Soviet Union. This gentleman was being paid $650 a month from the Soviet Union. That is in his line of income as opposed to his line of expenses. He had his taxes, which were $100; he had his party dues, which were $50; he had his credit union costs, which were $50; he had his bank payments, which were $500; and then he had the Soviet Union at $650.

Throughout this diary are references to his interactions with the Cuban Ambassador, which the Soviet Ambassador, with trips to the Soviet Union, with banks, and bank account numbers in New York City.

I recommend for anyone who is really interested in what happened in Grenada to go through this diary and see the influence of the Cuban colonels and the Vietnamese and the North Koreans and the Soviets on this Bishop government.

The lessons of Grenada are awfully important for the American people when it comes to the current debate over Nicaragua. There is a great deal of difference of opinion over what is going on in Nicaragua. I submit, if anyone goes through the Grenada documents even cursorily, their views of what is happening in Nicaragua would change markedly.

We had an opportunity to travel to Nicaragua not long ago, and I went with a fellow Congressman, Congressman BROWN of California. We met with the leadership of all the different countries in the region, and I can tell you the leadership of these countries in the region, El Salvador, Honduras, Costa Rica, understand the lessons of Grenada. Their views of the Government in Nicaragua were eminently clear. We had an opportunity to meet with the Nicaraguan leadership as well. We met with Daniel Ortega, we met with Thomas Borge, in a wide-ranging discussion with Thomas Borge. It was obvious that his background was one of a strong Marxist-Leninist, that he was, as the major figure in the revolution, committed to a Marxist-Leninist state; that his involvement with the Soviet Union and with the Vietnamese and with the Cubans was powerful and that what we see in Nicaragua is essentially a rerun of what had happened in Grenada.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. RITTER. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding because he is mentioning the parallels between the situation in Grenada, Cuba, and some of the other parts of the world. I wonder if the gentleman would reflect upon the conversation that he was recently involved in, where I was there too, with the President of the Soviet Union, Mr. Gromyko, in which he also defined just how closely some of these things are tied together? We know from the Grenada documents there was direct Soviet involvement in Grenada; from some of the Grenada documents we know, for example, that the Soviet military was in regular communication with the Grenadan Government. We know about Soviet involvement in Cuba. We know about Soviet involvement in Angola. The gentleman in this meeting posed a very interesting question of the President of the Soviet Union, Mr. Gromyko. He asked him about the Sovietization of Central America. I wonder if the gentleman might reflect for a moment as to what the very interesting answer of the President of the Soviet Union was.

□ 1535

Mr. RITTER. Yes; we discussed human rights conditions and what we felt was the re-Stalinization occurring in the Soviet Union. We discussed the invasion of Afghanistan and the decimation of an entire population, and we brought up the Sovietization of Nicaragua, specifically.

The President of the Soviet Union, Andrei Gromyko's, response to this comment was that he pitied us because he felt we were victims of a campaign of disinformation, which was running apace in our Western media.

So he took the human rights violations, the fact that I mentioned that five Ukrainian human rights activists alone, Helsinki monitors, some of whom were in their thirties and forties, have died within the last 1½ years in Soviet prisons and camps, and he took Afghanistan, and the Sovietization of Nicaragua as a disinformation campaign. He added on to that—and this is where the gentleman's comment is very relevant—he added on to that, "We have heard the same stories, the same disinformation, about our activities"—Soviet activities—"Cuba and Soviet activities in Angola, and it is the same disinformation."

In other words, the President of the Soviet Union stated that essentially what they were doing in Nicaragua, what they were doing in Cuba, and what they were doing in Angola, was essentially the same. It is all disinformation.

Mr. WALKER. I think this is an important point, if the gentleman will yield again. It was certainly my impression, based upon what we were told by the President in that meeting just a matter of a few days ago, that what he was telling us was that "We are no more involved in Nicaragua than we are in Cuba or Angola," and for those in this country who have been supporting the Sandinista government and who have been suggesting that there is no real problem down in Central America, no real problem in Nicaragua, I think they ought to reflect upon that statement, because it was certainly clear to me, in the course of that conversation, that he was saying, well, you know, it is just all lies, it is lied about that we are involved in Cuba. Well, they only have submarine bases there, they are only providing a large portion of the GNP of that country, they are only doing major things there. In Angola, they are only supplying the army with a great deal of weaponry, they only have Cuban troops based in the country. I mean there is direct involvement. It is not disinformation to suggest that they are there in large numbers, and he is saying, "We are no more involved there or in Nicaragua than we are in Cuba and in Angola." That is a pretty devastating admission when you think of the implications of it.

Mr. RITTER. Yes, it is. I thank the gentleman for pointing that out.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. RITTER. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. Mr. Speaker, I accompanied the gentleman on our trip to Grenada a couple years ago, a little over a year ago, when the liberation took place. The previous

speaker alluded to a lot of the disinformation that the Soviets say is just that, disinformation, when, in fact, we have factual information that proves that they just continue to lie one day after another.

In Grenada, the gentleman will recall that we saw thousands of AK-47 machineguns and 4 or 5 million rounds of ammunition that came from the Soviet Union in 2 buildings, and we saw secret documents that pledged 15 million rubles in direct military aid to the Grenadian Communist Party, and $10 million in aid from the Korean Communist Party to Grenada to outfit 12,000 troops on that Island that was 8 miles wide by 18 miles long, about half the size of most urban areas in the United States of America.

So the Communists, supported by the Soviets, directly supported by the Soviets, were subverting not only the people of Grenada but hoping to use that to launch further military adventurism in Central and South America.

In Nicaragua, we know that last year the Soviets sent 18,000 tons of war materials into that country, 68,000 tons into Cuba, and they sent over $1 billion into countries like Mozambique and Angola.

So when Mr. Gromyko says that is disinformation that the United States is putting out, we know what we are talking about. We know that he is the liar.

Mr. RITTER. If the gentleman will yield back for a moment, he did not even say that it was disinformation that the United States is putting out. He said it was disinformation from our media and that these stories were simply petty accounts. He was not even blaming the Government. I suppose he was blaming the New York Times, the Washington Post, UPI, AP, and essentially the fourth estate of the United States for disinformation.

Mr. BURTON of Indiana. If the gentleman will yield further, that is kind of like the pot calling the kettle black. In Nicaragua, for instance, we found out on the Foreign Affairs Committee that they were involved in a massive disinformation plot here in the United States not long ago, and it was supported by the Soviet Union.

There is a law firm here in Washington, DC called Reichler & Appelbaum, who has received over $300,000 in retainers from the Communist government of Nicaragua last year, and this law firm in Washington decided they had to make the Communist Sandinistas look better in the eyes of the American people, to get Congress off their backs. So this law firm sent a team of people down there to do a human rights study that would favor the Communists. Their airfare was paid for by the Communists, their lodging was paid for by the Communists, their transportation down there and food and everything was paid for by the Communists. And, obviously, when they came back they had written a report that was favorable to the Communist Sandinista government saying that they were the good guys and the freedom fighters were animals. After that, they sent a second team down to verify what the first team came up with in the form of this report purely for the reason to distance themselves from this report because they had received this huge retainer from the Communist Sandinista government. Well, they came back to Washington, and the Washington Office on Latin America, a liberal think tank, wrote this report up, and three U.S. Congressmen met with these people and they had a big press conference, and at this press conference they pointed out that this report, paid for lock, stock, and barrel by the Communists, said that the human rights atrocities taking place in Nicaragua were primarily being caused and perpetrated by the freedom fighters down there instead of the Communist dictators.

Well, that night on all the major networks, everybody in America saw that the freedom fighters were the bad guys and the Communists were the good guys, and it was all paid for by the Communists. It was pure Communist disinformation. So when the Communists tell us that we are involved in a disinformation scam, if you please, we should make sure that the American people know it is just the opposite, that the Communists are buying information in this country through the media.

Mr. WALKER. If the gentleman will yield, I will point out something that the gentleman from Indiana might be interested in. I don't know if he saw the interview on this morning's network by Phil Donahue of the Communist dictator of Nicaragua, Daniel Ortega, but he may be pleased to know, having cited all of the amounts of arms that the Soviet Union has poured into Nicaragua, that when that question was raised on the Phil Donahue show, Daniel Ortega's response to that was, well, he would be glad to take weapons from the United States too.

Mr. BURTON of Indiana. I am sure he would.

Mr. RITTER. What is interesting about the Grenada documents is how in detail the development of this satellite state came about. I have before me just one of the 35,000 pounds of hidden secret documents. It is entitled, "Protocol."

(Mr. RITTER proceeded to make the following remarks in Russian:)

Protocol to the Agreement between the Government of Grenada and the Government of the U.S.S.R. of October 27, 1980—

I am reading this in Russian simply for effect, obviously. But it says something about the Sovietization. These documents are in English. These documents are in Russian. And these documents weigh thousands of pounds.

Now, I think what we find here, with Gromyko's response to seven American Congressmen, characterizing what we know to be the Sovietization of Nicaragua as disinformation and then equating it with Cuba and Angola, a kind of denial response of which the American people have to be very wary.

We saw that in Paris, when Gorbachev answered the French journalist's request on information on political prisoners and human rights violations. Gorbachev's response was to deny the whole thing by attacking the character of the French journalist.

Now, in order to understand what is happening in our Hemisphere, in order to understand what is happening in Nicaragua, in the face of a monumental campaign of denial and disinformation on the part of our adversaries, the Grenada documents and the lessons of Grenada assume far, far greater importance.

The peace talks, the arms talks that will take place between Mr. Gorbachev and Mr. Reagan, take place within this framework of a Sovietization of a Western Hemispheric country. We unearthed a model of the Sovietization which is occurring today in another Western Hemispheric nation. It is important that the people of the United States have some familiarity with the depth of the relationship between the Soviet Union, and their military, between the previous Grenada Government and their military, and between the Nicaraguan Government and their military.

Recently, it was said by the Nicaraguan Government, by Daniel Ortega, that they curtailed human rights and civil rights inside Nicaragua because of American support for democrats, small "d" democrats, fighting for freedom inside Nicaragua. At the same time, reports have reached this country that the military pressure the Sandinistas have been putting against these democratic forces has been reasonably successful, and that indeed, to some extent, the Sandinista-Soviet-Cuba-supported forces have gained somewhat the upper hand.

So here the Nicaraguan Government is reducing drastically the remaining vestiges of civil and human rights inside Nicaragua at a time when militarily they are gaining the upper hand ove. the Contras.

What Grenada shows, what the model shows, is that these individuals are not averse to telling untruths, are not averse to calling black white and white black, as evidenced by the recent performance before seven Congressmen branding human rights violations and the invasion of Afghanistan as disinformation. The American people have got to understand that

when they watch Daniel Ortega on the Donahue show not everything is altogether objective and open.

Mr. ROTH. Mr. Speaker, will the gentleman yield?

Mr. RITTER. I yield to the gentleman from Wisconsin.

Mr. ROTH. I thank the gentleman from Pennsylvania for yielding.

Mr. Speaker, first of all, I want to congratulate the gentleman for making this prediction of what was going to happen in Nicaragua a long time ago. I do not know of any more perceptive Member than the gentleman from Pennsylvania [Mr. RITTER] or the gentleman from Pennsylvania [Mr. WALKER] or the gentleman from Indiana [Mr. BURTON] on this particular issue, and I want to say thanks for taking this time for this special order.

The gentleman predicted this a long time ago. Susan Sontag said something about this, too, in one of her famous speeches, where she said that it seems that the conservatives are much better at predicting what is going to happen in a totalitarian society than the liberals are.

But I think that we have an obligation here in this respect—in that here we have an individual and a country that we debated for hours and hours, days on end, on this very floor, and when there is repression, when there is denial of human rights, you hear nothing from the other side. Where are all the apologists for this regime, not only here on this floor but also in the media?

I just want to make one more comment, and that is that we conservatives are not winning because we do not get our story across. What the gentleman is doing with the special order, in this way, is trying to get the story across, and I compliment the gentleman for doing that. I wish we had more people doing that. But we are losing the war of words, and that is where the next battle, the next war is going to be won or lost.

I compliment the gentleman again for taking the initiative on this special order.

Mr. RITTER. I thank the gentleman.

Mr. Speaker, during the Vietnam war, the South and the North were locked in mortal combat and the North had the Soviets on their side and at that time the Chinese, and the South had the United States on its side. This was a major war, not some Contra group off in the hills somewhere, these were main-force North Vietnamese units attacking a country, South Vietnam. At that time you could hear just loads and tons of comments on the floor any time there was a human or civil rights violation on the part of the South Vietnamese Government in the midst of a major war.

□ 1550

That was here in Washington, DC; here in this Congress.

I yield to the gentleman.

Mr. ROTH. I appreciate the gentleman yielding; I know we have only so much time.

Mr. Speaker, I want to go back to the issue that we are facing here today of what is taking place in Nicaragua, because I do not think we want to lose the focal point. I think we want to take a look at that issue and spend just a little time on it. Again, I appreciate the gentleman yielding.

Mr. Speaker, to me, it is an outrage that the Nicaraguan ruler, Ortega, who represses every form of freedom of expression within his own society will come here to the United Nations and berate the policies of civilized governments including our own. The stench of hypocrisy hangs so heavily that even its most ardent apologists, both in this body and in the national media, I think should be ashamed of themselves.

Where is the outrage? Where is the press coverage? Where are the liberals in this body who constantly lecture about human rights and fledgling democracies like El Salvador? Where are they? Mr. WALKER, where are they?

I am particularly horrified by the recent clampdown that has taken place as far as the church is concerned in Nicaragua. It is bad enough that the thugs from that regime have publicly humiliated priests time and again who have refused to accept the Sandinista-controlled "People's Church." It is even worse that Nicaraguan faithful to the traditional church are being beaten and jailed, incidentally, without due process of law.

How can this be? The church clearly sided with the revolution that brought the Sandinistas to power. Perhaps Mr. Ortega's apologists would like to blame the U.S. Government for the increased repression. I think they should wake up and confront reality. That is why I think this speech of Susan Sontag, and I am going to ask that that be put into the CONGRESSIONAL RECORD to be read by every Member of this body, because here is a person on the other side of the aisle, a liberal, who says, "Hey, we are not being realistic and these are the reasons why." Here are the reasons why the conservatives are so much more accurate in determining and predicting what is going to happen in a totalitarian, especially a Communist society. I think that that should be an awakening to us all.

Mr. RITTER. During the era of Maurice Bishop in Grenada there was a wide body of support for Mr. Bishop here in this Congress and within certain aspects, sectors, of American intellectual thought. Mr. Bishop is a charismatic figure, by the way. They are all charismatic figures; Daniel Ortega is a charismatic figure; Fidel Castro is a charismatic figure; Gromyko is a charismatic figure. But simply because somebody is attractive and well-spoken and has a nice personality and a capability personality does not mean that what they stand for is anything that we should be standing for.

I yield to the gentleman.

Mr. ROTH. I thank the gentleman for yielding to me. I do not know if they are all charismatic figures; I personally do not think so. Anyhow, I want to make this comment about the church in Nicaragua because I think it is important.

The church is under attack because the bishops there have called for peace and reconciliation among all segments of society, and is that not what we have always done as far as El Salvador and all the other countries that we are concerned about? Yet, the regime sends the armed mobs to disrupt services, destroy church property and beat up the people who are worshiping.

The moral authority that the church enjoys among the general population has forced this regime to bend to total power to expel many priests from their own country. As a spectacle, the repression that takes place there, I think its going to be harder and harder to ignore. I hope that those on the other side of this issue will join us in pressuring the regime to stop the persecution that is taking place. After all, I do not think we would acquiesce to that in any country in the world, especially in a country like Nicaragua.

So if we are looking for evenhandedness, we are looking for a dual policy, I think this is precisely the time for us to speak out and ask for that. I thank the gentleman again for being so gracious with his time.

Mr. RITTER. I thank the gentleman for his valuable contributions. The lessons of Grenada are particularly important today as we witness a dynamic situation in Nicaragua, a situation where the President of Nicaragua, the so-called President of Nicaragua, is here propagandizing in our country much in the same way that Maurice Bishop did when he was top leader in Grenada.

Mr. Speaker, I yield to the gentleman from Indiana [Mr. BURTON].

Mr. BURTON of Indiana. I thank the gentleman.

Mr. Speaker, in addition to the repression that existed in Grenada when the Communists took over under Maurice Bishop and the repression that is taking place in Nicaragua today and in Vietnam and elsewhere, one thing that really ought to be brought to the attention of the American people is what they are doing to the minds of the very young.

The first thing the Communists do when they take over a country is bring in teachers to make sure that they indoctrinate the children in revolutionary tactics and Communist dogma.

In Vietnam for instance, General Weyand, our last commanding general, was asked this question: "Why did the Communists keep coming when they lost over 1 million men?" The United States lost about 55,000 men, the South Vietnamese lost about 55,000 men, but the Communist Vietnamese lost over 1 million and they kept coming. He was asked why that occurred.

He said, "In my opinion, I found something in a North Vietnamese Communist textbook that gives me a clue, and that was early ideological indoctrination. If four Imperialist warmongers appeared and two were killed, how many would be left?" They taught children to add, subtract, multiply and divide by using revolutionary examples. Murdering people.

Now, in Nicaragua today, you and I have been down there in recent months, when I was in Nicaragua I was able to get a Communist Nicaraguan first grade mathematics book. If you look at that book you will find that they are adding by 3 AK-47 machineguns plus 3 AK-47 machineguns or how many machineguns. Two handgrenades plus two handgrenades are how many handgrenades. That is just in the first grade. They are indoctrinating these children in our hemisphere to be zealots like they were in Vietnam. If we are not aware of what went on in Grenada and what is going on in Nicaragua today, our children very likely will have to face these children on the battlefield at some future date, and nobody wants that.

We need to be aware of what happened in Grenada and what is going on in Nicaragua right now and make sure that we stop it.

Mr. RITTER. I thank the gentleman for his valuable contribution.

There are some 250 to 300 college campuses which will be dealing with the lessons of Grenada this week. There are some 50 high schools which will be dealing with this subject. As we try to meet the propaganda offensive of Gorbachev and this new relationship between Gorbachev and the media, we have no greater intellectual resource at our fingertips than what has happened in Grenada.

Again, Grenada is not the biggest country, it is not the wealthiest, it is not the most populous, but it serves as a model. A model for Nicaragua, a model of what happened in Cuba. The Angola situation, Ethiopia. I would like to just point out that idea of models for a moment.

One of the pages in this diary of Liam James', one of the Central Committee members, talked about his meeting with "B." "B" is Bishop, and he refers to Maurice Bishop as "B" throughout the book. There are three items here on this particular meeting day in the meeting with "B."

One, Model for Seizing State Power. Two, Model for Economic and Military Destabilization. And, three, Model for Terrorism Against the People.

□ 1600

This is pretty strong stuff. And if the Soviets and the Cubans are responsible for this kind of Communist model-building in Grenada as all of the documentation shows that they were, and if they are active in Nicaragua as they are today, then one needs to draw the simple conclusion that if we could ever break into the hall of documents or the archieves in Managua, we would come up with perhaps more than 35,000 pounds, and we would come up with a teaching week that we could conduct calling it the lessons of Nicaragua Week.

I will close with the comment that what resulted in Grenada is a very hopeful sign for Western civilization, because, number one, it showed that a Communist regime could be turned around, that it was humanly possible, and that gives great hope to resistance movements fighting in Angola, in Cambodia, in Ethiopia and in Nicaragua itself. It gives great hope to what is the real trend in revolutionary movements in the 1980's, and that is revolutionary movements against Marxist-Leninist governments.

The idea, the very idea that poorly equipped, freezing, hungry freedom fighters in Afghanistan could be taking on the entire weight of the Red Army, some 125,000 strong, is in itself a miraculous idea. And that gives hope to other revolutionary movements which have taken hold around the globe comprising this new trend.

I commend once again the diligent originators of this resolution, Representatives GINGRICH and SKELTON. I call upon my colleagues to play their pertinent role in the Lessons of Grenada Week.

Mr. Speaker, I yield back the balance of my time.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 2781

Mr. MOLLOHAN. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor on the bill, H.R. 2781.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

FIREARMS OWNERS' PROTECTION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri [Mr. VOLKMER] is recognized for 60 minutes.

GENERAL LEAVE

Mr. VOLKMER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. VOLKMER. Mr. Speaker, this morning I filed Discharge Petition No. 4 which will bring the Firearms Owners' Protection Act to the floor. I am greatly encouraged by the support given by my colleagues so soon.

I want to thank my good friends—LARRY CRAIG, TOMMY ROBINSON, and RON MARLENEE—for joining me in this special order to discuss the philosophy and implications of the Firearms Owners' Protection Act.

The Protection Act represents the second most important step in the history of American gun owners—the first was the second amendment to the U.S. Constitution. The Volkmer-McClure Firearms Protection Act is the result of 6 years effort to guarantee the liberties of those who enjoy the right to own firearms for sport, recreation, and protection. The Protection Act will make the provisions of the 1968 Gun Control Act reflect the values and heritage of this country by directing enforcement toward those who illegally traffic in firearms, toward those who criminally use firearms and away from regulation of the law-abiding citizen. This bill will modify the primary Federal law affecting our 200,000 licensed firearms dealers and 80 million firearms owners and collectors to insure their civil rights are not abused as they presently are under the 1968 Gun Control Act.

The 1968 Gun Control Act was hastily drafted during a time of tumult in the country. One of its stated purposes was "To provide support to Federal, States, and local law enforcement in their fight against crime and violence." Along the way this act required persons "engaging in the business" of dealing in firearms to obtain a license, required these dealers to maintain records of sales, and imposed felony penalties, forfeiture of firearms, and other penalties on unintentional violators.

Enforcement agencies, like most organizations seek to grow. Over the 12 years following enactment of the 1968 Gun Control Act, the firearms enforcement unit grew from an IRS subunit with 214 agents to a full Treasury Bureau—Alcohol, Tobacco, and Firearms—with more than 1,200 agents on firearm-related duties. Such explosive growth required impressive results, and the 1968 Gun Control Act provid-

ed the open door to make easy cases against unsuspecting persons. With the strict liability provided by the act even the most trivial and unintentional misstep would do.

As a result many of these trivial cases began to be brought to my attention in which the purpose of the original act had clearly been ignored. And another stated intent of the act—"to place any undue or unnecessary Federal restriction or burdens on law-abiding citizens with respect to the acquisition, possession, or use of firearms"—was clearly violated by the technical enforcement practices being utilized. Citizens such as a disabled veteran and Boy Scout leader, a policeman in Maryland, who as a French national earned his American citizenship by volunteering for the Army during the Vietnam war, and an elderly couple in rural New Mexico were just examples of those law abiding individuals caught up in the web of bureaucratic technical enforcement. This is why I first introduced the Firearms Owners' Protection Act in September 1979.

At that time, I was a member of the Judiciary Committee and a member of the Subcommittee on Crime which has jurisdiction over firearms legislation. By the end of the 96th Congress 181 House Members had cosponsored the Protection Act, including a majority of the subcommittee. What was the result of this show of support—nothing. No hearings were held on the merits of the legislation, and the one hearing dealing with BATF oversight was adjourned when we began going too deeply—for the chairman—into BATF practices. My good friend, JIM MCCLURE, introduced Senate companion legislation during the same Congress and secured majority cosponsorship of that body before adjournment.

In the 97th Congress the Protection Act was again introduced by Senator MCCLURE and myself. In the House 180 of our colleagues again cosponsored the bill and again no action of any kind occurred in the House Judiciary Committee. Our colleagues in the other body, however, held 3 days of hearings, specifically on the merits of the legislation. Also, during this Congress a series of meetings among officials of BATF, the White House, represented by now Attorney General Meese, Neal Knox of the NRA, Senator MCCLURE, and myself, resulted in a number of modifications which met Federal law enforcement concerns and were agreed to. Ultimately, the Senate Judiciary Committee reported a modified version of the bill but unfortunately the Congress adjourned sine die before the full Senate could act.

Again, in the 98th Congress the legislation was introduced and again no action occurred in the House. The other body, however, held two additional days of hearings on the merits of the bill and following another series of meetings with Treasury and White House officials further refined the bill to insure no adverse law enforcement effects. The Senate Judiciary Committee again reported the Firearms Owners' Protection Act but again sine die adjournment prevented action.

This brings us up to the current Congress. Because 5 days of hearings had previously been held and the bill twice reported by the Judiciary Committee, by unanimous consent, the Senate bill was held at the desk and became eligible for immediate floor consideration.

As we all know, on July 9 the Senate passed the Firearms Owners' Protection Act by the overwhelming vote of 79–15. Because of the history of strong support for the protection act many people have asked why the House has not acted upon the legislation. I believe that the answer lies in anti-firearm ownership philosophy which the chairman of the Judiciary Committee holds. Chairman RODINO's first public comment upon passage by the Senate of the legislation was "the bill is dead on arrival in the House." These are hardly the comments of a chairman who will give serious consideration to the merits of the legislation. In addition his bias against firearms ownership can be best illustrated by this comment before the Senate Judiciary Committee, Subcommittee on Crime on March 4, 1982. The chairman stated in reference to his gun control legislation (the Kennedy-Rodino bill): "I do not claim that it will stop crime. I realize that, despite a national law, criminals would continue to find ways to get these deadly weapons." If a national law which would ban the manufacture and possession of some firearms, and would seriously restrict a citizen's ability to own other firearms, but will not prevent criminals from acquiring firearms—then what is its purpose?

The only purpose can be to prevent the lawful ownership of firearms by the general public. In other words, those who control the Judiciary Committee do not believe anyone should own a firearm because they find no use for them. I believe the chairman will get a strong argument on that point.

To emphasize this point I would like to share a letter from one of my constituents representing 30 percent of the adults in the country that hunt.

DEAR CONGRESSMAN VOLKMER: I have been trying to write this letter for what seems to have been all morning. I wanted this letter to sound really official but I'm a mechanic not a businessman. I even have a dictionary next to me so I can spell all of my words correctly. I guess there hasn't been an issue of as great as importance to me as this gun control business.

Sir, My two boys are coming of age when they will soon be joining me on my hunting trips for deer and turkey. There are many good memories that a person gathers over the years of hunting. It is truly impossible to put these memories into words on a sheet of paper for example how the hair stands up on the back of your neck when that ole boss gobbler cuts the complete quiet on a fresh spring morning or when that buck of a lifetime has made the largest scrape you have ever seen in your area and you know that this is the year the two of you will finally meet.

I want my sons to have the right to gather their own memories and join me on these hunting trips. I guess that the people that are trying to take our firearms away from us have just not experienced the pleasure of hunting.

So sir, I am counting on you to help pass the McClure-Volkmer firearms owners protection bill.

Sincerely,

TERRY L. SEALS.

□ 1610

Before I go any further, I would like to say that the strong opposition to this legislation, of course, comes from the National Coalition to Ban Handguns. They have repeatedly wrongly characterized this legislation and tried to make it out that it is legislation that will assist criminals and felons. As one who has been in the past strongly supportive of legislation for mandatory sentences for those who commit a crime with the use of a weapon in the commission of a crime, I would like to say that that characterization is all wrong.

I have here a newspaper that was printed in my district during the last campaign. I would like to quote from here. It says that this bill that we have would destroy the limited Federal protection that prohibits handguns from being purchased by felons, fugitives, drug addicts, court-adjudged mentally defective people.

It does no such thing, but these are the kinds of misrepresentations that opponents of this legislation would try to leave the law-abiding public, law-enforcement officials to believe.

It does not do anything like that.

It also says that it is a mail-order bill, to permit mail-order sales. It does not. It does not change any provision in the present law in regard to mail-order sales. It does not change any provision in the law that now prohibits felons, former felons, criminals, mentally defective persons, drug addicts, or anybody else that are presently restricted from buying guns. It does not change the law to permit them to do so.

These are things that are put out by those who want to take everybody's gun away, every gun, every rifle, every shotgun, from every hunter, from every law-abiding citizen in this country. They are known as the Handgun Control Coalition, the handgun control people. They are putting out information around the Hill in the last few days, including today, that again is misrepresentative. I believe everybody should take that into consider-

ation. This is a sportsmen's bill. It is a bill to deal with some of the problems that have been created by legislation that was passed in 1968, in the Gun Control Act of 1968.

With that, I yield to the gentleman from Idaho [Mr. CRAIG].

Mr. CRAIG. Mr. Speaker, I would like to thank my colleague, the gentleman from Missouri, for taking this special order and for his phenomenal leadership on this critical national issue. It has been my pleasure to join with my colleague, the gentleman from Missouri [Mr. VOLKMER] over the last several months in putting together the rule and the discharge petition that is now before this body.

I would like to talk from a slightly different point of view, but certainly one that coincides directly with my colleague's concerns and why he has become a leader, with Senator MCCLURE of Idaho, in this very, very important issue.

Mr. Speaker, the Firearm Owners Protection Act is designed to correct a serious misapplication of the law. It is not an antigun-control move, nor is it designed to subvert the intent of the law as it now stands. Innocent citizens who have had no intention of wrongdoing are being persecuted and prosecuted. It is our task to bring these injustices to a proper and a prompt end.

The Gun Control Act of 1968 was conceived and brought forth in an atmosphere of hysteria, not only here in the Congress of the United States, but across this country. Assassinations of leading and beloved Americans had become too commonplace and the citizenry demanded, and rightfully so, that Congress take some form of steps, some immediate action, to counter these kinds of tragedies that were going on in our country and, of course, the Congress acted. It acted in a swift way and we are now beginning to feel the consequences of that act today; that as happens all too often, the steps that we took here in this body to satisfy what was public clamor for a solution failed in providing any kind of solution whatsoever.

The 1968 act introduced an era of violence which dimmed even the horrifying killings that had brought forth the very act itself.

From 1967 through 1972, the national homicide and handgun homicide rate rose by half in this country, while robbers and robberies involving the use of handguns nearly tripled.

In other words, did the law of 1968 work? No, of course, it did not work. We know that now. We have records to prove and statistics to demonstrate that the act itself served really no purpose whatsoever.

It can potentially affect, though, nearly half the households in America today, for this number, nearly half of the households in America today, own guns and are exposed to the needless and counterproductive application of the 1968 law.

This problem is not only a potential one, it is a real one that is occurring on a day-to-day basis in every community and in every State and in every county across this country. It is a fact and this legislation attempts to deal with it.

The Senate Subcommittee on the Constitution has found that 75 percent—now, let me repeat that figure—that 75 percent of the Federal firearms prosecutions are aimed at ordinary citizens who have neither criminal intent nor any idea of breaking the law.

In other words, the 1968 Gun Control Act is resulting in the prosecution of innocent citizens in every State who have done nothing more criminal than to own a gun or to result from some slight mistake in a bookkeeping error that is easily correctable.

This is a situation that this act can correct and will correct if this body is courageous enough to move as rapidly as the Senate has.

With so much enforcement effort being directed toward noncriminals, we continue to see those who do the actual wrong going free. A society in which the innocent are punished and the guilty left untouched is a society in serious trouble, and in my opinion the 1968 act contributed to that kind of attitude in our country.

Every item in the Firearms Owner Protection Act is designed to correct and recognize a documented flaw in the 1968 act. Every concept is shaped to free those who enforce the law, to pursue those who break it with the intent of doing wrong. It targets those who knowingly sell weapons to those who are prohibited from owning them and who are the violators of the law, as well as those who use them for purposes contrary to the interests of our society.

The proposal we seek to bring to this House floor will not give free rein or undue encouragement to all owners of firearms. Substantial regulations will remain on the books to ensure that guns of all kinds are used properly, as they should be and as they are by the majority, the substantial majority of gun owners in this country. Legitimate owners of firearms recognize their responsibilities and live up to them under the Constitution. They should be protected. They should not be prosecuted.

Mr. Speaker, this legislation has received the careful thought and sober review which should have gone into the original act in 1968 and which we now attempt to correct today.

Let us now in a calmer environment, in a calmer atmosphere, right the wrongs Congress has created and free the forces of law to do their rightful work, and that is to protect those of us and the gun owners across this country who are the innocent, who are currently being prosecuted.

Now, Mr. Speaker, I have been asked by a good many Members here on the floor why, in view of the hearings scheduled by the House Judiciary Committee, as my colleague, the gentleman from Missouri, has mentioned, should we seek to discharge this issue at this time?

Well, it is awfully hard to believe that an issue like this which the American public are clamoring for should not get a fair hearing and fair review before the chairman of the proper committee, and that is the House Judiciary Committee; but as my colleague, the gentleman from Missouri, has mentioned, the chairman of that committee right up front on the day that it passed the Senate told us exactly what he thought of it, and those comments were, "Dead on arrival."

Now, what does that tell us? That tells us very clearly that the opportunity for fair hearings, but more importantly, the opportunity to move from fair hearings to the floor for a good, clean up-or-down vote, to allow the membership of this body in representation of their constituency across the Nation, to reflect the attitude of that constituency, simply will not be given an opportunity unless we follow the route that we have chosen and that, of course, is to discharge a rule that will give that kind of fairness and direct participation on the floor.

Now, that is what we are about, Members of this body, is to discharge the rule, not the bill, but to then give the opportunity of fair discourse on this floor and a chance for the Members of this body to get a clean up-or-down vote on a most critical issue.

As I mentioned in my earlier comments, it is not our intent, and I think anybody who reads McClure-Volkmer S. 49 knows this is not an intent to subvert the law. This is clearly an intent to correct the law that was poorly thought out, that was moved in a period of hysteria in this country and that has today now built a record of misapplication in its targeting of the innocent, and more importantly, the honest, the fair, and the law-abiding citizen who believes, as many of us do, that it is their right to own and bear arms.

I appreciate the leadership of my colleague, the gentleman from Missouri, in this area. It is my privilege to work with him on this discharge and the passage here on the floor of this most important legislation.

Mr. VOLKMER. Mr. Speaker, I wish to thank the gentleman for his remarks and also wish to commend him for the work that he has put into this, not only in helping with the rule, but in planning strategy and other things on the legislation. His advice has been most welcome and very well taken and

51-059 O-86-39 (Pt. 20)

I appreciate it very much. I appreciate his strong support and look forward to working with the gentleman to a time when we will be able to finally have a chance to even debate this issue on the floor of this House.

As we know, the Judiciary Committee since 1979 has not even given us that opportunity and this at least by discharging the rule will give us a chance.

□ 1625

As the gentleman knows, in the rule we give them the opportunity to offer amendments, et cetera, to the bill, so we are trying to be very fair about it, where I do not think they have been very fair to us at all.

Mr. CRAIG. If the gentleman will yield further, briefly, one of the considerations that both the gentleman from Missouri [Mr. VOLKMER] and I, and others who worked together to craft this rule took under very long and hard consideration was openness and fairness.

Mr. VOLKMER. Yes.

Mr. CRAIG. It was not our intent to block any effort, but to give a direct and open opportunity here on the floor for all participants. Let me congratulate my colleague, the gentleman from Missouri, for bringing forth that kind of rule. There are those here on the floor who, for one reason or another, and in almost always sincere applications, like not to use a discharge petition because they believe it overrules the leadership of this body and certainly the activities that are the prerogative of the chairman. It was with that consideration that this rule was crafted. We believe it is the kind of rule that almost anyone can sign off on and support because of its openness, and that is why we felt we could move it on a discharge because of that fair play element that is clearly written within the rule, and the gentleman is to be congratulated, HAROLD, for that kind of leadership in the crafting of that rule.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Louisiana.

Mr. MOORE. I thank the gentleman for yielding.

Mr. Speaker, I want to thank the gentleman from Missouri also for filing the discharge petition today to enable the Firearm Owner's Protection Act, H.R. 945, to be brought to the House floor. I have signed this petition, and I serve as a cosponsor of this bill.

This petition is not an effort to prevent a full review and open debate on gun issues. On the contrary, it will allow the opportunity to have this debate on the House floor where all Members can participate and to do so for the first time.

The House Committee on the Judiciary is beginning a series of hearings around the country on gun issues, and I commend those efforts to obtain public comments on pending legislation, but I also think this discharge petition is absolutely necessary to ensure that the House will have the opportunity to consider the Firearm Owners' Protection Act and other measures which could be offered under this rule, rather than have the legislation bottlenecked in the Committee on the Judiciary.

In the past, the Committee on the Judiciary has worked in this area to restrict consideration of legislation to protect the constitutional rights of many by adhering to opinions of few who favor legislation to ban firearms for law-abiding citizens. Earlier this year, the Senate overwhelmingly approved the Firearm Owner's Protection Act, which makes revisions to the Gun Control Act of 1968. This legislation brings needed protections to gun owners and to gun dealers who legitimately own and sell firearms for protection and sporting purposes, and who are guaranteed the right to keep and bear arms under the Constitution.

Unfortunately, under enforcement of our current gun laws, many have been harassed and abused. I am a staunch supporter of the Constitution and believe that our forefathers, in their infinite wisdom, were correct in setting in concrete basic rights for our citizens. It is the preservation of these rights, in particular the second amendment to keep and bear arms, that we seek to protect through the Firearms Owner's Protection Act.

I have heard from numerous sportsmen and gun owners in Louisiana who feel that their constitutional rights should be protected, and they strongly support this legislation. Therefore, this legislation ought to be brought to the House floor and their opinions ought to be viewed and their rights ought to be asserted.

I support it as well, as I do not feel that gun control deters criminals, but only those who would be protected from them by having firearms. I can well understand law enforcement concerns for deterring criminals from obtaining firearms. My own brother is a career policeman and has been for 14 years. I was one briefly in the military. But our focus needs to be not on keeping guns from the lawful citizens but on more stringent penalties for criminals who commit crimes with firearms.

Throughout my tenure in Congress, I have sponsored legislation requiring mandatory penalties for the commission of a crime with a firearm, and I am very pleased to see this was incorporated in the crime reform package which was enacted last year by the Congress and is also contained again in the Firearm Owners' Protection Act as passed by the Senate.

Current laws to prevent convicted felons from owning or possessing guns are not preventing criminals from obtaining them. As I said earlier, they are burdening the law-abiding citizens who want to own firearms, as our Constitution guarantees them the right to do. So the answer is not in penalizing sportsmen and your and my neighbors who want to own firearms. We need to make sure their rights are not infringed upon.

We need to pass and sign this discharge petition and I urge all of my colleagues on the House floor to join us in so doing. We need to bring these bills to the House floor for debate and then to pass proper gun laws that can properly regulate without over-regulating or harassing the American people.

I would say to the gentleman who is the lead author in this legislation, he has already commented that this bill would not allow mail order sales or in any way repeal the law as passed in 1968 barring that. Is that correct?

Mr. VOLKMER. That is correct. I would like to emphasize that with the gentleman from Louisiana: That we do not have any effect on mail order sales at all. They are prohibited under the 1968 Gun Control Act. We do not change that one bit, and any allegation by anybody to the extent that the legislation does do it is a misrepresenation.

Mr. MOORE. Would this bill forbid inspections of dealers, except when preceded by advance notice?

Mr. VOLKMER. No; it does not forbid them. We do set out criteria for inspections. We allow inspections, in other words, if law enforcement officials wish to trace a firearm, they can inspect the records, if it is necessary, and to investigate a criminal offense where a weapon was used, they can inspect premises. The Secretary or the BATF would have an allowance for an annual inspection to determine whether or not the person is keeping accurate and proper records. If the authorities, BATF again, or Treasury, were to determine that a person perhaps is violating the law, like any other occasion when you are going to inspect someone's premises for a law violation, you can get a search warrant and then to in and inspect the premises.

So the allegation that we restrict them or do not permit inspection of these records is not correct.

Mr. MOORE. As a matter of fact, as I understand the legislation, the only time we require advance notice for an inspection of a dealer is merely on a courtesy visit, is that correct?

Mr. VOLKMER. That is correct.

Mr. MOORE. I thank the gentleman very much, and I am pleased to join the gentleman. Again, I would urge

my colleagues to sign this discharge petition.

Mr. ROBINSON. Mr. Speaker, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Arkansas.

Mr. ROBINSON. I thank the gentleman for yielding.

Mr. Speaker, first I would like to commend my colleague, the gentleman from Missouri. As he well knows, I worked with him on the rule and I have worked with him to ask people to sign the discharge petition for which, as of this afternoon, we have 44 sponsors of that petition, which I think is remarkable.

First I would like to say that it is a sad commentary, in reference to the way our House operates, that we have to be here today, but it should not surprise us. The chairman of the Committee on the Judiciary has buried basically every bill that deals with citizens' rights and their feelings and their opinions and how others think our Government ought to operate. We go back to busing, abortion, school prayer, et cetera. It does not surprise me.

But one thing I feel good about today is that I believe there is a groundswell of support in this House of Representatives to send a strong message not only to the gentleman from New Jersey (Mr. RODINO), our distinguished chairman, one who, I might add, if you really want to hide something from him, put it in the law book, but I think there is a strong groundswell of support in this House that if something does not change as far as the way the Committee on the Judiciary buries bills that we, the Members of this great body, elected by our constituents to come up here and work for them, if they do not change what they are doing, I think we might see some changes made in the direction of that committee the next time around.

I know my time is limited and I do not want to take any time away from some of our colleagues, but I feel compelled to ask my colleagues to listen briefly to some statistics that will be brought out as we further debate the McClure-Volkmer bill.

According to the lastest FBI National Crime Report of 1984, firearm involvement in homicides fell from 68 percent in 1974 to 59 percent a decade later. The family homicide rate, which is the closest statistical approximation to the so-called crime of passion, dropped from 2.4 per 100,000 in 1976 to 1.4 per 100,000 last year, the lowest level recorded since prohibition, and that is against the backdrop that now we have more weapons in this country than we have ever had before.

Also, in a recent study commissioned by the U.S. Department of Justice, it was found that among convicted felons, the one group that we fear the most, 69 percent did not carry firearms. Instead, they carried knives, razors, brass knuckles, et cetera.

□ 1635

The fear of stiffer sentences caused 79 percent of the respondents not to carry guns. Eighty-eight percent of the criminals questioned felt that gun laws only affected law-abiding citizens.

Now please listen to me. These are criminals incarcerated in penitentiaries. Eight-eight percent felt that gun laws only affected law-abiding citizens. And in fact, in this study it was determined that the criminal's fear of the armed victim was pronounced. In States with less-restrictive gun control laws, criminals were less likely to attack citizens because of the possibility that they might be armed.

In other words, they were afraid they might be shot by the person that lived in the house that they were trying to break into.

Also, 83 percent of the criminals surveyed said that if they could not obtain a handgun, they would simply saw off a rifle or a shotgun.

The statistics go on and on. The upshot of the study was that criminals do not go to the retail store and buy firearms. They either steal them or buy them on the black market.

For the rest of my time, Mr. Speaker, I would like to address myself from the law-enforcement perspective. Prior to entering this great institution, I spent 21 years in the criminal justice field, starting out as a student. Later I taught criminal justice courses, and in the latter 10 years of my career. I served in law-enforcement administrative positions dating back to the early 1970's when I was a police chief. Later on, I served in Governor Clinton's cabinet in Arkansas as the director of the State Department of Public Safety, not only over the Arkansas State Police, but over our crime reporting agencies and other law-enforcement-type operations in the State of Arkansas.

Prior to coming to this body, I served two terms as the chief law enforcement officer in Pulaski County, AR, Little Rock, where I served as sheriff.

It greatly disturbs me when I see that a group called Handgun Control, Inc. puts out a publication that says law enforcement says vote no on S. 49. I am not going to burden my colleagues with what is inside this, but I am a little bit disappointed with some of my former colleagues in the law enforcement field, especially the International Association of Chiefs of Police, which is a great organization that I once belonged to, and also the National Sheriffs Association.

Come on, fellows, all of you know what the real causes of crime are. And if you would just read the latest Crime in the United States book, which all of you have on your desk, you would know that there are many causes of crime. There are about 11 socioeconomic factors, as the FBI calls them, and they are listed in this book. There is no mention in this book about firearms as being a cause of crime.

The truth of the matter is, the reason we have crime in this country, from the law-enforcement prospective, is simply that most of you spend entirely too much time using radar to stop law-abiding citizens traveling a few miles per hour over the speed limit instead of patrolling residential areas and trying to catch criminals. And I know why you do it. You have to do it to raise revenue.

But do not put your name on something to try and convince the Members of this great body and the citizens of the United States of America that you are trying to say that because we have a right under the Constitution to bear arms and protect ourselves, mainly because if you would start creating a more proactive law-enforcement scenario in this country, and stop spending too much time writing traffic tickets, spend more time going after the real criminals, patrolling neighborhoods, protecting those that are paying your salaries, then I think we might see your part of the crime rate go down.

There are many, many other factors that I will elaborate on once we get the magic number of individuals to sign our petition of discharge. But I want to close by saying this: Gentlemen, I know many of you are going to come down to the well and try to argue for your positions. But I want to sort of warn you today, I am prepared for you, all of you on the Judiciary Committee that think you really know something about crime in this country. I have looked at some of your records, and I think my friend from Missouri, Mr. VOLKMER, is going to talk about that.

You are not really concerned about protecting the rights of citizens and the rights of your constituents. You are more concerned about protecting the rights of the criminals, because somehow you think that the Constitution was written only to protect the criminal, only to protect the minority viewpoint.

Well, I for one, think the Constitution was written mainly to protect we, the law-abiding citizens, and to protect the innocent.

Mr. VOLKMER. Before the gentleman yields back, I would like to just emphasize again that the blue flyer-like that was put out, in the very minor print, it seems to say vote no to law enforcement, but let us really find out who is that printed by.

Mr. ROBINSON. It is printed by the Handgun Control, Inc.

Mr. VOLKMER. And those are the people that want to take anybody's gun away from them, not only handguns, but their ultimate aim is to take away rifles and shotguns.

Mr. ROBINSON. And then only the Sandinistas and the Communists will have guns.

Mr. VOLKMER. Perhaps some of the people that were passing those out may have some guns. And you do have perhaps some law-enforcement people that I think are very misguided that feel they are the only ones that have guns and they are the ones that take on the criminals and nobody else. But I differ with that.

Mr. ROBINSON. If my colleague will yield for a moment, my colleague is a former prosecutor and I am a former law enforcement officer.

Let me tell the gentleman something. I started out as a rookie cop. I spent 21 years of my life out there risking my life every day. I never investigated a crime in which I went down to the local retail store and looked at the ATF form to see which criminal purchased that firearm. That is the most ridiculous thing I have ever heard of.

I am looking forward to this battle, and we are going to win this.

Mr. VOLKMER. If we had more time, we would get into a debate. We find that criminals do not go down to buy their guns at the dealer, and register them and everything and give their name and everything else. That is not the way. The gentleman knows, he has been in the business, and I have been in the business, that that is not the way they get their guns.

Mr. ROBINSON. That is not the way it happens.

Mr. VOLKMER. They get them from theft of illegal purchases, and that is the way they get their guns, not through the people that are governed by this legislation.

Mr. ROBINSON. I yield back to the gentleman from Missouri.

Mr. CLINGER. Mr. Speaker, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. I thank the gentleman very much for yielding and want to congratulate him for bringing this special order. Also, I sympathize with and recognize the sense of frustration the gentleman from Missouri has to deal with. The gentleman has fought so long and hard to bring this issue to the floor and has been frustrated every term, and I share that sense of frustration.

I am one of those who is reluctant to consider the discharge petition route because it is an extraordinary route, and it does somewhat circumvent the orderly procedures of the House. But in this case, there really is no other way to go. That is why I am going to break precedent in my case and sign the discharge petition.

Mr. VOLKMER. I appreciate that.

Mr. CLINGER. Because I deeply share the gentleman's sense of frustration of not being able to bring this issue before us.

I represent a very rural district in northern Pennsylvania. I would like to just come back a moment to why this bill is so terribly important to our hunting population and to sportsmen everywhere.

But in my district, with an abundance of forests, deer and other game, Pennsylvania has the largest number of deer licenses issued anywhere in the country. It is a hunter's paradise, and it is a time-honored tradition for many families in my district, as well as, I am aware, throughout the country. It is a sport that is often shared, as has been mentioned earlier today, by many members of a family. It is a family recreation. And I think respect for firearms, at least in my experience, is taught at a very early age to all of the family members.

More importantly, I think new hunters receive proper instruction from experienced family members. It is a tradition that is handed down from father to son, as the gentleman alluded to in the letter he read from his constituent.

The hunters who I represent in this body have told me that passage of this legislation is absolutely necessary to check the mindless bureaucracy in place at the Bureau of Alcohol, Tobacco, and Firearms at the present time. It is really an unwarranted harassment of decent, law-abiding citizens by this agency, and we have to bring it to a stop. And this is really the only vehicle which will do that. It is going to remove those provisions of law which they have been able to use to intimidate. I think this kind of approach by the BATF has no place in a democracy where, as we all know, the right to bear arms is guaranteed by the 2d amendment to the Constitution.

Restaurants and hotels are another issue that I would like to point to. What a tremendous amount of help hunting is to our peripheral industries. Restaurants, hotels and other business establishments in my district welcome the patronage of hunters visiting from all over the country, as tourism is an important element in the economic health of our area, as I am sure of many others.

The "Firearm Owners' Protection Act," and I think I want to emphasize this, would protect the hunter who might travel through a State or local jurisdiction that restricts the ownership or possession of firearms while he or she is heading for one of the popular hunting places, in my case, near a place called Tionesta or Emporium, PA. Without the protection that this measure provides, honest hunters, I am told, carrying unloaded and inaccessible firearms could unwittingly violate such a restriction and be charged with a criminal act. Is that the gentleman's understanding.

Mr. VOLKMER. That is correct. The present law in some localities and in States would mean that law-abiding citizens, hunters who have, let us say, a rifle or a shotgun, broken down, unloaded, inaccessible, let us say they are in a camper, driving a camper, and the rifle or shotgun is in the back of the camper, or if they are in a car and it is in the trunk, yet if they go through one of these States, they could be stopped, arrested, and charged with a criminal offense, fined and put in jail just for going through this jurisdiction when they are going hunting. And some people have to go through those areas in order to get to other places. That is why we make a provision in here that when you are doing this just for a lawful purpose, there is no reason to arrest these people and put them in jail.

Mr. CLINGER. And I do not really think that was our intent in passing the law as we did. I do not think we intended that.

Mr. VOLKMER. Most of this is State and local law, and I do not think they intend actually to pick up the innocent sportsmen. But it can be and it has happened. If you get persons in law enforcement who get carried away, or people, there are people who just, as we know, ar.d we have been having about and we will hear about it more, that just believe that no one should have any guns, and those people are the kind that are going to enforce that type of law against normally law-abiding citizens.

Mr. CLINGER. I again thank the gentleman for his strong leadership in this area. I think we need to take a strong stand, as I think most of us have and will do against those people who commit crimes with guns. I would be the first one to support legislation that strengthens the penalties for those who commit crimes with guns.

Mr. VOLKMER. I would like to comment on that, if I may. It is very interesting that those in this body that basically support this legislation are those who in the past have strongly supported anticrime legislation, like the omnibus crime bill, the comprehensive crime bill that was put on last year, if the gentleman will remember, to the appropriations bill by way of an amendment in a motion to recommit offered by the gentleman from California. That bill had been tied up basically in the House Judiciary Committee.

Those people who do not support mandatory sentencing for criminals, who feel that criminals should be given probation and parole, even if they use a gun in the commission of a

crime, those are the ones that have opposed this legislation. The people supporting this legislation say we have to have mandatory sentences, and let us put these criminals in jail.

So I think we have to recognize those that want to take the guns away basically say be soft on criminals, while those of us who feel we should let law-abiding citizens use their guns and have their guns for sporting purposes, we feel the best way to stop crime is to put the criminal in jail.

Mr. MARLENEE. Mr. Speaker, will the gentleman yield to me on that point?

Mr. VOLKMER. I yield to the gentleman from Montana.

Mr. MARLENEE. Mr. Speaker, the rights of Americans are being violated. For too long the efforts of antigun groups have eroded our constitutional right to keep and bear arms. It is time that the lawful firearm owner, those people of this country who responsibly own firearms, have a voice in Congress. That is why we are here today in support of H.R. 945—the Volkmer-McClure Firearm Owners Protection Act.

As we all know, the Senate passed the Volkmer-McClure bill on July 9 of this year by a vote of 79 to 15. That is the good news, the bad news is that Judiciary Committee Chairman RODINO immediately declared the bill "dead on arrival" when it came to the House.

Even though the McClure-Volkmer bill has been introduced every Congress since 1978, and despite widespread support for the bill, the committee has consistently blocked consideration.

Now we must resort to going around the committee system—the democratic process has been effectively blocked by a few who refuse to abide by the second amendment which guarantees the right to keep and bear arms.

I am proud to have been one of the first to sign the discharge petition, and I admire the courage of my friend and colleague from Missouri, Mr. VOLKMER. The decision to lead efforts to bypass the committee system must have been a difficult one.

You will hear the gun-control advocates claim that they are holding hearings and proceeding with legislation to reform the 1968 Gun Control Act. Some in Congress will say they won't sign a discharge petition if the committee appears to be working on the bill. "How dare you circumvent the process!" They'll cry.

Well, let me say that appearances may be deceiving. Through smoke and mirrors, groups like the National Coalition to Ban Handguns are working hand in hand with Chairman RODINO to delay and ultimately kill this important bill.

Mr. Speaker, I could go on and on about why I support H.R. 945, and why I am 1,000 percent opposed to the gun control schemes being offered by those who oppose the Firearm Owners Protection Act. Instead, I will leave that to the bill's author and others here today.

I will, however, specifically look at the problems of waiting periods and offer some general comments.

Some Members in the other body attempted to attach an amendment establishing mandatory waiting periods before a firearm could be legally purchased. To many this seems like a harmless idea, but let me tell you what that really means and why we shouldn't have such waiting periods.

First, more than a dozen States already have waiting period laws on the books. If the States can enact such laws, there is no need for a Federal law. But more importantly, these waiting periods have not reduced violent crime. As violent crime has climbed in the United States as a whole, it has also climbed in those States with waiting periods.

California adopted a 5-day wait in 1965; 5 years later murder was up 46.8 percent. In 1976 they expanded this to 15 days; 5 years later murder was up 39.4 percent.

Second, in sophisticated studies of waiting periods, it has been found again and again that there is virtually no connection between waiting periods and gun murder, robbery, assault, suicide, or even accident rates.

Third, if waiting periods were effective, how long should they be? Many State legislatures have specifically voted against waiting periods. That is a decision for State lawmakers, not the U.S. Congress.

And fourth, isn't the objective of every Member of Congress to stop violent crime while protecting the rights of American citizens? Waiting periods don't stop criminals. Professional criminals don't buy guns "over-the-counter", they buy them from other criminals.

Some will ask, "What about so-called crimes of passion?" Well, the idea that "crime of passion" killers go running to their neighborhood gun dealer to carry out their spur-of-the-moment crime is a myth. Their crimes use whatever is at hand—the kitchen knife, baseball bat, or whatever.

An enraged individual does not step back to carefully reflect upon the best means to carry out the crime he just conceived of moments earlier. In his homicidal state of mind, he doesn't analyze what weapon would be best, flip through the yellow pages to find the closest sporting goods store, drive to the store, carefully select a gun and ammunition, and then return to find his intended victim patiently waiting. That's just absurd.

The point is, waiting periods don't work. They only create more paperwork for law-abiding gun dealers and inconvenience for honest citizens.

Mr. Speaker, I represent the rural west. In just 1 day's mail last week, I received over 140 prices of mail supporting H.R. 945—the Volkmer-McClure Firearms Protection Act. Totally, since the beginning of the year, I have received only two letters in favor of more gun control.

My constituents are willing to forgive many things from their elected Representatives, but any attempt to control their right to own and use guns isn't one of them. I've been hunting since I was just a small boy. I grew up in a home where responsible use of firearms was practically taught side-by-side with doing the chores and learning to read.

That's the way it is for the vast majority of Montanans. I object to gun control, and I especially object to congressional elitists forcing it down the throats of my constituents.

One aspect of the Volkmer-McClure bill is very similar to my own H.R. 2565 which would allow a legal gun owner the freedom to travel through other States with his firearm as long as it is unloaded, and securely packed away so it is not easily accessible.

As it stands now, different States have many different gun laws. Some areas, like Washington, DC and New York City, prohibit even the legal possession of a firearm.

If a gun owner leaves his home in Virginia, travels through the Nation's Capital on his way to do a little duck hunting in Maryland, he can be arrested for having his unloaded shotgun securely tucked away in the trunk of his car. That's wrong. Current laws now entrap the innocent, rather than convict hardcore criminals. I'm pleased this bill includes a concept I have proposed in my own legislation.

I will be doing a series of 1-minutes in the coming weeks and months to show why we need this bill now, and exposing the deceptions being spread by the radical, antigun forces.

When we opened up shop this morning, Congressman VOLKMER filed his discharge petition to finally bring this bill up for a vote. I am the fifth name on that petition, and I will be doing everything I possibly can to help my colleague from Missouri to get the 218 signatures necessary to bring up H.R. 945 for a vote.

Every voter in the Nation should ask: "What number are you on the discharge petition? Where do you rank on the scale of support for law-abiding citizens?"

□ 1650

Mr. Speaker, I find that a very interesting point, because I am a strong supporter of our law enforcement officers, and for the law-abiding citizen, for the officer out there who is doing

his duty, protecting our property, protecting our lives; and I never argue with them when they come, and maybe I get a speeding ticket or something like that.

Basically that philosophy carries through here in Congress, but what the gentleman from Missouri [Mr. VOLKMER] and the gentleman from Pennsylvania [Mr. CLINGER] are saying is that the supporters of this kind of legislation are strong supporters of law enforcement——

Mr. VOLKMER. Yes.

Mr. MARLENEE. And are strongly opposed to the criminal element who has been getting away with, if you will, murder in this Congress.

Mr. CLINGER. And the ones on the other hand who would oppose this legislation tend to be those that have a very permissive attitude toward mandatory sentencing.

Mr. MARLENEE. Well, as the gentleman from Arkansas [Mr. ROBINSON] previously said, those that want to coddle the criminal, basically.

Mr. CLINGER. I again commend the gentleman for his leadership. I think that you are to be commended for taking this special order, and I will now go into the well and sign the discharge petition.

Mr. VOLKMER. I thank the gentleman very much, I appreciate it.

I would like to recognize at this time the other gentleman from Pennsylvania [Mr. KANJORSKI].

Mr. KANJORSKI. Mr. Speaker, for far too long the 1968 Gun Control Act has enabled overzealous bureaucrats to harass and obstruct the activities of America's hunters and sportsmen.

Instead of focusing its activities on criminals who use guns to commit crimes, the BATF has all too often used its powers under the 1968 Gun Control Act to intimidate gun dealers, confiscate gun collectors, and infringe on the constitutional rights of honest sportsmen.

The McClure-Volkmer Firearms Owners' Protection Act (S. 49/H.R. 945) which I am proud to be a cosponsor of, would eliminate the technical provisions of the 1968 Gun Control Act which are used to harass honest citizens, and would strengthen the penalties for using a gun to commit a crime.

By focusing on the criminal, and not the law-abiding citizen, we can take meaningful action against crime.

Mr. Speaker, the McClure-Volkmer Firearms Owners Protection Act has passed the other body by a margin of more than five to one. It is time for the House of Representatives to stand up for the constitutional rights of the American people by passing this bill as well.

While I am pleased that the House Judiciary Committee has finally agreed to hold hearings on the Firearms Owners' Protection Act starting on October 28, I am concerned by reports that committee leaders do not intend to report the bill to the full House. This suggests that the opponents of the bill do not dare bring the bill before the House because they know it will pass easily.

Our Government is a representative form of government, and the Representatives of the people deserve an opportunity to act on this important legislation. We must not allow an obstructionist minority to thwart the will of the people on a matter involving great constitutional principles.

That is why I am glad to join my colleagues Representatives VOLKMER, CRAIG, and DINGELL in signing a discharge petition to force this legislation out of committee and onto the House floor. This may be the only opportunity we have to implement the will of the people.

Through this discharge petition and this legislation we can end the BATF's entrapment and harassment of hunters, sportsmen, dealers, and collectors and provide mandatory jail sentences for criminals who use guns.

Mr. VOLKMER. May I inquire of the Chair how much time I have remaining?

The SPEAKER pro tempore. The Chair will inform the gentleman that he has 9 minutes remaining.

Mr. VOLKMER. Mr. Speaker, I yield to the gentleman from Montana [Mr. MARLENEE].

Mr. MARLENEE. Very quickly, Mr. Speaker, first I want to congratulate the gentleman from Missouri [Mr. VOLKMER] on the legislation that he has offered, and ask him to yield for a question.

Coming from the State of Montana, I get quite a few letters from those supporting this important bill, but I would like to clear up a few misconceptions about the Firearm Owners Protection Act.

First, would this bill allow criminals, felons, and terrorists to obtain guns? This is one of the most erroneous charges I think that have been leveled.

Mr. VOLKMER. No; and I can only say that most emphatically, we do not make any changes in the law as to who is permitted to purchase and acquire firearms; and we do not permit and nor would I ever sponsor any legislation that would permit criminals, felons, terrorists, or anybody else to go out and legally acquire firearms in any way.

Mr. MARLENEE. Now, another allegation against this bill that I have heard is that those opposing this bill are saying it allows an individual to go across a State border, walk into a sporting goods shop, buy a gun that his own State law prohibits; and this is not the case in Montana, but is this so in other areas?

Mr. VOLKMER. That is a complete misrepresentation of what this bill does. Basically what the bill does is say that if it is lawful in your State of residence for you to buy a firearm, and if you are in a different State, another State, and it is lawful there for you to fire firearms in that city and State, we do not change any of those laws; it has to be lawful; then you can acquire firearms.

I know there have been misrepresentations saying that we are changing the local law or the State law and making them sell firearms even though their present law says no—we do not change that; local law or State law. If it is prohibited, then it cannot be done, that is all.

Mr. MARLENEE. I appreciate the gentleman's answers. These questions are extremely important because there is so much false information being circulated.

Mr. VOLKMER. A lot of misrepresentations are being bandied about.

Mr. MARLENEE. I thank the gentleman.

Mr. VOLKMER. Mr. Speaker, I yield to the gentleman from Texas [Mr. COMBEST].

Mr. COMBEST. Mr. Speaker, in 1776 when our forefathers drafted the U.S. Constitution, an amendment was added that guarantees Americans the right to bear arms. It is my belief and the view of an overwhelming number of my constituents, that this constitutional right has been severely limited by current law.

In 1968, Congress passed legislation designed to reduce the number of crimes committed with firearms in our Nation. However, rather than hindering the criminal who continues to have easy access to guns and ammunition through the black market, the 1968 legislation has penalized law-abiding citizens. Inconsistencies riddle current firearm laws. For instance, it is not a Federal offense for an individual to sell firearms to a convicted felon. At the same time, however, an honest citizen with no prior criminal record could be subjected to felony charges if he unintentionally violates some jurisdictional firearm restriction.

The majority of people in west Texas and our Nation have exercised their right to gun ownership with responsibility. It seems ironic that a law devised to curtail crime has, instead, infringed on one of our most treasured founding doctrines, the U.S. Constitution. Statistics show that laws devised to restrict gun ownership have little, if any, effect on crime.

The Firearm Owner's Protection Act of 1985, which is pending in the House Judiciary Committee, would eliminate the obvious flaws in current law that hinder innocent citizens rather than the criminal. Burdensome regulations would be modified and more stringent enforcement measures would be imple-

mented against individuals who use guns unlawfully.

The other body passed an identical piece of legislation earlier this year, and it is now up to the House to lift the restrictions imposed on the right to bear arms. A discharge petition has been circulated throughout the Chamber today in an effort to bring the Firearm Owner's Protection Act to the House floor for consideration. Review by the full House is necessary since some disturbing remarks were made which indicate that the bill would not receive an impartial hearing in the House Judiciary Committee.

Like most Americans, I am greatly concerned about our Nation's crime rate. However, laws which inhibit law-abiding individuals are an ineffective solution to the national crime problem. We must fortify Federal criminal penalties if we are to deter those individuals inclined to commit illegal acts. Let us be certain that we are penalizing the criminals—not the honest American citizen who chooses to own a gun for sport or protection.

Mr. Speaker, we must act to preserve the intent of our forefathers in drafting the Constitution. Without the right to bear arms, pioneers would never have survived the wilderness, our ancestors would have starved and our diverse and democratic Nation would not be as it is today. I consider Mr. VOLKMER's Firearm Owner's Protection Act to be a superior piece of legislation that redirects the restrictions on firearms to where those restrictions belong—on the criminal. I urge my colleagues to join me in supporting passage of the Firearm Owner's Protection Act of 1985.

Mr. VOLKMER. I appreciate the gentleman's support in working with us on the legislation.

Mr. Speaker, at this time I recognize the gentleman from Idaho [Mr. STALLINGS].

Mr. STALLINGS. Mr. Speaker, I am pleased to participate today in this special order focusing on the enforcement abuses of the Gun Control Act of 1968. I thank my esteemed colleague from Missouri, Mr. VOLKMER, for providing this forum to inform Members of the failures and abuses of the Gun Control Act of 1968 and to emphasize the urgent need to correct these abuses by enacting the Firearms Owners' Protection Act.

When Congress enacted the Gun Control Act of 1968 its goal was to reduce violent crime. The act was not intended to provide law enforcement with the power to harass and prosecute law-abiding citizens. Yet such activity has been the history of the enforcement and administration of this act. It has been used as a tool for prosecuting innocent collectors and owners unaware of the intricate, detailed, and complex compliance procedures contained in it.

The most shocking aspect of the undesired but authorized behavior under the Gun Control Act is the abridgement of fundamental civil liberties. The right to keep and bear arms is granted not because of a court decision or an administrative policy. In fact, as we all know, the right to keep and bear arms is guaranteed by the same document which grants this land its liberty—the Constitution.

But even if this were not enough, such behavior diverts valuable legal resources—judicial as well as law enforcement resources—from pursuing the very activity the act was intended to eliminate: violent crime. Instead, these legal resources have been used to build cases against law-abiding citizens who may have violated technical reporting requirements of the law. For example, under current law, the simplest recordkeeping oversight is a Federal felony, just as is the most severe or violent crime.

Let me assure you that these abuses are not imagined. Take the tragic story of one gun dealer, Richard Boulin. Mr. Boulin, a policeman, obtained a Federal firearm dealer's license, in order to sell firearms to other policemen. After he obtained a license, he was approached by a collector and asked to sell a few of his firearms. Because these were part of his personal collection, he felt he could sell them without the paperwork required of a licensed dealer's sales from inventory. After all, the Federal agent who issued him the license had told him that this was legal.

A few months later he awakened to a nightmare. A team of Federal agents arrested him, executed a search warrant on his home, searched his father's business, and confiscated his entire firearms collection. Most of his collection was in mint condition and many of the guns had never been fired. Those guns were terribly abused and damaged in the confiscation. When his case came for trial he seemed to have the best defense imaginable. Indeed, the director of the prosecuting agency agreed that Mr. Boulin's actions had been legal.

I wish I could conclude with the vindication of this citizen. But the court decided otherwise. Today this man, who never had so much as a traffic ticket, cannot get a job or even hold the mortgage on his house.

Of course, these abuses must be stopped. That is why I have cosponsored the Firearms Owners' Protection Act.

Of the many bills which face this Congress, few are more important to me and the people of Idaho's Second District than the Firearms Owners' Protection Act. In Idaho, where gun ownership is central to our tradition and heritage, grassroots support for this legislation is tremendous.

The Firearms Owner's Protection Act seeks merely to protect legitimate gun owners and collectors from the enforcement of irresponsible law. From the evidence it is clear that a change is needed—a fundamental redirection of the law and its enforcement. The law should prosecute criminals, not create them with red tape. To ensure this, I ask my distinguished colleagues to sign the discharge petition so that we can pass this needed legislation without further delay.

□ 1700

Again, I congratulate my colleague, Mr. VOLKMER, for his leadership in this legislation and wish him the best success.

Mr. VOLKMER. I, too, thank the gentleman from Idaho for his past support and his continued support on this legislation.

I yield to the gentleman from Montana.

Mr. MARLENEE. I thank the gentleman from Missouri for yielding.

I have long awaited this opportunity, Mr. Speaker, to speak out for the rights of Americans, rights that are being violated.

For too long the efforts of the anti-gun groups have eroded our constitutional right to keep and bear arms. It is time that the lawful firearm owner, those people of this country who responsibly own firearms, have a voice in Congress, and I am pleased that the gentleman from Missouri has spoken out and that the rest of us can join him in that. That is why we are here today, in support of H.R. 945, the Volkmer-McClure Firearms Owners Protection Act.

I am proud to have been one of the first to sign the discharge petition. I admire the courage of my friend and colleague who has put this forth.

The decision to lead the efforts to bypass the committee system must have been a difficult one. I would like to speak just briefly to the waiting period.

More than a dozen States have a waiting period law on the books. If the States can enact such law, why do we in Congress need to be involved in that area? But, more importantly, those waiting periods have not reduced violent crime. As violent crime has climbed in the United States as a whole, it has also climbed in those States with waiting periods.

Mr. Speaker, I represent the rural West. In just 1 day's mail last week I received over 140 pieces of mail supporting H.R. 945, in 1 day, 140 pieces of mail in support of the Volkmer-McClure Act.

Mr. HUNTER. Mr. Speaker, I rise today in strong support of the Firearms Owners Protection Act. This legislation is long overdue and my distinguished colleague from Missouri. Mr. VOLKMER, has my sin-

cere gratitude for his leadership on the issue.

Our Founding Fathers stated the case so succinctly in the second amendment to the Constitution: "the right of the people to keep and bear arms, shall not be infringed."

The 1968 Gun Control Act was hailed by some as landmark legislation, but innocent gunowners have been unfairly stigmatized by some portions of the act. I believe too much emphasis was placed on efforts directed against law-abiding citizens rather than hardened criminals.

The problems inherent in the 1968 Gun Control Act have been exposed by Mr. VOLKMER and documented in congressional oversight hearings.

This bill corrects parts of the Gun Control Act which were clearly unnecessary. By removing these extraneous matters from the law, we allow the Bureau of Alcohol, Tobacco and Firearms to devote its energies to the real priorities of crime and violence in our society.

The Firearms Owners Protection Act corrects some of the problems of the 1968 Gun Control Act. This bill will allow for continued enforcement of the law against dealers who supply arms when they should not be supplied. This bill will allow proper records to be kept.

Licensing requirements will be clearly defined, eliminating bureaucratic hassles for firearms owners and requiring it in instances where it can serve a real function. This bill will compel the Government to show criminal intent before a citizen is brought up on felony charges. It institutes new, fair rules on search and seizure and allows for the transportation of unloaded, stored weapons through any jurisdiction. We agree that local governments should be able to determine what is best for their area, but it is wrong to treat transportation through a jurisdiction and use equally.

All of us agree on the need of Federal involvement to stop violent criminals from obtaining firearms and none of us have objections to the Bureau of Alcohol, Tobacco, and Firearms efforts toward that goal.

This legislation will protect the constitutional rights of the gunowner and concentrate Government efforts on the group that gives firearms owners a bad name: hardened criminals.

I am pleased to support this excellent legislation and to sign the discharge petition. America's firearms owners deserve the rights the second amendment promises. Again, I thank Mr. VOLKMER for his efforts to stop crime and protect the constitutional rights of gun-owning Americans.

Mr. LOTT. Mr. Speaker, the Congress of the United States generates stacks upon stacks of records. Seldom, however, do we study the records of the past in order to guide us into the future.

I refer my colleagues to page 94 of Senate Report No. 1501 of the 90th Congress, 2d session—the report on the Gun Control Act of 1968.

Page 94 contains the Individual Views of the chairman of the Judiciary Committee, my fellow Mississippian, Senator James O. Eastland—who eloquently stated his reasons for opposing this law.

Mr. Eastland, who many of you knew while he was Speaker pro tem of the Senate, is greatly respected by Members of both bodies, Republicans as well as his fellow Democrats.

Mr. Eastland has never viewed the "gun control" question as a partisan issue, or as a liberal-conservative issue—and neither does this Member, or the distinguished bipartisan group which favor reforms of the Gun Control Act through passage of the McClure-Volkmer bill.

These reforms should be adopted for the very reason that Mr. Eastland predicted when this law was enacted: the Gun Control Act has had no visible effect upon crime.

In fact, the use of firearms in crimes has more than doubled since this law went into effect.

Criminals by definition are those who disobey the law, including gun laws. That is why criminals still obtain guns without the slightest difficulty—regardless of the severity of the laws in their area.

The ease with which criminals obtain guns—despite the prohibitions upon criminal ownership contained in the Gun Control Act—was made clear in a new Justice Department study released only a few days ago.

But instead of getting rid of a useless law, or at least getting rid of some of the worst provisions of that law, the opponents of McClure-Volkmer want to make the law even more restrictive.

Like the old-time snake-oil salesman whose nostrums fail to work, their excuse is that the patient didn't take enough snake oil.

That is precisely what Mr. Eastland predicted 16 years ago. Let us carefully consider Mr. Eastland's words of wisdom.

He wrote:

It is instructive to consider the tactics and strategy of those who would control human nature by the passage of Federal legislation. Regardless of what Congress does to appease their demands in any given area of legislation, those who would control the human heart by passing another law always return to the next Congress to demand even more sweeping laws.

Their complaint is always that although the law enacted by the previous Congress has slightly improved the situation, that law has not been "effective" in correcting the evil, and that, thus, a more "effective law" is needed at once.

"The supporters of such a bill," he wrote, "will say that although Congress has enacted S. 3633—the Gun Control Act of 1968—Americans are still killing each other with guns."

Mr. Speaker, an examination of the record will show that Mr. Eastland's prediction came true. In the very next session, the Congress did consider, and reject, extremely restrictive laws requiring the registration and licensing of all firearms—handguns, shotguns, and rifles.

The advocates of such laws said, as the opponents of McClure-Volkmer now say, that the Gun Control Act "isn't strong enough"—but there are few today who openly call for new restrictions upon rifles and shotguns.

But within a year or two after the 1968 law went into effect, many in the leadership of the "gun control" movement began to publicly proclaim their desires for the banning of all handguns—or the banning of certain guns—matching another of Mr. Eastland's predictions.

Those efforts caused a backlash among the public. Accordingly, those who had advocated the registration and licensing of all firearms, seeing that their proposals were counterproductive to their goals, abandoned their more-sweeping proposals, and began talking about "moderate" restrictions upon handguns only.

This Member finds it significant that those who claim to favor restrictive laws only upon handguns, and to oppose restrictive laws upon rifles and shotguns, are almost unanimously opposed to the McClure-Volkmer bill's easing of restrictions upon either handguns or long guns.

Today, the principal opponents of the McClure-Volkmer reforms are saying the Nation's firearms laws shouldn't be lessened, but should be strengthened—claiming that the Gun Control Act hasn't been effective only because it wasn't strong enough.

It was because he knew that it would be ineffective that Mr. Eastland opposed the Gun Control Act.

It was because he knew the nature of the advocates of gun laws that he accurately predicted that they would cite that very failure as justification for ever-more restrictive laws.

Mr. Speaker, the McClure-Volkmer bill is unique in the annals of the gun control debate in that it suggests that a law that has failed be at least partially stricken from the books.

The opponents of the McClure-Volkmer bill suggest that the demonstrated ineffectiveness of the Gun Control Act should cause its disproven approach to be strengthened by doubling the dose of snake oil.

I urge my colleagues to join me and this distinguished bipartisan group in demanding that the House be given an opportunity to correct some of the mistakes which this body made 16 years ago.

Mr. DERRICK. Mr. Speaker, I rise today to once again voice my support of the Firearms Owners Protection Act as passed by the Senate, S. 49.

It is high time that we take positive action to bring this legislation to the floor of the House so that all of our Members can have an opportunity to stand up and be counted as supporters of fair gun laws. Although I do not believe that circumventing the legislative process by using a discharge petition procedure is appropriate, our purpose today is to join together to demonstrate the strength of our commitment to the McClure-Volkmer bill, S. 49.

The Gun Control Act of 1968 has been in need of revision for years and those interested in fair and constitutional treatment of gun owners must recognize that need.

Crime and violence continue to be serious problems in our society, but simply imposing severe restrictions on gun sales is not the most effective method of dealing with the issue.

It is important to note that a study has shown that 50 percent of convicted felons who use guns said they expected to purchase guns through unregulated and illegal means when they were released. That frightening fact points out that the Gun Control Act is not reaching the very felons it is supposed to control. Fortunately, S. 51 addresses the deficiencies in the act by easing the unnecessarily restrictive regulations on lawful gun owners and collectors and also addresses the crime problem by imposing more stringent and mandatory sentencing of criminals using firearms.

I am eager to bring this bill to the floor of the House and I urge my colleagues serving on the Judiciary Committee to allow us this opportunity.

Mr. EMERSON. Mr. Speaker, I enthusiastically call to the attention of my colleagues legislation currently pending in the House Judiciary Committee to bring about some much needed changes in Federal firearms law. The other body has already passed this legislation. There is a growing movement in the House to bring the Firearm Owners' Protection Act to the floor for a vote.

The gun control legislation passed by this Congress in 1968 has always been unpopular with gun owners and dealers and with good reason. It has put unnecessary restrictions on their legitimate sporting activities and in some cases has made them subject to harassment by Federal authorities. In short, the current law has had a greater effect on law-abiding citizens than it has had on criminals and this bill proposes to change that. With the passage of this act, our firearms laws will once again focus squarely on criminals and not on legitimate gunowners as has been the case in the past.

Under this bill, the prosecution would have to demonstrate that alleged violators willfully violated the law. Currently, persons who had no criminal intent at all can be prosecuted. Under this bill, gun dealers and collectors will find fewer hindrances in carrying their collections and wares across State lines for firearms shows. And most importantly, under this bill, criminals will find fewer loopholes through which to escape prosecution.

In the years since the arrival of the current administration, the Bureau of Alcohol, Tobacco, and Firearms has made progress in redefining its proper mission and for this it is to be commended. It is important for us to ensure, though, that this progress will not be reversed in any future administration, and we can do that by making the statutory changes proposed in the Firearms Owners Protection Act.

The chief sponsors of this bill have worked with gun control proponents and other interested parties to achieve the best compromise possible. No, not everyone is happy, but the resulting legislation now pending in the House has been carefully crafted to reflect the concerns of both sides of the controversy and it certainly deserves more consideration than what has been promised by the distinguished chairman of the Judiciary Committee. I urge my colleagues to sign the discharge petition currently in the well and bring this legislation to the floor for a vote.

Mr. HAMMERSCHMIDT. Mr. Speaker, I am proud to say that I have joined as a cosponsor of the Firearms Owners' Protection Act in every Congress since the 96th, when the bill was first introduced.

A number of my colleagues can also make that claim, because the Firearms Owners' Protection Act has never lacked support. In fact, in the 96th Congress, the measure had 181 cosponsors, in the 97th it had 180 cosponsors, in the 98th, 130 cosponsors, and so far in the 99th Congress, the Firearms Owners' Protection Act has 156 cosponsors.

With this large base of support, it would not be illogical to assume that some action would be taken on this legislation, which protects the rights of law-abiding citizens, while refocusing Federal law enforcement efforts toward prosecution of the criminal. Although the House Judiciary Committee recently scheduled several field hearings on gun control legislation in general, it has never held a Congressional hearing on the merits of the Firearms Owners' Protection Act.

While there is a wide difference in philosophy between the chairman of the House Judiciary Committee and the sponsors of the act on the emotional issue of gun control, I firmly believe that the wide-ranging support which this bill commands entitles it to a hearing where its merits can be fully debated.

The Firearms Owners' Protection Act would modify a number of provisions of the 1968 Gun Control Act which have created mountains of bureaucratic redtape, or have been used by Federal officials to infringe upon the rights of law abiding firearms owners. However, contrary to what has been claimed by opponents of this bill, it would not gut the essential provisions of our current gun laws. What it does is to shift the focus of the firearms enforcement effort away from a regulatory mentality, and toward an actual law enforcement strategy aimed at the criminal.

The Senate, in July, approved the Firearms Owners' Protection Act, after approving several amendments, and I strongly feel that the House should be allowed a similar opportunity to debate this legislation. But we may not get this chance, as the bill remains bottled up in the Judiciary Committee, as it has since 1979.

The supporters of the Firearms Owners' Protection Act have been patient for 7 years, yet their patience has not been rewarded with even a hearing. For that reason, a discharge petition is being filed today to discharge House Resolution 290, the rule for the bill, from the Rules Committee, enabling the Firearms Owners' Protection Act to be brought to the floor. My name will be among the first on the discharge petition, and I would urge my colleagues to sign the petition and allow the Firearms Owners' Protection Act to be considered fairly and honestly in the House.

Mr. LIGHTFOOT. I rise today in strong support for H.R. 945, the Firearms Owners' Protection Act, and I encourage my colleagues to sign the discharge petition which has been submitted to the desk. Support for the petition will indicate Congress' desire to correct the serious problems in the Gun Control Act of 1968.

Without this petition, the proponents and opponents of this bill would be denied a fair hearing on the bill. Although the committee plans to hold field hearings on this issue during the coming weeks, the hearings will in no way be objective or fair. How can they be when a similar Senate-passed bill has been called dead on arrival by the chairman of the committee. Therefore, we need to bring this bill directly to the floor for debate and consideration. Law-abiding citizens of this country deserve nothing less than Congress' attention to this issue.

This bill would restore the Gun Control Act of 1968 to its intended purpose of curtailing criminal activity involving the misuse of firearms, but it would do it in a way which does not infringe upon the constitutionally guaranteed rights of our citizenry. This bill would remove many of the burdensome provisions which have placed restrictions on law-abiding citizens to own arms. It would allow gun owners and gun dealers to go about their everyday lives without worry and fear that they will be drug into court for some violation of existing law.

Enactment of this bill would also bring us closer to sensible enforcement of this law. Instead of concentrating on bookkeeping errors or other unintentional misapplications of existing law, the Federal Government could concentrate on blatant disregard of the law and on willful firearms law violations that lead to violent crime. The provision requiring mandatory penalties for the use of a firearm during a Federal crime will do more to deter crime than arresting and convicting a law-abiding gun owner who incorrectly fills out or files the wrong papers.

Once again, I urge my colleagues to sign the discharge petition to allow a fair and objective debate on H.R. 945. It is the only way we can ensure that the law-abiding citizens of our country will have their rights protected.

INTERNATIONAL TERRORISM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. DANNEMEYER] is recognized for 60 minutes.

Mr. DANNEMEYER. Mr. Speaker, I yield to my friend from Indiana, Mr. BURTON.

Mr. BURTON of Indiana. I thank the gentleman from California for yielding to me.

Mr. Speaker, I read an editorial that was very disturbing to me this morn-

ing on the plane coming out from Indiana. It was in the Indianapolis Star. I wanted to bring to the attention of my colleagues and to the people of this country something that is happening that really is not being reported in the news. I will read from the editorial very briefly, and then make a comment, and then turn this back to my colleague from California:

THE SAVAGE LAND

Paul Prendergast, a Scottish engineer who said he was an eyewitness, reported that Ethiopian air force Russian-built MiG-21 and MiG-23 jets and Antonov planes dropped numerous bombs and napalm and fired rockets Sept. 20 on civilian targets in the Eritrean province of Sahel.

He said a refugee camp was attacked four times during the day, killing 29 refugees, 10 of them children, and wounding 70 other people.

Prendergast said the planes, flying over at night, also attacked a school attended by more than 2,000 children, many of them orphans, but with no casulties.

On the basis of monitored radio conversations, the engineer said, it was clear that the Ethiopian pilots intended to harm civilians and were not aiming at military personnel or material.

The pilots' conversations were monitored on FM by the Eritrean People's Liberation Front, which is fighting for Eritrean independence from Ethiopia and is believe to control 85 percent of Eritrean territory.

After the attack, Prendergast said, EPLF personnel led civilians and livestock into narrow ravines where they were less vulnerable to air attack. There are 40 refugee camps in Eritrea, all camouflaged. Children in the camps are taught to run and hide under trees and bushes at the sound of aircraft.

Prendergast's reports were corroborated by Per Nortvedt, a Norwegian nurse, and Irene Buche and Claude Pillonel, officials from the Swiss organization, Terre des Hommes, who were also in the Sahel during the attacks.

Other Ethiopian air attacks were reported on the front around the EPLF-held town of Nacfa and in the southern province of Barka, where civilians are targets and the strategy is to disrupt agricultural production, EPLF leaders said.

The bombing is expensive, each sortie costing $13,000 and the entire air strike program costing an estimated $250,000 a day.

In London, EPLF sources said the air attacks are made possible by the large amount of international aid to Ethiopia, which enables the ruling communist government, the Dergue, to trade coffee and other cash crops to the Soviet Union for armaments.

Now, what that means, very simply, is that the Soviet Union is buying our cash crops from the Ethiopian Government and, in return, are selling them arms with which they are killing innocent people in Ethiopia. We are all concerned about the famine there. We are all concerned about the people who are starving. But, in effect, we are indirectly subsidizing the Communist war against their own people in Ethiopia. They are not only starving their people to death, but they are using our food to get money to further kill many of those people.

Last year in Ethiopia, that Government charged us $12.60 per ton to unload our food to feed their hungry people. They then took our food, after they received over $5 million in port fees, they took our food and used it for their soldiers, sold much of it to the Soviet Union, and used that money to kill their own people.

The Ethiopian Communist regime has been using starvation for several years as a policy against people in the rebel provinces. It compounds irony that humanitarian aid designed to prevent death by starvation gives Ethiopian Communists the means to kill with bombs, napalm, and rockets. Of course, air attacks are quicker.

Mr. Speaker, I thank the gentleman for yielding to me.

Mr. DANNEMEYER. Mr. Speaker, this is a bicentennial we can do without.

Mr. Speaker, in 1785, the Dey of Algiers demanded $53,600 as ransom for 21 Americans captured aboard two United States ships in the Mediterranean. Negotiations to secure the hostages' release were unsuccessful and they were not freed until 1796—11 years later—after payment had been made valued at $992,463.25.

It is now 200 years later. We are supposed to be more civilized. We are supposed to respect human dignity and international law. We are supposed to settle differences through reasonable and peaceful means. But Americans are still being hijacked and held hostage on the high seas. Things haven't changed much.

Acts of terrorism are not new. The taking of the *Achille Lauro* and the murder of disabled American Leon Klinghoffer is only the latest in two centuries of barbaric attacks against innocent people. It illustrates all too vividly the relative vulnerability of all Americans. It also draws attention to the apparent inability to either predict or prepare against such acts.

Terrorism violates the civil rights of all people. It causes wanton destruction of life and property, escalates violence and incites hatreds among peoples, and undermines legitimate attempts to seek peaceful resolution of conflicts among nations. It also offends the morality of decent people everywhere. And it increases the risk of war.

But as truly evil as terrorism is, a greater tragedy lies in the awful realization that it is largely directed against innocent people. Murderous marauders of adversarial groups or nations don't just terminate each other; they terrorize, capture, wound, torture, main, kill, or merely detain innocent individuals from all walks of life and from any nation. Even war—where the legally constituted armed services of one nation can fire upon those of another—is more civilized. At least we know what to expect.

Even though the last chapter of the *Achille Lauro* incident has yet to be written, at least the United States took action to apprehend the perpetrators of this cowardly and dastardly deed and bring them, hopefully, to justice. All too often, these acts have gone unanswered and the perpetrators unpunished.

As crucial as it is that we bring these criminals to justice, we must also take care to ensure that the guilty parties are made to pay for their crimes; we must not compound the evil by taking out vengeance on innocent people. The murder on October 11 of Alex Odeh in Santa Ana, CA, serves to remind us of the senselessness of random retribution. Alex happened to be an Arab-American who tried to serve the cause of his fellow Palestinians. He did not belong to the PLO faction responsible for the ship hijacking. He was a not an advocate of terrorism. In fact, he condemned it. But he paid the ultimate price because hatred exacts revenge, not justice.

It is important to consider this last point. Justice requires the apprehension of criminals and the meting out of punishment appropriate to the crime. If armed hijackers randomly and viciously murder and throw overboard a disabled man in a wheelchair, justice is easy to identify: "catch 'em and hang 'em."

Retribution is a different matter. Retribution, if unchecked and misdirected, is another form of terrorism. It is particularly prevalent as an ongoing exchange between extremist factions in adversarial groups or nations. One violent attack leads to another. The tragedy lies in that, more often than not, the victims of both sides are innocents caught in the middle.

Americans were rightfully incensed over the murder of Leon Klinghoffer. Citizens of all nations have more than sufficient reason to detest and condemn the acts of terrorists. In this instance, the guilty party was unmistakably an extremist faction within the PLO. We should therefore direct punishment against those responsible, not go out in a fit of frenzy and blow up Palestinians at random. Just as it is wrong to kill a Jew because he is a Jew; likewise it is wrong to kill an Arab because he happens to be an Arab.

Terrorism must be dealt with swiftly and justly. Failure to do so will only perpetuate this wanton and senseless killing of which we have seen too much already.

Earlier today, this Member from California took a special order in which it was pointed out that under existing law the President of the United States has the authority to declare a national emergency with respect to acts of terrorism directed against the citizens, properties, and in-

terests of the United States. The rationale for this resolution that I have introduced is to express the sense of Congress against all terrorism and to authorize the President of the United States to investigate, determine the nature and extent of those assets and holdings in the United States of the groups, organizations, or factions responsible for committing acts of terrorism.

Third, it would prohibit transactions involving such assets and holdings in accordance with, and to the extent specified by, law.

The rationale of this move is quite simple: We in the United States are an open society. We welcome investments in this country. People can come here, invest their money, enjoy the stability of our political and economic institutions, and make a profit. That is what the free enterprise capitalistic system is all about. But we should also recognize that terrorism and terrorists around the world have declared war on American citizens. We cannot stand for that type of conduct, and I would suggest by this resolution that it would be appropriate for the U.S. Congress to declare war on these terrorists to the extent that we can reach them, namely, to reach their assets located here in the United States.

To the extent that we can reach those assets, we can take action similar to what President Carter did in 1979 against Iranian assets and hold those assets as a security fund so that persons who survive acts of terrorism will have some money damages, will have the ability to recover money damages from those assets that are held here in the United States.

Mr. Speaker, Mr. Alex Odeh was a constitutent of mine in the 39th Congressional District residing in the city of Orange. He was a 41-year-old gentleman at the time of his death. He was born on the West Bank of Palestine in the village of Jifna to a Roman Catholic family. His father, a retired grocer, still lives there. He attended universities in the West Bank area and Cairo, received a master's degree in political science at Cal State Fullerton in 1978. He worked for the Saudi Arabian Cultural Mission in Los Angeles for several years. He became a U.S. citizen in 1977.

Mr. Speaker, he taught Arabic at Cal State Fullerton and also at Coastline Community College.

□ 1715

He was a member of the Los Angeles County Human Relations Commission. He married his wife, Norma, in 1975. They have three daughters, Helena, Samia, and Susan. His brother, Sami, is a realtor in Orange County. He was west coast regional director of the American-Arab Anti-Discrimination Committee, headquartered in neighboring Santa Ana. He was assassinated by a bomb blast on Friday morning, October 11, 1985.

So far, no group has claimed or no individual has claimed responsibility or, if you could phrase it that way, credit for this cowardly act of brutual murder. It is hoped that our authorities will be able to find those who have perpetrated this act and bring them to justice.

Members of the House may be interested to know some of the terrorists groups that have attacked U.S. citizens in the course of the recent history of our Nation. For instance, since 1968, 459 U.S. citizens have been killed in terrorist attacks. The groups that have been involved in these activities are as follows:

Popular Front for the Liberation of Palestine (Jordan); Tupamaro guerrillas (Uruguay); Haitian rebels; Black September (Sudan); Peoples Revolutionary Armed Forces (Mexico); Peoples Liberation Armed Forces (Mexico); January 12 Liberation Movement (Dominican Republic); Montoneros (Argentina); Zaire Peoples Revolutionary Party (Tanzania); Japanese Red Army (Malaysia); Afghan radicals (Afghanistan); Iranian radicals (Iran); M-19, (April 19 Movement) (Colombia); Red Brigade (Italy); Islamic Jihad (Lebanon, Kuwait, Greece).

Primary targets of terrorist attacks from 1968 to 1980: United States, Canada, Israel, United Kingdom, West Germany, France, Turkey, the Soviet Union.

Primary targets in 1980: The United States, the U.S.S.R. Turkey, Iraq, France, Iran, and Israel.

Mr. Speaker, it is the hopes of all of us that some day these acts of terrorism will cease. History teaches us that that expectation is not, perhaps, realistic; but those of us in the political institutions of America and elsewhere in the civilized world, hopefully, can take action to make clear to terrorists that there is no safe haven anywhere in this world where they can hide, the long arm of justice will seek them out and bring them to trial, where they will have the responsibility of defending themselves for their acts, where in most cases they have taken upon themselves the prerogative of snuffing out the life of a fellow citizen or destroying his property. We in the civilized world do not accept that kind of conduct. We want to condemn it wherever and by whom it is exercised.

THE DANGER OF GRAMM-RUDMAN

The SPEAKER por tempore. Under a previous order of the House, the gentleman from New York [Mr. OWENS] is recognized for 60 minutes.

Mr. OWENS. Mr. Speaker, the Gramm-Rudman deficit reduction proposal can be discussed in many ways. There are many things wrong with it. We have heard discussions of its constitutionality, discussions of its poor economics. There are numerous ways that it can be examined and found wanting. I would like to talk today about the danger of Gramm-Rudman.

The recent comment from the Nobel Prize winner in economics, Professor Modigliani I think referred to it as a Mickey Mouse proposal. I do not think it is a Mickey Mouse proposal, because I think it is far more dangerous than Mickey Mouse. It is a plot which will bring Reaganomics to the point where it always wanted to arrive, and that is, it will finish off domestic programs. The goal of Reaganomics was to shrink the Government, to get the Government out of the business of caring for the neediest people, to focus the Government, the Federal Government, wholly and exclusively on matters of defense and foeign policy, and the move to destroy the domestic programs will be consumated with this Gramm-Rudman bill. It is a complicated bill. There are numerous aspects to it. But when it all boils down, the final bottom line is that the Gramm-Rudman proposal will give the President the power to make the final decisions as to what should be cut in the budget in order to eliminate the deficit. This is the President who has never submitted a balanced budget. So we do not know exactly what he will cut, we do not know in detail what he will cut, but we do know from the budget that he has submitted which programs he is likely to cut, because those are the programs he has expressed a great dislike for, and many of these same programs he has already put zero in the budget for those programs.

We know that programs like the women's infants and children's program will be one of those targets. We know that educational programs will be one of those targets. We know that food stamps will be another one of those targets. We know the kinds of cuts that were made as a result of the process that was started in 1981 with Gramm-Latta. We know the kinds of tremendous cuts that were made early in the Reagan administration. So we have a good idea as to which programs the President will proceed to cut when he is handed these awesome powers. The victims of these programs will be children. The victims of these programs will be the handicapped, they will be the unemployed, they will be infants, they will be the aged. In these sets of categories, the unemployed, the aged, the children, one of the largest victims of course will be the minority, because they are using a disproportionate set of these programs, they bear a disproportionate set of the problems and ills of this society, they are the unemployed, the hungry, they are the needs who need the health

care provided with Government assistance, they are the ones who will be hurt most. Blacks, in particular. We have statistics to show that in the few years that the Reagan administration has been in power already, blacks, in particular, have suffered, and that there is an escaled decline of the state of affairs of black Americans in this country.

So Gramm-Rudman, if it is allowed to pass, will finish off the job that has already been done all too well. The Gramm-Rudman deficit reduction proposal has held it as an attempt to bring Government spending under control and to eliminate the deficit. It has the advantage of simplicity. But as Albert Einstein once said, "Everything should be as simple as can be, but not simpler."

A review of the Gramm-Rudman proposal makes it clear that it is simpler than can be in order to resolve the problem at hand. It has come as no surprise to the Members of this body or to any other person involved in political life that politicians like simple solutions, simple solutions which can readily be conveyed to their constituencies. They also like solutions which delay any sacrifice or hardship until after they have been re-elected.

The Gramm-Rudman proposal certainly is a very convenient device for the Members of the other body who passed it, because many of them are up for re-election. It is a very likable proposal from the perspective of their enlightened self-interest and their next re-election problems.

The pain will begin after the 1986 election. I should say the new pain, the escalation of pain for those who are already in pain will take place after 1986. The painful choices will be shifted from the Congress to the President who will not have to stand for re-election. This President will not have to stand for re-election again.

Looking at the kinds of choices that will have to be made, Gramm-Rudman suggests budget cuts to get the deficit down. Programs with many beneficiaries, such as Social Security, will not be touched. We are glad for that. We do not want to see Social Security touched. Programs with powerful beneficiaries, such as defense contractors, are not to be touched. This is a tragedy, because here is the place where most of the cuts can be made without inflicting pain on people. Programs with powerless constituencies, such as the working poor and the dependent, are to be cut at will. This cutting is to be done by the administration which has shown a marked lack of sympathy for the dependent among us. After all, children, for example, do not vote or contribute to political parties. The unemployed are also the most unorganized and, thus, they are unable to gain the attention of elected officials. Programs for these people would therefore be made available, put on the chopping block, to save the Nation from the deficit.

There is little doubt that the deficit is a serious problem and that it must be addressed. However, shifting our responsibilities off to the executive branch hardly seems responsible or courageous. Another more honorable approach would be to take a look at alternative budgets which were worked out already by certain Members of this House, Members of this House who took a stand, they proposed cuts, and they found a way to work out the deficit. One such proposal was the Congressional Black Caucus budget.

The Black Caucus budget increased revenues and allocated budget cuts in a reasonable manner. Although it left the deficit at the same level as the House budget for 1986, it reduced that deficit to $125.19 billion in fiscal year 1987 and to $73.8 billion in fiscal year 1988. So the Black Caucus alternative budget, this much ignored document, is a very sound proposal which certainly did not shirk its responsibility. It addressed the deficit and it started the process of reductions. This deficit reduction approach of the Black Caucus budget did not transfer our constitutional powers to the executive branch of Government. It did not ask the weakest among us to once again shoulder the burden created by the tax cuts to the wealthy and the tax cuts to corporations, the burden that is created by the fact that many of the Fortune 500 corporations pay absolutely no taxes at all. It made the hard choices among options which competed in merit.

How did the Black Caucus find savings? Each program was evaluated to determine how savings could be made without abandoning those tasks of the Government which simply must get done. Our Federal Government exists for more than just defense and foreign policy. I do not know why this notion seems to have so much credibility, seems to be legitimatized, when most of the civilized free-world countries do not accept that as the only responsibility of their National Government. Most of the civilized free-world nations are spending far more, a far greater percentage of their budget on domestic programs, on programs for people, on education, on programs for the aged, on programs for health. Most of them are spending far more, a far greater percentage of their budget, than the United States of America. This very rich country wants to turn away from the very important task of taking care of those in need, and not just those in need, but taking care of the populace in general.

I take a back seat to no one in being concerned about the defense of this country, both in the short term, the short range, or the long range. The defense of this country is not dependent on how many contracts we can award to defense contractors, how many new MX missiles we can build. It is not dependent on how we let our military run wild and pay enormous amounts for spare parts. The defense of our country is as much dependent on our educational system and the kinds of products that we produce, the pool of talent, the brainpower of this Nation, is as important to the short-term and long-term defense as any contract we could ever award for any new weapon system.

So a neglect of these aspects of the Federal responsibility, the kind of neglect which is escalating and which has been rampant in this administration, serves as a danger, it is a danger to our national defense.

But the Black Caucus, being concerned about national defense, in its alternative budget looks at the area of national defense.

For fiscal year 1986, the House had proposed, the House final proposal, $267.1 billion; the other body proposed $273.1 billion for defense. Our caucus budget was $261.5 billion, not too far, not too great a range in the difference between the caucus alternative budget of $261.5 billion and the House-passed budget of $267.1 billion.

The bulk of the caucus savings were in the area of procurement and allowances function. Given the problems which have occurred in the Department of Defense and the criticisms of the Department's staunchest allies in the other body, it is more than reasonable to question the procurements which have consumed billions of dollars without making our military forces able to better serve their function in our society. A military is not supposed to be a separate entity which performs any function other than those which are constitutionally mandated. It is not, as in other countries, an institution from which one can expect to derive wealth and power. The Armed Forces is not created for that purpose. The military budget for contracts is not for that purpose. It is there for national defense, which is to be utilized at the behest of the civilian authorities. The military which Americans take pride in is one which serves our population, our civilian population, not one which is a cause for draining resources from that population.

The next budget function which the Black Caucus made significant savings in was the energy expenditures. Expenditures for energy supplies were significantly reduced while funds for energy conservation were increased slightly.

□ 1730

The overall totals in that budget were $5.75 billion in the budget passed by the House; $5.1 billion in the

budget of the other body; and $3.2 billion in the caucus budget. We showed how you could save money and at the same time we actually increased the funds for energy conservation.

In the commerce and housing credit budget function the House budget called for $4.6 billion. The other body for $3.4 billion. But the caucus budget reduced it to $2.8 billion. Savings were achieved by cuts in the non-FHA and the GNMA mortgage credit and thrift insurance programs and the Postal Service function.

Additional deficit reduction measures were calculated based on increased revenues. Like it or not, the practical reality is that a budget can only be balanced through decreased expenditures, increased income or a combination of the two approaches. When viewing the policy behind the Federal programs, it makes no sense to cripple a program and to stop the function if one believes that the policy rationale for the program's creation still exists.

Since, as a general rule, expenditures tend to benefit those with the least cuts on this side of the equation, it requires that we stop assistance to the most dependent segments of our population: The poor, the very young, the old, and those who are disabled. Increased revenues, in contrast, come through the taxation of those who are more affluent and hence more capable of shouldering this burden.

It should not escape our attention that a great deal of the deficit came about by a combination of reduction in revenues and increased expenditures for defense. Both happening at the same time as a part of Reaganomics. Americans were promised a military buildup exceeding the buildup associated with the Vietnam war. They were also promised that they would not be asked to shoulder any additional burden to achieve this end. Although the probability of this happening was low, people chose to believe that they could, as a nation, spend more than their income without any further debt problems. This proved not to be true, of course.

When President Reagan came into office, the national debt after almost 200 years of constitutional government was under $1 trillion. Now we are about to have a national debt of over $2 trillion. The "Buy now, pay later" approach has come home to roost and we have to begin to start paying our debts.

At the same time, we must maintain those services which our view of ourselves demands. We are not a nation which wants to be known for its poor, its hungry and its homeless. We do not want to be a nation which ignores the needs of the elderly, the young and the disabled among us. Even as a family coming out of debt does not start to cut expenditures by eliminating essentials such as food, we as a nation cannot eliminate those essentials which define us in our own eyes and in the eyes of others.

Americans consider themselves to be a fair, honest, hardworking people. That view is well founded in our history and our social fabric. As we strive to find a solution for the deficit problem, and the burden that it will necessarily place on future generations, we must do so in a way that is fair and honest. This may be the easiest way to proceed, but it is the only way that we can if we are to remain proud of ourselves and of our Nation. The one way not to proceed is to proceed as Gramm-Rudman is proceeding. The one way not to proceed is to hand over enormous powers to the executive branch of Government, to hand the responsibilities of the Congress over to the executive branch of government to give up the time-honored concept of a separation of powers and to proceed to allow the executive branch of government to complete its agenda and that agenda is to get government out of the business of taking care of the people in greatest need. To do that would be a disaster indeed, and we should recognize Gramm-Rudman as being that kind of plot. It will accomplish that purpose.

I yield to the gentleman from Massachusetts [Mr. FRANK].

Mr. FRANK. I thank the gentleman from New York for yielding to me, and I appreciate this latest in his demonstrated concern for the poorest people of this country.

Those of us who are opposed to the version of Gramm-Rudman that passed the other body and came over here have two sets of concerns. One is constitutional, from the standpoint of the role of the Congress in the U.S. Government, the Gramm-Rudman proposal probably ought to be called the "Emasculation Proclamation," because it is a decision by the other body simply to divest itself from responsibility for the budget deficits.

A number of people have commented and will comment on its glaring structural flaws. It is particularly ironic that many who call themselves conservatives, and conservatives have historically in this country worried about excessive executive power, about an insufficiency of power remaining in the elected legislative body, it is extraordinary how that has fled in the exigencies of the moment. It is a reason why people like George Will and others who are on the conservative side have been so appalled by the Gramm-Rudman proposal.

There is, however, another equally distressing aspect of it which the gentleman from New York has talked about, and that is the extent to which Gramm-Rudman, as passed by the other body, would inflict enormous harm on innocent, vulnerable people.

Beginning in 1981, at the urging of the President, one thing ought to be clear when we talk about reducing the deficit. If the Congress had substituted none of its own judgment for that of the President, if Congress had simply done everything the President asked us to do, the deficit today would be virtually identical to what it is.

The gentleman from Wisconsin [Mr. OBEY], who is now the chairman of the Joint Economic Committee, has totaled it up, and Ronald Reagan had asked Congress to spend virtually identical to what Congress has spent. That ought to be clear, because the difference between us is not over whether or not we reduce the deficit, but how we do it.

Ronald Reagan has asked Congress to spend virtually the same amount, $100 or $200 million less than has been spent out of a $2,700,000,000 amount. So we are talking about virtually the same amount of spending. The difference is in how we spend it. What Gramm-Rudman does as it comes to us is to say that the MX missile is exempt. We should not cut any MX missiles despite the fact that we have now adopted in Congress a compromise that virtually admits that it has no real military necessity. But we are still going to go ahead and spend billions on that, but we will cut medical care for the elderly poor, that is Gramm-Rudman.

Gramm-Rudman says cut medical care for the elderly poor under Medicaid, which is not protected and not exempt, but exempt the MX missile. Contracts in the Pentagon, all of the abuses people have read about, the excesses, the overcharges, those are exempt from fiscal discipline under Gramm-Rudman's automatic provision, but the program of Women's and Infant's Children's feeding, that is not exempt.

Mr. OWENS. Mr. Speaker, I now yield to the gentleman from Texas [Mr. BARTON].

Mr. BARTON of Texas. I thank the gentleman for yielding.

Mr. Speaker, I agree with the gentleman that President Reagan has submitted budget requests very nearly identical to what the Congress has actually spent. That is a matter of record. My question to the gentleman is: Does the gentleman from Massachusetts honestly think that had the President submitted requests that were substantially lower, in fact that would have balanced the budget, that this Congress and prior Congresses would have gone along with those requests?

Mr. OWENS. I yield to the gentleman from Massachusetts for his reply.

Mr. FRANK. I thank the gentleman from Texas and I commend his intellectual honesty. We have now stipulated what is in fact the fact, and people

should not take for granted that Members of Congress would admit the facts. We do not always do that, so I congratulate the gentleman from Texas.

But we now agree, there has been no difference between the President and Congress and what should be spent. He asked me, would we have asked for less? I will say to him "Yes."

□ 1740

I do not think Congress on its own would, for instance, have funded the Pentagon at the level that the Pentagon is funded. Congress would not have come up with Radio Marti. I voted for Radio Marti. I believe that we ought to be engaging in free speech elsewhere. But at a time of crisis, at a time when we are saying to poor pregnant women we will cut the food that you get to keep the likelihood that you will have healthy children, that is what Gramm-Rudman does. Broadcasting political soap operas to Cuba is a lower order of priority.

So I think that if the President had not pushed us in some of these areas, yes, we would have spent so much.

We have the National Endowment for Democracy. That is a new program. It had some support in here and in the other body and it had support from the President. The National Endowment for Democracy is a travel service for politicians. It sends American politicians to Europe. It sends Asian politicians to America. It sends politicians all over the place so we can talk about how wonderful democracy is. And it sure is wonderful if you are getting your trips paid for all over the place to go and talk about it.

And then you are going to turn around and you are going to cut chapter 1. Do you know what chapter 1 is? It is a program that began in the sixties and has been supported by conservatives and liberals alike, Democrats and Republicans alike. It tries to provide educational assistance to poor children who are not learning well. That is subject to cuts under Gramm-Rudman. Chapter 1 would be subject to cuts under Gramm-Rudman; but not the MX missile, not the $700 toilet seats.

We are not talking about the desirability of cutting the budget deficit. Of course, we should.

I would ask, if the gentleman would continue to yield to me, if I could just introduce some material into the RECORD at this point and let me enumerate what I would like to put in.

Our colleague, Mr. SABO, has asked me to submit the recent statement of the Conference of Synodical Bishops of the Lutheran Church in America on Gramm-Rudman. All 29 of the bishops have signed it.

Mr. SABO. Mr. Speaker, I would like to bring the attention of my colleagues to the recent statement of the Conference of Synodical Bishops of the Lutheran Church in America on the Gramm-Rudman amendment. This statement was signed by all 29 of the bishops and expresses some very important points. I recommend it to my colleagues for their serious attention.

STATEMENT OF THE CONFERENCE OF SYNODICAL BISHOPS OF THE LUTHERAN CHURCH IN AMERICA ON THE GRAMM-RUDMAN AMENDMENT

The Conference of Synodical Bishops of the Lutheran Church in America, meeting in Washington this week, was briefed on the Gramm-Rudman balanced budget amendment. We, the undersigned bishops of the LCA, are deeply troubled by this amendment's potentially devastating impact on the federal programs which provide for the basic needs of the poor.

Together with all of the bishops of the American Lutheran Church and the Association of Evangelical Lutheran Churches, we asserted earlier this year that: "Our deficit dilemma has no painless solutions. However, the sacrifice required must be distributed in accordance the ability of individuals and groups to bear it. The allocation of limited resources should be based on a thorough evaluation of the utility and effectiveness of tax breaks, military spending and social programs."

The action the Senate has just taken seriously compromises that principle.

Automatic reductions in cost-of-living adjustments and across-the-board cuts in discretionary programs, triggered if Congress fails to reach its deficit reduction targets, seem on the surface to be a fair way to spread the pain of deficit reduction. However, with Social Security, a large percentage of defense spending, other relatively uncontrollable programs, and interest on the national debt "off the table," the heaviest burden for reducing the deficit falls on the remaining half of the budget. Budget authority for some programs, such as subsidized housing for the poor, elderly and handicapped, would have to be cut back drastically to achieve the mandated outlay savings. Other programs, such as food stamps and Aid to Families With Dependent Children, could experience signficant reductions—a move which we cannot countenance given the documentation of widespread and persistent hunger in America.

The proposed amendment would not require an evaluation of the revenue side of the budget ledger, should deficit reduction targets remain unmet. Tax expenditures contribute significantly to the deficit and are expected to increase by $192 billion between fiscal year 1984 and fisacl year 1989. Failure to evaluate both actual spending and tax expenditures could result in such anomalies as low-income housing programs being cut through automatic reductions while real estate tax shelters remain unscrutinized.

You will be considering very serious issues relating to the amendment's impact on the economy and on the balance of White House-Congressional budgetary power. But as church leaders, whose congregations and agencies assist persons in need throughout the country, we would urge you also to make concern for the poor a priority in your deliberations. Specifically, we urge you to exempt from the automatic reductions low-income entitlement and discretionary programs as you develop a process which would more equitably spread the burden of reducing the deficit.

Mr. FRANK. It says, "We, the undersigned bishops"—I am reading now. I have not become a bishop in the interim—"are deeply troubled by this amendment's potentially devastating impact on the Federal programs which provide for the basic needs of the poor."

The U.S. Catholic Conference signed by Rev. J. Bryan Hehir. This in on behalf of the U.S. Catholic Conference, the hierarchy of the church.

U.S. CATHOLIC CONFERENCE, DEPARTMENT OF SOCIAL DEVELOPMENT AND WORLD PEACE, OFFICE OF DOMESTIC SOCIAL DEVELOPMENT,

Washington, DC, October 16, 1985.

DEAR REPRESENTATIVE: On behalf of the United States Catholic Conference I am writing to call your attention to the likely negative impact on the poor of the Gramm-Rudman balanced budget amendment.

As the House begins deliberations on this proposal, we urge you to give careful consideration to the far-reaching consequences a balanced budget plan may have on programs that provide basic necessities for the poor. Over the past four years, reductions in low-income programs have been deeper than the cuts in virtually any other area of the budget. Millions of families have been severely affected by these budget cuts.

The budget deficit is a massive and serious problem. We encourage you to continue to explore responsible ways to reduce the deficit. We believe, however, that additional cutting in programs for the poor is not an acceptable method of dealing with the problem. The basic needs of the poor must take precedence over other areas of the budget that are less fundamental to the protection of human dignity. Therefore, as you craft a plan to reduce the federal deficit, we urge you to exempt low-income programs (e.g., Food Stamps, Medicaid, AFDC, SSI, low-income housing) from any further cuts. We are also concerned about the potentially adverse impact of Gramm-Rudman on foreign aid programs that help the poor in the developing countries, programs which we have consistently supported.

Thank you for consideration of these views.

Sincerely yours,

Rev. J. BRYAN HEHIR.

Mr. FRANK. "I am writing to call your attention to the likely negative impact on the poor of the Gramm-Rudman balanced budget amendment."

The American Jewish Committee similarly opposing this.

THE AMERICAN JEWISH COMMITTEE, INSTITUTE OF HUMAN RELATIONS,

New York, NY, October 15, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives, U.S. Capitol, Washington, DC.

DEAR MR. SPEAKER: As the House of Representatives considers the bill to raise the national debt ceiling, the American Jewish Committee is concerned that an amendment may be attached to this legislation aimed at reducing the deficit by cutting programs in arbitrary or unplanned ways. We believe that issues like budget reduction and program cuts are serious matters that need to be considered carefully. They should not be rushed through the legislative process with-

out adequate opportunity to evaluate their provisions and implications for key policy concerns—and without the thoughtful process required for a fundamental change in executive-Congressional relations.

We recognize the urgent need to reduce the Federal deficit and bring spending under control. We can understand the desire of Congress to place itself on record in favor of eliminating unacceptable federal deficits. We believe it ill-advised, however, to seize upon the necessity to pass a higher debt ceiling to introduce a potential major shift in the balance of executive-legislative budget responsibilities and to open the door to possible wholesale program cuts whose effects have not been adequately studied. We urge the House to pass a debt ceiling bill that does not include the Gramm-Rudman amendment that was accepted by the Senate. If a budget-balancing provision is considered necessary, it should come only after a full discussion of its consequences.

We look forward to working with you to identify responsible and constructive ways to reduce the deficit and implement national programs in an efficient manner.

Sincerely,

DAVID M. GORDIS,
Executive Vice President.

Mr. FRANK. I would like to further submit letters from the Child Welfare League of America, and from the Consortium for Citizens with Developmental Disabilities.

CHILD WELFARE LEAGUE
OF AMERICA, INC.,
New York, NY, October 15, 1985.

DEAR MEMBER OF CONGRESS: On behalf of the Child Welfare League of America (CWLA) and its 350 member agencies and 1,200 affiliates throughout this country who provide a range of services to children and families in crisis, I am writing to express our deep concern about the Gramm-Rudman Balanced Budget Amendment passed by the Senate last week.

While we too are concerned about projected deficits, we do not believe that the Gramm-Rudman Amendment achieves the goal of deficit reduction in a fair, equitable, nor, for that matter, effective manner. Specifically:

We oppose the provision of Gramm-Rudman exempting that portion of the defense budget which is covered by prior year contracts and obligations. Such contracts and obligations account for approximately 40% of the total defense budget and, in fairness, should be considered as part of any base used to compute automatic spending reductions. The defense budget has received huge increases over the past five years and in large measure is responsible for our current deficit. Therefore, it is only fair that the defense budget fully shoulder its share of automatic spending reductions in any attempt to reduce the deficit or balance the Federal budget.

Given that 40% of the defense budget, Social Security and interest payments on the national debt would all be exempt from automatic spending reductions, *the burden for reducing the deficit and balancing the budget will fall disproportionately on programs serving children and low income families.* These programs have already contributed to reducing the deficit by absorbing more than $10 billion a year in cuts since 1981. *We, therefore, urge you to specifically exempt discretionary and entitlement programs serving children and low income persons* during House-Senate Conference negotiations on the Gramm-Rudman amendment.

Any effort to balance the budget and eliminate deficits should allow the inclusion of new revenues from taxes. Recent tax breaks for corporations and wealthy individuals rather than expenditures for children and low income families have significantly contributed to the current deficit. Moreover, it is not certain that if the entire non-defense discretionary portion of the budget were totally eliminated that the Federal budget would be balanced. New revenues must be allowed in any plan aimed at reducing the deficit.

Congress must not relinquish its authority and responsibility in making budget decisions. Considerable discretion is provided to the President and to the Office of Management and Budget under Gramm-Rudman in deciding whether or not to make automatic spending reductions and, in the case of OMB, in allocating reductions, possibly down to the line item. This may be one of the more serious elements of the Gramm-Rudman in its long-term implications regarding future national budget policy in that Congress could effectively be overturned in its budget decisions by allowing the President the ultimate authority in this regard.

CWLA urges your serious consideration of these issues as well as your consideration of whether to move forward with a balanced budget package at this time. The Gramm-Rudman amendment is barely two-weeks old; it has not been subject to committee scrutiny or deliberation in either the House or the Senate; and, it has far-reaching implications for the future of our national budget process. It deserves, therefore, a more thoughtful and deliberate consideration than can possibly be provided in the next week and a half.

Such consideration is particularly important given that, as currently proposed, Gramm-Rudman would be devastating for programs serving children and low-income families. Unfortunately, these populations are least able to provide you with their analysis of this proposal and they, therefore, rely on your judgment and wisdom for their protection. CWLA urges you to keep in mind the children who would be adversely affected by Gramm-Rudman as you decide how you will vote on the matter.

Thank you for your consideration.

Sincerely,

DAVID S. LIEDERMAN,
Executive Director.

CONSORTIUM FOR CITIZENS
WITH DEVELOPMENTAL DISABILITIES,
October 18, 1985.

DEAR CONFEREE: The Consortium for Citizens with Developmental Disabilities (CCDD) wishes to express our outrage about the budget deficit reduction plan authored by Senators Gramm and Rudman and currently under consideration in conference by the House and Senate.

CCDD is comprised of national organizations, including the undersigned, who work on behalf of our country's citizens with the most severe disabilities. Although persons with developmental disabilities frequently have unmet needs, many have available to them some basic Federal supports through Federal/State programs and personal entitlements. These supports allow them to have a roof over their heads, food, medical assistance, and special education and training programs aimed at helping them become more independent and productive citizens. During many years of strong bipartisan support, members of both Houses have worked valiantly to develop and maintain these vital services and benefits, which are now so seriously threatened.

We have two major objections to the Gramm-Rudman Amendments as we understand them. First, the current Congressional procedures for budget approval would be radically changed, placing sweeping authority in the hands of the Executive Branch. The future of our services and our people would be that much more at risk. CCDD wishes to express its dismay over this possibility, and strongly urge Congress to work to retain its current authority over the budget process. In this way, people with developmental disabilities will maintain their opportunity to share their views and concerns with their elected representatives and not to have the quality of their lives decided by the Office of Management and Budget.

Secondly, CCDD is particularly concerned that a substantial portion of the budget cuts required by Gramm-Rudmann will likely result in massive curtailment of services and benefits to persons with developmental disabilities. None of the programs geared to protect and improve the lives of our people are protected. Yet, citizens with developmental disabilities are among our most vulnerable populations. What will happen to them in FY'91 when programs like vocational rehabilitation, special education, Medicaid and others are slashed beyond recognition? We urge you to exempt Federal programs serving people with developmental disabilities from the cutbacks envisioned under Gramm-Rudman.

CCDD does realize that deficit reduction is an important national priority. It must be done to keep our nation strong. We implore you to do all you can to find effective avenues other than gutting handicapped and other human services programs. Surely there are ways to raise substantial additional revenues to reduce the deficit. Surely, a greater proportion of the defense budget can be scrutinized for possible reductions.

Persons with developmental disabilities, their families and advocates, are becoming very fearful that their dreams for independence will soon end if Gramm-Rudman is enacted. These people have enough problems facing them in their everyday lives without having to worry about what the Congress might do to their benefits and services. We strongly urge you to reflect carefully on the impact of your decisions on the lives of persons with developmental disabilities.

On behalf of: American Academy of Child Psychiatry, American Occupational Therapy Association, American Physical Therapy Association, Association for Children and Adults With Learning Disabilities, Association for Retarded Citizens, Council for Exceptional Children, Epilepsy Foundation of America, National Alliance for the Mentally Ill, National Association of Private Residential Facilities for the Mentally Retarded, National Association of Private Schools for Exceptional Children, National Association of Rehabilitation Facilities, National Association of State Mental Retardation Program Directors, National Easter Seal Society, National Education Association, National Mental Health Association, National Network to Prevent Birth Defects, National Recreation and Park Association, National Society for Children and Adults with Autism, the Association for Persons with Severe Handicaps, United Cerebral Palsy Association, Inc., the Center for Law and Social Policy.

Mr. FRANK. I would like to submit articles by Evans and Novak, Hobart Rowen, George Will, and Haynes Johnson, a fairly representative selection of people.

[From the Washington Post, Oct. 13, 1985]

GOVERNMENT BY MEAT CLEAVER

(By George F. Will)

Bob Dole, illustrating the axiom that wit is educated insolence, said the Senate should pass the radical budget-balancing bill without hearings because, "The longer something hangs around here, it gets stale. People start reading it." Heaven forfend.

The proposal, an action-forcing device, would require five annual cuts of equal size ($36 billion) bringing the deficit to zero in 1991. The president would be required to submit a budget with sufficient spending cuts or tax increases to cut $36 billion from the deficit. If—if!—Congress did not ratify his blend of pains and did not devise its own blend, the failure would trigger a presidential duty to cut spending, across the board, by what fixed percentage is required.

Note that congressional failure to make hard choices would not invest the president with broad power to exercise rational discretion in shaping the budget. Defenders—yes, defenders—of the proposal stress that it makes the president a mere automaton. The proposal minimizes choice—thought—in budget-making. This evasion of governance might, for example, require the president to cut equally, thereby assigning the same social value to Amtrak subsidies and programs for spina-bifida babies.

This proposal is historic in its potential consequences and stunning in its symbolism, especially as it reveals a transformation of conservatism. In its potential for large consequences, it ranks a cut below repeal of the Missouri Compromise. It will not ignite civil war, quite. However, as an allocator of effective power within the central government, the proposal is as significant as the establishment of the Federal Reserve System.

Considering its source—the conservative party—the proposal is as startling as the Giles Enforcement Act of 1809, which suspended parts of the Bill of Rights in order to enforce compliance with Jefferson's embargo against Britain and France. Sen. William B. Giles, the author of this concentration of irresistible power in the central government, was a Virginia Jeffersonian, at least rhetorically.

Today's conservative proposal for shrinking deficits mocks some conservative rhetoric. It would involve an enlargement of executive-branch power without parallel in peacetime. Modern conservatism defined itself in opposition first to FDR and then to LBJ. Hence conservatism has celebrated congressional prerogatives against "presidential government." But conservatives supporting this deficit-cutting proposal favor a form of executive power far beyond the dreams of liberal political avarice.

We few who are "strong government conservatives"—we Hamiltonians—believe, as our hero did, that "energy in the executive is a leading character in the definition of good government." But minimizing the element of mind in governance is a high price to pay for instilling energy in the executive.

The proposal illuminates the real, as distinct from the rhetorical, nature of contemporary conservatism. Social Security would be completely exempt from cuts. Social Security and interest payments, which are necessarily exempt, comprise one-third of the budget. All other entitlement programs would suffer only cuts from annual cost-of-living increases. Thus the controllable portion of the defense budget, especially pay, maintenance and operations, would bear a heavy burden of the cuts. So conservatives supporting the proposal are siding with the middle-class, social-insurance side of the central government against the defense priority.

The proposal is as American as, well, Prohibition. It expresses a deep desire to tame turbulent social forces with institutional cleverness and words on parchment. Deficits a problem? Outlaw the rascals—that worked so well with gin.

It is axiomatic: In politics, the perfect is the enemy of the good. That is, pursuant of perfection impedes achievement of the merely adequate. Perhaps today's proposal is the closest that self-government, modern American-style, can come to self-restraint. But as Dole said to a supporter of the proposal, "Don't get up and explain it again. Some of us are for it."

Congressional pleas for the proposal sound like the notes the homicidal maniac sends to the police: "Stop me before I kill (spend) again!" Sen. Warren Rudman (R-N.H.), an author of the proposal, was an amateur boxer. He combines charming feistiness with disarming candor. He does not cavil about a description of the proposal as a straitjacket for the government to jump into in a fleeting moment of lucidity. But the words of Sen. Bill Bradley (D-N.J.), a critic of the proposal, can be quoted by proponents for the proposal. Bradley says Congress does not need new procedures, it just lacks political will. Just? "The brain surgeon just lacked steady hands."

The proposal calls to mind an acid cartoon from the late 1940s showing a German general saying, "I was only obeying orders I gave to myself." The proposal would hand a meat cleaver to the executive branch and force the use of it. Then a congressman or senator confronted by angry constituents could point to the executive branch and say: "Don't blame me. The, er, government did it."

[From the Wall Street Journal, Oct. 17, 1985]

VOODOO BUDGET PROPOSALS WON'T CURE REAGAN'S DEFICITS

(By Hodding Carter III)

The proposal by Sens. Gramm, Rudman and Hollings controlling and then eliminating the federal deficit is brilliant politics and appalling governance. It makes a mockery of the separation of powers, stands constitutional and political responsibilities on their heads, and makes policy decisions by arbitrary formula rather than by a rational decision-making process. In other words, it accurately reflects the realities of Washington 1985. A bad idea whose time has come, it could well finally force responsibility upon those who have been resisting it like the plague for far too long.

The problem all along has been that no one would bite the multiple fiscal bullets that face the nation with lethal peril. Congress and President Reagan spent almost eight months wrestling with the budget, then "compromised" on a resolution that was divorced from reality when passed and has grown more distant from the truth of the situation ever since. It promises deficit reductions it can't deliver, based on economic projections no one accepts.

It's not that anyone disputes some basic points. The annual deficit has quadrupled over the past five years, now averaging $200 billion-plus each year. Thanks to the structural imbalances between tax base and spending so carefully created by then-Rep. Phil Gramm and company in the 1981 tax bill, there would be large deficits under the best of circumstances, so long as the president insists upon using national defense as the world's largest pork-barrel project. The circumstances, of course, were something less than the best for about half of President Reagan's five years in office.

And so the national debt—that sum of money we liberals once liked to say that Americans "owe ourselves"—has grown astronomically, fed by ever burgeoning deficits. From one trillion five years ago, it has doubled to two trillion dollars. Given annual deficits of $200 billion, give or take a few billions, by realistic projections it should reach three trillion by 1990. That money we "owe ourselves" is increasingly owed to others, and the transfer of national wealth from productive purposes to debt service can have only dire long-term results. It will sap the country's economic vitality and drive business and industry into permanent stagnation—or it will prompt the government to print its way out of one mess and into another.

So much for the obvious. Today, virtually no one disagrees that huge debt and large annual deficits are intolerable. But since the real pain and harsh consequences are in the hazy future, neither legislators nor the president has felt compelled to inflict tax or budgetary pain on their constituents in the here and now.

Into that vacuum came the appealing simplicities of Gramm-Rudman-Hollings. What the White House and Congress would not do for themselves, through hard choices among program options, the deus ex machino of annual, mandatory, across-the-board reductions would impose. All matters would be treated as though they were of equal worth, whatever their starting point and their utility. The just and the unjust alike would take the budget-reduction blow (save only that great untouchable, Social Security). Bloated or lean, each budget item would be cut by the same percentage to reach the pre-specified annual overall reduction.

And who would do the cutting? In the political sense, no one. If Congress and the president were unable to come up with a budget that reduced the deficit by the preestablished figure, then the act's unseen hand would take the president by the neck and force him to make the blanket cuts. Everyone would be to blame, and no one.

So much for sarcasm. Dangerously flawed, Gramm-Rudman-Hollings performs a major public service. It throws into clear relief the utter irresponsibility of both houses of Congress and the president. It exposes the collapse of the budget process, which meets its goals only by fudging them. It demonstrates that behind all the public protestations of concern about the deficits and the debt at both ends of Pennsylvania Avenue lies a great swamp of indifference. Finally, it creates a monster whose Frankenstein-style depredations should finally force consensus on intelligent alternatives to arbitrary, mechanical budget making by formula.

The matter is now before an extraordinarily large conference committee, the House having decided to put into a huddle rather than try to advance the ball on the open field of play. As members of Congress read deeper and think more clearly, they may all find various reasons to alter the version of Gramm-Rudman-Hollings that the Senate passed. But some version will almost surely

emerge, thanks to a fine mix of political shrewdness and political cowardice.

At that point, it seems clear to me that no one will actually find it possible to live with the measure over any length of time. Certainly not the president, who would be required to cut deeply into defense spending along with social programs. Not liberal and moderate congressmen, who would have to watch from the sidelines as the poor were even more severely penalized for their poverty. And not those in both houses who believe that Congress should be a live participant in the business of government rather than a mute observer of some clockwork process.

In short, Gramm-Rudman-Hollings will, like the executioner's ax, wonderfully concentrate the minds of those we have elected to represent us. Faced with the most unpleasant choice of all, which is to admit their irrelevance to the political process, they may finally make the hard choices and trade-offs necessary to confront the implications of our national sea of red ink. Having taken us into that sea up to our necks due to the economic policy mistakes of 1981 and beyond, they should finally be persuaded by their own legislative creature that they have the ability to repair them.

If that is wrong and if Gramm-Rudman-Hollings is called into play, it will fundamentally alter the shape of government and amend the Constitution through the back door. In that respect, it is a radical threat to our political system. But so, too, are the implications of the monstrous national debt. Given both, the president and Congress should finally be stirred to stop playing games and start meeting their basic responsibility.

[From the Washington Post, Oct. 18, 1985]

WHAT GRAMM/RUDMAN WILL REALLY COST

(By Rowland Evans and Robert Novak)

By the time their guffaws over the discomfiture of Democrats caught in the act of hypocrisy had subsided, senior aides to President Reagan began totaling up the cost of the Gramm/Rudman deficit-reduction plan. A possibly fatal slowdown of tax reform is only the down payment. Threatened in the immediate future are Reagan's rearmament program and his pledge not to increase taxes. That endangers the sustained economic growth that would truly shrink the deficit.

Sober second thoughts abound in the West Wing of the White House, where Gramm/Rudman looks more and more like Dave Stockman's revenge. Stockman left the Office of Management and Budget after a final failure to raise taxes as an alternative to unobtainable spending cuts. Suddenly, he is on the verge of victory in absentia.

Nothing seemed further from reality when Sen. Phil Gramm's brainchild emerged, enabling Republicans to regain the budget offensive. After a solid year of complaining about the Reagan deficit, Democrats were faced with further assault on cherished social welfare programs.

But the Reagan Revolution will have to pay as well. As a starter, Gramm/Rudman may administer the *coup de grace* to Stockman's pet peeve: tax reform. Chairman Dan Rostenkowski and other members of the House Ways and Means Committee must lay aside tax-writing to serve on the conference committee to forge a deficit reduction.

Considering today's negative climate within Ways and Means, postponing tax reform could prove remedial. But the renewed primacy of deficit reduction dulls the appeal of a tax bill mistakenly hawked by the White House as an instrument of "fairness" rather than economic growth.

Nearly as immediate but more profound is the impact on budget-making. Although the budget need not be balanced until 1991 under Gramm/Rudman, the OMB must begin immediate preparation of Reagan's most Draconian budget. To limit the deficit to $147 billion, it must far outdo Stockman's last rejected efforts at dismantling the Great Society. Politically astute aides at the White House see this Parthian shot at big government as fine for the lame-duck president but suicidal for Republican politicians in 1986.

In fact, the danger transcends partisan politics. As Congress predictably refuses to cut domestic spending, Reagan would be faced a year from now with mandated cuts—evenly spread between defense and nondefense.

The problem here has been publicly laid out by Treasury Secretary James Baker, scarcely a mad bomber of defense spending. He acknowledges that the military cutbacks he unsuccessfully advocated in 1981 have been forced by Congress and that there is no margin for further reduction if the Reagan rearmament is to be preserved. Yet, it is clear to Baker that Gramm/Rudman will require just such defense slicing.

The escape from this dilemma is via the path long advocated by Stockman: tax increases. The argument that will be made to Ronald Reagan next year is obvious; Mr. President, if you want to save your military budget, you must acquiesce in a little "revenue adjustment."

Since tax increases depress economic activity, this could dash private Treasury projections of a budget close to balance by 1991 simply by economic growth. Thus, what Gramm sees as the salvation of the Reagan Revolution may ruin it.

Gramm, a rising Republican star, is an intrepid champion of military preparedness and the free market. But he sees the Reagan Revolution as a "defunding" of federal programs with which he believes the Democrats have bought political victory.

Gramm is fully supported by chief of staff Donald Regan, but heavy doubts have infiltrated the West Wing and the House Republican cloakroom. Silent dissenters are hoping the Democrats will somehow derail the deficit-reduction juggernaut, signifying that the political budget game has gone full circle.

[From the Washington Post, Oct. 17, 1985]

GRAMM/RUDMAN IS PURE MISCHIEF

(By Hobart Rowen)

Of all of the indictments of the Gramm/Rudman budget-deficit proposal—and there are many—one of the most effective was delivered by former Economic Council chairman Walter W. Heller: it is bad, almost horrible, economic policy.

Unhappily, Heller's testimony to the Joint Economic Committee got lost as national media attention was focused on the Navy's splendid intercept of the Egyptian airliner trying to take those four Palestinian hijackers to safety.

The proposal by Republican Sens. Phil Gramm of Texas and Warren Rudman of New Hampshire would require a balanced budget by fiscal year 1991 and, in the interim, would trigger automatic spending reductions of $36 billion each year. This seductive, simplistic notion is supposed to satisfy the yearning of Republicans and Democrats alike to "do something" about the budget deficit, in the same thoughtless fashion that Congress has been asked to "do something" about the trade deficit by passing counterproductive protectionist import surcharges.

Said Heller: "Like any mandated and rigid formula, it would undermine, perhaps even pervert, the role of the federal budget as an economic balance wheel in the economy. Rigid reductions of the deficit through thick and thin—through recovery and recession—could wreak havoc on the economy."

For example, suppose a recession hits the economy in 1987 (which many economists think quite possible), but is followed by a modest recovery in 1988. Under terms of the Gramm/Rudman bill, the federal deficit in fiscal 1988 would not be allowed to exceed $108 billion, which is a smashing $162 billion less than the $270 billion now forecast by the Congressional Budget Office for such a 1987-88 economic scenario.

Says Heller: "Imagine the economic setback it would cause to slash spending and the deficit by 1988 to try to reach the $108 billion deficit level fixed by the Gramm/Rudman formula!"

Obviously, it couldn't be done. If in that circumstance the president actually tried to find the $162 billion by raising taxes or by forcing cuts in spending, it would further depress the economy, throwing more people out of work and throwing the budget even more out of whack. "A dog chasing its own tail comes to mind," Heller said.

Or let's say that the economy faces a "growth" recession, like the one it's been in for the past year—no negative result in GNP, but not enough growth, either, to cut the unemployment rate. Over a two-year period, that would cost about $60 billion in tax revenue that otherwise would be received by the Treasury. And in that case, Gramm/Rudman would not only require that $72 billion be cut from the deficit ($36 billion a year for two years), but enough to make up for the $60 billion shortfall.

Heller, a good phrase-maker (who is sorely missed here) snaps: ". . . that would simply kick the economy in the groin and bring on an actual recession."

But sadly, a passel of veteran "liberal" Senate Democrats was played for suckers by junior Republicans Gramm and Rudman. They weren't paying attention to the economic-policy shortcomings of the proposal, but to the political benefits of being seen as willing to "do something" about the deficit. And in doing so, they fell into a neat trap, transferring authority to President Reagan to do whatever he wants, unilaterally, with the nondefense part of the budget. According to the Center on Budget and Policy Priorities, at least half of the budget would be exempted from the Gramm/Rudman cuts.

Among 27 Democrats who abandoned, almost everything they've ever said they stood for on economic issues was Edward M. Kennedy of Massachusetts, who has been trying to carve out a more "responsible" image looking to the 1988 presidential election. Said Kennedy: "We are all crying 'fire' in the overcrowded theater of the federal deficit. We cannot continue to debate endlessly which fire extinguisher to use while the fire rages on. "Since low-income programs would bear the brunt of the automatic $36 billion annual reductions, Kennedy's rationale is somewhat reminiscent of the U.S. military officer at Ben Tre during the Vietnam War who said: "It became necessary to destroy the town in order to save it."

Sens. Bill Bradley (D-NJ.) and Gary Hart (D-Colo.) argue convincingly that—in short—Gramm/Rudman is a fraud, cleverly

designed to protect the defense program from more than token cuts; to avoid a tax increase; and to lay the entire burden of cutting the deficit on monies for education, child care, environmental and other nondefense programs that so far have partially eluded the ax of Reaganomics.

It's now up to House Democrats in conference to rescue the nation from the worst of the Gramm/Rudman mischief.

Mr. FRANK. And I would like to submit a memorandum by the Children's Defense Fund and the Center on Budget and Policy Priorities.

POOR CHILDREN MUST NOT BE SACRIFICED—AGAIN: GRAMM/RUDMAN MUST EXEMPT ALL PROGRAMS FOR THE POOR

America's poor children have already paid, and paid dearly, to reduce our nation's budget deficit. In 1981, poor children were sent to the frontlines of the deficit reduction war, and federal programs for them and their families were reduced by over $10 billion a year. The Gramm/Rudman amendment to the federal debt ceiling legislation (H.J. Res. 372) asks poor children to pay again.

The Gramm/Rudman plan is now in the hands of a House-Senate Conference Committee, composed of 48 Members of the House and 9 Senators. If this dangerous plan is allowed to pass without exempting the poor, children and families will suffer greatly. This comes at a time when one out of every five children in America is poor, and when increased suffering and deprivation are evident from all indicators, including: incidence of hunger and homelessness; reports of abuse and neglect; access to basic health care, child care, and educational services, and rates of teenage unemployment.

House conferees must exempt all programs serving poor children and families—entitlements and discretionary—from any additional budget cuts, and target its efforts to the real causes of Federal deficits—defense spending and tax expenditures.

GRAMM/RUDMAN WILL SERIOUSLY HURT POOR CHILDREN

Because Social Security and a large portion of the defense budget would be exempt from spending reductions, programs for poor children and families would be subject to cuts equal to as much as twice their share of total federal outlays. Gramm/Rudman would require automatic spending reductions for all expenditures deemed "controllable," nothwithstanding the fact that many programs for poor children and families yield long-term savings which far exceed their cost.

The magnitude of automatic spending reductions under Gramm/Rudman will depend a great deal upon economic conditions in the years ahead. If the economy stalls and enters a recession, the budget cuts required to meet annual deficit targets will be severe. The following list illustrates how poor children and families would be hurt by spending reductions of 10 and 20 percent (levels which could be achieved as early as 1987 under the Senate's balanced budget proposal):

Medicaid.—A 10 percent cut would threaten services to 1 million children, while a 20 percent reduction would jeopardize Medicaid services to 2 million children. (In Texas, a study found that each dollar spent on preventive health care for children under Medicaid saved $8 in long-term care costs and future lost income as children grew old enough to work.)

Head Start.—A 10 percent cut would deprive 45,000 children of a Head Start, while a 20 percent reduction would force 90,000 children out of the program. (A 20-year study of a preschool program like Head Start recently concluded that the total economic benefits of such a program are seven times greater than their cost.)

Chapter 1 of the Elementary and Secondary Education Act.—A 10 percent cut would result in a loss of compensatory education services to 500,000 children, while a 20 percent reduction would deny remedial assistance to 1 million children. (National evaluations of Title I revealed that participating students gained 10–17 percent more in reading and 9–74 percent more in mathematics than their non-Title I peers.)

Women, Infants, and Children Supplemental Food Program [WIC].—A 10 percent cut in the Special Supplemental Food Program for Women, Infants, and Children (WIC) would eliminate services to 300,000 women and children, while a 20 percent reduction would deny this nutritional assistance to 600,000 women and children. (A Harvard study of WIC found that the reduced incidence of a low birth-weight babies needing extended hospital care saved $3 in hospital costs for every $1 spent in the prenatal component of WIC.)

Job Corps.—A 10 percent cut would force 10,000 disadvantaged teenagers out of Job Corps, while a 20 percent reduction would eliminate youth employment and training opportunities for 20,000 participants. (Cost-benefit analyses show that Job Corps yields $1.45 in societal benefits for every dollar invested in the program.)

POOR CHILDREN AND FAMILIES HAVE ALREADY UNFAIRLY SACRIFICED TOO MUCH

In 1981, programs for the poor were singled out for enormous budget sacrifice. More than $10 billion a year has been cut from federal programs serving poor children and families. Virtually every federal program targeted to the poor and vulnerable has been seriously affected: child nutrition food stamps, AFDC, Medicaid and other health programs, education and job training, child care, child welfare programs, low-income housing, legal services and many others.

Federal outlays for programs for poor children and families have been slashed even as defense spending has soared. Between 1981 and 1984, real per capita expenditures for programs serving low-income families and children declined by 8 percent while real per capita defense outlays increased by 25 percent. Gramm/Rudman would make this imbalance far worse by permitting projections of further real growth in defense spending and then exempting roughly 40 percent of the defense budget from spending cuts before any automatic, "across-the-board" deficit reductions are made.

As a result of the deep sacrifices imposed by previous budget cuts, programs for poor children and families now fall far short of meeting basic human needs. Examples of our inadequate investments on behalf of low-income families include:

Health services under Medicaid reached 98 percent of all poor children in 1978; only 71 percent of all poor children were Medicaid recipients in 1983.

Head start is now reaching only 18 percent of all eligible children. Although 442,100 children are served, another 2 million are left out of the Head Start program.

AFDC benefits provided assistance to 76 percent of all poor children in 1978; only 53 percent of all poor children were reached by the AFDC program in 1983.

Nearly 800,000 fewer children participated in federal compensatory education programs (Chapter 1, formerly Title I) in the 1982 school year than were served in the 1979 school year.

The four basic child nutrition programs—the School Lunch, School Breakfast, Child Care Food, and Summer Food programs—suffered budget cuts of nearly 30 percent between fiscal year 1982 and 1985. As a result, 1.6 million poor children have been dropped from these child nutrition programs.

In 1977, half of all black and white high school graduates enrolled in college; by 1982, college enrollment among black high school graduates fell to 36 percent. Much of this decline can be traced to poverty—only one in every six poor black high school graduates attends college, as compared to one in three high school graduates from black and white families with incomes above the poverty line.

GRAMM/RUDMAN DOES NOT ADDRESS THE CAUSES OF RECENT FEDERAL DEFICITS

The unprecedented federal deficits incurred during the Reagan administration cannot be traced to programs for poor children and families. At the same time the low-income programs have been cut by $10 billion annually, the deficit has increased from $58 billion in fiscal year 1981 to nearly $200 billion in each of the past three fiscal years.

Much of the current deficit stems directly from the combination of large tax reductions and rapid increases in defense spending which the Reagan administration has persistently advocated and successfully achieved. While federal tax revenues have dwindled to 18–19 percent of the Gross National Product, burgeoning defense expenditures have pushed federal outlays to about 24 percent of GNP. The administration added $178 billion to the defense budget during its first term, and yet also won large tax reductions for wealthy Americans which effectively left the federal government without the means to support its defense buildup.

Between fiscal years 1984 and 1989, tax expenditures will increase by an estimated $192 billion. If the Reagan administration's budget priorities are accepted, defense expenditures during the same period will increase by nearly $350 billion. Yet Gramm/Rudman exempts all tax expenditures and approximately one-third on the defense budget from automatic spending reductions designed to achieve a balanced budget. The additional exemption of Social Security from required spending cut further ensures that programs for poor children and families will bear the brunt of deficit reductions under Gramm-Rudman.

Any serious and equitable balanced budget proposal must target budget cuts on the causes of the current federal deficits. All of the defense budget must be part of the base used to compute any budget reductions, and revenue measures and tax expenditures should also be considered as sources for deficit reductions.

Fairness and economic justice require that programs serving low-income children and families be fully exempt from Gramm/Rudman or any alternative balanced budget proposal. The poor have sacrificed more than their fair share in previous deficit reduction efforts. They must not be scapegoats once again.

POVERTY AMONG CHILDREN HAS RISEN DRAMATICALLY SINCE 1979

More than one of every five children in America today is poor. Half of all black children and nearly 40 percent of all Hispanic children are poor. A total of 12.9 million American children lived in poverty in 1984, an increase of 29 percent over 1979 level.

Children are not the poorest group in American society. Between 1959 and 1969, the poverty rate for children was cut nearly in half, from 26.9 percent to 13.8 percent. However, this trend was sharply reversed in recent years, and 21 percent of all children were poor in 1984. Over 3 million children fell into poverty between 1979 and 1983. In contrast, poverty among the nation's elderly has declined to the point that persons over age 65 in 1984 were less likely than the population as a whole to live in povety.

The increased suffering and deprivation associated with child poverty is evident from all indicators.

The national death rate for infants between one month and one year of age increased by 6 percent between 1983 and 1984. By 1990, 22,000 American babies will die primarily because of low birthweight.

Over 66,000 children are now living without adequate shelter. An estimated 22 percent of the homeless living in shelters, not including runaway shelters, are children under age 18.

An estimated 1.5 million American children were reported abused or neglected in 1983, an increase of 200,000 over the previous year.

Families with young children and those headed by women are particularly vulnerable to poverty. One-fourth of all children below age 6, including one-half of all black children in this age group, are poor. More than half of all children in female-headed families are poor, and over two-thirds of black children in such families live in poverty. For families headed by women under age 25, the poverty rate exceeds 75 percent.

It is essential that House conferees insist that all programs serving the poor—both entitlement and discretionary—be fully exempt from Gramm/Rudman.

[Center on Budget and Policy Priorities]

BUDGET PROPOSALS MAKE LARGE REDUCTIONS IN LOW INCOME AND HUMAN RESOURCE PROGRAMS

Under the Administration's new budget proposals unveiled today, nearly all cuts would come from the domestic side of the budget. The reductions in human resource programs other than Social Security (education, health, social services, employment, income maintenance, retirement and disability programs) would be as large as all the cuts made in these programs in 1981 and 1982 combined.

In addition, low income programs, which were hit heavily during the Administration's first term, would be subject to large reductions once more ($34 billion over the next three years) and would again receive a disproportionate share (19%) of the cuts. This marks the fifth consecutive Administration budget in which low income programs would be affected disproportionately (i.e., the percentage of the cuts coming from low income programs would be larger than the share which the programs comprise of the overall budget).

While overall federal spending (other than interest payments on the national debt) would remain frozen at $804 billion, spending for defense and related areas would rise $30 billion while domestic spending would be cut $30 billion below FY 1985 levels. See Table 6. (The "real" cut in domestic spending, after inflation is taken into account, is considerably more than $30 billion.)

Although the Administration is listing $8.7 billion in defense cuts, the Department of Defense budget would actually grow 5.9% after inflation. The Congressional Budget Office (CBO) considers any defense spending growth over 5% above inflation to be an increase that enlarges the deficit, not a cut that shrinks it.

If, therefore, the defense "savings" are not counted as deficit reductions, approximately 95% of the actual cuts in the budget come from the 40 percent of the budget (exclusive of interest payments) that consists of domestic programs other than Social Security. This is the same part of the budget that bore most of the cuts during the Administration's first term. (If the defense "savings" are counted as cuts, then over 80% of the cuts come in the 40% of the budget that is comprised of domestic programs other than Social Security.)

Reductions in human resources programs (except Social Security) would be equal in size to all such human resources cuts enacted in 1981 and 1982 combined, when the bulk of the earlier budget cuts were made. The new proposals call for cuts in human resources programs (other than Social Security) of $65.6 billion during the first three years they would be in effect (fiscal years 1986 through 1988). Congressional Budget Office (CBO) analyses show that the cuts enacted from January 1981 through July 1983 in these programs totaled $55.8 billion during the first three years those cuts were in effect (FY 1982 through FY 1984). When the earlier cuts are adjusted for inflation (to reflect prices in the FY 1986 to FY 1988 period), those cuts increase to $65.9 billion. This means that after adjusting for inflation, the new human resources cuts would be a almost exactly the same as the cuts enacted earlier. If the new proposals are approved, the total amount of human resources cuts in areas other than Social Security thus will double (Tables 1 and 2).

The reductions proposed in human resource programs are $13.8 billion in FY 1986, $23.1 billion in FY 1987, and $28.7 billion in FY 1988.

Despite rhetoric concerning "freezes," many fewer domestic programs would be frozen at least year's levels than had earlier been thought. Large numbers of programs are actually reduced below FY 1985 levels.

Some programs would be cut in both FY 1985 and FY 1986. The FY 1985 cuts would be achieved largely through proposals to "rescind" funds Congress has already appropriated for this year. Programs that would be cut both years include the Special Supplemental Food Program for Women, Infants, and Children;[1] the summer youth employment program; employment and training programs for dislocated workers; payments for the operation of low income housing projects; assistance to "magnet schools" (to aid in desegregation), and bi-lingual education.

[1] Congress has appropriated $1.5 billion for WIC in FY 1985, but the Administration proposes to release to states only $1.424 billion of this amount and to return the remainder to the Treasury. For FY 1986, the Administration is proposing $1.48 billion for WIC. Funding for both years would be cut below the level Congress appropriated for FY 1985.

LOW INCOME PROGRAMS

Low income programs would again be hit hard. Cuts in programs that primarily serve low income persons would total 34.0 billion in outlays over the next three years—or 19% of the total cuts (assuming the defense "savings" are not considered to be cuts; if the defense savings are counted, than 16% of the total cuts would come in the low income area). See Table 3.

The low income reductions total $7.1 billion in FY 1986, $11.8 billion in FY 1987, and $15.1 billion in FY 1988.

While cost-of-living adjustments would be provided in Supplemental Security Income, food stamps, and veterans pensions, nearly all other low income programs would either be frozen, cut below last year's levels, or terminated.

Moreover, this substantially understates the full magnitude of the cuts on low income families:

The universe of low income programs used here does not include a number of programs which are not means-tested or directed principally to low income persons, but in which a disproportionate share of the benefits still go to low income persons. For example, urban mass transit aid would be terminated, while Older Americans Act services for the elderly would be frozen.

The $34 billion in low income program reductions also do not include proposed reductions in Medicare. The new Administration proposals would substantially increase the premiums that Medicare beneficiaries pay (those premiums would double by 1989). This would affect low income persons two ways: first, low income elderly persons not on Medicaid would have to pay the increased premium out of their own pockets. Second, state governments would have to pay the increased premium for low income Medicare beneficiaries who are on Medicaid, and the resulting increase in state Medicaid costs would likely lead many states to reduce Medicaid eligibility and benefits further to offset the new expenses.

Finally, the $34 billion in savings substantially understates the dimensions of the proposed cuts in HUD subsidized housing. The budget shows a reduction in actual spending (or "outlays") of $1.3 billion for HUD subsidized housing next year. But the budget also calls for an appropriations cut of $9.6 billion in HUD subsidized housing next year—a reduction over seven times as large. The full $9.6 billion would indeed be cut, but (due to fiscal and accounting procedures used in this program), the bulk of these cuts will not show up on the books as "outlay" reductions until after FY 1986.

As a result, the reductions in HUD subsidized housing would increase steadily in future years—and the overall reductions proposed in low income programs would grow larger and larger in future years.

Proposed cuts in a number of low income areas would have substantial impacts.

The Medicaid program, which provides health care coverage for poor families with children and poor elderly and disabled persons, would be cut $6.5 billion over the next three years ($1.1 million in FY 1986). These cuts would double the Medicaid cuts made during the first three Reagan years. The earlier cuts resulted in reductions in Medicaid coverage in nearly every state in the country. Most states either eliminated some persons from Medicaid (the Urban Institute found a marked decline in the number of low income elderly and disabled persons covered), or ended coverage for specific medical

services (such as eyeglasses for poor children, dental care, or prescription drugs). The new Medicaid proposals include further reductions of such a magnitude that they would be virtually certain to result in substantial additional cuts throughout the country in medical services to the poor.

The Supplemental Food Program for Women, Infants, and Children (WIC) would be provided insufficient funding to maintain its current caseload. Over 100,000 low income pregnant women, infants, and children at nutritional risk would be dropped from the program.

Subsidized housing would eventually be provided to 200,000 fewer low income families and elderly persons who qualify for it than if current policies were continued. This would intensify the housing crisis in low income communities. (According to some estimates, 500,000 low rent housing units are not lost to the housing stock each year due to condominium conversions, rent increases, decay, or abandonment. When the Reagan Administration took office, over 250,000 low rent units were being added back to the stock each year through federally-supported construction or rehabilitation efforts. Due to deep cuts in subsidized housing in the first years of the Administration, only 100,000 units a year are now being restored. The new proposals would cut subsidized housing still further, providing no funds for any low income units and effectively eliminating for two years the program which currently adds back 100,000 units per year.) In addition, federal funds for operations and maintenance of public housing projects would be reduced.

In the child nutrition area, the proposed termination of federal support for school meals served to children from families with incomes over 185 percent of the poverty line (now $18,870 for a family of four) would be expected to lead to the discontinuance of the school lunch program at some thousands of schools. U.S. Department of Agriculture research shows that this proposal would lead several million children to stop buying school lunches. This, in turn, would render the program economically infeasible in a number of areas. When schools drop out of the program, poor children in attendance at those schools lose free school lunches.

In addition, federal reimbursements for free school lunches and breakfasts served to poor children would be frozen, while the cost of the food in the meals would rise. As a result, school districts with heavy concentrations of poor students would have to either reduce the amount or quality of the food, or find new sources of funding to meet these costs.

Major reductions would also be made in financial aid to needy students. Appropriations for this program would be reduced $1.3 billion below the FY 1985 level, for a reduction of 27 %.

A number of low income programs would be shut down completely, including Jobs Corps (evaluations have shown Job Corps to be one of the more cost effective of training programs for unemployed youth), the Work Incentive Program (which is designed to help welfare mothers find jobs and leave public assistance rolls), legal services, rural housing programs, and the community services block grant (which is the continuation of the old Office of Economic Opportunity).

Other low income programs that would be reduced below FY 1985 levels, even without adjusting for inflation, include: compensatory education for disadvantaged children, bilingual education, the summer youth employment program, the community development block grant program, and the primary health care block grant.

When added to the budget cuts already enacted since 1981, the combined impacts in many of these programs would be very large, as the chart below shows (see Table 4 and 5 for more details):

COMBINED REDUCTIONS IN OUTLAYS FROM NEW CUTS AND CUTS ALREADY ENACTED

[Outlays represent actual Government spending each year; in percent]

	Fiscal year 1986	Fiscal year 1986–88 3-year total
Child nutrition	35.0	37.7
Medicaid	10.1	13.5
Housing assistance	20.8	23.4
Employment and training	68.8	69.3
Jobs Corps	29.0	76.4

COMBINED REDUCTIONS IN APPROPRIATIONS

[In percent]

	Fiscal year 1986	Fiscal year 1986–88 3-year total
Subsidized housing	98.5	92.6
Community services	100.0	100.0
Legal services	100.0	100.0
Employment and training	79.5	79.6
WIN	100.0	100.0
Jobs Corps	100.0	100.0
Compensatory education	14.5	18.9

CUTS IN OTHER AREAS

In addition to large cuts in human resource programs and programs targeted to the poor, other budget areas that would be subject to large reductions are farm and rural programs, cities, and federal employees.

Farm and rural programs that would be hit hard include farm price supports ($16 billion in cuts over three years; $2 billion in FY 1986); rural housing programs ($8.8 billion over three years; $2.2 billion in FY 1986); farm credit programs ($10.1 billion in reductions over three years; $3.0 billion next year); rural electrification programs ($1.9 billion over three years; $0.2 billion next year); and soil and water conservation.

Many of the principal programs relied on by cities would be terminated. Federal funding for urban mass transit would be ended (a $4.2 billion cut over three years; $0.8 billion next year). In addition, general revenue sharing would be terminated after FY 1986, Urban Development Action Grants would be terminated, and the Community Development Block Grant (which grew, in part, out of the old Model Cities program) would be cut 10% below a freeze level.

TABLE I.—CBO ESTIMATES OF CHANGES IN HUMAN RESOURCE PROGRAMS—OTHER THAN SOCIAL SECURITY—FROM LEGISLATION ENACTED JANUARY 1981 TO JULY 1983

[In millions of dollars]

	Fiscal year—			3-yr total
	1982	1983	1984	
Retirement and disability:				
Civil service retirement	−440	−576	−683	−1,699
Veterans' pensions and compensation	−2	−159	−199	−360
SSI	+32	+73	+582	+687
Other income security:				
Unemployment insurance	−1,000	+3,000	−4,500	−2,500
AFDC	−875	−1,222	−1,288	−3,385
Food Stamps	−1,535	−1,343	−2,031	−4,904
Child Nutrition	−1,026	−1,305	−1,392	−3,723
WIC	−48	+113	+77	+142
Housing assistance		+107	−452	−345
Low income energy assistance	−127	−160	−194	−481
Health:				
Medicare	−550	−2,900	−4,150	−7,600
Medicaid	−866	−1,026	−1,336	−3,228
Other health services	−77	−238	−467	−782
Education and social services:				
Compensatory education	−370	−701	−799	−1,870
Head Start	+14	−5	−10	−1
Vocational Education	−102	−172	−161	−435
GSL's	−275	−787	−1,170	−2,232
Student financial assistance	−320	−430	−664	−1,414
Community services block grant	−216	−247	−261	−724
Social services block grant	−699	−642	−699	−2,040
Veterans' readjustment benefits	−225	−175	−150	−550
Employment and training:				
General employment & training	−1,260	−1,956	−2,011	−5,227
Job Corps	−13	−21	−51	−85
Public service employment	−3,760	−4,142	−4,458	−12,360
Work Incentive Program	−100	−142	−153	−395
Total	13,840	15,056	26,620	[1] 55,516

[1] In The OMB documents in the new budget proposals, the Legal Services Corporation is grouped with the community services block grant. If cuts from fiscal year 1982 through fiscal year 1984 in legal services are added, the reductions shown here grow by $300,000,000 over the 3-yr period, bringing the total reductions to $55,800,000,000.

Total	13.8	23.1	28.7	65.6

[1] Human resources programs are defined in a similar manner to the definition utilized by the Congressional Budget Office in its August 1983 study, "Major Legislative Changes in Human Resources Programs Since January 1981." Human resources programs include retirement and disability programs, other income security programs, health care programs, education and social services, and employment programs.

[2] Less than $50 million

[3] Includes community services block grant, work incentive program, legal services, social services block grant, human development and family and rehabilitation services.

[4] Includes public housing operating subsidies, rural housing and Indian housing.

TABLE 3.—PROPOSED CUTS IN PROGRAMS THAT ARE MEANS-TESTED OR THAT PRIMARILY SERVICE LOW INCOME PERSONS

[Dollar amounts in billions]

	Fiscal year—			3-year totals
	1986	1987	1988	
Medicaid	$1.1	$2.1	$3.3	$6.5
AFDC	.2	.2	.2	.6
Food stamps	(2)	.1	.1	.2
Child nutrition [3]	(2)	.2	.2	.4
Employment & training	.1	.7	1.0	1.8
Financial aid for needy students	.3	1.1	1.3	2.7
Compensatory education	(2)	.2	.3	.5
Bilingual/Indian education	(2)	(2)	.1	.1
WIC	.1	.1	.1	.3
Low income energy assistance	.1	.1	.1	.3
Low income weatherization	.05	.1	.2	.4
Health block grants and other health services	.3	.3	.4	1.0
Social Services and related [3]	.9	1.2	1.3	3.4
Subsidized housing [4]	3.8	5.1	5.9	14.8
Rural water/sewer facilities [5]	.1	.2	.3	.6
Community development block grants [6]	(2)	.1	.3	.4
Total	7.1	11.8	15.1	34.0
These cuts as percent of total cuts proposed [7] (not counting defense savings as cuts)	18.2	18.5	19.3	18.8
These cuts as percent of total cuts proposed (including defense savings)	14.9	16.2	17.1	16.3

[1] Savings from the freeze on Federal reimbursements on free and reduced price meals served to low income children.

[2] Less than 50 million; column totals include these small reductions.

[3] Includes community services block grant, work incentive program, legal services, social services block grant, human development and family and rehabilitation services.

[4] Includes public housing operating subsidies, Indian housing, and rural housing. Rural housing programs are primarily directed to low income rural residents and to farmworkers. The budget proposal would terminate the rural programs and merge them with the HUD subsidized housing program.

[5] The majority of Federal funds for rural water and sewer facilities are targeted to low and moderate income communities.

[6] By law, no less than 51 percent of CDBG funds must be directed to low and moderate income communities.

[7] Total cuts proposed exclude debt service savings.

TABLE 4.—THE COMBINED EFFECT IN SELECTED LOW-INCOME PROGRAMS OF THE NEW BUDGET PROPOSALS AND CUTS PREVIOUSLY ENACTED SINCE 1981

[In millions of dollars]

Program	Reductions in outlays			3-yr total
	1986	1987	1988	
Child nutrition:				
Spending without cuts	5,337	5,775	6,225	17,337
Actual spending	3,467	3,545	3,789	10,801
Percent reduction	35.0	38.6	39.1	37.7
Medicaid:				
Spending without cuts	26,351	28,660	31,330	86,341
Actual spending	23,691	24,772	26,187	74,650
Percent reduction	10.1	13.6	16.4	13.5
Housing assistance:				
Spending without cuts	13,227	13,791	14,440	41,458
Actual spending	10,481	10,538	10,733	31,752
Percent reduction	20.8	23.6	25.7	23.4
Employment and training:				
Spending without cuts	9,768	9,972	10,266	30,006
Actual spending	3,044	3,047	3,122	9,213
Percent reduction	68.8	69.4	69.6	69.3
Job Corps:				
Spending without cuts	762	749	779	2,289
Actual spending	541	0	0	541
Percent reduction	29.0	100.0	100.0	76.4
Win:				
Spending without cuts	482	497	513	1,491
Actual spending	60	0	0	60
Percent reduction	87.5	100.0	100.0	96.0

Note: "Spending without cuts since 1981" is the 1981 outlay level (prior to the recissions proposed by President Reagan and enacted by Congress) after adjusting for inflation and changes in economic conditions as computed by the Congressional Budget Office (CBO) in "Major Legislative Changes in Human Resources Programs Since January 1981" (August 1983). The CBO report includes estimates through fiscal year 1985. Because the CBO used inflation projections for fiscal year 1983 and fiscal year 1984 that were higher than the actual level of inflation, the CBO outlay levels have been reduced here by the difference between actual and projected inflation levels. The adjusted CBO outlay levels were then increased for fiscal years 1986 through 1988 by applying the percentage increase that the Office of Management and Budget has used in its fiscal year 1986 budget documents for spending levels for each program.

"New proposals" is taken directly from the administration's new budget proposals.

"Percent reduction" is the combined percentage that spending would be reduced below the 1981 level as a result of both the administration's proposals and cuts already enacted, after adjusting for inflation and changes in economic conditions.

TABLE 5.—THE COMBINED EFFECT IN SELECTED LOW-INCOME PROGRAMS OF THE NEW BUDGET PROPOSALS AND CUTS PREVIOUSLY ENACTED SINCE 1981

[In millions of dollars]

Program	Reductions in appropriations			3-year total
	1986	1987	1988	
Housing assistance: [1]				
Appropriation without cuts	32,619	33,989	35,348	101,955
Actual appropriation	499	1,904	5,181	7,584
Percent reduction	98.5	94.4	85.3	92.6
Compensatory education (title I):				
Appropriation without cuts	4,430	4,616	4,800	13,845
Actual appropriation	3,787	3,698	3,738	11,223
Percent reduction	14.5	19.9	22.1	18.9
Community services block grant:				
Appropriation without cuts	677	706	734	2,117
Actual appropriation	0	0	0	0
Percent reduction	100.0	100.0	100.0	100.0
Training and employment:				
Appropriation without cuts	13,701	14,276	14,847	42,825
Actual appropriation	2,806	2,906	2,906	8,618
Percent reduction	79.5	79.6	80.4	79.9
WIN:				
Appropriation without cuts	456	475	494	1,426
Actual appropriation	0	0	0	0
Percent reduction	100.0	100.0	100.0	100.0
Legal services:				
Appropriation without cuts	401	418	435	1,254
Actual appropriation	0	0	0	0
Percent reduction	100.0	100.0	100.0	100.0

[1] Housing assistance includes low-income housing operating subsidies. The fiscal year 1988 appropriation for housing assistance is the fiscal year 1986 level increased for inflation. The fiscal year 1986 level, of $9,230,000,000 represents the amount of new budget authority that Congress appropriated.

Note: "Appropriations without cuts since 1981" represents the level of funding that Congress appropriated in 1981 (before recissions were implemented by President Reagan) as adjusted for inflation for succeeding years. The inflation adjustments were made by first increasing the 1981 appropriations by the actual CPI–U through the end of fiscal year 1984. This 1984 inflation-adjusted appropriations level was then increased by the inflation projections for fiscal years 1985 through 1988 assumed in the Office of Management and Budget's new budget documents.

"New proposals" is taken from the administrations' fiscal year 1986 budget proposals. It represents the administration requested appropriations for these selected programs.

"Percent reduction" is the combined percentage that appropriations would be reduced below the 1981 level as a result of both the administration's new proposals and the cuts already enacted.

Table 6.—Outlays for Defense and Domestic Spending Under Administration Budget

[In billions of dollars]

I. Outlays for defense and related ("national interest") programs:	
Fiscal year 1985	283.1
Fiscal year 1986	313.2
Change (increase)	30.1
II. Non-defense outlays other than interest payments:	
Fiscal year 1985	521.3
Fiscal year 1986	490.9
Change (decrease)	30.4

Mr. FRANK. I will be submitting further material later.

Virtually every organization in this country which deals with the needs of the poor, the physically handicapped, the vulnerable elderly, speaks out against the Gramm-Rudman proposal.

Again we are not talking here—the gentleman from New York is to be congratulated for putting this into perspective—we are not talking about equality. Gramm-Rudman says much of the Defense Department is exempt, I do not think people understand that, because we have signed contracts. And if we have signed a contract with a contractor to charge us a couple hundred dollars for an ashtray, that is sacrosanct. But if, on the other hand, we want to provide funds for pregnant women in distressed circumstances so they will have healthy children, well that is a discretionary program and it has got to be cut.

I have not made that up. That is Gramm-Rudman. That is the extraordinarily distorted piece of legislation that has come over to us. That is what many of us are so appalled by. That is what has led the Catholic Conference, the Lutheran Bishops, the Jewish organizations, all the organizations concerned with the poor, the Child Welfare League and others, all of them express their opposition.

Let me just read a few more: The American Association of Retired Persons, the National Council of Senior Citizens, National Political Caucus of Black Women, the United Church of Christ, the Food and Commercial Workers Union, the American Association of University Women, the American Physical Therapy Association—that is a radical group for you—the Association of Retarded Citizens, the National PTA—another subversive organization. It just goes on and on, not because these are people who are interested in balancing the budget, but because they do not understand why you triple Star Wars.

Do you know what President Reagan said a little while ago? He said that under his administration in his 5 years, he said it on the radio, agricultural subsidies are 3½ times higher than they were in the previous 5 years, agricultural subsidies, some of which go to very needy farmers, but some of which go to quite wealthy people. They get 3½ times as much in the past 5 years as they got in the previous 5 years, while poor people, needy people have been cut back substantially.

That is Gramm-Rudman's priority list and that is appalling and it is why we have to drastically change that piece of legislation.

Mr. OWENS. Mr. Speaker, I think it is important to reply to the statement made before about President Reagan's expenditures.

One of the things that the authors, the sponsors of Gramm-Rudman would like for us to forget as they orchestrate their stampede toward approval of the Gramm-Rudman proposal is the fact that we have a serious problem in the Pentagon which has gotten the greatest proportion of the expenditures under the Reagan administration. There is the problem of large sums of money, billions and billions, megabucks, being thrown at military problems and the result has been a failure, the failure of being certified by the gentleman in the other body who have the greatest knowledge and oversight responsibilities for the military. They are saying that our dollars have not brought us a better defense.

Of course, there are numerous examples, some of which I will share

with you in a moment, of that tremendous waste which took place in the Pentagon.

But first, I would like to recognize the gentleman from California [Mr. MARTINEZ].

Mr. MARTINEZ. Mr. Speaker, I thank the gentleman from New York.

Mr. Speaker, much has been said, both correctly and incorrectly, about the unconstitutionality of the Gramm-Rudman proposal. Granted, the Gramm-Rudman is a flagrant violation of the principle of balance of power among the three branches of Government, and gives the executive far more authority than was ever intended by our forefathers. I am curious as to why so many of my colleagues are willing to relinquish such a substantial portion of their rightful jurisdiction—spelled out clearly in the Articles of the Constitution—to the President. But putting constitutional matters aside for a moment, I would like to call my colleagues' attention to the impact the Gramm-Rudman proposal would have on the Nation's lower income people.

Since it's first inauguration in 1980, the administration has exhibited a blatant hostility to the lower echelons of our society. Beginning in 1981, more than $10 billion a year has been cut from programs serving the poor. Virtually every Federal program targeted to the poor and vulnerable has been subject to deep and harsh budget cuts. Cuts have been made to such programs as: Child Nutrition, Food Stamps, Aid to Families with Dependent Children, Medicaid, Education and Job Training Programs, Child Care and Child Welfare Programs, Housing Programs, Legal Services, the list goes on. The results of these cuts have been disastrous. Poverty rates have shot up dramatically. It is estimated that more than one of every five children in America lives below the poverty line—that half of all black children, and almost 40 percent of all Hispanic children are poor. What does the future hold for these children if the administration's present budget priorities remain the same? In all likelihood, many of them will come to know the increased hunger and homelessness that now plague a rising ebb of adults. They will learn the meaning of a high rate of unemployment, and the lack of services which are designed to equip youth with valuble job skills. They will learn the frustration that too many of our able-bodied citizens experience when they discover that there are simply no jobs for them; and an alienation from our society which I believe to be the ultimate tragedy.

Given the present administration's time-proven lack of compassion for those who are struggling to survive, I ask my colleagues, is it wise to give the President even more power to cut these programs? The Gramm-Rudman proposal will undoubtedly shift new control to the President by virtue of the automatic spending reduction power provided to the executive in the plan. Under Gramm-Rudman the President can force automatic spending reductions by vetoing the deficit reduction package which Congress sends to him. This gives the President tremendous leverage over the deficit reduction decisionmaking process. The President can force Congress to pass a budget package which he favors in order to avoid the automatic spending reductions. And you know what kind of budget the President favors: One with substantial increases for Defense, and with deep cuts in social programs. Under Gramm-Rudman, the President is given total discretion as to whether or not automatic spending reductions should be made if the deficit projection exceeds the target by less than 5 percent.

Furthermore, the President will also be given total discretion in instituting automatic spending reductions in times of recession. Are the Members of Congress willing to place such a blind trust in the President? What shall we tell our constituents when they demand to know why the programs they have always supported have been sacrificed to the already bloated defense budget? What shall we tell the history students when they question our wisdom of permanently altering the balance of power simply because Members of the 99th Congress opted for giving the President full discretion in balancing the budget, rather than performing our Constitution-appointed duty of preparing the Nation's budget? Last, and most tragically, what do we tell the Nation's children who already go to bed hungry, and whose parents wait patiently on soup lines for an insufficient amount of food to feed their family? Do we know that their future is safe and secure under the present administration?

There is no doubt in my mind that giving the President a free hand in automatic spending reductions will result in thousands of poor children being denied participation in the Head Start Program, and thousands more from the highly successful Chapter I Program for the educationally disadvantaged. Food stamps would be cut below the Federal Government's minimum dietary plan, and school breakfast and lunch programs would be cut. Large numbers of women and children would be thrown off the WIC Program, and the health care, housing and basic survival needs of the poor would be further jeopardized.

Mr. Speaker, let me close in saying that in 32 years, the Congress has never spent as much as the President requested, and I urge my colleagues not to abandon those who are relying on fiscal responsibility for their future. Let us not further bloat the defense budget at the expense of our moral obligations. And, most importantly, let us not destroy the integrity of the principles laid out in the Constitution by passing the Gramm-Rudman proposal.

Mr. Speaker, I thank you for your time.

□ 1750

Mr. OWENS. Mr. Speaker, I thank the gentleman from California [Mr. MARTINEZ].

I yield to the gentleman from Illinois [Mr. HAYES].

Mr. HAYES. Mr. Speaker, I am proud to join with my collegues today to participate in this Special Order on the effect that the Gramm-Rudman budget proposal will have on poor and disadvantaged citizens in this country. My opposition to Gramm-Rudman comes from a deep sense of responsibility to my constituents, as well as a deep sense of fear as to what Gramm-Rudman means to them. Proponents of this amendment say that we have a deficit and that we must somehow reduce that deficit. I do not disagree with that basic premise, but I do disagree with the way that this amendment proposes to balance the budget.

My congressional district is the poorest in the State of Illinois. As we are all aware, programs that serve the poor have been cut ruthlessly since 1981. More than $10 billion a year has been cut from virtually every Federal program serving poor families and children; including child nutrition programs, food stamps, AFDC, Medicaid and health programs, housing programs, legal services and many others. The results have been nothing short of disastrous. Twenty percent of all the children in our Nation now grow up poor. That includes 40 percent of all Hispanic children and half of all black children in our Nation. However, Gramm-Rudman sends a message that says it does not matter how much has already been cut, all that matters is the deficit. Gramm-Rudman says that it doesn't matter how hungry or how poor you are or if you are homeless or unemployed. The only thing that matters is reducing the deficit and nothing, not even elected Members of the U.S. Congress, can stop the President from continuing to cut programs that serve the poor.

I am also concerned about the constitutionality of this amendment. It seems to me that if we accept the Gramm-Rudman proposal, we have become mere "puppets" of the President—waiting to react to his every whim. Mr. Speaker, I cannot and I will not be a "mechanism" for the President. Not for this President, nor any other, regardless of political affiliation. It is true that President Reagan was reelected with a huge majority of those who voted in the election in No-

vember 1984. But Mr. Speaker, so was I.

In November of 1984, I received 95 percent of the vote in my district, a higher percentage than even the President.

My constituents elected me to be their Member of Congress and to speak out on their behalf.

Mr. Speaker, whenever I go home to Chicago, people always seek my assistance. They tell me of their problems, of their hunger, of the sad state of our schools, of the pain of their joblessness. And they ask me, as their Member of Congress, to help them, to assist them, to prod the Federal Government to do something on their behalf. They show me their heating bills and their rent bills, and they ask me, Congressman, what can you do to help us? Well, I tell them, I am only one Congressman, but you can count on me to vote and struggle in your behalf. Gramm-Rudman, however, limits my ability to work on behalf of my constituents. It gives congressional power to the President. It represents a fundamental restructuring of congressional power and transfers it to the President of the United States. In short, it is an abdication of our congressional responsibility. What does Gramm-Rudman say to my constituents? It says, forget your Member of Congress—no matter what he or she may believe. The mechanism is more important than what the Congress or the people of the district believe.

Gramm-Rudman is a dangerous and ill-conceived notion on how to deal with our Nation's deficit. It barely deals with military spending at all, and leaves social programs to be attacked and brutally assaulted once again. Even so, there is not enough left in social programs to solve our budgetary problems. What we should be about is making life better for our fellow citizens, not sowing the seeds of their demise. Gramm-Rudman offers just the latter. Not only does it allow whosesale budget reductions for nondefense programs, it also holds open the possibility that the President, under the guise of protecting our national security, could exempt defense spending from across-the-board cuts. Until we are willing to deal with reducing the amount that we spend on the military and with increasing revenue to the Federal Government, balancing the budget will only be a futile and painful exercise.

I strongly urge my colleagues to support what is left of programs serving the neediest of our society and to reject Gramm-Rudman for the shallow and irresponsible abdication of congressional authority that it is.

Mr. OWENS. Mr. Speaker, I thank the gentleman from Illinois.

I would like to say that we represent very similar districts. Of the 10 poorest congressional districts in America, I think the district represented by the gentleman from Illinois ranks third among the poor districts. My districts ranks 10th among the 10 poorest districts.

In New York City we have four. In rich New York City we have 4 of the 10 poorest congressional districts in America. These are districts that have problems that are not fashionable to discuss nowadays. Nobody wants to talk about that agenda. We have a policy that is not stated in this country of triage, of throwing overboard certain segments of the population, of throwing overboard certain neighborhoods, certain congressional districts. Nothing is going to be done about the high unemployment in these 10 districts, unemployment which runs for adults around 20 percent, for teenagers close to 50 percent. We are going to ignore that because we have a deficit problem to address and we are going to address that deficit problem by creating new policies and new budget actions which can only deepen the misery and deepen the problems in these districts.

Yesterday we had a hearing in Yonkers, NY, on teenage suicide. The hearing was held in Yonkers in Westchester because that is a suburban community, an affluent community, and that is where most of the suicides, it is alleged, most of the suicides have been taking place. It just so happened in the course of that hearing one of the people testifying brought to the panel the fact that in 1983 in New York City more than 80 teenagers committed suicide in that year, in 1983. There were no headlines. There was no great deal of media attention paid to it, but evidently among the poor, among those who are oppressed in various ways, suicide is as much a way of escape as among the affluent.

People can despair for many reasons and certainly the despair of poverty, the despair that has overtaken our communities in these 10 poor congressional districts is a despair which has led to teenage suicides.

In the 1960's and even in the early eighties the cry used to be heard, "I'm fired up. I can't take no more." In some demonstrations where teen-agers marched, this was a favorite chant. Evidently, it is no longer a chant. They have lost so much hope that instead of being fired up, not being able to take any more, and therefore taking action through peaceful demonstrations, they are taking the way out of suicide as an escape valve.

We cannot have a situation escalating of this kind where despair, the problem of education, and certainly the despair of finding a job, the fact that these same teenagers are watching their unemployed older brothers and sisters, they are watching their unemployed elders, their fathers and mothers, their aunts and uncles, and they do not feel that getting a high-school degree or even getting a college degree is going to solve the problem of unemployment. They see too many high-school graduates who are unemployed and too many college graduates who are having difficulty finding jobs.

These problems we do not want to discuss anymore. We cannot deal with them because they involve spending money for job training. They involve spending more money for upgrading our educational systems and we say that we do not have the money, so let us not discuss them. Let us take the hiatus and leave it in a state of vacuum so that 10 years from now we will wake up and find ourselves suffering from tremendous problems as a result of the fact that we refused to face these problems.

The only concern, we say, is the deficit and the only way to solve the deficit is to cut back on these same programs that are so needed by groups like the people who reside in the 10 poorest congressional districts.

We do not want to remember, we do not want to discuss the fact that we have discovered that the Pentagon pays $9,609 for a 12-cent wrench.

We do not want to discuss that an antenna motor assembly alignment pin which costs 2 cents, the Pentagon was paying $7,417 for it.

We do not want to discuss the fact that a claw hammer which costs $17 in a hardware store, the Pentagon was paying $436 for it. We want to forget all this. It has had its headlines and we want to forget that. It has nothing to do with deficit reduction.

We do not want to discuss the fact that a flat washer which costs $3 in a hardware store, the Pentagon was paying $387 for that same flat washer.

We do not want to remember that a plastic stool cap costing 22 cents, the Pentagon was paying $1,118 for that same plastic stool cap.

We do not want to remember that a screw which costs 9 cents, cost the Pentagon $37.

A jeweler's screwdriver, $1.79, was costing $232.

A Phillips screwdriver, $1.69, was costing $258.06.

This is all considered irrelevant. It has nothing to do with reduction of the deficit.

We have phenomenon where dollars are thrown at military problems and we are failing, corruption has set in, abuses have set in. Instead of addressing ourselves more vigorously to these problems, we would like to focus on giving the President the power to make the cuts where he wants to make them. The President already has the power to deal with abuses in defense contracting. He already has the power to deal with waste.

Most of these abuses, most of this waste was discovered by Members of

Congress, a wrench that cost $8, $2,228 being paid.

An end box wrench that cost $4.99, $768 was being paid by the Pentagon.

A socket set wrench, $12.88, cost $545.

This is all quite relevant to the problems we are facing now. We have a budget that has been in deficit, that has been greatly escalated by this administration and this administration's one area of increased expenditures which stands out is expenditures for defense.

□ 1805

So why can we not discuss and why do not the gentlemen who are in conference now with the other body, the gentlemen from this House, why do they have to dwell within the framework of Gramm-Rudman alone. Gramm-Rudman sets a certain framework. Gramm-Rudman sets a psychological atmosphere and wants to stampede us into dealing with that framework and that framework alone, and I say we should be talking about ways to cut the budget in intelligent ways.

We should follow the example of the Congressional Black Caucus, which focused on the one area where we have the most money. The most money appropriated is appropriated in the area of defense. The greatest waste is there. The greatest set of mistakes in policymaking is occurring there. This is not my assessment of the situation. This is the assessment of the gentlemen who are given the responsibility for overseeing our military and defense apparatus.

The gentleman from the Senate who oversees these matters have declared that we are grossly mismanaging our defense resources. If we are grossly mismanaging our defense resources, then instead of discussing Gramm-Rudman at great length in conference, why do we not discuss how to better manage our defense resources and make cuts and get a greater value for our dollar in that area? Why do we not discuss the tax breaks that were given in 1981? Why do we not begin by discussing the fact that we have created a situation where many of the Fortune 500 corporations pay zero taxes, zero taxes. This is a scandal. We discussed it for a little bit. It was on the front pages of the newspapers. The media talked about it a little. Now we are pushing all that to the background.

It is still relevant. It is relevant to discuss why certain corporations in this country paid no taxes; why certain other corporations got huge refunds. It is relevant to discuss the fact that our tax breaks, for example, related to accelerated depreciation cost us $27.7 billion. It is relevant to discuss that our expenses for oil and gas cost $2.25 billion. Investment tax credits cost $31.94 billion. Municipal bonds and various other local debt issues, capital gains, $2.64 billion. Various tax expenditures ought to be discussed at this point, and how we can deal with closing those loopholes. Why do we have to have a Gramm-Rudman framework which does not talk about a trigger mechanism for anything except more cuts?

We do not reach certain decisions. We do not have a budget imbalance. The President has the power to begin to make certain cuts. Why not give the power to the President to implement certain taxes, not income taxes necessarily, but we could close loopholes, we could make every corporation pay a minimum tax. A minimum tax on corporations would yield no less than $25 billion, and probably much more than that.

Our failure to discuss these matters at this time means that we will continue dumping on those that we have been dumping on all along. We will continue our triage policies. More and more people are going to be dumped overboard.

The employment policies of this country right now are designed to take care of the majority. As long as only 10 percent of the people are out of work, nobody is worried about it. President Reagan at one point said, "If 9 out of 10 people are working, then what are you worried about?" One-tenth of those people who are not working are still important, and if we ignore them, there is an escalation and we may have that same unemployment doubling, tripling, et cetera. Even that one-tenth, if it only stays at that rate, happens to be concentrated in certain areas, and I get back to my very important point, which is that in those areas which have the greatest need, in those areas that will be affected most by the Gramm-Rudman cuts, those are the areas that already have been dumped on. They have already been declared triage areas. They are the areas where we have the highest unemployment. They are the areas where children are suffering most, and we have had several studies issued from different sources recently which talk about the fact that black children, among the children who are suffering, just as among the unemployed, we have a greater concentration among blacks. We also have a greater concentration of suffering and problems related to families and children among blacks.

The correlation is obvious. I would like to just read briefly from a summary of a report done by the Children's Defense Fund. This study, which was drawn from a variety of Government statistics, portrays a widening schism between black and white children in America. That schism is also true, as I said before, in employment.

Up until 1979, unemployment between blacks and whites, the ratio was less than 2 to 1. In 1979 we started a situation where the unemployment rate in black communities was twice as high as that in white communities, and it has continued and is getting worse all the time.

The same is true of the plight of children, the problems suffered by black children. Black and white children in America are suffering disproportionately. The report concludes that during the past 5 years, black children have been sliding backward. These are the years under the Reagan administration. And they are increasingly suffering from inequality that denies opportunity to them in the millions. While focusing on black children, the study notes also that white children are also facing greater hurdles than in the past.

It found that white households headed by females under age 25 now have a poverty rate of 72.1 percent, and that 39.3 percent of all white female-headed families are in poverty. The report said that 16.9 percent of white families are poor and 12.3 percent of all teenage births are to whites. But the study noted that for black children in single-parent families headed by women under age 25, the poverty rate is 85.2 percent. The poverty rate for all families headed by black women is 63.7 percent.

The report also said there has been a dramatic decline in educational opportunities for black youth. In 1977, black and white high school graduates were equally likely to go on to college, 50 percent for blacks and about 51 percent for whites in 1977. By 1982, 52 percent of white high school graduates were going to college compared with 36 percent of black high school graduates.

Poverty appears to be the key to low college attendance rates among blacks, the report said. These facts require urgent community and national responses. The head of the Children's Defense Fund, Mrs. Marian Edelman, charged that the growing disparity between white and black children is in part a result of Reagan administration policies that have targeted poor children and families. Gramm-Rudman would target these same poor children and families even more.

Gramm-Rudman cannot cut anyplace in substance except those programs which are designed to serve the neediest persons. They have exempted defense contracts. They have exempted, and rightly so, Social Security. They have exempted the interest on the national debt. Where else will they cut? They will cut those programs which help the people who are in greatest need. They will cut those programs which are needed most by a population that has been triaged. The black population of America, more than 60 percent of whom are poor, have been labeled the group that can

be dumped overboard. We can do nothing about them or for them and they will hopefully just go away. Gramm-Rudman will complete this process, and for that reason Gramm-Rudman is not the framework that Democrats or anybody who is decent should be using to discuss the solution to the deficit problem.

There are other alternatives, other solutions, that should be considered and must be considered.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. OWENS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, my question was: What are the other solutions? What is the Democratic plan for reducing the deficit? We have seen over the last several months a lot of talk from the gentleman's side of the aisle about reducing deficits, and this is the first plan that we have had. Now all we hear is the gentleman's criticism about the plan. There is no balanced budget amendment to the Constitution that comes out of his Committee on the Judiciary. We cannot get that considered.

What is the plan, beyond raising taxes? The gentleman told us that he was willing to hand over all the power of taxation to the President to raise taxes, and it seems to me that he is willing to weaken our defense by cutting defense spending. But beyond that, I do not hear any plan. What is the gentleman's plan to deal with congressional incompetence at cutting spending, and the fact that we have overspent our own budget—our own budget, mind you. Over the last 5 years, we have overspent our own budget by $150 billion. What is the plan? Where are we going to deal with that?

Mr. OWENS. I do not have a plan.

Mr. WALKER. That is the trouble. Nobody has a plan on the gentleman's side.

Mr. OWENS. I do not think there is a plan. Nobody has a plan. I think the one good thing about the discussions that are taking place in conference is that there is a discussion going on. The danger is that that discussion will center around the Gramm-Rudman proposal.

□ 1815

That is the worst possible plan that could be undertaken.

The kind of plan that should be undertaken should be using parameters that I have been discussing, and those parameters were set forth in the Congressional Black Caucus budget. The places to cut are the places where there is the greatest amount of money, money that is being wasted, money that is being wasted because of mismangement, because of corruption in some cases, but most of all because of wrong policy decisions. And those wrong policy decisions are the most costly of all.

Mr. FRANK. Mr. Speaker, will the gentleman yield?

Mr. OWENS. I yield to the gentleman from Massachusetts.

Mr. FRANK. I thank the gentleman for yielding.

It is true, Congress has not succeeded in reducing the proposed expenditures. As we said earlier, as the gentleman from Texas agreed with me, the President has asked and Congress has voted virtually identical amounts in spending during Ronald Reagan's term. Congress has voted virtually identical amounts. There have been differences in the composition. President Reagan has asked for increases in some areas and cuts in others; Congress has had different priorities. But I think it is true both the President and the Congress have voted those very large sums.

The gentleman asked for a proposal to cut the budget. There has not been a unified opinion.

Mr. WALKER. To balance the budget was my statement.

Mr. FRANK. I believe the time is mine. The gentleman yielded to me.

The proposals have not come forward from either side of the aisle, they have not come from either branch, partly because it is difficult to get consensus.

But I would be glad to give the gentleman my proposals for it.

One thing with which I differed with the gentleman very greatly was when he suggested that the gentleman from New York [Mr. OWENS] was prepared to weaken our defense by cutting defense spending. I think that particular mindset that the gentleman from Pennsylvania [Mr. WALKER] mentions is a substantial reason why we have the deficit we do. People who equate, as he does, and just did, quite unfairly, I think, to the gentleman from New York, reducing defense spending proposed by the Pentagon with weakening our defense are, I think, wrong. I do not think it weakens our defense to talk about efficiencies of the Pentagon, which virtually has been immune from them.

I thank the gentleman from New York, and he addressed this, he said he is for a strong defense, but he believes it would be possible substantially to reduce defense spending from the levels that have been asked for by Caspar Weinberger and the President, and voted by this Congress, without in any way weakening our defense.

Let us look at the Sergeant York, Divad, the gun they just canceled. Many of us have been voting against that gun for some years, and the Pentagon finally has admitted that we were right. Billions were wasted. We are still going to spend I do not know how many more millions of dollars in canceling that gun because of the contracts that were signed.

I see the gentleman from Texas, and I know time is going to expire so I will relinquish. But I think the mindset that equates reducing defense spending with weakening America's defense that the gentleman from Pennsylvania has evinced is one of the reasons we have the deficit.

Mr. WALKER. If the gentleman will yield, I will be glad to specify.

Mr. OWENS. Mr. Speaker, I yield to the gentleman from Texas [Mr. LELAND].

Mr. WALKER. We do not want to hear the specifics then?

Mr. LELAND. Mr. Speaker, I just want to thank both my colleagues, particularly my colleague from New York, Mr. OWENS, for allowing me this time, as well as the gentleman from Massachusetts [Mr. FRANK] for alerting me to this special order.

I know we do not have much time, so I would like to let the colloquy continue.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. FRANK. Mr. Speaker, will the gentleman yield?

Mr. OWENS. I yield to the gentleman from Massachusetts [Mr. FRANK].

Mr. FRANK. Mr. Speaker, I want to give some more specifics.

The National Endowment for Democracy, a Ronald Reagan creation, $200 million new dollars per year. Radio Marti, for which I voted, but if we are going to talk about high priorities, agricultural subsidies.

Mr. OWENS. Mr. Speaker, I just want to say that the Gramm-Rudman proposal is a clear and present danger to democracy in general and to the concept of the separation of powers in particular.

The SPEAKER pro tempore (Mr. HAYES). All time of the gentleman from New York [Mr. OWENS] has expired.

GRAMM/RUDMAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts [Mr. FRANK] is recognized for 60 minutes.

Mr. FRANK. Mr. Speaker, I want to take this opportunity to continue the discussion that the gentleman from New York [Mr. OWENS] began on the Gramm-Rudman matter.

I will be glad to yield to the gentleman from Pennsylvania [Mr. WALKER] at this point.

Mr. WALKER. I thank the gentleman for yielding, because I think it is important to specify that the gentleman from New York [Mr. OWENS] specifically referred to the Black Caucus budget when he referred to defense. When the Black Caucus budget was presented to this House, virtually all

major strategic weapons system of this country were eliminated. The MX system was eliminated, the B-1 bomber was eliminated. All the major strategic weapons systems of this country were eliminated as a part of that budget.

I would say that is a substantial weakening of the defense capacity of this country, and I do not think that relying on the B-52 bombers that are 30 years old, or relying on missile systems that are 20 years old and so on are in the best interest of a modernized defense force that is capable of meeting a Soviet challenge in the future.

I think it is extremely accurate to suggest that the gentleman is talking about a weakening of our defense forces rather than a mere cutback in waste, fraud, and abuse, unless you believe, as evidently the gentleman believes, that the entire strategic weapons program, modernization program of this country is, in fact, wasteful spending.

Mr. FRANK. I am going to yield to the gentleman in a minute, but I have not heard a more egregious misstatement in some time. The gentleman said that the Black Caucus budget—I did not vote for the Black Caucus budget this year. I voted for it in the past. I had some disagreements this year. But the gentleman from Pennsylvania [Mr. WALKER] said it would "eliminate the strategic weapons systems."

Mr. WALKER. I said modernization of strategic weapons systems.

Mr. FRANK. If the gentleman wants to make a restatement, OK. But the gentleman said on several occasions——

Mr. WALKER. I said modernization, the B-1——

Mr. FRANK. Regular order, Mr. Speaker. I yielded to the gentleman. He knows better. I do not understand what these tactics are about.

I yielded to the gentleman when he asked me to on several occasions. He may have had something else in mind, but people are not under the obligation of reading the gentleman from Pennsylvania's mind. The last time he referred to it, he referred to modernization. But the first three times he referred to it, he said eliminating all strategic weapons systems. That is obviously nonsense, and it is inaccurate, and I am glad that the gentleman protested when I quoted him, because he obviously wanted to say that he did not mean that. But it is that kind of misstatement that I think is embodied in the Gramm-Rudman situation.

No, the Black Caucus budget never tried to abolish all strategic weapons systems. And to have stated that is a terrible misstatement.

But beyond that, I have to reiterate that the mindset that thinks that cutting defense weakens defense I believe is inaccurate, and I am glad to see in the other body the Senator from Arizona and the Senator from Georgia, in fact, pointing out to an extent that there has been a weakening of defense by overspending. There are people in the other body who I think are quite accurately documenting now that the laxity that has marked this administration's control of the Pentagon budget has, in fact, contributed to some weakening. And I hope that we can support the effort to put more teeth into that.

Mr. OWENS. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I am glad to yield to the gentleman from New York [Mr. OWENS].

Mr. OWENS. I said before we have a defense budget which is guilty of what social programs were accused wrongly of doing, and that is we throw money at social programs, and therefore, we made matters worse. We never threw dollars. We never threw enough dollars. We never appropriated enough dollars for social programs.

But certainly in the area of defense, the tremendous rapid buildup has caused a problem because it resulted in, it meant throwing dollars at defense problems. And we did not do very well because of those megabucks that were thrown at the problem.

I am not quoting people who put together the congressional alternative Black Caucus alternative budget, I am quoting military experts. The gentleman is in the minority when he says that the MX missile is a major strategic weapons system of this country. Most of the experts do not think the MX missile system is a major part of the strategic defense, though it is one of the most costly. Each missile costs $75 million, and each silo it has to be put into, to prepare the silo costs another $150 million. It is not a major strategic weapon.

The bottom line is that the people who are responsible for overseeing the defense systems of the United States, the people in the legislative branch, have now said that we have gross mismanagement, and that after all these expenditures, we have a defense that is weakened instead of strengthened because of mismanagement, and that no matter how much money you pour into this system, you will not get a stronger defense. We should be looking at the system and cutting out the places, cutting out the wasted dollars. The Sergeant York gun was referred to before. It took years of convincing the Pentagon before they finally acquiesced to eliminating that obviously lemon weapons system.

Now why cannot the Gramm-Rudman, or one of the parameters of Gramm-Rudman be a serious discussion about how we can move at a slower place in dealing with our Defense Department and the modernization of it or the strengthening of it, and stop throwing away dollars by moving too rapidly, and move at a slower pace, and take into consideration what the real military experts are saying about that system, and stop throwing dollars. If we stop throwing dollars, we will save a tremendous amount of money. That is where the megabucks are, in the Defense Department. We can save a tremendous amount of money, and if we do that, we do not have to dump them on the social programs. We do not have to continue to oppress those people most oppressed by the Reagan administration budget. That can be stopped because you can get the money from the source where the money is, and that is the Defense Department.

Mr. LELAND. Mr. Speaker, will the gentleman yield?

Mr. FRANK. I yield to the gentleman from Texas.

Mr. LELAND. Mr. Speaker, again let me commend the gentleman from Massachusetts [Mr. FRANK] for bringing this matter before us, because this is a very serious concern that many of us are having, particularly the consternation we suffer with the rushed nature, the rushed character of what Gramm-Rudman means today.

Let me also thank the gentleman from Massachusetts for pointing out that the Congressional Black Caucus did not offer a budget that was replete or without strategic arms for the protection and the security of this Nation. The Congressional Black Caucus feels very strongly that we need to enhance the security of this Nation. We just happen to have a different view about how that needs to be done.

We do not believe paying $6,000 for a toilet seat enhances the security of this Nation. We also do not believe that when you pay hundreds of dollars for nuts and bolts that cost 25 cents and 30 cents that it enhances the safety and security of this Nation.

The other thing I would like to point out is we feel very strongly, because of the experts that we have, that have given a preponderance of factual information about the MX missile system that, in fact, by the time it is completed that it would be antiquated and will be unuseful in the first place. We do not believe that is a matter of national defense.

We also, however, believe our highest priority in this Nation, our highest priority is that we ought to enhance the quality of life for all of our citizens. We feel very strongly our future is dependent upon, without question, the future of our young people. When we have in this Nation 35 million poor people, and that, by the way, represents a growing number of people, who are hungry, who are ill-housed, ill-clothed, and ill-prepared to go to work and to become productive citizens be-

cause, in fact, we have not created any opportunities for them in this country, then that is a matter of national security that we ought to pay attention to.

What is happening is we have a growing number of children in our society who are suffering from malnutrition and hunger, and other diseases which I related to that malnutrition and hunger, and when we are, in fact, in a land of plenty and when we have paid billions of dollars of subsidies to farmers and ranchers to not grow food on their land and to not produce products that could feed these people, and when we store hundreds of thousands of metric tons of food that is rotting in silos today and we are not feeding our Nation, that is a matter of national security. It seems to me we ought to want to do all that we can to embellish the opportunities for these young children to grow to be strong individuals.

How is it that hungry children can go into the military and fight our wars for us, if, in fact, and God forbid us having to go to fight in a legal war anywhere in the world, or to protect the boundaries of this Nation. But the fact of the matter is that it seems to me that the priorities are a little bit screwed up somewhere in this Gramm-Rudman proposal in that it gives the President great latitude to do a lot of budget cutting, to continue his momentum in this budget cutting that he has engaged in over the last 5 years, and in these areas of national security that he seems not to care about, and that is the poor, the suffering people of our Nation who represent that 15 percent of our society that happens to be designated or declared poor. These are people who want to work, people who want to become productive citizens, young children who want to grow up healthy, not with stunted growth and ill minds, but rather with healthy bodies and healthy minds. That is a matter of national security.

This President, this administration, and through his conduits, Mr. GRAMM and Mr. RUDMAN and others in this body who are advocating this incredible latitude given to the President, for the so-called balanced budget, it seems to me is being, however, rather tracaneous. I do not know if that is a word.

Mr. FRANK. It is now, I would say to the gentleman.

Mr. LELAND. It is a matter of the CONGRESSIONAL RECORD so, therefore, it is a word. And pardon my limited vocabulary, if you will.

But let me also say that at the same time, this gives to the President this great latitude for cutting these budgets, it also constrains the President to give safe haven to those so-called strategic weapons that the gentleman from Pennsylvania has talked about so endearingly.

□ 1830

So I have a real problem. Our priorities are really screwed up somewhere, and what we have got to do is reorient our priorities, and I hope to God that by the time this process of this balanced budget exercise is over with, that indeed we have placed our priorities where they ought to be.

That is where the real security of our Nation is; that is with its citizens; the protection of the interest of not only the wealthy and those in the middle class who should be protected, but also with the poor people who need opportunities developed for them.

In the debate on the proposal some are forgetting the human consequences of the budget in the name of political expediency. It is very easy to stand up here and say how terrible it is that the Federal budget deficit is approaching $200 billion, and how easy it will be to rectify this by mandating that $36 billion a year for 5 years be lopped off the budget. But what these people who preach this doctrine seem to have overlooked is that among the devestating effects of Gramm-Rudman will be the fact that more people will go hungry, less school children will have a hot lunch, and more senior citizens will not receive adequate health care.

Proponents of the proposal say that we should turn over control of the budget to the administration when certain numerical deficit limits are breached. It is incredible that we are debating giving this power to a President who has shown virtually no concern for disadvantaged Americans. Time and time again we have had to fight Mr. Reagan on his attempts to overload his stockpile of weapons at the expense of needy Americans. Now it is proposed that if either the Congress or the President fail to meet the bill's year-by-year targets—or if the President chooses to veto a reconciliation measure—the President is given broad authority to make supposedly across-the-board cuts to meet those targets.

But closer scrutiny of the proposal reveals that a large number of the President's most prized defense programs would be sheilded from cuts. One estimate puts the portion of the defense budget exempted from the automatic cuts at 38 percent, while 100 percent of the budget that aids low-income people would be unsheilded. The burden of the cuts would be placed squarely on the shoulders of the poor, the sick, the elderly, veterans, and others who could not bear the weight of this load.

I am also concerned about the effect the bill would have on disadvantaged Americans if our economy enters a recession in the next few years, as some economists have predicted. As we all know, the Government's revenues fall during a recession and spending tends to rise as a result of a greater number of claims made for unemployment compensation and other assistance programs. If we are bound by law to make huge budget cuts at the same time as more Americans will require assistance as only the Government has the ability to give, then we face social disaster. Under Gramm-Rudman, we would not have the power to quickly respond to the needs of our people.

Programs that aid the needy in this country frankly do not bear any responsibility for the soaring deficit. In the past 4 years, we have cut these programs to the bone and the deficit has still soared. Many opponents of this bill have attacked this proposal as unconstitutional, or as a way to force a tax increase. I oppose it simply because it would institutionalize drastic cuts in needed programs that aid poor and disadvantaged Americans.

There is no doubt that reducing the Federal deficit should be among the top priorities for this Congress. I will support balanced, fair, and reasonable measures to reduce the deficit. But those who have endured the cuts in social programs under this administration's misguided economic policies of the past 4 years are again being asked to bite the bullet. Mr. Speaker, these Americans can no longer bear the brunt of the President's budget cutting ax.

I join with my colleague from Massachusetts in proposing that antipoverty programs be exempted from any automatic budget cutting mechanism brought before the House. I commend his leadership on this issue and I urge my colleagues to join with us in this effort.

Mr. FRANK. I yield to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, if we are going to stay accurate, I think we ought to remember with regard to the poor that the figure for the poor is not rising, it is dropping; according to the latest census data it dropped from 15 to 14 percent just in the name of accuracy and so on.

I think we also need to point out that if we are concerned about the defense part of this whole Gramm-Rudman proposal, 90 percent of the entire defense budget is included under Gramm-Rudman, would be eligible for cut; only 10 percent of the moneys for defense would be included under the protection simply because that is the money that is already contracted for. In other words, we are not going to go in and break contracts already made; but that represents a 10-percent solution, so that 90 percent of the defense budget, if we were worried about organization, would in fact be included under Gramm-Rudman. I think that that is probably a reasonable kind of approach.

I hope that the gentlemen on the other side are not suggesting that we ought not include Social Security under this blanket, because obviously—that is another thing. The interest on the national debt is an obligation incurred by this country to its people. It seems to me that that is something that is an obligation we have to carry out.

I also would just make the point that what I asked a little bit ago is whether or not there is a plan on the other side for balancing the budget. What I have gotten in return is a discussion of cutting defense and raising taxes. That was the proposal put foward by Walter Mondale that was rejected thoroughly by the American people in the last election.

The Democrats have not come very far since 1984 when 49 of the 50 States rejected that formula. What we are suggesting is, there is a new formula now; it is Gramm-Rudman; it is a potential, has the potential for balancing the budget. That is the direction that we ought to go; it includes all phases of Federal spending save those things where contracts were made, and I would remind the gentlemen on the other side that it also includes contracts made for those areas where social spending is incurring.

For example, if we have a contract for building a housing project, that is also excluded under the Gramm-Rudman proposal. Those are the kinds of things that need to be done.

So I think that it is a course of action that gives us an opportunity to perhaps move away from deficit, and I am very disappointed to hear only criticism and no alternative.

Mr. FRANK. The gentleman was not listening to me, which I understand. I mentioned cuts in defense; I mentioned cuts in agriculture. The gentleman and I have disagreed; he so often voted for more agricultural spending than I have.

Mr. WALKER. If the gentleman would yield?

Mr. FRANK. No, I just finished yielding to the gentleman for a very long time.

Mr. WALKER. But he needs to correct the record on that point.

Mr. FRANK. Will the gentleman please abide by the rules of the House. I do not understand why the gentleman from Pennsylvania thinks he is entitled to disregard the rules of the House at will; I have yielded to him twice now, he has spoken on my special order far more often than I have, I have yielded to him, he is now graciously allowing me to do what I have a right to do under the rules. I appreciate his graciousness.

I have disagreed with the gentleman on some areas of agricultural spending, where I believe he has been for more restrictive and more spending—I have talked about the National Endowment for Democracy; I have talked to Radio Marti; we have got foreign aid which could be reduced; I think we continue to give too much military assistance to the Philippines; I think there are other areas where we could be making some cuts.

So I would be prepared, over the 6-year period of Gramm-Rudman, yes, to come in with a deficit that had gone to zero by talking about these areas. There are some tax increases I would be for. The cigarette tax, yes. I am for raising the cigarette tax. I think the President's adamant refusal to support an 8-cent increase in the cigarette tax, which we could use to help with Medicare, is very bad public policy.

I think to lobby for lowering cigarette taxes, as the President has been doing, when we know that that is causing illness and then the rest of us have to pay for those illnesses out of general taxes, I think that is quite foolish; and I think there are other areas of loopholes where we could in fact do some closing and raise some revenues and still be able to get some relief to people.

So I am prepared to talk about getting that deficit down to zero. I believe that there are billions that can be cut in agriculture and the military; you have to phase some of them in. In the agricultural areas, let us take the Payment-in-Kind Program. That was a Reagan administration special which we got. It cost us about $12 billion, the Payment-in-Kind Program.

The Synthetic Fuels Program which finally the administration now is listening to some of us and getting ready to cut; the Synthetic Fuels Program is another $15 billion deficit maker that I was in favor of cutting. So I think there are plenty of places where we can make those cuts, and I am going to be doing that.

Again, I have to make it clear: Congress and the President have been equal in the amount of spending. They have differed in the kinds of cuts they want.

I would be glad to continue with that list I started.

Mr. WALKER. Will the gentleman yield?

Mr. FRANK. No, I want to get back to the subject.

Mr. Speaker, I ask that the gentleman be instructed in the rules of the House, that when I have declined to yield—now, I have yielded to him twice.

The SPEAKER pro tempore. The gentleman from Massachusetts [Mr. FRANK] has the time.

Mr. FRANK. I appreciate that. The gentleman from Pennsylvania has had more of my time than I have. It is apparently not enough for him.

Mr. WALKER. The gentleman has made an accusation.

Mr. FRANK. What the gentleman is trying to do is to keep a point of view from which he disagrees from getting across. It is not becoming to the gentleman from Pennsylvania [Mr. WALKER] to continue deliberately to violate the rules of the House.

What I want to do, Mr. Speaker, and maybe this is why he is sort of unhappy; first of all, as far as Gramm-Rudman is concerned, the assertion that only 10 percent of the military is uncovered by Gramm-Rudman's reduction is a new one to us. We have heard much bigger figures from the Senate themselves.

Now in fairness to the gentleman from Pennsylvania and others, we ought to be clear that no one really knows what Gramm-Rudman says with any degree of certainty because it was a badly drafted, hastily drafted piece of legislation.

The estimates we have been getting in conference up until recently were that more than half of defense was covered; we were not sure how much is covered.

Yes; if we are going to have to do something like that I think all of the defense budget ought to be covered. I would also note that the gentleman from Pennsylvania had a great record for beating up a couple of strong men there; he valiantly defended against nobody cutting interest payments. No one was suggesting that.

As far as Social Security was concerned, I welcome the Republican Party in parts of this town to their relatively recent position for this year of not denying people Social Security benefits, because the President of the United States and a majority of the other party in the other body voted to cut Social Security. The other body voted to cut Social Security cost of living, the President backed that up; it was the resistance of the House that made them stop. So the House needs no instruction from other branches in protecting Social Security recipients.

Medicare, however, would not fare so well. Gramm-Rudman cuts medical care. It cuts Medicaid, it cuts Medicare. Sick, elderly people are hurt where defense contracts are sacrosanct.

A 75-year-old elderly woman needing hospitalization is going to be forced to pay more out of her own pocket; she may get less medical care while we protect other areas of this budget. That seems to me to be scandalous.

Let me talk about some more neutral figures, Mr. Speaker. Here are some letters that have been sent by people who have as their voluntary charge, concern for some of the neediest people in our society; sick people, people with illnesses, people who did not ask for the problems they have, but had them visited on them. Not usually thought of, I think, as militantly leftist organizations:

"On behalf of the United Cerebral Palsy Associations, consisting of 230 affiliates in 45 States, I want to express our outrage at the passage of the Gramm-Rudman amendment. United Cerebral Palsy's Association is a national organization concerned with needs of persons with cerebral palsy in their families." If the Gramm-Rudman amendment is enacted, as it came to us from the other body, "the

programs and services on which they depend will become virtually extinct."

The National Society for Children and Adults with Autism; people suffering from autism, people for reasons that none of us understand, at birth or later are afflicted with this condition; their parents—we do a little bit for them through the Federal budget. Here is what they have to say—this is not the AFL-CIO, this is not the Democratic Party; this is the National Society for Children and Adults with Autism:

> The impact of the Gramm-Rudman balanced budget amendment which passed the Senate on October 10th will be devastating to persons with autism and other handicaps.

What they are talking about, we should understand is, if there is a deadlock, under Gramm-Rudman, if the President decides to veto legislation that comes to him reducing the budget—by the way, under Gramm-Rudman as it came from the other body, even if both Houses of Congress agree to reduce the deficit, if the President does not like it, if we should cut the military too much and not cut programs for the needy enough, if we supply a little bit too much medical care for the elderly—we have done that; the President has been angry with us because we have resisted his efforts to cut medical care for the elderly, and instead we try to cut back on some of his extremely expensive military programs.

If the President thinks we have been harsh to the Pentagon and too kind to the elderly who are sick, he can veto that bill and trigger Gramm-Rudman. It would take a two-thirds vote to overcome it. That is what we are talking about; that is the shift of power. It allows the President to veto even a reduced amount, even a budget that came in with a relatively small deficit or a balanced budget, the President could veto it and trigger Gramm-Rudman, and then Gramm-Rudman, by exempting much of defense—and how much is not clear and the figure varies; but it exempts more of defense than virtually any other domestic program, because defense does more contracting.

□ 1840

Yes, there are contracts in housing, but there are not contracts in autism, there are not contracts in cerebral palsy, there are not contracts for poor pregnant women or for 2-year-old children who did not ask to be born but are born into circumstances that leave them dependent upon a little bit of compassion from the rest of us. They are going to be abused if the automatic cuts in Gramm-Rudman go into effect, and the President could trigger them.

You have the United Cerebral Palsy Association, the National Society for Children and Adults with Autism, the National PTA, very much opposed to Gramm-Rudman because of the concern about the impact it would have on their ability to help provide education. That is the National PTA.

The National Association of Community Health Centers. Community health centers supply health care to some of the poorest and worst-served people in this society. Community health centers are a very low cost way of supplying medical care.

This approach to deficit reduction, quoting, not deficit reduction but this approach to deficit reduction will be greatly detrimental to those with the greatest need in our society. They are not opposed to reducing the deficit.

The National Association of Health Care Centers, the American Association of University Women, very concerned; finally, and this is by no means an exhaustive list but it is a list I happen to have at hand right now, the National Easter Seal Society. The National Easter Seal Society is concerned that this balanced budget legislation, not balancing the budget, but this legislation, could have very negative ramifications for people with disabilities.

You see, people with disabilities do not get entitled. They are not entitled to things. They have been cut back, but they are under some problems, that is, cerebral palsy, autism, the beneficiaries of the Easter Seals Program, they are wholly at the mercy of Gramm-Rudman. Defense is somewhat protected, maybe 10 percent, maybe 50 percent, we are not sure. And we are not sure from reading that. And the more you read Gramm-Rudman, the less you know about it, because it is not very well read. Remember, we did have a quote from the majority leader in the other body who said there is a problem because the longer this thing stays around, people are going to start reading it.

Yes, people started reading it. People from the Cerebral Palsy Association, people from the PTA, people from the Autism Society do not like what they see because, just to summarize, what Gramm-Rudman says is this: We should try through the normal processes to reduce spending. I am in agreement with that. I think President Reagan asked for far too much. I would like to see some domestic programs increased.

But I think if you look at the military budget, and we are talking about unnecessary weapon systems—let us just talk about the MX for a minute.

As the gentleman from Texas pointed out, the MX is now admitted by both Houses' majorities to be a failure. We are only going to have 50 of them. Now, nobody is for 50 MX's. There are some people who are for 200, some of us are for none, but there is no case to be made for 50. There is no strategic argument for 50. All you can do with 50 MX's is spend money on them. That does not make any sense. We are ending the program because people have admitted it does not make a great deal of sense. We talked about the Divad, the Sergeant York gun, which was a waste of money. There are weapons systems which are unnecessary. Then, in addition, there is the generally wasteful way in which the Pentagon has spent, leading the leaders of the other body in the Armed Services Committee, strong supporters of the Pentagon strategically, to say that this has got to stop, it has to be cut. As I said, areas in foreign assistance, some areas in foreign assistance, are very important; some areas in foreign assistance, the money is being very sloppily run and wasted. New Reagan initiatives like Radio Marti and the National Endowment for Democracy, not in and of themselves bad, but more important? Radio Marti? Again, I voted for it. But is that more important than people with autism? That is what we are talking about. To Ronald Reagan it is, because under Ronald Reagan new multimillion-dollar, hundred-million-dollar programs, come from the National Endowment for Democracy.

I was at the Democratic Committee gala the other night. I met with some very nice people. They were politicians from a friendly country. I was delighted to have dinner with these people. I had a nice chat with them. They did not understand my English too well, but neither do some of my colleagues. I understood that. I do not take offense. I had a very nice talk with some of these people. They are here with money from the National Endowment for Democracy.

Now, I was glad that they were here, but why are we spending taxpayers' money to bring these people over here to have a nice chat over dinner with me, given by the Democratic National Committee? And we are not spending enough, we are putting people in fear; there are people out there who are trying to work with kids who have cerebral palsy, people at the health centers who are trying to provide medical care for frightened elderly people who have no resources, who do not want to totally impoverish themselves and be ready for Medicaid. We have to cut back on them; they have to worry about where their next dollar is coming from. But we can bring people over here to have dinner with me.

Those are all Reagan's priorities, because he has been a strong supporter of the National Endowment for Democracy, and of Radio Marti, and of aid to President Marcos.

Now, the President sent the Senator from Nevada over there to tell President Marcos to please behave, but he is also sending him a couple of hundred million dollars a year. I do not

think that is inducive to great good behavior.

But, at any rate, what we have is, under Gramm-Rudman, no matter what Congress says, this is what our problem is, no matter what Congress says about reducing spending, if the President does not like our priorities, if he thinks we have denied defense too much or we have denied President Marcos a little extra money, we have not put enough into Radio Marti, and I do not know what comes next, but if we have denied those priorities and instead we put too much into autism, into cerebral palsy, and Medicare, he can veto the bill, and he then triggers an across-the-board reduction that does not go across the board because it exempts anywhere from 10 to 50 or 60 percent of defense, depending on what it is; it exempts agricultural subsidies. I am not sure whether some of them are or are not exempt. Some of the subsidies for wealthy people may well be exempted. It exempts all of Social Security. I am glad it does. I was appalled when the President and the other body wanted to cut Social Security cost of living early this year, but it does not exempt Medicare. I talked to a lot of elderly people in my district, and, yes, it is nice to have the Social Security check, but they live in mortal fear, people in their seventies and eighties, of what happens when they get sick. Under the priorities they have already gotten from this administration, they have to spend more and more out of their own pockets for less and less medical care, but we have 50 MX missiles. There is not a thing in the world we can do with them that makes any sense. Everyone admits that strategically; no one has recommended 50. We have 50, and we are going to pay for more.

The defense budget goes up; agricultural subsidies under Ronald Reagan, by this statistics, more than tripled over what they were in the previous 5 years. He tried to cut them this year, and I tried to help. Earlier he was not so hot on cutting spending. He has been on again, off again; the President was for the Sugar Program and he was against the Sugar Program, depending on what deals he made here. But that is a legitimate part of the President's proposals.

But where has been the concern for the neediest? Every organization that has taken on an obligation to protect the very ill, the elderly, the vulnerable, is frightened by Gramm-Rudman, not because they do not want to reduce the budget deficit but because they do not want it to be done in an unfair way. They do not want substantial parts of the budget, those that have already been over-financed in many ways, exempted in substantial part while they are left totally vulnerable. And the budget proposal that says the President can veto that, the President can veto a balanced budget if Congress sent him one; he could veto the budget with the budget halved over what it had been because he did not like it, it did not have enough money for the star wars missile or the MX missile and has too much for Medicare and for chapter I for those people who need educational assistance; he could veto that and, instead, trigger reductions across the board that do not go across the board because they protect certain of his programs.

Now, we have a conference going on that I hope will be able to make some improvements in that very shoddy piece of legislation.

I yield to the gentleman from Texas.

Mr. BARTON of Texas. I appreciate the gentleman from Massachusetts yielding. On that last point, it is my understanding that the President presents a budget to the Congress, it has to be within these deficit ceiling limitations. Congress can rearrange those if it sees fit, as long as it is a zero-sum gain. Every reduction in one program is offset by an increase in another program. But once the Congress passes the budget, so long as it is within the deficit ceiling, it is my understanding that the President cannot veto that. He can submit the original budget to the Congress, but once——

Mr. FRANK. He can veto the reconciliation bill that would be necessary to carry that out and therefore prevent that from effectuating what we say and cause those problems. The veto could prevent that from accomplishing the program.

Now, if the gentleman is agreeing with me that maybe——

Mr. BARTON of Texas. That is a different kind of a veto, that is not within the meaning of the Deficit Reduction Emergency Act.

Mr. FRANK. It is a veto. There is only one kind of veto, when the President does exercise a veto and we need two-thirds to override him. And as Gramm-Rudman comes over to us, there are times when a Presidential veto can trigger that automatic reduction process because he can veto the reconciliation. If there is agreement that that should not be the case, I accept the fact it is not always easy to follow every little bit of Gramm-Rudman because, as I said, it was very hastily drafted and we were not sure what is meant there. The Senate conferees have been unable to explain to the House conferees. But if there is agreement, that is one of the improvements we can make.

Let me say that the gentleman said to me before we were told by the initial calculations—you read the language, and the language does not tell you a lot, that is part of the problem. There is not a great committee report on this. If we can get defense not exempted, if we have that there is no Presidential veto in any way can trigger this, then we are making some progress. But that is not my understanding of the way Gramm-Rudman has come over.

Mr. BARTON of Texas. I understand I am on the gentleman's time. I appreciate him yielding once again.

One of the concerns expressed against Gramm-Rudman which I believe the gentleman expressed and some of the other gentlemen earlier in the evening was that the constitutionality of it, I am sorry I cannot pronounce that like it is——

Mr. FRANK. Let me reclaim my time. I never expressed concern about the constitutionality.

Mr. BARTON of Texas. But I would have a concern if you are saying that one of the recommendations, one of the improvements, would be to implement a provision that would prohibit a Presidential veto because Presidential veto is in our Constitution.

Mr. FRANK. I understand that. I have to take back my time. If the gentleman wants to be beat strawmen, I recommend he find a field somewhere. We have had enough of that.

I was never suggesting that we should in any way reduce the Presidential veto. We cannot reduce the Presidential veto. As a matter of fact, the Chadha decision of the U.S. Supreme Court made very clear there are absolute limits on our ability to even do any kind of legislative veto in this situation.

My point is not that we should impinge on the Presidental veto, but we should not have something which could be triggered by one.

As I read Gramm-Rudman, a Presidential veto over a reconciliation bill could trigger the automatic deficit reduction. If the President did not like what we did and vetoed the reconciliation bill, we could go into an automatic situation. I think that is a mistake. I think we should not make have a trigger of any kind that could trigger a Presidential veto.

I yield to the gentleman from Florida.

Mr. MACK. I just wanted to address the question or the point that you raised that at least some people are implying——

Mr. FRANK. The gentleman may finish, but I just want to make it clear that no, I am not taking away the President's veto; I am not for painting the White House purple; I am not for kicking Ronald Reagan's dog. I trust that I have divested myself of all the charges, which I must say to the gentleman seem to be of equal intellectual weight. What I said was that under Gramm-Rudman there are circumstances in which a Presidential veto, not of the concurrent resolution which I agree is not vetoable, but of a reconciliation bill, could cause the automat-

ic reduction to go into effect. I do not like that because that seems to me to be a mistake.

I yield to the gentleman from Florida.

Mr. MACK. I have several points. With a veto provision we do have the opportunity of overriding that veto, No. 1. No. 2, we do have the opportunity of coming back with another reconciliation bill.

Mr. FRANK. I will yield to the gentleman again on defense, but I want to make it clear, and I appreciate the gentleman from Florida agreeing with me, that the veto does have a role to play, the Presidential veto.

Mr. MACK. The veto has always had a role to play.

Mr. FRANK. I understand that. But I understand that the gentleman from Texas, before the gentleman from Florida got here, the gentleman from Texas was suggesting that I was wrong to say the veto would be a factor. We have now established that it is a factor, that the veto of a reconciliation bill would trigger it. Yes, we have the right to override a veto, but that takes two-thirds, and when you shift from a majority to two-thirds you are giving the President a great deal of power.

We can override a veto, but when you need a majority in one case to establish it and two-thirds in another, you have given the President a very substantial gain in power.

I yield to the gentleman from Florida.

Mr. MACK. OK. I would like to move to the question about defense because it has been an area that I think has been misunderstood. It goes back to the outlining of one of the exemptions that has been provided which is basically contracting or contracts, multiyear contracts where the assumption was that if by voiding or by causing an action where we would be open for suit by the person that we have contracted with, that we could increase—if I may finish.

Mr. FRANK. Or if there was a penalty. There are two factors, penalty or a suit.

Mr. MACK. Exactly. The conclusion was that most of those defense contracts were going to be exempt. That is what the first run-through on that was. So people came out and said, "Look, wait a minute, that contracting provision was put in there solely for the purpose of exempting defense or trying to reduce the burden of deficit reduction on defense," and, therefore, many people came out and said that we are not going to support it.

What I said to you is, during the conference there have been a number of statements made both by Democrats and Republicans that indicate now that really 90 percent of the contracts on defense are included, that only roughly 10 percent are excluded, basically because the provisions in the defense contracts say that they can be cancelled at the convenience of the Congress. And it is of the opinion now that most of those contracts are in, defense would play a major portion in the reductions in the deficit. This has not been set up as a means to protect the defense dollar. Those are the provisions as stated in the conference during the last several days.

Mr. FRANK. I thank the gentleman. A couple of things: First of all, it is indicative of the problems we have had with the drafting that we have had shifting analyses of what the contracting provision means. That is why I have been using the figure, 10 percent to 50 percent, because I do not think anybody really knows. It has not been analyzed yet.

Second, given the way they are running the Pentagon, I would not be at all surprised to see some new contracts signed, if in fact this is continued, which would make it hard for us to do that. There is nothing that would prevent the Pentagon from shifting that language. But the Gramm-Rudman language, as it now is, if we are intending to cover only 10 percent of the Pentagon, then I think we had better say that, because if we leave it open to interpretation we will have some problems.

The other thing is, if 10 percent of the Pentagon is exempted, then 10 percent of other things ought to be exempted. The fact is that when you exempt contracts, and I understand the reason for exempting contracts, but because the Pentagon uses contracts more than virtually any other area of Government expenditure, to the extent that you protect contracts you protect the Pentagon more.

□ 1855

But that is one area that has to be clarified.

If the gentleman would agree with me, I am hoping maybe we are reaching some agreement. I still do not know where we are on the veto, but I will get back to that in a second. Let me ask the gentleman from Florida, is he agreeing that defense ought not to be any more protected by this, in precentage terms, than any other program? Does the gentleman agree to that?

Mr. MACK. Our feeling is that defense ought to play an equal role in deficit reduction. It should not be protected any more or any less than any other program.

Mr. FRANK. I am glad to hear that, because that was not what initially we had, and I hope the gentleman is speaking for the other body. I am not sure of that. But I think that is a very real change from when Gramm-Rudman came over. As the gentleman has acknowledged, we were initially being told by the authors of it over in the Senate that in fact it protected a lot more of defense. If we are now being told, well, no, defense is going to be equally vulnerable, I think that shoud be OK, and it may get us closer.

I yield again.

Mr. MACK. Well, my point is that there are areas on the domestic side that are probably more protected than defense. Our intention was to come up with a reasonable, rational approach in making the exemptions, and the feeling was that if we have made legitimate contracts, that if there was an action on our part that would initiate some form of penalty that would end up costing us more in the long run, that we ought to exempt those, that we are really fooling ourselves to say on one hand we are going to reduce these contracts and then have to turn around at a later date and increase the cost to the Federal Government.

Mr. FRANK. I understand that.

Mr. MACK. A straightforward, honest approach, in trying to make sure that everything as much as possible is included in the pie.

Mr. FRANK. I thought we had an agreement, but it slipped away from me, because that is the problem. I thought the gentleman was agreeing with me that defense ought to be vulnerable, to the extent that every other program is vulnerable; but defense uses contracts more than other programs do. And if we are going to protect defense to that extent——

Mr. MACK. It is the other way around.

Mr. FRANK. If the gentleman would like me to yield, I would be glad to yield.

Mr. MACK. I would like the gentleman to yield.

My intention, Mr. FRANK, was really to try to get to some understanding of what we are doing. I realize there have been times when this body has had to move rather rapidly. The gentleman from Pennsylvania and I are certainly aware of situations where we have come out here on the floor and did not have the opportunity to at least have as much a dialog as we are having here tonight to discuss other issues which the gentleman's party has brought to the floor with no advance notice.

Mr. FRANK. I am always glad to yield to the gentleman, but I do have limited time. I appreciate his taking my time to tell me how much he appreciates taking my time, but I think we ought to get back to the substance. So why don't we get back to defense.

Mr. LELAND. Will the gentleman yield for just a moment?

Mr. FRANK. Yes; I yield to the gentleman from Texas. Just before I do, for 1 second, I will say that one thing I think ought to be very clear: Complaints about legislation without hearings, legislation being too rapid, I would hope nobody would utter too

many of those with a straight face, because my experience in the 5 years I have been here is that individuals on either side tend to be for or against regular order, depending upon what happens subsequently. That is not a bad way to go about it, but the gentleman's little side excursion as to when legislation comes up or not comes up, that is not my problem. My problem is the substance of this legislation, which I am still trying to understand. I just want to reiterate, before yielding to the gentleman from Texas, my point was that to the extent you exempt contracted material, you are giving the Pentagon a much better break than you are autism or cerebral palsy, because we do not sign contracts with autism or cerebral palsy. And I think a deficit-reduction proposal that has people from the autism group and the cerebral palsy group and the Easter Seals group worried because they are not only going to have to take their share of the cut, they are going to have to take the share of the protected defense contract, that is a very bad piece of legislation.

I yield to the gentleman from Texas.

Mr. LELAND. I would just like to again thank the gentleman for his leadership. I cannot stay any longer, but I would just like to ask the gentlemen from the other side of the aisle if at some point in their history in being in Congress would they show as much concern about the hungry, the sick, the people afflicted with autism, and the other problems that afflict the lower end of the spectrum of people in our country, the poor and the desperate people, as much as they address the issue of defense spending and how much more we ought to be spending on defense, as much as they would ask the Congress to appropriate more money for those incredible weapons that they were talking about. Are they willing to also advocate the increase in spending for the nutrition programs for the young children of our country who are suffering? Are they going to ask for more moneys for senior citizens programs?

This morning, under the leadership of the chairman of the domestic section of the Select Committee on Hunger, Mr. PANETTA, we held a hearing on hunger in Appalachia, and person after person who came from Appalachia told us about the problems they were suffering, in terms of malnutrition amongest the children there, in particular, and how children have to go to sleep after having eaten potato soup and beans and bread, and drink a lot of water just so that they can feel full and wake up the next morning feeling they may have had something to eat the day before. We heard a young child who is 13 years old say that they only get two glasses of milk a month, if that much.

I hear all of the problems of the deficit, and so forth, and I am concerned about that, too, because I do not want to mortgage the future of America. I want to see a balancing of the budget. But I do not ever hear from that side of the aisle enough in terms of balance, about how we are going to protect the interests of these people. I am talking about not only the 35 million people—and the gentleman from Pennsylvania has indicated that the numbers have gone down, that there are fewer poor people. Let me suggest to the gentleman that our figures are showing that there is an increase in poverty in this Nation. The figures have dropped in the last 2 years from 15 percent to 14.7 percent, not from 15 percent to 14 percent; that, in fact, there are 35 million poor people in this country, but also the private voluntary organizations who are handling the soup kitchens and the food pantries and things like that in this country are asking for more and more support because they lack the kind of support from the Federal Government now, and because of those budget cuts in those areas for nutrition and feeding people, in fact the burden is shifting to the private sector. But there are more and more people who need food to eat and they cannot afford it because they do not have the kinds of jobs necessary in order to feed their families.

The point I am making is that I hear all the time the rhetoric about balancing the budget on the other side of the aisle, I hear all the time about how we need to increase defense spending, but I do not hear enough from that side of the aisle that we even care about these people, and I just wonder where that is coming from.

Mr. FRANK. I have about 15 minutes left, and I will yield a piece of it first to the gentleman from Florida and then the gentleman from Texas.

Mr. MACK. I appreciate the gentleman yielding, and I appreciate the comments that the gentleman from Texas has made. We have known each other for a relatively short period of time, and I am convinced of his sincerity. The only thing I would say is to at least give me the same courtesy. I feel as strongly as you do. We have a disagreement about what is the best way to get there. And I think that is a legitimate difference of opinion.

Mr. LELAND. If the gentleman from Massachusetts will further yield, I would just like to say to the gentleman that all I ask for is for you to be as preponderant in your suggestions about what options we have for taking care of these people as you have done with the preponderance of suggestions about how we increase defense spending, how we cut programs. I am saying we are looking for alternatives. I agree that the gentleman is as sincere as I am, at least from my conversations with him in that short period of time that we have known each other, but I do not hear that on the floor of this House, I do not hear it from that side of the aisle, about what is happening to these poor people. And maybe with the kind of dialog that you could create by giving us some information about your alternatives, maybe then we on this side of the aisle would buy some of the options that you put forth. But I have not heard those options.

Mr. FRANK. I yield to the gentleman from Texas.

Mr. BARTON of Texas. I appreciate the gentleman from Massachusetts yielding.

I have a question for my distinguished colleague from Texas. I have followed his career first in Austin, where he served in the State legislature, and then here in Washington where he preceded me. I understand his concern. I share those concerns. But my question is: You had the same concern, I would hope, when you were a State legislator in Austin, TX, and during that time period you operated under a balanced-budget requirement.

Mr. LELAND. If the gentleman from Massachusetts will yield further, we in my first session of the legislature established zero-based budgeting for the purpose of balancing the budget in the State of Texas. And I agreed with that. I do not disagree with that now. But at the same time we did not go in with a meat ax and cut all of those programs out, because we were under Federal mandate. So you cannot necessarily equate the situation with what was going on in the State of Texas with what is going on here.

Mr. BARTON of Texas. If the gentleman will yield for an additional comment, in my opinion—I understand there is a concern and a disagreement about the provisions of Gramm-Mack—there are those, and I am one, who think that this is a very fair proposal because it does cut proportionately across the board. It exempts one program, Social Security, because it has a dedicated trust fund. Now, we do not know to what percentage there are contracts that are not affected in defense, in the social program, but the language—and my distinguished colleague from Massachusetts point it out to me, where his concern is on the definition. It does not say "Defense Department." It strictly mentions contracts. And I feel that we can, by working through the conferees in the conference committee, get the facts on those concerns. And if it appears that there is a disproportionate number of contracts that are exempt under defense as opposed to, say, health and human services, we can remedy that.

Mr. FRANK. Again the gentleman has refuted the unuttered. No one said that referred only to defense. My

point on several occasions was that defense uses contracts more than any other programs, and therefore exempting contracts will protect defense more than it will protect many of these other programs.

But I want to get back to my central concern. On the other hand, I do want to acknowledge the gentleman from Texas—and I appreciate what he had to say—yes, if that is his intention—and it did not come that way from the other body. When that first came from the other body, we were being told by Members of the other body that defense was more protected than other things. If there is a willingness to see defense is treated equally with the FBI, with Environmental Protection, with other things, then we move closer. There is still the problem of the veto. There may have been some confusion, from the technicalities, but I think we are in agreement that while the President cannot veto the concurrent resolution, he has his unimpugnable constitutional right to veto the reconciliation bill, and his veto of a reconciliation bill could trigger the automatic reduction, even if Congress had come up with some reductions, if the President did not like the priorities. That is the point I want to make. We are not debating whether or not to reduce the deficit. We are debating the priorities.

I am afraid I will not be able to yield any more. I have much less than half of my own time so far, and I only have a few more minutes before I am finished. I want to get back to one of my major concerns about this.

Mr. WALKER. Will the gentleman yield to me for a correction?

Mr. FRANK. I yield to the gentleman from Pennsylvania.

Mr. WALKER. The gentleman mentioned a little bit ago agriculture, and he said that he had supported many cuts in agriculture he did not think this gentleman supported. I wonder if he would specify that.

Mr. FRANK. Marketing orders was one of the ones that I had in mind.

Mr. WALKER. Where have I not supported cuts in marketing orders?

Mr. FRANK. I thought the gentleman was for several of the marketing orders to which I was opposed, which I have found to be anticonsumer. If I am wrong, I apologize. I remember a conversation with the gentleman about marketing orders where I thought he was supportive in the dairy area and otherwise. If that is inaccurate, then I am inaccurate.

Mr. WALKER. I would appreciate if the gentleman would correct the record. I voted for the Olin-Michel amendment on the floor the other day.

Mr. FRANK. No; I am talking about marketing orders, marketing orders in various commodities. We had the fight about whether or not OMB could deal with marketing orders or not. Let me say I will withdraw the comment. I will doublecheck the RECORD.

Mr. WALKER. I just wanted to say to the gentleman that when we had the agriculture bill on the floor the other day I voted for the cuts, and I think that agriculture is one of the areas where we could find some cuts.

Mr. FRANK. Well, I agree.

Mr. WALKER. Did the gentleman mention the National Endowment for the Arts?

Mr. FRANK. No; I did not.

Mr. WALKER. The National Endowment for Democracy. I am sorry. That is another place where we can cut.

Mr. FRANK. I will take back my time because, as I have said, I have yielded more than half my time. The National Endowment for Democracy—I am glad the gentleman agrees with me on that. I was not suggesting that the gentleman from Pennsylvania did not agree. The gentleman asked where I would cut the budget and I am telling him where I would cut the budget. One of those areas is the National Endowment for Democracy. I pointed out—not that the gentleman from Pennsylvania was its sponsor—that Ronald Reagan has been an advocate——

Mr. WALKER. Will the gentleman yield?

Mr. FRANK. No; I will not yield again.

The gentleman wants me not to get to the point I want to make, and I understand that, but I am going to do that.

The National Endowment for Democracy, we agree, apparently, is a waste, but it is Ronald Reagan's waste, to a great extent, as are many of these other areas.

The point we have to deal with in Gramm-Rudman which Members would like obscured is we want to go back to the people who have written, cerebral palsy, autism, these are programs that are unprotected, these are programs which are small compared to the MX missile, compared to various parts of the Foreign Assistance Program, compared to the payment-in-kind agricultural boondoggle which the Reagan administration gave us of $12 billion. They have already been, in my judgment, disproportionately reduced. The deficit has gone way up in the past 5 years, the joint product of the President and the Congress. There is no point in finger pointing. The deficit has been a joint product of the President and the Congress. The President has asked Congress to spend virtually the same amount Congress has spent. We spent it a little differently than he would have had us spend it, but it is virtually the same.

□ 1910

The President has vetoed virtually no appropriation bills. So we have a joint product of President and Congress, and it is a deficit that is causing us damage, and that we think has to be reduced.

How do we reduce it is the question. The problems with Gramm-Rudman are several in my judgement. One, it allows by the use of the Presidential veto, the President to block a congressional enactment reducing that budget deficit somewhat if it does not meet his priorities, and it is therefore relevant to look at his priorities.

His priorities have been excessive spending in the Pentagon by the judgment I think by now most Members of both Houses, because this year, after all that increased expenditure in the Pentagon, the majority of both Houses said no, you are going way too far and we are not going to give you that much. They have included foreign assistance to the Philippines; the National Endowment for Democracy; Radio Marti; the Payment-in-Kind Program. These are the President's programs. The Synthetic Fuels Program, which he is, I hope, beginning to turn around on now, but which was a multibillion-dollar excessive expenditure. The Clinch River breeder reactor. Water projects in some cases that were unnecessary.

Many of us feel it would be a grave error to allow his veto to be interposed, and again, we are not talking about his vetoing because we are spending too much; we are talking about the authority Gramm-Rudman gives him to object to a congressional deficit reduction bill, not because it does not reduce the deficit enough, and let us be very clear: Ronald Reagan has criticisms to make of the way Congress has spent money. But if you look at what he has asked us to spend, we spent virtually the same as what he has asked us. So his criticisms are not in what we spent but how we spent it.

To allow him to interpose his veto when he has been for the MX missile, an unnecessary weapon, while he has been trying to Medicare, medical care for the elderly poor, we think is a mistake. Beyond that, we have the problem of the most vulnerable people in our society. People with autism; people with cerebral palsy. Eighty-three-year-old women living on supplemental security income because the pension that her husband was supposed to get or she was supposed to get did not show up because of a company bankruptcy.

A 2-year-old child who did not ask to be born but is born into unfortunate circumstances to a couple of careless teenagers. These are the people who would bear very much of the brunt of Gramm-Rudman. Even if it is done across the board and in the form in which it came to us from the other body, we were not told it was across

the board, we were told that a substantial amount of defense would be protected.

Even if you do it across the board, we have spent 5 years cutting already. Poor, pregnant women get less help than they used to. Children having trouble learning in low economic areas get less than they used to. The deficit has gone up and up because the Pentagon has done very well; agricultural subsidies have more than tripled; new programs like the National Endowment for Democracy have come, but the very poorest people in this society, and by the way, there is debate about some of the poor. Some people might find some of the poor unworthy, some of them worthy. Let us just focus on those whom I think there is no debate about. Eighty-three-year-old women living on minimum income because they had no pension through no fault of their own. They worked hard all of their lives and the pension just was not there. If the automatic reductions of Gramm-Rudman go into effect, they get hurt. Their medical care is cut. Their income may be cut. The cost-of-living increase that they are legally entitled to if they are on supplement security income will be cut.

It does not seem to many of us fair to continue that set of priorities. It does not seem fair to exempt some percentage of defense because they have to use contracts, but to exempt nothing at all in some of these other areas, and that is what we are being told will happen.

Medicare and Medicaid, yes, we needed cost controls. We have made some progress in getting cost controls. We need more progress. But Gramm-Rudman does not mandate cost controls. Gramm-Rudman does not speak to efficiency. It says if the President does not like the spending priorities of Congress, if Congress meets the targets of Gramm-Rudman in reducing deficits, if Congress does it in a way that the President does not like, if for instance, instead of cutting Medicare and President Reagan has every year asked us to cut Medicare, if instead of cutting Medicare, we raise the cigarette tax by 8 cents, and put that into the Medicare budget, President Reagan would not like that. He is vehemently opposed to that. He wants to cut Medicare and not raise cigarette taxes. That is his position; no one doubts that.

If Congress achieved the same amount of deficit reduction as the President by rejecting his proposed cuts in Medicare and instead substituting an 8-cent increase in the cigarette tax, he could veto the bill and by vetoing the bill trigger the automatic reduction which is what has got the people who are concerned about autistic children and people with cerebral palsy worried, which has got the American Association of Retired Persons worried because of what it will do to Medicare and Medicaid and other programs for the medically ill.

I do believe that there is plenty of room to reduce the deficit. Yes, we talked about revenues. I am prepared to vote for an increase in cigarette taxes; I think that would be good for our society to do that. Not only would it bring more revenue, but to the extent that it discouraged smoking, we would be a healthier and a better society. Not by a compulsion, but by asking people who smoke to bear a fairer share of the costs that are inevitably imposed on society through smoking.

We can cut in the military; we can cut in foreign assistance; we can cut in water projects. We can cut in other areas. We can cut in areas of general government. If we are in a crisis, that is OK. But to tell the people who are working with the poorest and most vulnerable, to tell the poor children and the sick elderly and people suffering, parents who have autistic children, parents who have severely retarded children that the already inadequate help that they get in my judgment is going to be further cut, while we protect some percentage of defense, we are not clear what percentage, but to protect some percentage of defense and put the retarded children and their parents at great risk is not, I think, morally acceptable.

Yes, it is important to reduce the deficit, but I think this country has got both the economic and intellectual resources and I hope the moral resources to do it in ways that do not damage these individuals.

I yield to the gentleman from Texas [Mr. BARTON].

Mr. BARTON of Texas. A quick question. Suppose the President did veto a budget reconciliation bill that was in the deficit targets, he could do that under our Constitution, but none of the automatic cuts would go into effect because the budget would already be within the deficit target.

Mr. FRANK. But the budget could not be within the target unless we were able to do reconciliation. Simply adopting a budget which sets it but not being able to accomplish it would not work.

Suppose we reached that deficit reduction by a cigarette tax increase. I take something that is a real issue between many of us in Congress and the President. Some of us think we should not allow cigarette taxes to drop. The President wants cigarette taxes to be lower than they now are, which is what the law has said it should be. We had a temporary increase. Some of us think that temporary increase should be made permanent. If we are not able to achieve our deficit reduction because the President vetoes an increase in the cigarette tax because he would rather cut Medicare, then that could trigger the automatic reduction, and that is the problem we have got.

We cannot simply say we are going to have it to stave off those automatic reductions; we have to accomplish it. By letting the President veto, you would allow him to prevent us from achieving it. That, I submit to the gentleman, is a very real possibility. We try to raise the cigarette tax to pick up a little more revenue. The President says no, you better cut Medicare instead. He vetoes the increase in the cigarette tax, and that could put us over the top.

□ 1920

PROPOSED SANCTIONS AGAINST ANGOLA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. MCCOLLUM] is recognized for 60 minutes.

(Mr. MCCOLLUM asked and was given permission to include extraneous matter.)

Mr. MCCOLLUM. Mr. Speaker, today I introduced a piece of legislation that would ban all loans from the United States to the country of Angola, would ban future investment by United States business interests in the country of Angola, and would require the President to declare an embargo on all trade between our two countries in regard to the country of Angola until certain conditions were met, namely, that certain troops that are in that country from other Communist countries—Cuba, the Soviet Union, East Germany—be withdrawn, that Angola recognize the human rights violations which it has committed and take effective steps to cease and desist those activities, and that certain other conditions be met that were set forth in the legislation, including free elections, and that an opportunity to discuss opposition parties within that country be developed.

The reason for this legislation is fairly simple, and before I get into that I would like to state, Mr. Speaker, that at the end of my remarks, during this special order time, I shall insert into the RECORD for printing a copy of the legislation itself.

Mr. Speaker, Angola is a country that is roughly the size of Texas and New Mexico combined. It has a population of about 6 million people. Until 1975 it was under the control as a colony of Portugal. Since 1975, although there has been an ongoing civil war between the two leading contenders for power in that country, for all practical purposes most of the country has been under the control of a Communist regime under the Government entitled the "Popular Movement for the Independence of Angola," and during my remarks I am going to simply refer to the MPLA as

"the Government," since it is in fact considered to be just that.

The opposition forces that still exist in that country and have been fighting the anti-Marxist forces, the forces of Jonas Savimbi, are under a party that has been called the Union for the Total Independence of Angola, UNITA, and for the purposes of simplicity in this discussion, I am simply going to refer to them as "the Savimbi forces."

After 1975 the Government of Angola proceeded on a path that has indeed squelched human rights as we know them today: there is no freedom of press; there is no real freedom in that country for political association; there is no real freedom in that country for people to express their views in even the simplest of ways, including artistic form. The fact is that Amnesty International recently has engaged itself in the exploration of what the problems are in Angola, and it has confirmed, as well as our State Department, that human rights abuse is the norm in the nation. The torture, imprisonment, and execution of political prisoners is thoroughly documented by Amnesty International and our own State Department.

The fact of the matter is that Angolans are sick and starving due to the harshness of the African drought this year, and yet the Angolan Government, which exported over 1 billion dollars, worth of oil to the United States last year alone, cannot afford to care for its people. The country is an impoverished shambles, and we need to pay more attention to what is going on over there.

The reason for this legislation is in part because of these human rights violations, because of the situations in that country. But more to the point, this legislation that I have introduced to bring about economic sanctions on Angola has been brought to my mind to do because of the growing conflict within that country of a Soviet presence in trying to help the Angolan Government stamp out the rebel forces that are opposed to Marxism, because of the development over the last few months of the increased stepped-up activity of this effort on the part of the Soviet Union and the obvious use of Angola by the Soviets now in a form of its international efforts to try to bring about a world order of communism.

I want to talk for a few minutes about those efforts and what has gone on in the context of the history of this country. For about 10 years this country has been under the Marxist rule of this current government. The Soviet Union has been present during most of that time. However, the fact of the matter is that the Soviet Union's involvement has increased of late.

In 1976 or so, at the instigation of the Soviets, the Cubans put about 25,000 or 26,000 troops into Angola. Today there are about 35,000 or 36,000 Cuban troops in Angola. If it were not for these Cuban soldiers in Angola, the present government could not exist; they could not sustain their operations.

The Soviet Union itself has become more involved directly in the last few years. It has advisers or military experts and actual soldiers there numbering some 1,500 or so at the present time, and I am told the best estimates are that there are about 2,500 East Germans in the country.

In 1983 there was a battle or two that was waged in the country between the forces of Savimbi and the forces of Angola, and during the fall the Soviets put in a good deal of armament and stepped up the supplies to that country. They put into the country T-62 tanks, they in Mig-23 jet fighters, they put in SU-22 fighter-bombers, they put in M-125 helicopter gunships, and more recently they have installed an air defense line in southern Angola, deploying radars and SA surface-to-air missiles. That was all in November and December of 1983.

Now, after that occurred, the Soviets were caught a little bit by surprise when the South Africans entered the scene chasing some terrorists north into Angola, and the Angolan Government decided in December of 1983 to come to an accord with the South Africans and agree not to continue to support the terrorists that had been using their border area for an enclave to make raids into South Africa, in return for South Africa's withdrawing its forces completely from the area.

The Soviets were not too happy with that, and they decided to get much more involved directly, and in 1984 and 1985, they did exactly that. As a matter of fact, in 1984 and 1985, as of August of this year, the Armed Forces of the Government of Angola had on hand over 500 Soviet tanks, including 30 T-62's, over 100 sophisticated Soviet fighter aircraft, including about 30 Mig-23's and 70 Mig-21's, and roughly 25 deadly M-125 helicopter gunships. The total value of these armed transfers has been estimated at between $1 billion and $2 billion, those transfers being the ones occurring in 1984 and early 1985.

Then in late July, a major offensive began between forces of the Government, the Communist Government of Angola, against Savimbi and his forces that controlled a small portion of the country in the interior and the southern regions. At that time, the Soviets had four commanders in the field directing the Government brigades, four brigades of the Angolan Army, and the Cuban soldiers that were involved in this battle were directed by Soviet commanders actually on the battle scene. They coordinated ground artillery and air attacks and moved against all of Savimbi's positions at that point in time. There were a lot of casualties, including the loss of life by some of the Soviets themselves, and a number of exchanges occurred during that period of the last few weeks and the last few months.

As of right now, it appears that the Angolan Government troops have gotten the worst end of the whole deal. The point is that the Soviets have stepped up their presence, they have stepped up their pressure, they have stepped up their entire efforts, and they are indeed controlling and operating, for all practical purposes, the Government of Angola. And so the efforts the United States made a few years ago to try to get some accord and some accommodation and to get the Angolan Government to respond to some reasonable demands have basically gone for naught.

So we come to the point in time that we must look at what the American presence is and what our status is. What should we be doing with respect to the Government of Angola?

First of all, we have never recognized the current Government of Angola. It is not a formal recognition in any way. It has always been known to be a Communist government. One of the interesting ironies, though, is that despite the fact that we have never recognized them for the purposes of an embassy, we have not put them on the list to technically call them a Communist country, and since they are not legislatively labeled that and they are not labeled that by the State Department or the administration, they are eligible for Export-Import Bank loans. As a matter of fact, some of those loans are being processed, I am told, currently.

As a result of that processing, I have a great deal of concern and I think my colleagues have a great deal of concern because in the process of doing this, we are going to be providing loans to the Government of Angola, which is indeed a puppet of the Soviet Union, to carry out its wishes and to be able, in the process of these Export-Import Bank loans, to gain further United States investment that will accrue to the benefit of the Government in big ways and big dollars.

Now, what am I talking about? I am talking about the fact that every year, for several years now, the United States has imported more than $1 billion worth of products from the country of Angola. Most of that importation has been oil. We buy better than 80 percent of all the oil that is produced by the country of Angola, and in a couple of years, maybe even this year, it will be almost 90 percent.

□ 1930

In the process of making these purchases, we are subsidizing that government which, in turn, actually pays

Castro's Cuban Government for the services of the 35,000 or 36,000 Cuban troops that are in that country under the command of Soviet commanders fighting against the freedom fighters of the Savimbi forces, fighting against the interests of the United States.

I find this to be absolutely indefensible. I find the U.S. position in regard to ignoring this fact to be immoral. And I believe it is time that my colleagues and I took some action to correct this matter. That is the reason for the legislation that was introduced today. That is the bottom-line reason.

We need to wake up to the fact that even though there is a debate focused, and I know a lot of attention is down there on the problems of apartheid in South Africa, a lot of concern, and rightfully so, has been had with Ethiopia and its drought and all the hunger that is there in the northern end, that from a political standpoint, from a standpoint of the question of the survival of the free world and the ideas of democracy versus the question of the supremacy of the Soviet Union and the Communists as a philosophy in this world, the battleground is in Angola and we are losing. Not only are we losing in Angola today, we are paying, financially supporting, and subsidizing the forces that are defeating us and defeating democracy. It is an absolutely twisted situation, as far as I can see.

Now there has been a proposal by one of my colleagues, the gentleman from Florida [Mr. PEPPER] to provide humanitarian assistance to the Savimbi forces. He has a bill in to do exactly that. I think that in light of what is going on, it is a perfectly reasonable request that he is making of us to do that. If we are going to provide humanitarian assistance to the Contra's fighting the Communist Sandinistas in Nicaragua, I think that we have every good reason to also turn around and at least do that for the forces of Savimbi.

But until just a few months ago, just a few weeks ago actually in this body, we could not have been involved in any way at all. Only recently have we repealed what was passed in the 1970's known as the Clark amendment, which prohibited the United States from any participation in the Angolan situation on the side of any force, which was a ridiculous position for us to be in.

But now that we are clear of that Clark amendment and it has been repealed and we have the potential for this legislation to give humanitarian aid to Savimbi's forces, we ought to be doing that. In fact, we ought to seriously consider giving more than just simply humanitarian aid to Savimbi's forces, considering what the Soviets are doing in supplying the tanks, the weapons; not only that, but the manpower and the direction of the war inside Angola.

But above all else, whether we provide the humanitarian aid or the military aid or anything else to the Savimbi forces and get involved directly, we do not have any business being involved in subsidizing this Communist regime in Angola and we do not have any business ignoring it in terms of our world concerns just because some very large major U.S. corporations have investments there and just because there is an American interest, of course economically in this, in terms of not having disruption or instability, we should not allow the basic principles of our Government to be spit upon and to be used to defeat the causes of democracy in that part of the world and to turn it to the Soviet advantage.

To me, it is an illogical position that we are forced into by the kind of logic some have told me since I first discussed introducing this legislation when they say, "Bill, you have no business getting involved in this. After all, economic sanctions aren't a good idea and you have always said that," and I always have.

I have up until this point basically felt that economic sanctions were not a very good tool of foreign policy for this Government, whether those were economic sanctions that we were using in Central America or whether they were in South Africa or whether they were against the Soviet Union. The primary reason for their not being a very good tool is that we do not get our allies to join in, and as a result of that, many times we do not have the pressures that we want to bring about to really make a difference in terms of the policy, so we do not get the changes and we only shoot ourselves in the foot.

In this particular case, though, where we have an ongoing civil war, where the U.S. dollars are indeed funding the enemy of our own Government and our own system and our own interests, I think that we have no other moral choice but to impose economic sanctions and to stop funding this kind of communism and this kind of overt Soviet activity.

Is Gorbachev using Angola to test the President, pending the summit meeting? I do not know.

Is he using Angola as an example to other African countries of the weakness of American foreign policy in the region? I think that is pretty clear.

Is he using the situation that is established now to slap us in the face because the United States was involved very successfully, diplomatically, in the winter of 1983-84 in getting an accord between South Africa and Angola on the withdrawal of troops and on an agreement that looked as though for a while it might bring about some stability in the region and possibly minimize the Soviet influence in Angola and maybe bring about some kind of movement in the direction of more humanitarian concerns and more civil liberties in that country?

But the fact of the matter is that policy that we did succeed in just ever so briefly looks as though now that it was the prodding point, the key point that was raised to the Soviets and Gorbachev to remind them that they had in their hands the power to cut the U.S. interests, and they darn well better take advantage of it and not let us get any more of a foothold than we had.

So we are in this position today. We are in the position where the Soviets, without much notice on the part of the world, very little notice on the United States, stepped up their activities in 1984 and 1985 and in this summer and in this fall have actually been on the field, guiding the forces, guiding the 36,000 or so Cuban troops, guiding the 1,500 Soviet troops in the country, guiding the 2,500 or so East German troops in the country, directing the missiles, directing the tanks, directing the war against the freedom fighters of Savimbi and, really, as I said earlier, spitting in our face all the while as the primary cost of this war is being financed, not by the Soviet Union, but by the United States itself.

At any rate, it seems to me to be fairly ridiculous posture for us to be in and one that we need as rapidly as possible to get out of.

If we were to take the actions that I have proposed, we would end the Export-Import Bank loans that we are now making or undertaking. We would prohibit the investment in the future by any other U.S. companies of any other investments into Angola. We would not, however, divest anybody of their interest already there. They could sell their products somewhere else and certainly oil is a commodity that could be sold. I am sure the oil would be sold somewhere.

We would see, however, an end to future investment. We would end the possibility of any loans going into that country from our banks or other institutions that might decide for some reason or another to support either the private American investment or somebody else's investment in that country, and we would take a step that I think is long overdue, and that is, to bar the imports and, for that matter, the exports between the United States and Angola.

All at the same time in this bill, one little section that I think is really overdue in our concerns legislatively, would correct that deficiency that I noted earlier. We would amend section 620(f) of the Foreign Assistance Act of 1961 to include the People's Republic of Angola as a stated Communist gov-

ernment, which effectively bars them from a lot of other possible involvement with the United States, unless the President declares that it is in the national interest to make some special exception for that; but it is just so incredibly long overdue in terms of our recognition that they are part of the Soviet axis. They are a part of the Communist world. They are a part of the international Communist movement that is involved from Southeast Asia with the Soviets in Afghanistan and the Vietnamese in Cambodia to the Nicaraguan Sandinistas trying to influence and invade Honduras and Costa Rica and El Salvador, to the Cubans who are funneling the arms and being the conduit for a lot of that disruption in Central America, to Angola which is one of the clearest examples of all outside of Afghanistan which everyone knows about because the Soviets directly invaded it.

Angola, which is one of the clearest examples of all of the Soviet presence directly guiding the war, of the Cuban troops in large numbers who blatantly have been there for nearly 10 years and in the last year increased their number by about 10,000, to the actual affront of American interests like it has not been affronted anywhere else I know in the world.

So, Mr. Speaker, my concerns are broad. I think that we needed an explanation of what this legislation was about, mainly because there is not enough time in 1 minute certainly to explain it, because not very many of the Members do concern themselves with the details of policy of a lesser-developed country in Africa like Angola, because the American public has not had much written about the subject and very little brought to its attention.

It occurs to me as I conclude these remarks this evening that unless there are lot of us who join together to bring more attention to this matter that it could very well be that this legislation, as so much else in this House, will go into a committee and not be heard from again and the war and the civil war activities guided by the Soviet Union against the Savimbi forces will continue, with the United States financing it, with the activities of human rights, tortures, continuing in Angola and so forth.

But I would hope that this legislation, combined with some of the media attention that columnists like Evans and Novak have brought to Angola recently and the concern that I think is now down at the White House on this issue, I would hope that we would raise up this profile before the American public, that we would see to it that the attention of this body does not simply dissipate into other areas and forget about it. That we would take affirmative action to demonstrate, not only our moral outrage, which is something we definitely should demonstrate in this case, our moral outrage at the long history of human rights violations and continued torture and continued violations of freedom of press and speech in the country of Angola, but that we would also demonstrate to the Soviet Union and to other countries in the world, importantly in Africa and lesser developed countries in our own hemisphere, that the United States is not going to be the fool anymore, the fool financing Communist revolutionary governments directed by the Soviet Union with on-ground commanders, that we are not going to be the fools to finance that anymore and that we are finally going to wake up and say, "No more," that we are going to come forward and make a statement that the world can see and can understand and perhaps give some credence to.

At any rate, I ask my colleagues' indulgence. As I said earlier, I have asked for the printing of the bill at the end of these remarks. I hope you read it and I would ask you to cosponsor it if you can and to come to this floor on other occasions when the opportunity presents itself and speak about Angola, learn about Angola, talk to your constituents and other Members and colleagues about the suppression of rights and the foolish policy of the United States in Angola.

Mr. Speaker, I include the bill, as follows:

H.R. 3598

A bill to express the opposition of the United States to the system of oppression in Angola, to promote the development of democracy in Angola, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Promotion of Democracy in Angola Act of 1985".

SEC. 2. POLICY DECLARATIONS.

The Congress finds and declares that—

(1) it is the policy of the United States—

(A) to encourage all nations to adopt political, economic, and social policies which guarantee broad human rights, civil liberties, and individual economic opportunities; and

(B) to condemn oppression wherever it exists and to seek its eradication;

(2) the people of Angola have been deprived of their fundamental human rights and denied civil liberties; and

(3) the Government of Cuba has contributed to the deprivation of the Angolan people and is an obstacle to reconciliation in Angola.

SEC. 3. PROHIBITION ON LOANS TO THE ANGOLAN GOVERNMENT.

(a) PROHIBITION.—No United States person, or the Government of the United States, may make any loan or other extension of credit, directly or through a foreign affiliate of that United States person, to the Government of Angola or to any corporation, partnership, or other organization which is owned or controlled by the Government of Angola, as determined under regulations which the President shall issue.

(b) EXCEPTION.—The prohibition contained in subsection (a) shall not apply to a loan or extension of credit for which an agreement is entered into before the date of the enactment of this Act.

(c) REGULATIONS.—The President shall issue the regulations referred to in subsection (a) not later than 90 days after the date of the enactment of this Act.

SEC. 4. RESTRICTIONS ON NEW INVESTMENTS.

(a) REGULATIONS.—Not later than 90 days after the date of the enactment of this Act, the President shall issue regulations prohibiting any United States person from making, directly or through a foreign affiliate of that United States person, any investment in Angola.

(b) EXCEPTION.—The prohibition contained in subsection (a) shall not apply to—

(1) a loan or extension of credit permitted under section 3;

(2) an investment which consists of earnings derived from a business enterprise in Angola established before the date of the enactment of this Act and which is made in that business enterprise; and

(3) the purchase, on a securities exchange registered as a national securities exchange under section 6 of the Securities Exchange Act of 1934, of securities in a business enterprise described in paragraph (2).

SEC. 5. PROHIBITION ON ASSISTANCE TO ANGOLA.

Section 620(f) of the Foreign Assistance Act of 1961 (22 U.S.C. 2370) is amended by inserting "People's Republic of Angola" after "People's Republic of Albania".

SEC. 6. IMPORTS FROM AND EXPORTS TO THE GOVERNMENT OF ANGOLA.

(a) IMPORTS.—Goods and services from Angola may not be imported into the United States.

(b) EXPORTS.—Goods and services from the United States may not be exported, directly or indirectly, to or for the use by the Government of Angola.

(c) EXCEPTION.—Subsection (b) shall not apply to international disaster relief and rehabilitation assistance provided under section 491 of the Foreign Assistance Act of 1961 (22 U.S.C. 2292).

(d) DEFINITION.—For the purposes of this section, the term "United States" includes the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any territory or possession of the United States.

SEC. 7. ENFORCEMENT AND PENALTIES.

(a) AUTHORITY OF THE PRESIDENT.—The President shall take the necessary steps to ensure compliance with the provisions of this Act, including establishing mechanisms to monitor compliance with this Act. In ensuring such compliance, the President may conduct investigations, hold hearings, administer oaths, examine witnesses, receive evidence, take depositions, and require by subpoena the attendance and testimony of witnesses and the production of all books, papers, and documents relating to any matter under investigation.

(b) PENALTIES.—(1) Any person, other than an individual, that violates the provisions of this Act shall be fined not more than $1,000,000.

(2) Any individual who violates the provisions of this Act shall be fined not more than $50,000, or imprisoned not more than 5 years, or both.

(c) ADDITIONAL PENALTIES FOR CERTAIN INDIVIDUALS.—(1) Whenever a person commits a violation under subsection (b)—

(A) any officer, director, or employee of such person, or any natural person in control of such person who knowingly and willfully ordered, authorized, acquiesced in, or carried out the act or practice constituting the violation, and

(B) any agent of such person who knowingly and willfully carried out such act or practice,

shall be fined not more than $10,000, or imprisoned not more than 5 years, or both.

(2) A fine imposed under paragraph (1) on an individual for an act or practice constituting a violation may not be paid, directly or indirectly, by the person committing the violation itself.

SEC. 8. TERMINATION OF THE PROVISIONS OF ACT.

The provisions of this Act shall terminate if the President certifies to the Congress that Angola—

(1) is making a concerted and significant effort to comply with internationally recognized human rights;

(2) has entered into discussions with its non-communist opposition;

(3) has established a body of laws that assures the full national participation of all the people of Angola in the social, political, and economic life in that country;

(4) has held free and fair elections not later than November 11, 1986; and

(5) all troops from Cuba, the Soviet Union, and any other Communist country have withdrawn from Angola.

SEC. 9. DEFINITIONS.

As used in this Act—

(1) the term "Angola" refers to the territory that constituted the People's Republic of Angola on November 11, 1975, and is represented by the Popular Movement for the Liberation of Angola-Labor Party;

(2) the term "branch" means the operations or activities conducted by a person in a different location in its own name rather than through a separate incorporated entity;

(3) the term "business enterprise" means any organization, association, branch, or venture which exists for profitmaking purposes or to otherwise secure economic advantage;

(4) the term "foreign affiliate" of a United States person is a business enterprise located in a foreign country, including a branch, which is controlled by that United States person.

(5) the term "investment in Angola" means establishing, or otherwise investing funds or other assets in, a business enterprise in Angola, including making a loan or other extension of credit to such a business enterprise;

(6) the term "United States person" means any United States resident or national and any domestic concern (including any permanent domestic establishment of any foreign concern);

(7) A United States person shall be presumed to control a business enterprise if—

(A) the United States person beneficially owns or controls (directly or indirectly) more than 50 percent of the outstanding voting securities of the business enterprise;

(B) the United States person beneficially owns or controls (directly or indirectly) 25 percent or more of the voting securities of the business enterprise, if no other person owns or controls (directly or indirectly) an equal or larger percentage;

(C) the business enterprise is operated by the United States person pursuant to the provisions of an exclusive management contract;

(D) a majority of the members of the board of directors of the business enterprise are also members of the comparable governing body of the business enterprise of the United States person; or

(E) the United States person has authority to appoint the chief operation officer of the business enterprise.

THE LESSONS OF GRENADA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington [Mr. MILLER] is recognized for 60 minutes.

Mr. MILLER of Washington. Mr. Speaker, I am joined this evening by my distinguished colleague, the gentleman from Texas, Mr. JOE BARTON. What we would like to do tonight is talk about the lessons of Grenada. You will recall just 2 years ago Grenada was in the news. I think Americans have a picture of American troops on the island. They have a picture and perhaps remember American students coming back to the United States and kissing the soil and remember all the arguments, the outrage and outcries from the Soviet bloc at the time, perhaps remember the arguments against our action in Grenada; remember those arguments that Grenada was a state which was just a popular democratic government, independent, nonaligned, had popular support, and that we should not be messing around down there. Those were the arguments given against the action that our President took.

Well, now it is 2 years later. This week by action of our body is "Lessons of Grenada Week."

This House, with support from both parties, passed a resolution the President is authorized and requested to issue a proclamation designating the week beginning October 20, 1985, as "The Lessons of Grenada Week," and urge the Governors of the several States and the people of the United States to observe such week with appropriate ceremonies and activities.

I think it is entirely appropriate and important that we do look at the lessons of Grenada and that is what Congressman BARTON and I will try to do tonight and look at some of the arguments that were made back then and see whether those arguments stand up and which ones.

It is amazing to me that very little has been written, comparatively speaking, about Grenada. I suspect this may be because the U.S. operation had the appearance of success and in this country we like to dwell on failures. Maybe that is why the news media, except for the brief flurry at the time of the invasion, has largely ignored this issue. Maybe that is why academics have not rushed to write about it; but this past year there appeared a fascinating document called "Grenada Documents, an Overview and Selection," put out by the Department of Defense and the Department of State.

□ 1945

These documents are selected from 35,000 pounds of documents that were seized after the liberation of Grenada. One would think, with the publication of these documents, that there would be enormous coverage in the news media, that academics on all of the campuses would be rushing to write about what was uncovered, but as I say, very little has been written.

Mr. BARTON of Texas. Mr. Speaker, will the gentleman yield on that point?

Mr. MILLER of Washington. I yield to the gentleman from Texas.

Mr. BARTON of Texas. I thank the gentleman for yielding.

Mr. Speaker, I am sure the gentleman, being a former member of the media, having a distinguished career in the State of Washington in the video broadcasting industry, might have an idea as to why there has not been more coverage of the information that the gentleman just referred to. Could the gentleman enlighten me on that point?

Mr. MILLER of Washington. The gentleman will remember that at the time of the invasion, the news media was very concerned about why they were not allowed to go with the first wave, but once that concern had subsided, and once the American troops had gone in and gone out, there has been, as I said, very little coverage.

The only conclusion I can come to explain this is that the American news media is very interested in understanding what goes wrong, as they should be; what goes wrong when our Government undertakes an operation. But there is not as much interest in looking at an operation that may have been successful.

The other reason may be that, if you look at these 35,000 pounds of documents, of which this is just a sample, it is hard going and there is nothing glamorous about sending a reporter to go into the archives and look at the minutes of the Politburo meetings of the Leninist Party of Grenada, to look at the minutes of the Central Committee meetings, to look at the memorandums the Grenadian Ambassador in Moscow sent back to his country, to look at the Prime Minister of Grenada's speeches, to look at the memos sent by the wife of the Cuban Ambassador to Grenada instructing the Grenadian Prime Minister on how to deal with the American Congress and the American news media. There is nothing really sexy or jazzy in poring over these documents. This is not what one would call a visual event. It is hard for television and radio to visualize this.

But the newspapers, I would have to say, have not done much better either. As I say, I guess this is not one of the assignments that reporters yearn for. But I think it is so important that we look at what went on in Grenada because, and I think this will come out, Congressman BARTON, as we further discuss this, what we have here is a lesson in how Leninism operates, how it operates in a small country, how it can operate not only without popular support but in defiance of popular support, how it operates connected with the Soviet Union in Cuba, and how it operates against the interests of free people, those who are free throughout the world.

Mr. Speaker, I will yield any time the gentleman from Texas wants to comment.

Mr. BARTON of Texas. If the gentleman would yield, I have a few comments I would like to make before we get into our dialog.

Mr. Speaker, Grenada was invaded on October 25, 1983. On October 26, 1983, I happened to be in our Nation's Capital. I was trying to make up my mind whether I wanted to make an attempt to become a Member of the U.S. House of Representatives. I had scheduled a list of appointments with some of the Congressmen from the State of Texas who were members of the Republican Party to discuss with them my qualifications and whether or not they felt it would be appropriate for me to try to join them as a colleague.

That was the day after the Grenadian invasion and I was struck, during that day, as I went around from congressional office to congressional office by the sense of pride that all of the Members of Congress that I spoke with, Congressman BILL ARCHER, Congressman JACK FIELDS, Congressman PHIL GRAMM, Congressman STEVEN BARTLETT, the sense of the pride that they had in being an American and the total support they had for President Reagan for making the decision to go in and offer such assistance as was necessary to liberate Grenada from Communist subjugation.

That helped me to make up my mind to seek membership in this great body, and there are some lessons from Grenada. Our distinguished colleague, the gentleman from Georgia, Mr. GINGRICH, has led the fight to have this week of October 20 to October 25, declared "Lessons of Grenada Week," and I am sure the gentleman knows how difficult it is to get the type of support that is necessary to get this kind of a resolution passed. He had to get 218 Members of both Democratic and Republican Party affiliations to sign their names that they felt that this was an important event and needed to be honored, celebrated, publicized, by having a week, and he was able to accomplish that.

So this is not an idle exercise in rhetoric. We feel, I feel, you feel, at least 218 Members of this body feel that it is important that the American people know that freedom has a price and we can point to an example near our shores where that freedom was almost taken away, and only because we were able to act and to free the Grenadians were we able to discover the depth to which the totalitarian regime of that country had fallen.

But one of the lessons of Grenada, in my opinion, is that the Communist Party has not changed. They still want world domination, and these 35,000 pounds of documents that the gentleman referred to earlier in his remarks are there for the press to look at, for the world to look at, to see the type of deceit that was going on vis-a-vis the Grenadian population and the world population at large with respect to what the Grenadian Government in existence at that time was up to.

There is no doubt if one takes the time, as the gentleman has and as I have and as other colleagues have to review even partially those documents, that Grenada was the second step. Cuba, Grenada, and Nicaragua were all part of a master plan. We have foiled the plan in Grenada. There are freedom fighters actually in Nicaragua, which I support and many of my colleagues support, and we need to remain vigilant because communism still has, as its A priority, No. 1 priority, world domination and we have to work daily to see that that does not happen.

During this week we will be debating and going through various points to highlight that. Today is "National Debate Day." Thursday is "National Memorial Day." Friday is going to be a day of celebration for the freedom that Grenada now has, and there will be rallies here in Washington and around the country to celebrate that freedom.

□ 1955

So I am here to discuss with you the various lessons of Grenada.

But the No. 1 lesson that we cannot forget is that communism still has as its first priority world domination. I will be happy to yield back to my colleague from Washington.

Mr. MILLER of Washington. I thank the distinguished gentleman from Texas for his comments. I recall, as he does, that time 2 years ago, and the tremendous pride that was felt at the time of the Grenada landing. I did not realize that it played a crucial part in the gentleman's decision to join this body. I am delighted to hear that.

Just picking up where the gentleman left off, one of the things that comes home to me when I look at some of these documents is the picture of Leninism at work in a small country. This is an island in the Caribbean of 110,000 people. If you look at the minutes of the Central Committee meetings, political bureau meetings, notes of the Prime Minister, Maurice Bishop, you get this picture of a very small, dedicated group of people imposing their will on a nation.

The number of people that helped take over the government, the armed coup was 40, 40 people. And once they get control, the first step, as the Prime Minister Bishop outlined in his speech to his party colleagues, which is one of the main documents in this volume called "Line of March For the Party," in the first speech, the first step as Prime Minister Bishop pointed out as soon as control was seized by armed forces was to call the so-called bourgeois elements in the country, democratic forces, religious groups, business groups, and to assure them that really there would be a pluralist society, there would be a place for them. And as Prime Minister Bishop explained to his comrades, this was necessary in order to lull these other elements of society into believing that this was not a true Leninist revolution. So this was the first step.

Then after taking that step, after bringing some other elements into the Government, but always making sure that the crucial decisionmaking bodies were controlled by Leninist forces, then gradually to edge these groups out. At first, to maintain civil liberties so as not to arouse suspicion, and once the consolidation of power, to slowly start putting political opponents in jail, to clamp down on the newspapers and the opposition press. Even with the economy, as the Prime Minister very candidly told his so-called comrades, "We have to move slowly. We must build, of course, State socialism. We cannot do it overnight."

So we leave the private sector, large parts of the private economy intact. The State takes over only certain portions of the country and the economy. But the goal in 5 or 10 years, of course, is to have total State control.

The whole attempt to make sure that different elements of society were watched and observed, you see reports in here describing different parishes in the country and describing by name people that were considered dangerous or "very dangerous." This type of spying soon started taking place.

Now, to do this, of course, this small elite group had to develop additional membership.

Mr. BARTON of Texas. If the gentleman will yield, does the gentleman from Washington have any information as to what happened to some of those people who were identified as dangerous people? Were they enabled to go about their business as usual? Were they imprisoned? Did they disappear and were their whereabouts unknown?

Mr. MILLER of Washington. Some were allowed to go about their business as usual. Some ended up in prison. Some were released after the liberation.

Mr. BARTON of Texas. When the gentleman says liberation, what is he referring to?

Mr. MILLER of Washington. I am talking about when American troops invaded Grenada. Some ended up being shot, mainly at the end of the regime's rule. This was a group that knew how to take power and keep it and, of course, one of the primary goals, as soon as power was taken, was educating of different cadre, the setting up of party schools to expound on Leninist principles, the sending of people to Cuba and the Soviet Union, the bringing of Soviet and Cuban advisers into the country to help with this educational process. So the Prime Minister, who was very candid about this, said "So that our young people can learn Leninist principles." And you see all of the cliches here if you read these documents: dictatorship of the proletariat, the party is the vanguard of the revolution, the importance of avoiding right and left opportunism, the importance of adhering to Leninist principles, even down to organizing in this Caribbean island mass celebrations of Lenin's birthday. I mean, this is how far, this is how far it went.

And of course, the attempts to first co-op and then to infiltrate potential opponent groups. It is hard to fathom, hard to believe on this peaceful Caribbean island it could go on. You see the lengthy memos on how to infiltrate, to woo, to win over, to co-op religious groups as a major project of the regime. Also how to infiltrate business groups and a constant effort by this small group to consolidate control. And of course, not only do you see Leninism at work in the island, but you see it at work when you read some of these documents. You see it at work abroad because, as you just mentioned, you have the Soviet and Cuban advisers coming in and out, and you have this conscious effort by this small nation to develop ties with Cuba and the Soviet Union, not to talk much about it. As the Prime Minister points out, "We cannot be too public," on a lot of these agreements. In fact, some of the documents are actually signed agreements between the Soviet Union and Grenada, between Cuba and Grenada, between North Korea and Grenada, and between North Vietnam and Grenada.

But always the reference to secrecy, to keep this secret, so it would not alarm Grenada's neighbors, and so not to alarm the United States.

Mr. BARTON of Texas. If the gentleman will yield on that. Is there not a secret document, or at least it was secret at the time, the secret mutual defense treaty between the Grenadians and the Soviet Union that only became public after we liberated the country? Is that not one of the documents?

Mr. MILLER of Washington. The gentleman is correct. There are two agreements. One is the top-secret agreement betwen Grenada and the U.S.S.R., and that is the title of it, 1980. The second was the top-secret agreement between Grenada and the U.S.S.R., 1982.

I would not call it a mutual defense agreement. The Soviet Union was very careful not to obligate itself to come to the defense of their comrades in Grenada. But what they did provide in these agreements was a massive quanity of arms.

Here is this nation of 110,000, you have in these agreements 2,000 submachineguns coming in, 6,000 uniforms, tremendous quantities of arms as a part of this process of building up Soviet and Cuban ties.

Mr. BARTON of Texas. If the gentleman will yield, I seem to recall photos immediately after the country was liberated of several warehouses chock full of automatic weapons and ammunition and small arms, far in excess of any legitimate defense needs of the country of Grenada. One could only assume that they were there to be exported to other countries in Central and South America, or to be used in uprising or to create some massive army on the island of Grenada itself that could be used for nondefense purposes.

Mr. MILLER of Washington. I am glad the gentleman from Texas raises that point, because as part of this Leninist approach, as part of the ties with the Soviet Union and Cuba, you see reading these documents the setting in motion of an attempt to export revolution. The gentleman mentions the caches of arms, and he will recall at the time of the liberation some said, "Well, so there are arms on Grenada, they are not modern missiles," and they are not. The point is they were weapons far in excess of what that government needed to control the country of Grenada.

Just to give one example, it did not arrive, but one of the top-secret agreements provides for the Soviet Union to send an airplane via Cuba to Grenada. The airplane was designed to hold 19 paratroopers that could be dropped anyplace.

Now the Leninist government of Grenada did not need an airplane to drop 19 paratroopers on Grenada, you can be sure of that. Here you have these other islands surrounding Grenada, many of which have no armies and, of course, none of them have sources coming anywhere near to what Grenada was building up. So you look at all of these arms coming in, you look at that plane designed to drop paratroopers, you read the minutes and you see the importance given to, as they say, preserving fraternal solidarity with their comrades in Nicaragua and El Salvador and the Soviet Union. You see the reference to the importance of Grenada assuming a regional role and supporting revolutions elsewhere, and there is not the slightest doubt when you read these documents to know that the ultimate aim, once the consolidation had been achieved on Grenada, was to start doing some island-hopping.

One of the parts that was particularly interesting to me, if the gentleman from Texas will permit me to just continue, the Grenadian Ambassador to the Soviet Union had many conferences with the Soviet military, and one of those conferences was with Marshal Ogarkov, the Soviet Chief of Staff. The Grenadian Ambassador reported back on those meetings, and in one of his reports, he tells his comrades in Grenada, "The Marshal said that over two decades ago there was only Cuba in Latin America. Today there are Nicaragua, Grenada, and a serious battle is going on in El Salvador."

This was the context of the Soviet military aid to Grenada. This was the context of all of the liaisons and conferences between Soviet military personnel and Grenadian military personnel. This was the background, the backdrop that we have to understand when we hear and read of numerous Grenadian soldiers being sent to Cuba and the Soviet Union and other places for training.

So I think the gentleman from Texas makes an excellent point when he talks about one of the lessons of Grenada being that when you have a Leninist regime, when you have a regime with ties to the Soviet Union and Cuba, you do not have to guess about what is going to come next. Next is going to be an attempt to subvert neighbors of the regime. Next is going to be an attempt to export violent revolution.

As I reflect on what some of these lessons are, and we do not have time this evening to go into all of these documents, but I should point out that if somebody wishes to get a copy, they were published last year by the Department of State and the Department of Defense. These are no longer classified. These can be acquired from your U.S. Government. If somebody is interested, they can write to the State Department or the Defense Department, and I am sure they would, I hope they would get a prompt answer.

□ 2010

I think back: Well, what are the lessons of Grenada? I think the first lesson is that we should be skeptical about some of the arguments we hear

when there is a regime with ties to the Soviet Union; a new government that is trying to make overtures to the Soviet Union.

I think back to those arguments. As I mentioned in the beginning, the arguments we heard against the President's action, you know: "It's not a real Leninist regime." Well, we know that it was a real Leninist regime, that the argument that it was no threat to its neighbors; well, we know it was a threat to its neighbors.

The argument that it really had popular support; some popular support. Took power with 40 people participating in coup. After the invasion, a poll on the island showed 90 percent of the people favored the invasion, and then elections were held the following year, the successor of the Leninist party in Grenada got 5 percent of the vote.

Yet, there were magazines in this country saying, "Well, this may be a bad government, but the people really like it." Of course, they did not, and when they had a chance to choose another way, they did choose another way. So I think that is a lesson.

Now I do not mean by that that we should automatically be opposed to any revolution. There is enough repression and injustice in this world that I would have to say that there can be and there are some revolutions that are not Communist inspired, that are not Communist controlled. We have to make judgments.

When a revolution takes place, and the leaders start spouting Leninist cliches, when a revolution takes place and the leaders start making trips to Cuba and the Soviet Union, when a revolution takes place and the leaders start bringing in Soviet arms and Cuban arms and advisers, then we better watch out.

I think another lesson of these documents and a lesson of Grenada is a very healthy respect for the power and effectiveness of Leninism at work. We cannot underestimate Leninism. It is very easy to say well, this is a poor Caribbean country—what do such people know about Leninism? These cannot be real Leninists.

Yet we see how a small group of people with proper training for the most part in Cuba and the Soviet Union were able to impose their will on 110,000 people; and not only that, from 1979 when they took over until 1983, for 4 years they ruled Grenada. Despite the fact that only 5 percent may have supported them; they were able to keep control.

If it had not been for the invasion and liberation, we have to ask ourselves, "Where would Grenada be today?" So one of the lessons to me is, "Do not underestimate Leninism at work even when it is in the Third World."

Mr. BARTON of Texas. If the gentleman would yield on that point, if the gentleman from Washington would come with me to my district down in Texas, and we went out on the street and polled 10 people and said, "What do you think of Leninism?" We would probably get eight or nine people that did not know what Leninism was.

If the gentleman would go with me and poll 10 people and say, "What do you think of communism?" I think we would get 10 people in short order who would very emphatically say that communism was bad news.

I feel that perhaps one of the problems and the reason that the Communists took control too easily and rapidly in Grenada was because they cloaked their action in phrases like Leninism and proletariat of the people, and did not actually admit that they were Communist and that their goals were totalitarian domination of the people; and in this body we have a proclivity for speaking in high-blown phrases when sometimes we would be much better off if we would get right to the heart of the matter and call a Communist a Communist; a totalitarian a totalitarian.

Mr. MILLER of Washington. The gentleman from Texas [Mr. BARTON] makes an excellent point. Of course the Grenadian leadership; occasionally they slipped up and used the word "Communist"; you see it in these documents; but they avoided that word. They avoided that word because of course in the Communist ideology a country like Grenada where there had just been a seizure of power was not considered Communist yet. The complete consolidation of power had not taken place; the whole economy had not been seized. Every civil liberty had not been repressed, so they were reluctant to call themselves Communists.

Mr. BARTON of Texas. In public.

Mr. MILLER of Washington. Yes. They preferred the term "Marxist-Leninist," and of course actually I think in looking at it we ought to underline Leninist, because all these concepts of the dictatorship of the proletariat, the party is the vanguard, the whole concept of suppressing the opposition of course derived primarily from Lenin, not from Marx.

The gentleman from Texas [Mr. BARTON] does make a good point. I think in our country there is a need of course to learn about our own democracy, our own history, but looking at what has gone on in the world in the last 50 years, looking at the struggles we are now involved in, I think it is important that we learn about communism. It is important that we learn about Leninism; it is important that we learn about Marxism. It is important, getting back to the gentleman's point, it is important that we learn how these words are manipulated and maneuvered; very important.

I just wish that some of our colleagues would have some more courses on Marxist-Leninism and communism, but particularly in how it works in Third World countries, how it works in nations like Grenada.

Mr. BARTON of Texas. If the gentleman will yield one more time.

Mr. MILLER of Washington. I would be happy to yield.

Mr. BARTON of Texas. I appreciate the graciousness of the gentleman from Washington [Mr. MILLER].

Speaking of colleges has brought to mind one of the events that is transpiring in the Lessons of Grenada Week, and that is seminars and policy discussions on our Nation's college campuses. I have a list here of over 100 college campuses that are going to be holding some sort of a seminar or discussion of the lessons of Grenada. Time does not permit that I go through all of the list.

Mr. MILLER of Washington. I was just going to suggest, I am so delighted to hear that, I was going to suggest that the gentleman from Texas [Mr. BARTON] read some of the groups and colleges. This may inspire others who are not participating to hold sessions or meetings.

Mr. BARTON of Texas. I would be more than happy to. The University of Akron; University of Arkansas; University of Auburn; Baylor University in my State; Bowling Green; Central Florida; University of Cincinnati; Clemson University; Colorado State; the University of Colorado at Boulder; Dallas Baptist University; Dalton College in Georgia; Dartmouth College; University of Denver; Duke University; University of Florida; Florida State; George Washington University here in the Nation's Capital; Georgia State; Harding College in Arizona; Illinois State University; Johns Hopkins University in Baltimore, MD; University of Kentucky; University of Maryland; University of Missouri; University of Michigan; University of North Carolina; North Carolina at Wilmington; Northwestern University; Ohio State; Oklahoma State; Portland State in Oregon which is close to your home State of Washington; Purdue University where I went to graduate school——

Mr. MILLER of Washington. All of these colleges are holding meetings or classes on Lessons of Grenada Week?

Mr. BARTON of Texas. To date, this is a somewhat dated list, but there are over 200 universities on this list, and we expect that an additional 200 to 300 will hold some kind of an event this week.

So there are universities throughout the length and breadth of our great Nation that have felt that it is important to expose to their college students some of these lessons which you

and I have been talking about this evening.

Mr. MILLER of Washington. That reminds me of an incident that took place a couple of days ago and I think drives home the point that the gentleman from Texas and I are trying to make about the need to increase our knowledge of communism and Marxist Leninism.

□ 2020

You will recall a few days ago the Nicaraguan leader, Daniel Ortega, announced that Nicaragua was going to be suspending various civil liberties and civil rights. That morning I read an article in the Washington Post, and it reported what had happened, and then it got to the interpretation part of the article, and it offered various reasons for why this might be the case, why the Nicaraguan Government was taking this action.

I heard a radio news report, a Mutual News network report, along the same lines. But with all the explanations that Mutual News gave or the Washington Post gave as to why Ortega or the Nicaraguan Government was taking these actions, the one explanation they did not give, and that explanation was: Maybe this is a Marxist-Leninist government that is just following the Leninist road. Maybe this suppression of civil liberties is because it has been planned all along. Instead, there were all sorts of interpretations that, "Well, maybe the war against the Contras was not going well," or, "Maybe they were upset with the United States, maybe the church has upset them."

But nowhere did one of these, at least these two news media outlets, say, "Well, you know, this is the way a Marxist-Leninist government operates after it starts to consolidate power. It slowly starts to take away liberties."

So that tells me that it is not just on the college campuses of this country that we need more knowledge of what goes on in places like Grenada.

Mr. BARTON of Texas. If the gentleman will yield, there are other organizations in this country that this week have agreed to participate in the lessons of Grenada Week.

I will read again not totally but just some: United States Jaycee's, Lions International, Moral Majority, National Association of Evangelicals, American Coalition for Traditional Values, Campus Crusade for Christ, Freedom Council, Council for Inter-American Security, American Conservative Union, Citizens for Reagan, Free the Eagle, Young Americans, College Republicans, Young Conservative Alliance, Students for America, Young Social Democrats, Coalition for Democracy in Central America, National Center for Public Policy Research, U.S.A. Foundation, Conservative Youth Foundation. Those are just a few of the organizations that feel it is important to get the message out.

Citizens for Reagan has a bumper sticker, and I am sure the gentleman has seen some of these on cars in his district, I have seen them down in Texas: "Grenada Liberation Day October 25, 1985, Two Years of Freedom." That is just one example of the type of things and events and publicity that we are trying to give this week.

Mr. MILLER of Washington. Mr. Speaker, I thank the gentleman from Texas for his comments. Hopefully there will be another volume of these documents out shortly, and I hope that this week we will at least in some small way focus not only on the joy and exultation we felt at the success of the Grenada operation but also the lessons of Grenada. And when the gentleman from Texas reads about all these events I am just delighted. I hope that it will continue next year. I hope more scholars will start poring over these documents, more students will start reading them, more members of the news media will start having them as background material, because I think if we all focus more on what happened in Grenada and take advantage of the materials that are available to us, I think we will be better prepared to protect the liberties and freedoms that we so very much cherish.

Mr. Speaker, I yield back the balance of my time. I thank the Speaker for his attention.

GENERAL LEAVE

Mr. MILLER of Washington. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the subject of this special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

GRAMM-RUDMAN-MACK AMENDMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. BARTON] is recognized for 60 minutes.

Mr. BARTON of Texas. I thank the Speaker for recognizing me.

Mr. Speaker, I promise I will not take the entire 60 minutes.

I would like to speak this evening on an item of utmost importance not only to the present of this country but to the future of our great country, and that is the conference committee that is now in progress between the House of Representatives and the other body of Congress with regard to agreeing to or disagreeing to the Senate resolution with regard to the Deficit Reduction Act and raising the debt ceiling to over $2 trillion.

The conference committee is meeting today. It has to finish its work by November 1, which is the date that the money literally runs out. If we cannot reach agreement with the other body between now and November 1, we will run out of money, we will have to shut the Government down, and that will have negative consequences that no one wants.

The legislation that is under consideration is commonly referred to as the Gramm-Rudman-Mack bill. I have the bill with me, House Joint Resolution 372. I will be referring to that this evening in my remarks.

I was able to earlier, in a special order that Congressman FRANK of Massachusetts held on the same subject, to enter into a very limited dialog, a very limited debate about just what this bill does.

I would like to enlarge upon that, and I would like to begin by referring to a cartoon that my colleague from New Hampshire, "BOB" SMITH, showed me this afternoon on the House floor. It showed a nursery of children singing a song, and the song they were singing was, "We Owe the World, We Are the Children."

That is very, very true. We are literally mortgaging our country's future today to provide benefits today that we are not able to pay for.

Mr. Speaker, I have three children; I have a son, 15, named Bradley, a daughter, 10, named Alison, and a daughter, 3, named Kristin. They already owe, whether we borrow 1 penny more, they already owe somewhere between $50,000 and $250,000 to pay off the current national debt.

I do not want to saddle them with a liability, a financial liability that they literally cannot pay. For this reason I feel that the Gramm-Rudman-Mack bill needs to be passed. This Congress, this body, within the next 2 weeks needs to pass this legislation. Contrary to what some Members have spoken of in this body this evening, Gramm-Rudman-Mack is not going to eliminate poverty programs, it is not going to cause our poor to become poorer, our hungry to go without food.

In fact, the bill very specifically states that no program may be eliminated through this budget resolution process.

What it does state very specifically and succinctly is that each year we are going to have a deficit target and the deficit target for next fiscal year is $180 billion. That target declines by $30 billion each year until it reaches zero in fiscal year 1991.

I yield to my colleague from Washington.

Mr. MILLER of Washington. I share the gentleman's support for the concept of Gramm-Rudman-Mack, and I

was particularly interested by his reference to programs that help the poor, because the gentleman will recall, just a short while ago in these Chambers we heard tremendous concern expressed about the poor, those that were hungry or homeless, sincere concerns, genuine concerns. I could not help thinking as I listened to these comments that it is so important to understand that when we talk about reducing the deficit, when we talk about adopting a framework such as Gramm-Rudman-Mack, we are talking about doing something that will help not just the wealthy, not just the middle class—though, yes, it will help them and should—but it will help the poor. Who is going to suffer? Who is going to be hurt the most if we do not bring this deficit under control? Who is going to be hurt the most if, 5 or 10 years from now, that interest on the national debt keeps rising every year so that 50 percent of our Federal budget then will have to go just to pay the interest on the national debt? What is going to happen then? Either massive cuts in spending that will make anything we are talking about now seem piddling or massive tax increases, and who is going to be hurt then, 5, 10, 15 years down the road when that deficit comes home and those incredible tax hikes and incredible spending slashes take place?

Now, this country is no longer a land of opportunity but a land of misery. Are not the poor going to be the ones that will suffer just as much or more than anybody else?

Mr. BARTON of Texas. I would suggest to my colleague from Washington that the poor would suffer, senior citizens would suffer, my children would suffer, your children would suffer. We would all suffer.

I think we would subject our great Nation to a situation similar to that which occurred in the Weimar Republic in Germany immediately after World War I in which spending got out of control and hyperinflation resulted and which eventually led to the downfall of democracy in that country and the institution of nazism.

I am not suggesting that that would occur in that particular form in this country, but I think our society would be put under such tremendous strains that it would require changes the like of which we have no way of knowing the ultimate outcome.

What upsets me is that it does not have to be. Gramm-Rudman-Mack has a mechanism that shares the cuts that are going to have to be made, proportionately across the board. It exempts no programs except for Social Security. Social Security is exempted because of the simple fact that it has its own dedicated trust fund. No other program in our Government at the Federal level has that.

Gramm-Rudman requires that the President submit a budget at the beginning of the budget cycle that is within the deficit targets. Under today's Budget Act of 1974, the President does not have to do that.

So the President has to set out his spending priorities within these targets, submit them to the Congress, and the Congress acts on those targets.

□ 2035

If the Congress disagrees with spending priorities, the Congress is free to change those priorities, so long as every place it increases a program it makes a corresponding decrease in another program so that the ultimate result is a total budget that is within the budget deficit ceiling, which like I said earlier, is $180 billion for fiscal year 1986 and then declines by $36 billion each year until fiscal year 1991.

Now the point has been raised that defense would not accept proportional cuts. In my reading of the bill, that is not true. The cuts are proportional across the board. To the extent that the spending exceeds the deficit, half of the cuts have to come out of discretionary spending in every category and half of the cuts have to come out of automatic COLA increases. That does not tell me that defense is going to be spared and the social programs are going to be hit too heavily. It tells me that it will be across the board.

The point has been made that the President could veto the budget reconciliation bill.

No. 1, if the President vetoed the budget reconciliation bill, the Congress can override that veto. No. 2, if the President and the Congress act responsibly in the beginning, there is no reason for the President to veto in the first place.

If you look back on the lack of spending restraint that prior Congresses have shown, you will see that we have not had a balanced budget in this Congress since I believe fiscal year 1969 or 1970.

This Nation was founded in the late 1700's. We had our Constitution enacted in 1787, I believe. It took over 200 years to get the first trillion dollars added to our national deficit. In 1979, we reached a trillion dollars in the national deficit. It only took 6 years, in 1985, to reach $2 trillion—1986, maybe 7 years, to reach $2 trillion.

So it took 200 years for the first trillion, it has taken 6 or 7 years for the second trillion; if we do not enact something like Gramm-Rudman-Mack, it will only take 2 or 3 years for the next trillion, and then a year for the next trillion. Where will it end?

I will point out to my colleague from Washington that our total gross national product in the United States of America, which is the largest economy in the world, is somewhere between $4 trillion and $4.5 trillion a year. Now we already have a national debt that is going to exceed $2 trillion. We have interest on that debt approaching $150 billion. It is the fastest growing part of the Federal budget. The interest on the national debt is the fastest growing part of the Federal budget. Last year it grew at the rate of $13 billion a year.

Now when our distinguished colleagues of this body come before us and talk about the need for programs, whether they be in the defense area or social services area, whatever, I would point out that if we could spend an additional $13 billion on poverty in this country, we could do a lot. But we cannot because we have to pay that to pay the increase in the national debt. If we cannot get spending under control, we will not be able to institute any new programs of any kind. All additional revenues will go to the voracious increase in interest on the national debt.

Now, I support Gramm-Rudman-Mack because it is an alternative. It is a program. It is implementable. It will work.

My colleagues that have pointed out some of the potential flaws in this program have not come up with an alternative.

Mr. MILLER of Washington. Mr. Speaker, will the gentleman yield?

Mr. BARTON of Texas. I am happy to yield.

Mr. MILLER of Washington. It is ironic that those who criticize Gramm-Rudman-Mack do not offer a framework of their own for bringing us down to zero deficit, is it not?

Mr. BARTON of Texas. It is ironic.

I would also think it is somewhat ironic that less than 2 weeks ago in this very Chamber we passed a motion to instruct to the House conferees on the Gramm-Rudman-Mack bill that instructed them to support the principle embodied in Gramm-Rudman as it passed the other body. And some of those very same Members have been on this floor today beginning to talk against it. They voted for it less than 2 weeks ago, and now they are out working to torpedo that very motion to instruct that they were so much for less than 2 weeks ago.

Sadly, many of those Members are members of the majority party, the Democratic Party, which has a proud tradition in our country's history of trying to help people. I would hope that the majority of the Democratic Party would support the conferees in the motion to instruct and pass Gramm-Rudman or something very similar to it so that we can get spending under control. If we cannot do it now, when can we do it?

Mr. Speaker, I yield to the gentleman from Georgia.

Mr. SWINDALL. Mr. Speaker, I thank the gentleman.

I just came down because I heard the gentleman was talking about Gramm-Rudman, and I was sitting in my office reading the morning Atlanta Constitution, my local newspaper in Atlanta. I noticed that on the second page there was a story about a number of our Democratic collegues who had come to Georgia State University in Atlanta to talk about basically why the Democratic Party had failed to lure the younger vote.

One of our colleagues made the statement at this particular forum that it was basically the Reagan administration that had accumulated this deficit, an unprecedented deficit.

And as I read that, first of all it struck me that certainly that is a very naive statement to say that any one man is capable of amassing a deficit of the magnitude that we speak about when we say $2 trillion.

But second, it occurred to me that if, in fact, our colleagues on the other side of the aisle are as aggrieved by the magnitude of this deficit as they state they are, then certainly they should be here with us tonight and every opportunity that they have to talk about at least the concept of Gramm-Rudman, because at this point it is of no value whatsoever to continue to try to place the blame on the President, on the Senate, on the House or anybody. The point is we have got to start trying to find the solution.

As I start thinking about the problem, I am reminded of a family that lives in northwest Atlanta, or did up until just several years ago, who inherited a very large and spacious mansion, a beautiful mansion that had been in the family for years and years. They moved into this mansion.

After staying there for about a year and a half, they began to recognize that no matter how much they cut their expenditures, no matter how much they tried to increase their own earnings, they simply could not make ends meet. And they worked and they worked and they worked, and they became slaves to this mansion trying to keep it up.

Finally, they all gathered together, the family did, and said, "You know, we were really a lot happier before we got this mansion, because we have become slaves to this structure. And the truth of the matter is that no matter how hard we labor and no matter how many fundamental decisions we make in terms of cutting our living expenditures and whatever, we simply cannot afford this mansion."

Then they made one of the wisest decisions of their lives. They sold the mansion and moved into a structure that they could afford. Since then their lives have been substantially happier.

In so many ways, I think that is exactly what we have done in this country. We have constructed this structure that literally makes it impossible for us to maintain. We cannot maintain this structure that the last 30 years of social policies have created. And the truth of the matter is that until we recognize that, we cannot revenue our way out of it and we cannot cut our way out of it; we have to attack the structure itself.

Mr. BARTON of Texas. I could not agree more with my colleague from Georgia.

There is a comic strip character named Pogo, and Pogo makes a statement at some point in the comic strip that we have met the enemy and he is us.

And the enemy is us. The Members of this body have voted for one program after the other over the years because our way of compromising instead of making a choice between this program and that program, we chose to fund both programs.

□ 2045

And when there were decisions as to how much to fund, we chose the higher level, and we have promised too much to, too many for too long. We have got to begin to prioritize and to make some decisions about how to spend the scarce Federal resources that are at our disposal. Gramm-Rudman-Mack does this, and it does it across the board. It very specifically states that no one program can go below zero. It very specifically states that all of the cuts have to be proportional, and no cuts occur, as far as automatic cuts, unless Congress does not meet these deficit targets.

I would like to yield to my colleague, the gentleman from Washington.

Mr. MILLER of Washington. I am listening to the gentleman from Texas and the gentleman from Georgia, and I am struck by the critics of Gramm-Rudman-Mack. Some of them say it goes too far, and some of them say it does not go far enough. We heard earlier on the House floor those who felt it went too far, that it picked on social programs, it would hurt the poor. I think, as the gentleman from Texas has ably explained, it does not pick on anybody, it tries for an across-the-board approach. Obviously, it has to be an across-the-board approach if we are going to make a dent in this deficit. But then there are other critics who say, well, Gramm-Rudman does too little; after all, if you had the will to make these cuts, we would not need Gramm-Rudman, and Gramm-Rudman does not make the cuts and it does not require Congress to do it.

Of course, there is a grain of truth in that. Gramm-Rudman is a framework, and Congress does not have to follow it. But when you look at how Congress has failed to make the reductions, one has to conclude that a framework at least offers some hope. If we can get the framework, maybe we will get the cuts. Even better, if we can get a balanced-budget amendment to the Constitution, that will make sure that we get the cuts.

I think Gramm-Rudman-Mack offers hope, and the balanced-budget amendment to the Constitution offers to make that hope a reality. I hope that the Speaker of this body will allow us to vote on both proposals, because I think a combination of the framework and the constitutional amendment, the framework of Gramm-Rudman-Mack and the balanced-budget constitutional amendment, that combination will finally bring this body to make the decisions that it has been unable to make.

Mr. BARTON of Texas. The gentleman from Washington makes an excellent point. I could not agree more with him. I would point out that the Gramm-Rudman-Mack bill is a temporary bill, it is a 5-year bill. It expires in fiscal year 1991. That gives us time to pass the balanced-budget amendment. Congressman LARRY CRAIG of Idaho has got such an amendment. He expects very shortly to have 218 cosponsors. If those 218 cosponsors will sign a discharge petition, we will get the vote on his balanced-budget amendment in this Congress, and I hope we do.

If we combine 5-year emergency reduction act embodied in Gramm-Rudman with the balanced-budget amendment, as the gentleman from Washington talked of, we can get a handle on Federal spending. And once we get a handle on Federal spending, then we can begin to make these priority decisions, and then we may begin to fund some of these new programs, to have additional funding for some of the programs that many Members of this body feel so devoted to, but only if we get a handle on spending right now. And right now, spending is out of control. This body has shown itself incapable of showing any kind of financial discipline. It has just piled spending on top of spending and financed it by borrowing more and more money.

Mr. MILLER of Washington. Mr. Speaker, will the gentleman yield?

Mr. BARTON of Texas. I yield to the gentleman from Washington.

Mr. MILLER of Washington. What the gentleman from Texas is saying, I take it, is that in an ideal world, Congresses over the past 30 or 40 years would have made those tough decisions and we would not need either Gramm-Rudman or the balanced-budget amendment. But human nature being what it is, those decisions have not been made by Congresses, and that is why we need the framework of Gramm-Rudman-Mack, and that is why we need the balanced-budget amendment.

Mr. BARTON of Texas. That brings to mind a comment that the distinguished Senator from Massachusetts in the other body made when this was being debated in the other body. He said, "We sit here arguing about what kind of fire extinguisher to use while the fire rages out of control." And we now have a fire extinguisher. We do not have an acceptable alternative. To my knowldege, there is not even another alternative being proposed. So let us use Gramm-Rudman and begin to put the fire out.

Mr. SWINDALL. If the gentleman will yield, I am glad the gentleman mentioned the distinguished gentleman from Massachusetts, because I think that the fact that he, a Democrat, is supporting this bill really gets to the heart of this issue, and that is that this is not a Republican issue, this is not a Democratic issue, it is not a conservative issue, it is not a liberal issue. I think it can best be framed by being stated that it is either a responsible issue or an irresponsible issue. That is really the watershed in this debate. Are we going to be responsible for our action? Or are we going to continue with the same vein of irresponsibility that we have followed for years now?

One of the things that I was most intrigued by was the budget process, because as I began to talk to individuals—and I will just take one example, the agriculture portion of the budget—I looked at individuals that I knew to be on the Agriculture Committee. I said, "Let me ask you something. Is this realistic?" I think it was about $18.9 billion. And the individual said, "Well, not really." I said, "Well, how can you pass this budget?" He said, "Because we will come back and get a supplemental later."

The truth of the matter is that budget means nothing. It is simply some procedure that we go through each year, so that we can tell the public that we have met our responsibility of saying what we are going to spend money on and how much, and they believe us year after year after year, but they do not watch, because we hide it with these various supplementals that keep throwing the budget way out of kilter. And all in world Gramm-Rudman says is, let us have truth in budgeting. We have truth in lending, we have truth in everything else. Why do we not have truth in budgeting, so that when we establish a budget we tell the American people we are going to live by it, and if we do not live by it and we are fooling the American people, then this procedure automatically makes us live by it. How could anyone be opposed to that?

Mr. BARTON of Texas. The gentleman from Georgia makes an excellent point. He brings to mind a question that I have been asked in my district about the Gramm-Rudman proposal. The question goes as follows: Under the current Budget Act that we have, theoretically a balanced budget is required. In practice, we waive that here on the House floor almost daily. By a rule from the Rules Committee we waive the Budget Act. What would prevent us from waiving the requirements of Gramm-Rudman?

Very simply, under Gramm-Rudman you cannot just waive the act by a rule of the House of Representatives. In order to waive it, Congress has to declare a national war, a recession has to be predicted by both the Office of Management and Budget and the Congressional Budget Office, or the Congress has to pass a law, the House of Representatives has to pass a law waiving the requirements of the act. The other body of the Congress has to pass the identical law, and the President of the United States has to sign that law. If those three events do not happen, then you cannot waive the requirements of Gramm-Rudman-Mack.

Mr. SWINDALL. If the gentleman will yield, there is one other point that I think is very apropos at this point, and that is this point: If the President, which I am confident he will, vetoes such a bill, it comes back to this House, and I am confident that we can find one-third that will sustain the veto. The reason I am confident is, the gentleman from Texas remembers we sent a letter to the White House, a number of us, 154, if I remember correctly, signed that letter, stating we would sustain his veto on any appropriation measures that was a budget-buster.

So my point is, that is the major differentiation between what has been happening under the Budget Act of 1974 and what will happen once Gramm-Rudman is passed, and that is if the President vetoes it, we can sustain that veto, but we cannot get necessarily the 50 percent, plus one votes that are necessary to prevent waiving the rule the way we do year after year, after year.

Mr. BARTON of Texas. I feel very confident that we would be able to sustain such a vote if the President did veto such a bill.

I notice that my distinguished colleague from Texas, Congressman ARMEY, is in the Chamber. I would be happy to yield to him for any remarks he cares to make on this issue.

Mr. ARMEY. I thank the gentleman for yielding.

Of course, I would like to begin my remarks by applauding the gentleman for taking out this special order. I have been sitting here listening to the debate. I think one of the things I would like to point out is that there have been four of us now in this special order that have spoken, and I think every one of the four of us is a new Congressman. We represent a cross-cut of the Nation, of course. We have Washington State, up in the Northwest, we have Georgia in the Southeast, and of course we have the great State of Texas, which amounts to three-fourths of the land surface of the United States. Everything else is called "ain't Texas." So I think, JOE, you and I can represent a good point of view. Nobody has ever suggested that people from Texas are reluctant to speak more than their fair share of the time.

Let me just make a few comments. I have been watching the debate. I think one point you are making is very clear. We have the deficit problem and the $2 trillion debt because we have lacked discipline. Gramm-Rudman-Mack gives us a framework where discipline will be imposed on this body. We will have to work within limits.

Now, one of the problems that I perceived over the past 10 years is that the House of Representatives, indeed the entire legislative process, has not recognized that the Federal Government has to live within its limits, just as you and I do in our homes.

Now, all of a sudden, we will have defined limits. Then we are faced with a problem: in order to live within those limits, must we either raise taxes or cut spending? And there is really going to be no two ways about it, because the borrowing option will be removed from us.

One of the concerns I have is—you talked about are there other alternatives being suggested to the Gramm-Rudman-Mack proposal—that the conference may recommend an alternative that will encourage tax increases.

Now, say what you want, the numbers have proven to us, economic theory proves to us, cold, calculating logic proves to us, that if you cut taxes and if you let the working men and women of America take more money home, they will work harder. You and I do it. I remember when I was young, I used to turn down overtime because the tax bite did not make it worth my time, Reduce the tax bite, and I will work harder. American working men and women are trying to provide a better living for their families. They want to do it themselves.

We are not a nation of freeloaders, We are a hard-working Nation, and we do want the right to earn our own living and to keep what we earn. So we must avoid tax increases as an option to fulfilling these deficit targets.

The other is spending cuts. Now, one of the things I would like to suggest to you that this body begin to do is to think not only in terms of more or less spending, more or less of the same old programs, but let us talk about less spending on better programs. I will give you an example. We do want to subsidize the incomes of the needy people in America. We need to do that.

Any compassionate nation must care for its truly needy. And certainly this Nation will accept that responsibility. We have several programs by which we attempt to do this. One, in particular, I might spend a moment on is the Food Stamp Program.

Now, actually, what we do with the Food Stamp Program is, we spend too much money giving a subsidy that is not very effective in terms of the individual recipients because of the limitations we impose on them, a program that allows for and encourages and even in some cases demands cheating on the rules of the program—and we have all heard these stories—and also make it possible for greedy people to cheat on the qualification requirements.

Now, I think it is time we accept this fact. Nobody is going to deny it. People see it all the time. We know cases in point. There are welfare cheaters in this country. Now, what do they do? They qualify on the basis of trumped-up qualifications, and our law is not tight enough to not allow this.

Now, who gets hurt? Well, obviously the taxpayer. I, for one, and I believe, JOE, you, and I am sure the gentleman from Georgia, or any Member of this House, are perfectly understanding of the requirement and the necessity, the moral necessity of us as individuals to care for the truly needy. But by the same token, if we allow greedy people, without justification, to avail themselves of this care and of this subsidy to their income, we are doing the greatest harm possible to the needy because we allow them to be crowded out. We allow prejudice to be built up against them. I have seen that prejudice myself. I think it is terribly unfortunate. With the Food Stamp Program, we take the most distressed people in America, the people who really and truly do need a compassionate, helping hand, and we make these people a marked person in today's grocery lines.

□ 2100

Because the public at large know the cheaters are out there they become cynical and skeptical of everybody. I have seen a mother with her two children and people that to me seemed obvious to be in need be subjected to scorn because they had the food stamps in the grocery line and they were identified. I think that is one of the greatest tragedies of all.

We spend too much money; we do not differentiate between the really needy people in the Nation and those who would cheat on this largess. We allow then the needy people to have less resources for their income support and maintenance, and we leave them as marked people, subjected to all forms of humiliation.

What is a better way? We can actually reduce spending if we reform the whole concept, we reform the whole approach and the approach has been recommended years ago. It is not something new; we have understood it in this country. Milton Friedman suggested it years ago, the negative income tax. A device by which we can indeed differentiate between those who need and those who do not. A way to get a greater increase in well being to the recipients per dollar of expenditure. More fairness to the taxpayers.

An ability for the individual recipient to be the best judge of how he or she will support their family. An opportunity for the poverty mother, that female head of a poverty household, to avoid the 150-percent tax penalty that falls on her if she does try to work her family up the occupational ladder. There is a better way to do this, and we can take the Gramm-Rudman-Mack initiative, put in place then the limits and then respond to those limits with a new sense of creativity, a heightened sense of compassion and understanding, and a greater awareness of how it is we can be fair not only to the truly needy people in America, protecting them from the abuses of the greedy in our country, and at the same time protect the rights of and have a compassionate use of the taxpayers' dollars.

That is the challenge that I see coming to this Congress after Gramm-Rudman. That is the challenge that I see the creativity in this Congress able to meet. What we have got to do now is accept the challenge, impose the discipline, use the creativity, and with less of our taxpayers' dollars, do a better job of helping the needy people in America defend our Nation, and create a more prosperous economy for all of us.

This is what I see as the hope that springs following Gramm-Rudman. Again, I would like to congratulate you for having the initiative to take this late hour, and it is a test of how much you do care about these problems that you are willing to be here this late.

Mr. BARTON of Texas. I thank the gentleman from the 26th Congressional District of Texas for his comments. I could not agree more. I would point out that the first step is to pass Gramm-Rudman, to get the conference committee that is now in session to agree to that amendment. To bring it back before this body, let us vote on it, send it to the President for his signature, and then begin the process of getting spending under control.

Mr. Speaker, the hour is late, I will not belabor the point too much longer. I would like to finish up by summarizing very briefly, once again, what Gramm-Rudman does do. It is a 5-year emergency deficit reduction act. It sets deficit targets each year for the next 5 years, beginning at $180 billion, declining to zero in fiscal year 1991. It requires the President of the United States to submit a budget to the Congress, that falls within these deficit targets. The Congress may change those spending priorities around, but the Congress is required to come within the targets.

If the Congress does not, and only if the Congress does not pass legislation that is less than the spending targets, then automatically, in order to bring spending in conformity with the targets, its discretionary programs are cut, half of the spending reductions would come from the discretionary programs, and half of the spending reductions would come from mandated entitlement programs. The cuts would have to be proportional; everything would be subject to being cut, except for interest on the national debt and Social Security. All other programs could be cut.

The President would automatically begin these cuts if the Congress had acted without, and then if the President wanted to propose different types of cuts, he could do so but then the congress would have the authority to override, to change those cuts.

If we pass this legislation in the near future, and we only have 10 days. We only have until November 1 to act affirmatively on this legislation because on that date all spending authority of the Federal Government runs out. All borrowing authority, I should say, the ability to borrow additional funds runs out.

But if we do that, then we have got a 5-year plan that will bring us back to a balanced budget. Hopefully, by that time we will have a constitutional amendment to our Constitution, requiring a balanced budget and we can go about the business of governing this country.

THE ABORTION ISSUE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. SWINDALL] is recognized for 60 minutes.

Mr. SWINDALL. Mr. Speaker, I had not planned to address this body this evening during special orders, and I recognize the lateness of the hour, but I did want to take just a few minutes to talk about a subject that is, hard as it may be to believe, even more important than the Gramm-Rudman bill. It is a topic that many of us really do not like to talk about. It is the topic of abortion.

I had not planned to talk about it today, but when I heard the rabbi from Miami deliver his prayer today, I was so inspired that I really felt it would only be appropriate to take a brief special order today to talk about that subject and the subject matter of his prayer.

In his prayer he made a very profound statement. That statement was, that one of the fundamental purposes of civil government is to assure truth, justice, and peace. Then he quoted from the Declaration of Independence. That portion that states that, "We hold these truths to be self-evident. That all men are crated equal. That they are endowed by their Creator with certain unalienable rights, among them life, liberty, and the pursuit of happiness."

He then went on to talk about how precious life is and how we so frequently murder human individuals and that murder seems to occur in spite of the laws that we have established.

I am impressed by his statement that the Declaration of Independence sets forth that fundamental truth because I think that in that Declaration of Independence is an issue that perhaps we have not focused on when we talk about the abortion issue.

□ 2110

And that is that our Founding Fathers had the wisdom and the judgment to use their words very carefully. In fact, one Supreme Court decision stated:

The men who framed the Declaration of Independence were great men, high in literary requirements, high in their sense of honor, and incapable of asserting principles inconsistent with those on which they were acting. They perfectly understood the meaning of the language they used and how it would be understood by others.

The point I would like to make is that in the Declaration of Independence our Founding Fathers very carefully chose their words to state: "We hold these Truths to be self-evident, that all Men are created equal." They did not say, "All Men are born equal." They said, "All Men are created equal."

The, "create," means to form. The significance of that, is that the same Declaration of Independence goes on to state, after making that profound statement: "That to secure these Rights, Governments are instituted * * * deriving their just Powers from the Consent of the Governed."

In other words, the purpose of civil government, even as our Founding Fathers drafted the Declaration of Independence, was then, and has always been, to protect human life, because individuals are created equal, and created with certain unalienable rights, among them the right to live.

After the Revolution, we know that these same men, or many of the same men gathered together, to draft the Constitution, and because they understood that we were not in this country a Democracy, they were, in fact, scared to death of a Democracy because they understood that in a free Democracy whatever the whim of the majority happened to be would become the law simply because the majority outweighed the minority. Rather, we chose to become a constitutional Republic, the significance being that our laws would be based on this Constitution, and that no one could change the Constitution arbitrarily or whimsically, but, rather, the Constitution could only be changed in a prescribed fashion, a very arduous fashion.

It was later, years later, that we saw the first true test of our Constitution. That test occurred when a number of individuals who were very concerned about slavery in this country challenged the institutionalized practice of slavery by stating that our our black brothers and sisters were entitled to constitutional protection because they were citizens or persons within the context and meaning of the Constitution.

Well, we all recall that the abolitionists were unsuccessful in their first attempt. That attempt was a judicial attempt, and in the Dred Scott decision, the Supreme Court rebuffed their attempt basically to forever prohibit slavery by holding that, the Constitution did not apply to our black brothers and sisters, because they were not persons as defined by the Constitution. In fact, if you go to the Dred Scott decision, which was decided in 1856, you will find that the crux of that case is contained in the holding found on pages 410 and 411, and follows under case head note 4 that stated that "a free Negro of the African race whose ancestors were brought to this country and sold as slaves, is not a 'citizen' within the meaning of the Constitution of the United States." Therefore none of these constitutional rights, including the right to freedom, attached.

Well, we recognized then, I think appropriately, that if we were a constitutional Republic and that our Constitution was to be above the manipulation of any group, even if it happened to be the Supreme Court, we could not allow that decision to stand. It was very obvious that the reason the Supreme Court decided, as it did, was because, quite frankly, the Supreme Court wanted to accommodate the socioeconomic pressures of the time. It would not have been very popular at that time to buck the system. So there in the Dred Scott decision they rendered literally, thousands of Americans to be without any rights whatsoever. Fortunately for us, we came along subsequent to that decision and amended the Constitution.

But what despaired those abolitionists at the time, history tells us, was the fact that as they read the Constitution, they could not find anywhere in the Constitution any definition of "personhood," and it despaired them worse that the Constitution, which was to be written or changed, only by the consent of the governed, was suddenly manipulated by seven of nine individuals on the Supreme Court.

It occurred to me a number of years ago, as I compared this with the Roe against Wade decision, the decision of the Supreme Court in 1973 that in fact legalized abortion on demand, that there was a glaring similarity between the holding of the Roe against Wade decision, and the holding of the Dred Scott decision. In fact, interestingly and ironically, the Dred Scott decision was a 7 to 2 decision, and in the Roe against Wade decision, it was also 7 to 2. But if you look at the Roe against Wade decision, you will find that the Roe against Wade decision, did not turn on the issue of the right to privacy, as so many individuals have argued to me that it did, because the right to privacy is secondary to the more fundamental right to life.

If you go to the Roe against Wade decision, which is found at 410 U.S. Supreme Court at page 156, you will see the argument that the Supreme Court first had to deal with. There it states:

The appellee and certain amici argue that the fetus is a "person" within the language and meaning of the 14th amendment. In support of this they outlined at length and in detail the well-known facts of fetal development. If this suggestion of personhood is established, the appellant's case, of course, collapses, for the fetus' right to life would then be guaranteed specifically by the amendment. The appellant conceded as much as on reargument. On the other hand, the appellee conceded on reargument that no case could be cited that holds that a fetus is a person within the meaning of the 14th amendment. The Constitution does not define "person" in so many words.

Further in the decision it states:

All this, together with our observation supra, that throughout the major portion of the 19th century prevailing legal abortion practices were far freer than they are today, persuades us that the word, "person" as used in the 14th amendment does not include the unborn.

So precisely the same whimsical 7 to 2 decision, forever changed the fate and the destiny of over 18 million unborn children in the United States, for since the Roe against Wade decision in 1973, over 18 million abortions have occurred. In fact, today one-third of all pregnancies are terminated in abortion.

My concern about that is that irrespective of how one might decide the issue of abortion, one must first look at the fact that we have gone about it, in a fashion that is totally contrary to our constitutional values, because in reality what we have said is that this Constitution is whatever the Supreme Court wants it to be. If we concede that the Supreme Court has a right to define "person" to exclude the unborn, in spite of the fact that the Declaration of Independence said that we are all created equal, with certain

unalienable rights, among them life, liberty, and the pursuit of happiness, that same Supreme Court may well one day take the next step and say, "Well, what about the quality of each individual even after they are born?"

In fact, I think Francis Schaeffer, the renowned theologian who died several years ago, said in 1972, the year before the Roe against Wade decision, that if we ever conceded the right to abortion on demand in this country, what would necessarily follow would be infanticide, and ultimately euthanasia, the theory being that once you devalue human life or make that a subjective decision by individuals on the Supreme Court, you have opened Pandora's box to the point that any type of subjective interpretation can change the meaning to fit the socioeconomic mores of the time.

□ 2120

In fact, we are well aware today that there is a very hot debate as to whether or not our children that are now, say, born with certain deformities have a right to live because they do not meet our subjective opinion of what constitutes the right quality of life.

We have also heard individuals argue that our elderly have an obligation to step aside, that they really ought not to continue to live because they have nothing to offer society. It is a very utilitarian viewpoint.

What frightens me about that is who is going to continue to make these decisions in terms of what is the right quality of life? A number of individuals have said that, in fact, we ought to continue to allow abortion under Roe against Wade decision, and the decisions that have followed simply because of these children that have been murdered, are not wanted. That is ludicrous on its face when you recognize that in Atlanta, GA, there is a 10-year wait list for infant adoptions.

I think the real issue is, wanted by whom? They may be unwanted by the natural parents, but they are certainly wanted by at least enough individuals, to make the wait list 10 years in Atlanta, longer in a number of other areas.

By the same token, I read in a Time magazine article several years ago that said individuals pay $40,000 to $50,000 for infant children on the black market. That is how difficult it is to find infants.

I talk to adoptive parents all the time that say they would give anything if they could adopt yet another child, but it is too difficult to find one.

What does that have to do with the prayer that I heard this morning? What it has to do with is that we have strayed so far from that ideal that we founded this Nation on, and that was the ideal that civil government was instituted to protect human life from the moment of creation forward.

Many people argue to me, "Well, how do you know at what moment creation occurs?"

Well, I do not have much difficulty with that, but even if I did, I think that same Constitution tells us that in this country we are fortunate in that we are innocent until proven guilty under our Constitution; my point being that before that we continue to murder innocent children, someone ought to at least step forward and meet the burden of proof and show their guilt.

We actually show more deference to criminals than we do to our unborn. At least they must stand before a jury of their peers and have not just a preponderance of the evidence, but evidence beyond a reasonable doubt presented of their guilt.

So we have totally ignored due process. We have totally ignored equal protection under the law, and quite simply we have totally ignored our Constitution.

In conclusion, I would say that the solution to this problem is really a very simple one, and that is, it is the same solution that we utilized over 100 years ago when we rectified the wrong done by the Dred Scott decision. That is, we recognized that if we are to be a constitutional republic, there are ways to change the Constitution lawfully, and that is through the constitutional amendment process.

It is for that reason that I am a strong advocate of at least debating on the floor of this House, for the first time since the Roe against Wade decision, the propriety of a constitutional amendment to either reverse or instate in a lawful constitutional manner the Roe against Wade decision.

How could anyone, irrespective of their ultimate view on that issue, possibly argue with protecting the sanctity of this Constitution?

If you happen to believe in abortion on demand, then at least allow a constitutional amendment, and if in fact the requisite number of States ratify that constitutional amendment, you will have the Constitution intact along with this new body of law.

If, on the other hand, you disagree with the right to abortion on demand, and believe that in fact civil government is established to protect human life, you will have an opportunity to vote in such a fashion as to ratify a different constitutional amendment.

But my point is, America can ill afford to tear down the very document that has served as a foundation for this country's prosperity. We almost destroyed it with the Dred Scott decision, but thank God we showed the good judgment to override it with a constitutional amendment.

It seems inconsistent to me that anyone could be opposed to slavery and not opposed to the Roe against Wade decision which legalized abortion on demand.

Mr. Speaker, I intend to take another special order, where I will go into much greater detail about a number of the issues that I only touched on tonight, but I did want to at least take this opportunity because of the time limits of the rabbi's remarks this morning, as he opened this day in Congress to illustrate how far we have varied from the basic tenets set forth in the Declaration of Independence.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. NIELSON of Utah) to revise and extend their remarks and include extraneous material:)

Mr. MCCOLLUM, for 60 minutes, today.

Mr. IRELAND, for 5 minutes, on October 23.

Mr. MILLER of Washington, for 60 minutes, today.

Mr. MILLER of Washington, for 60 minutes, on October 24.

Mr. GINGRICH, for 60 minutes, today.

Mr. GEKAS, for 5 minutes, today.

Mr. BARTON of Texas, for 60 minutes, on October 29.

Mr. BARTON of Texas, for 60 minutes, today.

Mr. WALKER, for 60 minutes, today.

Mr. COURTER, for 60 minutes, on October 30.

Mr. SWINDALL, for 60 minutes, today.

Mr. BURTON of Indiana, for 30 minutes, today.

Mr. MACK, for 60 minutes, today.

(The following Members (at the request of Mr. LOWRY of Washington) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. NELSON of Florida, for 5 minutes, today.

Mr. LOWRY of Washington, for 5 minutes, today.

Mr. ALEXANDER, for 30 minutes, today.

Mr. FRANK, for 60 minutes, today.

Mr. DYMALLY, for 60 minutes, on October 23.

Mr. SKELTON, for 60 minutes, on November 4.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. NIELSON of Utah) and to include extraneous matter:)

Mr. SAXTON.

Mr. MCCAIN.

Mr. SHUSTER.
Mr. GREEN.
Mr. ROGERS.
Mr. LENT.
Mr. COATS.
Mr. BROOMFIELD.
Mr. CONTE.
Mr. PORTER.
Mr. COURTER.

(The following Members (at the request of Mr. LOWRY of Washington) and to include extraneous matter:)

Mr. GARCIA in four instances.
Mr. SYNAR.
Mr. DORGAN of North Dakota.
Mr. OBEY.
Mr. BARNES.
Mr. LELAND.
Mr. ECKART of Ohio.
Mr. HUGHES.
Mr. LANTOS in two instances.
Mr. YATRON.
Mr. WEISS.
Mr. CLAY.
Mr. RANGEL.
Mr. DYSON.
Mr. COELHO in two instances.
Mr. MITCHELL.
Mrs. COLLINS.
Mr. WIRTH.
Mr. MARTINEZ.
Mr. APPLEGATE in two instances.
Mr. ROE.
Mr. DIXON.
Mr. EDGAR.
Mr. LEHMAN of California.
Mr. SOLARZ.
Mr. WHEAT.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill and joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2959. An act making appropriations for energy and water development for the fiscal year ending September 30, 1986, and for other purposes.

H.J. Res. 79. Joint resolution to designate the week beginning October 6, 1985, as "National Children's Week."

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled bill and joint resolution of the Senate of the following title:

S. 1726. An act to amend section 51(b) of the Arms Export Control Act, relating to the funding of the Special Defense Acquisition Fund.

S.J. Res. 92. Joint resolution to designate October 1985 as "National Foster Grandparent Month."

BILL AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on the following day present to the President, for his approval, a bill and joint resolution of the House of the following title:

On October 18, 1985:

H.R. 2174. An act to provide for the transfer to the Colville Business Council of any undistributed portion of amounts appropriated in satisfaction of certain judgments awarded the Confederated Tribes of the Colville Reservation before the Indian Claims Commission.

H.J. Res. 386. Joint resolution to designate November 24, 1985, as "National Day of Fasting to Raise Funds to Combat Hunger."

ADJOURNMENT

Mr. ARMEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 28 minutes p.m.) the House adjourned until tomorrow, Wednesday, October 23, 1985, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2161. A letter from the Director, Defense Security Assistance Agency, transmitting information concerning the Department of the Army's proposed letter of offer to Jordan for defense articles estimated to cost $50 million or more, pursuant to 10 U.S.C. 133b (96 Stat. 1288); to the Committee on Armed Services.

2162. A letter from the Director, Defense Security Assistance Agency, transmitting information concerning the Department of the Army's proposed letter of offer to Jordan for defense articles estimated to cost $50 million or more, pursuant to 10 U.S.C. 133b (96 Stat. 1288); to the Committee on Armed Services.

2163. A letter from the Assistant Attorney General, Department of Justice, transmitting studies of voluntary agreements under section 708 of the Defense Production Act, pursuant to 50 U.S.C. app. 2158(k); to the Committee on Banking, Finance and Urban Affairs.

2164. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Army's proposed letters of offer to Jordan for defense articles and services estimated to cost $75 million, pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2165. A letter from the Director, Defense Security Assistance Agency, transmitting the Departments of the Air Force and the Army's proposed letters of offer to Jordan for defense articles and services estimated to cost up to $1.8 billion, pursuant to 22 U.S.C. 2776(b); to the Committee on Foreign Affairs.

2166. A letter from the Deputy Assistant Secretary for Health Operations and Director, Office of Management, Department of Health and Human Services, transmitting an annual report on the financial condition of the pension plan, pursuant to 31 U.S.C. 9503(a)(1)(B); to the Committee on Government Operations.

2167. A letter from the Secretary of Labor, transmitting notice of a proposed alteration to a records system entitled, "Attorney Assignment Record," pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2168. A letter from the Vice President of Human Resources, Farm Credit Banks of Springfield, transmitting the annual report covering April 1, 1984 through March 31, 1985, of the Farm Credit Banks of Springfield retirement plan, pursuant to 31 U.S.C. 9503(a)(1)(B); to the Committee on Government Operations.

2169. A letter from the Special Counsel, Merit Systems Protection Board, transmitting the findings of the Secretary of the Army's investigation into allegations of a violation of law and abuse of authority by officials at Rock Island Arsenal, Rock Island, IL, pursuant to 5 U.S.C. 1206(b)(5)(A) (92 Stat. 1125); to the Committee on Post Office and Civil Service.

2170. A letter from the Special Counsel, Merit Systems Protection Board, transmitting a report responding to the allegations of mismanagement, waste of funds and danger to public safety on the electrical contract at the Lower Mason Complex, Golden Gate National Recreation Area, National Park Service, San Francisco, CA, pursuant to 5 U.S.C. 1206(b)(5)(A) (92 Stat. 1125); to the Committee on Post Office and Civil Service.

2171. A letter from the Administrator, Veterans' Administration, transmitting a draft to proposed legislation to amend title 38, United States Code, to authorize modification of the structure of the Office of the Chief Medical Director, to clarify procedures for removal for cause of certain employees, to authorize the use of the director pay grade within VA Central Office and for related purposes; to the Committee on Veterans' Affairs.

2172. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report on the origin, contents, destination and disposition of all humanitarian goods and supplies to countries in Central America, pursuant to Public Law 95-525, section 1540(e) (98 Stat. 2638); jointly, to the Committees on Armed Services and Foreign Affairs.

2173. A letter from the Acting Assistant Attorney General, transmitting a draft of proposed legislation to except all positions in the Drug Enforcement Administration from the competitive service, and place the incumbents of such positions in the expected service; jointly, to the Committees on the Judiciary, Energy and Commerce, and Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 1083. A bill to amend the Low-Level Radioactive Waste Policy Act to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste, and for other purposes; with an amendment (Rept. 99-314, Pt. 1). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 862. A bill to grant the consent of the Congress to the Northwest

Interstate Compact on Low-Level Radioactive Waste Management; with amendments (Rept. 99-315, Pt. 1). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 1046. A bill to grant the consent of the Congress to the Central Interstate Low-Level Radioactive Waste Compact; with amendments (Rept. 99-316, Pt. 1). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 1267. A bill to grant the consent of the Congress to the Southeast Interstate Low-Level Radioactive Waste Management Compact; with amendments (Rept. 99-317, Pt. 1). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2062. A bill to grant the consent of the Congress to the Central Midwest Interstate Low-Level Radioactive Waste Compact; with amendments (Rept. 99-318, Pt. 1). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2635. A bill to grant the consent of the Congress to the Midwest Interstate Low-Level Radioactive Waste Compact; with amendments (Rept. 99-319, Pt. 1). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2702. A bill to grant the consent of the Congress to the Rocky Mountain Low-Level Radioactive Waste Compact; with amendments (Rept. 99-320, Pt. 1). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DYMALLY:

H.R. 3592. A bill to provide permanent authority for hearing commissioners in the D.C. courts, to modify certain procedures of the D.C. Judicial Nomination Commission and the D.C. Commission on Judicial Disabilities and Tenure, and for other purposes; to the Committee on the District of Columbia.

By Mr. BURTON of Indiana:

H.R. 3593. A bill to amend the Federal Aviation Act of 1958 to require the use of dogs at major airports for the purpose of detecting plastic explosives and other devices which may be used in aircraft piracy and which cannot be detected by metal detectors; to the Committee on Public Works and Transportation.

By Mr. CLAY:

H.R. 3594. A bill to amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 to enhance retirement security by broadening retirement benefit delivery, strengthening the present system of voluntary employer-sponsored pensions, and encouraging growth and development of the private pension system by simplifying the administration of pension plans; jointly, to the Committees on Education and Labor and Ways and Means.

By Mr. COBEY (for himself, Mr. McMILLAN, Mr. JONES of North Carolina Mr. ROSE, Mr. HEFNER, Mr. NEAL, and Mr. VALENTINE):

H.R. 3595. A bill to provide financial assistance for the Sam J. Ervin, Jr., Program in Public Affairs at the North Carolina State University; to the Committee on Education and Labor.

By Mr. EDGAR:

H.R. 3596. A bill to encourage the use of public school facilities before and after school hours for the care of school age children, and for other purposes; to the Committee on Education and Labor.

By Mr. McCAIN:

H.R. 3597. A bill entitled, the "Indian Economic Development Act of 1985"; jointly, to the Committees on Interior and Insular Affairs, Ways and Means, and Judiciary.

By Mr. McCOLLUM:

H.R. 3598. A bill to express the opposition of the United States to the system of oppression in Angola, to promote the development of democracy in Angola, and for other purposes; jointly, to the Committees on Foreign Affairs; Banking, Finance and Urban Affairs; and Ways and Means.

By Mr. SMITH of New Jersey (for himself, Mr. HALL of Ohio, and Mr. WOLF):

H.R. 3599. A bill to suspend temporarily most-favored-nation treatment to Romania; to the Committee on Ways and Means.

By Mr. SWINDALL:

H.R. 3600. A bill to limit the number of Soviet nationals serving at the Soviet mission to the United Nations, and for other purposes; to the Committee on Foreign Affairs.

By Mr. SYNAR:

H.R. 3601. A bill to authorize the Cherokee Nation of Oklahoma to design and construct hydroelectric power facilities at the W.D. Mayo Lock and Dam; jointly, to the Committees on Interior and Insular Affairs and Public Works and Transportation.

By Mr. WEISS:

H.R. 3602. A bill to amend title II of the Social Security Act to waive, for 5 years, the 24-month waiting period for medicare eligibility on the basis of a disability in the case of individuals with acquired immune deficiency syndrome [AIDS], and the other purposes; jointly, to the Committees on Ways and Means, and Energy and Commerce.

By Mr. COBEY (for himself and Mr. TOWNS):

H.J. Res. 424. Joint resolution to designate the year of 1986 as the "Year of the Flag"; to the Committee on Post Office and Civil Service.

By Mr. WEISS:

H.J. Res. 425. Joint resolution concerning the cruel and inhuman killing of Leon Klinghoffer by international terrorists aboard the cruise ship *Achille Lauro*, because he did not submit to the demands of the terrorists; to the Committee on Banking, Finance and Urban Affairs.

By Mr. DANNEMEYER (for himself, Mr. SHUSTER, Mr. GEKAS, Mr. MONSON, Mr. WALKER, Mr. DORNAN of California, Mr. O'BRIEN, Mr. COBEY, Mr. BARTON of Texas, Mr. STRANG, Mr. RITTER, Mr. SWINDALL, Mr. RUDD, and Mr. NIELSON of Utah):

H. Con. Res. 219. Concurrent resolution expressing the sense of the Congress that the President should declare a state of national emergency with respect to terrorist acts committed against citizens of the United States; to the Committee on Foreign Affairs.

By Ms. OAKER:

H. Con. Res. 220. Concurrent resolution authorizing use of the rotunda of the Capitol for a ceremony incident to placement of a bust of Dr. Martin Luther King, Jr. in the Capitol and authorizing printing of the transcript of proceedings of that ceremony; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

274. By the SPEAKER: Memorial of the Assembly of the State of California, relative to national recognition of Haym Salomon; to the Committee on House Administration.

275. Also, memorial of the Assembly of the State of California, relative to Federal transportation assistance programs; to the Committee on Public Works and Transportation.

276. Also, memorial of the Assembly of the State of California, relative to income tax deductions for repairing and remodeling expenses; to the Committee on Ways and Means.

277. Also, memorial of the Assembly of the State of California, relative to Canadian timber imports; to the Committee on Ways and Means.

278. Also, memorial of the Legislature of the Commonwealth of Pennsylvania, relative to taxes; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. MOORHEAD;

H.R. 3603. A bill for the relief of Mouris Hakim Ibrahim; to the Committee on the Judiciary.

H.R. 3604. A bill for the relief of Yvonne Moreno Nite; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 147: Mr. LOTT.

H.R. 230: Mr. GARCIA.

H.R. 580: Mr. FORD of Tennessee.

H.R. 776: Mr. McGRATH and Mr. CHAPPIE.

H.R. 822: Mr. BIAGGI.

H.R. 945: Mr. THOMAS of Georgia, Mr. RAY, Mr. ARMEY, Mr. STRANG, Mr. CHAPMAN, Mr. CHAPPIE, Mr. BOULTER, and Mr. CLINGER.

H.R. 1099: Mr. SUNIA.

H.R. 1197: Mr. JEFFORDS, Mr. CROCKETT, Mr. WORTLEY, Mr. MILLER of California, Mr. MORRISON of Connecticut, and Mr. MITCHELL.

H.R. 1294: Mr. McKINNEY, and Mr. STAGGERS.

H.R. 1356: Mr. BARNARD, Mr. SMITH of Florida, Mr. FUQUA, Mr. STALLINGS, Mr. FAZIO, Mr. FUSTER, Mr. DIXON, Mr. RANGEL, Mr. CHAPMAN, Mr. PERKINS, Mr. LELAND, Mr. SWINDALL, Mrs. HOLT, Mr. WILSON, Mr. LEWIS of California, Mr. COBLE, Mr. HUGHES, and Mr. CLINGER.

H.R. 1398: Mr. FROST, Mr. WHEAT, Mr. LOWRY of Washington, and Mrs. BOXER.

H.R. 1400: Mr. AKAKA.

H.R. 1423: Mr. BRYANT.

H.R. 1458: Mrs. LONG.

H.R. 1538: Mr. RAHALL.

H.R. 1550: Mr. BUSTAMANTE.

H.R. 1669: Mr. TOWNS, Mr. DELLUMS, Mr. BERMAN, Mr. FRANK, Mr. GARCIA, Mr. MILLER of California, Mr. OWENS, Mr. FUSTER, Mrs. COLLINS, Mr. WILLIAMS, Mr. FAZIO, Mr. SAVAGE, Mr. CONYERS, Mr. CROCKETT, Mrs. BURTON of California, Mr. KOLTER,

Mr. MITCHELL, Mr. FORD of Tennessee, and Mr. ACKERMAN.

H.R. 1715: Mr. MCCOLLUM.

H.R. 1769: Mr. HATCHER and Mr. WILSON.

H.R. 1918: Mr. GARCIA.

H.R. 1924: Mr. CLAY, Mr. MORRISON of Connecticut, Mr. CONYERS, Mr. VENTO, Mr. BERMAN, Mr. WEAVER, Mr. KOLTER, Mr. RANGEL, Mr. MITCHELL, Mr. MATSUI, Mr. WEISS, Mr. OWENS, and Mr. SAVAGE.

H.R. 1973: Mr. GUNDERSON.

H.R. 2277: Mr. MORRISON of Washington.

H.R. 2295: Mr. ROE.

H.R. 2320: Mr. TOWNS.

H.R. 2481: Mr. BEREUTER.

H.R. 2591: Mr. ROEMER, Mr. MCKINNEY, Mr. DORNAN of California, Mr. DARDEN, Mr. ROSE, Mr. YOUNG of Alaska, and Mr. LEWIS of California.

H.R. 2661: Mr. EVANS of Illinois.

H.R. 2854: Mr. ALEXANDER and Mr. STALLINGS.

H.R. 2907: Mr. DYSON, Mr. GINGRICH, and Mr. TALLON.

H.R. 2954: Mr. SWINDALL, Ms. KAPTUR, and Mr. BARTON of Texas.

H.R. 2999: Mr. LEVINE of California, Mr. MADIGAN, Mr. TRAFICANT, Mr. MAZZOLI, Mr. LIGHTFOOT, and Mr. CLINGER.

H.R. 3006: Mr. EVANS of Illinois.

H.R. 3042: Mr. KILDEE, Mr. VALENTINE, Mrs. BURTON of California, and Mr. DIXON.

H.R. 3045: Mr. WEISS.

H.R. 3090: Mr. MATSUI, Mr. OBERSTAR, Mr. OWENS, and Mr. EVANS of Illinois.

H.R. 3100: Mr. KOLTER, Mr. DORGAN of North Dakota, Mr. DONNELLY, Mr. HEFTEL of Hawaii, Ms. MIKULSKI, Mr. BEILENSON, and Mr. BONKER.

H.R. 3132: Mr. GARCIA and Mr. MILLER of Washington.

H.R. 3173: Mr. EDWARDS of Oklahoma.

H.R. 3202: Mrs. BOXER, Mrs. LLOYD, Mr. STAGGERS, Mr. SCHUMER, and Mr. DURBIN.

H.R. 3259: Mr. MATSUI, Mr. MILLER of California, Mr. DELLUMS, Mrs. BURTON of California, and Mrs. COLLINS.

H.R. 3263: Mr. HALL of Ohio.

H.R. 3292: Mrs. SMITH of Nebraska, Mr. BLILEY, Mr. SWINDALL, and Mr. SHAW.

H.R. 3330: Mr. LAGOMARSINO.

H.R. 3371: Mr. WHITTAKER and Mr. BILIRAKIS.

H.R. 3464: Mr. JONES of Tennessee, Mr. BONER of Tennessee, Mr. COOPER, and Mr. FRANKLIN.

H.R. 3512: Mr. MORRISON of Connecticut, Mr. MORRISON of Washington, Mr. WEISS, Mr. VALENTINE, Mr. CROCKETT, Mrs. BURTON of California, and Mr. SEIBERLING.

H.R. 3515: Mr. BEVILL.

H.R. 3522: Mr. SWEENEY and Mr. MCDADE.

H.R. 3530: Mr. FAWELL, Mr. DAUB, Mr. FEIGHAN, Mr. KLECZKA, Mr. MATSUI, Mr. BRYANT, Mr. NICHOLS, Mr. GINGRICH, Mr. FORD of Michigan, Mr. HEFNER, Mr. OXLEY, Mr. BUSTAMANTE, Mr. JONES of North Carolina, Mr. MCKERNAN, Mr. SNYDER, Mr. FRENZEL, Mr. BARTON of Texas, Mr. LOWERY of California, Mr. DONNELLY, Mr. VALENTINE, Mr. DEWINE, Mr. ATKINS, Mr. LEWIS of Florida, Mr. EVANS of Iowa, Mr. SKEEN, Mr. BARNARD, Mr. LAFALCE, Mrs. ROUKEMA, Mr. FIELDS, Mr. BOEHLERT, Mr. NEAL, Mr. THOMAS of California, Mr. AUCOIN, Mr. STUDDS, Mr. ROYBAL, Mr. LEATH of Texas, Mr. HAYES, Mr. VENTO, Mr. PORTER, Mr. COOPER, Mr. BERMAN, Mr. DASCHLE, Mr. HALL of Texas, Ms. KAPTUR, Mr. WILSON, Mr. WALGREN, Mr. RAHALL, Mr. TAUZIN, Mr. BOUCHER, Mr. GAYDOS, Mr. NIELSON of Utah, Mr. PASHAYAN, Mr. SCHAEFER, Mr. TORRES, Mr. PENNY, Mr. HUGHES, Mrs. BOXER, Mr. DARDEN, Mr. WIRTH, Mr. SLATTERY, and Mr. KOLBE.

HALL, Mr. HAMMERSCHMIDT, Mr. HOWARD, Mr. HUGHES, Mr. MCCAIN, Mr. MCCLOSKEY, Mr. MCGRATH, Mr. MARLENEE, Mr. NEAL, Mr. RUSSO, Mr. SCHAEFER, Mrs. VUCANOVICH, Mr. WALKER, Mr. WILSON, and Mr. WOLF.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 2781: Mr. MOLLOHAN.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

236. By the SPEAKER: Petition of the Office of the Finance Director and City Clerk, West Monroe, LA, relative to the Fair Labor Standards Act; to the Committee on Education and Labor.

237. Also, petition of Jerome Strager, Sandstone, MN, relative to antisemitism; to the Committee on the Judiciary.

238. Petition of the City Council of Seal Beach, CA, relative to Federal income taxation; to the Committee on Ways and Means.

SENATE—*Tuesday, October 22, 1985*

(Legislative day of Monday, October 21, 1985)

The Senate met at 9:15 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

The PRESIDENT pro tempore. Our prayer this morning will be offered by the Reverend Father William Scully, special assistant to Senator WILLIAM ROTH.

PRAYER

The Reverend Father William Scully, O.F.M., special assistant to Senator WILLIAM ROTH, Alexandria, VA, offered the following prayer:

Let us pray.

Almighty Father, as the Members of the Senate gather here this morning to conduct their legislative business, we implore Your blessings upon them, their families and their staffs.

We beseech You to instill in them all:

A faith that is unerring;

A hope that is certain;

A patience that is boundless;

A courage that is unwavering;

A love that is perfect; and

A sensitivity and a knowledge that they may accomplish Your holy and true command.

Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDING OFFICER. The distinguished acting majority leader is recognized.

Mr. GORTON. I thank the Chair.

SCHEDULE

Mr. GORTON. Mr. President, after 10 minutes each reserved to the majority and minority leaders, the Senate will proceed to five special orders of not to exceed 15 minutes each for Senators MCCLURE, WILSON, THURMOND, HECHT, and PROXMIRE. At that point the Senate will proceed to routine morning business for a period not to extend beyond 11 a.m. with Senators permitted to speak for not more than 5 minutes each.

Following morning business, it is the intention of the majority leader to turn to any Legislative or Executive Calendar item cleared for action, possibly including Executive Treaty No. 98-5, which is the 1983 protocols for the further extension of the 1971 wheat agreement. At noon, the Senate will stand in recess until 2 p.m. for the weekly party caucuses. At 2 p.m., the majority leader intends to resume consideration and to complete action on H.R. 3424, the Labor-HHS appropriations bill. The Proxmire amendment is in order and expected to be the only amendment offered. Therefore, two rollcall votes can be expected following the resumption of H.R. 3424. Later, the Senate is expected to resume consideration of S. 1730, the reconciliation bill. Rollcall votes can be expected throughout the day today.

RESERVATION OF LEADERSHIP TIME

Mr. GORTON. With that, Mr. President, I ask unanimous consent to reserve the remainder of the majority leader's time under the standing order for such use as he may wish.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, I ask unanimous consent that the Democratic leader's time be reserved for such use as he may wish to put it later on in the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE STEEL CRISIS: NOT GONE AND NOT FORGOTTEN

Mr. BYRD. Mr. President, October 1 was the anniversary of the effective date of the Steel Stabilization Act. This measure was incorporated into the Trade and Tariff Act of 1984 as an important statement of national steel policy. It was the Democratic response to the President's decision last year to disregard the recommendations of the International Trade Commission and deny relief for the American steel industry and its workers. Congressman ROSTENKOWSKI's introduction of the Steel Stabilization Act augmented the President's import limitation plan of last year, and required steel producers to target their resources on modernization and improvements to assure that the United States maintains a world-class steel production capacity.

The act did not supplant the program which the administration announced, following its decision to turn down the ITC's recommendation. The legislation enabled the President to follow through on his program of import reduction. The President's program called for import reduction with a goal of 18.5 percent foreign penetration of the U.S. steel market. The Steel Stabilization Act describes an acceptable range of between 17 percent and 20 percent foreign penetration. Moreover, the President's plan committed the administration to a 10-point program that included reaffirmation of existing voluntary restraints agreements, rigorous enforcement of statutes that address unfair trade practices, interagency review of tax and regulatory policy impact on the steel industry, and Defense Department analysis of steel needs.

No other industry has this kind of Presidential declaration of intent. The President and the Trade Representative deserve credit for the bilateral steel arrangements negotiated thus far. But we need to look at the result of those efforts, and the result of the rest of the President's program.

The data on steel imports for the month of August are now available, and there is reason to be concerned. We learn that foreign steel products accounted for 25 percent of the American market, and that import levels for the year thus far are only four-tenths of 1 percent below the levels the same time last year—before the President's plan. Capacity utilization for the industry is down below last year, and with it, employment. In fact, in June 1985, imports accounted for a startling 30 percent of the American market. American Iron and Steel Institute President Donald Trautlein described these results as "a bitter disappointment and completely contrary to the President's Import Restraint Program."

The results occur as American steel negotiators are sitting down with their European counterparts to discuss renewal of the voluntary restraint agreement with the European Community that will expire on December 31. That agreement is the backbone of the other voluntary restraint arrangements, and a successful conclusion to those negotiations will be crucial to the American industry and its workers.

While a successful agreement with Europe is necessary, it is not sufficient. One of the most disturbing aspects of the August import figures was

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

the fact that imports from developing countries not covered by the President's program increased sharply. Because the administration rejected the recommendation of the International Trade Commission and opposed the legislation that my colleagues and I supported—both calling for comprehensive global limits on imports—we are left with a serious diversion problem. The piecemeal approach of separate negotiations leaves the administration with the problem of steel imports from new sources, or with the enforcement dilemma of stopping current foreign steel manufacturers from transshipping their steel products to the United States through third countries or switching to higher value products. These diversions must be stopped. If the administration is unwilling or unable to take the necessary steps to achieve the objectives of its own program, the Congress should be prepared to review new quota legislation.

In order that we have a better understanding of the problem, I have asked the chairman of the International Trade Subcommittee of the Committee on Finance, Senator DANFORTH, the ranking member of that subcommittee, Senator BENTSEN, and the chairman of the House Ways and Means Committee, Congressman ROSTENKOWSKI, to consider hearings on the President's steel plan and the current situation in the steel industry in conjunction with the annual review required by the Steel Stabilization Act. I know these gentlemen share my concern about the American steel industry and its workers. With 25 percent of our national needs being filled by foreign products, we need to ask ourselves whether the appropriate steps are being taken to assure the survival of this industry. Too many other basic industries, too many jobs, and too much of our national security depend upon American steel for the President or the Congress to relax vigilance.

RADIO ADDRESS OF SENATOR HART CONCERNING GRAMM AMENDMENT

Mr. BYRD. Mr. President, on Saturday, October 12, our distinguished colleague, the senior Senator from Colorado [Mr. HART], delivered the Democratic response to the President's weekly radio address. In his comments, Senator HART took issue with the "politics as usual" approach to reducing the budget deficit that is embodied in the Gramm amendment adopted by the Senate the week before last.

I share many of the concerns about the Gramm amendment voiced by the Senator from Colorado. The amendment not only represents an unsound approach to reducing the deficits; it is unfair as well. It also unwisely shifts significant power away from the people's elected Representatives in Congress to the President and the executive branch.

As Senator HART points out, we face a deficit crisis today not because of a failure of the budget process but because of a failure of this administration's budget policies. Yet, the Gramm amendment would not change any policies; it would merely alter the process—and in such a way that those who supported it may well rue the day it was adopted.

That is not the view just of the Senator from Colorado or of myself, but also of a growing number of commentators and columnists, of all political viewpoints. They have seen, as the majority of the Senate did not see, the fundamental flaws of the Gramm amendment.

Mr. President, I ask unanimous consent that the text of Senator HART's radio address be included in the RECORD at this point along with copies of several editorials and columns pointing out the deficiencies in the Gramm amendment.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 13, 1985]

SAVE US FROM THE SENATE'S STAMPEDE

(By Haynes Johnson)

One day, in the year before his death, Hubert H. Humphrey escorted me into his small, private Senate hideaway in the Capitol, closed the door and began a tape recorded conversation that lasted several hours. The purpose was not social; I was gathering material for a book about the politics of Washington and the workings of government during the Carter years, and the former vice president was a prime source of information.

He was, of course, a great student—and practitioner—of government. When I asked what had been the greatest change since he came to the Congress, he instantly replied:

"Up until the time of Woodrow Wilson, with the exception of Teddy Roosevelt, we had congressional government. Congress was the predominating influence. That changed. The president became the predominating influence. Now Congress has asserted itself again. I can't overemphasize the importance of this. Congress is no longer afraid of the executive—particularly when you look at things like the budget. I've heard dozens of people up here say, 'Well, I know that Carter's got that in his budget, but what's our budget say?'

"And I'll tell you something I hear people say now that you never heard before: 'I've seen them come and go, and I'm still here.' They're talking about presidents, you know. I've run through seven of them myself."

With that 1977 conversation in mind, I keep wondering how Humphrey would have reacted to the shameful political charade played out last week in Washington, by the very body of legislators that he so loved, the Senate. No one can know for sure, but my bet is he would have been saddened—and outraged.

The overwhelming vote by the Senate to require a balanced budget by 1991 is more than abdication of responsibility and a sign of political failure on its part. It is a blank check for the president, signaling a dramatic reversal in the shift of powers back to the presidency from the Congress, a shift in the opposite direction from that hailed by Humphrey.

It's also a riveting example of the failure—abject capitulation is a better term—of the Democratic Party to offer a reasoned, responsible political alternative to the Reagan presidency and its titled budget priorities that to a large extent got us into the present deficit debacle. They allowed themselves to be stampeded, and they ran.

As Sen. Bill Bradley (D-N.J.), one of the most thoughtful of the Democrats, put it last week in an article in The Washington Post, "this legislation shows Congress at its worst."

I believe Bradley's words, written on the eve of the vote, will stand out admirably after all the ducking and political posturing of last week have been forgotten.

"Instead of once again grappling on a bipartisan basis with the tough decisions, particularly on taxes," he said, "Congress appears poised in a moment of irrationality and timidity to give Ronald Reagan the sole power of reorder the priorities of the national government. It will be an action that we will all live to regret."

Behind this action lies a more significant political development: the ratification, if you will, of the Senate's willingness to place its powers and authority in the hands of the president because it lacks the will to act. By this action, Reagan has won. Much of the political history of relations between Congress and president that people such as Humphrey cited as important will have to be rewritten. It's quite recent history, too.

During the Vietnam-Watergate years, concern centered on the "imperial presidency" and the growing accumulation of power in the hands of the chief executive. Fears were expressed that a supine, deferential Congress was becoming a rubber stamp for the White House. But those also were the years in which Congress fought—and won—a battle to regain its lost powers.

The fight took two forms. In both foreign and domestic affairs Congress fought to limit the power of the president to act without its consent. In foreign affairs, congressional enactment of a War Powers Resolution in 1973 directly checked the president's power to act alone in involving the United States in armed conflicts. It was the result of congressional determination to avoid further Vietnams. In domestic affairs, the establishment in 1974 of Congress' own budget office gave the legislators greater power over the purse. Until then, Congress has been a hostage of executive department proposals that shaped the federal budget. Through its own budget office, gathering its own information, Congress sought and did regain much of its authority over the dispensing of federal funds.

As House Speaker Thomas P. (Tip) O'Neill (D-Mass.) expressed the importance of that shift to me, during an interview several years ago in which he passionately pounded on his desk to make even stronger his point:

"The change in Congress had come. We had recaptured our powers to the extent that we were almost an equal voice. The press didn't read it. Jimmy Carter didn't read it. They didn't appreciate the power and the strength of the Congress of the United States. Jimmy Carter thought he was going to be another president with the powers of a Nixon or a Kennedy or a Johnson, and he didn't have 'em when he arrived here."

It is now left to O'Neill and other members of the House to save the Senate and the country from the damage that threatens to be done.

[From the Washington Post, Oct. 13, 1985]

GOVERNMENT BY MEAT CLEAVER

(By George F. Will)

Bob Dole, illustrating the axiom that wit is educated insolence, said the Senate should pass the radical budget-balancing bill without hearings because, "The longer something hangs around here, it gets stale. People start reading it." Heaven forfend.

The proposal, an action-forcing device, would require five annual cuts of equal size ($36 billion) bringing the deficit to zero in 1991. The president would be required to submit a budget with sufficient spending cuts or tax increases to cut $36 billion from the deficit. If—if!—Congress did not ratify his blend of pains and did not devise its own blend, the failure would trigger a presidential duty to cut spending, across the board, by whatever fixed percentage is required.

Note that congressional failure to make hard choices would not invest the president with broad power to exercise rational discretion in shaping the budget. Defenders—yes, defenders—of the proposal stress that it makes the president a mere automaton. The proposal minimizes choice—thought—in budget-making. This evasion of governance might, for example, require the president to cut equally, thereby assigning the same social value to Amtrak subsidies and programs for spina-bifida babies.

This proposal is historic in its potential consequences and stunning in its symbolism, especially as it reveals a transformation of conservatism. In its potential for large consequences, it ranks a cut below repeal of the Missouri Compromise. It will not ignite civil war, quite. However, as an allocator of effective power within the central government, the proposal is as significant as the establishment of the Federal Reserve System.

Considering its source—the conservative party—the proposal is as startling as the Giles Enforcement Act of 1809, which suspended parts of the Bill of Rights in order to enforce compliance with Jefferson's embargo against Britain and France. Sen. William B. Giles, the author of this concentration of irresistible power in the central government, was a Virginia Jeffersonian, at least rhetorically.

Today's conservative proposal for shrinking deficits mocks some conservative rhetoric. It would involve an enlargement of executive-branch power without parallel in peacetime. Modern conservatism defined itself in opposition first to FDR and then to LBJ. Hence conservatism has celebrated congressional prerogatives against "presidential government." But conservatives supporting this deficit-cutting proposal favor a form of executive power far beyond the dreams of liberal political avarice.

We few who are "strong government conservatives"—we Hamiltonians—believe, as our hero did, that "energy in the executive is a leading character in the definition of good government." But minimizing the element of mind in goverance is a high price to pay for instilling energy in the executive.

The proposal illuminates the real, as distinct from the rhetorical, nature of contemporary conservatism. Social Security would be completely exempt from cuts. Social Security and interest payments, which are necessarily exempt, comprise one-third of the budget. All other entitlement programs would suffer only cuts from annual cost-of-living increases. Thus the controllable portion of the defense budget, especially pay, maintenance and operations, would bear a heavy burden of the cuts. So conservatives supporting the proposal are siding with the middle-class, social-insurance side of the ntry will be increased, because every single community in this country in order to meet the gap will have to make it up by raising property taxes. That is the least desirable tax that this body should want any community to have to subject themsives to. —that worked so well with gin.

It is axiomatic: In politics, the perfect is the enemy of the good. That is, pursuit of perfection impedes achievement of the merely adequate. Perhaps today's proposal is the closet that self-government, modern American-style, can come to self-restraint. But as Dole said to a supporter of the proposal, "Don't get up and explain it again. Some of us are for it."

Congressional pleas for the proposal sound like the notes the homicidal maniac sends to the police: "Stop me before I kill (spend) again!" Sen. Warren Rudman (R-N.H.) an author of the proposal, was an amateur boxer. He combines charming feistness with disarming candor. He does not cavil about a description of the proposal as a straitjacket for the government to jump into in a fleeting moment of lucidity. But the words of Sen. Bill Bradley (D-N.J.), a critic of the proposal, can be quoted by proponents for the proposal. Bradley says Congress does not need new procedures, it just lacks political will, Just? "The brain surgeon just lacked steady hands."

The proposal calls to mind an acid cartoon from the late 1940s showing a German general saying, "I was only obeying orders I gave to myself." The proposal would hand a meat cleaver to the executive branch and force the use of it. Then a congressman or senator confronted by angry constituents could point to the executive branch and say: "Don't blame me. The, er, government did it."

[From the Washington Post, Oct. 14, 1985]

FISCAL R2D2

What the house should do now with the balanced-budget amendment to the debt-ceiling bill is what the world's greatest deliberative body did not do: take some time. The amendment has gone to conference, but committees can still hold hearings and the Democrats can work out a party position. It is still a little hard to know what to make of this legislation. On one level, it is all ploy; here are serious men and women gravely creating a kind of robot to do in their names in the future what they have all the power and support will in the world to do for themselves right now. But fiscal R2D2 would be a powerful creature if they ever switched it on. The amendment's implications need to be better understood and its fuzzy sections clarified. The Democrats may be able to do themselves and the public both some good.

There are three main arguments against the legislation. The first is that there is no need and could even be some harm in taking the budget all the way to balance as the amendment would ultimately do—that taking too much money out of the public sector could have some unwanted distributional effects and that, if the current expansion gives way to recession as it likely will in the next year or two, deficit-reduction could be just the wrong medicine.

It could, of course—but does anyone really want to argue that, in a world of $200 billion deficits, fiscal policy is not stimulative enough? There are two great instruments for managing the economy, fiscal policy and monetary policy—taxes, spending and the deficit, on the one hand, ease of credit and interest rates on the other. President Reagan, for all his reputation as a budget-cutter, has been an unregenerate hot-rodder on the fiscal side since taking office. The deficits, born of his tax cuts and defense buildup, are residue and proof of that. The Federal Reserve Board, which controls monetary policy, has felt compelled to respond by standing on the brakes. That is why interest rates are still so high, and one reason for the overvaluation of the dollar. If fiscal policy were eased, so could monetary policy be. The Fed could help fend off recession.

Imagine a world in which long-term interest rates were back around 5 or 6 percent and U.S. products were regaining their competitiveness in world markets. The real macroeconomic risks lie with present policy. If the economy falters Congress ought to be able to adjust, but the problem right now is all in the opposite direction. In the Senate the amendment was carefully revised to make it unlikely that any serious cutting would have to occur this year, or before next year's elections. That was the wrong way to go.

There is also a constitutional argument against the amendment—that it would cede too much power over spending to the president, since if he and Congress failed to hit the deficit target in any year, he would be empowered and, in fact, required to cut spending in certain ways to stay on track. Sponsors dispute this on grounds the legislation stipulates how spending would be cut and the president could not deviate from congressional priorities; they say his function would be ministerial. The amendment was tightened on the Senate floor in an effort to make sure of this.

The real argument is the third one, over the nature of spending cuts required. That has been the issue between the president and his opponents all along; he wants the deficit brought down by cuts in domestic spending programs, they want the burden spread to defense and taxes. The amendment tries to ensure such a spread by taking hostages. In its original form it would have required him, if he and Congress failed to hit their deficit target in any year, to make cuts in Social Security and defense as well as the rest of the budget. The idea was that he would probably finally agree to a tax increase rather than do this; at least he would have to choose. The Senate then lost its nerve and exempted Social Security. Meanwhile, the president, in embracing the amendment, has never acknowledged how it might affect defense, the only hostage left. We would feel a lot more comfortable if all sides agreed how the amendment might affect the defense accounts. The House needs to elicit this.

The other great area of uncertainty involves the leading programs for the poor—Medicaid and food stamps, the two largest, and Aid to Families with Dependent Children, the largest in which aid is given in cash. Whether and under what terms these might be subject to cuts is still not clear. Everyone understands the politics of exempting Social Security from the amendment. But it is just plain wrong to set aside Social Security benefits, which go in important part to the middle class, while cutting benefits for the poor—and everyone understands that too. The House has a lot of tidying-up to do.

[From the Washington Post, Oct. 15, 1985]

GRAMM-RUDMAN: BUDGETARY BUNGLE?

(By Edwin M. Yoder, Jr.)

The Gramm-Rudman-Hollings plan to cure the deficit by statutory means confounds all folk wisdom. Having watched one statutory process—the so-called "budget process" of the 1974 Budget Act—fail to overcome political pressures making for excess, Congress may enact yet another. The cat, badly burned, is poised to jump back on the same stove.

But panic has set in. The government is almost out of cash and to borrow more, Congress must boost the debt limit to just over $2 trillion, a figure of symbolic significance. It marks a near doubling of the national debt under Ronald Reagan, and another milestone on the dismal road once known (even to Reagan) as "mortgaging our grandchildren's futures."

To take the curse off this transition, Sen. Phil Gramm and several cosponsors have sprung a dandy plan on Congress. Whatever befalls it, it marks another fascinating episode in the bizarre chronicle of Congress' effort to boost itself, by statutory bootstraps, into fiscal self-discipline.

Gramm's bill is complex, but the aim is simple. It would "mandate" a scheduled reduction of the federal deficit, in $36 billion annual decrements, from some $200 billion this year to zero by 1991.

But in view of the well-known frailty of congressional will power, the plan would authorize the president, when Congress exceeds its own limits, to cut spending "across the board" (Social Security excepted).

What is remarkable is that in its embarrassment, Congress is disposed to cancel, at one hasty stroke, the Budget and Impoundment Act of 1974. That act aimed to retrieve usurped spending authority from the Nixon White House, yet now the Gramm-Rudman plan would give Ronald Reagan (and his 1989 successor) an unexampled one-man budgetary discretion—possibly the most unbridled of its sort in any English-speaking legislative tradition since King Charles I lost his head.

In 1974, Congress had been battling Richard Nixon's abuses of "impoundment," executive withholding of appropriated funds, and the Budget Act of that year was intended to clean up congressional bookkeeping and reassert congressional dominance over the spending power.

The 1974 Budget Act and its "budget process" are now widely perceived as failures, and the judgment is hard to deny. The Budget Act halted impoundment abuses. But the "budget process" it instituted, despite a valiant try by people such as Ed Muskie, Pete Domenici and Jim Jones, proved powerless to curb overspending at a time of explosive inflation—especially after the Reagan tax cuts lowered the revenue base. Legislative good intentions were not enough.

But what is the real lesson of this failure?

If the wreckage of the 1974 Budget Act suggests the intrinsic weakness of a statutory process in the face of overwhelming political and economic pressures, how can Gramm and his cosponsors contend with a straight face that still another, if different, statutory process will solve the deficit dilemma?

To be sure, if the country enjoys six years of cloudless economic sailing between now and 1991, the plan could work as intended.

In the unwelcome but highly probable event of recession, and the budget pinch it would bring, what then?

The Gramm-Rudman plan has an interesting escape clause. In the event of war or recession, the president may, at his discretion, waive the mandatory deficit reduction.

But putting a president in nearly total charge of the response to economic emergency not only repudiates the 1974 Budget Act; it may repudiate constitutional checks and balances as well.

How, then, would you bet in such an eventuality, in view of the history of such congressional self-denying ordinances? That Congress would swallow institutional pride, and ride out the politically chafing consequences of its abdication of power? Or (as it has done behind the facade of the "budget process") find sly ways to repudiate the deficit-reduction plan?

And another question: The rap against Richard Nixon, 15 years ago, was that he was impounding (we now call it "sequestering") funds for political, not economic, ends—using a discretionary power to destroy or cripple social programs Congress wanted to continue.

Would Ronald Reagan, made sovereign arbiter in an economic pinch, resist the temptation to use his extraordinary discretion under Gramm-Rudman to shape budget policy to suit his well-known fancies?

That is the most political, though not necessarily the most serious, of the many issues raised by the latest panacea for congressional indiscipline.

[From the Baltimore Sun, Oct. 13, 1985]

SENATE DEBT PLAN COULD HURT ECONOMY

(By James Barnes)

"Even a blind hog finds an acorn now and then," noted Sen. Russell B. Long, D-La., as the Senate debated and ultimately passed last week a bill to reduce the annual federal budget deficit to zero by 1991.

Mr. Long's observation is an apt metaphor for the Senate as it groped for a magic formula that would solve the nation's deficit problems. But, unless it is altered in the House of Representatives, the Senate's action could have unintended and adverse consequences for the economy and for the constitutional balance of powers between the president and Congress.

The Senate passed a measure, by Sens. Phil Gramm, R-Texas, Warren B. Rudman, R-N.H., and Ernest F. Hollings, D-S.C., that would set a six-year timetable to reduce federal deficits by annual increments of $36 billion. If the target deficit ceilings—$180 billion in fiscal 1986, $144 billion in fiscal 1987, and so on to zero in fiscal 1991—were not met, the president would hold back spending by equal amounts in all budget categories except Social Security, interest payments and other "uncontrollable" government spending, primarily defense procurement that was contracted for in earlier years.

Congress could avoid these across-the-board cuts if it submitted an alternative plan, agreed to by the president to get under the deficit ceiling. But if the president vetoed the plan and his veto were upheld, the automatic cuts would be enforced. In time of war or a recession, all restrictions could be waived.

How, exactly, would we know if we were going into a recession? The Gramm-Rudman-Hollings bill requires that at the start of each fiscal year (Oct. 1), the Office of Management and Budget and the Congressional Budget Office forecast whether a recession was imminent. Economic forecasting can be very imprecise, and the OMB and CBO might have different assumptions about the economy's future performance (the differences would be split). Thus, it would be difficult to predict a downturn and avoid the adverse economic effects of cutting spending or raising taxes in a recession.

But, for argument's sake, let us assume that the predictions could be made accurately, that the requirements in Gramm-Rudman-Hollings were waived in a recession, that unemployment compensation and food stamp payments continued unabated. What would happen in the subsequent recovery year?

Using the CBO's low-growth assumption for the economy, we could anticipate a recession in 1987 and a recovery in 1988, with the gross national product growing smartly at 3.6 percent. Unfortunately, the effects of a recession often last beyond its technical duration. In 1988, unemployment would range between 9 percent and 10 percent, and the budget deficit would be $272 billion. But the economy would be in recovery, and therefore the Gramm-Rudman-Hollings budget deficit ceiling of $108 billion would be in effect. That would mean a cut in government spending of $164 billion in fiscal 1988.

Such a level of budget reduction for one year is unprecedented. Moreover, because Social Security and other items would be exempted from cuts, economist Charles Shultze estimates all controllable government spending—Medicaid, military pay, the FBI and so on—would have to be reduced by 60 percent. That kind of cut, says Mr. Schultze, chairman of the Council of Economic Advisers during the Carter administration. "could wreck the economy."

The Gramm-Rudman-Hollings guidelines for budget reductions also might have an adverse effect on our defense posture. Defense spending in general would not be exempted from the budget ax if a deficit ceiling were not met. The Pentagon would face a cut equal in proportion to cuts in other programs. But some defense spending could not be cut—spending for contracts agreed to in previous years, which make up most defense procurement. Only 15 percent of all defense procurement spending is paid for in current year contracts, compared with 90 percent of personnel costs and 85 percent of operation and maintenance.

Although the generals and admirals themselves might not think that personnel, operations and maintenace costs should be the primary targets for cuts, the rigid formula of Gramm-Rudman-Hollings would force them in that direction.

If prior-year contracts were added to the base of cuts, that could create equally bad choices. For example, because the only savings from a multi-year warplane assembly program would be money spent in the current fiscal year, the actual purchase of the plane might have to be halted completely to meet budget ceilings. Defense analysts have long argued that this kind of feast-famine procurement hurts the nation's defense posture and only drives up weapons costs in the long run. "Deficit reduction by formula," notes Mr. Schultze, "produces absurb and dangerous results."

While the impact of Gramm-Rudman-Hollings on fiscal policy is difficult to project with certainty, its effect on the budget process and the balance of powers between the presidency and Congress are equally murky and perhaps more dangerous. If the deficit ceiling for any fiscal year were breached, Congress would have only 10 days to come up with an alternative deficit-reduction plan

after the president began to hold back funds.

Proponents of the measure note that this new presidential power would be merely "ministerial": The president would have to allocate cuts evenly, item by item, throughout the parts of the budget that could be cut. What they seem to ignore is that the president would now have the upper hand in budget negotiations.

Even if the Democrats and Republicans could agree in 10 days to a compromise that might include tax increases, the president could simply veto it and withhold funds. All he would need to uphold his decision would be one-third-plus-one votes in either the House or the Senate.

This would give the president leverage throughout the budget process. Even before he actually sequestered funds, the president could veto appropriations bills he didn't like, ones that cut the defense budget more than he wanted, for instance. This would break the deficit ceilings and trigger his power to sequester funds across the board rather than cutting specific programs suggested by Congress.

While the cuts would be more or less equal, program by program, we know that spending is not so equally distributed among states and congressional districts. Some districts disproportionately rely on farm or welfare programs. With the depressed state of the agricultural economy these days, members representing farmers who wanted to avoid any cuts in price-support programs could be susceptible to subtle legislative blackmail—support the president or he'll trigger cuts that could fall harder on your district this year than on somebody else's.

Congressional reforms such as Gramm-Rudman-Hollings don't solve problems; they just change the procedures under which lawmakers will attempt to solve problems.

Twelve years ago, Congress passed the Budget Act to a chorus of hosannas that this reform would finally enable the lawmakers to control spending. While it has added some rationale to overall fiscal policymaking in Congress, it did not make deficits extinct.

Similarly, in the 1970s, many entitlement programs that were subject to annual appropriations were indexed to inflation to keep costs down and to depoliticize the program decisions. But just the opposite occurred. The economy and the dynamics of lawmaking are so complex that it is likely Gramm-Rudman-Hollings, which few people understand now, would similarly create unimagined adverse consequences.

Ironically, the Senate in 15 days has initiated this far-reaching reform of the budget process. The Founding Fathers thought that the upper body, with only one-third of its members up for reelection every two years and with rules for extended debate, would be able to resist being swept up in the passions of the moment and would legislate more carefully than "the people's chamber," the House of Representatives.

Now it's up to the House, which will surely come under demagogic attack as a budget-buster if it tries to dilute or kill this legislation passed by the "blind hogs" of the Senate.

Democratic Radio Response by Senator Gary Hart

In the last few days, our government has demonstrated the importance of maintaining flexible military forces in a dangerous world. All Americans support the successful effort to capture the terrorists who hijacked a crusie ship and murdered a defenseless American.

We also owe a debt of gratitude to the brave pilots and crews of our Navy F-14s who skillfully intercepted the plane carrying the terrorists. Their performance demonstrated why our defense budget must contain the right priorities—funds for flight training, aircraft maintenance, fuel, and premium pay for pilots.

But this week, the United States Senate—with the President's encouragement—passed a new proposal to require deep budget cuts in the very programs which made this operation a success.

All Americans understand that this nation is facing severe economic peril. Our national debt has doubled in five years. This Administration has asked Congress to increase Federal borrowing eleven times—just to pay our bills. As deficits have multiplied, so have our problems.

Record deficits are causing high interest rates which hurt farmers, consumers, and young couples buying homes. Big deficits have made products "Made in America" uncompetitive in markets overseas. Deficits have grown so large that we've relied on funds from foreign investors just to keep the economy solvent. And if foreign investors call in those loans, this country will be in serious trouble.

Democrats and Republicans now agree that, in spite of the promises of the last five years, supply-side economics didn't reduce the deficit; it doubled. Democrats and Republicans also agree that substantial deficit reductions are essential.

But let's take a look at the Senate proposal. It aims to eliminate the deficit in five years. Sounds good; but let's read the fine print.

First, this plan doesn't require any budget cuts at all until after the 1986 elections. That may help reelect a few politicians. But it doesn't help put our country on sound economic footing soon enough.

Second, deficit reductions will require all Americans to pitch in. But this plan says that half the budget is off-limits.

What budget items will be off-limits? Well, you could keep buying even more nuclear weapons. But you'd have to cut the pay of soldiers on the front lines.

We'd spend the $200 million planned for a Veterans hospital in Houston. But you couldn't hire the doctors and nurses to take care of the patients.

Big corporations could continue to pay no taxes. But a retired coal miner would lose some of his black lung benefits; a young child could lose her school lunches; a student could lose his chance to get a college degree.

That's no way to reduce deficits for a great nation that cares about its people and its future.

Third, this new proposal resurrects an old, failed, and unconstitutional idea. A decade ago, the Supreme Court had to stop President Nixon from blocking funds for programs he didn't support. Nixon's unlawful actions were called "impoundment." That same system of impoundment is the centerpiece of the new plan.

We've already seen the damage that a willful president can do to our Constitution if the Congress lays down and lets it happen. We must not repeat that mistake.

Ultimately, this new plan fails because it's just politics as usual. It's a typical Washington response. It's based on changing the budget process—instead of the budget policies.

But we don't have our deficit crisis today because of a failure of process. It was a failure of policy. Five years ago, many Democrats said the President's supply-side economic program wouldn't balance the budget. Unfortunately, we were right.

This last week the Catholic Bishops of America said that poverty, unemployment, hunger, and deprivation are inconsistent with our nation's moral values. It is a tragedy and a travesty that those who visited these deficits upon the least fortunate among us are asking them to bear more than their share of the deficit-reduction burden.

We Democrats should and will do more than criticize the Republicans. The challenge for our party now is to find better, more equitable ways to substantially reduce these deficits. Our challenge is to ask all segments of our society and our government to contribute their fair share to reducing the deficit. That's a challenge we plan to meet.

RECOGNITION OF SENATOR McCLURE

The PRESIDING OFFICER. Under the previous order the Senator from Idaho is recognized for not to exceed 15 minutes.

Mr. McCLURE. Mr. President, I thank the Chair for recognizing me at this time.

STRATEGIC DEFENSE INITIATIVE

Mr. McCLURE. Mr. President, I want to take a brief period of the time of the Senate to discuss further something that several of us discussed last week with respect to the strategic defense initiative actions that are contemplated by this administration.

As Members will recall, a review of the ABM Treaty that was undertaken some months ago has concluded that the words of the treaty and the negotiating record indicates very clearly that we have been operating under a restrictive interpretation that is not justified either by the words of the treaty or the negotiating history, and that has to do with what we are permitted to do under the treaty with respect to new technologies that are developed or that may be developed following the signing of the ABM Treaty.

Remember that of all the treaties we have, SALT I, with ABM as a part of the negotiating package or the results of that negotiating, the ABM Treaty alone was negotiated to be in effect until changed. The SALT I Interim Agreement on Strategic Offensive Weapons and the SALT II Treaty both had expiration dates. They were negotiated for a fixed period of time. The ABM Treaty was to be a permament treaty.

One of the issues that was raised during that 1969 to 1972 negotiation and discussion was whether or not the restrictions of the ABM Treaty would be applied to new technologies that

were not then in being but might develop later or which would relate, as some people characterized it, to new physical principles. The conclusion of the administration review was that, while we have been operating under a restrictive interpretation for 13 years since May 1972, when the SALT I ABM Treaty was signed, that this restrictive interpretation is simply erroneous.

This was announced first publicly by National Security Council Director, Mr. McFarlane, on "Meet the Press" on October 6, but his announcement was the result of weeks and months of study by people who read every word of the negotiating record. That, I think, is admitted by every member of the administration and is no longer an issue. In other words, the treaty history and negotiation says that we are free to do what the President has outlined for SDI. Full fledged research, development, and testing of SDI is obviously correct under the ABM Treaty. Only deployment of SDI is foreclosed, except in accordance with articles XIII and XIV.

But, apparently, that affirmative action by the President or by the administration in correctly stating what the ABM Treaty says and what we are bound to do under that ABM Treaty, without any violation of that treaty at all, has sufficiently alarmed some people, whom I cannot identify simply because I do not know, has sufficiently alarmed them so that they launched a counterattack against if not the policy enunciation of the interpretation but its application.

And the result, as reported in a column in the Washington Post on October 21, 1985, by Roland Evans and Robert Novak, is that the State Department was capable of a sufficient amount of pressure on the President to get the President to enunciate a policy that says even though we have now concluded that the ABM Treaty does not restrict what we could do in the SDI, we nevertheless will not do it. I ask unanimous consent that the Evans and Novak column be printed in the RECORD at this point.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 21, 1985]

A FUTURE FOR SDI?

(By Rowland Evans and Robert Novak)

George Shultz did not, as reported, threaten to resign at the Oct. 11 White House meeting called at his request, but his anger led to a presidential decision plunging his cherished Strategic Defense Initiative into quicksand and threatening its Senate support.

As is widely known, the secretary of state was "furious" with national security adviser Robert C. McFarlane for going public with a broad interpretation of treaty limits on SDI research. Although it is not so well known, Shultz was rebuffed by all present when he suggested new talks with Moscow to decide permissible SDI research under the 1972 ABM treaty (giving Moscow potential veto power over the U.S. program).

But Shultz talked the president into a decision limiting research to the narrowest limits of the ABM treaty. That policy shift endangers the future of neither Shultz nor SDI research, testing and development (which Reagan can expand anytime he wants). Its threat is the ruinous impact on Congress and U.S. allies of an administration in confusion about its most important strategic objective.

Shultz's State Department had been firmly aboard the wide-latitude policy enunciated by McFarlane on "Meet The Press" Oct. 6. Shultz himself was not present when that policy was agreed to at an Oct. 4 meeting of senior officials. But his representative, arms control adviser Paul Nitze, stood in for him and did not demur.

However, when McFarlane revealed that the president had chosen the broad interpretation of ABM treaty limits, the secretary and the State Department bureaucracy revolted for motives they consider the purest. With the summit four weeks away, they worried that the broad interpretation would antagonize Mikhail Gorbachev and alienate European allies.

Conveniently enough, personal letters from West German Chancellor Helmut Kohl and British Prime Minister Margaret Thatcher arrived on the very day of the White House meeting. They claimed (in "hysterical" terms, one participant told us) that the policy announced by McFarlane was intolerable in Europe.

Before Reagan retreated, neither the State Department nor European allies told him that arriving in Geneva with restrictions on SDI would give Gorbachev an impression of weakness. Nor did anybody relate to him the costs among his foremost Senate allies, led by Wyoming's Sen. Malcolm Wallop and numbering up to a score of Reaganites. They might oppose future SDI appropriations if the administration does not revert to the expanded research limits.

Wallop, one of the earliest and best-informed strategic defense enthusiasts, worries that SDI research will remain in a straitjacket until expanded to the outer limits of the broader ABM treaty interpretation—an expansion blocked by the president's Oct. 11 decision.

If Reagan sticks to that decision, Wallop predicts, pro-SDI senators actually will vote against appropriations next year on grounds the system never will become a reality under ABM treaty limits now controlling it. Their defection could be critical.

What makes all this infuriating to certain senators is the strong presumption that the Soviets are interpreting the ABM treaty so broadly in developing their own strategic defense program that they are actually violating it. "Nonsense, nonsense," Sen. Dan Quayle of Indiana shouted on the Senate floor after noting claims that Soviet research is also bound by the ABM treaty.

Pentagon supporters predict that Reagan will change the rules again after the summit and free SDI for full research, development and testing—no matter what his diplomats say. That may be whistling past the graveyard. The embarrassing confusion caused by the president's feuding officials has been more the rule than the exception ever since Reagan endorsed SDI in 1983. If he cannot sell his greatest security initiative to his official family, it may never attract the constituency it deserves.

Mr. McCLURE. The reason I mention that is that if indeed our State Department, for whatever reason, has forced the President to constrain the SDI to an unfounded restrictive interpretation of the ABM Treaty, that has a profound impact upon the decisions some of us must make as to whether or not an emasculated SDI Program is worthy of the financial commitment and support.

Second, I think it is very important for us to note again for the record that there is a double standard in arms control compliance in the world today, condoned and abetted and supported by our Government, that says the Soviets are bound to a different standard of compliance than we. We will permit them an interpretation of the treaty, with which we do not agree, that is less restrictive on their actions than the interpretation that we three will live by, which is more restrictive on our actions. The Soviets have even directly violated at least three provisions of the SALT I ABM Treaty, according to President Reagan, and are probably violating several others, also according to the President. Mr. President, by whatever term that may be known, I will call the U.S. double standard compliance policy what it really is—and that is unilateral disarmament by the United States; incremental, certainly, but nevertheless unilateral, because it binds us, but not them. It binds us because we choose to be bound by whatever interpretation or use.

I would reemphasize that it is important to note that the Soviet Union has directly violated the ABM Treaty, is continuously violating the ABM Treaty, and is preparing new violations, and we are doing nothing to counter it. I suggested some time ago that if the Soviet Union does not like SDI they might at least comply with the ABM Treaty and its terms and conditions. Now there is no doubt the Krasnoyarsk radar is a clear-cut, direct violation of the ABM Treaty. There is no doubt that we know it. There is no doubt that they know it. And yet, in spite of that violation on their part, we are not only just limiting ourselves to the literal interpretation of the treaty, we are going even further and limiting ourselves to a more restrictive interpretation of the treaty, while they are free to violate.

Finally, by the State Department's action, either initiated by the Secretary or initiated by people under his supervision, they have emasculated the SDI and have gratuitously traded away to the Soviets even in advance of the negotiations in Geneva an essential element of SDI. So the President may indeed say yes—as he has—that SDI is nonnegotiable, and we are not going to even negotiate with respect to SDI when we get to Geneva. But a

large part of SDI has already been given away by the administration under pressure from the State Department. That is no quid pro quo, even before summit negotiations begin.

Mr. President, I would not be so alarmed about that fact if I were not also aware that it fits the pattern of self-deception within our own administration, and fits the pattern of deception of the American people as to what the treaties are, what treaty negotiations means, and what treaty compliance means.

I also say, Mr. President, that it is very difficult for me to acknowledge, particularly after having spent a great deal of time over the last year both within the administration, and within the Congress defining Soviet violation of several treaties in ways that are harmful to our security, and enunciating a policy—which I believe is absolutely correct—of proportionate response to treaty violations, that we have given up the ability to make proportionate responses. In fact, if not in policy, the State Department's double standard U.S. compliance policy, especially as applied to SDI, has made congressionally authorized proportionate response much more difficult.

What does proportionate response mean? It means simply that when the Soviet Union is found guilty by our determination of a violation of the treaties under which we both operate we are free to take whatever actions are necessary to meet the security threat that is raised by their treaty violation without an outright abrogation of the treaty but a response proportional to the threat to the security of the United States.

There are threats to our security inherent in treaty violations by the Soviet Union. The Congress has already adopted a policy of proportionate response, saying we will do what is necessary to protect our security, and on one of the first tests of that policy we have not only failed to take proportionate response but we have refused to make any response at all, and have gone even further; that is, backed away from what we are permitted to do under the treaty in saying we will not even do that.

Mr. President, I understand the difficulties of negotiations but I have agreed with the President completely when he said you must negotiate from a position of strength. I agree completely with the President in his announced principle that SDI was not to be negotiated away because it is one of the greatest opportunities for the enhancement of the security of the free world if indeed we can make it work.

What does the restrictive interpretation of this treaty mean in practice? It means that we will be asked to spend hundreds of millions of dollars, even billions of dollars, on the theoretical testing—theoretical development of arms that might be developed in the future but without any commitment to their development.

The President in Boise, ID, last week, after the State Department-proposed decision on SDI, made in the National Security Council, continued to use the phrase "We will go ahead and develop the system." But in fact, at the time that he says we will develop it, he has restricted development to bench scale and laboratory testing. Mr. President, how many people on the floor of the Senate or the House of Representatives would spend millions or even billions of dollars on an MX program if it only resulted in computer printouts of what might happen if we built an MX? The President has not asked us to do that, thankfully. How many of us would spend hundreds of millions or billions of dollars to develop the advanced technology bomber if it was only a concept, a paper flyer, and not a weapons system in being?

Mr. President, you cannot have an MX missile that is operable without testing it. You cannot have a follow-on bomber, an advanced technology bomber, sometimes called the Stealth bomber, in concept alone and mean anything in terms of deterrence in the real world. We could not develop the M-1 tank just on paper. It went through development problems as we all know, even after we had finished the testing and put it into production. We found problems that had to be corrected. But we found them by going through a development and testing program. We did not rely upon a computer printout to frighten the Russians. I suspect that a computer printout with respect to SDI is very, very acceptable to the Russians so long as we do not do anything more than that.

If that is the case, Mr. President, where is the leverage in the talks in Geneva? Where is the leverage with respect to the SDI initiative with respect to the President's conversations with Soviet Communist Party General Secretary Gorbachev? Where is the reality of a system that is confined to something less than testing, and how indeed can the President describe that as a development of a "system" when it would be constrained by the unfounded, narrow interpretation of the ABM Treaty?

I think, Mr. President, that it is time for us to confront the fact that the State Department is still unchanged by the election results of 1980, still unchanged and unswayed by the election results in 1984; the State Department still is pursuing a policy of appeasement just as they have for decades. Whether Secretary Shultz is responsible for that or whether it just happened by inadvertence while on his watch I think is perhaps interesting as a footnote but more importantly we should understand what the policy is and what implications that has for U.S. security. The President has agreed that the new interpretation of the ABM Treaty is "fully justifiable," yet the State Department has held us to the unfounded restrictive interpretation.

Mr. President, it is a dangerous world in which we live. There is no one who has more heartfelt reason to be concerned about the development or the proliferation of nuclear weapons or arms in an unstable world than the Senator from Idaho.

I must say that I find the latest developments backing away from a commitment of negotiation from a position of strength, backing away from a commitment to the development of a defensive weapons system that is highly moral and needs to be substituted for something that is more archaic, and certainly perhaps as a relic of the past rather than a policy for the future in mutual assured destruction; that the latest development of the President's decision as enunciated to back away from a commitment to SDI is a most disturbing development.

Mr. President, I yield the floor.

RECOGNITION OF SENATOR HECHT

The PRESIDING OFFICER. Under the previous order, the Senator from Nevada is recognized for not to exceed 15 minutes.

STRATEGIC DEFENSE INITIATIVE

Mr. HECHT. Mr. President, and fellow Senators, the Soviet Government is now in full gear attempting to get the American people to abandon its strategic defense initiative; 90 percent of all Americans polled say that they want a defense against nuclear missiles, and 60 percent are not even aware that they are undefended today.

Instead of terrorizing the world with the threat of nuclear weapons, and hoping somehow to get peace and deterrence out of that, what we need to do at last is to render any nuclear attack against the United States futile and ineffective. Defense and national security cannot be obtained by a signature on any piece of paper, nor through a policy of revenge, menace, and threats.

National security, rather is created when a government undertakes to defend its people. But what the Congress means today by defense is a poor substitute for what it has meant in the past. What defense has always meant throughout history is to make aggression by a hostile power futile and ineffective. That is what defense means. And that is what it means to the American people.

Policies of mutual revenge will not defend our families. Nor will policies of "constructive engagement" with an adversary which has proven its ruthlessness throughout the world, especially in Afghanistan, and recently in Angola where Soviet officers have taken direct control over the forces in the so-called civil war there.

The Soviets say that we are building SDI in order to threaten their homeland, but the history of our Nation proves otherwise. In the late 1940's and 1950's, this country possessed absolute superiority and a total monopoly on nuclear weapons. This was a perfect change for a world power to carry out its true designs and reveal its underlying nature to everyone. But instead of sending troops and warheads around the globe, we sent our money, our food, and our hearts to rebuild and prosper a struggling world. We sent our wishes and assistance for freedom health, and happiness. The Soviets on the other hand, have always used their military forces to increase the grip of their control.

Now the Politburo has tipped their hand. They say they are willing to give up 50 percent of their missile forces, in exchange for 50 percent of our missile forces, plus America's SDI Program. Why, we must ask, is there an addition on their proposal? Why is an equal reduction of Russian missiles with the same size reduction in American missiles not a fair and equitable proposal? The Communist negotiators in Geneva show us clearly their true nature, when they demand that the United States make a greater sacrifice in any arms agreement than they themselves are willing to make.

We must ask ourselves why it is so important for Moscow to kill the strategic defense initiative at any cost. A little research on this question finds the answer in their own backyards. The Soviets have already had an SDI-type research program for over 15 years. Next year they will spend over three times as much on laser research as Lieutenant General Abrahamson over at the SDI research office.

What concerns this Senator is the conspicuous absence of any mention of the Soviet SDI Research Program. Has Moscow offered to dismantle the illegally constructed radar sites at Krasnoyarsk and around their border? Have they offered to dismantle the more than 10,000 SA-10 and SA-12 surface-to-air interceptors deployed around their nation. These interceptors were tested in an ABM-mode in the midseventies and are another violation of one of the few major arms agreements still in force—the ABM Treaty. The obvious imbalance in this arms proposal merely reveals with stunning clarity the true importance of missile defense to Soviet planners, and should be of the utmost concern to our colleagues here in the Senate today.

What myself and my colleagues want is simply what the people want when they are polled: They want a U.S. Department of Defense. What they do not want is a U.S. Department of Revenge. I urge all my colleagues to support the SDI Defense Program in coming weeks.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WILSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR WILSON

The PRESIDING OFFICER. Under the previous order, the Senator from California [Mr. WILSON] is recognized for not to exceed 15 minutes.

THE GENEVA MEETING

Mr. WILSON. Mr. President, later this fall, not very much later, the President of the United States will be traveling to Geneva to keep a date with Mr. Gorbachev, causing many to hope that their meeting will bring some breakthrough in the relationship between the United States and the Soviet Union. On the outcome of that meeting, many have supposed, rests the hopes of the world for a future free from the threat of superpower conflict. It is an important meeting to be sure, although I think that perhaps those who would call it a summit are somewhat premature. Rather, it should be viewed as a first meeting to explore the possibilities for significant change in our relationship. But even that modest hope, Mr. President, requires that optimism be tempered by a very considerable amount of hard-headed realism.

The last thing that any of us should wish is that a President of the United States should go to such a meeting less than clear eyed, deluded in some way that there has been a change from the historic pattern of Soviet behavior, or thinking that United States desire for change will bring it about. Wishing will not make it so.

But happily no President in history has held a clearer view than Ronald Reagan of what the Soviet agenda is, as well as what it has been. He has been taken to task by criticis from time to time for being harsh in his rhetoric.

He has been not harsh but accurate in his assessment.

And yet, there are some who have feared that the courage and candor of this President would involve us in conflict. By now they should have seen that his accurate assessment, and his unblinking honesty in calling aggression what it is, has not involved the United States in conflict. To the contrary, this President has kept the peace by insisting upon and achieving American strength.

Nonetheless, the time has come for a meeting between the leaders of the two superpowers. And, though, it may not be a summit, the importance of this meeting is obvious.

The Senate has a special role in conjunction with the President as it relates to the shaping of our foreign policy. We give advice and consent to the most important Presidential nominations and initiatives. Our approval, formally known as ratification, is required in order to make the President's signature upon a treaty binding and meaningful.

In the spirit of that special responsibility of the Senate, and with the greatest respect for and confidence in our President, I offer five points that I suggest must be observed if the United States is to enjoy success in any meeting or negotiation with the Soviets. These are simple points. They will seem obvious. Yet, through our history, we have made the mistake of violating them.

First, we must not allow the Soviets to set the agenda. The Soviets are entitled to address their concerns; we are entitled to address ours. They will not be the same.

Second, we must not allow the talks to be confined to the subject of arms control exclusively. Instead, taking note of the facts of history, we must insist upon a linkage between the subject of arms control and the subject of human rights, the subject of violations of the Helsinki accord, the sponsorship of terrorism, the sponsorship of regional aggression and subversion, and the conduct of espionage under diplomatic cover. Because, Mr. President, there is in fact linkage: The Soviet Union that is escalating the nuclear arms race is the same Soviet Union that is supplying arms to the Sandinistas, the same Soviet Union that is silencing Sakharov and Shcharansky, and the same Soviet Union that is repressing Soviet Jewry.

Third, the United States must make no agreement under which performance cannot be verified. This is simple logic born of unhappy experience. The simple fact is we dare not trust the Soviets. History, including the most recent, makes clear that they are not to be trusted. Indeed, their repeated violation of important treaty agreements makes clear that when they think they can violate agreements without notice or without cost, they will do so. The fact that we dare not trust the Soviets in no way exempts us

from having to deal with the Soviet Union, but does impose the requirement that Soviet performance be verifiable.

Fourth, we must make no agreement regarding defensive technology under which the United States forebears from availing itself and its allies of future technologies. Ironically, this is one point where we should be in complete, enthusiastic agreement with the Soviets, or at least the Soviets who signed the ABM Treaty, if not Mr. Gorbachev who now insists upon the diametrically opposed view.

We have heard much in recent days about "Agreed Statement D" contained in that treaty. What it says simply is that the parties to the ABM Treaty agree that any future systems not in being at the time of signing could be limited only by amendment of the treaty pursuant to article 14. In other words, the Soviets refused, at the time the ABM Treaty was agreed to, to agree to foreclose their use of some future defense "based on other principles" then unknown. That is the only realistic interpretation permitted by the text and negotiating record of Agreed Statement D. My fourth point is simply a corollary to the proposition that the United States should make no unilateral concessions for which we have not received sufficient consideration, a simple and fundamental proposition of contract law which is equally applicable to the negotiation of treaties.

And where undiscovered defensive technologies hold out the promise of replacing the "balance of nuclear terror" with mutually assured survival, to forsake achieving such technology for some concession of incomparably lesser value would be an act of inexcusable dereliction.

Fifth, we must make clear to the Soviets that there will be a cost to them for violation of any agreement. Just as it does no good to enter into agreements—however high flown the language, however optimistic the thoughts expressed therein—if we cannot verify performance, so it does no good to monitor and verify performance if, when there is in fact Soviet violation, we impose no cost. To the contrary, our failure to impose a cost is interpreted correctly by the Soviets and by our allies as U.S. weakness. The cost, as we heard earlier today, should be proportionate. We will not invoke heavy penalties for slight transgressions. But, Mr. President, unless we are prepared to make the Soviets pay a cost, then there is no point in our entering into agreements, and we should not do so.

Indeed, if we exact no cost, agreements can prove a dangerous trap, inviting Soviet violation. They can allow the Soviets impunity to violate treaties at such time as they choose, while we unilaterally abide by their constraints.

If the value to the Soviets in entering into an agreement is to secure our forebearance from a particular activity, then the cost for their violation should be our abandonment of that obligation, and our resumption of that activity.

Let me dwell a bit upon these five points. A great many people are skeptical about arms control and about this particular meeting of United States and Soviet leaders. They say, rightly, that all the evidence makes clear that the Soviets, in coming to the table in Geneva, do not proceed from a position of moral equivalence with the United States. And that is true, most surely and most sadly.

It is also true that the same evidence makes clear that the Soviets have a different goal than the United States in coming to Geneva and at all other times. Theirs is world hegemony. Ours is world peace and freedom.

It is also true that we operate in an entirely different political and media climate. The United States makes and conducts its policy openly, publicly, with the consent and criticism of the governed, and with the whole process being vigorously reported by a truly free media. While in the Soviet Union, rulers there make policy and act in secret, not only without criticism or consent of those whom they rule but without being burdened even by the requirement that they honestly inform the Russian people.

But if the United States and the Soviet Union proceed from such different moral bases, pursue such clearly conflicting goals, and operate in such contradictory fashions, what real hope can there be for honest communication leading to genuine conflict resolution?

If, as the Soviets have demonstrated time and time again, by deceit, treachery, and numerous violations, they are not to be trusted, why go to Geneva?

Why enter into new agreements when they have violated those we have already made with them?

Why risk new traps and new betrayals?

The answer is that we should not go to Geneva now or ever unless we are prepared to insist upon and obtain our agenda, as well as theirs; and verifiable Soviet performance; and after agreement, Soviet compliance or Soviet cost.

But because the Soviets are the other nuclear-armed superpower in this small world we share, we have a moral duty to go to Geneva and drive the hard bargain we are entitled and obliged to drive. And if the Soviets will not negotiate on such terms, then until they do the cost to the Soviet Union must be the effort to keep pace with the most determined, most tirelessly sustained effort to keep peace through the strength of our military, our economy, our technology, and national will, that the world has ever seen.

They must learn they cannot outlast us, waiting for an America that lacks the will or wits to keep the peace.

And it goes without saying that in driving any bargain with the Soviets, the verifiable performance we seek must be of real and sufficient value to the cause of peace to warrant our agreeing to what they ask of us. Instead, a free media does not exist there and the Soviet people hear only what the Soviet propaganda machine provides them. It is important to focus upon these painfully obvious differences because they reveal the relationship between international peace and internal democracy. The real democracies of the world have rarely, in recent history, engaged in aggression against their neighbors, owing in no small part to the fact that it is only in democracies that real political opposition is tolerated.

That brings me back to the proposition that we must make no agreements regarding defensive technology under which the United States forebears from availing itself of presently undetermined technology. It rests not only upon the authority of agreed statement D—insisted upon by the Soviet signers of ABM—that we must not so agree, but upon the same undeniable pact, as compelling today as it was 13 years ago to the Soviet negotiators of the ABM Treaty, that to make such agreements is to blindly eschew the possibility of employing an as yet undiscovered technology that offers the opportunity to rid the world of or at least depreciate the threat of offensive nuclear missiles.

To do so would be an act of the most irresponsible dereliction. It may not be possible to attain the ultimate, absolutely leak-proof defense that the President has seen as a goal for SDI, but history is replete with examples of science producing a technology or result which earlier scientific leaders, the most eminent of their time, had proclaimed in their time to be impossible of achievement. That is why the Soviets were so absolutely opposed at the time of the signing of the ABM Treaty to foreclosing the possibility of their obtaining such future technologies. Arms control agreements have proved to be abysmal failures in checking the escalating arms race in offensive weapons. The ABM in particular was sold in the United States in no small part on the assurance that forbearance from pursuit of defensive technology would be rewarded by prevention of an offensive arms race.

But while that assurance has proved tragically false, even primitive defensive technology offers quite real hope that it can make so doubtful the suc-

cess of a Soviet first strike that it will discourage rational Soviet war planners from launching one.

It is this prospect that has brought the Soviets back to the arms control tables at a gallop, far earlier than anticipated and having dropped all the tough-talking demands they had announced when they staged their dramatic walkout. They returned to Geneva without previously demanded precondition to resumption of the talks.

It is difficult to conceive of anything the Soviets could offer as adequate consideration for our abandonment of SDI other than their verified abandonment of any strategic and conventional offensive first-strike capability.

And because of the value and hope we attach to SDI, several of my colleagues and I were shocked by what must be described as our making a unilateral concession of literally unknown dimensions. I refer to the U.S. announcement that we will abide by a more restrictive interpretation of the ABM Treaty than the treaty itself requires. Earlier I stated the seemingly obvious counsel that the United States should make no unilateral concessions for which we have received less than adequate consideration. And yet in the past week—acting unilaterally, in exchange for nothing from the Soviets—we announced that although legally entitled under that treaty to engage in the full development and testing of space-based defensive weaponry, we would instead abide by the more restrictive interpretation that had been our understanding of the treaty through the 13 years since its signing. That more restrictive understanding is that development and testing of spaced based defenses are prohibited.

The President of the United States has stated we will stand by our earlier understanding—or misunderstanding—of the treaty, but that we reserve the right under our current and correct interpretation of the treaty at some point in the future to throw off this self-imposed constraint upon development and testing.

Mr. President, I share with my colleagues their concern that we have made a serious error. It is one, however, that is within our power to correct. The President has earlier this summer wisely enunciated the doctrine of proportionate response to Soviet arms control violations. The doctrine holds that we will monitor Soviet conduct under existing treaties and respond to violations by exacting a real and appropriate cost. I respectfully urge the President and his advisors to reconsider the decision whereby we have unilaterally renounced the treaty-given right for space-based testing. He is fully justified in doing so on the basis of the treaty itself. He is more than justified in doing so as proportionate response to past and continuing Soviet violations, including the Soviet violation of the ABM Treaty by their battle-management radar at Krasnoyarsk.

Mr. President, I share the confidence of the American people, that President Reagan, with the courage and candor we have come to expect and admire, will deliver messages to the Soviet Premier that Mr. Gorbachev needs to understand. This President has made clear that we will not be content simply to coexist with our heads in the sand, refusing to come to grips with the Soviet challenge, because that is a luxury we cannot afford for ourselves or our allies. He has made clear that defensive technology is off the table in Geneva, and he is right to do so; because with that defensive technology, however imperfect it may turn out to be, we have the ability to substantially deter a Soviet first strike.

For us to agree that we will forebear indefinitely for the sake of our allies, for the sake of those who fear that we will be provocative, and agree not to engage in the development and testing of space-based weaponry (described in agreed statement D as technology "based on other physical principles") is not just inconsistent with President Reagan's own hopes for SDI. Worse it threatens to cost us precious time we may never be able to regain.

Only with the testing in space that is required to make real a space-based defensive technology can we one day make real the President's devout wish to save lives rather than to avenge them.

In future, other American Presidents traveling to Geneva will find new Soviet leaders who receive, as this one has, the flattering attention of the Western press. I think they will also find a need for constancy and strength in American foreign policy so that no Soviet Foreign Minister or Premier ever mistakes the earnestness of the American people or their Presidents for peace to be something that it is not, which is a desire for peace at any cost.

We must keep ourselves strong. We must insist that any defensive technology that offers the prospect of peace by discouraging nuclear exchange receives every opportunity to achieve that full potential.

Mr. President, I am confident that this first meeting will be one in which President Reagan makes these things crystal clear. I hope and believe that future Presidents, confronted with the awesome challenge of preserving peace and freedom, will find that their task has been made easier by the strength and constancy of Ronald Reagan.

I respectfully suggest that President Reagan and any American President who follows him, will if he follows these simple rules, have done all he can in the interest of peace, not only for the American people, but also for the Soviet people and for all the peoples of the world.

Mr. President, I will have more to say about some of the specific points—those that relate to human rights, those that relate to regional conflicts sponsored by the Soviet Union—on another occasion.

I thank the Chair for its generosity in allowing me to set forward these points this morning.

I yield to the Senator from Arkansas.

Mr. PRYOR. Is the Senator from California yielding the floor at this time?

Mr. WILSON. Yes.

STRATEGIC DEFENSE INITIATIVE

Mr. MATTINGLY. Mr. President, I would like to express my concerns along with several of my colleagues in reference to the administration's restrictive interpretation of U.S. obligations under the ABM Treaty and the negative impact that this will have on the current strategic defense initiative [SDI] research effort.

On October 6, Robert McFarlane, the President's National Security Adviser appeared on the television news show, "Meet the Press," and stated that the ABM Treaty does not prevent the research, testing, and development of systems based on new physical concepts that could be used in a strategic defense system.

Secretary of State George Shultz subsequently clarified or more accurately, negated, that position when he told the representatives at a recent meeting of the North Atlantic Assembly that despite our view that the treaty allows such activities the United States will continue to conduct its research activities within a much more restrictive interpretation of the treaty provisions.

Frankly, I fail to understand why the clearly enunciated position expressed by Mr. McFarlane was not allowed to stand as the U.S. position on this critically important issue.

The strategic defense initiative represents the best hope that we have to make offensive nuclear weapons obsolete and thus, perhaps, begin to rid the world of them. These were the sentiments expressed by the President when he initiated the SDI research program. There are no guarantees of success but it seems to me that the potential rewards, the potential benefits, far outweigh the difficulties that invariably accompany such significant shifts in policy.

Mr. President, I don't believe that U.S. interests are served by imposing upon ourselves restrictions that impede the basic search for knowledge that is at the heart of the SDI pro-

gram. We must not once again work against ourselves.

I agree with the sentiments expressed by several of my colleagues to the effect that those of us who have strongly supported the SDI effort may be forced to reaccess our strategy and positions if the research effort is to be hampered not only by the expected scientific and technological hurdles but also by such unnecessary, unneeded and, to me, totally inexplicable self-imposed limitations as those that result from the "restrictive interpretation" policy that was reaffirmed by Secretary Shultz.

Without strong leadership from the President and from the people that have the responsibility of carrying out his policies, the SDI effort is doomed to failure. It has already suffered a telling blow as a result of the success of its opponents in slapping on the "star wars" label.

SID isn't about star wars, Mr. President. It's about the defense of the American people, of this Nation, and of our values and principles.

Truly, we are on the verge of passing through the looking glass if, indeed, research efforts into means with which to defend the American people—for that matter, all people—are viewed as destabilizing or of being somehow counterproductive to the search for an enduring peace and toward a world without the daily risk of nuclear holocaust.

If the President and the people who surround him are not committed to the strongest research effort possible under the terms of the ABM Treaty than I doubt whether there is any chance at all of convincing the American people of the importance of the program and of the need to support the considerable level of funding that is necessary.

If this commitment cannot be made, then we should take a close look at whether or not the program should continue in a restricted research environment that virtually guarantees failure.

There is no need or reason to be half-hearted about our resolve in this critical issue. I intend to continue to do all that I can to insure that the truly critical questions involved here and the central issues at stake are thoroughly enunciated and examined during the important times ahead.

THE STATE DEPARTMENT'S DOUBLE STANDARD ON SOVIET SALT VIOLATIONS

Mr. SYMMS. Mr. President, I would like to take my time in this SDI-ABM Treaty colloquy to register my agreement with my colleagues in their criticism of the State Department's disloyalty to President Reagan on the SDI issue, and to support the conclusion of my distinguished colleagues, Senators WALLOP and QUAYLE, who stated on October 17, 1985:

We are hoping the administration will bring its SDI policy and testing program into concert with its announced, sounder legal interpretation of the ABM Treaty. Without such changes any future advocacy and support on our part would have to be seriously reconsidered.

I agree that the State Department is sabotaging and undermining the President's strategic defense initiative. SDI is President Reagan's most important contribution to history.

Mr. President, I ask unanimous consent that an article in the Washington Times dated October 18, 1985, by Walter Andrews entitled "Republican Senators Attack ABM Treaty Interpretation," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Times, Oct. 18, 1985]

REPUBLICAN SENATORS ATTACK ABM TREATY INTERPRETATION

(By Walter Andrews)

Republican senators yesterday lashed out at the Reagan administration for its latest interpretation of the 1972 ABM treaty, which they said would restrict the development and testing of systems needed for the proposed space-based missile defense system.

In a telephone interview, Sen. Malcolm Wallop of Wyoming said he was "dismayed" by the White House decision, which he said would reduce the Space Defense Initiative program strictly to laboratory research and testing.

It would unilaterally give away to the Soviets SDI aspects for which they have been attempting to bargain in the Geneva nuclear arms talks, said the senator, a congressional observer of the talks.

In a joint statement, Mr. Wallop and Sen. Dan Quayle of Indiana said they hoped SDI policy and testing would be linked with a "sounder" legal interpretation of the ABM treaty.

"Without such changes, any future advocacy and support on our part [of SDI] would have to be seriously reconsidered," the statement said.

Sen. Jesse Helms of North Carolina, in a separate statement, accused Secretary of State George Shultz of undermining SDI by advocating a more restrictive interpretation of the ABM treaty in a White House meeting last Friday and a San Francisco speech Monday.

Mr. Helms said a "double standard" is being applied in arms control, with the United States held to strict compliance with treaties and agreements and the Soviet Union allowed to "get away with violation after violation."

Other conservative senators plan a campaign of speeches on the Senate floor over the next few days to loosen the treaty interpretation, sources said.

White House spokesman Edward Djerejian said the issue was "moot." He said that, even with the restrictive interpretation, the SDI program would be able to move toward its research goals if given enough money by Congress.

He said that, after a careful evaluation, the administration had decided that the restrictive view of the treaty would require no restructuring or change of the SDI program.

This position was echoed by House Armed Services Committee Chairman Les Aspin, Wisconsin Democrat.

In a telephone interview, Mr. Aspin implied the issue was moot in the sense that it would be at least until 1987 before the development and testing of an SDI element would "bump" up against the ABM treaty.

The so-called restrictive interpretation of the treaty, which prohibits field-testing of SDI subsystems and components, has been the only one adhered to by the arms control "clan," Mr. Aspin said.

Until the Oct. 6 television interview of White House National Security adviser Robert McFarlane, the broader interpretation permitting SDI testing "just never came up . . . I never heard that there was any other interpretation [than the restrictive one] until these guys thought of it," Mr. Aspin said.

He implied Mr. McFarlane was floating a trial balloon by saying that White House press aides telephoned reporters to make sure they had not missed the significance of the national security adviser's remarks.

However, the White House spokesman, Mr. Djerejian, denounced "inaccurate reports in the press" that Mr. Shultz and Mr. McFarlane were at odds over the interpretation of the ABM treaty.

Article V of the treaty prohibits development, testing or deployment of ABM systems, "which are sea-based, air-based, space-based, or mobile-based." The treaty defines ABM systems as launchers, missiles and radar designed to intercept intercontinental ballistic missiles.

Article V, however, does not cover the exotic laser and particle beam weapons being researched in the SDI program. These weapons of "other physical principles" are covered in an addition to the treaty of agreed-upon statements and common understandings—specifically, statement "D."

It says, "In order to insure fulfillment of the obligation not to deploy ABM systems and their components . . . the parties agree that in the event ABM systems based on other physical principles and including components capable of substituting for ABM interceptor missiles, ABM launchers, or ABM radars are created in the future, specific limitations on such systems and their components would be subject to discussion [with the Soviets]."

Mr. McFarlane cited this statement in his television appearance as allowing development and testing of SDI components and systems.

Mr. SYMMS. The State Department has a double standard on arms control treaty compliance: The United States must bend over backward and overcomply, while the Soviets can violate with impunity.

Mr. President, I also ask unanimous consent to have printed in the RECORD the following letters:

First. Letter to the President from Senator SYMMS; October 17, 1985, on new Soviet SALT I violations with the SS-25 mobile ICBM.

Second. Letter to the President from Senators SYMMS and WALLOP, June 24, 1985, on Soviet SALT I violations.

Third. Letter to the President from Senators HELMS, SYMMS, HECHT, WALLOP, GARN, LAXALT, THURMOND,

and DENTON, on Soviet SALT violations and the summit, dated September 9, 1985 (with attachment).

Fourth. Soviet news agency Tass commentary on this letter, of October 9, 1985.

Fifth. Letter to the President from my distinguished senior colleague from Idaho, Senator JIM MCCLURE, dated October 4, 1985, on Soviet SALT violations and the summit.

NEW SOVIET SALT VIOLATIONS ON EVE OF SUMMIT

Mr. President, a new Soviet triple violation of SALT accords can now be announced for the first time. I hereby announce that the newly deployed Soviet SS-25 mobile intercontinental ballistic missile violates:

First. The 1972 SALT I Interim Agreement on Strategic Offensive Weapons, by defeating its objective and purpose.

Second. The 1974 SALT I Interim Agreement Procedures for Dismantling ICBM's.

Third. The 1979 SALT II Treaty, in multiple ways.

Let me explain why the new Soviet SS-25 ICBM violates these three SALT agreements. First, the Reagan administration has just dropped the "X" in the designation for the SS-25, which means that it is deployed and operational. The administration's October 1985 white paper on Soviet Strategic Defense Programs for the first time reveals that the SS-25 is operational. The Secretary of Defense, Mr. Weinberger, also confirmed this fact today. Second, according to this document the Soviets have announced SS-25 deployment themselves. Third, President Reagan stated in his February 1, 1985, report to Congress on Soviet SALT violations that Soviet deployment of the SS-25 would be a future violation of SALT I. Thus President Reagan will have to confirm these new violations before the November 19, 1985, United States-Soviet Geneva summit meeting.

The SS-25 defeats the object and purpose of the SALT I constraints on ICBM launchers, because it flies in the face of the U.S. unilateral statement saying that:

> The United States would consider the deployment of operational land-mobile ICBM launchers during the period of the interim agreement as inconsistent with the obligations of that agreement.

The SS-25 defeats the object and purpose of SALT I. The SALT I interim agreement was extended in October 1977 by mutual United States-Soviet parallel statements, and is of indefinite duration.

The SS-25 deployment violates the SALT I dismantling procedures, because the SS-25 is being supported from old SS-7 ICBM support facilities, which is directly prohibited.

Finally, the SS-25 violates SALT II, because it is a prohibited second type ICBM. It was prohibited by SALT II to be either tested or deployed. Its testing was also fully encrypted, another violation of SALT II. Its testing was conducted at night, from camouflaged launchers, also violating the SALT II provisions requiring that the United States be able to establish the relationship between a new type ICBM and its launchers. Finally, the SS-25 violates the covert MIRV'ing prohibition of SALT II, because its single warhead weighs much less than half the total SS-25 throw-weight.

Mr. President, I ask unanimous consent that an article from the Washington Times dated October 22, 1985, entitled "Soviet SS-25," be printed in the RECORD. I also ask unanimous consent to have printed in the RECORD a UPI story of today by Richard Gross entitled "Weinberger Charges SALT II Violation."

Mr. President, I ask finally that two articles by Mr. David S. Sullivan, one of my legislative assistants for defense and foreign affairs, be printed in the RECORD. Both articles have been cleared by the CIA. They are:

"Unknown Danger: The New Soviet Missile Gaps." This article will be published later this month in Japanese translation in the Japanese quarterly journal Defense Information; published by Sankei Shimbun.

"Soviet Negotiating Deception and Treaty Violations in Arms Control." This will be a chapter in a forthcoming book on Soviet strategic deception.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, October 17, 1985.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: I note that my questions posed to you with Senator Wallop on June 24, 1985 on Soviet violations of SALT I have not been answered.

The Soviet SS-25 mobile ICBM is now judged by both the Soviets and the U.S. to be operational at several Soviet missile complexes previously housing old SS-7 ICBM's. You stated in your February 1, 1985 Report to Congress on Soviet SALT violations that Soviet SS-25 deployment at old ICBM complexes would be a "future violation" of SALT I. Does this now confirmed Soviet deployment violate the SALT I ICBM dismantling procedures, and also violate SALT I by defeating its object and purpose? When will these and other Soviet SALT violations be confirmed to Congress?

Respectfully,

STEVE SYMMS,
U.S. Senator.

U.S. SENATE,
Washington, DC, June 24, 1985.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: We would like you to know that the Senate unanimously passed on June 11, 1985 an amendment to the State Department authorization bill requiring a Report to Congress on the Military Consequences of all Soviet SALT violations (enclosed). This report is long overdue, having been repeatedly requested from the Administration since March 1, 1984. We now request that this report be dealt with in the November 15, 1985 Report.

We are enclosing our own analysis of the military consequences of the Soviet SALT violations as well as our analysis of the 1978 JCS predictions on the effects of SALT II. We hope these will be of possible use by the JCS in writing their contribution to the required report of the Defense Department. We ask these be shown to Col. Dick Toy USAF and Commander Mariner Cox USN.

We note that in your June 10, 1985 Report to Congress on Continued U.S. SALT II Compliance, the Administration stated that "the Soviets have complied with the letter of SALT I" and that "The Soviets have not violated the SALT I limits on ICBM and SLBM launchers."

These statements completely contradict our 1980 and 1984 Republican Party Platform charge that there was a Carter-Mondale Administration coverup of Soviet SALT I violations. The 1980 Republican Party Platform stated: "The Republican Party deplores the attempts of the Carter Administration to cover-up Soviet non-compliance with arms control agreements . . . We pledge to end the Carter cover-up of Soviet violations of SALT I and II . . ." The 1984 Republican Party Platform repeated its condemnation of "Carter-Mondale efforts to cover-up Soviet violations of the 1972 Strategic Arms Limitation agreement . . ."

Moreover, the June 10, 1985 statements also totally contradict your own GAC Report released to Congress on October 10, 1984. The GAC Report states that Soviet deployment of the heavy SS-19 ICBM to replace the light SS-11 was a circumvention of SALT I defeating its objective and purpose. It also states that the Soviets violated SALT I by exceeding the SALT I SLBM ceiling and violated the prohibition of deliberate interference with U.S. National Technical Means of verification by their extensive camouflage, concealment and deception.

Ongoing Soviet deployment of the mobile SS-16, SS-24, and SS-25 ICBMs also defeats the object and purpose of SALT I, because it is inconsistent with the U.S. SALT I Unilateral Statement against mobile ICBM deployment.

Further, reported deployment of operational SS-25 mobile ICBMs at the Yurya old SS-7 complex violates SALT I dismantling procedures for SS-7 ICBMs.

In addition, you have confirmed that the Soviets are deploying long range SLCMs on their Stretch Yankee Class Submarine, circumventing the SALT I dismantling procedures.

In sum, there are at least 8 violations of SALT I, five of which are confirmed by Presidential Reports to Congress. Several others have been confirmed by former Secretary of State Henry Kissinger and former Secretary of Defense Melvin Laird.

Additional violations of SALT I mentioned in the press include the following:

1. Failure to deactivate old ICBMs on time, and continuous falsification of offical deactivation reports between 1975 and 1982;

2. Keeping 18 SS-9 FOBS ICBMs at an ICBM test range illegally operational;

3. Violation of Brezhnev's 1972 pledge not to build mobile ICBMs;

4. Violation of Brezhnev's 1972 pledge to dismantle the entire G Class of strategic submarines;

5. Deploying SS-11 ICBMs at SS-4 and SS-5 soft sites for covert soft launch in violation of the ceiling on ICBM launchers.

We request your comments on these additional Soviet SALT I violations.

Could you please explain to us the reasons for these important contradictions of our 1980 and 1984 Republican Party Platforms and your own GAC Report as soon as possible?

Sincerely,

STEVE SYMMS.
MALCOLM WALLOP.

U.S. SENATE,
Washington, DC, September 9, 1985.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: As loyal Reagan supporters, we are writing to share the strong concern you expressed to us on June 10, 1985 about the military implications of the Soviet SALT and other arms control treaty violations. We agree with your resolve to respond to the expanding pattern of Soviet violations. We strongly urge you to raise yet again the 32 Presidentially reported or confirmed Soviet violations with Soviet General Secretary Gorbachev at the November 19, 1985 Geneva Summit Meeting. Until the Soviets admit and reverse SALT violations, the existing arms control treaties and negotiating process only undermine the security of America and the Free World.

SOVIET SALT VIOLATIONS

You have courageously reported three times since January 23, 1984, on Soviet SALT and other arms control treaty violtions. We agree that the most dangerous Soviet violations are:

1. Disregard of qualitative constraints of SALT II, in particular, Soviet large-scale deployment of the prohibited second new-type ICBM, the mobile SS-25;

2. Hundreds of Soviet Strategic Nuclear Delivery Vehicles exceeding the SALT II launcher ceilings, when equality was mandated;

3. The prohibited Soviet SS-NX-23 heavy SLBM;

4. Expanding Soviet disregard for SALT I ABM Treaty limits, including Soviet ABM-mode tests of air defense missiles and radars;

5. The Krasnoyarsk ABM Battle Management Radar violations;

6. Soviet deployment of a prohibited radar and mobile ABM capability base for a nationwide ABM defense; and

7. Violation of the 1962 Kennedy-Khrushchev Agreement by sending offensive weapons to Cuba.

Attached for public reference is a comprehensive list of 32 Soviet SALT and other arms control treaty violations which you and your administration have reported or confirmed in the three reports you have sent to Congress, together with a list of 22 additional Soviet violations or circumventions reported in the press. This is the first time that these violations have been aggregated.

There are now reports of impending Soviet probable violation of the 1967 Treaty of Tlatelolco prohibiting nuclear weapons in Latin America, by their sending of a Soviet naval warship squadron with nuclear missiles to visit the Mexican port of Veracruz.

PROPORTIONATE RESPONSES

As you correctly pointed out in your June 10, 1985 statement to Congress on interim restraint, "proportionate responses" to these Soviet violations are necessary, and Congress responded by authorizing such proportionate responses in the FY 1986 Defense Authorization Bill.

Your three reports have been important steps in educating the American people about the Soviet threat, as was the declassified National Intelligence Estimate on the unprecedented Soviet offensive and defensive strategic buildups released to the Senate at White House request in June. We support your continued declassification efforts.

We are anxiously awaiting the study that you directed the Defense Department to prepare, the "Response to Soviet Violations Paper," due to you by November 15, 1985. Because you have announced that you intend to make this study part of your FY 1987 Defense budget request to Congress in January, 1986, we request consultation on the results on the "RSVP" study effort, as well as an advance copy of a summary of its most important conclusions as soon as you can make it available to Congress.

Against this background of these 32 Presidentially reported and confirmed Soviet violations, we hope that you will not give final approval to proceed with scrapping our highly survivable Poseidon submarines in order to comply with the unratified and "fatally flawed" SALT II Treaty which the Soviets are clearly violating. As you are well aware, there are serious Constitutional and legal problems involved in prolonged U.S. compliance with an unratified SALT II Treaty, beyond, the severe dangers to U.S. national security of U.S. unilateral compliance.

As you correctly stated to Congress on June 10, continued U.S. SALT II compliance and progress in arms control requires that "the Soviet Union take the positive, concrete steps to correct its non-compliance . . . and reverse its unparalleled and unwarranted military buildup." The impending Geneva U.S.-Soviet Summit may be the Soviets' last chance, and your best opportunity to remind the Soviet leadership of the necessity of reversing their arms control breaches.

GORBACHEV'S DENIALS

In this regard, we call your attention to the following bold claim of Soviet Communist Party General Secretary Gorbachev in the September 9, 1985 issue of Time magazine:

"There are also *still in effect* such treaties as the ABM Treaty, the SALT II provisions . . . the banning of nuclear weapons tests in three environments. *To this day, so far, they are in operation.* But even today, attempts are being made to remove these restraints or at least to raise the question of overturning the treaties, of abrogating them." (Italic added.)

We marvel at the brazenness of these deceptive and duplicitous Soviet denials that they are violating the ABM Treaty as well as SALT I and II and the nuclear testing bans. Gorbachev is attempting to blame concern about the viability of SALT I and II on the U.S. and deflect it from the Soviets. But the Soviet SALT violations are so obvious and so challenging to world peace that they can no longer be hidden by Soviet lies and deceptions. Unless reversed, these acts by themselves constitute the long feared Soviet "Break Out" from arms control restraints.

Previous U.S. Administrations have repeatedly vowed that if the U.S. detected any significant Soviet arms control violation, the U.S. would reassess the entire spectrum of U.S.-Soviet relations. We urge you to do this. Even the Carter Administration vowed that the U.S. would match or overmatch any Soviet strategic buildup in violation of SALT II. Gorbachev's brazen denials of Soviet violaticns indicate clearly that so far your effort expressed on June 10 to "go the extra mile" in U.S. interim restraint has been futile. If the Soviets will not even admit their violations, will they ever reverse them? It is time for you to act decisively.

As your own National Security Advisor stated on June 10: "There can not be a future regime of arms control without compliance." He added that "If arms control by extraordinary Soviet violations were to lose its meaning, we would have to build more systems clearly." In fact, we strongly urge you to invoke supreme U.S. national security interests and selectively withdraw from those provisions of arms control treaties that the Soviets are systematically violating. As your own National Security Advisor also stated on June 10, "Non-compliance does entail costs."

GORBACHEV'S BLACKMAIL THREATS

Mr. President, we also urge your vigilance and preparation for response to Soviet General Secretary Gorbachev's chilling new threats against world peace, also recently expressed in *Time* magazine:

"Relations between our two countries are continuing to deteriorate, the arms race is intensifying, and *the war threat is not subsiding.* . . . it looks like the stage is being set for a bout between some kind of political *'super gladiators'* . . . [the] situation today is highly complex, *very tense.* I would even go so far as to say *explosive* . . . would there not be a temptation to believe 'at last we have overtaken our partner. *Is it not time then to seek to achieve superiority and to untie our hands in the field of foreign policy?'* . . . time is passing and it might be too late [to reverse the crisis in U.S.-Soviet relations.] The train might have already left the station . . . We must not allow things to go so far as *confrontation* between our two countries . . . I would say that we would come to an *Unpredictable phase* in relations." (Time, September 9, 1985, italic added.)

Mr. President, these Gorbachev statements should be interpreted as explicit, extremely dangerous nuclear blackmail threats, from the top Soviet leader himself. These threats suggest that Gorbachev plans a confrontational Summit meeting: either you must abandon your own Strategic Defense Initiative and acquiesce to Soviet strategic superiority, or the Soviets may provoke a military, even a nuclear crisis in which they have clear preponderance and the U.S. would have to back down.

BREZHNEV'S SECRET BOAST

We remind you of the prophetic, then-secret boast by an earlier Soviet General Secretary, Leonid Brezhnev, before East European Communist leaders in Prague in the Spring of 1973, which is well on its way, unfortunately, to coming true:

"We are achieving with detente what our predecessors have been unable to achieve using the mailed fist . . . because of the decisive shift in the correlation of forces, by 1985 we will be able to exert our will wherever we need to."

The responsibility rests in your hands to make sure that Brezhnev's goal is not satisfied. You yourself have conceded Soviet strategic superiority publicly at least 7 times since 1982. Your National Security Advisor stated on June 10,: "there has been, clearly,

an increase in both the pace and quality of Soviet building programs. . . ." The declassified National Intelligence Estimate confirms many details of this unprecedented Soviet strategic buildup. The Soviets have gained their main objective of strategic superiority over the U.S. through their SALT Break Out violations, and thus they will be very reluctant to correct these violations. Indeed, deliberate Soviet efforts to counter U.S. National Technical Means of verification strongly indicate a Soviet intention to persevere in their violations.

Mr. President, we urge you to continue to stand up strongly for American national security interests by achieving the reversal of the Soviet SALT Break Out violations, either by bilateral diplomacy at the Summit or by selective U.S. abrogation and unilateral U.S. defense programs which proportionately respond to them.

MX AND SDI CUTBACKS

We note with grave concern the recent Congressionally imposed cutbacks in your Strategic Defense Initiative and in MX deployment, but we are especially alarmed with Defense Secretary Weinberger's recent agreement to stop MX deployment at no more than 50 ICBMs in existing Minuteman silos and not seek further MX deployment funds in the FY 1987 Defense Budget now in preparation at the Pentagon. This will delay the already long-delayed MX program another year, for no good reason, and we may not get even 100 MXs until after 1989, if then. Even the Carter Administration planned 200 survivable MX ICBMs, to be operational by early 1986. And as your June 10 Report to Congress stated: ". . . the integrity of the U.S. strategic modernization program must be maintained."

We believe that currently planned strategic force cutbacks go in precisely the opposite direction, especially at a time when the top Soviet leader is describing the international situation as "explosive." As your National Security Advisor stated on June 10, we should be "accelerating and adding to the U.S. strategic modernization program," in light of the Soviet violations.

Finally, we are reassured by your National Security Advisor's statement that you will "reach some decisions based on the [Defense] Secretary's report to [the President] in November. These would probably be reflected in the [FY 1987 Defense] budget submission in January."

ARMS CONTROL COMPLIANCE SUPPLEMENTAL

We urge you to assemble all of your proportional response options to the Soviet violations in a fiscal year 1986 Arms Control Compliance Supplemental Defense Request, so that both the Joint Chiefs of Staff and Congress can honestly assess the threats and requirements posed by the Soviet SALT Break Out violations in one package, unencumbered by other defense or budgetary considerations.

As your National Security Advisor stated on June 10, the Soviets must "get back in compliance, or you can expect compensating measures to be taken . . . we will take action to account for what they've already done in violation." But he added: "at the bottom, the basic criterion must be assuring the security of the United States." We agree.

YOUR LEGACY

We believe that your legacy should be that of the Leader who has tried to restore American strength, power, and moral authority. The people who gave you a landslide victory in both 1980 and 1984 gave you that mandate on the basis of this commitment. We urge you to continue to make this your legacy.

Sincerely,

Jesse Helms, Steve Symms, Chic Hecht, Malcolm Wallop, Jake Garn, Paul Laxalt, Strom Thurmond, and Jeremiah Denton.

ATTACHMENT: SOVIET ARMS CONTROL VIOLATIONS

In addition to addressing the military implications of the Soviet SALT violations and deceptions, we need to summarize these Presidentially confirmed Soviet arms control treaty violations. Moreover, when these violations were first released, they were downplayed by both the White House and by the media, so they are not in fact well-known at all. It is important to note further that these are the unanimously agreed findings of the national security departments and agencies of our government. There were no dissenting footnotes nor disagreeing qualifications by any part of the Executive Branch to these Presidential Reports to Congress. There are now 32 Soviet arms control treaty violations agreed and confirmed by the Executive Branch, and reported by the President to the Congress.

These 32 violations are summarized, for the first time aggregated in one place publicly, as follows according to the different treaties violated.

32 SOVIET ARMS CONTROL TREATY VIOLATIONS CONFIRMED AND AGREED WITHIN THE REAGAN ADMINISTRATION.

Box: 11 Presidentially confirmed Soviet violations of the 1979 SALT II Treaty

1. Soviet buildup of over 378 Strategic Nuclear Delivery Vehicles (SNDVs) above the 2504 level of Soviet SNDVs as of June, 1979;

2. Soviet failure to deactivate over 632 SNDVs down to the 2,250 SALT II SNDV level;

3. Soviet development and operational deployment at over 20 bases of an initial increment of 200 launchers for the SS-25 mobile ICBM is a violation of the SALT II prohibition on a second "new type" ICBM;

4. The Re-entry Vehicle of the SS-25 is less than one half the total missile Throw-Weight, constituting Covert MIRVing with a 3 MIRV capability;

5. The Soviet SS-NX-23 SLBM constitutes a prohibited heavy new SLBM;

6. Soviet production of more than 30 Backfire bombers per year—over 14 extra, illegal Backfire bombers, or several illegal Backfire squadrons—constitutes a Soviet violation of Brezhnev's Backfire bomber production pledge, which former President Carter told the Senate was an integral part of the SALT II Treaty;

7. Arctic basing of Backfire bombers, increasing their range, another violation of Brezhnev's Backfire bomber pledge;

8. Probably equipping bombers with a refueling probe, also contrary to Brezhnev's Backfire pledge, increasing Backfire's range illegally;

9. Soviet deliberate interference with US National Technical Means of verification, by a continuously expanding pattern of strategic Camouflage, Concealment, and Deception;

10. Almost total encryption of all new Soviet missile testing telemetry;

11. Probable Soviet deployment of 200 banned SS-16 mobile ICBMs.

These Soviet SALT II violations have enormous strategic significance, both military and political. Altogether, they amount to Soviet strategic offensive superiority. First, they result in about 632 more Soviet SNDVs than are allowed by SALT II. Second, they augment the already overwhelming Soviet first strike capability actually codified with US agreement in the terms of the SALT II Treaty itself. Even more importantly, US unilateral compliance with the unratified SALT II Treaty which the Soviets are confirmed to be violating at will actually demonstrates Soviet strategic offensive superiority to the world. If the numbers themselves did not demonstrate Soviet superiority, then overt US agreement to unequal levels of forces in complying contrary to its own laws and Constitution with an unratified SALT II Treaty clearly demonstrates US acquiesence to Soviet superiority. And the Soviets are estimated to be preparing to deploy over 700 more mobile ICBM launchers by 1987 in addition to their already overwhelming 6 to 1 superiority in ICBM warhead capabilities. The Soviets are already thus 10 to 15 years ahead of the US in strategic offensive capabilities.

Box: 7 Presidentially confirmed Soviet violations of the 1972 SALT I ABM Treaty

12. The siting, orientation, and capabilities of the Soviet Krasnoyarsk ABM Battle Management radar violate 3 provisions of the SALT I ABM Treaty;

13. ABM-mode tests of Soviet Surface-to-Air-Missiles and radars are highly probable violations of the SALT I ABM Treaty;

14. The Soviets may be developing and deploying a territorial, nationwide ABM defense, which would violate the SALT I ABM Treaty ban on developing even a base for a nationwide ABM defense;

15. Mobility of the ABM-3 system is a potential violation of the SALT I ABM Treaty, which bans mobile ABMs;

16. Soviet rapid relocation without prior notification of a "Flat Twin" ABM-3 mobile radar, creating the Kamchatka ABM test range, was a violation of the SALT I ABM Treaty;

17. Confirmed Soviet falsification of their dismantling of excess ABM test range launchers in 1974, which violated the 1974 SALT I ABM Treaty dismantling procedures;

18. Soviet deliberate concealment activities impede verification in violation of the SALT I ABM Treaty.

These Soviet violations of the SALT I ABM Treaty have enormous significance, both military and political. The Soviets are planning to deploy over 3,000 mobile ABM intercepters by 1987, for a nationwide ABM defense. They can already defend almost 20% of their strategic forces, and soon they will be able to defend 50 to 66%. The Soviets are over 10 years ahead of the US in strategic defenses.

Box: 4 Presidentially confirmed Soviet violations of the 1972 SALT I Interim Agreement on Offensive Weapons

19. Soviet deployment of the Heavy SS-19 ICBM and the Medium SS-17 ICBM to replace the Light SS-11 ICBM was a circumvention defeating the object and purpose of the SALT I Interim Agreement; this violation alone increased the Soviet counterforce threat by a factor of 6 and was as significant a setback for US national security as the loss of the Viet Nam War itself through Communist violation of the 1973 Paris Peace Agreement;

20. Soviet deployment of modern submarines exceeding the limit of 740 SLBM launchers without dismantling other ICBM or SLBM launchers, which the Soviets actually admitted, violated the SALT I Interim

Agreement; it actually took the Soviets until 1981, five years after the SALT I Interim Agreement expired, to deactivate all 209 SS-7/8s required;

21. Soviet deliberate Camouflage, Concealment and Deception activities impeded verification, in violation of the SALT I Interim Agreement;

22. Implied circumvention of the 1974 SALT I submarine dismantling procedures, through deployment of long-range, supersonic SLCMs on Stretch Y Class submarines.

Box: Presidential confirmation of manifold Soviet nuclear test ban violations

23. The 1958-1961 Nuclear Test Moratorium.

The Soviets breached a unilateral commitment by engaging in atmospheric nuclear weapons tests in August, 1961;

24. The Limited Test Ban Treaty of 1963.

The Soviets violated the Limited Test Ban Treaty by extra-territorial venting of radioactive nuclear debris from underground nuclear weapons tests. (There have been over 30 conclusively confirmed Soviet extraterritorial ventings, and hundreds of other probable and likely violations.)

25. The 1974 Threshold Test Ban Treaty.

The US Government has determined that the Soviet Union is likely to have violated the underground nuclear testing yield limit (150 kilotons) of the Threshold Test Ban Treaty. (See chart. There have now been well over 16 Soviet high yield tests violating the TTBT.)

The many Soviet nuclear test ban violations have allowed the Soviets to develop and test much more lethal warheads for their new ICBMs, SLBMs, and cruise missiles. Thus, these Soviet violations have enormous strategic significance.

Box: Presidential confirmation of Soviet violations of the Kennedy-Khrushchev agreement on Cuba of 1962

26. The Soviets breached a unlateral commitment by sending offensive weapons—intercontinental nuclear-delivery capable bombers, nuclear-delivery capable fighter-bombers, and various kinds of nuclear missile submarines—back to Cuba, beginning in 1969.

On September 14, 1983, President Reagan for a second time confirmed that the Soviet Union had violated the Kennedy-Khrushchev Agreement which ended the Cuban Missile Crisis: "That agreement has been abrogated many times by the Soviet Union and Cuba in the bringing of what can only be described as offensive weapons, not defensive, there." This Presidential statement has been backed up by the CIA Director, the Chairman of the Joint Chiefs of Staff, and the Under Secretary of Defense for Policy. Even the State Department concedes that the Soviets have violated the "spirit" of the Agreement.

Box: Other Soviet Arms Control Treaty violations confirmed by the President

27. The 1925 Geneva Protocol on Chemical Weapons. The United States Government has determined that the Soviet Union is violating the Geneva Protocol on Chemical Weapons by the prohibited first use in war of chemical weapons in Laos, Cambodia, and Afghanistan.

28. The 1972 Biological Weapons Convention. The United States Government has determined that the Soviet Union is violating the Biological Weapons Convention by maintaining an offensive biological warfare program and capabilities.

29. The Conventional Weapons Convention. The Soviets violated the Conventional Weapons Convention by using booby-trap mines and incendiary devices against civilians in Afghanistan.

30. The 1975 Helsinki Final Act. The United States Government has determined that the Soviet Union is violating the Helsinki Final Act by its inadequate notifications of its Warsaw Pact military exercises.

31. The Montreux Convention of 1936. The Soviets violated the Montreux Convention by transiting the Turkish Straits repeatedly with aircraft carriers. (The Greek Government, a signatory of the Montreux Convention, repeatedly protested these violations to the Soviets, to no avail.)

32. The 1982 Brezhnev SS-20 Moratorium. The Soviets breached their unilateral commitment to end SS-20 deployment by completing SS-20 launcher positions and continuing to deploy new SS-20s.

In sum, 11 of the 32 Presidentially confirmed Soviet violations relate to the SALT II Treaty, 7 relate to the SALT I ABM Treaty, and 4 relate to the SALT I Interim Agreement. Many relate to the nuclear weapons test ban agreements.

There have been three Presidential violations reports:

January 23, 1984;

October 10, 1984—The "GAC Report"; and

February 1, 1985.

There are six considerations which support the fact that the GAC Report is an authoritative Presidential Report:

1. The President requested it in 1982;

2. The President has embraced it publicly on June 14, 1984;

3. The GAC Report largely overlaps the January 23, 1984 report;

4. The GAC Report was reviewed within the Government;

5. Most of the GAC Report's conclusions are identical to those of the President's January 23, 1984 Report;

6. The President's National Security Advisor himself has stated that the GAC Report was a Presidential Report.

Box: 6 other Reagan administration charges of Soviet Treaty violations

1. Soviet violation of the 1945 Yalta Agreement, by denying free elections in Poland;

2. Soviet violation of the 1945 Potsdam Agreement, by occupying Eastern Europe;

3. Soviet violation of the United Nations Charter, through threatened aggression against Poland in 1980-1981;

4. Soviet violation of the Paris Peace Accords on ending the Indochina War, by continuing to build up the North Vietnamese military;

5. Soviet violation of various international agreements governing civil aviation, by the brutal KAL-007 shoot-down murder incident of 1983;

6. Soviet violation of the 1972 Incidents at Sea Agreement during the attempts to recover the KAL-007 "Black Box". In fact, there is strong evidence that the Soviets shot down KAL-007 in the first place in order to cover up some of their SALT II violations (such as a test of their illegal SS-25 second new type ICBM with full encryption of electronic telemetry signals) planned for that very night of 31 August-1 September 1983.

The Defense Department has stated that: "The U.S. should vigorously pursue compliance issues with the Soviet Union and demand that the Soviets take corrective action when we detect violations. If this fails, the U.S. should be prepared to take those measures necessary to maintain our national security in the face of Soviet violations."

But the Soviets are directly challenging the essence of the U.S. democratic political system by their 32 confirmed, conclusive agreed, arms control violations. They are boldly gambling that American democratic leaders cannot muster the leadership or collect the bipartisan political consensus necessary to demonstrate the political will to compensate for the Soviet SALT violations. The Soviets believe, with some justification derived from their direct experience with American cowardice and appeasement, that American political leaders are paralyzed and demoralized and unable to galvanize public support to challenge them and counteract their threats to our collective allied security.

The Soviets are already quite self-confident, and have reason to be. The Soviets know full well that they have an overwhelming 4 to 1 numerical advantage in ICBM warheads (counting DIA's best estimate of 14 warheads on each of 326 super heavy SS-18 ICBMs, giving the Soviets 8,500 ICBM warheads to only 2,100 for the U.S.), and their accuracy and megatonnage advantages give them over a 6 to 1 or even an 8 to 1 advantage in first strike, counterforce capabilities. The Soviets also have simultaneously over a 14 to 1 advantage in Intermediate Range Nuclear Force warheads against NATO. The Soviets are also deploying a nationwide ABM defense, capable soon of defending not only Moscow, but also ICBM fields and the whole nation. Thus the Soviets are able to threaten the U.S. with a strategic offensive first strike, and soon they will even be largely immune from a limited U.S. retaliation.

Box: 22 additional Soviet SALT circumventions or violations

Assistant Secretary of Defense Richard Perle has testified to the Senate that the existing violations reports from the President are "illustrative only", and that "twenty to twenty-five" more Soviet violations remain to be publicly confirmed by the President to the Congress. The following 22 additional Soviet SALT violations have been widely discussed in the press.

1. Deploying 12 to 14 warheads on each SS-18 ICBM, when SALT II allows only 10, increasing the Soviet ICBM warhead total by over 1,200; The latest NIE reportedly reaches this conclusion.

2. Developing and testing the Soviet SS-18 ICBM rapid-reload and refire capability as a circumvention of all the SALT II ceilings, doubling the Soviet SS-18 force;

3. Soviet testing of an ABM rapid-reload and refire capability prohibited by the SALT I ABM Treaty;

4. Soviet failure to dismantle 18 SS-9 Fractional Orbital Bombardment ICBMs banned by the SALT II Treaty, which also circumvented the SALT I ICBM ceiling;

5. Soviet deployment of SS-11 ICBMs at SS-4 MRBM and SS-5 IRBM soft launch pads for covert soft launch in circumvention of all SALT I and SALT II ceilings;

6. Soviet maintenance of several thousand stockpiled ICBMs, SLBMs, and strategic cruise missiles as potentially operational, thus circumventing all SALT II ceilings;

7. Soviet deployment and deployment of the SS-24 rail mobile ICBM, which will be above SALT II launcher ceilings, and which reportedly may have heavier throwweight than the Soviet heavy SS-19, and which

therefore is a prohibited new very heavy ICBM;

8. Probable Soviet exceeding of the SALT II ceiling of 820 MIRVed ICBMs, by reportedly deploying covertly MIRVed mobile SS-25 ICBMs, and by preparations to deploy MIRVed SS-24 mobile ICBMs;

9. Soviet failure to deactivate old ICBMs on time, in violation of the SALT I ICBM ceilings and 1974 dismantling procedures, and continuous falsification of official deactivation reports between 1975 and 1981;

10. Ongoing Soviet deployment of the mobile SS-16, mobile SS-24, and mobile SS-25 ICBMs, which circumvents and defeats the object and purpose of SALT I, because it is inconsistent with the US SALT I Unilateral Statement against mobile ICBM deployment.

11. Reported Soviet deployment of operational SS-25 mobile ICBMs using old SS-7 ICBM support facilities at the Yurya old SS-7 complex, which violates the SALT I dismantling procedures for old SS-7 ICBMs.

12. Violation of the late Soviet President Brazhnev's 1972 SALT I pledge not to build mobile ICBMs.

13. Violation of the late Soviet President Brezhnev's 1972 SALT I pledge to dismantle the entire G Class of strategic missile submarines.

14. Soviet violation of the SALT II ceilings of 1,200 MIRV ICBM and MIRV SLBMs, and the 1,320 ceiling on MIRV launchers and intercontinental bombers with long-range ALCMs, through deployment of excess MIRVed ICBM and MIRVed SLBMs and over 50 Bear H bombers and over 250 intercontinental Backfire bombers capable of carrying long-range ALCMs.

15. Soviet circumvention of the SALT I ABM Treaty, by giving the Moscow ABM-3 complex the capability to defend over 300 adjacent MIRVed ICBM silos.

16. Soviet violation of the 1971 Agreement to Reduce the Risk of Outbreak of Nuclear War, by jamming US early warning detection systems, failing to notify the US of this jamming, and failing to notify the US of the early April 1984 salvo launch of multiple SS-20s toward the US.

17. Soviet flight-testing of their new mobile ICBM launchers continuously concealed by camouflage, thereby violating the SALT II provision that the US must be able to determine the relationship between a new missile and its launcher.

18. Soviet achievement of "unilateral advantages" through their circumventions, violations and negotiating deceptions related to SALT I and II. These Soviet unilateral advantages violate the 1972 Agreement on Basic Principles of US-Soviet Relations, which is specified in the Preamble to the SALT II Treaty as a fundamental element of SALT II.

19. Soviet violation of the June 1973 Agreement on the Prevention of Nuclear War, through their hostile actions and hostile threats in the October 1973 Middle East War. (The Federal Republic of Germany has made this charge against the Soviets.)

20. Soviet direct interference with US National Technical Means of SALT verification, in a reported 1980 incident in which Soviet electronic warfare technology actually took control of a US intelligence satellite, actually rendering it useless during a key Soviet missile test. The incident is a clear violation of SALT I and II provisions. Moreover, the Soviets have reportedly blinded US satellites with lasers, and are jamming US electronic collection satellites and other systems.

21. SALT II permits no increase in the throwweight of the super heavy SS-18 ICBM, and no new type of very heavy ICBM to replace it. The Soviets appear to be doing both: developing a 3rd new type ICBM which is even heavier than the SS-18.

22. Any follow-on to the heavy SS-24 will have to be within 5% of its throwweight and other characteristics, or else it is a prohibited new type ICBM. The SS-24 follow-on under development is a 4th new type ICBM, when SALT II allows only one new type ICMB, and the SS-24 follow-on also appears to have even more throwweight than the heavy SS-24, which is already probably heavier than the SS-19.

The Soviets have thus gained overwhelming strategic superiority over the US through their SALT violations and thus they will be very reluctant to correct their violations. Indeed, deliberate Soviet efforts to counter US National Technical Means of verification strongly indicate a Soviet intention to persevere in circumventing and violating treaties.

U.S. FOREIGN BROADCAST INFORMATION SERVICE

[Soviet Union Daily Report October 10, 1985—as it appeared October 9, 1985 in Soviet News Agency TASS]

Commentator: Vladimir Bogachev.

On the eve of the Soviet-American summit meeting, nuclear war lobbyists in all echelons of executive and legislative power of the United States have launched a frenzied campaign aimed at preventing the very possibility of reaching new agreements to curb the arms race and at frustrating the agreements now in effect.

Eight American Republican Senators, notorious for their vision of the world, "through the notch of the gunsight" who are apparently concerned over the positive reaction of the world public to the fresh Soviet peace initiatives, have addressed an open letter to President Reagan, assuring the U.S. President that allegedly under the present day conditions "the existing arms control treaties and negotiating process only undermine the security of America and the free world." To substantiate their conclusions on ways to "ensure the security of the United States," Senators Jesse Helms, Steve Symms, Chic Hecht, Malcolm Wallop, Jake Garn, Paul Laxalt, Strom Thurmond, and Jeremiah Denton found no better arguments than the hackneyed "facts" cooked up by the Pentagon about the alleged violation by the Soviet Union of the provisions of the SALT I treaty and of the SALT II treaty which, for that matter, the United States has not ratified to this day.

Judging by the letter, the Senators are extremely concerned over the recent promise by the U.S. President in public to "go the extra mile" in search of a peaceful resolution of the problems confronting mankind. They advised Reagan to give up that promise, and described such efforts as "futile."

The senators do not stint dark paint in order to intimidate their own president and make him exclude in advance the possibility of reaching any agreements with the Soviet Union on lessening the danger of a nuclear catastrophe. The eight legislators described, in particular, the Soviet proposals aimed at preventing the arms race on outer space and ending it on earth as "extremely dangerous nuclear blackmail threats." Claiming that their acceptance by the United States "may provide a military, even nuclear crisis."

Thurmond, Laxalt, and their colleagues do not conceal what measures "to restore American moral authority" they expect from the President in the near future. Among them, refusal to disassemble the "Poseidon" submarines in violation of the provision of the SALT II treaty, reassessment of the "entire spectrum of U.S.-Soviet relations" certainly, not toward improving them, continuation of the unbridled campaign of "Soviet military threat." Allegations, and intensive deployment of the U.S. "MX" ICBMs, "accelerating and adding to the U.S. strategic modernization program."

The letter explicitly urges the President not to strive to win the laurels of a peacemaker in an attempt at insuring a lowering of the level of military confrontation, but rather make efforts to come into history from the "positions of strength."

The letter from the eight senators to the President is evidence that the upcoming Geneva summit meeting, the Soviet Union's peace initiative, have increased the polarization between the supporters of normalizing international relations and advocates of confrontation in the United States, the latter already going beyond the limits of common sense.

U.S. SENATE,
Washington, DC., October 4, 1985.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: I am writing to share the strong concern you expressed to us on June 10, 1985 about the military implications of the Soviet SALT and other arms control treaty violations. I agree with your resolve to respond to the expanding pattern of Soviet violations. I strongly urge you to raise yet again the 32 Presidentially reported or confirmed Soviet violations with Soviet General Secretary Gorbachev at the November 19, 1985 Geneva Summit Meeting. Until the Soviets admit and reverse their SALT violations, full U.S. compliance with existing arms control treaties only undermines the security of America.

Attached for public reference is a comprehensive list of 32 Soviet SALT and other arms control treaty violations which you have reported or confirmed in the three reports you have sent to Congress, together with a list of 22 additional Soviet violations or circumventions reported in the press.

PROPORTIONATE RESPONSES

As you correctly pointed out in your June 10, 1985 statement to Congress on interim restraint, "proportionate responses" to these Soviet violations are necessary, and Congress responded by authorizing such proportionate responses in the FY 1986 Defense Authorization Bill.

I am anxiously awaiting the study that you directed the Defense Department to prepare, the "Response to Soviet Violations Paper," due to you by November 15, 1985. Because you have announced that you intend to make this study part of your FY 1987 Defense Budget request to Congress in January, 1986, I request consultation on the results of the "RSVP" study effort, as well as an advance copy of a summary of its most important conclusions as soon as you can make it available to Congress.

As you correctly stated to Congress on June 10, continued U.S. SALT II compliance and progress in arms control requires that "the Soviet Union take the positive, concrete steps to correct its non-compliance . . . and reverse its unparalled and unwarranted military buildup."

The impending Geneva U.S.-Soviet Summit may be the Soviets' last chance, and your best opportunity to remind the Soviet leadership of the necessity of reversing their arms control breaches.

As your own National Security Advisor stated on June 10: "There can not be a future regime of arms control without compliance." He added that "If arms control by extraordinary Soviet violations were to lose its meaning, we would have to build more systems clearly." I strongly urge you to invoke supreme U.S. national security interests to proportionately respond to the Soviet violations, even if these U.S. responses would violate provisions of arms control treaties. As your own National Security Advisor also stated on June 10, "Noncompliance does entail costs."

The Soviets have gained their main objective of strategic superiority over the U.S. through their SALT Break Out violations, and thus they will be very reluctant to correct these violations. Indeed, deliberate Soviet efforts to counter U.S. National Technical Means of verification strongly indicate a Soviet intention to persevere in their violations.

MX AND SDI CUTBACKS

I note with grave concern the recent Congressionally imposed cutbacks in your Strategic Defense Initiative and in MX deployment, but I am especially alarmed with Defense Secretary Weinberger's recent agreement to stop MX deployment at no more than 50 ICBMs in existing Minuteman silos and not seek further MX deployment funds in the FY 1987 Defense Budget now in preparation at the Pentagon. This will delay the already long-delayed MX program another year, for no good reason, and we may not get even 100 MXs until after 1989, if then. Even the Carter Administration planned 200 survivable MX ICBMs, to be operational by early 1986. And as your June 10 Report to Congress stated: ". . . the integrity of the U.S. strategic modernization program must be maintained."

I believe that currently planned strategic force cutbacks go in precisely the opposite direction, especially at a time when the top Soviet leader is describing the international situation as "explosive." As your National Security Advisor stated on June 10, we should be "accelerating and adding to the U.S. strategic modernization program," in light of the Soviet violations.

Finally, I am reassured by your National Security Advisor's statement that you will "reach some decisions based on the [Defense] Secretary's report to [the President] in November. These would probably be reflected in the [FY 1987 Defense] budget submissions in January."

ARMS CONTROL COMPLIANCE SUPPLEMENTAL

I urge you to assemble all of your proportional response options to the Soviet violations in a FY 1986 Arms Control Compliance Supplemental Defense Request, so that both the Joint Chiefs of Staff and Congress can honestly assess the threats and requirements posed by the Soviet SALT Break Out violations in one package, unencumbered by other defense or budgetary considerations.

As your National Security Advisor stated on June 10, the Soviets must "get back in compliance, or you can expect compensating measures to be taken . . . we will take action to account for what they've already done in violation."

YOUR LEGACY

I believe that your legacy should be that of the Leader who has tried to restore American strength, power, and moral authority. The people who gave you a landslide victory in both 1980 and 1984 gave you that mandate on the basis of this commitment. We urge you to continue to make this your legacy.

Respectfully,

JAMES A. MCCLURE,
U.S. Senator.

[From the Washington Times, Oct. 22, 1985]

SOVIET SS-25

The Defense Department is expected to confirm soon, possibly today that the Soviets have deployed a new mobile ICBM, the SS-25. The charge could come in a speech today by Defense Secretary Caspar Wineberger on the Strategic Defense Initiative.

The SS-25 is considered a Soviet violation of the 1979 Salt II arms control agreement allowing each side only one new ICBM, according to Pentagon officials who spoke on the grounds they remain unnamed. The Soviets have already said the larger SSX-24, currently being flight tested, is that missile. The Soviets claim the SS-25 is only a modification of an older missile, the SS-13.

In April, the Pentagon said in its annual edition of Soviet Military Power that two launch sites, probably for the SS-25, were nearing operational status. Officials would not say how many bases were in the deployment. Other government sources said as many as 45 bases may be involved.

WEINBERGER CHARGES SALT 2 VIOLATION

(By Richard C. Gross)

WASHINGTON.—Defense Secretary Caspar Weinberger accused the Soviet Union Tuesday of "an unquestionable violation" of the SALT 2 arms control treaty by deploying a new, mobile intercontinental missile called the SS-25.

Both Pentagon and State Department officials said deployment of the SS-25 was no surprise, and Weinberger's disclosure of the latest Soviet move appeared to be another step in the superpower manuevering before the Nov. 19-20 summit meeting of President Reagan and Kremlin leader Mikhail Gorbachev.

The summit is expected to be dominated by discussion of efforts to quell the nuclear arms race, and Weinberger coupled his SS-25 complaint with the observation, "Recent history shows that arms control has hardly been a raving success."

Weinberger referred to deployment of the SS-25 during a staunch defense of Reagan's "Star Wars" anti-missile research program, which Moscow has cited as a key stumbling block to a new arms pact.

The secretary said the Soviets have displayed "a stunning degree of hypocrisy" in assailing the U.S. Strategic Defense Initiative because of their "own vigorous strategic defense programs."

U.S. officials argue deployment of the SS-25 violates the 1979 SALT 2 pact because the treaty allows each side to develop only one new intercontinental ballistic missile and the Soviets have built two. The SALT 2 treaty has been signed by both sides. Even though the Senate never ratified the pact, both superpowers have agreed to abide by it.

Weinberger, in remarks to a conference sponsored by the Ethics and Policy Center, said, "Today I can officially confirm that one of their new ICBMs, the mobile SS-25, is now being deployed and is an unquestionable violation of Soviet assurances given to us under the SALT 2 accord."

The Soviets have denied the SS-25 is a new missile, asserting it is an updated version of the older single-warhead SS-13. A new U.S. ICBM the 10-warhead MX is scheduled for installation in old Minuteman missile silos at Warren Air Force Base, Wyo., in 1986.

The SS-25 has one nuclear warhead, measures about 60 feet long—about the size of the multiple warhead U.S. Minuteman 3 missile—and has a range of 6,560 miles. It can be transported on roads in launchers equipped with sliding roofs and Weinberger said it is "an extremely versatile weapon."

"The SS-25 violates the SALT 2 agreement that permits development of only one new type of ICBM," Weinberger said. "Their first new type developed, the SS-X-24, is now being tested."

The SS-X-25—the "X" stands for experimental—is a bigger missile with multiple warheads. Pentagon officials have said they expect it will go into the field this year.

Kremlin negotiators told U.S. officials in March at the Geneva arms talks the SS-25 was being deployed and a senior Pentagon official said U.S. intelligence confirmed the deployment in late spring or early summer.

"We've been watching this thing for some time now," said the official, who spoke on condition he not be identified. "This is not surprising. It has been expected for a long time."

Similarly, State Department spokesman Bernard Kalb, citing an April report from the Pentagon that Moscow was moving to deploy the new missile, said, "The operational status of the SS-X-25 . . . comes as no surprise."

The Pentagon official said the Soviets have not yet deployed large numbers of the SS-25, but the United States expects "a lot" will be.

The significance of a mobile missile, which until the SS-25 has been confined to medium range weapons possessed by both superpowers, is that they are less vulnerable to attack. The Reagan administration gave up trying to make the MX mobile because of the high cost and congressional opposition.

While the United States does not have a mobile ICMB, it is developing a single-warhead missile, nicknamed Midgetman, that may be transported in vehicles hardened to withstand nuclear blasts.

UNKNOWN DANGER: THE NEW SOVIET MISSILE GAPS

(By David S. Sullivan)

United States President Ronald Reagan has publicly conceded that the Soviet Union has achieved overwelming strategic superiority over the United States at least eight times since 1982. These declarations of a starkly true fact have extremely serious consequences for world peace, but this fact of US strategic nuclear inferiority is not well known around the Free World or even in the United States.

The full implications of the reality of Soviet strategic superiority have yet to be fully understood in American politics, defense planning and budgeting, and diplomacy.

How have the Soviets achieved this strategic superiority so decisively and so successfully without provoking an American response?

In a nutshell, the "arms control process" has been responsible for Soviet strategic superiority.

ARMS CONTROL HAS LED TO SOVIET SUPERIORITY

President Reagan himself realized this fact as early as May 9, 1982, when he stated:

"So far, the Soviet Union has used arms control negotiations primarily as an instrument to restrict US defense programs, and in conjunction with their own arms buildup, as a means to enhance Soviet power and prestige."

An awareness of this truth is only now beginning to permeate our US Defense and Intelligence establishments. For example, the Defense Department has stated recently that:

"The Soviet Union regards arms control negotiations as arenas of political conflict in which important military advantages can be gained or lost. The Soviet leadership does not think in terms of mutuality or perceive arms control negotiations as a means of reducing arms. They attempt at every turn to achieve strategic advantage."

Another recent Defense Department document was even more critical of the arms control process:

"Current Soviet policy on arms agreements is dominated by their attempts to derive unilateral advantage from arms negotiations and agreements, by accepting only arrangements that permit continued Soviet increases in military strength while using the negotiation process to inhibit Western increases in military strength."

Even the US Intelligence Community, which so often has underestimated Soviet strategic strength, has finally reached the same conclusion. The most recent Central Intelligence Agency National Intelligence Estimate on Soviet strategic forces was in June 1985 declassified by the White House and released to the US Senate. NIE-11-3-8-85 states:

"Soviet leaders view arms control policy as an important factor in advancing their strategy of achieving strategic advantage. Moscow has long believed that arms control must first and foremost protect the capabilities of Soviet military forces relative to their opponents."

Defense Secretary Weinberger has been even more succinct, when he stated in December, 1984, that:

"We now face precisely the situation that SALT I and SALT II were supposed to prevent."

And President Reagan's National Security Advisor has been quoted as saying last January:

"The US strategic buildup has not worked, and has done nothing to close the window of vulnerability. In fact, American land-based missiles have become even more vulnerable to Soviet first strike attack over the past few years."

THE ERODING US DETERRENCE CAPABILITY

What is nuclear deterrence all about? What are the facts of current reality regarding deterrence? This article explains and analyizes these facts and comes to the distressing conclusion that US deterrence is already dangerously weak. But despite having already achieved strategic nuclear superiority over the US and gravely weakened US deterrence, the USSR is beginning an enormous new strategic buildup which already results in four dangerous new Missile Gaps.

The whole Free World naturally wants peace and security in the face of the threat of nuclear war. US President Reagan exemplified this Free World hope and fear when he stated recently:

"We must never forget what nuclear weapons wrought upon Hiroshima and Nagasaki." (The Washington Post, August 7, 1985.)

But President Reagan then added:

"Yet we must remain mindful that our maintenance of a strong nuclear deterrent has for four decades ensured the security of the United States and the freedom of our allies in Asia and Europe."

The paramount question of world peace and stability today is whether the US has in fact maintained "a strong nuclear deterrent" for the security of itself and its allies. Can the Free World prevent future Hiroshimas and preserve world peace if the American nuclear deterrent is weakened? Can we prevent Soviet nuclear blackmail and intimidation? Clearly, the answer is that the USSR has already neutralized most of the US deterrent capability, even before beginning its new strategic buildup and four new Missile Gaps.

We should recall that in 1960 the Soviet Union made a very explicit and clearcut nuclear blackmail threat to Japan. The USSR overtly threatened Japan with the possibility of nuclear war if Japan ratified the US-Japan Security Treaty, signed January 19, 1960. The only force preventing this Soviet threat from being carried out was the extended deterrence provided by the US strategic nuclear forces. But at that time, the US was strong in intercontinental nuclear capability, while the USSR had mostly only intermediate range missiles.

Colonel John Collins of the U.S. Congressional Research Service of the Library of Congress has written in the most recent edition of his authoritative series on the U.S.-Soviet Military Balance that since 1980:

"U.S. promises to provide a nuclear umbrella for allies lost considerable credibility, because we could not unleash assured destruction stikes against the Soviet Union or defend NATO or Asian friends without risking national suicide."

On top of existing Soviet stategic superiority, there are in fact four dangerous new Soviet missile gaps developing which are not yet well known. President Reagan again warned in The Washington Post of August 6, 1985:

The Soviet Union is ahead of us in the development and the modernization of nuclear weapons . . . they had finished their tests on their [SS-] 24s and [SS-] 25s, the [SS-18 which is comparable to our MX. And we have not yet begun the testing and certainly haven't completed it in some of our weapons of that same type to keep pace with them . . . we would then not be able to catch up with them. . ."

President Reagan also warned in The Washington Post of April 2, 1985:

"The Soviet Union virtually outnumbers us in any type of weapon you want to name . . . They are about three to one in nuclear megatonnage over us."

These alarming Presidential statements about already existing Soviet superiority are even more worrisome when compared to the following declassified testimony based on the U.S. Central Intelligence Agency's National Intelligence Estimate 11-3-8-85 released to the U.S. Senate on June 26, 1985:

"By the mid-1990's, nearly all of the Soviets' currently deployed intercontinental attack forces—land and sea-based ballistic missiles and heavy bombers—will be *replaced* by new and improved systems. *New mobile ICBMs are about to enter the force.*"

These recent Presidential and CIA statements concerning Soviet strategic superiority should alarm all Americans and all Free peoples seeking protection from Soviet nuclear attack by relying on the "extended deterrence" of the U.S. "nuclear umbrella."

CURRENT SOVIET SUPERIORITY: FIRST STRIKE CAPABILITY

Soviet strategic offensive and defensive missile deployments in space and modernizations programs now underway already pose an unprecedented threat to all three legs of America's deterrent strategic triad of Interncontinental Ballistic Missles (ICBMs), Submarine-Launched Ballistic Missiles (SLBMs), and intercontinental bombers.

Already, the Soviets have deployed over 1,600 ICBMs reportedly carrying over 8,500 warheads which are capable of posing a severe first strike threat against all U.S. strategic forces of the Triad. Using only a small fraction of their ICBM warheads, the Soviets can even today threaten to wipe out 100% of the 1,000 U.S. ICBMs in fixed silos, 75% of the U.S. intercontinental bomber force not on strip "alert" at 25 bases, and 50% of the U.S. SLBM force not on missile patrol and tied up to piers at 7 bases.

The 25% of the US bomber force on strip alert surviving must then penetrate the most awesome air defenses in the world: over 13,000 anti-aircraft Surface-to-Air Missiles (SAMs) and over 3,000 air defense interceptor aircraft. Thus the chances of about 60 US alert bombers getting through to attack their Soviet targets are not good.

The 50% of the US SLBM force surviving, about 15 submarines on missile patrol, also may not be able to retaliate against their Soviet targets. Only about 3 of these 15 submarines are reportedly able to receive communications at any one time from the President. Moreover, these submarines reportedly can now be detected by new Soviet Salyut 7 spacecraft capable of using Synthetic Aperature Radars to find US submarines even while deeply submerged on patrol. Soviet espionage breakthroughs (such as the shocking Walker spy case against the US Navy submarine fleet) could also enable the Soviets to locate and barrage US missile submarine patrol areas with only as few as several hundred ICBM warheads.

Thus it is theoretically possible that even today, without any further Soviet buildup whatsoever, the Soviet Union is capable of wiping out in a first strike almost all US ICBMs, bombers, and SLBMs, using only a small fraction of their 8,500 plus highly accurate and high yield ICBM warheads. This capability need never be used to be highly significant in world politics, because the Soviets need to subtly brandish this capability in order to intimidate and Blackmail.

Those few US SLBMs that survived and received the Presidential order to retaliate would then have to penetrate the existing massive Soviet defenses.

The Soviets also have the world's only Anti-Ballistic Missile system, which is located around Moscow, and which is now being modernized. There is unmistakable evidence that the Soviets are in addition deploying a nationwide ABM defense system, in clear violation of the SALT I ABM Treaty. When the Soviets make this nationwide ABM defense sytem operational in two years, they would be able to ensure that even the few US SLBMs that might survive a first strike and received the order to retaliate, would never reach their targets.

Thus in sum, two and one half legs of the American strategic Triad are now totally vulnerable and checkmated, and even our

few patrolling missile submarines may soon also be vulnerable.

These facts of current reality have been developing for several years, and the long observable trends explain why US Defense Secretary Weinberger was able to accurately forecast to the US Senate in 1981 that the "window of vulnerability will be at its widest in the period 1985-1986." But unfortunately, the window of vulnerability will not close any time soon, will indeed become even worse during the next five years, and may become permanent due to lack of American political will to close the missile gaps described below.

US Defense Secretary Weinberger stated on August 8, 1984 that:

"An effective Soviet capability to negate all legs of the US strategic Triad could be used for political purposes to coerce the US and her allies indirectly, through its very existence, or directly via military threats, especially if joined to superior Soviet conventional, chemical-biological, or theater nuclear capability. This Administration will never allow this to occur."

Unfortunately, this situation has already occurred, as President Reagan himself has repeatedly admitted.

This grim assessment is reflected in the recently declassified US Central Intelligence Agency National Intelligence Estimate 11-3-8-85. The already effective and real Soviet strategic offensive first strike capability and the emerging Soviet nationwide ABM defense capability reflected in the new NIE 11-3-8-85 are based on the following four Soviet strategic programs:

1. A furious Soviet buildup during the 1960's 1970s, and 1980s in nuclear warheads for ICBMs, SLBMs, bombers, and cruise missiles;

2. A vast upgrade in coverage and capability in ballistic missile defenses, air defenses, and civil defenses;

3. A nearly operational capability to detect submerged US submarines from space satellites;

4. Four already operational types of Anti-satellite weapons systems capable of disrupting US strategic command and control, early warning, and intelligence surveillance systems.

A top US defense official has testified that "Major programs recently deployed or now late in development were generally initiated at the highest of Soviet leadership about ten years ago," indicating the long term nature of the development of the Soviet threat.

These four Soviet strategic programs represent a Soviet thrust toward World domination. This article is only going to address the first two Soviet programs, due to lack of space, but Soviet space surveillance and ASAT capabilities are even more deserving of our concern.

A Reagan Administration arms control official warned on August 7, 1985: "The Soviet Union possess a tremendous capability to launch a devastating first strike against the US, and they are continuing to expand that capability." This statement confirms the seriousness of what follows.

As the recently declassified NIE states:

"Soviet leaders are attempting to prepare their military forces for the possibility that they will actually have to fight a nuclear war."

In a recent speech commemorating World War II Victory in Europe Day, President Reagan described the Soviet "first strike" capability, and alarmingly warned that the Soviet threat now emerging threatens "deterrence itself".

THE DANGEROUS NEW SOVIET MISSILE GAPS

There are four serious Missile Gaps today between the United States and the Soviet Union, each of which is much more serious than the famous 1957-1961 "Missile Gap".

The 1957-1961 "Missile Gap" was thought at the time to be a gap in Inter-Continental Ballistic Missiles—ICBMs. Americans thought that the Soviets were way ahead of the United States at that time in ICBMs. As President Kennedy discovered through US satellite reconnaissance just after he took office in January 1961, however, there was no ICBM gap. The US was actually ahead of the Soviets by a factor of about 6 to 1 in this key category of weaponry at the time.

But there was in fact a gap which was almost equally dangerous, especially to US allies, in Intermediate Range Ballistic Missiles—IRBMs. In the late 1950s, the Soviets had massively deployed IRBMs targeted upon NATO Europe and Japan, and the US was vastly outnumbered in this category of weaponry.

Today, the US and Free World face four much more dangerous Missile Gaps. These Missile Gaps all relate to mobile missiles. Today, the Soviets are way ahead of the US in: mobile ICBMs; mobile IRBMs; mobile cruise missiles; and mobile Anti-Ballistic Missiles.

In fact, the US does not even have a single mobile missile in three of these categories, and only has deployed a handful of mobile cruise missiles, and in addition has two and one half legs of its strategic Triad already totally vulnerable to a Soviet first strike.

SOVIET MOBILE ICBM GAP

There are credible press reports that the US CIA NIE 11-3-8-85 mentioned above estimates that during the next 3 years the Soviets will build as many as 400 to 700 additional new mobile launchers for their new, covertly triple MIRVed, road mobile, SS-25 ICBM, and their new rail-mobile SS-24 which carries 10 MIRVs. All of these 400 to 700 new mobile ICBM launchers are likely to be additive to the existing Soviet ICBM force of over 1400 fixed silos, and in addition, to be rapidly reloadable, and refirable with several additional salvos. To repeat, these new mobile ICBMs will be in addition to 1400 fixed Soviet ICBM silos, and in addition to 200 mobile SS-16 ICBMs deployed in violation of the SALT II Treaty.

By 1988, the new US NIE reportedly estimates that the Soviets will have deployed 400 to 700 mobile SS-24 and SS-25 ICBMs. This table illustrates deployment of only 400 estimated mobile SS-24s and SS25s, which is a conservative, realistic estimate:

SOVIET ICBM FORCE, 1988

Launchers and Warheads: 326 SS-18s with 12 to 14 warheads each, 3,912/4,564; 360 SS-19s with 6 warheads each, 2,160.

300 silos: 150 SS-24s with 10 warheads each, 1,500; 150 SS-24s with 10 warheads each, 1,500; 370 SS-11s with 1 warhead each, 370; 60 SS-25s with 3 warheads each, 180.

Silo: 1,416 launchers subtotal, 9,622.

Mobile, 200 SS-16s with 1 warhead each, 200.

Mobile, 200 SS-24s with 10 warheads each, 2,000.

Mobile, 200 SS-25s with 3 warheads each, 600.

Total: 2,016 silo and mobile ICBM launchers. 12,422 to 13,074 ICBM warheads.

According to credible press reports, over 20 bases for SS-25 mobile ICBMs are already under construction during the year of 1985, accounting for deployment of at least 200 mobile SS-25s. And as Assistant Defense Secretary Richard Perle has confirmed: "It is the Soviet Union alone that has mobile missiles with multiple warheads of intercontinental range."

And the latest NIE also confirms:

"The number of deployed strategic force warheads will increase by a few thousand over the next five years, with potential greater expansion in the 1990s."

Defense Secretary Weinberger testified to the Senate on April 29, 1982 that the US:

"Lacked the requisite military capability for adequate nuclear deterrence as well as conventional defense of our vital objectives and commitments . . . our military capabilities would become increasingly inadequate to deter aggression."

This authoritative statement has turned out to be, unfortunately, all too accurate.

Even more significantly, in January 1985 in his Strategic Defense Initiative justification White Paper, President Reagan again conceded that the US is so inferior to the Soviets that the US and our allies are already subject to nuclear blackmail:

"The pace of the Soviet offensive and defensive buildup has upset the balance in the areas of greatest importance during crises . . . the fact is . . . that we have no defense against nuclear ballistic missile attack. And, as the Soviet building program widens the imbalance in key offensive capabilities, introducing systems whose status and characteristics are more difficult to confirm, our vulnerability and that of our allies to blackmail becomes quite high."

The President added in the same White Paper:

"Today, deterrence against Soviet aggression is grounded almost exclusively in the capabilities of our offensive retaliatory forces."

And finally, the President again conceded the alarming Soviet threat in the same report:

"Modern, accurate ICBMs carrying multiple nuclear warheads—if deployed in sufficiently large numbers relative to the size of an opponent's force structure, as the Soviets have done with their ICBM force—could be used in a rapid first strike to undercut an opponent's ability to retaliate effectively . . ."

In sum, the US President has admitted that the American offensive forces are the Free World's only deterrent, yet these very same forces are even today, at this moment, totally vulnerable to a Soviet first strike. Thus by the President's own admission, deterrence has greatly eroded and is severely degraded.

SOVIET MOBILE IRBM GAP

Secondly, the newly declassified CIA NIE on Soviet strategic forces reveals that the Soviets will soon have over 450 mobile triple MIRVed SS-20 IRBMs. By 1988, the new US NIE estimates that the Soviets will have deployed over 450 mobile SS-20 launchers. The SS-20 mobile launcher is rapidly reloadable and refirable, and there are press reports that the Soviets intend as many as 5 SS-20 missiles to be fired from each launcher. This could be an SS-20 force with over 6,000 warheads. Moreover, there is much evidence that the SS-20 can also be used as a covert ICBM, and some may be intended to be fired at the US, as was done in April, 1984.

Estimated Soviet IRBM force, 1988, 450 SS-20s with 3 warheads each, 1,350. Total warheads, 6,000 warheads potential.

SOVIET MOBILE CRUISE MISSILE GAP

Thirdly, the CIA NIE states; "We expect the Soviets to deploy 2,000 to 3,000 nuclear armed Air-Launched Cruise Missiles, Sea-Launched Cruise Missiles, and Ground-Launched Cruise Missiles over the next ten years." The Soviets already have deployed over 575 nuclear-capable Sea-Launched Cruise Missiles, compared to 12 for the US.

SOVIET MOBILE ABM GAP

Fourthly, by 1988, the new CIA NIE reportedly estimates that the Soviets will have deployed about 3,000 ABM launchers nationwide. There are credible press reports that the CIA NIE estimates that the Soviets will have deployed by 1988 over 3,000 mobile ABM launchers, at the same time that their modernized Moscow ABM system and the last of their 6 nationwide ABM Battle Management raiders become operational. This table is an illustrative force structure.

ESTIMATED SOVIET ABM FORCE, 1988

100 SH-04, SH-08 Moscow; 600 SH-04, SH-08 nationwide. Mobile, 3,000 SAM-10, SAM-12 nationwide; 2,500 SAM-5 nationwide. Total: 6,200 ABM launchers.

As the NIE confirms: "The Soviets will significantly improve the capabilities of their strategic defenses over the next 10 years."

A US Defense Department study stated as early as 1984 that there was even then a "precarious balance" with the Soviets. It added that: "The US can not restore a military balance . . . by offensive means alone . . . [because of a] Soviet willingness and ability to match or overmatch increases in US nuclear forces . . ." It concluded ominously that: "A substantial Soviet lead in deployed defensive systems superimposed on their growing offensive threat against our nuclear offensive forces could destroy the stability of the strategic balance."

[Pictures, maps and charts not reproducible for the RECORD.]

This is a drawing of the Soviet SS-24 ICBM on a rail mobile launcher. The rail mobile SS-24 launcher is concealed in the deceptive guise of a passenger train. The SS-24 carries 10 MIRV warheads and is similar to the US MX ICBM. Because of this deceptive and concealed deployment, the US may never know when the SS-24 is deployed, or how many.

This picture shows the rail network of the USSR, together with the main concentrations of Soviet ICBMs and IRBMs along this rail network. The dark red circles show ICBM deployment complexes. The red line circles show SS-20 deployment complexes. The rail mobile SS-24 will be deployed throughout the Soviet rail network, where there are thousands of rail tunnels for protection and concealment. This will make the railmobile SS-24 far superior to the "Race Track" MX ICBM deployment scheme planned by former US President Jimmy Carter, but abandoned and reduced by President Reagan. The SS-25 is road mobile, and will be deployed alongside SS-20 IRBMs also under concealment, making detection of the SS-25 very difficult.

This is a picture of the road mobile Soviet SS-25. This ICBM is similar to the US Minuteman III. It has the capability to carry 3 MIRV warheads. Its transporter-erector-launcher is a truck, capable of firing through the roof of its garage or from concealed field sites.

This picture illustrates the deployment pace, scale, range coverage, and location of Soviet SS-20 IRBMs. By 1988, there will be over 450 mobile, concealed SS-20s, each capable of multiple reload and refire.

This picture shows a Soviet SS-N-21 Sea-Launched Cruise Missile being fired at a Free World coastal city. All Soviet submarines are capable of launching this missile from their standard torpedo tubes.

This chart compares US and Soviet cruise missiles. Note that there are two types of Soviet long-range, supersonic cruise missiles for which the US has nothing to compare and no defenses. Also note that all Soviet cruise missiles have longer range than their US counterparts.

This picture illustrates the fact that the Soviets have complete nationwide radar coverage of the USSR for ABM early warning and battle management. The Soviets have over 1,000 ABM radars, including over 25 large ABM battle management radars, over twice the number of ABM radars that US planned in 1972 and cancelled in 1975. These radars will support the early warning, acquisition, and battle management for a nationwide ABM defense, using mobile and fixed ABM-3 interceptors, mobile SAM-10 and SAM-12 interceptors and radars, and fixed SAM-5 interceptors and radars. In 1984, US Defense Secretary Weinberger stated that by 1987, the Soviets would be able to engage with their ABMs "17 percent of the US strategic missile force." By 1988, this percentage will probably be between 50 and 75 percent.

This picture illustrates the mobile SAM-12 interceptor and radar. This system has been tested repeatedly in the ABM mode and can be used to attack US bombers, cruise missiles, and ballistic missile Re-entry Vehicles. This system is already in series production and is being massively deployed throughout the USSR.

This map illustrates the wide deployment of Soviet air defense missiles and radars, all of which are already potentially upgradeable to ABM use, for a nationwide ABM defense.

CONCLUSION: SOVIET NUCLEAR BLACKMAIL

The sum of all these Soviet offensive and defensive missile construction activities the US has observed by US National Technical reconnaissance throughout the USSR at factories, test ranges, and means of deployment bases, indicates the Soviet intention to "Break Out" of the SALT I Anti-Ballistic Missile Treaty and the SALT II Treaty limiting offensive weapons. Indeed, the sum of all the evidence indicates that the Soviet Union began breaking out of SALT I and II even as they signed these treaties in 1972 and 1979. This conclusion is strongly supported by a wide variety of intelligence evidence, some of which has been reported in the press and which is quite dramatic.

The world is now witnessing the Soviet SALT Break Out deployment of an illegal new mobile ICBM, carrying illegal new MIRVed warheads covertly, being camouflaged illegally, and defended by several illegal mobile, camouflaged ABM systems, using an illegal nationwide system of large ABM Battle Management radars.

These four Soviet Mobile Missile Gaps are the most dangerous threats to US, and indeed to Free World, security ever in the postwar era. Existing Soviet strategic superiority and first strike potential is bad enough, but now this severe US vulnerability is going to be made much worse in the next five years by the buildup in Soviet mobile ICBMs, the buildup in Soviet mobile IRBMs, the buildup in Soviet mobile cruise missiles, and the buildup in Soviet mobile ABMs.

As the NIE concludes ominously:

"We judge that the Soviets would plan to conduct a military campaign that would seek to end a nuclear war on their terms—by neutralizing the ability of US intercontinental and theater nuclear forces to interfere with Soviet capabilities to prevail in a conflict in Eurasia."

As Col. John Collins of the Library of Congress wrote recently: "Soviet [strategic nuclear force] posture nevertheless continues to improve in relative terms vis a vis the United States, which finds that declaratory strategy and forces fail to match." This is an understatement.

The Soviets already today have the largest and most modern strategic offensive arsenal in the world. More than 75% of Soviet strategic warheads are only 5 years old or even less. The Soviets also have the only ABM defense in the world. By 1990, the Soviets will have completely modernized and significantly expanded both their offensive and their defensive forces, with 5th and 6th generation ICBM deployments and 2nd and 3rd generation ABM forces. The mobility of these forces will make them completely invulnerable to any American attack, but the US does not even have the capability to either locate, target, or strike these Soviet forces.

Beyond these ominous developments, the US Defense Department has stated that the Soviets have over 30 more new startegic programs under development.

The ancient Chinese military strategist, Sun Tsu, wisely said that the highest achievement a general could reach was not to win a war, but to win without war. This is the real purpose of the Soviet Missile Gaps—to intimidate and blackmail the United States and the Free World, and to thereby subvert the US nuclear deterrent. Thus US European and Asian allies depending on the US nuclear umbrella for extended deterrence of Soviet nuclear attack are even more threatened than the US by these new Missile Gaps, and they may be the first victims of Soviet nuclear intimidation and Blackmail.

The National Security Adviser to former President Carter, Zbigniew Brzezinski, and top Reagan Administration Arms Control Negotiator Max Kammpelman, wrote recently:

"No responsible American President can permit this country to have to live under such a threat, not to speak of the hypothetical danger of having to choose either annihilation or submission to nuclear blackmail."

President Reagan himself conceded recently in Newsweek that:

"They [The Soviets] already outnumber us greatly in offensive weapons, and [if] they alone developed a defensive weapon before us, then they wouldn't have to worry about our deterrent—a retaliatory strike. Then they could issue the ultimatum to the world."

But as the President himself knows and has already repeatedly conceded, the Soviets have already developed and are massively deploying defensive weapons systems. It is only a matter of time before they issue the ultimatum to the world.

CONFIRMATION OF THE FAILURE OF ARMS CONTROL

Finally, we should turn the clock back to 1971, when America was still a Great Power, and examine how American tolerance for the Soviet strategic buildup was the basis for the failure of the arms control process.

Gerard Smith, the Nixon Administration's Arms Control Director, stated over-confidently long ago in 1971:

"If, after a reasonable period, SALT negotiations prove unproductive, or if the USSR resumes land-based ICBM deployment or moves to modernize or expand its Moscow ABM system, the United States would take whatever steps are necessary to maintain its strategic deterrent."

Today, in 1985 we should evaluate Gerard Smith's self confident prophesy.

First, the SALT II negotiations did not produce a ratifiable treaty, even after seven years of negotiations. Thus it is fair to say that SALT negotiations have been "unproductive."

Second, Soviet violations of SALT II and the SALT I ABM Treaty, 17 of which have been confirmed by the President to the Congress, prove conclusively that SALT treaties have not constrained Soviet strategic forces. Indeed, the Soviets have 'resumed' land-based ICBM deployment, in violation of SALT II, and the Soviets are both 'modernizing' and 'expanding' their ABM system, in violation of the SALT I ABM Treaty.

Third, despite Smith's confidence that the US would respond to all these Soviet challenge conditions, the US is not taking the necessary responsive steps to "maintain its strategic deterrent."

In 1972, the SALT I ABM Treaty and SALT I Interim Offensive Agreement succeeded in killing the superior US ABM program, in exchange for constraints on Soviet forces which turned out to be completely illusory. The Soviet offensive buildup continued unchanged by SALT I and II. But since 1972, the Soviets have also completedly reversed the relative position of the sides on ABM capabilities, and now the Soviets are Breaking Out of both defensive and offensive SALT I and II constraints. Meanwhile, the Soviets in 1985 are once again trying to convince the US to give up its Strategic Defense Initiative and Defensive Anti-satellite program, in exchange again for either nothing or for illusory offensive constraints. But as the late President John F. Kennedy said in 1961: "If they fool us twice, its our own fault." America is in fact quite close to unilaterally giving up its nuclear deterrent.

As the Committee on the PRESENT DANGER has concluded recently:

"The adverse balance entails both political and military risks . . . As relative Soviet power continues to increase, the Soviets expect the US and its allies to move increasingly toward accommodation and appeasement."

Winston Churchill warned gravely after World War II:

"Sometimes in the past we have committed the folly of throwing away our arms. Under the mercy of Providence, and at great cost and sacrifice, we have been able to recreate them when the need arose. But if we abandon our nuclear deterrent, there will be no second chance. To abandon it now would be to abandon it forever."

THE AUTHOR

David S. Sullivan works for the United States Senate as senior National Security Advisor to several Republican Senators in leadership positions. After a long career at the Central Intelligence Agency where he analyzed Soviet strategy and strategic force modernization, Mr. Sullivan resigned from the Agency in 1978 to join the staff of a Democratic US Senator critical of the SALT II treaty. He later worked for a Republican member of the Senate Armed Services Committee. In 1981, he accepted an appointment in the Reagan Administration as a senior official of the Arms Control and Disarmament Agency, but later returned to his present position on Capitol Hill to help implement President Reagan's defense and foreign policies in Congress. Mr. Sullivan was educated at Harvard University (BA cum laude 1965), and at Columbia University where he received a Masters Degree in International Affairs. he has been selected for promotion to Lieutenant Colonel in the United States Marine Corps Reserve, and he saw active service in the Vietnam War in Marine Combat Intelligence. His previously published works number more than twenty-five articles and books on National Security, and include *The Bitter Fruit of SALT: A Record of Soviet Duplicity* and *The Fatal Flaws of SALT II.* He is coauthor, with Quentin Crommelin, Jr., of *Soviet Military Supremacy,* April, 1985, The Citizens' Foundation, Suite 515, 1701 Pennsylvania Ave., N.W., Washington, D.C. 20006. He has been described as a "brilliant CIA analyst" and as a "heroic freedom fighter", and he has been attacked numerous times in the Soviet press.

SOVIET NEGOTIATING DECEPTION AND TREATY VIOLATIONS IN ARMS CONTROL

(By David S. Sullivan[1])

President Reagan stated starkly on April 2, 1985, that: "The Soviet Union virtually outnumbers us in any type of weapon you want to name." President Ronald Reagan has publicly conceded that the Soviet Union has achieved overwhelming strategic superiority over the United States at least eight times since 1982.

President Reagan stated on September 17, 1985: "The United States is still well behind the Soviet Union in literally every kind of offensive weapon, both conventional and in the strategic weapons."

These declarations of a starkly true fact have extremely serious consequences for world peace, but this fact of US strategic nuclear inferiority is not well known around the Free World or even in the United States. As Ronald Reagan stated in 1964: "We are at war with the most dangerous enemy that has ever faced mankind. . ."

[1] The Author: David S. Sullivan works for the United States Senate as senior National Security Advisor to several Republican Senators in leadership positions. After a long career at the Central Intelligence Agency where he analysed Soviet strategy and strategic force modernization, Mr. Sullivan resigned from the Agency in 1978 to join the staff of a Democratic US Senator critical of the SALT II Treaty. He later worked for a Republican member of the Senate Armed Services Committee. In 1981, he accepted an appointment in the Reagan Administration as a senior official of the Arms Control and Disarmament Agency, but later returned to his present position on Capitol Hill to help implement President Reagan's defense and foreign policies in Congress. Mr. Sullivan was educated at Harvard University (BA *cum laude* 1965), and at Columbia University where he received a Masters Degree in International Affairs. He has been selected for promotion to Lieutenant Colonel in the United States Marine Corps Reserve, and he saw active service in the Vietnam War in Marine Combat Intelligence. His previously published works number more than twenty-five articles and books on National Security, and include *The Bitter Fruit of SALT: A Record of Soviet Duplicity* and *The Fatal Flaws of SALT II.* He is coauthor, with Quentin Crommelin, Jr., of *Soviet Military Supremacy,* April, 1985, The Citizens' Foundation, Suite 515, 1701 Pennsylvania Ave., N.W., Washington, D.C. 20006. He has been described as a "brilliant CIA analyst" "as a one man CIA" and as a "heroic freedom fighter", and he has been attacked numerous times in the Soviet press.

The full implications of the reality of Soviet strategic superiority have yet to be fully understood in American politics, defense planning and budgeting, and diplomacy.

How have the Soviets achieved this strategic superiority so decisively and so successfully without provoking an American response?

In a nutshell, the arms control process has been responsible for Soviet strategic superiority. A strong element of Soviet deception and duplicity has been involved.

ARMS CONTROL HAS LED TO SOVIET SUPERIORITY

President Reagan himself realized this fact as early as May 9, 1982, when he stated: "So far, the Soviet Union has used arms control negotiations primarily as an instrument to restrict US defense programs, and in conjunction with their own arms buildup, as a means to enhance Soviet power and prestige."

And as President Reagan stated on January 29, 1981, the Soviets leaders "reserve into themselves the right to commit any crime, to lie, to cheat."

An awareness of this truth is only now beginning to permeate US Defense and Intelligence establishments. For example, the Defense Department has stated recently that: "The Soviet Union regards arms control negotiations as arenas of political conflict in which important military advantages can be gained or lost. The Soviet leadership does not think in terms of mutuality or perceive arms control negotiations as a means of reducing arms. They attempt at every turn to achieve strategic advantage."

Another recent Defense Department statement was even more critical of the arms control process: "Current Soviet policy on arms agreements is dominated by their attempts to derive unilateral advantage from arms negotiations and agreements, by accepting only arrangements that permit continued Soviet increases in military strength while using the negotiation process to inhibit Western increases in military strength."

Even the US Intelligence Community, which so often has underestimated Soviet strategic strength and misperceived Soviet intentions, has finally reached the same conclusion. The most recent Central Intelligence Agency National Intelligence Estimate on Soviet strategic forces was in June 1985 declassified by the White House and released to the US Senate. NIE-11-3-8-85 states: "Soviet leaders view arms control policy as an important factor in advancing their strategy of achieving strategic advantage. Moscow has long believed that arms control must first and foremost protect the capabilities of Soviet military forces relative to their opponents."

Defense Secretary Weinberger has been even more succinct, when he stated in December, 1984, that: "We now face precisely the situation that SALT I and SALT II were supposed to prevent."

And President Reagan's National Security Advisor has been quoted as saying last January: "The US strategic buildup has not worked, and has done nothing to close the window of vulnerability. In fact, American land-based missiles have become even more vulnerable to Soviet first strike attack over the past few years."

President Reagan has made three historic reports to Congress on Soviet arms control treaty violations. The first was on January 23, 1984; the second was on October 10, 1984; and the third was on February 1, 1985.

Each of these Presidential Reports to Congress on Soviet Arms Control Treaty Violations was in response to an amendment which US Senator Jim McClure (R, Idaho), sponsored, and which was either unanimously or overwhelmingly passed by the US Senate.

These three Presidential Reports support the reasonable conclusion that arms control treaties with the Soviets have undermined American security, not safeguarded it. Arms control treaties have enormously strengthened the Soviet Union while weakening the United States. Yet because this conclusive fact seems so startling to so many observers, we must also conclude that the Soviets have used the arms control process and arms control treaties as a bold instrument of massive deception to promote their own thrust to military supremacy over the US. In fact, however, there has long been overwhelming evidence that the Soviets use diplomacy and international law as important tools in their arms control deception program.

THE THREE PRESIDENTIAL REPORTS ON SOVIET VIOLATIONS

The fact that these reports were rendered at all is historic and unprecedented. For the first time in our history, an American President has openly accused the Soviet Union of violating Strategic Arms Limitation Treaty (SALT) commitments. These three reports, made by formal messages to Congress, are irrevocable, and though still incomplete, must be applauded. Even the liberal pro-arms control Arms Control Association has concluded that Soviet "Violations of arms control Agreements can not be overlooked or excused." But the implications of these violations for American national security and for world peace are extremely serious. These implications have not yet been addressed within the US Government, however, despite urgent and repeated requests to President Reagan beginning on March 1, 1984, almost two years ago.

In addition to addressing the military implications of the Soviet SALT violations and deceptions, we need to summarize these Presidentially confirmed Soviet arms control treaty violations. Moreover, when these violations were first released, they were downplayed by both the White House and by the media, so they are not in fact well-known at all. It is important to note further that these are the unanimously agreed findings of the national security departments and agencies of our government. There were no dissenting footnotes nor disagreeing qualifications by any part of the Executive Branch to these Presidential Reports to Congress. There are now 32 Soviet arms control treaty violations agreed and confirmed by the Executive Branch, and reported by the President to the Congress.

These 32 violations are summarized, for the first time aggregated in one place publicly, as follows according to the different treaties violated.

32 SOVIET ARMS CONTROL TREATY VIOLATIONS CONFIRMED AND AGREED WITHIN THE REAGAN ADMINISTRATION

Box: 11 Presidentially confirmed Soviet violations of the 1979 SALT II Treaty

1. Soviet buildup of over 378 Strategic Nuclear Delivery Vehicles (SNDVs) above the 2504 level of Soviet SNDVs as of June, 1979;

2. Soviet failure to deactivate over 632 SNDVs down to the 2,250 SALT II SNDV level;

3. Soviet development and operational deployment at over 20 bases of an initial increment of 200 launchers for the SS-25 mobile ICBM is an "irreversible" violation of the SALT II prohibition on a second "new type" ICBM;

4. The Re-entry Vehicle of the SS-25 is less than one half the total missile Throw-Weight, constituting covert MIRVing with a 3 MIRV capability; this is a "serious concern," which is "unresolved."

5.The Soviet SS-NX 23 SLBM constitutes a prohibited heavy new SLBM;

6. Soviet production of more than 30 Backfire bombers per year—over 14 extra, illegal Backfire bombers, or several illegal Backfire squadrons—constitutes a Soviet violation of Brezhnev's Backfire bomber production pledge, which former President Carter told the Senate was an integral part of the SALT II Treaty;

7. Arctic basing of Backfire bombers, increasing their range, another violation of Brezhnev's Backfire bomber pledge;

8. Probably equipping Backfire bombers with a refueling probe, also contrary to Brezhnev's Backfire pledge, increasing Backfire's range illegally;

9. Soviet deliberate interference with US National Technical Means of verification, by a continuously expanding pattern of strategic Camouflage, Concealment, and Deception;

10. Almost total encryption of all new Soviet missile testing telementry;

11. Probable Soviet deployment of 200 banned SS-16 mobile ICBMs, and falsification of the SALT II Data Base.

These Soviet SALT II violations have enormous strategic significance, both military and political. Altogether, they amount to Soviet strategic offensive superiority. First, they result in about 632 more Soviet SNDVs than are allowed by SALT II. Second, they augment the already overwhelming Soviet first strike capability actually codified with US agreement in the terms of the SALT II Treaty itself. Even more importantly, US unilateral compliance with the unratified SALT II Treaty which the Soviets are confirmed to be violating at will actually demonstrates Soviet strategic offensive superiority to the world. If the numbers themselves did not demonstrate Soviet superiority, then overt US agreement to unequal levels of forces in complying contrary to its own laws and Constitution with an unratified SALT II Treaty clearly demonstrates US acquiesence to Soviet superiority. And the Soviets are estimated to be preparing to deploy over 700 more mobile ICBM launchers by 1987 in addition to their already overwhelming 6 to 1 superiority in ICBM warhead capabilities. The Soviets are already thus 10 to 15 years ahead of the US in strategic offensive capabilities.

Box: 7 Presidentially confirmed Soviet violations of the 1972 SALT I ABM Treaty

12. The siting, orientation, and capabilities of the Soviet Krasnoyarsk ABM Battle Management radar directly violate 3 provisions of the SALT I ABM Treaty;

13. ABM-mode tests of Soviet Surface-to-Air-Missiles and radars are highly probable violations of the SALT I ABM Treaty;

14. The Soviets may be developing and deploying a territorial, nationwide ABM defense, which would violate the SALT I ABM Treaty ban on developing even a base for a nationwide ABM defense; this is a "serious cause for concern."

15. Mobility of the ABM-3 system is a violation of the SALT I ABM Treaty, which bans mobile ABMs;

16. Soviet rapid relocation without prior notification of a "Flat Twin" ABM-3 mobile radar, creating the Kamchatka ABM test range, was a violation of the SALT I ABM Treaty;

17. Confirmed Soviet falsification of their dismantling of excess ABM test range launchers in 1974, which violated the 1974 SALT I ABM Treaty dismantling procedures;

18. Soviet deliberate concealment activities impede verification in violation of the SALT I ABM Treaty.

These Soviet violations of the SALT I ABM Treaty have enormous significance, both military and political. The Soviets are planning to deploy over 3,000 mobile ABM intercepters by 1987, for a nationwide a ABM defense. They can already defend almost 20% of their strategic forces, and soon they will be able to defend 50 to 66%. The Soviets are over 10 years ahead of the US in strategic defenses.

Box: 4 Presidentially confirmed Soviet violations of the 1972 SALT I Interim Agreement on Offensive Weapons

19. Soviet deployment of the Heavy SS-19 ICBM and the Medium SS-17 ICBM to replace the Light SS-11 ICBM was a circumvention defeating the object and purpose of the SALT I Interim Agreement; this violation alone increased the Soviet counterforce threat by a factor of 6 and was as significant a setback for US national security as the loss of the Viet Nam War itself through Communist violation of the 1973 Paris Peace Agreement;

20. Soviet deployment of modern submarines exceeding the limit of 740 SLBM launchers without dismantling other ICBM or SLBM launchers, which the Soviets actually admitted, violated the SALT I Interim Agreement; it actually took the Soviets until 1981, five years after the SALT I Interim Agreement expired, to deactivate all 209 SS-7/8s required;

21. Soviet deliberate *Camouflage, Concealment and Deception activities* impeded verification, in violation of the SALT I Interim Agreement;

22. Implied circumvention of the 1974 SALT I submarine dismantling procedures, through deployment of long-range, supersonic SLCMs on *Stretch Y Class submarines.*

In addition, the President has reported that mobile SS-25 missile bases deployed at dismantled SS-7 ICBM sites will be a "future violation" of SALT I.

Box: Presidential confirmation of manifold Soviet nuclear test ban violations

23. The 1958-1961 Nuclear Test Moratorium. The Soviets breached a unilateral commitment by engaging in atmospheric nuclear weapons tests in August, 1961;

24. The Limited Test Ban Treaty of 1963. There have been "numerous violations" by the Soviets of the Limited Test Ban Treaty by extra-territorial venting of radioactive nuclear debris from underground nuclear weapons tests; (There have been over 30 conclusively confirmed Soviet extraterritorial ventings, and hundreds of other probable and likely violations.)

25. The 1974 Threshold Test Ban Treaty. The US Government has determined that the Soviet Union is likely to have violated the underground nuclear testing yield limit (150 kilotons) of the Threshold Test Ban Treaty. (See chart. There have now been well over 16 Soviet high yield tests violating the TTBT.)

The many Soviet nuclear test ban violations have allowed the Soviets to develop and test much more lethal warheads for their new ICBMs, SLBMs, and cruise mis-

siles. Thus, these Soviet violations have enormous strategic significance.

Box: Presidential confirmation of Soviet violations of the Kennedy-Khrushchev agreement on Cuba of 1962

26. The Soviets breached a unilateral commitment by sending offensive weapons—intercontinental nuclear-delivery capable bombers, nuclear-delivery capable fighter-bombers, and various kinds of nuclear missile submarines—back to Cuba, beginning in 1969.

On September 14, 1983, President Reagan for a second time confirmed that the Soviet Union had violated the Kennedy-Khrushchev Agreement which ended the Cuban Missile Crisis:" That agreement has been abrogated many times by the Soviet Union and Cuba in the bringing of what can only be described as offensive weapons, not defensive, there." This Presidential statement has been backed up by the CIA Director, the Chairman of the Joint Chiefs of Staff, and the Under Secretary of Defense for Policy. Even the State Department concedes that the Soviets have violated the "Spirit" of the Agreement.

Box: Other Soviet Arms Control Treaty violations confirmed by the President

27. The 1925 Geneva Protocol on Chemical Weapons. The United States Government has determined that the Soviet Union is significantly violating the Geneva Protocol on Chemical Weapons by the prohibited first use in war of chemical weapons in Laos, Cambodia, and Afghanistan.

28. The 1972 Biological Weapons Convention. The United States Government has determined that the Soviet Union is significantly violating the Biological Weapons Convention by maintaining an offensive biological warfare program and capabilities.

29. The Conventional Weapons Convention. The Soviets violated the Conventional Weapons Convention by using booby-trap mines and incendiary devices against civilians in Afghanistan.

30. The 1975 Helsinki Final Act. The United States Government has determined that the Soviet Union is violating the terms of the Helsinki Final Act by its inadequate notifications of its Warsaw Pact military exercises.

31. The Montreux Convention of 1936. The Soviets violated the Montreux Convention by transiting the Turkish Straits repeatedly with aircraft carriers. (The Greek Government, a signatory of the Montreux Convention, repeatedly protested these violations to the Soviets, to no avail.)

32. The 1982 Brezhnev SS-20 Moratorium. The Soviets breached their unilateral commitment to end SS-20 deployment by completing SS-20 launcher positions and continuing to deploy new SS-20s.

In sum, 11 of the 32 Presidentially confirmed Soviet violations relate to the SALT II Treaty, 7 relate to the SALT I ABM Treaty, and 4 relate to the SALT I Interim Agreement. Many relate to the nuclear weapons test ban agreements. Nothing whatsoever has been done by the Reagan Administration to counteract these Soviet arms control violations. Until the Reagan Administration, all previous administrations had claimed that if the Soviets were ever caught violating even one arms control treaty, the US would have to reassess the entire spectrum of our relations with them. Complete US inaction in the face of these 32 Presidentially confirmed Soviet violations demonstrates that this was a false premise. In fact, US inaction can be interpreted as appeasement of the Soviets. Instead of reassessing our relations with the Soviet Union, the Reagan Administration actually resumed arms control negotiations with the Soviets aimed at achieving a new arms control treaty, and even agreed to hold a Summit meeting with the Soviets in its quest for a new arms control treaty.

A reasonable explanation of these confirmed Soviet violations is that they are measures to test US Intelligence capabilities and US political will. Further, the violations and the expanding pattern of Soviet Camouflage, Concealment, and Deception activities may be a preparation or a cover for more-extensive violations taking place already of planned for the future. The US still has no long range or even short range strategy to deter or to counteract Soviet violations. But most importantly, Soviet violations are aimed at achieving strategic superiority.

America is now witnessing the Soviet SALT Break Out deployment of hundreds of an illegal new type ICBMs, carrying illegal new MIRVed warheads covertly, being camouflaged illegally, and defended by thousands of launchers for several illegal mobile camouflaged ABM systems, using an illegal nationwide system of large ABM Battle Management radars.

Box: 6 other Reagan administration charges of Soviet treaty violations

1. Soviet violation of the 1945 Yalta Agreement, by denying free elections in Poland;

2. Soviet violation of the 1945 Potsdam Agreement, by occupying Eastern Europe;

3. Soviet violation of the United Nations Charter, through threatened aggression against Poland in 1980–1981;

4. Soviet violation of the Paris Peace Accords on ending the Indochina War, by continuing to buildup the North Vietnamese military;

5. Soviet violation of various international agreements governing civil aviation, by the brutal KAL–007 shoot-down murder incident of 1983;

6. Soviet violation of the 1972 Incidents at Sea Agreement during the attempts to recover the KAL–007 "Black Box". In fact, there is strong evidence that the Soviets shot down KAL–007 in the first place in order to cover-up some of their SALT II violations (such as a test of their illegal SS–25 second new type ICBM with full encryption of electronic telemetry signals) planned for that very night of 31 August–1 September 1983.

The Defense Department has stated that: "The US should vigorously pursue compliance issues with the Soviet Union and demand that the Soviets take corrective action when we detect violations. If this fails, the US should be prepared to take those measures necessary to maintain our national security in the face of Soviet violations.

But the Soviets are directly challenging the essence of the US democratic political system by their 32 confirmed, conclusive agreed, arms control violations. They are boldly gambling that American democratic leaders can not muster the leadership or collect the bipartisan political consensus necessary to demonstrate the political will to compensate for the Soviet SALT violations. The Soviets believe, with some justification derived from their direct experience with American cowardice and appeasement, that American political leaders are paralyzed and demoralized and unable to galvanize public support to challenge them and counteract their threats to our collective allied security.

The Soviets are already quite self-confident, and have reason to be. The Soviets know full well that they have an overwhelming 4 to 1 numerical advantage in ICBM warheads (counting DIA's best estimate of 14 warheads on each of 326 super heavy SS–18 ICBMs, giving the Soviets 8,500 ICBM warheads to only 2,100 for the US), and their accuracy and megatonnage advantages give them over a 6 to 1 or even an 8 to 1 advantage in first strike, counterforce capabilities. The Soviets also have simultaneously over a 14 to 1 advantage in Intermediate Range Nuclear Force warheads against NATO. The Soviets are also deploying a nationwide ABM defense, capable soon of defending not only Moscow, but also ICBM fields and the whole nation. Thus the Soviets are able to threaten the US with a strategic offensive first strike, and soon they will even be largely immune from a limited US retaliation.

Box: 22 additional Soviet SALT circumventions or violations

Assistant Secretary of Defense Richard Perle has testified to the Senate that the existing violations reports from the President are "illustrative only", and that "twenty to twenty-five" more Soviet violations remain to be publicly confirmed by the President to the Congress. The following 22 additional Soviet SALT violations have been widely discussed in the press.

1. Deploying 12 to 14 warheads on each SS–18 ICBM, when SALT II allows only 10, increasing the Soviet ICBM warhead total by over 1,200; the latest NIE reportedly reaches this conclusion.

2. Developing and testing the Soviet SS–18 ICBM rapid-reload and refire capability as a circumvention of all the SALT II ceilings, doubling the Soviet SS–18 force;

3. Soviet testing of an ABM rapid-reload and refire capability prohibited by the SALT I ABM Treaty; the Defense and State Departments say that the Soviets "may" have a reloadable ABM system;

4. Soviet failure to dismantle 18 SS–9 Fractional Orbital Bombardment ICBMs banned by the SALT II Treaty, which also circumvented the SALT I ICBM ceiling;

5. Soviet deployment of SS–11 ICBMs at SS–4 MRBM and SS–5 IRBM soft launch pads for covert soft launch in circumvention of all SALT I and SALT II ceilings;

6. Soviet maintenance of several thousand stockpiled ICBMs, SLBMs, and strategic cruise missiles as potentially operational, thus circumventing all SALT II ceilings;

7. Soviet development and deployment of the SS–24 rail mobile ICBM, which will be above SALT II launcher ceilings, and which reportedly may have heavier throwweight than the Soviet heavy SS–19, and which therefore is a prohibited new very heavy ICBM;

8. Probable Soviet exceeding of the SALT II ceiling of 820 MIRVed ICBMs, by reportedly deploying covertly MIRVed mobile SS–25 ICBMs, and by preparations to deploy MIRVed SS–24 mobile ICBMs;

9. Soviet failure to deactivate old ICBMs on time, in violation of the SALT I ICBM ceilings and 1974 dismantling procedures, and continuous falsification of official deactivation reports between 1975 and 1981;

10. Ongoing Soviet deployment of the mobile SS–16, mobile SS–24, and mobile SS–25 ICBMs, which circumvents and defeats the object and purpose of SALT I, because it is inconsistent with the US SALT I Uni-

lateral Statement against mobile ICBM deployment.

11. Reported Soviet deployment of operational SS-25 mobile ICBMs using old SS-7 ICBM support facilities at the Yurya old SS-7 complex, which violates the SALT I dismantling procedures for old SS-7 ICBMs.

12. Violation of the late Soviet President Brezhnev's 1972 SALT I pledge not to build mobile ICBMs.

13. Violation of the late Soviet President Brezhnev's 1972 SALT I pledge to dismantle the entire G Class of strategic missile submarines.

14. Soviet violation of the SALT II ceilings of 1200 MIRV ICBM and MIRV SLBMs, and the 1320 ceiling on MIRV launchers and intercontinental bombers with long-range ALCMs, through deployment of excess MIRVed ICBM and MIRVed SLBMs and over 50 Bear H bombers and over 250 intercontinental Backfire bombers capable of carrying long-range ALCMs.

15. Soviet circumvention of the SALT I ABM Treaty, by giving the Moscow ABM-3 complex the capability to defend over 300 adjacent MIRVed ICBM silos.

16. Soviet violation of the 1971 Agreement to Reduce the Risk of Outbreak of Nuclear War, by jamming US early warning detection systems, failing to notify the US of this jamming, and failing to notify the US of the early April 1984 salvo launch of multiple SS-20s toward the US.

17. Soviet flight-testing of their new mobile ICBM launchers continuously concealed by camouflage, thereby violating the SALT II provision that the US must be able to determine the relationship between a new missile and its launcher.

18. Soviet achievement of "unilateral advantages" through their circumventions, violations and negotiating deceptions related to SALT I and II. These Soviet unilateral advantages violate the 1972 Agreement on Basic Principles of US-Soviet Relations, which is specified in the Preamble to the SALT II Treaty as a fundamental element of SALT II.

19. Soviet violation of the June 1973 Agreement on the Prevention of Nuclear War, through their hostile actions and hostile threats in the October 1973 Middle East War. (The Federal Republic of Germany has made this charge against the Soviets.)

20. Soviet direct interference with US National Technical Means of SALT verification, in a reported 1980 incident in which Soviet electronic warfare technology actually took control of a US intelligence satellite, actually rendering it useless during a key Soviet missile test. The incident is a clear violation of SALT I and II provisions. Moreover, the Soviets have reportedly blinded US satellites with lasers, and are jamming US electronic collection satellites and other systems.

21. SALT II permits no increase in the throwweight of the super heavy SS-18 ICBM, and no new type of very heavy ICBM to replace it. The Soviets appear to be doing both: developing a 3rd new type ICBM which is even heavier the SS-18.

22. Any follow-on to the heavy SS-24 will have to be within 5% of its throwweight and other characteristics, or else it is a prohibited new type ICBM. The SS-24 follow-on under development is a 4th new type ICBM, when SALT II allows only one new type ICBM, and the SS-24 follow-on also appears to have even more throwweight than the heavy SS-24, which is already probably heavier than the SS-19.

The Soviets have thus gained overwhelming strategic superiority over the US through their SALT violations and thus they will be very reluctant to correct their violations. Indeed, deliberate Soviet efforts to counter US National Technical Means of verification strongly indicate a Soviet intention to persevere in circumventing and violating treaties.

EVIDENCE OF SOVIET DECEPTIVE INTENTIONS

As noted at the outset, according to a Department of Defense statement of March 28, 1984: "The Soviet Union regards arms control negotiations as arenas of political conflict in which important military advantages can be gained or lost. The Soviet leadership does not think in terms of mutuality or perceive arms control negotiations as a means of reducing arms. They attempt at every turn to achieve strategic advantage."

One Soviet military theorist stated in 1971, before SALT I was signed, that "Soviet diplomacy is war." Military Thought, the classified journal of the Soviet General Staff, the Soviet agency most responsible for negotiating SALT, stated that: "In fact, a nation's diplomatic activity becomes a part of those non-military means of policy implementation which . . . are contained within the concept of war."

If the arms control process is considered an aspect of war by the Soviets, then they are guided by Sun Tsu's principle that "all warfare is based on deception."

Assistant Defense Secretary Richard Perle has stated: "I believe we chronically underestimate the extent to which the Soviets engage in concealment and deception in order to mask programs that they have underway. . . . The Soviets have not hesitated to mislead us deliberately and all too successfully, in order to achieve their purpose." And as Richard Perle stated to the Senate Armed Services Committee on February 20, 1985: "The Soviet Union has violated almost all of the most important arms control agreements signed since 1963."

Assistant Secretary of Defense Richard Perle also stated to the Senate Armed Services Committee on February 20, 1985: "The current rash of Soviet arms control violations did not happen by accident. It resulted from the fact that our behavior vis a vis their non-compliance with signed agreements convinced the Soviets that they could get away with these acts. We did little in response to repeated Soviet violations of the LTBT during the 1960s and 1970s. We resolved many SALT I compliance problems by accepting Soviet behavior as legitimate. We resolved the SS-19 "heavy" missile issue by accepting the SS-19 as a "light" ICBM. There are now 2,000 warheads aimed at us on SS-19 missiles. We resolved the launch control silo issue by accepting the legitimacy of launch control facilities that are nearly identical to missile silos. We resolved the deployment of an ABM radar to Kamchatka by accepting it. We resolved the expanding pattern of Soviet concealment activities by ignoring them. During the 1970s we resolved the issue of Soviet testing of SAM missiles in the ABM mode by pretending it had stopped."

And as the President's General Advisory Committee on Arms Control (the GAC) stated in November, 1983: "Aspects of Soviet conduct related to about half their documentary arms control commitments were found to constitute material breaches of contracted duties."

SOVIETS DECEPTIVELY SIGN TREATIES INTENDING TO VIOLATE THEM

It is worth noting that the Defense Department has officially stated that: "Several of these violations must have been planned by Soviet authorities many years ago, in some cases perhaps at the very time the Soviet Union entered into the agreement."

The DOD added: "Major programs recently deployed or now late in development were generally initiated at the highest levels of Soviet leadership about ten years ago." The Soviet SS-24, SS-25 ICBMs and SS-N-20 SLBM programs were started about 1974. The SS-16 program started in 1965.

These cases of deliberate violations planned by Soviet leaders at the very time of signing the arms control agreements relate to the Soviet heavy SS-19 ICBM and the SALT I Interim Agreement of 1972, the 6 Pechora Class ABM Battle Management radars and the SALT I ABM Treaty, the Soviet Biological Offensive Warfare Program and the 1972 Biological Weapons Convention, and the SS-16 and SS-25 mobile ICBMs and the SALT II Treaty.

Moreover, in March, 1984, the Senate was told by a former member of the Joint Chiefs of Staff that twelve years before, in 1972, neither the Senate nor the Joint Chiefs of Staff were informed of vital intelligence information that the Soviet Union intended to violate the SALT I Accords even before they were signed. Through an inordinate and even irrational desire to appear before the public as peacemakers and to preclude jeopardizing the chances of SALT I approval by Congress and thus electoral success, the Nixon Administration apparently withheld this essential military intelligence from our top military leaders, who, remaining in ignorance of it, supported SALT I as did a similarly uninformed Congress.

In particular, Dr. Henry Kissinger may have deliberately misled the Senate by failing to reveal our knowledge of a Soviet plan for circumvention of the key SALT I provision limiting heavy ICBMs. If so, SALT I and the whole ensuing fabric of strategic arms control since 1972 received Congressional approval at its inception under false pretenses covering up Soviet bad faith.

In any event, no one can now doubt that Russia from the beginning of detente in 1972 planned to use the agreed limitations of SALT to freeze US defenses while illegally building Soviet might. Any other interpretation ignores the facts of Soviet strategic growth and what they themselves have revealed. As the Soviet foreign policy expert, Rostislav Tumkovskiy, wrote in 1979 for internal Soviet readership only: "Signing the [SALT I] agreement was a victory of the Soviet Union in the arms race."

A full catalogue of Soviet deceit shows that there are a total of over 310 major cases of Soviet arms control and other diplomatic deceptions since the Bolshevik Revolution of 1917. Fifty Soviet treaty violations involving international security have been confirmed by official Defense and State Department reports, and also by Senate studies. In fact, official US government documentation now fully supports the conclusion that the Soviets have violated, evaded, or circumvented virtually every international security treaty they have signed since 1917. In fact, the only significant treaty the Soviets are known to have kept was their August 1939 surprise agreement with Hitler to invade and divide Poland, the event which precipitated World War II.

AMERICANS MUST UNDERSTAND THE TRUTH ABOUT SOVIET DECEPTION

In 1934, Winston Churchill challenged the British Government to explain to the English people and to the world that the Ger-

mans were violating the arms control provisions of the Versailles and other arms control treaties. In the House of Commons, Churchill stated: "The worst crime is not to tell the truth to the public."

Unfortunately, the British Government lied to the British people. Thus Britain slept until Englishmen had the choice of another World War or eventual Nazi domination.

To avoid a similar choice, we must first admit to ourselves the true result of our misguided recent history. We must acknowledge that the hypnotic fog of detente has frozen US forces and brought about de facto unilateral American disarmament, through stagnation and obsolescence of US strategic systems and the corresponding massive growth in the quality and quantity of Soviet weapons. Additionally, countless successful Soviet deceptions and the significant practical military effects of Soviet arms control violations have further aggravated the strategic imbalance—an imbalance which never more urgently required the American government to take countermeasures than it does now. These are the concrete realities that we must face.

As President Reagan himself stated on March 22, 1985: "I would like to call your attention to something that no one seems to be aware of—that we ourselves have cut the defense budgets over the last four years—our own proposed or projected five year defense spending—we to date reduced those by more than $150 billion, and today the 1985 budget is $16 billion less than the 1985 budget that had been projected by the Carter Administration." And as Richard Perle has stated: "To cut that (defense) budget in the aftermath of Soviet violations, I think, would only encourage the Soviets to the view that they can continue to violate with impunity, without suffering the consequences that people have wrongly assumed would inevitably follow the detection of a Soviet violation."

We must recognize also that overdue remedies will not be cheap. Former Carter Administration Defense Secretary Harold Brown said in 1979, that, without SALT, the United States would be required to spend 30 to 100 billion dollars more on defense during the 1980s for strategic systems.

Now that massive Soviet violations have made SALT, which already favored the Soviet Union, a mere hollow shell, America must accept the new reality and must implement defense programs even, as Harold Brown said, at the additional cost of tens of billions of tax dollars—in order to achieve any hope of catching up with Russia, much less regaining our lost superiority. Yet the Reagan Administration has been forced by Congress to spend tens of billions of dollars less on defense than proposed even by Jimmy Carter; whose defense program relied on Soviet good faith and on Soviet SALT compliance.

To build public and Congressional support for the strategic spending that even the Carter Administration admitted would be needed (and that most Americans even now erroneously believe is being expended), American leaders must come clean with the American people and explain the effect and extent of Congressional defense budget cuts as well as the full extent and effects of Soviet arms control breakout. Otherwise, Americans could receive a highly unpleasant surprise when finally given an answer to Professor Harold Rood's question: "Can it really be true that Soviet negotiations for the Strategic Arms Limitation Treaties are nothing more than part of the preparations for war? That would place Soviet leaders in no better odor than Adolf Hitler . . ."

As President Reagan stated on March 8, 1983, the Soviets are "the focus of evil in the modern world."

Soviet negotiating deception

We turn now to a brief description and discussion of the highly complex subject of Soviet negotiating deception in arms control. The following are examples of Soviet negotiating deception in arms control negotiations:

Examples of Soviet Arms Control Negotiating Deceptions:

(1) SS-19 heavy ICBM existence and large-scale deployment plans were concealed by Soviet leader Brezhnev, SALT I, 1972;

(2) Soviets concealed their SS-N-8's full range in order to gain a 3 to 2 advantage in SLBMs, SALT I, 1972;

(3) Soviets falsified ICBM deactivation reports, 1975 to 1981, SALT I;

(4) Soviets concealed 30 H Class SLBMs in their allowed 950 SLBMs, in order to avoid deactivating them, SALT I, 1972;

(5) Soviets built mobile SS-16 ICBMs, despite Brezhnev's pledge not to, SALT I, 1972;

(6) Soviets lied on "Stretch Yankee" submarine, 1974, SALT I;

(7) Soviets withheld operational SS-16 mobile ICBMs from SALT II Data Base, 1979;

(8) Soviets withheld long range AS-3 Kangaroo missiles from SALT II Data Base, 1979;

(9) Soviet leader Brezhnev falsely claimed that their Backfire bomber did not have refueling capability or intercontinental range, SALT II, 1979;

(10) Soviets refused to agree to heavy ICBM definition, intercontinental bomber definition, or missile capability baseline data, SALT II, 1979;

(11) Soviets lied on Mutual Balanced Force Reductions (MBFR) negotiations troop strength data, 1978-present.

There is extensive evidence of Soviet deception in the SALT negotiations. This evidence spans both SALT I and SALT II, and relates both to Soviet negotiating behavior and to the operation of Soviet strategic forces.

The Soviets deceived the US in May, 1972 on each of the three main issues of SALT I: constraints on ICBM and silo size increases, constraints on SLBMs, and constraints on mobile ICBMs.

In SALT II, the Soviets continued to negotiate deceptively, in order to avoid all effective constraints on "new type" ICBMs. Moreover, the late Soviet President Brezhnev's statement on Backfire bombers is deceptive, because by denying Backfire's intercontinental range and refueling capabilities, it contradicts agreed US Intelligence judgments.

Soviet SALT negotiating deception is confirmed by a highly classified 1978 CIA study by this author entitled "The Soviet Strategic Planning Process and SALT (U)." An unclassified version of this CIA study has been published by this author as "The Bitter Fruit of SALT: A Record of Soviet Duplicity."

In SALT I, the US fell victim to Soviet deceit and to its own gullibility and myopic assumptions. In essence, the US traded off its superior ABM technology in return for what proved to be illusory constraints on Soviet offensive strategic capabilities. Carefully, shrouding their ongoing and ambitious strategic programs, the Soviets negotiated ceilings that in no way compromised their force goals. They used this deception and loopholes in the SALT I agreement both to camouflage and legitimize a thrust to strategic superiority that will endure well into the 1990s. The fact that the US continues arms control negotiations with the Soviets despite officially confirmed Soviet violations and deceptions is an indication of the power of Soviet deception and Western self-deception.

Not only was the US deceived by the Soviet Union in SALT I, but that deception, which has since been acknowledged by former American officials who were its victims, is compounded in the SALT II Treaty. Soviet deception has embraced not only negotiation tactics, but also active concealment of offensive programs. The triump of those tactics is a SALT II Treaty that guarantees an overwhelming Soviet strategic superiority throughout the 1990s.

There is also good evidence of Soviet negotiating deception on the Biological Weapons Convention of 1972. For example, the Soviet Military Dictionary of the 1978 period stated: "Bacteriological warfare is forbidden by international law and is condemned by all progressive mankind." But in the Soviet Military Encyclopedia of 1982, the Soviets said: "Achievement in biology and related sciences have led to an increase in the effectiveness of biological agents as a means of conducting warfare," and to a qualitative re-examination of the very concept of 'biological weapons.'

The following points confirm the above examples of Soviet arms control negotiating deception. First, as the President's General Advisory Committee (GAC) Report stated: "The Soviets sign and ratify arms control treaties they are planning to violate."

The GAC Report added: "The Soviet Union's actions since 1958 concerning arms control agreements demonstrate a pattern of pursuing military advantage through selective disregard for its international arms control duties and commitments . . . The committee found recurring instances of Soviet conduct involving deliberate deception, misdirection, and falsification of data during negotiations."

Moreover, former Under Secretary of Defense DeLauer testified to Congress in 1984 that: "The Soviets in fact never slowed or even perturbed their strategic development and deployment programs in spite of detente, active arms control negotiations, or the SALT Agreements . . . Major programs recently deployed or now late in development were generally initiated at the highest levels of Soviet leadership about ten years ago."

As noted, the Defense Department Posture Statement for FY1985 stated: "Several of these violations must have been planned by Soviet authorities many years ago, in some cases perhaps at the very time the Soviet Union entered into the agreements."

Finally, Assistant Defense Secretary Richard Perle testified to Congress in 1984 that "The Soviets have not hesitated to mislead us, deliberately and all too successfully."

Negotiation over arms control treaties is to the Soviets part of the ongoing war against the West and capitalism. We must recognize that arms control negotiations are an integral part of this ideological war. The Soviet Union has never paid any serious attention at all to its treaty commitments with any nation. The Soviets violate their own constitution, and use international law and diplomacy as instruments of policy in the international power struggle. The Sovi-

ets have been flagrantly violating since 1933 the basic agreement establishing the basis of US-Soviet diplomatic relations, by engaging in revolutionary activity within the US.

HISTORY OF SOVIET TREATY VIOLATIONS AND DECEPTIONS

In April 1984, the Defense Department stated: "To the Soviets, treaties are manipulated in the manner most conducive to the interests of national policy objectives."

This assessment is borne out in an analysis of Soviet Treaty compliance behavior since 1917 and in this fundamental Soviet directive issued in 1917 upon the founding of the USSR: "Deception is an arrangement of light and dark...the people must be made to see white where there is black."

President Reagan, on September 2, 1983, asked these very relevant questions after the Soviet attack on Korean Airlines flight 007: "What can be said about Soviet credibility when they so flagrantly lie...? What can be the scope of legitimate mutual discourse with a state whose values permit such atrocities? And what are we to think of a regime which establishes one set of standards for itself and another for the rest of mankind?"

President Reagan answered his own question, when in October, 1983, be stated: "We can not change the Soviets yet we can change our attitude toward them. We can stop fooling ourselves that they dream the same dreams and cherish the same hope that we do."

A 1962 Defense Department Study entitled "Soviet Treaty Violations" confirmed over 50 Soviet security treaty violations since 1917. These violations were also confirmed by a 1962 US Senate Judiciary Committee study the same year.

Long before SALT began in 1969, the Soviets violated two significant arms control treaties, one in the 1920s, which entailed onsite inspection, and another in the late 1940s.

As Soviet authorities on international law have themselves stated: "Those institutions of international law which can facilitate the accomplishment of the stated tasks of Soviet foreign policy are recognized and applied in the USSR; those which contradict these aims in any way are rejected."

According to an official US State Department Soviet Affairs Note dated August 10, 1959: "Few nations can match the USSR in vociferous protestations of loyalty to international obligations. However, such declarations which are typical of Soviet propagandists and scholars alike-diverge widely from Soviet practice. In the years since the Bolshivik Revolution the Soviet government, while consistantly accusing others of bad faith in international dealings, has not hesitated to violate its own treaty obligations when such action appeared to be in its interest."

This conclusion is well illustrated by V.I. Lenin's cold admission in 1918 regarding the March, 1918 Soviet/German peace treaty of Brest-Litovsk: "Yes, of course we are violating the treaty. We have already violated it 30 or 40 times."

The 1959 State Department analysis of Soviet treaty compliance authoritatively concluded: "The history of the last 40 years provides numerous examples of deliberate treaty violation by the Soviet regime . . . The USSR has disregarded treaty provisions inconvenient to itself, has unilaterally denounced conventions to which it is a party, has threatened abrogation as a means of intimidation, and has on several occasions attacked fellow signatories to treaties of friendship and non-aggression."

It is evident that the Soviet Union places no value in abiding by international agreements. The Soviet view is that, if an international obligation no longer serves its purposes, Moscow has no inhibitions about violating it. As the record of diplomatic history indicates, the Soviet approach to its international commitments should warn us that we must create a clear Soviet self-interest in treaty compliance; otherwise, treaties with the Soviets are self-deceptive scraps of paper, which are worse than worthless. In fact, treaties with the USSR can be a positive danger if they lull us into a false sense of security, as they have done so often in the past.

That same false sense of security has permitted the enormous momentum of the Soviet strategic weapons build-up, which started even before the Cuban Missile Crisis of 1962, and which will continue into the 1990s, unconstrained by existing SALT treaties which the US still unilaterally observes.

Former Reagan Administration Arms Control Director Dr. Eugene Rostow has written: "The SALT I Agreements and the process of negotiating SALT II did not prevent the worst decade of the Cold War or the extraordinary buildup of the Soviet nuclear arsenal."

And as noted, a top Regan Defense official, Dr. Richard DeLauer, also told Congress: "The Soviets in fact never slowed or even perturbed their strategic development and deployment programs in spite of detente, active arms control negotiations, or the SALT agreements."

Finally, as Richard Perle has testified: "The Soviets see arms control negotiations not in terms of negotiating mutually beneficial agreements to limit the risks and consequences of war, but as an opportunity to inhibit US programs, create divisions within the Western Alliance, and prevent the exploitation of advanced US technology to balance Soviet quantitive advantages in military systems." And Assistant Defense Secretary Richard Perle has added that there has been almost a 100% increase in Soviet nuclear warheads aimed at the United States since SALT II was signed in 1979.

A friend of President Reagan, Laurence Beilenson, summed up our problem in his recent book: "We consider ourselves sagacious in staking our survival on treaties with the USSR, whose ideology blesses cheating as a virtue."

But the best summation was given by Soviet leaders themselves. V.I. Lenin stated: "Promises are like pie crusts, made to be broken."

And Joseph Stalin stated: "Words have no relation to actions—otherwise what kind of diplomacy is it? Words are one thing, actions another. Good works are a mask for concealment of bad deeds. Sincere diplomacy is not more possible than dry water or wooden iron."

And Lenin's and Stalin's approach has been confirmed as the consistent Soviet approach by official US Government documentation from 1959, 1962, 1984, and 1985. This documentation supports the final and inescapable conclusion that the Soviets have violated, evaded, or circumvented virtually every international security treaty they have signed since 1917.

But the USSR violates not only its international agreements, it also violates far more basic notions of international conduct. There is thus strong evidence that the Soviet leadership planned and ordered implemented the plot to assassinate Pope John Paul II in June, 1981. Moreover, Soviet violations of the chemical and biological warfare treaties are more than simple arms control treaty violations. They are intentional atrocities. Thousands of innocent men, women, and children in Southeast and Southwest Asia have died horribly cruel deaths at Soviet hands. And these more recent examples are only a small part of the evidence of history which shows that the Soviet Union is truly an outlaw nation operating at the outer bounds of despotism.

CONFIRMATION OF THE FAILURE OF ARMS CONTROL

Finally, we should turn the clock back to 1971, when America was still a Great Power, and examine how American tolerance for the Soviet strategic buildup was the basis for failure of the arms control process. Gerard Smith, the Nixon Administration's Arms Control Director, stated over-confidently long ago in 1971: "If, after a reasonable period, SALT negotiations prove unproductive, or if the USSR resumes land-based ICBM deployment or moves to modernize or expand its Moscow ABM system, the United States would take whatever steps are necessary to maintain its strategic deterrent."

Today, in 1985 we should evaluate Gerard Smith's self confident prophesy.

First, the SALT II negotiations did not produce a ratifiable treaty, even after seven years of negotiations. Thus it is fair to say that SALT negotiations have been "unproductive."

Second, Soviet violations of SALT II and the SALT I ABM Treaty, 17 of which have been confirmed by the President to the Congress, prove conclusively that SALT treaties have not constrained Soviet strategic forces. Indeed, the Soviets have 'resumed' land-based ICBM deployment, in violation of SALT II, and the Soviets are both 'modernizing' and 'expanding' their ABM system, in violation of the SALT I ABM Treaty.

Third, despite Smith's confidence that the US would respond to all these Soviet challenge conditions, the US is not taking the necessary responsive steps to "maintain its strategic deterrent."

In 1972, the SALT I ABM Treaty and SALT I Interim Offensive Agreement succeeded in killing the superior US ABM program, in exchange for constraints on Soviet forces which turned out to be completely illusory. The Soviet offensive buildup continued unchanged by SALT I and II. But since 1972, the Soviets have also competely reversed the relative position of the sides on ABM capabilities, and now the Soviets are Breaking Out of both defensive and offensive SALT I and II constraints. Meanwhile, the Soviets in 1985 are once again trying to convince the US to give up its Strategic Defense Initiative and defensive Anti-satellite program, in exchange again for either nothing or for illusory offensive constraints. But as the late President John F. Kennedy said in 1961: "If they fool us twice, its our own fault." America is in fact quite close to unilaterally giving up its nuclear deterrent.

As the Committee on the Present Danger has concluded recently: "The adverse balance entails both political and military risks . . . As relative Soviet power continues to increase, the Soviets expect the US and its allies to move increasingly toward accommodation and appeasement."

Winston Churchill warned gravely after World War II: "Sometimes in the past we have committed the folly of throwing away

our arms. Under the mercy of Providence, and at great cost and sacrifice, we have been able to recreate them when the need arose. But if we abandon our nuclear deterrent, there will be no second chance. To abandon it now would be to abandon it forever."

ORDER OF PROCEDURE

Mr. PRYOR. Mr. President, I ask unanimous consent that I may be permitted to speak out of order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRYOR. Mr. President, I am aware that the distinguished Senator from Wisconsin [Mr. PROXMIRE], as a matter of standing, has a special order, already arranged. Should he arrive in the Chamber, I will be more than happy to defer to the Senator from Wisconsin.

Mr. President, I ask unanimous consent that the statements on this subject matter, to be given later in the course of this legislative day, by the Senator from Missouri [Mr. EAGLETON] and the Senator from Vermont [Mr. LEAHY], be printed together with the statement I am about to deliver on this matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from South Carolina [Mr. THURMOND] is also scheduled for a special order.

Mr. PRYOR. Under that situation, Mr. President, should the Senator from South Carolina arrive, I will be glad to defer to him because he has a special order scheduled.

THE DEFENSE DEPARTMENT'S INFLATION WINDFALL

Mr. PRYOR. Mr. President, because of three entirely independent studies, there are some questions that all of us in the Senate should be asking about the Defense Department and how it and Congress have budgeted for inflation for the past 4 years. As it turns out, this is a very significant matter: the cost to taxpayers for the problem I will describe has been tens of billions of dollars since fiscal year 1982, and the problem and the waste are continuing. I hardly need to emphasize the significance of an issue of this magnitude to the Federal deficit, the trade deficit and the concern of all of us to put every tax dollar to the most productive use possible. Effectively addressing this problem is Congress's first opportunity to give meaning to all the speeches given in this body for the past 2 weeks on the issues of the deficit and of straightening out the Defense Department.

To explain, we need to review the Defense Department's budgeting and accounting procedures for inflation and a little history.

HOW DOD HAS REAPED A DIVIDEND

Since the early 1970's, each defense budget request that Congress has received has contained a forecast of what amount of inflation is expected to occur. As Congress debates the budget, we refine the inflation forecast, sometimes, and provide what we think is the appropriate amount. After we finally pass the defense appropriations bill, it is time to consider the next fiscal year's budget, and we repeat the cycle.

In the past this system worked reasonably well, even though our inflation predictions were almost always wrong. Very often, especially in the late 1970's, more inflation occurred than we predicted. When that happened, the Defense Department would inform Congress how much we underfunded for inflation, and a supplemental was requested to compensate.

Then, two things happened. First, we reformed procedures for budgeting for inflation in the Defense Department. Second, inflation in the general economy started going down, rather than up.

What reform did we adopt? It was one of the famous 32 Carlucci reforms. The specific reform I am referring to is the one that called for "more realistic budgeting" for weapons programs. Unfortunately, it was one of the few Carlucci reforms that were effectively implemented.

What did this reform do? Why should it not have been implemented? It sought to avoid the mistakes of the past when we had been under-budgeting for inflation; so, it reversed the practice and overbudgeted for inflation. It added a special surcharge that went beyond giving weapons 100 percent of predicted inflation; it gave weapons 130 percent of predicted inflation. This special surcharge, called the Major Commodity Index, was applied to weapons programs in the Department of Defense. It was not applied to any other Federal agency; it was not even applied to nonweapons procurement inside the Defense Department.

Congress accepted the argument in favor of the special weapons inflation surcharge and started to provide funding for it in the fiscal year 1983 budget. From that year until the end of fiscal year 1985, $9.2 billion was appropriated to the Defense Department just for the extra 30 percent in this realistic budgeting reform.

But, while we were funding the "Major Commodity Index," what was happening to inflation in the general economy? It was going down. In fact, the rate of inflation was going down so fast that, in contrast to the past, we were not being too optimistic about inflation; we were being too pessimistic. Not more, but less inflation occurred than we predicted. How much? In fiscal year 1982 we overpredicted inflation by 2.2 percent, in fiscal year 1983 by 2.3 percent, in fiscal year 1984 by 0.4 percent, in fiscal year 1985 by 0.4 percent again.

Each time we predicted too much inflation, we passed an excess appropriation to cover it. We funded inflation that never occurred. How much? $27.6 billion for the fiscal years 1982–85.

What does this mean about Mr. Carlucci's Major Commodity Index? While it was based on the presumption that Congress would underfund for basic inflation, Congress was actually over/funding for basic inflation. Just approving 100 percent of our inflation forecast proved to be too much; thus, the Major Commodity Index's 130 percent was 30 percent more too much.

HOW MUCH UNINTENDED INFLATION FUNDING HAS CONGRESS APPROVED?

In short, we overcompensated in two ways. First, our basic inflation forecasts and the appropriations for them were too high by $27.6 billion, and the Major Commodity Index overfunded by 30 percent on top of that. The total for both forms of inflation overpayment—payment for inflation that never occurred—adds up to $36.8 billion for the past 4 fiscal years. For the Department of Defense this is known as "the inflation windfall."

Unfortunately, there is more bad news. Like interest in the bank, a portion of the annual excess appropriations compounds from year to year. If we put too much money in the fiscal year 1982 budget, the out-year money from that budget sticks around. As long as the inflation forecasts for those out-years is too high, the money remains as excess. When this occurs for 4 years in a row, an additional—compounded—amount results, and it can become substantial. Taking this effect into account, the total, compounded excess appropriation for the past 4 fiscal years would amount to something in excess of the $36.8 billion I have already identified.

Mr. President, how did we let something in excess of $37 billion accumulate? Why did we not balance the books just as any sensible business would?

In the late 1970's when we underfunded inflation, the Department of Defense was our safety valve. Once history demonstrated the size of our forecasting error, Defense would ask us to compensate. But what happened after 1982 when we started to over-appropriate for inflation? Reaping the benefit and being no fool, the Defense Department did not come up regularly and tell us we had given them too much money for inflation. I do not recall any reverse-supplementals the Defense Department asked Congress to enact.

WHERE DID THE MONEY GO?

Instead, some mysterious things started to happen. Rather than asking for an annual balancing of the books, from time to time—actually whenever

Congress seemed about to reduce the defense budget by too large a margin—we would be informed that some extra money had been found from previous budgets. Just lying around in an old shoe box. We were told we could move this money from previous budgets to the new one and thereby soften the blow of congressional budget cuts. This is exactly what happened last May when Secretary of Defense Weinberger told us he had $4 billion extra to be moved into the fiscal year 1986 budget.

Other mysterious money would show up in the form of what are called lapses. This was money that sat around in the Pentagon's accounts too long for it to be used. The statutory authority for its use expired, and it had to be returned, by law, to the Treasury.

Even more extra money showed up in the form of reprogrammings—congressionally approved transfers of funding from one defense account to another. This entire subject of reprogramming should be another and separate subject of discussion and concern.

Still more extra money showed up as unobligated balances: Money appropriated to the Defense Department but not yet spent and not yet lapsed. Some analysts are particularly interested in this specific account because it is $13 billion higher than the Pentagon predicted it would be by the end of fiscal year 1985.

The hard question is, Is all this extra money the same money that Congress over-appropriated to the Defense Department for inflation that never occurred? The answer is not now known and it never will be known. Why? Because the Pentagon has identified only a small portion of it all as excess inflation money. Most of it is identified as resulting from programatic changes—changes in defense programs not related to inflation—program cancellations and delays, management savings, and so on. For example, of the $4 billion that Secretary Weinberger identified to Congress in May he had recently discovered, only about one-third was identified as excess inflation funds. The rest, we are told, was available for reasons other than unrealized inflation.

We seem to be in a real mess here; we know we have overfunded for inflation, and we know by how much, but we do not know where the money went or how much, if any, is left over. How much of it went for $1,000 stool caps, $435 hammers, and $654 armrests? We will never know, but it would seem a safe supposition that such gross waste is easy when there is more than $37 billion looking for someone to spend it.

STUDIES OF DOD INFLATION

We have a debt of gratitude to a colleague for helping us uncover this matter. The subject was first addressed in a speech on the House floor by the chairman of the House Armed Services Committee, Congressman LES ASPIN. He estimated the excess inflation dividend made available to the Defense Department for the fiscal years 1982 to 1985 to be somewhere between $18 and $50 billion. A second major study was released by the congressional military reform caucus. That study concluded the excess inflation funding for the same period could be somewhere between $42 and $54 billion. The suspicions that these studies raised were confirmed when the General Accounting Office was asked to look into the matter by the Senate Appropriations Committee.

The GAO concluded in that statement last month that the excess DOD inflation dividend amounted to $36.8 billion—the amount I cited earlier—if the annual inflation dividend is not compounded from year to year. If compounding is used—as the GAO says it should be—the figure can become larger. However, the GAO is reluctant to assign a specific figure to the compounded total. If excess inflation funding in the fiscal year 1986 defense budget is taken into account, an extra $4.9 billion should be added to the total. It appears indisputable that we are continuing to commit these gross budgeting errors and that the seemingly outlandish findings of Congressman ASPIN and the military reform caucus were all too accurate.

Each of the studies I have referred to came to some other common conclusions. Each identified the 130-percent inflation surcharge—the "realistic budgeting reform"—as wholly unjustified. The GAO found not one but five reasons to terminate the surcharge—

First, it is very difficult to ascribe any specific inflation multiplier to weapons program inflation;

Second, history shows that weapons program inflation actually behaves differently than the Major Commodity Index predicts;

Third, if there is higher inflation in weapons, there should be lower inflation in other forms of defense spending because overall defense inflation generally tracks with inflation in the rest of the civilian economy;

Fourth, if the 130-percent surcharge were used indefinitely, it would eventually absorb the rest of the entire Federal budget; and

Fifth, and most importantly, allowing the surcharge encourages and rewards mismanagement; over budgeting for a weapon can become a self-fulfiling prophecy; with extra money, program managers have no incentive to minimize costs.

WHAT SHOULD CONGRESS DO NOW?

Clearly, the Major Commodity Index should be terminated. Doing so now would mean extracting $3.5 billion from the fiscal year 1986 defense budget and spending it instead on some additional weapons or removing it entirely from the defense budget and using it to pay on our deficit. Leaving that money in the budget for the surcharge will only make room for mismanagement. Unless we take appropriate action, next year's 1987 budget request will very likely contain a similar, but larger, amount for the Major Commodity Index and our rewards for mismanagement will continue.

In addition, according to the most recent forecasts of the inflation now expected to occur in fiscal year 1986, there is an additional $1.4 billion excess in the budget due to yet another inaccurate inflation forecast. This money could be removed from the 1986 budget, in addition to the Major Commodity Index excess. Doing so now, however, should not preclude rechecking at the end of fiscal year 1986 to see if this latest projection turns out to be accurate.

The GAO and other studies made other finds and recommendations that we should also pay some serious attention to. It would naturally occur to any of us that we should find out what actually happened to the excess inflation appropriations—or even just locate what's left—and reclaim that money. That, however, looks like a very difficult exercise. I have already pointed out that, of the mysterious funds that show up from time to time, even the Pentagon can identify only a small portion as due to inaccurate inflation forecasts. The accounting system in the Pentagon is apparently too confused—for reasons we can only suspect—to be helpful. The GAO made this quite clear on the cover of its study, which states "A major difficulty is that the accounting system that tracks how funds are actually being used is not directly linked to the budgeting process."

We can conclude that one thing we should not do is to attempt the futile exercise of tracing money when the tracks have been completely covered over.

How than can we balance the books? Should we consider the money lost and gone forever and just wait for the Pentagon to tell us sometime in the future how much money even it cannot figure out how to spend? Is there any action we can take to rectify our past mistakes?

Again, data in the GAO study suggests a solution. The major portion of the annual defense debate in Congress is about how much real growth to appropriate. Each year this debate continues until we settle on a specific compromise figure. Some years we settle on 5 percent; sometimes we settle on 7 percent; this year we settled on 0 percent. Over the past 4 years, these agreements have amounted to a total of 33.5 percent.

In actual fact, we only thought we had agreed on a total of 33.5 percent real growth. We now know from looking back at history that the actual amount of real growth we funded was higher. Why? Because when inflation we anticipated and funded did not actually occur, the excess funds became available to be spent on programs, not useless inflation. The GAO has done the appropriate computation. It has found that we did not appropriate 33.5 percent real growth; we appropriated 40.1 percent real growth.

From the data in the GAO study we should now be able to calculate what we should appropriate in fiscal year 1986 to provide the 33.5 percent real growth we thought we were providing. To do so would be a one time only readjustment of the defense budget baseline to make reality out of Congress intentions. What should that baseline be for fiscal year 1986? If we calculate the real growth intended by Congress from fiscal year 1982 forward for the Department of Defense and military construction—that is, just the defense money that goes to the Defense Department and not counting money in other agencies for defense—to correct baseline for fiscal year 1986 is $287.5 billion. That is $6.7 billion less than the funding we approved last spring when we intended to approve a zero growth defense budget.

That $287.5 billion, Mr. President, would allow all the real growth Congress intended for the past 4 fiscal years; it would fund all the inflation that actually occurred, and it would buy every ship, tank and airplane Congress decided it wanted to buy. That amount, $287.5 billion, is the precise amount of real growth Congress debated over and agreed upon. We haggled and argued, and we made an agreement. Any chart anyone—including anyone in the Defense Department—will show you states that from fiscal year 1982 to fiscal year 1985 we in Congress approved 33.5 percent real growth, not 40.1 percent. If we don't balance the books, we will have to rewrite all the charts. The question is, are we going to do what we said we would do?

Are we going to approve in fact the Defense Program we approved in our minds? To realize our intentions, we will have to reduce the currently approved budget resolution zero growth defense budget for fiscal year 1986, which we now know is set at the wrong level, by $6.7 billion. To do so will enact the defense freeze we agreed to approve. We thought $294.2 billion was a freeze; in fact, $287.5 billion would be a freeze; $287.5 billion will provide no real growth, but it will account for all the inflation that has actually occurred.

If we enact what the Senate passed in the defense authorization bill and in the budget resolution, $294.2 billion for Defense Department spending, we will not be enacting a zero growth defense budget; we will be enacting a 2.3-percent real growth budget. That is the difference that this $6.7 billion will make. The defense budget we have approved so far is a phony budget; it is not a freeze; it is a 2.3-percent real growth budget.

One final question has to be answered to solve all the problems that research into this matter has revealed to us: are we going to find a way to stop committing these gigantic errors? Are we going to keep on relying on habitually inaccurate inflation forecasts, or are we going to allow a little reality to enter our deliberations?

Again, the GAO has given us a suggestion: it recommends that the Defense Department must "monitor any actual inflation dividends or shortfalls that occur and report the latest information to Congress at the critical stages in the budget process." What that means, Mr. President, is that on a regular basis we will have to check in with actual history, see if our inflation expectations were realistic, and adjust accordingly. Depending on what the facts tell us, it may mean at times that we owe DOD money; in other instances, it may mean that DOD owes the Treasury money. Without making a rectification for inflation a regular part of our budgeting practices, we will only be keeping ourselves in the dark, and we will make the entire Federal budget vulnerable to losing tens of billions of dollars that could be put to productive use.

Finally, Mr. President, there are lessons in all of this for our work on the entire Federal budget. First, we should inspect the budgets of all Federal agencies, not just the Defense Department, for problems similar to what we have discovered here. Second, we should never in the future allow any Federal agency to influence directly what inflation index should be applied to its own spending. The Defense Department was given that opportunity with the Major Commodity Index—the Carlucci index—and exploited the situation.

Many outside of DOD, and some inside DOD, who have closely inspected the Carlucci index can find no objective justification for it. Not only should it be eliminated, but henceforth we should require that no Federal agency will benefit from self-serving inflation indices. Only an independently derived index should be used. The GAO recommended the GNP inflation index for the entire defense budget. The military reform caucus suggested that using the Producer Price Index for the procurement budget might be more appropriate. Whichever is used, we must not allow it to be jiggered by interested parties. We cannot allow one Federal agency to perform raids on the Treasury at the expense of the rest of the Government and the taxpayers.

Mr. President, I see the Senator from Wisconsin on his feet and once again I apologize for taking some of his time.

If I might at this time, let me conclude my remarks.

Mr. President, I have tried to explain in understandable terms a subject that is complex and hard to fathom. When I was first informed of this issue, I laterally could not believe my ears. Congressional budget procedures for inflation contain a fundamental flaw; they don't track with reality; they fail to check in with history and balance the books. We have been unintentionally deceiving both ourselves and the taxpayers. We should move quickly to adopt solutions and restore integrity to Congress' most important constitutional function: the control of revenues. Effective solutions need not be complex; all we need to do is—

Balance the books now and on a regular basis in the future; and

Stop committing the past errors.

I hope my colleagues will give their most serious attention to this matter. It deserves our attention; it demands our attention. I understand that at this point no hearings have been scheduled on the GAO study. I hope that situation will change. To do nothing will perpetuate the loss of billions of dollars to pay for inflation that has not and will not occur. I cannot imagine a more appropriate effort for us to engage in when all of us are desperate to find savings to apply to the national deficit.

I shall ask unanimous consent for there to be printed in the RECORD materials and newspaper articles shedding further light on my remarks.

Mr. President, I ask unanimous consent that a short executive summary prepared by my staff on this matter be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXECUTIVE SUMMARY

Every agency budget that Congress approves contains funding for anticipated inflation. Historically, those inflation forecasts have been inaccurate. In the late 1970's, particularly in the defense budget, inflation costs were underestimated. As a result, DoD would request and receive supplementals. Things changed in 1982; inflation started to decline faster than anticipated. As a result, Congress over-budgeted for inflation, but DoD did not regularly inform Congress of this new phenomenon.

After studies of this matter by Congressman Les Aspin and the Congressional Military Reform Caucus, the General Accounting Office found that from fiscal year 1982 to 1985 the Defense Department received an excess of $36.8 billion for inflation that was anticipated but which did not actually occur. In addition, the GAO has found an

excess for inflation in the FY 86 budget of $4.9 billion.

There are two sources of this excess money: (1) over-estimates of basic inflation in the general economy; (2) the Major Commodity Index, a special 30% add-on for inflation in weapons programs. The GAO found no justification for this cost increasing funding buffer.

A natural question is: what happened to all of this money? It appears that no one really knows. The GAO pointed out a mismatch between the DoD's budgeting and accounting systems that lost track of the money and allowed it to become hopelessly intermingled with other excess funds resulting from non-inflation related budget activity. It also appears that much of the excess inflation money went to pay for extra costs. There is little evidence that the excess $36 to $40+ billion went toward extra real defense. Put another way, Congress thought it approved 33.5% real growth from FY 82 to FY 85; actually, it approved funding for 40.1% real growth, but that difference, 6.6%, did not result in 6.6% more defense.

This evidence calls for four actions by Congress—

Eliminate the Major Commodity Index which gives weapons not 100% of inflation, but 130%;

Regularly check in with actual history to readjust, up or down, the amount of inflation funding allowed in budgets;

Do not allow any federal agency to conjure up self-serving inflation indices for their own spending; and

Check all federal agency budgets for problems similar to those found in the Defense Department.

Mr. PRYOR. Mr. President, I ask unanimous consent that another summary "The Costs of Funding Nonexistant Inflation," also prepared by my staff, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE COSTS OF FUNDING NONEXISTENT INFLATION

In the late 1970s, when inflation was rising faster than expected, congressional appropriations to DOD were not sufficient to cover the inflation that actually occurred. DOD requested, and received, supplemental appropriations from Congress to correct for this underestimated inflation. In the first half of the 1980s the problem was reversed; less inflation actually occurred than projected in annual DOD budget presentations. As a result, Congress funded DOD for more inflation than actually occurred. In contrast to the late 1970s, DOD has not annually sought a rectification from Congress to readjust. As a result, Congress provided the Defense Department with 6.6% more real growth than intended since FY 1982. In addition, it appears that the "zero growth" FY 1986 Department of Defense budget actually contains some real growth. Without an end to inappropriate inflation funding practices, the problem will only continue and worsen.

This issue has been the subject of three major reports. The first to become publicly known was a speech by Congressman Les Aspin. He estimated the excess inflation funding made available to DOD for the fiscal years 1982-1985 to be somewhere between $18 and $50 billion. The second major study to be released was conducted by the Congressional Military Reform Caucus. That study concluded the excess inflation funding for the same period could be somewhere between $42 and $54 billion. The General Accounting Office was asked by the Senate Appropriations Committee to study the matter; its study was released on September 3. It concluded that the excess DOD inflation dividend amounted to $36.8 billion. This calculation does not assume that a portion of the inflation dividend, like interest in the bank, compounds from year to year. The GAO report did, however, accept the principle of compounding but found it difficult to arrive at an authoritative, compounded figure. Were any compounding effect to be calculated, the amount would exceed the $36.8 billion identified by GAO. In addition to the FY 82-85 windfall, the GAO has found an excess of $4.9 billion in the FY 86 budget, due to a special weapons program inflation index multiplier and continuing inaccurate inflation forecasts.

The Department of Defense has not yet publicly responded to the GAO study, but Secretary Weinberger has responded with a letter to Congressman Aspin. That letter confirms that less inflation has actually occurred than Congress anticipated and funded since FY 82, and it states that $61.7 billion has been shifted within or removed from the DOD budget as a result. However, of the $61.7 billion claimed by Secretary Weinberger, $33.3 billion was never even requested from Congress and was only included in initial DoD spending plans; $7.1 was "lapsed" and returned to the Treasury, and $13.1 was the subject of congressionally approved reprogrammings. Most significantly, Secetary Weinberger's letter did not distinguish inflation related funds from program alterations, savings or cancellations or other funding changes, not related to inflation, that commonly occur in the defense budget. Thus, it is difficult to compare the numbers contained in the Weinberger letter to the Aspin, Reform Caucus and GAO studies.

In addition to restricting their analysis to inflation, the three non-DoD studies have an additional important aspect in common. Each of them found unjustified a 30% add-on that DoD has been applying to major weapons buying since FY 83. This inflation surcharge, known as the Major Commodity Index, was initiated as one of the 32 Carlucci "reforms" in 1982; it allows all major weapons programs 30% more inflation than the rest of the economy has been experiencing, and for the last four fiscal years has been 30% higher than the already too high basic inflation forecasts. None of the non-DoD studies found any present or historical justification for this additional inflation dividend. $3.5 billion remains in the FY 86 budget request, presently pending in Congress, as a result of the 30% surcharge.

Another lesson to be learned from the three independent studies and the Weinberger letter is that it will probably be a futile exercise to determine with any clarity where the excess inflation money went. Some was "lapsed"; some was reprogrammed, and some was removed by Congress from requests. More importantly, however, some has very probably been paid to contractors in the form of extra costs, and some might remain unexpended in the DoD's $64.9 billion account of unobligated balances, $13.3 billion of which is beyond DoD's own estimates of what would be obligated by the end of FY 1985. To find what really happened to this money would require a very time consuming and expansive accounting effort that would probably be arguable in the end. GAO pointed out the difficulty of such an exercise on the cover sheet of its study: ". . . the accounting system that tracks how funds are actually being used is not directly linked to the budgeting process." In short, a mismatch between the budgeting and accounting systems in the Department of Defense have covered over the tracks of exactly what happened to the excess inflation appropriations.

Appropriate readjustments can, however, be made.

POSSIBLE REFORMS

All available independent analyses agree that the 30% surcharge should be terminated. Funding resulting from it in the FY 86 budget presently before Congress amounts to $3.5 billion.

History makes clear the habitual inaccuracy of projections of anticipated inflation into the future; they are routinely too high or too low by some degree. Instead of relying on inaccurate projections, Congress could annually rectify the DoD budget after the fact by looking back at actual inflation history and readjust as determined appropriate—i.e., we could annually balance the books. While FY 86 is not yet history, GAO's latest refinement of the inflation rate expected to occur in FY 86 indicates that basic inflation funding, in addition to the $3.5 billion Major Commodity Index excess, may be $1.4 billion too high. This possible excess could be removed from the defense budget now, but any such action should not preclude a rectification when FY 86's actual inflation rate can be factually established.

The independent studies of this problem demonstrate the impropriety of allowing any federal agency to meddle with the inflation index applied to its own spending. Instead of any special, budget increasing inflation index, whether applied forward or to the past, Congress should insist on the use of only independently derived, unaltered inflation indices. The GAO recommended the GNP inflation index—without any special multipliers.

The mismatch between the accounting and budgeting systems in the Defense Department, pointed out by the GAO, will make it very difficult to identify and reclaim whatever amount of excess inflation funding remains unspent in the DoD budget. While it may not be possible to locate whatever may be left of the inflation dividend, it certainly should be possible to require a budgeting and accounting system that tracks inflation money throughout its travels in the Department of Defense.

It may also be possible to recalculate what level of funding Congress should appropriate to DoD in FY 86 to restore the spending baseline to the amount of real growth intended by Congress over the past four fiscal years. GAO calculates that Congress intended to approve 33.5% real growth from FY 82 to FY 85 but actually provided 40.1% real growth due to excessive inflation funding. Using this data, it is apparent that the zero growth, inflation adjusted baseline for FY 86, presently informally set at $294.2 billion for the DoD and Military Construction spending ceiling, is too high. To make a one time rectification of the FY 86 baseline to allow only the real growth intended by Congress would require reducing the 86 DoD and MilCon baseline to $287.5 billion, if only the real growth intended by Congress since FY 1982 is allowed. Any amount in excess of the $287.5 figure would provide the real growth to DoD in FY 86 beyond the rate of real growth intended since FY 1982, an

action Congress decided not to take. For perspective, this means a real growth of 2.3% if the current FY 86 Budget Resolution and DoD Authorization Conference Report are fully appropriated. Were the suggested baseline reduction to be enacted, the $4.9 billion reduction identified above as specific FY 86 inflation excess should not also be extracted from the budget.

The FY 86 DoD Appropriations bill is Congress' first opportunity to readjust funding levels to those intended and to terminate the practices that result in the excess inflation dividend for DoD.

Other federal government agency budgets should be inspected for the same problem.

Mr. PRYOR. Mr. President, I ask unanimous consent at this point in the RECORD that a summary of the Comptroller General's report to the chairman of the Senate Committee on Appropriations and to Senator D'AMATO be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Comptroller General's Report to Chairman, Senate Committee on Appropriations, and Senator Alfonse D'Amato]

POTENTIAL FOR EXCESS FUNDS IN DOD

DIGEST

The defense budget has grown over 100 percent (52 percent in constant dollars) between fiscal years 1980 and 1985. The Senate budget resolution for fiscal year 1986 is the first major reversal to this trend. In effect, it targeted the defense budget at prior year levels with the exception of an amount added on to compensate for estimated inflation.

The Secretary of Defense acted to minimize the effect of the lower target by reapplying funds from fiscal years 1984 and 1985 available from what he said were management improvements, lower inflation, and the latest inflation projections for the fiscal year 1986 budget. His budget offer raised considerable congressional concern about potential excess funds in the Department of Defense (DOD) budget.

Senators Mark O. Hatfield and Alfonse D'Amato asked GAO to review this matter. Congressman Les Aspin later asked GAO for a similar review. This report responds to all three requests.

INDICATIONS OF EXCESS FUNDS

During the 1980's, DOD requested budget authority based on inflated estimates of inflation and has been unable to use appropriated funds at the rates estimated when the funds were requested and appropriated. At the start of fiscal year 1985, DOD had authority to obligate $427.1 billion. Of this amount, $284.7 billion was fiscal year 1985 authority; the balance was prior year authority and reimbursable funds. DOD also had unliquidated obligations of $153.5 billion.

INFLATION

DOD has budgeted $36.8 billion more for inflation since fiscal year 1982 than was needed to cover inflation. A special multiplier is used for major weapons that accounts for $9.2 billion of this amount.

GAO was asked to consider alternatives to the current system for dealing with inflation. Three alternatives were considered:

1. Budget for inflation through a revolving fund: GAO believes there are technical, managerial, measurement, and monitoring problems that make this alternative difficult.

2. Do not budget for inflation (fund inflation with savings or a supplemental appropriation): Because defense programs, especially weapon systems acquisition programs, take several years to implement and change frequently during that time, it is difficult to distinguish the effects of inflation from the effects of the program changes. Thus, it would be difficult for DOD and the Congress to determine what the supplemental amounts should be.

3. Improve the present inflation estimating system: some improvements could be achieved easily, such as eliminating the special multiplier for major weapon systems. Under this alternative, DOD would use the gross national product (GNP) deflator for all nonpay and nonfuel purchases. Then DOD, in consultation with the Office of Management and Budget (OMB), could decide how amounts should be distributed within the DOD budget structure. GAO favors this alternative.

UNOBLIGATED BALANCES

Unobligated balances and lapses from appropriations are likely to be $64.9 billion by the end of fiscal year 1985. This is $13.3 billion more than was estimated in DOD's fiscal year 1986 budget. For the past 4 years, DOD has underestimated the level of unobligated balances (and has also allowed funds to lapse). At the end of fiscal year 1984, the total was $57.9 billion—$14.1 billion more than DOD reported to Congress in its fiscal year 1985 budget documents. GAO found that these underestimates occurred because DOD was unable to achieve planned obligation rates.

REPROGRAMMING ACTIONS

Reprogramming actions in fiscal years 1980-85 totaled about $26 billion. Reprogramming actions have provided DOD with flexibility to reapply funds in excess of program needs.

The DOD procurement accounts sustained the largest and most consistent loss of funds in all fiscal years. Top losses were in the Air Force Aircraft Procurement and Navy Shipbuilding and Conversion accounts. Over the same period, the research, development, test, and evaluation accounts received a steadily increasing amount of funds.

CONCLUSIONS AND RECOMMENDATIONS

Although it has now become apparent that more funds for programs were available in DOD's budget than Congress intended, GAO did not fully assess the total amount of "unneeded funds" or those funds that DOD or the Congress used for other purposes. GAO could not determine the precise amount of excess funds still available in DOD without doing an inordinate amount of work.

Moreover, although DOD has in place an elaborate planning, programming, and budgeting system the accounting system that tracks how funds are actually being used is not directly linked to the budgeting process. Without an integrated budget and accounting system that can routinely produce relevant and vital financial information, GAO could not easily perform an audit of available funds in excess of defense requirements.

GAO continues to believe that DOD needs to improve and integrate its budget and financial management systems. GAO views on such systems are included in previous GAO reports.

In this report, GAO makes recommendations aimed at bringing the funds provided in congressionally approved DOD budgets in line with what is needed to carry out the programs and activities authorized in those budgets.

DOD should make improvements in the existing system used to budget and account for inflation. Therefore, GAO recommends that the Secretary of Defense take the following actions:

Continue to use the GNP deflator as the basic index for DOD inflation budgeting for the portion of the DOD purchases other than pay and fuel.

Eliminate the use of a multiplier in budgeting inflation for the major weapon systems accounts.

Distribute the funds budgeted for inflation among the various DOD appropriations accounts in consultation with OMB. (In effect, this would give DOD flexibility in deciding how to apportion the allowable inflation projects among the nonpay and nonfuel accounts.)

Monitor any annual inflation dividends or shortfalls that occur and report the latest information to the Congress at the critical stages in the budget process (request, budget resolution, authorization, and appropriations).

AGENCY COMMENTS

Because of the wide range of topics included in this report and the extremely limited period allowed to comment on the draft report, DOD said it would not be able to provide meaningful comments prior to publication of the final report. DOD further said that a detailed response to the final report will be provided as soon as possible afer it is received.

Mr. PRYOR. Mr. President, I ask unanimous consent at this point in the RECORD that a summary of a report prepared by the military reform caucus dated May 1985 entitled "Can Congress Rely on DOD's Inflation Adjustments as the Basis for a Budget Freeze?" be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

CAN CONGRESS RELY ON DOD'S INFLATION ADJUSTMENTS AS THE BASIS FOR A BUDGET FREEZE?

(A report prepared by the Military Reform Caucus)

Since 1979, each year's Congressional debate on the DOD budget ceiling has focused on what percentage to add to last year's budget, after last year's budget has been adjusted for inflation. Concerning the inflation adjustments themselves, there has been no Congressional debate—even though the adjustments are calculated by an interested party, namely, DOD.

DOD's annual adjustment for inflation differs from the other COLA's in a fundamental way. Whereas the Social Security, and the various retirement and salary COLA's adjust payments to compensate for inflation that has already occurred, DOD's inflation adjustment is based on inflation that is predicted to occur in the future. Despite the fact that inflation predictions are notoriously inaccurate, the Congress has no institutional mechanism to annually determine if DOD is overestimating inflation or to insure that DOD returns any excess funds to the treasury.

To help Congress exercise its oversight responsibility, the Military Reform Caucus has conducted a study to review whether

DOD's inflation adjustments requirement unbiased estimates or hidden additions to DOD's annual budget growth. The study has produced three key findings:

1. To increase funding for major systems procurement, in every budget since FY'83 the DOD has awarded itself a 39% add-on to its traditional Defense Procurement Deflator inflation rate projections.[1] The 30% projected rate increase is unwarranted, particularly when compared to actual historical inflation rates for major systems. Yet, DOD claims that the 30% increase is justified by a 1979 Department of Commerce study. In fact, that study does not address inflation rate projections, much less 30% add-ons.

2. Using either the new, Carlucci-introduced Major Commodity Deflator or the traditional Defense Procurement Deflator for DOD's annual inflation adjustment inherently rewards DOD for (a) overruns; (b) increase in contractor overhead or other nonproductive cost claims; (c) cost-increasing stretch-outs; (d) shifting funds into procurement accounts with high cost growth; and (e) paying inflated or unjustified prices for either spares or major systems.

The only way to avoid an inflation index that rewards DOD for mismanagement is to use an index based on comparable market sectors of the economy, such as the Producer Price Index for the manufacturing sector (since the vast majority of DOD's purchases are manufactured items).

3. With or without the 30% add-on, DOD's projections of future inflation have been consistently high relative to actual inflation in comparable sectors of the market economy.

The DOD projections proved to be higher than actual inflation rates in the manufacturing sector (Producer Price Index for Durable Manufactured Goods) by 81%, 183%, 137%, and 264%, respectively, for the last four budgets. (FY'82 to FY'85).

Using several measures of actual inflation derived from the competitive manufacturing sector of our economy, the excess appropriations due to DOD's inflation overestimates appear to be $42 and $54 billion. These costs to the taxpayer are unwarranted.

These findings have three major implications for congressional action:

First, congressional budget committees cannot continue relying on DOD's own inflation projections and DOD's historical inflation indicies. Congress needs to make an independent estimate of an unbiased and reasonable inflation allowance for DOD based on prices in comparable competitive market sectors of the economy.

Second, compared to inflation in the competitive manufacturing sector, biased and unwarranted inflation adjustments have provided DOD with excess funding of $42 billion to $54 billion between FY'82 and FY'85. The most direct way for the taxpayer to recover this money would be to transfer the execess funding out of DOD's unobligated balances back to the Federal Treasury—where it would be used to reduce the deficit and its intererst burden.

Third, after the above correction for excessive inflation allowances since FY'82, Congress needs to institute an annual DOD budget correction, either positive or negative, for the previous years inflation underestimate or overestimate.

The alternative, allowing DOD to continue increasing procurement outlays in FY'86 and beyond without changing current management and noncompetitive procurement practices, will insure that the increased outlays will be largely converted into ever-increasing contractor overhead and other nonproductive cost claims.

The American taxpayer should not be asked to continue paying DOD's inflation windfall while receiving no increased rearmament in return.

[1] This add-on was one of the Carlucci management "reforms" promulgated in late 1981.

Mr. PRYOR. Finally, Mr. President, I ask unanimous consent that the Wall Street Journal and New York Times articles on this subject be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, May 10, 1985]

PENTAGON INFLATION OVERESTIMATE IS SAID TO REAP WINDFALL OF UP TO $28 BILLION

(By Tim Carrington)

WASHINGTON.—The Pentagon reaped a budget windfall of as much as $28 billion over the past four years by overestimating the projected rate of inflation, according to congressional and private analysts.

Several studies in the works suggest that since fiscal 1982, which began Oct. 1, 1981, Congress has authorized billions of dollars for the Defense Department to keep up with inflation that never occurred. Moreover, Pentagon officials concede that there's no systematic adjustment made when inflation estimates are found to have been too high.

SLUSH FUND

Until recently, Congress focused on how much money to add to the defense budget after adjusting for inflation. Currently, however, key lawmakers are questioning the inflation assumptions used in recent years, and some even suggest that a Pentagon "slush fund" has been created as a result of the excessive inflation estimates.

"Since 1982, Congress has been consistently providing more money to cover inflation than they needed," says Douglas Lee, a defense analyst with Washington Analysis Corp., a Washington, D.C.-based affiliate of First Manhattan Co., a New York securities concern. "It gives the Pentagon managers a great deal of discretion: A program gets into trouble and they need some extra money, it means they can do things without going back to Congress."

Mr. Lee estimates that from fiscal 1982 through 1985, the inflation assumptions have built a windfall of as much as $28 billion, nearly as much as the $29 billion budget increase originally requested by the Pentagon for fiscal year 1986. A private budget analyst working on a separate study of the matter also says the excess could be that high.

Rep. Les Aspin (D., Wis.), chairman of the House Armed Services Committee, is completing a study that suggests the Defense Department has built a huge financial cushion through its inflation estimates. In addition, Sen. Lawton Chiles (D., Fla.) recently questioned Pentagon officials during hearings on this matter.

Pentagon officials concede questions about the method are mounting. "It creates from time to time an argument that you've got too much of an inflation index and that you're stashing money," says Col. Joseph Graham, an aide to the Defense Department comptroller.

Asked what the Pentagon does with any funds that stem from excessive inflation projections, he says, "I can't say anything specific." Col. Graham says some of the money "Would be a potential for reprogramming," in which the department moves money from one project to another based on funding needs. The Pentagon didn't provide estimates on how much money may have built up as a result of excessive inflation estimates.

SEPARATE INDEX

In 1982, the Pentagon adopted a separate inflation index for weapons, known as the "major commodity index," after the costs of many weapons systems and defense materials had risen at a significantly faster rate than the general economy during the 1970s. The index is coming under criticism, however, because it reflects many increases in Pentagon payments for major weapons, whether or not those increases are attributable to inflation.

Karl Galbreath, head of the price-measurement branch of the Bureau of Economic Analysis, said that calling the defense inflation guage a commodity index "is probably a misnomer. It should really be called a major weapons appropriations (index)."

The bureau, which manages indexes for all government agencies, has found that the major commodity index has risen much faster than the broader gross national product index. For example, in 1983, the major commodity index rose 8% from the previous year, compared with a rise of 3.8% for the GNP index. For 1984, the major commodity index jumped 7.3%, compared with 3.8% for the GNP index. (GNP measures the total value of the nation's output of goods and services.)

In planning the defense budget, the Office of Management and Budget uses inflation assumptions for defense that are about 30% higher than the assumptions used for the rest of the budget. The higher inflation projections are based largely on the rises in the major commodity index.

[From the Wall Street Journal]

PENTAGON'S INFLATION-ESTIMATE WINDFALL MAY ADD UP TO $50 BILLION, ASPIN SAYS

(By Tim Carrington)

WASHINGTON.— Rep. Les Aspin (D., Wis.) estimates that the Pentagon has reaped a windfall possibly totaling as much as $50 billion as a result of excessive inflation projections built into the defense budget since 1982.

Rep. Aspin, in releasing the latest estimate of this windfall, didn't accuse the Defense Department of wrongdoing. But the lawmaker, who is chairman of the House Armed Services Committee, said weeks of investigation by his staff haven't shed much light on what has become of the money.

The Pentagon has acknowledged it doesn't have any systematic plan for making adjustments when inflation projections turn out to have been too high.

In a letter to Defense Secretary Caspar Weinberger, Rep. Aspin begins, "Dear Cap: I've got a problem." He asks for help in resolving the question, "Where are the funds that comprise the inflation dividend of recent years?" Mr. Aspin says, in a floor speech slated for delivery today, that Congress should devise a system for making year-to-year adjustments in the Pentagon budget when more money than necessary has been appropriated to offset cost increase.

In a statement issued over the weekend in response to Rep. Aspin's statement, Deputy

Defense Secretary William Taft said: "The President's economic policy has reduced inflation more than Congress expected, and the department has managed its programs more effectively than in the past." He said that "behind the innuendo and insinuation in Rep. Aspin's press release lies a record of remarkable administrative achievement."

Mr. Taft said that some of the savings have been returned to the Treasury but he didn't specify how much.

Estimates of the Pentagon's inflation savings remain vague, because there's no system for accounting for funds appropriated to cover inflation. Other studies in the works suggest that the Pentagon has reaped $28 billion since 1982 as a result of its inflation projections. Rep. Aspin couldn't pin down the total, but he said it is at least $18 billion and may be as high as $50 billion.

For the past five years, Congress has concentrated on how much money to give the Defense Department after providing for cost increases resulting from inflation. Currently, many lawmakers agree with Rep. Aspin that the Defense Department has realized a greater expansion than had previously been believed as a result of exaggerated inflation projections.

Moreover, the Senate-approved defense budget, which calls for no increase after inflation adjustment next year, may actually include hundreds of millions of dollars in "real growth" if the inflation projections continue to exceed the actual inflation rate, congressional aides say.

Last week, Secretary Weinberger conceded that high inflation estimates had produced a nest egg of about $4 billion, and he urged Congress to use these funds to maintain weapons programs in the proposed fiscal 1986 budget, which has been slashed since the administration submitted it in January.

However, Mr. Weinberger's move angered many lawmakers who had fought for a budget increase based on the Defense Department's assurances that the administration's budget plan already had been "scrubbed" of any excess funds.

Others contend that the Pentagon has additional pockets of unspent funds it hasn't yet brought to light. A White House official, for example, estimates there is another $4 billion or $5 billion that has accumulated from past budget years.

However, most students of the budget process say the Pentagon's inflation windfall probably has been spent. Rep. Aspin says surplus funds in one program have been switched to other programs that have experienced cash shortfalls. The Pentagon is required to notify Congress when it reprograms funds, but such notices usually don't indicate the sources of the savings.

Rep. Aspin said some of the surplus funds appropriated for inflation have been passed on to military contractors through excessive inflation assumptions built into their weapons contracts. Rep. Aspin calculated that from 1981 until 1984, the average return on sales for the 10 largest publicly traded defense contractors rose to 5.4% from 3.9%. The gain is partly attributable to the inflation windfall, he said.

In at least two instances, however, the Pentagon has asked contractors to return money resulting from excessive inflation allowances. In March, the Air Force asked General Electric Co. to return $168 million and asked the Pratt & Whitney division of United Technologies Corp. to pay back $40 million. Thus far, neither concern has reimbursed the government.

Defense Secretary Caspar Weinberger, discussing the excessive inflation estimates, yesterday on NBC-TV's "Meet the Press," said, "This has happened now for three years. It shouldn't be a surprise; it should be a source of considerable gratification."

[From the Wall Street Journal, Sept. 4, 1985]

POLICY REPORTED TO GIVE SURPLUS TO PENTAGON

(By Tim Carrington)

WASHINGTON.—The General Accounting Office estimates that the Pentagon netted a windfall of $35 billion in fiscal 1982 through 1985 by using excessive inflation projections in budget planning.

The surplus, which is higher than most earlier estimates, occurred because the annual inflation rates were lower than government economists projected in those years. According to a GAO study, the Pentagon redirected most of the funds to weapons programs and personnel pay raise. The study, requested by Chairman Les Aspin (D., Wis.) of the House Armed Services Committee, calls for steps to ensure that the Defense Department doesn't receive excessive funds to cover inflation in the future.

The report, which the GAO is expected to release later this month after the Pentagon has submitted its comments, is likely to rekindle a debate over the defense budgeting process. Congressional staffers say some of the recommendations may lead to proposals to give lawmakers greater control over the Pentagon's inflation-accounting system. Congress is scheduled to take up the military appropriations bill for fiscal 1986, which begins Oct. 1, in the next few weeks.

CENTRAL PREMISE CHALLENGED

The GAO report challenges a central premise underlying the Pentagon's system of budgeting for inflation: that weapons budgets should be based on separate, higher inflation assumptions than those for the rest of the federal budget. Since 1982, the Pentagon has based its requests for funds on the assumption that weapons prices would increase at a rate 30% higher than the inflation rate the government used in calculating the real gross national product, the inflation-adjusted value of the nation's output of goods and services.

However, the GAO analysis concludes that defense procurements "increased at about the same rate as prices of all goods in the U.S. economy."

The GAO specifically disputes the so-called "major commodities index" by which the Defense Department measures cost increases in military procurement. According to the report, this index includes increases that result from cost overruns in weapons programs rather than from inflation. By allowing the Pentagon to attribute such increases to inflation, and thereby to gain higher future budgets, the system "weakens incentives for managers to run their programs efficiently," the report states.

BROADER RATE RECOMMENDED

The GAO recommends that in the future the Defense Department use the broader GNP inflation rate in seeking funds to cover inflation.

The Pentagon's inflation accounting methods became the subject of controversy last spring when Defense Secretary Caspar Weinberger disclosed that it had $4 billion in surplus funds, resulting largely from inflation-related savings. Rep. Aspin and other congressional critics charged that the Pentagon was "squirreling" funds as a cushion against future budget cuts.

Responding to these charges, Secretary Weinberger stated in a letter to Rep. Aspin that "there was no windfall," noting that the department had returned about $7.1 billion to the Treasury and redirected other funds to weapons programs. He also pointed to budgeting procedures used in the 1970s, when Pentagon appropriations didn't keep up with high inflation.

The Defense Department is reviewing the GAO study. In a letter to the agency, the Pentagon stated that, based on a preliminary review, the study "contains technical differences, which may have resulted in inappropriate GAO conclusions." The Pentagon will submit additional information that it said could result in changes before the GAO releases its final report.

Several studies conducted on Defense Department inflation accounting have been complicated by the lack of a system that breaks down the amounts appropriated to accommodate price increases. The GAO report calls for new accounting procedures that would break out such amounts.

[From the New York Times, May 19, 1985]

MILITARY RECEIVED $18 BILLION EXTRA, ASPIN CALCULATES

(By Charles Mohr)

WASHINGTON, May 19.—Because the Reagan Administration overestimated inflation, Congress approriated $18 billion to $50 billion more than needed for Defense Department programs in the last four years, according to Les Aspin, chairman of the House Armed Services Committee.

In a speech prepared for delivery on the House floor Monday and made public today, Mr. Aspin described the funds as an "unplanned" and "secret" dividend for the Pentagon.

The Wisconsin Democrat said he did not suggest any wrongdoing on the part of the Defense Department. In a letter, Mr. Aspin did ask Secretary of Defense Caspar W. Weinberger to cooperate in seeking "a more rational and fair system" to deal with the situation.

TAFT SEES ACHIEVEMENT

William H. Taft IV, the Deputy Secretary of Defense, said in a written statement today that Mr. Aspin was correct in saying that billions of dollars were involved. But if he said the Pentagon had made a "remarkable achievement" in spending less money than expected, which he attributed to better management and to Administration success in controlling inflation.

Mr. Aspin said Congress did not have enough information to calculate precisely the extra money that the Pentagon had received because of faulty inflation predictions. However, he used Pentagon statistics to argue that for the portion of annual military budgets devoted to such items as operations, maintenance and military construction, $18.2 billion had been appropriated to meet inflation levels that did not materialize.

A SUBJECT FOR DEBATE

He took this figure as his minimum estimate. He said inflation had also been overestimated for such functions as buying weapons and paying for fuel and that the total surplus might be $50 billion.

The largely unnoticed inflation cushion will probably be an issue when the full House debates its budget resolution. The House Budget Committee voted last week to hold the military budget for the fiscal year 1986 to the same level as this year, with no

allowance for inflation. Administration officials asserted that this was irresponsible and damaging to national security. The Senate's budget resolution permits military spending to rise by the Administration's estimate of inflation.

Mr. Taft's statement said, "We have already returned to the taxpayer billions of dollars we have not spent."

Mr. Weinberger used somewhat different phrasing in an appearance on the NBC News program "Meet the Press" when asked about the issue of such surplus funds. "We give it back and ask that it be applied to next year," he said.

A staff member from the House Armed Services Committee, who spoke on condition he not be identified, said that, in fact, very little unspent money is returned to the Treasury, but in some cases Congress is made aware of some of the inflation overestimates and is then able to reduce future military appropriations accordingly.

CREDIBILITY IS QUESTIONED

He said this amounted to "only a fraction" of the total money involved. He estimated that the total surplus from lower inflation reported to Congress annually varied from $1 billion to $2 billion, a figure much lower than those put forth by Representative Aspin.

Several members of the Senate Armed Services Committee expressed anger last week when Mr. Weinberger, in an attempt to stave off reductions in or elimination of any major weapon-buying programs, reported that the Pentagon had found $1.7 billion in inflation-caused surpluses in the current fiscal year and $3.5 billion in unspent contingency funds and other categories. The senators, including some backers of high military spending, said Mr. Weinberger had damaged his credibility, if only by the timing of his disclosure.

Representative Aspin suggested that to make inflation predictions more accurate, each appropriation should be calculated on the inflation that occurred in the previous year.

CONSISTENT OVERESTIMATING SEEN

In his speech, Representative Aspin noted that the Pentagon used four different inflation estimates each budget year, including operations, fuel and pay.

For developing and buying weapons and equipment, the Reagan Administration has applied a special inflation prediction which is 30 percent higher than the general prediction used for the rest of the Government. This factor is meant to reflect historically high costs for weapons.

Using Presidential budget statistics, Mr. Aspin said, "The Administration has consistently overestimated inflation by a substantial amount, averaging about 1.7 percentage points a year."

Moreover, he said, some of the increase in weapon costs was a result of inflation but some was from other factors, such as inefficient production rates and design changes that prevented military industry workers from learning how to cheaply build equipment stable in design. If all or almost all of the cost increase since 1982 is unrelated to inflation, Mr. Aspin said, then "we have appropriated an unnecessary $30 billion for major weapons."

Mr. PRYOR. Mr. President, once again I thank the very distinguished Senator from Wisconsin, my good friend, and he has been very patient waiting for me to wind up.

Mr. PROXMIRE. Mr. President, I commend the distinguished Senator from Arkansas on his excellent speech. I am delighted I was here to hear part of it. As always the Senator from Arkansas brings a great deal of good solid common sense as well as wisdom to this subject.

If we are going to be responsible about reducing the deficit we certainly have to make progress in the military area where so much spending and so much discretionary spending is.

THE PENTAGON'S INFLATION WINDFALL

Mr. EAGLETON. Mr. President, today I join with a number of my colleagues to express concern about the billions of dollars poured into the Pentagon's coffers in recent years because of faulty inflation estimates. Our purpose is to make the Congress, the media, and the public better aware of the Defense Department's enormous inflation windfall and to explore alternatives for ridding the budget process of the flaws that allow the windfall to occur.

Most will recall that last spring Defense Secretary Caspar Weinberger suddenly found $4 billion of unspent DOD funds that accrued from overestimates of inflation and from other sources. Secretary Weinberger proudly proclaimed that the funds could be used to meet spending limits without cutting programs. Even by Washington standards, $4 billion is a large sum of money to just find tucked away in a sock drawer. As it turned out, however, the large inflation-related portion of the $4 billion was a small slice of the Pentagon's inflation-baked pie.

The DOD slush fund became a hot topic during the Defense budget debate last May and June and the General Accounting Office [GAO] was called in to determine the size of the inflation-related windfall and to recommend corrective measures.

GAO issued its findings in September and, I suspect, made few friends in the Pentagon when it concluded that, "DOD has budgeted $36.8 billion more for inflation since fiscal year 1982 than was needed to cover inflation," and that, "A special multiplier is used for major weapons that accounts for $9.2 billion of this amount."

Moreover, GAO found that the current fiscal year 1986 budget contains $4.9 billion in inflation overestimates.

The GAO report is truly excellent and I ask that excerpts from it be printed in the RECORD following my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. EAGLETON. At this point it would be helpful to summarize how the Pentagon, in conjunction with the Office of Management and Budget, estimates the amount of money it seeks each year to offset expected inflation increases in its annual budget and how the Congress could have possibly allowed almost $40 billion to slip away under its nose.

Every Government agency uses the administration's inflation forecast to prepare an inflation-adjusted budget request, but the Pentagon has its own unique method of dealing with inflation; it employs four different rates for four distinct segments of its budget.

First, DOD uses a special index that was developed years ago solely for fuel purchases.

Second, an adjustment is made for military pay, ostensibly based on inflation, but more likely reflective of the whims of Congress at the time.

Third, for operations and maintenance, research and development, and other sundry procurement—all told, 40 percent of the Defense budget, an adjustment is made using the projections of inflation generated by the OMB.

Finally, the Pentagon grants special dispensation to its major weapon systems by estimating inflation-related costs in this category at 130 percent of the normal inflation projections.

The $37 billion that the GAO said had been over-appropriated came from the last two adjustments; the miscellaneous procurement adjustment and the multiplier adjustment for the major weapon systems.

Put simply, DOD's enormous windfall resulted from a money pipeline in Washington that flows one way only—from Congress to the Pentagon, and from the inability of economists to accurately predict inflation.

Thus, when the predicted inflation rate is lower than the actual rate of inflation, as was the case in the 1970's, the Pentagon experiences a budgetary shortfall and applies to Congress for supplementary appropriations.

But when inflation predictions are higher than the actual inflation rate, as has been the case in the last few years, the Pentagon harvests a windfall for which there is no reverse supplemental to return surpluses to the Treasury.

GAO identified and analyzed several alternatives to the current system for eliminating or minimizing the carryover of such excess funds. One alternative would set up a revolving fund into which inflation overestimates would be transferred. A second alternative would require the DOD pay for inflation out of program funds and seek supplemental appropriations as reimbursement. A variant of this idea would grant DOD to low inflation adjustment and require DOD to seek a supplemental appropriation for any shortfall. A third alternative would simply improve the present inflation estimating and reporting system.

The GAO report most forcefully recommended elimination of the 130 percent multiplier for DOD's major weapon systems—ships, aircraft, missiles, and tracked vehicles—which has been responsible for the waste of $9.2 billion in the last 3 years and, as it turns out, represents a $3.5 billion kicker to the current fiscal year 1986 budget.

In 1981, David Stockman, then-Director of OMB, succumbed to Pentagon insistence that major weapon programs deserve 30 percent more for inflation than other procurement items. GAO, by contrast, found that there is "little justification for the use of this special multiplier in budgeting for inflation," and that it should be eliminated immediately.

Just as the OMB Director had the power to let this evil genie out of its bottle in 1981, so does the current Director, James Miller, have the authority to stuff it back in. With this in mind I asked Mr. Miller, during his nomination hearing last month, to look in to his predecessor's folly and to see what he could do about eliminating the multiplier.

Although Mr. Miller gave me his verbal assurances during his confirmation hearing that he would do so, I have yet to hear back from Mr. Miller on the issue. I assume that he has taken the matter up with his staff and hope that he will soon conclude, as GAO did, that the use of the multiplier is outrageous and must end. If that is not his conclusion, then Congress will be forced to consider legislative elimination of the multiplier.

Mr. President, during the last month this chamber has heard a cacophony of voices from both parties decrying the Federal budget deficit. We have been struggling to find new and rational methods of reducing the Government's flood of red ink.

The elimination of inflation waste in the Pentagon is one very large step that can and should be taken toward fiscal responsibility. It is amazing that we have allowed the situation to go on as long as it has. It would be irresponsible for us not to take action against it now.

I look forward to working toward a solution to this problem with Senators PRYOR and LEAHY, who have also spoken on this issue today and others in Congress who have expressed concern previously, including Senators HATFIELD and D'AMATO, who requested the GAO report, Congressman LES ASPIN, whose speech last spring brought the subject to our attention, and the members of the military reform caucus.

EXHIBIT I

POTENTIAL FOR EXCESS FUNDS IN DOD

(Comptroller General's report to chairman, Senate Committee on Appropriations, and Senator Alfonse D'Amato)

The defense budget has grown over 100 percent (52 percent in constant dollars) between fiscal years 1980 and 1985. The Senate budget resolution for fiscal year 1986 is the first major reversal to this trend. In effect, it targeted the defense budget at prior year levels with the exception of an amount added on to compensate for estimated inflation.

The Secretary of Defense acted to minimize the effect of the lower target by reapplying funds from fiscal years 1984 and 1985 available from what he said were management improvements, lower inflation, and the latest inflation projections for the fiscal year 1986 budget. His budget offer raised considerable congressional concern about potential excess funds in the Department of Defense (DOD) budget.

Senators Mark O. Hatfield and Alfonse D'Amato asked GAO to review this matter. Congressman Les Aspin later asked GAO for a similar review. This report responds to all three requests.

INDICATIONS OF EXCESS FUNDS

During the 1980's, DOD requested budget authority based on inflated estimates of inflation and has been unable to use appropriated funds at the rates estimated when the funds were requested and appropriated. At the start of fiscal year 1985, DOD had authority to obligate $427.1 billion. Of this amount, $284.7 billion was fiscal year 1985 authority; the balance was prior year authority and reimbursable funds. DOD also had unliquidated obligations of $153.5 billion.

INFLATION

DOD has budgeted $36.8 billion more for inflation since fiscal year 1982 than was needed to cover inflation. A special multiplier is used for major weapons that accounts for $9.2 billion of this amount. GAO was asked to consider alternatives to the current system for dealing with inflation. Three alternatives were considered:

1. Budget for inflation through a revolving fund. GAO believes there are technical, managerial, measurement, and monitoring problems that make this alternative difficult.

2. Do not budget for inflation (fund inflation with savings or a supplemental appropriation). Because defense programs, especially weapon systems acquisition programs, take several years to implement and change frequently during that time, it is difficult to distinguish the effects of inflation from the effects of the program changes. Thus, it would be difficult for DOD and the Congress to determine what the supplemental amounts should be.

3. Improve the present inflation estimating system. Some improvements could be achieved easily, such as eliminating the special multiplier for major weapon systems. Under this alternative, DOD would use the gross national product (GNP) deflator for all nonpay and nonfuel purchases. Then DOD, in consultation with the Office of Management and Budget (OMB), could decide how amounts should be distributed within the DOD budget structure. GAO favors this alternative.

UNOBLIGATED BALANCES

Unobligated balances and lapses from appropriations are likely to be $64.9 billion by the end of fiscal year 1985. This is $13.3 billion more than was estimated in DOD's fiscal year 1986 budget. For the past 4 years, DOD has underestimated the level of unobligated balances (and has also allowed funds to lapse). At the end of fiscal year 1984, the total was $57.9 billion—$14.1 billion more than DOD reported to Congress in its fiscal year 1985 budget documents. GAO found that these underestimates occurred because DOD was unable to achieve planned obligation rates.

REPROGRAMMING ACTIONS

Reprogramming actions in fiscal years 1980–85 totaled about $26 billion. Reprogramming actions have provided DOD with flexibility to reapply funds in excess of program needs.

The DOD procurement accounts sustained the largest and most consistent loss of funds in all fiscal years. Top losses were in the Air Force Aircraft Procurement and Navy Shipbuilding and Conversion accounts. Over the same period, the research, development, test, and evaluation accounts received a steadily increasing amount of funds.

CONCLUSIONS AND RECOMMENDATIONS

Although it has now become apparent that more funds for programs were available in DOD's budget than Congress intended, GAO did not fully assess the total amount of "unneeded funds" or those funds that DOD or the Congress used for other purposes. GAO could not determine the precise amount of excess funds still available in DOD without doing an inordinate amount of work.

Moreover, although DOD has in place an elaborate planning, programming, and budgeting system the accounting system that tracks how funds are actually being used is not directly linked to the budgeting process. Without an integrated budget and accounting system that can routinely produce relevent and vital financial information, GAO could not easily perform an audit of available funds in excess of defense requirements.

GAO continues to believe that DOD needs to improve and integrate its budget and financial management systems. GAO views on such systems are included in previous GAO reports.

In this report, GAO makes recommendations aimed at bringing the funds provided in congressionally approved DOD budgets in line with what is needed to carry out the programs and activities authorized in those budgets.

DOD should make improvements in the existing system used to budget and account for inflation. Therefore, GAO recommends that the Secretary of Defense take the following actions:

Continue to use the GNP deflator as the basic index for DOD inflation budgeting for the portion of the DOD purchases other than pay and fuel.

Eliminate the use of a multiplier in budgeting inflation for the major weapon systems accounts.

Distribute the funds budgeted for inflation among the various DOD appropriations accounts in consultation with OMB. (In effect, this would give DOD flexibility in deciding how to apportion the allowable inflation projections among the nonpay and nonfuel accounts.)

Monitor any annual inflation dividends or shortfalls that occur and report the latest information to the Congress at the critical stages in the budget process (request,

budget resolution, authorization, and appropriations).

AGENCY COMMENTS

Because of the wide range of topics included in this report and the extremely limited period allowed to comment on the draft report, DOD said it would not be able to provide meaningful comments prior to publication of the final report. DOD further said that a detailed response to the final report will be provided as soon as possible after it is received.

INDICATIONS OF EXCESS FUNDS

This appendix discusses our observations concerning inflation, unobligated balances and lapses, and reprogramming actions. It also includes our conclusions and recommendations.

INFLATION

Controversy over budgeting for inflation is not new to the Department of Defense (DOD). The first time that funds were included in the federal budget to offset expected future inflation occurred in the Navy shipbuilding account in the early 1960's. During the 1970's unexpectedly high rates of inflation eroded the purchasing power of defense appropriations and became a major problem in executing defense procurement programs. As a result, some weapon system acquisition programs were eliminated and others were stretched out.

During the 1980's the effect of inflation on defense budgets has been reversed. Budgets were developed using projected rates that overcompensated DOD for inflation. For example, in the preparation of the budget for fiscal year 1983, the projected increase in the Gross National Product (GNP) deflator was originally 6.5 percent. Its actual increase was 4 percent.

In this section, we evaluate DOD's current system to budget for inflation. We consider how the system may result in an inflation dividend—which we define as the appropriation of funds for inflation in defense program costs which exceed the amounts necessary to finance the inflation which actually occurs. We estimate that DOD budgeted $36.8 billion more for inflation since fiscal year 1982 than was needed based on current information.

The dividend consists of $27.6 billion due to overestimates of inflation in fiscal years 1982 through 1985 and $9.2 billion due to the use of a special multiplier for major weapon systems.

OVERESTIMATES OF INFLATION

To calculate the inflation dividend, we first calculated how much of the original levels of defense appropriations approved by the Congress was allocated to fund future inflation. Then we calculated the amount required to fund inflation in those same years using current knowledge about past and future levels of inflation. Both sets of calculations include a 1.3 multiplier for major weapon systems. by computing the difference between these two amounts, we found that DOD's inflation dividend was $27.6 billion for fiscal years 1982 through 1985. Figure 1 shows these results. (See fig. 9, app. VI for additional information.) Because we used the special multiplier for major weapon systems throughout these calculations, these results do not include the additional inflation dividend which accrues from the use of this multiplier. This potential additional dividend is discussed in the next section.

FIGURE 1.—ESTIMATED DIVIDENDS IN THE DEFENSE BUDGET DUE TO INFLATION OVERESTIMATES BY APPROPRIATION TITLE AND FISCAL YEAR

[In billions of dollars]

Appropriation title	Fiscal year—				Total
	1982	1983	1984	1985	
Military personnel	$0.10	$0.22	$0.18	$0.12	$0.62
Operations and maintenance	1.75	2.84	2.65	1.52	8.76
Procurement	3.83	4.92	3.79	2.23	14.77
Research, development, test, and evaluation	0.62	0.87	0.75	0.52	2.76
Military construction	0.26	0.18	0.14	0.10	0.68
Fiscal year total	6.56	9.03	7.51	4.49	27.59

Almost half of the dividend, about 54 percent, has occurred within procurement. The largest dividend occurred in fiscal year 1983. For the current fiscal year, the dividend exceeds $4 billion.[1]

SPECIAL MULTIPLIER FOR MAJOR WEAPON SYSTEMS

In light of high inflation experienced in the 1970's, Deputy Secretary of Defense Frank Carlucci proposed that DOD "budget for inflation" for major weapon systems. In the fall of 1981, OMB granted an exception that permitted DOD to project inflation for major weapon systems at 1.3 times the anticipated increase in the GNP deflator. For example, if the GNP deflator is projected to rise at 10 percent annually, then major weapon systems prices are projected to rise at 13 percent annually. Consequently, since FY 1983, DOD has applied the 1.3 multiplier to nine procurement accounts that pay for new ships,[2] aircraft, missiles, and tracked vehicles.

We found little justification for the use of this special multiplier in budgeting for inflation for major weapons systems. Five observations suggest such a multiplier is unnecessary.

First, using this mulitplier was justified based on the fact that inflation for major weapons systems is much higher than for most other goods in the economy.[3] Since fiscal year 1982, reports prepared by the Bureau of Economic Analysis (BEA) have shown that weapon systems prices increase about twice as fast as prices for other goods. However, measuring the price of weapon systems is considerably more difficult than for most goods in the economy. We believe BEA's reported values of inflation in weapon systems are too high:

BEA measures weapon systems prices at the time they are delivered to DOD. Because weapon systems ae constructed over long periods of time, changes in their prices lag behind changes in prices of most other goods. Therefore, when the general inflation rate falls, inflation appears higher in weapon systems than in other goods in the economy. Conversely, when the general inflation rate rises, this lag (not considering other factors that increase prices) would cause inflation to appear lower for weapon systems than other goods. (See fig. 6 in app. VI.)

In contracts for new weapons systems it is assumed that unit prices will fall as more units are produced. This phenomenon is

[1] Since the administration submitted the fiscal year 1986 budget, changes in projected inflation have reduced the amount of appropriations needed to compensate for future inflation by $219 million. This amount is relatively smaller than in previous fiscal years due to the short time period—January 1985 and April 1985—over which inflation expectations have changed. (See fig. 9 in app. VI.)

[2] Although the Navy uses slightly different procedures to project inflation in its shipbuilding accounts, these procedures are designed to remain consistent with rates established by OSD using the 1.3 multiplier.

[3] The Bureau of Economic Analysis provides price indices for both major weapon systems and all final goods in the economy. The former is a segment of its price index for all defense purchases; the latter is the GNP deflator.

often referred to as the "learning curve" or the "progress curve". BEA records inflation for the new weapons based on this assumed price decline.

However, we have found that new weapon system prices usually increase. Therefore, the base price of the weapons is underestimated and subsequent measurements of inflation are overestimated. (See fig. 7 in app. VI.)

Second, even if BEA could accurately measure inflation for weapon systems, our analysis shows that the use of the 1.3 multiplier does not accurately project this inflation. (See app. VI for a description of our regression analysis supporting this conclusion.)

Third, even if weapon system inflation could be measured precisely and even if the 1.3 multiplier accurately projected this inflation, we determined that the prices of all defense purchases (excluding pay and fuel) rose at about the same rate as the GNP deflator. Thus, if DOD budgets separately for inflation in weapon systems by applying a 1.3 multiplier, then for some defense goods, other than major weapon systems, DOD should apply a multiplier less than 1.0.

Fourth, the 1.3 multiplier, even if valid, could not be used permanently. The 1.3 multiplier causes the defense budget to grow faster than the nondefense budget, assuming no change in real program for either defense or nondefense categories. Over time, this growth would lead to the unlikely result that the entire federal budget would be devoted to defense.

Fifth, we do not believe the 1.3 multiplier, which implicitly links inflation projections to actual weapon system inflation, is an efficient budgeting technique. Over the long run, as discussed above, we believe major weapon system inflation will equal the rate of inflation in the general economy. A budgeting system should provide incentives to program managers to control cost growth. Projecting future weapon system prices on the basis of past weapon system prices can become a "self-fulfilling prophecy." Programs in which costs grew rapidly in the past would receive a dividend for this cost growth. Therefore program managers have no incentive to minimize costs.

If, as we believe, the 1.3 multiplier is not needed to compensate DOD fully for weapon system inflation, then its use in fiscal years 1983 through 1985 has resulted in another inflation dividend. If DOD had budgeted for inflation in major weapon systems at a rate equal to projected changes in the GNP deflator, an additional $9.2 billion would have been saved between fiscal years 1983 and 1985, as shown in figure 2. When combined with the previous estimate of $27.6 billion, DOD received a total inflation dividend of $36.8 billion.

FIGURE 2.—ESTIMATED INFLATION DIVIDENDS IN DOD BUDGETS

[In billions of dollars]

Fiscal year	Due to overestimates of inflation	Due to use of 1.3 multiplier	Total
1982	$6.6	$0.0	$6.6
1983	9.0	3.3	12.3
1984	7.5	2.8	10.3
1985	4.5	3.1	7.6
Total	27.6	9.2	36.8

We believe these inflation dividends may have allowed the Defense Department to achieve higher levels of real growth than originally intended by Congress' budget actions. Between fiscal years 1982 and 1985 Congress approved defense budgets which were intended to result in total real growth of 33.5 percent. However, inflation dividends have increased the potential real growth in defense programs to 40.1 percent.[4]

GNP DEFLATOR

Some critics of DOD's budgeting system have suggested that projections of the Producer Price Index (PPI) should replace projections of the GNP deflator as the basis for budgeting for inflation. Our analysis shows that the prices of defense purchases have risen at about the same rate as the GNP deflator over the period fiscal year 1978 through fiscal year 1984. This analysis also shows that changes in the GNP deflator more accurately predict changes in defense prices than do changes in the PPI. Consequently, we do not believe that the use of the GNP deflator within the DOD budgeting system has of itself resulted in another inflation dividend. (See app. VI.)

AVAILABILITY OF INFLATION DIVIDEND

We do not know how much of the total dividend is still available to the Defense Department. The Secretary of Defense has estimated that Congress reduced the fiscal year 1982 through 1985 Defense budgets by $8.2 billion for repricings and contract savings. In those accounts where appropriations must be obligated within 3 years or less, some of the dividend may have lapsed or remain obligated. (See app. VII for additional details on unobligated balances and lapses.) Part of it may have been reprogramed for use in alternative defense programs (see app. VIII).

GROWTH IN UNOBLIGATED BALANCES AND LAPSED FUNDS

Unobligated balances and lapsed funds (lapses) are a natural part of the full funding concept Congress has supported for weapons procurement and military construction. Because of the large sums involved—$57.9 billion in fiscal year 1984—and the desire to make the best use of available defense dollars, it is important for DOD to accurately estimate its minimum requirements for unobligated balances and lapses. Otherwise, DOD may get more money than is necessary to fulfill the defense program authorized by Congress.

Unobligated funds are budget authority from a number of years not previously obligated to a contract and not reaching the statutory date of expiration (after which money can no longer be obligated). Lapsed funds are budget authority not obligated before the expiration date.[5] Since only a portion of the new budget authority is obligated in any one year, DOD plans for a certain amount of unobligated balances and reports the estimated balances to Congress for both the current budget and budget request. DOD projects unobligated balances by subtracting anticipated obligations from total authority to obligate (referred to in this report as total available authority). DOD does not project lapses in its budget request, although lapses are identified in the current year estimates. In fiscal year 1985 this amount was $74.8 million.

In any given year, DOD's total availability authority includes new budget authority, unobligated balances left over from prior fiscal years, reimbursable funds, and deobligated funds. Consequently, funds carried over from previous years provide a greater sum of available authority than the new budget authority appropriated by Congress. For example, in fiscal year 1984 DOD's total available authority was $385.5 billion; $258.2 billion of this amount was new budget authority. At the start of fiscal year 1985 DOD had total available authority of $427.1 billion and $284.7 billion of this amount was fiscal year 1985 new budget authority; the balance of $142.4 billion was prior year authority and reimbursables.

No precise criteria define what unobligated balances should be, whether they are too large, or if they are growing too fast. However, Congress provides general guidance to DOD, namely that the level of unobligated balances for any single program should be the minimum funds needed to fulfill the outyear contracts for that program. This level is contingent on the projected or estimated cost of the items orginally approved by Congress when the program was first presented for appropriation. It also depends on the number of years that DOD indicated was needed to sign contracts and obligate funds for the approved items. Ideally, the aggregate level of unobligated balances should be the minimum funding (full funding) needed to fulfill the outyear contracts for the sum of the individual programs.

DOD maintains aggregate data on unobligated funds and lapses, but more detailed information on unobligated balances is not readily available. Therefore, we could not determine the appropriate amount of funds required to cover contracts awarded in any year after the budget year.

DOD does not assert that unobligated balances should be at any given level. However, a 1982 Congressional Research Service (CRS) report stated that "According to DOD, a relatively constant percentage reflects the fact that unobligated balances have increased 'essentially in line with programs,' an indication of good management."[6] We found that the proportion of unobligated balances to nonpay TOA has been steadily rising in recent years, from 26.3 percent in 1981, to 31.4 percent in 1984, as shown in figure 1 of appendix VII.

We obtained data from DOD to analyze actual obligation rates and to compare these against DOD projections. The purpose of our analysis was to determine how accurately DOD estimated its unobligated balances and lapses. We found that for the past 4 years DOD has underestimated the level of unobligated balances and has also allowed funds to lapse. At the end of fiscal year 1984, DOD's unobligated balances and lapses totaled $57.9 billion—$14.1 billion more than DOD estimated in the fiscal year 1985 budget. We found that this underestimate occurred because DOD was unable to achieve planned obligation rates.

We analyzed DOD's monthly obligations as a share of total available authority for fiscal year 1979 through fiscal year 1984. To compute historical trends in this analysis, we used the Box Jenkins Time Series Analy-

[4] This estimate takes into account the time lag required to recognize the full amount of the inflation dividend. A dividend received in one fiscal year may therefore serve as a base from which the next fiscal year's appropriations are calculated. In this manner, dividends may compound themselves over time, and the total inflation dividend would be higher than the numbers cited above.

[5] Under certain conditions, lapsed funds can still be obligated for contract claims and cost growth.

[6] "Unobligated and Unexpended Balances in the Department of Defense Budget: Their Size and Growth," August 10, 1982.

sis, or ARIMA procedure, a technique for analyzing random and systematic movements in time series data. (See ARIMA definition in App. VII.) We then reviewed DOD's actual obligations as a share of total available authority during fiscal year 1984, the planned share, and the share that would have been consistent with historical trends. If historical trends continued, our analysis shows that DOD, would have obligated 84.8 percent of total available authority in fiscal year 1984. DOD had planned to obligate 88.6 percent of total available authority during fiscal year 1984. A review of DOD financial summary tables for fiscal year 1986 shows that DOD actually obligated 85 percent of total available authority—only 0.2 percent more than the historical trend but 3.6 percent less than DOD planned to obligate. Thus, while the fiscal year 1984 obligations did not meet DOD projections—resulting in lapses and large increases in unobligated balances—obligations during fiscal year 1984 were consistent with historical trends.

[Figure 3 not reproducible for RECORD.]

The following figure illustrates the recent underestimates of unobligated balances and lapses. The growing gap between the lines illustrates DOD's inability to achieve the increased rate of obligations it projected.

We also analyzed DOD's monthly rates of obligation for the first 8 months of fiscal year 1985. We found that DOD's actual obligations again approximated the historical trends. During that period DOD obligated 56.2 percent of total available authority, which was 0.1 percent higher than the historical trend. We added historical projections of the rates of obligation for June through September 1985 to the actual rates during the first 8 months of fiscal year 1985. On this basis, we found that DOD will probably obligate 84.8 percent of total available authority. DOD had planned to obligate 87.9 percent of total available authority—3.1 percent more than DOD will likely spend if historical trends continue. Again, DOD had planned to obligate faster than the historical trend, when in fact it is obligating at about the same rate as in fiscal year 1984. As a result, if historical trends continue for the remainder of fiscal year 1985, DOD will accrue unobligated balances and lapses of $64.9 billion at the end of the current fiscal year—$13.3 billion more than DOD estimated in the fiscal year 1986 budget.

Prior GAO reports have linked higher than planned unobligated balances to possible excess budget authority. In 1978, GAO analyzed DOD balances of unexpended budget authority and reported that (1) Defense procurement programs had possible excess obligational authority and (2) despite this excess, DOD had not implemented a process for systematic and regular reporting on the availability of excess funds.[7]

DOD's overestimate of obligations is one of many reasons why we continue to believe that current budgeting practices and accounting procedures should be revised. DOD has developed budget-tracking systems for managing individual appropriation account fund levels. However, no system has been developed which integrates program accomplishments with program costs and which insures increased accountability for managing public funds.

Although we identified $13.3 billion more unobligated balances and lapsed funds than DOD had projected, we could not determine whether these funds are needed to fulfill program requirements or if they are in excess of program needs. We believe more study is needed to determine the program accounts and line items that may contain excess funds.

REPROGRAMMING AND TRANSFERS

The Congress has given DOD limited authority to reprogram and transfer[8] appropriated funds—that is, to use money for different purposes that was planned at the time the funds were appropriated. This flexibility in the execution of the budget is available because the Congress recognizes that unforeseen developments may make it necessary to reapply funds through reprogrammings or transfers. The total dollar value of reprogramming actions for fiscal years 1980 through 1985 is about $26.1 billion. For the first 10 months of fiscal year 1985 reprogramming actions total almost $5.2 billion. Although the dollar value of reprogrammings has increased between 1980 and 1985, as a percentage of total obligational authority (TOA) it has remained relatively constant at about 2 percent.

The general guidance provided by Congress for reprogrammings allows the Secretary of Defense to reprogram funds, provided such authority is used ". . . for higher priority items based on unforeseen military requirements than those for which originally appropriated and in no case where the item for which funds are requested have been denied by Congress."[9]

Congress has in the past raised concern over whether reprogramming procedures have provided DOD too much flexibility. A 1955 House Appropriations Committee report stated that ". . . the mere fact that there was a lessened requirement in one category of cost does not imply either the right or the need to correspondingly increase some other category of cost embraced by the appropriation."[10] Moreover, it has been stated that Congress did not intend the use of savings in reprogramming actions "to be treated as a windfall, or as a slush fund to be applied someplace else."[11]

Over the years, Congress has sought to improve control over reprogrammings, resulting in the establishment of a detailed set of procedures and rules which DOD must follow. (Details about reprogramming procedures are provided in fig. 18 of app. VIII.) There is no statutory limit on the amount of money that may be reprogrammed within an appropriation account—provided that amount does not breach the thresholds established for an above-threshold action. The Congress annually sets limits on the total amount of money that may be transferred between appropriation accounts in its annual appropriation act; however, this limit may be increased in the supplemental appropriations act. In fiscal year 1985, the limit was 41.2 billion.

We analyzed reprogramming actions by DOD in fiscal years 1980 through 1985 to determine the following: dollar value and volume of proposed actions, reasons money is needed and became available, changes in reasons over time, net gains and losses in titles, services, and appropriation accounts, and funds available in excess of original requirements.

Our analysis points out recent trends about reprogramming actions in general and also about reprogramming actions for one specific category—those which are "above threshold."

Reprogramming actions fall into three broad categories: above-threshold, below-threshold, and internal reprogrammings. Above-threshold actions may either require congressional notification or prior approval. If an action increases authorized procurement quantities or has been designated as an item of congressional interest, prior approval is required. Prior approval is also required for transferring funds between accounts. Notification to the Congress is required for reprogramming actions which meet or exceed given thresholds (see discussion in fig. 18 app. VIII). Below-threshold actions are those that fall below the above designated limits and do not require notification to the Congress, except when follow-on costs exceed thresholds. Internal reprogrammings include those actions that reclassify or realign funds but are not subject to threshold limitations.

We found that from fiscal year 1980 to fiscal year 1985, the dollar value of above-threshold actions was about $10.2 billion, or 39 percent of the total. Below-threshold actions were slightly less at $9.4 billion, but accounted for a much greater number of total actions (92 percent). About $6.5 billion was internally reprogrammed.

Most of our analysis was dedicated to above-threshold actions, because information on these actions was most readily available and documented.

Our analysis demonstrates the following:

In recent years less money was reprogrammed to solve program problems and more money was reprogrammed to fund unplanned requirements or other items, primarily classified programs. (See figs. 14 and 15 in app. VIII.)

Also, in recent years there was a sharp increase in the supply of reprogramming funds made available from what DOD identified as cost savings (i.e., contract savings, overestimated funding requirements, or resulting from management initiatives). (See figs. 12 and 13 in app. VIII.)

Reprogrammed funds that DOD identified as not needing reinstatement increased from about $602 million in fiscal year 1980 to nearly $1.9 billion in fiscal year 1985. Eighty-four percent of the funds reprogrammed above threshold in fiscal year 1985 were in excess of original requirements. (See figs. 16 and 17 in app. VIII.)

[Figure 4 not reproducible for RECORD.]

As shown in the following figure, the DOD procurement accounts sustained the largest and most consistent loss of funds in all fiscal years. Top losses were in Aircraft Procurement, Air Force, and Shipbuilding and Conversion, Navy. Over the same period, research, development, test, and evaluation (RDTE) accounts received a steadily increasing amount of funds. In fiscal year 1983 Congress directed DOD to absorb part of the pay raise rather than provide supplemental appropriations. Army gave up the largest share of funds while the defense agencies (e.g., the Defense Nuclear Agency, National Security Agency, Defense Contract Audit Agency, Defense Logistics Agency, and others) gained funds during this period. (See figs. 6 through 11 in app. VIII.)

[7] Analysis of Department of Defense Unobligated Budget Authority (PAD 78-34, Jan. 13, 1978; p. i and ii)

[8] Although the terms transfer and reprogramming are often used interchangeably, there is a fundamental distinction. Transfers are movements of funds between appropriations accounts while reprogrammings are movements of funds within accounts.

[9] Public Law 98-473, section 8025.

[10] H.R. 493, 84th Congress, 1955, p. 8.

[11] Louis Fisher, Presidential Spending Power, Princeton Paperbooks (Princeton) 1972, p. 82.

As a result of our anlaysis we concluded that as a percentage of TOA reprogramming actions have remained relatively constant. However, data analyzed from DOD reprogramming forms indicated that about $1.9 billion recently made available for above-threshold reprogramming was in excess of the purposes originally justified. These funds, for the most part, have become available because of contract savings or overestimates of funds required to support program purposes.

ALTERNATIVES

We were asked to consider alternatives to the current system of reporting and compensating for inflation and to make recommendations. In analyzing possible recommendations we looked at three alternatives and explored their advantages and disadvantages.

ALTERNATIVE 1: BUDGET FOR INFLATION THROUGH A REVOLVING FUND

This alternative would change the current system so that savings from overestimates of inflation would be transferred into a resolving fund. In the reverse, funds needed due to underestimates of inflation would be drawn from the revolving fund. There could be instances where funds would be insufficient, requiring additional funds. In those cases, it would be difficult for DOD and the Congress to determine what the supplemental amounts should be. In theory, in this system DOD would neither benefit nor be hurt by misestimations of inflation. However, there are technical, managerial, measurement, and monitoring problems that make this alternative difficult.

ALTERNATIVE 2: DO NOT BUDGET FOR INFLATION (FUND INFLATION WITH SAVINGS OR A SUPPLEMENTAL APPROPRIATION)

This alternative would require that DOD pay for inflation out of program funds. When these funds are not adequate, DOD could request additional funds form the Congress. If these funds were not appropriated, it could lead to a reduction in the real level of the program. Another problem is that it often takes several years to implement defense programs and the programs change during implementation. Even after the fact, it is difficult to distinguish the effects of inflation from the effects of the program changes. These distinctions are even more difficult to make during implementation, when the situation is further complicated by adjustments in the program schedule. Thus it would be difficult for DOD and the Congress to determine what the supplemental amounts should be.

If budgeting for inflation causes prices to rise, then it would be better not to provide funds for estimated inflation. However, in the late 1960's and early 1970's, budgeting for inflation was not the cause of inflation. Rather, inflation prompted agencies to seek permission to add amounts that would compensate for losses in purchasing power they were experiencing because of high inflation. So long as inflation remains low this would be a viable alternative. If inflation were to rise, it would be harder to manage.

ALTERNATIVE 3: IMPROVE THE PRESENT INFLATION ESTIMATING SYSTEM

Some improvements in the inflation estimating and reporting system could be achieved easily, such as eliminating the 1.3 multiplier for major weapon systems. DOD should use the GNP deflator for all nonpay, nonfuel purchases. Then DOD, in consultation with OMB, should decide how amounts should be distributed within the DOD budget structure.

CONCLUSIONS AND RECOMMENDATIONS

Although it has now become, apparent that more funds for programs were available in DOD's budget than Congress intended, we did not fully assess the total amount of "unneeded funds" or those funds that DOD or the Congress used for other purposes.

Although DOD has in place an elaborate planning, programming, and budgeting system the accounting system that tracks how funds are actually being used is not directly linked to the budgeting process. Without an integrated budget and accounting system that can routinely produce relevant and vital financial information, we could not easily perform an audit of available funds in excess of defense requirements.

We are making recommendations aimed at bringing the funds provided in congressionally approved DOD budgets in line with what is needed to carry out the programs and activities authorized in those budgets.

DOD should make improvements in the existing system used to budget and account for inflation. Therefore, we recommend that the Secretary of Defense take the following actions:

Continue to use the GNP deflator as the basic index for DOD inflation budgeting for DOD purchases other than pay and fuel.

Eliminate the use of a multiplier in budgeting inflation for the major weapon systems accounts.

Distribute the funds budgeted for inflation among the various DOD appropriations accounts in consultation with OMB. (In effect, this would give DOD flexibility in deciding how to apportion the allowable inflation projections among the nonpay and nonfuel accounts.)

Monitor any annual inflation dividends or shortfalls that occur and report the latest infomation to the Congress at the critical stages in the budget process (request, budget resolution, authorization, and appropriations).

We continue to believe that DOD needs to improve and integrate its budget and financial management systems. Our views, on such systems are included in previous GAO reports (GAO/AFMD-85-35 and GAO/AFMD-85-35A, February 1985.)

ESTIMATION OF THE SIZE OF THE INFLATION DIVIDEND OBJECTIVES, SCOPE, AND METHODOLOGY

In our analysis of inflation dividends in the Defense budget, we examined two basic issues. First, we assessed the accuracy of the factors used in the current system of budgeting for inflation. Second, we estimated the magnitude of increased defense budget authority which has resulted recently from using projections which overestimated future inflation levels.

We concentrated our analysis of factors on those used for weapon systems purchases and for the purchases of all non-personnel, nonfuel, and nonweapon system goods. These two types of purchases account for approximately 66 percent of the total defense budget. We analyzed the way Bureau of Economic Analysis (BEA) constructs estimates of price changes in all defense goods and more specifically in weapons systems. We discussed our analysis with officials of both the BEA and DOD.

We compared all available historical data on price changes in defense goods, compiled by BEA for fiscal years 1978 through 1984, with price changes in other major economic price indices. We identified alternative procedures for projecting changes in defense prices and analyzed whether these procedures would have produced better estimates of actual defense prices changes over the same period.

In the case of nonpay, nonfuel, and nonweapon systems purchases, DOD currently projects these prices to change at the same rate as the projections of the GNP deflator issued by the Office of Management and Budget (OMB) as part of their guidance in budget preparation. As an alte.native, we analyzed projections based upon changes in the industrial component of the Producer Price Index (PPI). We chose the PPI-industrial index because it is often cited by defense authorities as covering a range of goods similar to those purchased by DOD. Also, the data are available which measure price changes on a fiscal year basis.

We also analyzed the use of a 1.3 multiplier in constructing estimates of future inflation rates in weapon systems' prices. As alternative to the use of the 1.3 multiplier, we identified the use of a 1.0 multiplier, i.e., the budgeting for weapon systems inflation in the same manner as nonpay, nonfuel, and nonweapon systems purchases. We analyzed the ability of each multiplier to predict accurately the changes in weapon system prices over the period fiscal year 1978 through fiscal year 1984.

In assessing the overestimates of future inflation on defense budget authority, we constructed a data base from defense publications (annual editions of *National Defense Budget Estimates* volume published by the Office of the Assistant Secretary of Defense, Comptroller) and unpublished data furnished by defense officials. Information in this data base matched that available to officials at the time the original budget was approved. This data base also contained the best information currently available. This data base included Total Obligational Authority (TOA) by appropriation account and the type of item being purchased. It also contained inflation projections for each type of item being purchased and spendout rates which projected when outlays would occur (by year) in each appropriation account.

For the analysis, we estimated—for each category of purchases—the amount of money needed to pay for the inflation anticipated at the time the budget was approved. We also estimated the amounts of money which would have been needed for inflation if we had known during these budget preparations what we know now. The difference between the original high estimate and the current lower estimate of inflation funding was defined as the inflation dividend received by DOD.

For fiscal years 1982 through 1985, our estimates for the inflation dividend are slightly lower than the actual dividend. The TOA levels used in these calculations are the TOA levels actually appropriated. Because recent TOA levels are lower than the originally approved amounts, the current TOA levels used in our calculations are lower than those originally approved by Congress. Therefore, the inflation dividend estimated within each appropriation is also lower than the one which existed at the time of original budget approval.

We also performed inflation dividend calculations for the fiscal year 1986 budget. In these calculations we used the TOA levels specified in the administration's budget submissions, not actually approved levels of TOA. Because the changes in inflation expectations that have occurred since fiscal year 1986 submission are small, the estimat-

ed inflation dividend in the fiscal year 1986 budget is also small.

Our initial set of calculations was compared to a similar set of calculations prepared by DOD officials in support of the $4 billion savings offer made by Secretary Weinberger. The discrepancies identified in this comparison were discussed informally with defense officials and the appropriate corrections made in the GAO estimation procedures.

Officials of the BEA also reviewed and provided informal comments to our draft report. To the extent possible, their comments have been incorporated in this report.

Details of GAO analysis of DOD inflation budgeting follow:

FIG. 1.—DESCRIPTION OF CATEGORIES USED BY DOD TO BUDGET FOR INFLATION

Description	Pay	Fuel
Appropriations titles in which the category appears.	Military personnel, O&M.	O&M, RDT&E.
Spendout period	1 yr	1 yr.
Percent of total budget	32 percent	2 percent.
Deflator used for projection	OMB projections of Government salary increases.	Special projections of fuel prices.

Description	Major weapon systems	All other purchases
Appropriations titles in which the category appears.	Procurement	All.
Spendout period	Up to 7 yr	Up to 5 yr.
Percent of total budget	26 percent	40 percent.
Deflator used for projection	1.3 times projections of GNP.	Projections of GNP deflator.
Alternatives analyzed by GAO	1 times projections of GNP deflator.	Projection of Producer Price Index.
	1 times projections of PPI.	Do.

In constructing estimates of funds needed to offset inflation in future defense expenditures, DOD divides its expenditures into four separate categories of goods: pay, fuel, major weapon systems, and all other purchases. In each category, price increases are predicted using a different index. For pay, increases are projected to equal the increases in civilian and military pay proposed in the President's budget submission. For fuel prices, a special projection of fuel prices is used. Virtually all pay and fuel purchases occur within the year of the budget. Consequently, inflation projections in succeeding fiscal years do not matter much for pay and fuel.

In the major weapons systems and all-other-purchases categories, projections of future inflation rates are required for a number of fiscal years. As an example, outlays for the purchase of a ship can occur for many years after the funds are originally authorized. For both of these categories, projected inflation is based upon projected GNP deflator rates approved by the Office of Management and Budget. For the all-other-purchases category, prices are assumed to increase at the same rate as the projected change in the GNP deflator. For the major weapon system category, prices are assumed to increase at a rate equal to 1.3 times the projected change in the GNP deflator.

FIG. 2.—MAJOR ECONOMIC PRICE INDICES USED IN THE GAO ANALYSIS

Index	Constructed by	Available since	Coverage
GNP deflator	BEA	1929	All final goods and services sold in the United States.
Producer Price Index—Industrials.	BLS	1890	Goods produced for sale in U.S. primary markets.
DOD purchases deflator	BEA	1972	All nonpay, nonfuel purchases of the Defense Department.
All-other-purchases deflator.	BEA	1972	All nonpay, nonfuel, and nonmajor weapon system purchases of the Defense Department.
Major commodities deflator.	BEA	1978	All major weapon system purchases of the Defense Department.

To analyze the way DOD budgets for inflation, we gathered data on five major price indices: (1) the GNP deflator, (2) the industrial component of the PPI, (3) the DOD purchases deflator, (4) the all-other-purchases deflator, and (5) the major commodity deflator (MCD). The industrial component of the PPI was chosen because data for this index are available on a fiscal year basis comparable to the other indices. The DOD purchases deflator includes prices of goods in the major weapon systems category, but excludes the pay and fuel categories of purchases. The all-other-purchases deflator excludes major weapon systems, pay, and fuel purchases. The major commodity deflator includes only the purchases of major weapon systems.

The PPI is constructed by the Bureau of Labor Statistics. All other indices are constructed by the Department of Commerce BEA. The time period covered by our data base is fiscal year 1978 to fiscal year 1984. Fiscal year 1978 is the first year for which the BEA publishes data on price changes for major weapon systems. Fiscal year 1984 is the most recent year for which defense price data are available.

[Figure 3 not reproducible for RECORD.]

Figure 3 shows rates of price increases since fiscal year 1978 as measured by four of these indices. (Increases in the DOD purchases deflator are not shown.) The decrease in inflation during the 1980's is clearly displayed in each index. The rate of increase in the PPI has declined more rapidly than the other three indices. Also, price increases in the major commodity deflator have been much larger than measured by the other indices over the past 3 years.

FIG. 4.—ANALYSIS OF THE HISTORICAL RELATIONSHIP BETWEEN PRICES OF ALL OTHER DEFENSE PURCHASES AND PRICES FOR THE REST OF THE U.S. ECONOMY: FISCAL YEAR 1978–84

Statistics	Changes in GNP deflator	Changes in PPI-industrial
Constant	−0.525	4.038
t statistic	−.643	5.295
Slope coefficient	1.139	.447
t statistic	10.307	5.514
R^2	.955	.859
Durbin Watson statistic	3.022	1.688

Figure 4 analyzes the relationships between the prices in the all-other defense purchases category and prices in the rest of the U.S. economy. Prices in the rest of the U.S. economy are measured by the GNP deflator and the PPI-industrial. The regression of changes in prices of all other defense purchases on changes in the GNP deflator performed well. The relationship is significant at the 1-percent confidence level. The estimated slope coefficient is not statistically different from unity. This suggests changes in the GNP deflator are almost identical to changes in the defense purchases deflator. (The best test for such a relationship is an F test on both the slope and constant coefficients. The F test does not reject the null hypothesis at the 5-percent level of confidence. Also the value of the slope coefficient is not appreciably affected by applying a correction for first order serial correlation.) The regression of changes in the all-other defense purchases deflator on changes in the PPI-industrial index does not perform as well. Although the slope coefficient is statistically significant, its R^2 level is lower than that of the first regression, and its slope coefficient is statistically distinct from unity.

FIG. 5.—ANALYSIS OF THE HISTORICAL RELATIONSHIP BETWEEN MAJOR WEAPON SYSTEMS AND PRICES FOR THE REST OF THE U.S. ECONOMY: FISCAL YEAR 1978–84

Statistics	Changes in GNP deflator	Changes in PPI-industrial
Constant	5.880	8.779
t statistic	1.874	4.799
Slope coefficient	.579	.153
t statistic	1.362	.783
R^2	.271	.109
Durbin Watson statistic	1.362	1.256

We used the same data base to analyze the relationship between prices of major weapon systems and the prices in the rest of the U.S. economy. Figure 5 shows the results of the regression of changes in the major commodities deflator (MCD) on changes in the GNP deflator and the regression of changes in the MCD on the changes in PPI-industrials. Neither regression performs well. Neither slope coefficient is statistically different from zero—indicating data do not reject a hypothesis that no relationship at all exists between these indices. Also R^2 coefficients are relatively low. These results suggest that a simple mathematical formulation such as "(percent change in MCD)=1.3 X (percent change in GNP deflator)" does not accurately predict changes in future major weapon systems prices.

[Figures 6 and 7 not reproducible for RECORD.]

The inability of these regressions to explain fluctuations in major weapon systems prices may be linked to problems in measuring such prices. Figures 6 and 7 illustrate two problems which complicate the measurement of weapon system prices. First, as shown in Figure 6, weapon systems prices are measured by the BEA based on the prices of weapon systems when they are actually delivered to DOD. Although prices are measured for the GNP deflator on the same delivery basis, weapon systems take much longer to build (on average) than do commodities in either the entire economy of the industrial sector specifically. Thus, recording changes in weapon systems prices may lag considerably behind recording price changes for other goods. In our own analysis, we found that current weapon systems price changes were more highly correlated with past changes in the GNP deflator (r=.90) than with current changes in the GNP deflator (r=.52). When inflation falls,

this causes weapon system price increases to appear higher than other prices.

Second, measurement of weapon systems price changes depends heavily on index adjustments made when new weapon systems replace old outdated systems. Realizing that prices reported for initial versions of weapon systems are not representative of prices when production is fully underway, BEA analysts replace initial prices with base prices established in the contract documentation for the 100th unit produced. However, the contract documentation establishes those prices on the basis of price decreases assumed from efficiencies to be gained through "learning" or the "progress" curve. Our prior research (see GAO report, *Underestimation of Funding Requirements in Five Year Procurement Plans,* NSIAD-84-88) shows price decreases due to learning curves seldom occur in military weapon systems. The use of learning curves in predicting the base prices of a new weapon system therefore understates its actual price. Because a new weapon system's base price is the floor from which all future inflation is measured, initial underpricing results in an overestimate of later inflation in the weapon system's price. (In our informal discussions with BEA on this point, they maintained that deviations from the learning curve price are based upon escalation agreements which are tied to measured indices of inflation, such as wage increases or changes in the PPI. Therefore, they maintained their measurements of weapon system inflation are not biased upward.)

FIG. 8.—ANALYSIS OF THE HISTORICAL RELATIONSHIPS BETWEEN THE PRICES OF DEFENSE PURCHASES (NONPAY AND NONFUEL) AND PRICES IN THE REST OF THE U.S. ECONOMY: FISCAL YEAR 1978–84

Statistics	Changes in GNP deflator	Changes in PPI-industrial
Constant	2.043	5.733
t statistic	1.128	4.891
Slope coefficient	.885	.329
t statistic	3.608	2.640
R^2	.722	.582
Durbin Watson statistic	2.067	1.261

Neither the GNP nor the PPI-industrial index seems to provide good projections of major weapon systems prices over the period fiscal year 1978 through fiscal year 1984. We analyzed how well each index predicted the combined price of both weapon systems and all other defense purchases as reported by the DOD purchases deflator. This analysis showed that the prices of DOD purchases—including all other purchases and major weapon systems purchases but excluding pay and fuel—increased at about the same rate as prices of all goods in the U.S. economy. This conclusion is not inconsistent with major weapon systems' prices increasing more rapidly than other prices on a temporary basis. However, if true, there must be some defense goods for which the prices are increasing slower than most other goods. If special inflation multipliers are used for goods where the prices are increasing relatively rapidly, then DOD budget authority is increased. Conversely, if special multipliers are used for those defense goods with relatively slow price growth, DOD budget authority is decreased from what it would be if projections of the GNP deflator had been used. Selection of only those goods with relatively high price growth for special budgeting treatment artificially increases the amount of resources devoted to defense programs.

FIG. 9.—ESTIMATED DIVIDENDS IN THE DEFENSE BUDGET DUE TO INFLATION OVERESTIMATES BY APPROPRIATIONS TITLE AND FISCAL YEAR

[In billions of dollars]

Appropriation title	Fiscal year—					Total by title
	1982	1983	1984	1985	1986	
Military personnel	0.10	0.22	0.18	0.12	0.01	0.63
Operations and maintenance	1.75	2.84	2.65	1.52	.05	8.81
Procurement	3.83	4.92	3.79	2.23	.12	14.89
Research, development test, and evaluation	.62	.87	.75	.52	.04	2.80
Military construction	.26	.18	.14	.10	.01	.69
Fiscal year total	6.56	9.03	7.51	4.49	.23	27.82

We defined the inflation dividend accruing due to inflation overestimates as the difference between the amount calculated as needed to cover projected future price increases when the budget was initially appropriated, and the amount which would have been set aside if budget decisionmakers had known then what they know now. Figure 9 shows our estimates—based on DOD data—of the size of the inflation dividend in each major appropriations title of the defense budget. These estimates do not include any dividend accruing due to use of a 1.3 multiplier for major weapon systems. Inflation savings in the category of pay for military and civilian personnel, which are generally funded through supplemental appropriations, are not included. These estimates are somewhat lower than actually received by DOD because the TOA levels we used are the ones currently in effect, not those initially appropriated, which were slightly higher.

The largest inflation dividend occurred in the procurement appropriations title in fiscal year 1983. Using the inflation rates as projected in January 1982, $19.6 billion was budgeted for future price growth. However, $14.7 billion would have been necessary if actual inflation rates for fiscal years 1982 through 1984 and currently available projections for fiscal years 1985 through 1987 had been used when estimating inflation for the fiscal year 1983 procurement programs. The inflation dividend (the difference between $19.6 billion and $14.7 billion) is $4.9 billion. Similarly, large inflation dividends have occurred in fiscal year 1982 ($3.8 billion), 1984 ($3.8 billion), and 1985 ($2.2 billion). The inflation dividend for fiscal year 1986 is relatively small because inflation projections have decreased only slightly so far in 1985.

In the military personnel appropriations title, the largest annual dividend is $220 million in fiscal year 1983. Two factors contribute to keeping the dividend for this area relatively small. First, these estimates do not include military pay. Only a small proportion of all military personnel funds cover nonpay expenses. Nonpay expenditures in the military personnel appropriations title cover such items as the transportation of the household goods of military members who are reassigned and the purchase of food for mess halls. Second, funds in the military personnel title which do pay for non-wage goods tend to be spent very quickly—virtually all within the fiscal year they are appropriated. Thus, changes in inflation rates have little chance to change very much or accumulate over time.

In the operations and maintenance title, the inflation dividend is $2.8 billion for fiscal year 1983. This dividend does not include any changes in projected wages of civilian employees. (Civilian pay is funded under the operations and maintenance title in the defense budget.) The dividend comes from savings in fuel prices and all other operations and maintenance purchases. Fuel savings were particularly high in fiscal years 1983 and 1984 when DOD forecast fuel price increases of 2 and 5 percent, respectively. Instead there were price declines of 10 and 9 percent. Savings are relatively small in fiscal year 1986 because inflation projections for nonfuel purchases changed only slightly from January 1985 to April 1985 (the latest revision available in the budgetary cycle) and because there has been no revision in projected fuel prices.

In the research, development, test, and evaluation (RDT&E) appropriations title, funds purchase both fuel—subject to special fuel deflator projections—and research and development services—subject to the regular GNP deflator projections. Unlike operations and maintenance and like the procurement title, RDT&E programs do not have to be obligated in the fiscal year of the original appropriation. Therefore, spendout rates in this title cover the original fiscal year of the appropriation and three additional fiscal years. The largest inflation dividend occurred in fiscal year 1983 when it was $870 million.

Funds for military construction do not have to be obligated within the year of the original appropriations, and spendout rates are projected for 4 years after the fiscal year of the original appropriations. Even though inflation planning is an important part of the military construction appropriations, total appropriations are relatively small and therefore the inflation dividend is also relatively small. The highest inflation dividend, $260 million, occurs in fiscal year 1982.

We estimate that the inflation dividend due to overestimates in all appropriations titles for fiscal year 1982 and fiscal year 1985 has been $27.8 billion. Over half of the dividend, about 54 percent, has occurred within procurement appropriations. The largest dividend occurred in fiscal year 1983. The current fiscal year's dividend is estimated to exceed $4 billion. The dividend for fiscal year 1986 is quite small because it represents changes in inflation expectations which occurred over an extremely short period—January 1985 to April 1985.

As you can see in the next figure, the procurement appropriations title is the largest source of inflation savings. It is a relatively large account, $107 billion in fiscal year 1986, and its programs take the longest of any in the defense budget to complete—incurring substantial inflation price increases over the life of its programs. Figure 10 separates the inflation dividend between that accruing to major weapon systems (the largest portion of Defense procurement spending) and nonmajor systems. Not shown in this figure are dividends resulting from the use of an added 30 percent in estimating inflation for major weapon systems.

[Figure 10 not reproducible for RECORD.]

FIG. 11.—ESTIMATED INFLATION DIVIDENDS IN DOD BUDGETS

[In billions of dollars]

	Due to overestimates of inflation	Due to use of 1.3 multiplier	Total
Fiscal year:			
1982	6.6	0	6.6
1983	9.0	3.3	12.3
1984	7.5	2.8	10.3
1985	4.5	3.1	7.6
Total	27.6	9.2	36.8

If, as we believe, the use of a 1.3 multiplier is not needed to compensate DOD fully for weapon systems inflation, its use over the period fiscal year 1983 through fiscal year 1985 is itself an inflation dividend. If prior fiscal year appropriations were adjusted on the assumption that major weapon systems inflation was budgeted at a rate equal to projected changes in the GNP deflator, and additional $9.2 billion would have been saved. As shown in figure 11, when combined with the previous estimate of $27.6 billion, the result is a total inflation dividend of $36.8 billion.

The implications of these results for fiscal year 1986 budget decisions must be interpreted with some caution. First, some of these funds have already been cut from DOD budgets by congressional action. DOD estimates that $8.2 billion of this dividend has been cut by Congress as a result of budget repricings (such as was performed in this analysis) or realized contract savings. Second, many of these funds are no longer available to DOD for use on current defense programs and thus are not substitutable for fiscal year 1986 appropriations. This is true of all inflation dividends in the military personnel and operations and maintenance appropriations titles for all years except fiscal year 1986. Also, because in the other appropriations titles most appropriations must be obligated within 3 years, inflation dividends for fiscal years 1982 and 1983 are no longer available for use by DOD. Thus, much of the inflation dividend has either been spent on additional defense programs, been reprogrammed (see appendix VIII), or has lapsed (see appendix VII).

Although seemingly quite large, our estimate of the defense inflation dividend is quite similar to both that of DOD and that of the Military Reform Caucus. Figure 12 displays these comparisions. In his estimate of an inflation dividend of $61.7 billion, Secretary Weinberger includes reductions which occurred prior to congressional appropriations and during budget reviews internal to the administration. If this amount ($33.3 billion) is subtracted from his estimate, the remainder ($28.4 billion) compares to, and in fact is even larger than, our estimate.

The Military Reform Caucus uses a very different method of calculation to estimate an inflation dividend of between $42 billion and $54 billion. The range of estimates results from their suggestion of two possible alternative indices for budgeting for inflation in defense purchases—the PPI for manufacturing and the PPI for durable manufacturing. Two factors differentiate the Military Reform Caucus estimate from our estimate. The Military Reform Caucus estimate includes a compounding effect of inflation dividends; the GAO estimate does not. Our estimate includes inflation savings in fuel purchases; the Military Reform Caucus estimate does not. When both estimates are reduced to a common base, our estimate compares to the Military Reform Caucus estimates.

FIG. 12.—COMPARISON OF GAO ESTIMATE WITH ALTERNATIVE ESTIMATES OF DEFENSE INFLATION DIVIDEND

Item	DOD	Military reform caucus
Source	OASD (Comptroller)	Military reform caucus.
Expenditure base	All nonpay purchases	All nonpay and nonfuel purchases.
Time period	Fiscal year 1982–85	Fiscal year 1982–85
Alternative estimate	$28.4 billion [1]	$19.7 to $24.1 billion.
GAO estimate	$27.6	$22.8 [2]

[1] DOD identified $61.7 billion in total savings, but $33.3 billion occurred prior to congressional appropriations.
[2] GAO estimated dividend due to lower fuel prices as $4.8 billion.

Because a substantial fraction of the inflation dividend estimated by the Military Reform Caucus stemmed from its assumption that prior year dividends compounded, we analyzed whether such an assumption is reasonable (see figure 13). The Military Reform Caucus argues, that once a dividend accrues to DOD in one year, this dividend, unless cut from the budget by Congress, becomes a base from which later defense budgets are set. Basic to this argument is an assumption that decisions on annual defense budgets are made incrementally—Congress first accepting inflation adjustments in the prior year budget, then deliberating over real increases for new defense appropriations.

FIG. 13.—THE IMPACT OF THE INFLATION DIVIDEND ON REAL GROWTH IN THE DEFENSE BUDGET

Item	Fiscal year—			
	1982	1983	1984	1985
TOA levels (billions):				
Original appropriation	$214.2	$240.5	$259.1	$285.3
Current appropriation	210.4	238.7	258.2	285.3
Originally intended real growth (percent):				
Fiscal year inflator	8.9	6.3	3.7	4.5
Real growth	12.2	7.5	4.7	5.7
Cumulated real growth	12.2	20.6	26.3	33.5
Actual real growth (percent): [1]				
Fiscal year inflator	6.8	4.1	3.3	4.1
Real growth	14.4	9.8	5.1	7.0
Cumulated real growth	14.4	25.6	32.0	40.1

[1] Based on current projections of inflation as of April 1985.

While we accept the principle of compounding as advanced by the Military Reform Caucus, we question the estimates of the Military Reform Caucus as to its size. The Military Reform Caucus assumes that the entire inflation dividend from one fiscal year compounds in the next fiscal year. This is not the case. In fact, DOD uses only a portion of any inflation dividend when adjusting a prior year defense budget for inflation changes. In brief, these two concepts differ because the full inflation dividend accrues to a particular fiscal year's appropriations over a 5-year period. The inflation adjustment used in calculating real growth in a defense budget covers only a single year of this 5-year period.

Figure 13 presents our own estimation of the compounding effect of overestimates of future inflation. In order to focus attention on the issue of decisions about real growth in the defense budget, this figure presents results in terms of cumulated real growth since fiscal year 1981, not dollar amounts. The first two rows of Figure 13 show the originally appropriated levels of TOA in the defense budget and currently approved TOA levels. The next three rows show the originally projected fiscal year inflator estimate used in determining that fiscal year's "zero real growth" base for budget deliberations, the approved real growth in that year and the cumulated real growth using fiscal year 1981 as a base. Using the adjusted base for zero growth in each fiscal year, approved levels of real growth can be calculated.

Following is an example of how these figures would be used. The TOA level for FY 1981 was $175.3 billion. Originally, it was estimated a constant level of defense program for fiscal year 1982 would require $190.9 billion, equal to $175.3 billion times one plus the adjustment factor of 8.9 percent. The realized real growth for fiscal year 1982 is 12.2 percent, the difference between the adjusted fiscal year 1982 base of $190.9 billion and the approved TOA of $214.2 billion.

In performing these calculations, we assumed that all cuts in a fiscal year's TOA levels occurred before deliberations for the succeeding fiscal year's budget and that all such cuts stemmed purely from congressional desire to adjust for previous inflation dividends. Thus, the approved level of real growth for a fiscal year depends on the original TOA level of that fiscal year and the currently approved TOA level of the previous fiscal year.

Because incorrect fiscal year inflators were used for fiscal years 1982 through 1985, DOD realized significantly higher levels of real growth than Congress originally intended in its budget decisions. These higher levels of real growth are shown in the last three rows of figure 13. When cumulated, Congress' original intentions over the period would have permitted a real growth of 33.5 percent of fiscal year 1981 defense program levels. Due to overestimates of inflation, DOD may have realized a real growth of as much as 40.1 percent over this same period.

EFFORTS TO REFORM DEFENSE PROCUREMENT

Mr. LEAHY. Mr. President, I would like to congratulate my colleagues for their leadership in improving the efficiency of defense spending. Senator PRYOR and those joining him recognize that America's best defense is a strong military and a prosperous economy.

As a nation, we cannot afford to allow our defense to lag behind that of our adversaries. Nor can we afford to jeopardize the second component of our best defense—our economy—by wasteful spending on the military.

As our debt approaches $2 trillion, our country is on the brink of a fiscal emergency. In our campaign to reduce deficits, we must redouble efforts to reduce waste in all Federal spending, defense included.

That is why I sponsored an amendment to the Emergency Deficit Control and Balanced Budget Act to require that all major Federal contracts with built-in inflation assumptions are adjusted for the actual rate of inflation each year. Thanks to support from Senators PRYOR and GRASSLEY and others, we were fortunate enough to gain Senate approval of the plan.

Inaccurate inflation forecasts in military contracts are responsible for more than $36 billion in waste. Tens of

billions of dollars earmarked for improving our national defense just sit in the Pentagon till, because Government economists inflated the price of some Government contracts beyond reason. The inflation assumptions in the F-16 contract, alone, were off by $500 million last year.

It was no miracle that Secretary of Defense Weinberger claimed to discover $4 billion extra in his budget this year. He found that $4 billion and he can find more, because the Defense Department has amassed a fund comprised solely of excess moneys set aside for inflation that never happened. At best, this is bad management. At worst, it is classic budget padding.

My amendment, recently passed by the Senate, is simple. At the beginning of each fiscal year, the Congressional Budget Office and the Office of Management and Budget are required to adjust all major Federal contract spending on the basis of the best estimate of inflation, rather than on the bloated inflation forecasts to which we have grown accustomed.

This amendment, alone, could save hundreds of millions of dollars. In addition, my amendment would require any savings to be applied to reducing the deficit. This provision is all important in the context of the Gramm-Rudman-Hollings budget plan.

That plan permits the President to cut most Federal spending across the board, if the deficit exceeds certain limits prescribed by law. The Leahy amendment would require any savings from correcting inflation forecasts in Federal contracts to be applied to reducing the deficit, before any spending cuts could be ordered. Hopefully, this measure, and responsible congressional action to reduce Federal spending, will prevent the across-the-board cuts from ever being ordered.

Money is tight. At a time when Congress is fighting tooth and nail to cut Federal spending, we can ill afford to have what we do spend go to waste. We have much better things to spend $36 billion on than bad economic assumptions in defense contracts. In the defense area, the military services are still far short of reaching their ammunition goals. Army and Navy flying hours are down. And maintenance and spare parts backlogs have only improved marginally.

At home that money could be used to strengthen educational and economic development programs, which promote a future of prosperity and growth. That money is also badly needed to support the programs which have helped make this Nation one of the most civilized and compassionate in history.

If the best defense is a good offense, then our offensive, in these times of a $2 trillion national debt, must be aimed at controlling Federal spending. We must meet our commitments as an inwardly and outwardly strong nation. Wasteful spending on defense or domestic programs only hinders our efforts to meet those commitments.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin is recognized for not to exceed 15 minutes.

WILL GORBACHEV SNOOKER THE UNITED STATES INTO STAR WARS?

Mr. PROXMIRE. Mr. President, I had an opportunity to listen to the discussion a little earlier today by a number of our colleagues in this Chamber on the strategic defense initiative—star wars—and I am shocked and surprised. These are intelligent men—these are Senators who I admire. They showed their good judgment yesterday when they were among the very few who voted for my amendment, many of them, and I wish to thank them for that. I think they do have good judgment.

But when it comes to star wars, I think they are falling into the same trap the President is falling into, and I wish to say why.

Mr. President, this country may be about to be snookered in one of the greatest international con games ever. That inveigling may take place at the Reagan-Gorbachev summit on November 19 at Geneva. How could the Soviets persuade the Americans to do just what the Soviets want the Americans to do at Geneva? What kind of a deal on arms control would give the Soviets an advantage over the United States? Are you ready?

It is simple and easy. Secretary Gorbachev snookers America by making no deal at all on arms control. He comes to Geneva with a single, central, loudly voiced objective: The United States must agree to stop any testing, production, or deployment of star wars or Gorbachev declares the Soviets will bull ahead with their offensive missiles, their cruise missiles, and other offensive weapons, including penetration aids to overcome star wars. Gorbachev will charge that the insistence by President Reagan that he will rush ahead with the star wars antimissile defense has left him no alternative. The credibility of Russia's deterrent, the jeopardy of its status as a superpower posed by the oncoming star wars in the United States, has forced its hand. No arms control, no deal—the arms race speeds ahead.

Would not such a posture by Gorbachev put the Soviet Union in the doghouse with the Western European countries that Gorbachev has been at such pains to woo? No, indeed. Western Europeans have generally opposed star wars from the beginning. They have opposed it partly on the grounds that it will not work, but also on the grounds that, if it does work, it would tend to isolate Western Europe and expose Western Europe to greatly superior Soviet conventional military forces while the United States snuggles down behind its star wars intercontinental antimissile defense.

But wouldn't such a Gorbachev refusal to negotiate solidify American support for star wars? Wouldn't it guarantee that antimissile defense that Gorbachev has practically made a career of opposing would come on hot and heavy in the United States? It would, indeed. If this is so, why would Gorbachev adopt such a posture? The answer is because Gorbachev is intent on the old snooker. You see, from the time he took office, Gorbachev, above all, has wanted—I repeat, Gorbachev has wanted the United States to go all-out in building star wars. If this is true, if Gorbachev wants us to build star wars, how does he achieve that end? Easy. On the assumption that this new, top Communist has an IQ of at least 100, he certainly understands that the one way he can persuade the United States to follow a military policy that will diminish U.S. military power vis-a-vis the Soviet Union is for the Soviet Union to oppose it. If the Soviets oppose a woefully misguided U.S. military policy that will reduce U.S. military power on the ground that that military policy will give the United States an advantage over the Soviet Union, then it follows, as night follows day, the misguided U.S. military policy, must be good for the United States and Members of Congress, the press, and the American public, therefore, will rally to its support, of course. To pull off this snooker, the Soviet opposition to the U.S. policy must be loud, blatant, and public.

If they oppose it, we are for it. Nothing persuades Members of Congress—Democratic or Republican—to be more for a military policy than that of the Soviet Union against it. That is the only argument that I have heard that makes any sense at all that has been offered on the floor. And the Russians know that.

This is specially true if experts believe the U.S. policy is a loser. From the standpoint of the U.S. military strength, star wars just has to be the supreme lame brain waste of economic, scientific, and military resources in history. Here is a trillion-dollars-plus project that the independent scientific community overwhelmingly opposes on the grounds that it will not work. It will divert our best military technology to a wholly fruitless purpose. It will take massively increasing segments of our military budget. It will steal scien-

tific resources from our economy. And any reasonably intelligent college freshman will show you a dozen ways that an opposing nuclear force can beat it.

So who wants the United States to engage in this enormous waste of our economic, scientific, and military resources? Mikhail Gorbachev. That is who.

What a supreme coup for the Soviet Union! Here is that wretched Communist prison camp—the Soviet Union. Their economy sputters along producing only about half of what the United States can produce. Their military force lacks rudimentary skills. It is riddled with drunkenness. The physical health of its troops is poor. It has been stumbling around primitive, little Afghanistan for more than 5 years without winning a decisive victory. The U.S. Defense Department never misses an opportunity to poormouth the U.S. military strength and exaggerate the Soviet military power. Occasionally, a revealing beam of light and truth somehow escapes. For instance, in their latest report from the Under Secretary of Defense for Research, the Defense Department admits that in comparing the 20 most important areas of military technology, the United States leads in 15. The two countries are tied in five. The Soviets lead in exactly none—zero.

So what would you do, Mr. President, if you were Gorbachev, under these circumstances and the United States came along with a woolyheaded turkey like star wars? Remember, you, as Gorbachev, cannot match the United States in technology or in economic strength or in actual military capability. So you see star wars as a golden opportunity. A golden opportunity to do what? To divert this more powerful adversary. You think—let us taunt him into pouring his resources into an antimissile fiasco. Star wars is perfect for this big, fat gambit.

So what do you do it about it? You, as Gorbachev, go after star wars hot and heavy. You denounce it. You condemn it. You insist the United States must stop its colossal shift of resources into star wars. And that, Mr. President is precisely what Mr. Gorbachev is doing. He has been doing it right along. And just watch him at the summit. President Reagan and Secretary Gorbachev want exactly the same thing to come out of the summit. And they will both get it: a continued commitment by the United States, stronger than ever, to star wars.

THE GENOCIDE CONVENTION SECURES—NOT CIRCUMVENTS—AMERICAN JUSTICE

Mr. PROXMIRE. Mr. President, critics of the Genocide Convention have warned that if ratified the convention would allow American citizens to be tried by foreign courts of law. Ratification, the critics warn, would expose Americans to the caprice of foreign law and the whim of foreign judges.

I join these critics to declare that any treaty that circumvents American justice should not be approved by the Senate. But, Mr. President, ratification of the convention would not have that effect.

The text of the treaty does state that persons charged with genocide "Shall be tried by a competent tribunal of the State in the territory of which the act was committed." Yet, as the 1985 report of the Committee on Foreign Relations makes clear, this provision does not mean that U.S. citizens would be at greater risk of being tried in a foreign court of law. Indeed, it reduces their risk.

Legislative history and precedent supplement what a law says in an often profound way. So it is with treaty law. History and precedent make it clear that the United States could still try its own citizens if they were charged with genocide committed elsewhere.

What if a foreign government charged an American citizen with genocide and that government came to us and said "Extradite?" Mr. President, under no circumstances would our treaty obligations require us to extradite that citizen. If there was sufficient evidence to justify a trial, that trial would be held in a U.S. court. If there was not enough evidence, no trial would be held. I join the Foreign Relations Committee and the administration in supporting an understanding to clarify this provision of the convention and to insure that American citizens are not put at risk in this way.

Indeed, the risk of being tried for genocide in a foreign court would be reduced, not increased, if the United States ratified the Genocide Convention. At present, if an American traveling abroad is arrested and charged with genocide, the United States is in a weak position to seek that citizen's release. We cannot gain his extradition back to this country by saying we will try the crime in the United States, because genocide is not a crime in the United States. But if we could point to our ratification of the Genocide Convention, in five countries that citizen's extradition back to the United States would be automatic. With all other countries, our efforts to seek the citizen's extradition would be strengthened immeasurably.

So, I join those individuals who argue that American citizens should not be made more vulnerable to being tried in foreign courts. Yet I can assure those critics that their concerns about that effect of the Genocide Convention are groundless. Ratification of the Genocide Convention would not cause American citizens to be brought before foreign courts. It would instead enable the United States to bring to just those who are guilty of the horrific crime of genocide.

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, the myth of the day is that an arms race between the United States and the Soviet Union will place unbearable strains on an already weak Soviet economy. I admit, it is weak. Therefore, the Soviets have more to lose from an arms race than we do.

The facts, however, tell a different story, Mr. President. In the fall 1985 issue of Foreign Policy, John W. Kiser points out that an arms race would have more positive effects for the Soviet Union than we realize. Mr. Kiser is president of a research company that works with transferring Soviet-bloc technologies to Western companies. He, therefore, has somewhat of an insider's view of the Soviet defense industry.

Here are some of the benefits the Soviets derive from an arms race with the United States, according to Kiser:

First. An arms race, because it represents an external threat to Soviet society, services to pull the Soviet people together to support the two most important institutions in the minds of the Soviet leadership: the Communist Party and the military. In fact without an external threat or stimulus of an arms race, the Soviet economy, which is heavily defense oriented, might well stagnate.

Second. Although defense spending is a burden on any economy, in the Soviet Union there are not necessarily two separate economies, where defense spending bleeds the civilian sector. On the contrary, virtually all nine soviet defense-industry ministries produce consumer goods. What happens is that the Soviet defense sector plays an important role in the production of civilian goods, and when Soviet defense spending increases it also tends to promote economic and technological improvements in the civilian sector.

Third. Research has shown that the Soviet defense industry tends to be the highest quality producer of many products in the U.S.S.R.—both military and nonmilitary. By heating up the arms race, the United States, according to Kiser, "might inadvertantly be strengthening the one sector of the Soviet economy with a vested interest in the efficient use of resources."

In other words, Mr. President, the arms race is a two-edged sword for the Soviet. Sure there would be hardships. But the myth is that there would only be hardships.

I ask unanimous consent that Mr. Kiser's article be printed in the RECORD. Tomorrow, I will talk about another myth he addresses, SDI.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOW THE ARMS RACE REALLY HELPS MOSCOW

(By John W. Kiser)

Two critical assumptions about the impact on the Soviet Union of the U.S. arms build-up, and especially the Strategic Defense Initiative (SDI), or "star wars," seem to have taken root among American foreign-policy thinkers. One is that the diversion into defense of even more Soviet Resources in response to the U.S. build-up will greatly strain an already weak economy. Heightened political tension and possibly even domestic crisis could result. The other is that the Soviets fear U.S. technological prowess and that therefore the SDI has the Kremlin terrified.

There is some objective basis for each assumption, but each rests on only a partial examination of the situation. Moreover, each overlooks fundamental differences in the structure and psychology of the U.S. and Soviet systems.

Two modifying propositions deserve consideration. The first is that, as in the United States, defense spending in the Soviet Union has both positive and negative effects. Military spending does divert resources from more productive civilian uses. As in the United States, however, defense spending also brings economic benefits. In the Soviet Union these benefits may be even greater than in America.

The second proposition is that although the technological and political challenge posed by the SDI does concern the Soviets, in the long run the threat posed by the SDI may actually strengthen their system, pushing them more quickly into a broad-based computer culture and leading them to develop their own defensive system ahead of the United States.

In business school, spiring executives are required to take financial accounting and to learn the principle of double-entry bookkeeping. For every transaction, a credit entry and a debit entry are carried. In that way, the books always balance. Although social and political phenomena rarely carry neat, balancing charges, few such phenomena fail to generate simultaneous pluses and minuses. In looking at the USSR's balance sheet, the Reagan administration, like most others, see primarily liabilities. Wishful thinking about the collapse of the Soviet Union, however, is no new to American politics. An inability or an unwillingness to consider the double-sided nature of things fosters such thinking. The impact of U.S. defense spending and the SDI should be viewed from this perspective.

In the nuclear era it has not been fashionable to speak of war's benefits. Yet war, or the threat of war, has served at least three useful functions in the past. The first is technological. From the days of the crossbow to the present age of the jet engine, nuclear power, and computers, war has simulated technological progress. For example, the University of Chicago historian William McNeill argues in *The Pursuit of Power* (1982) that the Industrial Revolution received much of its impetus from the demands on British industry to supply British troops fighting in Europe.

Second, throughout history, war has often helped bind countries together, diverted political attention from internal problems, and justified coercive governmental controls. Third, in all times, war has enriched some individuals, groups, and companies. In modern times, war, or at least preparations for it, provides a massive economic stimulus and sources of employment for thousands.

These benefits apply, in varying degree to all societies. In Soviet society, however, additional benefits may accrue because of the system. One great weakness of the Soviet economy is its lack of competitive drive and market discipline. The marketplace is a severe disciplinarian—to Soviet and socialist eyes, a brutal and inhuman one in some respects. It allows a weak competitors to die, except when the government decides to intervene. The human toll can be high—loss of job, dignity, and home. But the benefits of this discipline can be seen in the contrasting service of the U.S. Postal Service and McDonald's at lunch time.

The Soviet system, lacking the incentives and cold discipline of the market, has no commercial penalties for failure as severe as economic death. Only two institutions worry about institutional survival—the Communist party and the military. Fear of revolution or of defeat in war provides the ultimate discipline for those two organizations. Unlike civilian production enterprises, in which individuals may suffer penalties for poor performance, the military as an institution risks destruction and extinction if it is not properly prepared to meet the competitive challenge of the United States and its forces.

The Soviet Union knows from bitter historical experience—an experience that the United States and its military generally lack—the penalty of not being able to compete in war. For this reason, the military and the party above it are concerned with competitive survival in a way that is true for no other sector of Soviet society. Therefore, external threats or external competition provide stimuli for development that are not present in the system itself.

Mikhail Agursky, an engineer formerly employed in the Soviet military-industrial complex, has written in Aleksandr Solzhenitsyn's collection of essays *From Under the Rubble* (1975): "The Communist economy's pace is set not by internal but by international competition, spurred by the urge for survival and expansion, considerations of international prestige, and so on. Were it not for this competition, Communist economies would be doomed to stagnate completely." In other words, preparedness for war provides a source of tension that is necessary for any society to progress.

But there are more specific ways in which the growing defense establishment can benefit the larger Soviet economy: It may make contributions to civilian production; it may create technological spin-offs and enhance product quality; and it may foster the transfer of management techniques and military-style discipline to civilian ministries.

Nine Soviet ministries—the Ministries of the Aviation Industry, the Communications Equipment Industry, the Defense Industry, the Electronics Industry, Machine-Building, Medium Machine-Building, General Machine-Building, the Radio Industry, and the Shipbuilding Industry—known as the defense industries, carry out Soviet military production, which is supervised by the Military Industrial Commission. It is widely accepted that the quality of Soviet military hardware is much higher than the average quality of goods produced by the civilian ministries. Largely because of their fears about survival, military buyers, unlike their civilian counterparts, have the leverage to be demanding. If the military does not get what it wants, the product may not be accepted. It is a truism in American industry that a tough customer is good for a supplier. The Soviet military is a tough customer with demanding acceptance standards. It is cost conscious and manages its research cycle in ways atypical of the rest of Soviet industry. In other words, the military, within the context of the Soviet system, acts most like the private sector in the American system.

A better understanding of the relationship between the Soviet defense sector and the civilian sector can help uncover some of the positive effects on economic performance that a great Soviet defense effort can have. The Soviet defense sector seems to the West an unrelieved burden to Soviet society, an economic "black hole" that irresistibly absorbs resources and gives little or nothing back. This view is misleading at best. Evidence derived from my own commercial business supports the important research done by Julian Cooper of the Centre of Russian and East European Studies at Great Britain's University of Birmingham. Cooper has painstakingly documented the many linkages between the civilian and the defense sectors in a paper scheduled to be published in the forthcoming collection *Technical Progress and Soviet Economic Development.* In particular, his research demonstrates the important role the Soviet defense sector plays in the production of civilian goods.

Virtually all nine defense-industry ministries produce consumer goods. The Soviet defense industry manufactures almost one-half of all refrigerators, one-third of all washing machines and vacuum cleaners, and virtually all radios, record players, and tape recorders produced in the Soviet Union. Defense ministries also turn out furniture, cooking utensils, umbrellas, clocks, and many other products.

In addition, defense ministries also produce substantial amounts of industrial equipment both for their own and for civilian use. Although the defense sector's overall civilian production is difficult to measure, Cooper has estimated total output for a range of individual products: one-third of all machine tools, one-third of all railroad cars, 60 per cent of the electric trams and motorcycles, and 15 per cent of the tractors made in the USSR. At least eight of the nine defense ministries make medical equipment. Tractor production includes the heavy, wheeled workhorse Kirovets, which plays an especially important role in Soviet agriculture. Since the early 1970s, Cooper reports, the Ministry of the Shipbuilding Industry has emerged as an important supplier of large irrigation units, which are built with tubing supplied by the Kuibyshev metallurgical works operated by the Ministry of the Aviation Industry.

This defense contribution to civilian needs is not new. Since czarist times, the munitions plant in Tula has made samovars that remain the best known in Russia. The late Soviet leader Leonid Brezhnev threw a big rock into the pond of Western Sovietologists' complacency when he announced at the 24th Communist Party Congress in 1971 and 42 per cent of defense-industry production served civilian needs. It seems that the main result of that statement, however, was to unleash a pettifogging debate over whether he meant the Ministry of the Defense Industry or the whole defense industry.

Cooper's research, as well as my own work, has found strong evidence of technological spin-off to the civilian economy. The

valuable publication *Introduced Inventions*, which has been issued by the Soviet State Committee for Inventions and Discoveries (CID), has featured an annual listing of all Soviet inventions that are introduced into the civilian economy each year. The date of the patent, origin of development, place of use, and estimated savings realized for the economy have been included in each description. When the organization that develops new technology has not been named, it is quite likely that the reasons relate to security and that the plant is in the defense sector. *Introduced Inventions* has reported a large number of inventions without identifying the developing organizations. The publication, therefore, has probably served the purpose of funneling information from the defense industries to the civilian sector. Research done by a panel of the Organization for Economic Cooperation and Development in 1969 showed that 54 per cent of the inventions randomly selected from Soviet patent journals were from unidentified institutions. When this same panel looked more closely at the inventions relating to "aircraft, aviation and astronautics"—technologies closely tied to Soviet defense-industrial ministries—it found that almost 96 per cent were from unidentified institutions.

Moreover, each November, State Prizes are awarded for important advances in technology. Cooper analyzed the prize-winning institutes over a 20-year period. Research and development organizations and enterprises of the defense industry developed or collaborated in the development of approximately one-fifth of the winning technologies. Some of these technologies have been licensed abroad and will benefit America's own defense industry. One example is a ground-breaking electromagnetic casting technology that permits the manufacture of aluminum ingots without conventional molds, thereby yielding significant production economies. Many major aluninum companies throughout the world have acquired this technology, which was developed by the Kuibyshev works. Other world-class technologies include electro impulse de-icing—another Ministry of the Aviation Industry innovation—and detonation spray coating from the Ministry of the Shipbuilding Industry. The latter technology competes with a Union Carbide process and is used to put ultrathin, superhard coatings on everything from turbine blades to paper-cutting machines.

In my own work, which identifies opportunities for commercial licensing of foreign technologies for U.S. client companies, I often review Soviet commercial publications describing new inventions available for sale. These have included advanced refining technology for producing high-purity metal with good ballistic-impact properties, powder metallurgy for making components out of silicon nitride—a ceramic material that can be used in bearings for cruise missiles—and technology for welding thick titanium plate, a process the United States has yet to master.

Supporting this research and development activity is an institutional infrastructure not unlike that in the United States. Many purely military defense-research institutes are secret and are fully controlled by the military. These are similar to the U.S. Naval Research Laboratory and the Watervliet Arsenal, which are under direct Defense Department control. In addition, there is a huge network of nominally civilian institutes that is under the control either of the USSR Academy of Sciences or of similar academies run by each of the Soviet republics. These include such well-known research institutes as the Paton Electric Welding Institute in Kiev and the Kurchatov Institute for Nuclear Power in Moscow. Universities and polytechnic institutes also form part of a huge research base for the military to draw upon. Many of these civilian research institutes carry on classified research, not unlike the pattern in America, where leading universities are engaged in classified defense research under the aegis of specialized units such as the Lincoln Laboratory of the Massachusetts Institute of Technology and the Lawrence Livermore National Laboratory run by the University of California. Many research institutes that conduct no classified research also cooperate closely with military and the defense industries.

With this intermingling of defense, industrial, and academic organizations, it is unreasonable to assume that researchers moving back and forth between defense and civilian assignments do not use insights and ideas drived from defense work for the development of civilian technology. Good U.S. defense contractors are always looking for commercial spin-offs from their defense work. Bell's UH-1 helicopter exemplifies this practice. The "Huey" saw extensive action in Vietnam; commercial versions have performed such tasks as hauling and placing electric transmission line towers and ferrying workers to offshore oil rigs. The big defense push in very large-scale integrated-circuits technology will undoubtedly yield similar commercial benefits to alert contractors.

Although defense spending is a burden on any economy, once policymakers and analysts abandon the image of two separate economies, one bleeding the other dry, and see instead a highly integrated military-industrial economy, certain new questions will arise. How, for example, will the expansion—in size and influence—of the Soviet defense sector affect overall Soviet economic efficiency? Higher-quality materials and capital goods, of course, are generally used for defense purposes. But to stay with a double-entry bookkeeping approach, it is important to consider the possible benefits stemming from growth of the military's influence. The Soviet military shows a growing understanding that the overall performance of the economy is vital to its own ability to compete with the United States. Through heightened military competition, the United States might inadvertently be stengthening the one sector of the Soviet economy with a vested interest in promoting the efficient use of resources. A Commerce Department specialist on the USSR, John Martens, has observed that the real economic reformer in the Soviet Union may be the military.

Cooper's findings show that there is little doubt that defense enterprises are the highest-quality producers of many kinds of products in the USSR. The Saratov refrigerators and Raketa vacuum cleaners turned out by the Ministry of the Aviation Industry are eagerly sought by consumers. The Kirovets tractor of the Ministry of the Defense Industry and the Biryusa refrigerator manufactured by the Ministry of General Machine-Building are frequently held up in the Soviet press as the results of good management practice to be copied by the rest of Soviet industry. Indeed, the Biryusas not only are coveted by Soviet consumers, but also are exported to Eastern and Western Europe. The Ministry of General Machine-Building likewise seems to be one of the better producers of reliable televisions. Cooper concludes, on the basis of Soviet references, that at least two ministries, the Ministry of the Aviation Industry and the Ministry of General Machine-Building, consistently produce goods that exceed the general quality of their civilian equivalents.

A BLESSING IN DISGUISE

In addition, there has been an increasing transfer of personnel from the defense ministries to civilian positions, and with these managers have come attempts to apply successful defense management practices. These include procedures for enhancing customer power in the development of new technologies, as well as new organizational methods for integrating research, design, and production. Finding ways to reward and punish more effectively good and bad performances in fulfilling contracts is also high on the agenda of defense managers moving into civilian ministries. The work-team, or "brigade," system now being introduced throughout much of Soviet industry owes much to the Kaluga turbine works of the Ministry of the Shipbuilding Industry.

In 1984, in fact, the Kremlin launched an economic experiment involving the transfer of top defense-production officials to leading posts in five civilian industrial ministries in order to enhance autonomy and initiative and to improve discipline in meeting supply contracts. The recently appointed heads of the State Committee for Standards and the Ministries of the Machine Tool and Tool-Building Industry, Power Machine-Building, and Heavy and Transportation Machine-Building are all former senior defense-industry managers. This experiment probably will be expanded under new Soviet leader Mikhail Gorbachev, and it is being overseen by a commission led by L.A. Voronin, first deputy chairman of Gosplan, Moscow's central economic planning bureaucracy. Prior to 1980, Voronin was first deputy minister of the Ministry of the Defense Industry.

The role of defense personnel in promoting economic and technological improvement is not new. The military influenced the creation of both the State Committee for Standards and the CID. The latter, created shortly after World War II, facilitates the diffusion of information about new inventions, especially those of interest to the defense sector. Initially staffed by military personnel, the CID was first headed by Y.E. Maksarev, the director of the plant that built the famous T-34 battle tank. During the 1950s and 1960s, the Ministry of the Aviation Industry took the lead in developing new management ideas and promoting cost-effective approaches to production.

The SDI may be another blessing in disguise for the Soviets. Although some U.S. specialists believe that the Soviets are equal to or ahead of the United States in many areas of strategic defense technology—thanks to a bigger and longer-running research effort—the major area in which they are comparatively weak is computer technology and integrated computer systems. The Soviets have shown a capacity to handle individual computer-based projects, such as guiding missiles accurately, putting probes on Venus, and running Gosplan's computer-based management system, which may be the largest in the world. But they face problems in the depth of their computer base and in the magnitude of the organizational challenge of integrating all the components of the technology.

51-059 O-86-42 (Pt. 20)

If the Soviets decide to meet the U.S. challenge of an SDI of their own, they will pay a heavy economic price. Nevertheless, two consequences not advantageous to the United States might follow. One is that Washington will force the pace of development in Soviet computer technology infrastructure and require Moscow to make a variety of positive organizational changes it might not make otherwise. The United States also may be providing Soviet leaders with an energizing force from without that the system cannot generate from within.

Another point to be considered requires examination of America's weaknesses as well as its technological strength. The strength of the American social and economic system lies in its relative adaptability. Yet it is a system also noted for inconsistency and undependability, particularly when it comes to long-term, government-driven policy. Despite broad economic constituencies for the B-1 bomber and the MX (missile experimental), funding of these weapons systems has been a long, politically charged process characterized by frequent stops and starts. Absent a recognized Soviet challenge like the *Sputnik* satellite, the political process is not likely to give the same support to strategic defense that it gave to the moon race. At least four administrations and eight congresses must give strong support to the SDI for it to realize its ambitious aims. Nor is the Pentagon's procurement process famous for the speed with which it develops new weapons. Further, if the Defense Department succeeds in hindering open scientific communication, it will add to the already formidable technical obstacles confronting the SDI.

The Soviet system may be slow to crank up, but it is noted for a plodding, persistent pursuit of objectives once important decisions are made. The Soviet naval build-up reflects 20 years of persistence. The success of the SDI requires steady funding, not erratic spending. If the Soviets do elect to develop a comprehensive strategic defense after considering all other options, the United States should not forget the outcome of the race between the tortoise and the hare. Alternatively, should the Soviets multiply their offensive forces, the United States could face a very real missile gap, unless the American system is capable of delivering both the political and the technical promise of the SDI.

American foreign policy is increasingly seen by many in the world, and especially by the Soviets, as a strange and unpredictable beast driven more by emotion than by calculation of national interests. It might be useful if presidents recalled the sober words of George Washington, not a man fond of moralistic outrage, as a basis for seeking foreign-policy satisfaction: "The Nation which indulges toward another an habitual hatred or an habitual fondness is in some degree a slave. It is a slave to its animosity or to its affection, either of which is sufficient to lead it astray from its duty and interest."

Influential segments of the U.S. foreign-policy community view the Soviet system as representing an unparalleled order of evil. An obsessive hatred of Soviet communism, easily transformed into excessive fear or contempt, generates often counterproductive ideas to harm the Soviets without regard to the consequences to America's own interests. Spurious arguments about the superior morality of defense over offense to the contrary, much of the support for Star Wars seems to be rooted in such emotions.

Once the Soviets decide whether and how to respond to the SDI challenge, they are not likely to be diverted from their course by erratic American foreign-policy responses. The genie may already be out of the bottle. All one can say with confidence is that a new world of uncertainty and unforeseen consequences is taking shape.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 11 a.m.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER [Mr. MURKOWSKI]. Without objection, it is so ordered.

EXECUTIVE CALENDAR

Mr. DOLE. Mr. President, It is my hope that, on a daily basis, we can move to some of the nominations that are being held, starting with Alex Kozinski, of California, to be U.S. circuit judge for the ninth circuit. That nomination was reported on September 12, 1985. It is now October 22. I assume that Judge Kozinski would like to go to work.

There are other nominations that have been held on both sides: George D. Gould, of New York, to be Under Secretary of the Treasury, reported on September 18; Charles O. Sethness, of Massachusetts, to be an Assistant Secretary of the Treasury. I understand there may be a jurisdictional dispute there. We hope that can be resolved.

The nomination of Vance L. Clark, of California, to be Administrator of the Farmers Home Administration, has been out here for about a month. The farmers have a lot of problems. Farmers Home Administration is directly involved in handling those problems. Therefore, I hope we can resolve any problems concerning Mr. Clark's nomination.

Next is James W. Spain, of California, a career member of the Senior Foreign Service to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Democratic Socialist Republic of Sri Lanka. That was reported on September 24, 1985.

The nomination of Robert K. Dawson, of Virginia, to be an Assistant Secretary of the Army, has been pending for about 3 weeks.

The nomination of Winston Lord, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the People's Republic of China, has been pending for about 3 weeks.

Orson G. Swindle, III, of Georgia, to be Assistant Secretary of Commerce, was reported October 10.

The nomination of Charles Fried, of Massachusetts, to be Solicitor General of the United States has only been on the calendar for a few days.

Mr. President, I would hope that particularly those which have been pending for a month or more we can start the process, an early morning process, to take up these nominations. If people have objections, obviously they have every right to object. They have the right to make their case. They have a right to request a rollcall vote. But to permit a nomination to hold in my view is not good legislative practice.

I serve notice on all those who have problems with nominees they should consult with the leadership to see if we can determine what the problems are.

It is my understanding that Senator THURMOND is on his way to the floor to see if we can proceed with the nomination of Judge Kozinski.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I understand that the distinguished majority leader spoke just a few minutes ago with respect to nominations on the calendar. I did not hear what the distinguished majority leader said. Would he please repeat what he said?

Mr. DOLE. Mr. President, I thank the distinguished minority leader for yielding.

What I did was go down the list and indicate every instance where it had been called to my attention that there was a hold. I did not indicate where the holds were coming from, because I am not certain in some cases, but I am prepared to assume that there are probably as many as or more on this side of the aisle than on the minority leader's side.

I selected Mr. Kozinski because he had been on the calendar the longest period of time, with one exception, where I understand there are some other things working. I have since discussed it with the distinguished Senator from Michigan [Mr. LEVIN] and he has a legitimate reason to want additional time on that nomination. He submitted a request to Senator THURMOND and Senator THURMOND sent it on to Mr. Kozinski. The information has now been received. Senator LEVIN

needs until next Monday or Tuesday to have a chance to examine it.

It is my hope that we can resolve some of the others in our discussions today in the chairmen's meeting, and then as we can, try to bring them up on a one-at-a-time basis.

Mr. BYRD. Let us go down the Executive Calendar so that each of us will be prepared to discuss these matters in conference.

Beginning with the Treaty on Genocide, what is the outlook for a call-up of that item?

Mr. DOLE. I think the outlook is good. It is on the list that I submitted to the distinghished minority leader, a must list to complete this year. So that item will be hopefully disposed of this year, unless we get bogged down in reconciliation or some other matter.

Mr. BYRD. Very well. Calendar Order No. 3, that is coming up today, is it not?

Mr. DOLE. Yes.

Mr. BYRD. All right.

Mr. DOLE. That will be up immediately after the policy luncheon.

Mr. BYRD. All right. The next item is the Department of Energy, Charles A. Trabandt.

Mr. DOLE. Yes. I understand that is being held waiting for another nominee, and then we will consider those at the same time.

Mr. BYRD. Where is that? That hold is on the Democratic side, is it?

Mr. DOLE. Yes.

Mr. BYRD. All right. The next one is under the Judiciary, Calendar No. 379, Alex Kozinski, to be U.S. circuit judge for the ninth circuit. Is that hold on the Democratic side?

Mr. DOLE. Yes.

Mr. BYRD. All right. The next one is Department of the Treasury, George Gould. My calendar says it is OK over here. Is there a hold on——

Mr. DOLE. The next two, George Gould and Charles Sethness, are being held by the chairman of the Banking Committee. It is a jurisdictional matter between the Finance and Banking Committees. We hope to discuss that today in our chairmen's meeting.

Mr. BYRD. On this side, both of those nominations are cleared.

Mr. DOLE. Yes.

Mr. BYRD. George Gould, to be Under Secretary of the Treasury, and Charles Sethness, of Massachusetts, to be Assistant Secretary of the Treasury. No holds on this side. Both of those holds are on the Republican side.

How about the next one, Vance Clark, Department of Agriculture?

Mr. DOLE. I think that is on the Democratic side.

Mr. BYRD. That is a hold on the Democratic side. Nothing on the Republican side?

Mr. DOLE. No. The next one, James Spain, is being held on this side. Next, Robert K. Dawson is being held——

Mr. BYRD. Yes, James Spain is clear on this side. Now, going back to Vance Clark, that was one who was appointed during the last recess of the Senate, I believe.

Anyhow, going on now to the Department of Defense, Robert K. Dawson, my calendar shows a hold on both sides. Am I correct?

Mr. DOLE. I know there is a hold on this side. I know Senator GOLDWATER, the chairman of the committee, wants us to pursue it.

Mr. BYRD. All right. There is a hold on both sides on that one. The next one, Winston Lord, to be Ambassador to the People's Republic of China, that one is clear and has been clear on this side.

Mr. DOLE. Right. That is being held on this side, and again we will discuss that today in our meeting.

Mr. BYRD. Department of Commerce, Orson Swindle, to be Assistant Secretary.

Mr. DOLE. That is OK on this side.

Mr. BYRD. A question mark on this side. We will see if we can clear that one. Department of Justice, Charles Fried?

Mr. DOLE. Charles Fried is clear on this side.

Mr. BYRD. It is clear on this side also.

The next one was only put on the calendar as of yesterday, the last one.

Mr. DOLE. So there are not many, but it seems to me, if we are trying to look ahead on when we might recess for the year——

Mr. BYRD. I count 11 nominations on the calendar.

Mr. DOLE. That is correct.

Mr. BYRD. I count four with Democratic holds, one which has both Democratic and Republican——

Mr. DOLE. I think there are five, five and one being held by both sides.

Mr. BYRD. Yes, four Republican holds and one jointly being held. So that is a total of 11.

Mr. DOLE. Right.

Mr. BYRD. I thank the distinguished majority leader.

Mr. DOLE. I understand now that it may be possible to clear the Fried nomination.

Mr. BYRD. That is one that has been cleared on this side. We can proceed at any time the distinguished majority leader is ready to go forward.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I move the Senate go into executive session to consider the following nomination: Calendar No. 468, Charles Fried, of Massachusetts, to be Solicitor General of the United States.

The motion was agreed to.

The Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

DEPARTMENT OF JUSTICE

The legislative clerk read the nomination of Charles Fried, of Massachusetts, to be Solicitor General of the United States.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. DOLE. Mr. President, I move that the vote on the nomination be reconsidered.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. I ask unanimous consent that the President be immediately notified of the confirmation of this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I thank the distinguished minority leader and the distinguished chairman of the Judiciary Committee.

Mr. BYRD. Mr. President, I thank the distinguished majority leader.

Mr. THURMOND. I thank both Senators very much.

1983 PROTOCOLS FOR THE FURTHER EXTENSION OF THE 1971 INTERNATIONAL WHEAT AGREEMENT

Mr. DOLE. Mr. President, I think this has been cleared. I ask unanimous consent that immediately following the final passage vote on H.R. 3424, on Tuesday, October 22, 1985, the Senate turn to Executive Treaty No. 98-5, 1983, protocols for the further extension of the 1971 International Wheat Agreement.

I further ask unanimous consent that the treaty be advanced through its various parliamentary stages up to and including the presentation of the resolution of ratification.

I ask unanimous consent that it be in order now to request the yeas and nays.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there a sufficient second?

There is a sufficient second. The yeas and nays were ordered.

The resolution for ratification reads as follows:

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of two protocols for the further extension of the International Wheat Agreement, 1971: (1) 1983 Protocol for the Further Extension of the Wheat Trade Convention, 1971; and (2) 1983 Protocol for the Further Extension of the Food Aid Convention,

1980. Both signed on behalf of the United States on April 25, 1983.

LEGISLATIVE SESSION

Mr. BYRD. Mr. President, at the request of the distinguished majority leader, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

OPPOSITION TO ARMS SALES TO JORDAN

Mr. KENNEDY. Mr. President, yesterday, the administration formally notified Congress of its intention to sell sophisticated weapons to Jordan. Today I am joining with Senators HEINZ, INOUYE, KASTEN, CRANSTON, BOSCHWITZ and 67 other Senators in introducing a resolution of disapproval of the administration's request for advanced arms sales to Jordan.

Despite the fact that over two-thirds of the Senate has publicly stated its opposition to the sale of advanced weaponry at this time to Jordan, the administration is once again bending to Arab pressure and has decided to push for this dangerous new round of arms sales to a country still technically at war with Israel; 74 Senators—45 Democrats and 29 Republicans have agreed to cosponsor our resolution. Clearly that broad support indicates that opposing the attempt to arm the enemies of Israel is no partisan issue—but a national commitment.

We do not seek a confrontation with the administration over this issue. But neither can we remain passive while the administration pursues a course that could endanger Israel and its people in any future confrontation in the Middle East.

All of us hope that the optimistic reports in the wake of King Hussein's visit to Washington will bear fruit and that Jordan is at last on the verge of embracing the Camp David peace process.

King Hussein may be ready for peace with Israel, but the PLO clearly is not. The recent hijacking of the *Achille Lauro* cruise ship once again proves to the world a fundamental truth of the Middle East: The PLO terrorists are not freedom fighters; they are pirates. They are cold-blooded cowards who slaughtered Leon Klinghoffer, an elderly man, crippled and in a wheelchair, whose bloodied body was tossed into the sea.

Despite claims to the contrary, Yasir Arafat has not embraced the peace process. He continues to be an agent and apologist of murder, deceit and terrorism.

The PLO is not a fit partner for the peace process—and any peace process that depends on Yasir Arafat is no peace process at all but a prescription for failure.

It is time for King Hussein to stop talking about peace in the abstract, and start talking directly with Israel at the conference table. He must realize that Palestinians who wage relentless war on innocent men, women and children will never be true partners to peace. And he must realize that arms will not bring peace to his troubled part of the world—only peace with Israel can do that.

Yesterday, while addressing the United Nations, Prime Minister Shimon Peres called for an immediate termination of the state of war between Israel and Jordan. Peres has agreed to meet unconditionally with King Hussein—in Jordan, Israel or any location before the end of the year. It is time for King Hussein to accept this challenge and begin direct negotiations with Israel.

Yet today we learned that instead of sending an Ambassador to Israel, Jordan has just agreed to send an Ambassador to Syria. After a 4-year freeze in diplomatic relations, Jordan and Syria have agreed to exchange Ambassadors and are reported to be planning a summit between their two nations. But it is time Jordan had an Ambassador in Israel.

What we need in the Middle East is a peace policy, not an arms policy—and what we do not need is more missiles and bombs aimed at Tel Aviv, Haifa and the Western Wall.

No Arab State has ever attacked Israel by itself. In each instance when Jordan has fought against Israel in the past, it is as part of a larger coalition of Arab countries. Israel is right to consider the danger to its security from Jordan acting alone—or in concert with other Arab nations.

We all know the "wish list" the administration is considering for the present sale—40 advanced fighter aircraft, 300 AIM-9P4 infrared air-to-air missiles, 24 mobile improved Hawk—I-Hawk—surface-to-air missiles; 72 Stinger shoulder-fired surface-to-air missiles, and 32 Bradley fighting vehicles.

The advanced aircraft—either F-20's, or F-16's—are highly capable aircraft, built to carry Sidewinder missiles, bombs and other ordinance, that could be readily integrated into the AWAC's system, which under the administration's misguided policy, is already being sold to Saudi Arabia.

The fast scramble time of these aircraft, their shorttake off and landing characteristics, their high acceleration, maneuverability and ground attack capabilities would greatly enhance Jordan's ability to participate in a surprise Arab attack against Israel.

The Stinger missiles are portable weapons which can be carried and fired by individual soldiers, and which have a range of 5,000 meters and can hit planes at altitudes of up to 3,000 meters; a single missile could destroy a civilian aircraft. A Stinger missile in the hands of terrorists could wreak havoc in the Middle East.

The I-Hawks proposed by the administration would significantly enhance Jordan's offensive capabilities. An Arab attack on Israel is most likely to occur if it is supported by effective antiaircraft weapons to prohibit the advance of the ground forces. In the 1973 Arab war against Israel the Jordanians limited their participation to an expeditionary force that fought under cover of Syrian air defense—because Jordan lacked the very air defenses the administration now proposes to provide.

In addition, Israel's small size means that I-Hawk missile batteries located on Jordan's border hit aircraft flying over nearly half the country. Jerusalem is less than 20 miles from Jordan; the range of the I-Hawk has a range of 25 miles.

Jordan's current Hawk missiles are placed in concrete and cannot be moved. The new equipment would be mobile—increasing the effectiveness and survivability of the missile and providing Jordan with unprecedented support for offensive operations.

Finally, the Bradley fighting vehicle is armed with a stabilized 25mm gun that can fire while the tank is moving. The vehicle's twin-launcher for antitank missiles allows the vehicle to be loaded from inside—and it carries 12 TOW missiles. So far, only the U.S. Army has this powerful weapon.

We know that Jordan has continued to acquire advanced weapons from the Soviet Union, including surface-to-air missiles. Jordanian forces have received military training on Soviet territory and from Soviet technicians in Jordan. These Kremlin ties raise serious questions about the security of any high technology weapons supplied by the United States to Jordan.

There is a profound choice to be made—whether the people of the Arab lands and the people of Israel will spend the next generation as they have the last, waiting for their sons to be summoned, waiting for the call of battle to be sounded—or whether they will commit themselves to the cause of peace.

In the wake of recent events, we had all hoped that the administration would hold off on this request until Jordan was at the negotiating table with Israel. But until these direct negotiations begin, any arms sales to Jordan is a mistake. Instead of talking recklessly about numbers like F-16's and F-20's, the administration should be more diligently pursuing the two most important numbers for the Middle East—242 and 338.

No sophisticated weapons whatever should be sold to Jordan, unless and until that nation accepts the existence of Israel and begins direct negotiations

with Israel for peace. Until this fundamental condition is met, the administration's proposed arms deal should not be accepted by Congress.

Mr. President, I ask unanimous consent to have printed in the RECORD material in connection with this matter.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Oct. 22, 1985]

EXCERPTS FROM PERES'S SPEECH PROPOSING TALKS

UNITED NATIONS, N.Y., OCT. 21.—Following are excerpts from a speech today by Prime Minister Shimon Peres of Israel, as issued by the Israeli Mission:

Terrorism is bent on injuring the peace process, but we have an equal determination: it will not stop progress toward peace.

We reject the absurd claim that resisting terrorism—rather than terrorism itself—undermines efforts for peace.

Mr. President, nobody brought more tragedy on the Palestinians than P.L.O. terrorism. Our enemy is not a people, a race, a religion, or a community. Our enemy is belligerency, hatred, and death. We know that there is a Palestinian problem. We recognize the need to solve it honorably. We are convinced that there is no solution but through diplomatic means. From this rostrum, I call upon the Palestinian people to put an end to rejectionism and belligerency. Let us talk. Come forth and recognize the reality of the State of Israel—our wish to live in peace and our need for security. Let us face each other as free men and women, across the negotiating table.

Let us argue, but not fight. Let us arm ourselves with reason. Let us not reason with arms.

Ever since the beginning of the dispute between us, we have urged our Palestinian neighbors to reach an accommodation.

For all these years, our hand remained outstretched in vain, and the reply we heard was the echo of our own voices.

VISIT BY SADAT

When President Sadat came to Jerusalem, the course of history for all of us was changed. He found Israel willing, open and as courageous as he was in the pursuit of peace. The world looked on in wonder as a conflict which had seemed insoluble for more than 30 years, turned soluble in less than one.

Between the 48 million Egyptians and 4 million Israelis there is today peace. Peace with Egypt was to accomplish several objectives:

Sinai was returned to Egypt.

A solution to the Palestinian problem, in all its aspects, was to be reached. It was agreed that full autonomy to the residents of the territories could be a promising step in that direction.

Peace between Egypt and Israel—never intended to be an isolated episode—was to become the cornerstone of a comprehensive peace strategy in our region.

Peace between us was to be filled with constructive content.

This treaty survived tests none of us foresaw. Its full implementation is a challenge and a hope.

We turn to our Egyptian friends with the invitation to breathe life into our relations and to raise our peoples' spirits. Let us not allow gloom and doom to overshadow our worthiest accomplishment. Let us make our peace a success, a source of encouragement to others.

RELATIONS WITH JORDAN

The most complex issue—yet the most promising—involves our neighbor to the east: the Hashemite Kingdom of Jordan. An issue confined not only to borders, it reaches across peoples and states. Its settlement should also comprise the resolution of the Palestinian issue.

Middle East archives are filled with negotiating plans, but its diplomacy is short of negotiating partners. Thus, this is the hour for decisions and statesmanship.

I invite this organization to depart from the tired and timid norm and to fulfill its destiny as enshrined in its walls, but ushering the parties to the conflict into a new diplomatic initiative.

Let all parties to the dispute facilitate a new phase in Arab-Israeli peace by renouncing the use of violence.

This new initiative should be based on the following principles:

1. The objective of these negotiations is to reach peace treaties between Israel and the Arab states, as well as to resolve the Palestinian issue.

2. Neither party may impose preconditions.

3. Negotiations are to be based on United Nations Security Council Resolutions 242 and 338 and on willingness to entertain suggestions proposed by other participants.

4. Negotiations are to be conducted directly, between states.

5. If deemed necessary, these negotiations may be initiated with the support of an international forum, as agreed upon by the negotiating states.

6. This gathering can take place before the end of this year, in Jordan, Israel or any location, as mutually agreed upon. We will be pleased to attend an opening meeting in Amman.

7. Negotiations between Israel and Jordan are to be conducted between an Israeli delegation on the one hand and Jordanian—delegation on the other, both comprising delegates that represent peace, not terror.

POSSIBLE BLUEPRINT

Aware of the nature of this undertaking, I propose the following as a possible blueprint for implementation:

Negotiations may produce intermediate as well as permanent arrangements. They may deal with the demarcation of boundaries as well as the resolution of the Palestinian problem. The Camp David Accords provide a possible basis for the attainment of these objectives.

The permanent members of the Security Council may be invited to support the initiation of these negotiations. It is our position that those who confine their diplomatic relations to one side of the conflict, exclude themselves from such a role.

This forum, while not being a substitute for direct negotations, can offer support for them. Indeed, nothing should undermine the direct nature of these negotiations.

To expedite this process, the agenda, procedure and international support for negotiations can be discussed and agreed upon at a meeting of small working teams to be convened within thirty days.

Mr. President, distinguished delegates, let us put this process into motion. Let us shield this flickering hope from threatening winds. Let us not consign this moment of hope to the fate of missed opportunities.

Let us look our younger generation in the eye and vow to do all that is humanly possible so that never again will a young boy die in a war we failed to prevent.

The sons of Abraham have become quarrelsome, but remain family nonetheless.

I hereby proclaim: The state of war between Israel and Jordan should be terminated immediately. Israel declares this readily in the hope that King Hussein is willing to reciprocate this step.

[From the American Israel Public Affairs Committee "Jordan Arms Briefing Book" October 1985]

ADVANCED AIRCRAFT: THE THREAT TO ISRAEL

The delivery of advanced aircraft to Jordan, like the F-20A or the F-16C, raises disturbing implications for the regional balance of power. Providing such aircraft will give Jordan for the first time aircraft comparable in quality to Israel's best.

JORDANIAN THREAT UNIQUE

Geography has made Israel especially vulnerable to attacks from Jordan—

Israel's longest border is with Jordan. This 300 kilometer border is more than double the length of the border with Lebanon and nearly four times as long as the border with Syria. Although portions of the terrain along the Jordanian border are relatively inaccessible to ground forces, aircraft are unaffected by such limitations.

Jordanian air bases are in close proximity to targets in Israel. Amman is barely 50 miles from Jerusalem, and Mafraq is less than 100 miles from Tel Aviv. As a result, ground attack aircraft based at Amman are only five minutes away from Jerusalem, those at King Faisal air base in South Jordan are only 7 minutes away from Elat and the new air base at Ovda. It is less than 10 minutes flying time from King Hussein air base in Mafraq to Haifa or Tel Aviv.

These conditions make Jordan the state best positioned to spearhead a combined Arab attack against Israel, especially a surprise attack.

ARAB PRIORITY ON AIR POWER

Arab air forces are now giving priority to strengthening their air forces, since they know that Israel must maintain air superiority in order to survive. Even limited penetrations of Israeli air space could significantly hurt Israel and alter the overall military balance. Targets of attack could include Israeli air bases, command posts, early warning radars, mobilization centers for ground units, naval facilities, or other high priority targets, the loss of which would seriously affect Israeli combat capabilities.

THE COMBINED ARAB AIR THREAT

Jordanian advanced aircraft should not be taken in isolation, since they will be qualitatively important additions to the overall Arab air threat array in a "reasonable worst case." Jordan's 100+ combat aircraft, must be viewed in the context of the total Arab air forces, which, excluding Egypt, exceed 2100 planes.

The combined potential of the Arab coalition is significant because, unlike ground forces which move slowly, aircraft can be redeployed relatively quickly over long distances. Even in a short war, Arab countries not bordering on Israel could swiftly transfer aircraft to front-line states, thus providing reinforcements and replacements.

[From the Chicago Tribune, June 2, 1985]

$15 MILLION FIGHTER JET HAS EVERYTHING—BUT A BUYER

(By James O'Shea)

EDWARDS AIR FORCE BASE, CA.—Poised in the shadows of a cavernous hangar here, the F-20 Tigershark fighter jet looks as sleek and deadly as its namesake.

Billed as the fastest-reacting interceptor aircraft in the world, the Tigershark can fire up its powerful engine and be at 32,000 feet stalking faraway enemy planes a mere 2.5 minutes after its pilot hops into the cockpit.

With its 21 on-board computers constantly monitoring its sophisticated electronic controls, the F-20 appears to be the plane that has everything. It has missiles; it has rockets; it has cannons; it has laser-guided bombs.

Indeed, the F-20 Tigershark has just about everything except the one thing that counts: customers.

Since the late 1970s, the Northrop Corp. headquartered near here has pumped more than $800 million into development of the plane that Air Force Association magazine called "a versatile little brute . . . competitive with any other fighter flying today." Nevertheless, the company has been unable to sell a single F-20.

It is not for lack of trying. Northrop has done everything from taking the plane on a "round-the-world demonstration trip to making a recent unprecedented offer to the Pentagon: company Chairman Thomas Jones offered to sell 396 F-20s to the Air Force for a fixed price of $15 million each plus $2.85 million for all the spare parts the plane would need over 20 years.

That is less than the $18 million to $20 million per plane—and with no set figure for spare parts—that the Air Force budgeted this year to buy 180 of its first-line fighters, the F-16, made by General Dynamics Corp.

But so far no one has actually committed to buying Northrop's plane. The Wall Street Journal recently reported that the Air Force, in a classified planning document, has recommended buying some F-20s in fiscal 1987. But the plan faces several Pentagon reviews and still could be altered.

There are many reasons that the F-20 seems to fly under a cloud of bad luck. Even its most ardent supporters agree that Northrop's loss of two of its three-plane Tigershark fleet in the last nine months hasn't helped.

One plane went down in Korea last October at the tail end of its world tour during a flight demonstration. Then, just as congressional interest in the plane surged in May, a second F-20 en route to the Paris Air Show crashed during a practice demonstration at a stopover in Newfoundland.

The pilots in both the crashes were killed. The first accident was attributed to pilot error and the second is under investigation.

But as tragic as the crashes have been, they are not the main reason for the dearth of F-20 sales. The Tigershark's biggest problem is that it is trapped in a Catch-22 involving the United States' farflung allies and the Pentagon's vast weapons bureaucracy.

The F-20 was originally made to be exported to U.S. allies and not for use by U.S. forces. But America's allies have balked at buying the Tigershark because they view any plane not in the U.S. Air Force inventory as inferior.

Meanwhile, the F-20's unique status as a plane developed totally without taxpayers' funds is hurting it. Because it was developed outside of the Pentagon's weapons bureaucracy, it lacks the military constituency that normally develops as a weapon moves through the system.

It was in the late 1970s that President Jimmy Carter's administration called for a new fighter to be developed and built without government assistance for the export market. The original announcement—which still haunts the F-20—sought an "intermediate fighter" for U.S. allies, a plane whose "cost and performance characteristics would generally lie between our current export fighter the F-5E, and fighter aircraft now in production for U.S. forces, such as the F-16."

Northrop, which also makes the F-5, responded with a proposal for an updated version of the F-5 called the F-5G. But before that plane could be sold, two things happened: President Reagan was elected and his administration, reacting to the Soviet Union's presence in Afghanistan, agreed to sell a U.S. first-line fighter—the F-16—to neighboring Pakistan.

As Air Force Association magazine noted, the sale to Pakistan marked the first time the U.S. had sold one of its prime fighter planes to a country outside of the North Atlantic Treaty Organization or Israel before deploying it domestically.

Soon the Reagan administration sold the F-16 to Venezuela too, and other potential foreign purchasers started asking for the prime fighters rather than an "export" brand viewed as not good enough for American fliers.

So Northrop went back to the drawing boards and developed the F-20 Tigershark, a fighter that has structural similarities to the F-5 but is a totally new plane with significantly higher engine thrust and performance improvements, according to the authoritative "Jane's All the World Aircraft."

The trouble is that Northrop has had a hard time shaking the "export fighter" image, particularly because the F-20 is not in the Air Force official inventory.

When the world tour failed to produce any orders, Northrop decided to try for the Air Force stamp of approval by proposing that the Air Force split its purchases between F-16s and F-20s. The Air Force is committed to buy 792 F-16s.

Jones said the two planes are comparable, but the F-20 requires less fuel, fewer spare parts and less than half the manpower of any current fighter aircraft. He said it would save the Pentagon millions on each plane—savings that could be used to buy more airplanes in the Pentagon's drive to add three tactical fighter wings.

"An F-20/F-16 complementary force," Jones said in a speech, "acquired and apportioned with the benefit of competition, would reduce procurement and operating costs."

The Pentagon and the defense industry were stunned by the offer, and it has had some interesting effects. General Dynamics issued a statement attacking the Jones argument as "simplistic, outdated, irrelevant, unsupportable, highly conditional or based on unequal ground rules." The F-16's costs reflect a plane ready to operate in a sustained combat environment, General Dynamics said, while the F-20's reflect the minimum for a plane that can operate in a limited peacetime environment.

Nevertheless, the offer has struck a chord inside and outside the Pentagon. Air Force Secretary Verne Orr said the Jones offer would not change his plans to buy the F-16s next year, but he did indicate he would like to see some competition between the F-16 and the F-20.

Meanwhile, Brig. Gen. David Hoff, commander of the Wisconsin Air National Guard, analyzed the Jones offer and advocated that the Air Force buy some F-20s in fiscal 1986.

"By reducing the [purchase of] F-16s by 19," he said, "[the Air Force] could purchase 32 F-20s. The Air Force would have more aircraft and more combat capability with no increase in the budget."

The House Armed Services Committee also weighed in by including a provision in its fiscal 1986 military authorization bill requiring a competition between the F-16 and F-20 in 1987.

But most insiders still are taking a wait-and-see attitude. The Air Force, they note, was impressed when the Navy used competing bids to force down the price of some F-16s it bought, though General Dynamics says the planes sold to the Navy were stripped-down versions.

[From the American Israel Public Affairs Committee "Jordan Arms Briefing Book," October 1985]

THE THREAT OF STINGER MISSILES FOR ISRAEL

The Stinger is an ideal terrorist weapon. It can be easily carried by one man, and has a warhead sufficiently powerful to destroy civilian aircraft. It is also far more effective than the old SA-7 missiles now used by PLO terrorists. Civilian aircraft from most countries have no defenses at all against anti-aircraft missiles. Israeli commercial aircraft do have countermeasures against the less sophisticated SA-7, but existing equipment may well be ineffective against the Stinger.

Because the Jordanian military includes many Palestinians, including some potentially sympathetic to the PLO, it is all too likely that Stingers could be stolen and used as a terrorist weapon. While safeguards can reduce the likelihood of terrorists obtaining the missiles, there is no way to guarantee that the Stingers will stay out of the hands of terrorists.

Jordanian assurances to the United States on the use and security of Stingers are not worth very much. In 1964, King Hussein agreed, as part of deal to obtain American M-48 Patton tanks, that they would not be deployed to the West Bank of the Jordan River. However, in May 1967 Jordan joined in an alliance with Egypt against Israel and moved those tanks across the Jordan. Two weeks later those tanks were attacking Israeli troops.

Supplying the Stinger to Jordan also will have an adverse effect on the Arab-Israeli military balance. Each new advanced weapon supplied to Arab countries hostile to Israel adds to the burden of Israel's defense. Although Jordan already possesses the older American Redeye shoulder-fired antiaircraft missile and the similar but less capable Soviet SA-14, neither of these missiles pose the same threat as the Stinger.

Israel will be forced to develop new countermeasures devices to foil the Stinger, will then have to build and install the equipment on all of Israel's aircraft. This will be a costly process, and reductions in Israel's defense budget will make it difficult to implement such a program. Until the new countermeasures are fielded (a process that could take some time), Israeli aircraft will remain highly vulnerable to the Stinger.

Supplying Stingers to Jordan could also endanger the secrets of this important air defense weapon. The Jordanians buy anti-

aircraft weapons from the Soviet Union, and it is possible that Soviet intelligence officers posted to Jordan as military advisors could gain access to Stinger secrets.

DESCRIPTION: THE STINGER ANTIAIRCRAFT MISSILE

The Stinger is a man-portable, fire-and-forget antiaircraft missile system. It has a range of 5,000 meters and can hit planes at altitudes of up to 3,000 meters.

The Stinger only entered service with the U.S. military in 1981. It replaces the Redeye, a less capable weapon currently used by Israel, Jordan, and Saudi Arabia.

According to the U.S. Army, "Stinger overcomes many of Redeye's shortcomings with improved range and maneuverability, the ability to attack much faster targets, and, most importantly, the ability to attack aircraft from any angle." In contrast, older missiles of this type, like the Redeye or the SA-7, can only attack enemy aircraft from behind. In addition, countermeasures used to confuse the older missiles are ineffective against the Stinger.

The Stinger has been sold to Italy, Japan, Netherlands, Saudi Arabia, and South Korea.

STINGER

Mission: Stinger is a shoulder-fired, infrared homing missile system whose mission is to provide air defense coverage to even the smallest of combat units. The missile homes on the heat emitted by either jet or propeller-driven fixed-wing aircraft or helicopters, and employs a proportional navigational system that allows it to fly an intercept course to the target. A Stinger crew visually acquires its target and electronically interrogates it to determine if it is a friend. The missile notifies the gunner when it has a "lock" on the target. It is then fired from the tube by a small launch motor. Once the missile has traveled a safe distance from the gunner, its main engine ignites and propels it to the target. Stinger is stored in a sealed tube, requires no maintenance in the field, and is designed to withstand the rigors of the battlefield. It is replacing the Redeye system. It can attack much faster targets than Redeye, and most importantly, can destroy aircraft from any angle.

Soviet counterpart: There is no direct Soviet counterpart to the Stinger system. The SA-7, the Soviet manportable air defense system, is comparable to the US Redeye, the predecessor to Stinger. With a range and altitude capability of approximately 3 km, and only a tail chase capability, the SA-7 was used extensively in Vietnam and the Middle East. The SA-7 is deployed with the maneuver units throughout the Warsaw Pact.

Program status: Stinger is in production and was operationally deployed to Germany in February 1981 and to the 82nd Airborne Division in April 1982. A follow-on seeker of advanced design (Stinger-POST) completed full-scale engineering development in 1982.

Contractors: General Dynamics (Pomona, CA), Teledyne Electronics (Newbury Park, CA).

STINGER—ONE MAN AIR DEFENSE [1]

In order to counter the present and the next generation advanced ground attack aircraft in the modern battlefield environment, a new man-portable air defense system is being developed for the US Army and Marine Corps by General Dynamics' Pomona Division. This system, designated *Stinger* [initially known as *Redeye II*], is designed to replace *Redeye*, General Dynamics' original man-portable, shoulder-fired, infrared-homing anti-aircraft missile.

The mission of the *Stinger* weapon system is to provide air defense to battalions and selected combat support units operating near the forward edge of a battle area (FEBA), and to those units that would otherwise be vulnerable to high-speed, low-level, attacking or penetrating aircraft. Additionally, *Stinger* can be used to defend small vital areas and to support early phases of air mobile and airborne operations. Infrared passive guidance truly permits a "fire and forget" weapon; the ground soldier thus has no guidance function under stress of battle.

Stinger was evolved from, and resembles *Redeye*, but uses more modern technology. Like *Redeye*, it is also shoulder-fired, and travels at supersonic speeds. It incorporates improved infrared devices and an advanced guidance technique. Thus, with its all-aspect infrared seeker, *Stinger* should considerably out-perform *Redeye*, whose infrared seeker limited it to effectively attacking jets from behind. Also used in *Stinger* are an improved fuze, and a high performance propulsion system, which should give the weapon a greater range and velocity. Provision has also been made for re-using the gripstock, and, unlike *Redeye*, an Identification Friend or Foe (IFF) interrogator is incorporated.

Compared to *Redeye*, *Stinger* is a slightly larger weapon; its overall length of 60 in (1.52 m) is about 20% greater, while its weight of 33.4 lb (15.1 kg) is about 16% heavier. A separate belt pack powers the IFF interrogator.

WEAPON DETAILS

The *Stinger* weapon is made up of a missile round (i.e. the missile and launch motor located in a launch tube assembly) mated to a separable gripstock. The guided missile is of a passive infrared homing type with several subsystems integrated for effective delivery of a hit-to-kill warhead. It consists of a guidance section, warhead section, and launch and flight motors. In addition to the launch tube, the launch tube assembly includes the sight, gyro activator, umbilical, window-retainer, aft cover, and a sling. The gripstock structure contains the receptacle for a battery coolant unit, impulse generator, fire trigger, IFF interrogate switch and antenna, and control electronics for gyro drive and acquisition enhancement. *Missile and launch motor*—The missile is solid rocket propelled, with passive infrared guidance. It consists of a guidance section (seeker, guidance electronics, control surface assembly, and missile battery), warhead section, launch and dual-thrust rocket motors, and tail assembly.

The seeker section contains the seeker head and electronics assembly. This section optically tracks infrared energy from a target and supplies an acquisition signal to the weapon operator in the prelaunch phase and steering signals to the control section during missile flight. Before launch, the gyro is driven to the boresight position in which the seeker field-of-view is aligned with the boresight position of the launcher sight. Infrared radiation from the target is collected and focuses by gyro-optics onto a cooled detector. This seeker provides all-aspect target engagement. Target tracking is accomplished through a precessible, space-stabilized gyro. The gyro-optics assembly is initially spun-up at weapon activation. A seeker head coil assembly provides missile roll information to sense gyro direction, provides precession torques to re-position the gyro-optics in response to error commands in the tracking loop, and senses look-angle of the gyro-optics relative to the missile axis. The seeker is equally effective in causing hits on jet aircraft targets and point targets, characterized by helicopters and reciprocating engines.

The guidance electronics uses an error signal from the seeker to develop control-wing movements that cause the missile to fly a proportional navigation (collision course) flight path.

The control surface assembly is composed of an electronics module and a motor-driven wing assembly. Two pairs of wings, folded when the missile is in the launch tube, unfold and lock in place after the missile is fired. One pair is fixed and the other pair is movable to steer the missile in flight. The wings are moved by a set of gears and an electronic motor in response to guidance signals derived from the seeker. The steering control signals are properly phased with missile roll to effect the desired maneuver in space.

An umbilical assembly is located in the control section between the fins and the electronics package. At launch, the umbilical plug is retracted after the missile one-shot thermal battery is activated. This battery provides in-flight power for missile electronics and the steering motor. The missile battery is located in the aft end of the guidance section. The electric squib in the battery is activated when the fire trigger is pulled.

The warhead section consists of an explosive charge and a fuze assembly, and its case forms a portion of the outer skin of the missile. The fuze provides for safety during handling and the arming/warhead detonation functions. It also fires squibs which initiate the flight motor. After safe separation distance from the operator, the fuze arms. To assure very high lethality, three modes of warhead detonation are provided to assure the explosion inside the aircraft structure.

The separable launch motor provides initial velocity and roll rate to the missile to allow the missile to coast a safe distance from the operator prior to ignition of the flight motor. Canting of the launches motor nozzles provides initial spin to the missile at launch. The launch motor burns out and separates from the missile while in the launch tube. The dual-thrust flight motor [made by Atlantic Research] is an integral part of the missile airframe and provides propulsion for the missile during flight. The thrust characteristics of this high performance flight motor were selected for minimum inner burning (or dead zone) and maximum outer boundaries for very high speed targets.

The tail assembly provides missile roll rate and stability in flight. Four flat slab folding tails are attached to a common ring which is attached to the flight motor on the boattail. The tails are hinged near the base to permit folding in the launch tube. The tails erect by the action of spring force plus centrifugal force generated by missile spin, and lock into place.

Launch tube assembly.—The tube assembly consists of a launch tube, and a sight assembly used to aim the weapon and esti-

[1] This article has been contributed by General Dynamics' Pomona Division.

mate range. After firing the weapon, the gunner can discard the launch tube. The tube, made of fiberglass, is the main support for all other parts of the launcher. The front end of the launch tube is sealed with a breakable infrared-transparent window (providing acquisition capability without breaking the sealed environment), and the rear end is sealed with another breakable disk. The sling and plastic bumpers on the side of the launch tube are used for carrying the launcher and protecting the weapon when placed on the ground. The missile is sealed in the launch tube and is not removed in the field except by firing. This sealed-from-the-factory technique obviates need for field maintenance and is an important factor in the high reliability of *Stinger*.

The sight assembly provides the means for the operator to aim the weapon, track a target, perform range estimation, and insert super elevation and lead. The sight assembly and acquisition indicator are mounted on a sight cover that can be folded out of the way when not in use.

Audio and bone conduction transducers provide air-transmitted, as well as bone-conducted audio indications of target acquisition and IFF cueing signals. These cues are passed to the gunner through two paths: (1) an audio speaker via an air path through the right ear canal into the inner ear; and (2) the cues are passed by a transponder to the skull via the gunner's cheekbone, and then into the inner ear. The air-bone transducer is located at the aft end of the weapon sight. At the time the gunner shoulders the weapon, and places his eye to the sight, the air-bone transducer comes in contact with the gunner's right cheekbone. The impact of high noise environments such as noise of battle, or restrictions imparted by the gunner's clothing such as gas mask, etc., may reduce the efficiency of the air path transmission to a marginal condition. The bone transducer then provides the effective means of transmission.

Gripstock.—The gripstock is attached to the front end of the launch tube, and contains electronic circuits and switches for launching the missile, and includes the IFF antenna. The pistol grip, near the centre of balance, is the natural righthand hold point of the weapon. The gunner operates the activation switch, using his right thumb, and the firing trigger, using his index finger. Forward of the pistol grip is a battery/coolant unit receptacle, that has a receptacle cap installed when the weapon is not in use. The left hand operates an uncage switch, which allows the missile seeker to track the target. Inside the gripstock are the electronics package that performs the prelaunch missile functions, the tubing to supply cooling gas to the missile, and the umbilical assembly that completes electrical connections between the launcher and the missile. A battery/coolant unit (BCU) is inserted in the battery gas receptacle when the weapon is to be ready to fire. If the weapon is activated and not fired, the BCU is removed and another inserted.

The IFF system is lightweight, easy to use, reliable and extremely rugged. The IFF antenna serves both for transmission of an interrogation signal and for reception of a coded reply. Components of the IFF system utilized by a gunner are the interrogator (belt pack) and belt pack-to-gripstock cable. A programmer, battery charger, and a * * * input computer are used to support the IFF system. The IFF is powered from the belt pack and can be used before or after weapon activation. On-weapon components for the IFF weigh less than 2 lb (0.9 kg). The belt pack weighs 6 lb (2.7 kg).

TARGET ENGAGEMENT, TRACKING, AND FIRING

Engagement of a target may be preceded by early warning, transmitted by voice radio or electronic equipment designed for this purpose. Upon early warning or visual target detection, the front cover on the launcher is removed as the gunner shoulders the weapon. The weapon is activated by operation of a safety switch and electrical power is instantly supplied to both missile and launcher by the BCU. In addition, pressurized argon gas from the BCU is applied to the missile infrared detector to reduce temperature of the detector to a required level. Electrical power to the missile activates the seeker and control electronics, spins up the gyro in the seeker, and engages the gyro to align the missle field-of-view with the open sight on the launcher. Power to the launcher activates electronic circuitry that enhances the target acquisition signal from the missile, and presents it to the gunner via an acoustic air/bone-conduction transducer. Next, the gunner aims the weapon at the target aircraft using the launcher open sight, and hears an acquisition tone indicating that the seeker is on target. He then depresses and holds the uncage switch located on the side of the launcher gripstock, allowing the seeker to track the target independent of weapon motion. A continuous acquisition tone indicates that the target is being tracked. Before firing the missile, the weapon is repositioned to provide appropriate missile lead to improve capability against a crossing target, and super-elevated to compensate for tipoff at launch, and for gravity action during the early part of missile flight. The proper angle is achieved by locating the target in the sight at one of three indicated positions, depending upon target aspect.

Depression of the firing trigger initiates a series of events resulting in missile launch within a fraction of a second. The firing trigger activates the missile internal battery directly, provided that the uncage switch is also depressed. The missile battery in turn energizes a pressure cartridge which retracts the umbilical connector. Finally, umbilical retraction causes the launch motor to ignite; the launch motor burns completely before exiting the launch tube, so that there is no danger of blast to the gunner. The missile travels approximately 25 ft (7.6m), a safe distance from the gunner, and the flight motor is then ignited. The dual-thrust rocket motor propels the missile to target intercept.

MAINTENANCE AND RELIABILITY

The weapon system is designed for low life-cycle cost by eliminating field maintenance. Organizational maintenance is limited to the correction of visually detected faults on the exterior of the equipment, and replacement of some external components. The only tool needed is a combination pocket knife-screwdriver. The weapon requires no field support equipment. *Stinger* is designed for a 10 year shelf-life. Verification of weapon readiness is accomplished through a surveillance program involving periodic sampling of a stockpile.

WEAPON EFFECTIVENESS

The high lethality of the *Stinger* missile has been demonstrated by sophisticated computer simulations, missile flights, and laboratory and field tests. For both design and evaluation, an extremely detailed analog-digital simulation of the missile in flight was developed. The validity of the simulation was demonstrated by comparing both controlled and guided missile flights. In the case of the guided test flights, computer predictions of missile trajectories and intercept points were made before the flights and were confirmed by flight observations. Further correlation of the simulation with precise intercept point locations was done as a final part of a simulation verification program.

The effectiveness of the fuze and warhead section has been demonstrated in tests using a gas gun facility and a high speed rocket sled. Warhead lethality has been determined by U.S. Government laboratories. Such predictions of lethality have been shown to be conservative by the destruction of target aircraft in guided test flights in which no warhead was used.

The weapon reliability was shown to be high, and was improved through the technique of step-stress testing in the laboratory. By this technique, the missile was sujected to increasing levels of environmental stresses. When missile failures occurred either due to long periods with many cycles of operation, or due to extreme environmental conditions, the failures were analyzed, and design changes were made to improve the design margin commensurate with reliability requirements.

Field tests with weapons simulators have demonstrated that the inexperienced soldier can quickly be trained to become an effective gunner. The operator can visually detect targets and rapidly perform the prelaunch operations in a tactical environment. *Stinger* has been shown to provide the high effectiveness and mobility necessary for the forward area air defense mission.

[From the American Israel Public Affairs Committee, "Jordan Arms Briefing Book," October 1985]

THE DANGER TO ISRAEL FROM JORDANIAN MOBILE HAWKS

Upgrading the capabilities of Jordan's Improved Hawks would significantly enhance Jordanian offensive capabilities.

First, an Arab attack on Israel is most likely to occur if it is supported by effective antiaircraft weapons to protect the advance of the ground forces. Israel's aircraft are its first line of defense, and any system that reduces their effectiveness increases the chances for an attack.

The mobile Improved Hawk can give Jordan the air defenses it needs in order to participate in an attack against Israel. In 1973, the Jordanians lacked air defenses, and so they limited their participation to an expeditionary force that fought in Syria under the cover of Syrian air defenses.

In contrast, the acquisition of sophisticated air defense systems made possible the Egyptian and Syrian attacks against Israel in 1973. These air defenses destroyed a significant number of Israeli aircraft, made it possible for Egypt to successfully attack across the Suez Canal, and almost allowed Syrian ground forces to seize the Golan Heights. This demonstrates how antiaircraft defenses can play a vital role in making possible an offensive against Israel.

Second, Israel's small size means that Improved Hawk missile batteries located on Jordan's border can hit aircraft flying over nearly half of the country. Jerusalem is less than 20 miles from Jordan, while the Improved Hawk has a range of 25 miles. Thus, even if Improved Hawk batteries are deployed at a distance from the Israeli border, they can threaten aircraft over much of

Israel. Even the potential presence of such batteries would force Israeli aircraft flying over much of Israel to operate as if they were in enemy-controlled territory.

Third, the upgrades to the Hawk would increase the lethality of the Hawk, and make it harder for Israel to locate and attack the firing units. For example, the upgrades could include the new agile continuous wave acquisition radar (ACWAR) that employs sophisticated phased array technologies. Such a system could not be jammed by Israel's existing countermeasures equipment.

Finally, Jordan's current Improved Hawk missiles are emplaced in concrete, and cannot be moved. In contrast, the new equipment would be *mobile.* Such an acquisition would strengthen Jordan in three ways:

(1) Increased survivability.—Because the existing launchers are emplaced in concrete, their precise location can be identified, facilitating attacks against them. In contrast, the new units can be moved, so that Israel would have to constantly monitor their activity in order to locate them. Since the difficulty in locating air defense equipment is its biggest defense against attack, the mobile missiles would be harder to locate and destroy than those in static emplacements.

(2) Support for offensive operations.—Mobile Improved Hawks can provide protection to ground formations attacking anywhere along Israel's long and vulnerable border, while the existing missiles are deployed in such a way that they would provide only minimal support for offensive operations. It is impossible to concentrate static missiles in forward battle areas, and the existing missile units cannot be advanced to protect attacking units.

(3) Increased effectiveness.—The mobile missiles can fill gaps between existing missiles, or be rapidly moved to new areas in order to ambush attacking aircraft. Israel knows where the existing Hawk batteries are located, making it possible to minimize the danger posed by the Hawk missiles to Israeli aircraft. In addition, the mobile Hawk is designed to use leap-frogging tactics: a fire section can be moved forward under the cover of the rest of the battery; once the advanced fire section is in place, it can protect other fire sections as they are sent forward.

Hawk Training, Readiness Geared to Fixed Positions

Zarqa, Jordan.—Jordanian Improved Hawk surface-to-air missile crews rely heavily on realistic training against low-altitude Royal Air Force fighter aircraft trying to penetrate the missile's area of coverage and on readiness rates to compensate for the vulnerability of fixed air defense positions.

A U.S. condition for the sale of 14 batteries of Raytheon Hawk missiles was that the weapons would be tied to fixed locations to avoid presenting a possible threat to Israel.

The procurement for Jordan was backed financially by Saudi Arabia.

NEW GUNS

Improved Hawk batteries in Jordan are surrounded by mobile air defense guns. But these guns, while they provide some protection for missile crews against low-level aircraft, are generally obsolete and need to be replaced.

During a recent visit to a Royal Jordanian Air Force Hawk battery located in the hills between this industrial city and Mafraq to the north, this Aviation Week & Space Technology editor had an opportunity to observe training and battery operations at a fixed site.

The position is a blacktop surfaced area atop a hill 760 meters (2,432 ft.) high surrounded by a series of hills that run north and west toward the Syrian border. Major components of the missile system are mounted with large bolts in concrete so that they cannot be repositioned, even within the fixed battery site.

The Air Force provided a Sikorsky S-76 helicopter from No. 7 Squadron for the flight from King Abdullah air base near Amman to the Hawk battery and to Jordanian air bases.

The flight crew for the mission to the battery was Maj. Nazih Said in the right seat, and Lt. Bashir Khasawneh as copilot. At takeoff the visibility was approximately 100 ft. horizontally and 150 ft. vertically as a heavy fog surrounded the Amman international airfield. Using instrument flight rules, we took off in the S-76 from Runway 24, climbed through the fog at an altitude of 5,000 ft. and picked up a heading of 60 deg. toward our destination approximately 35 km. (21.7 mi.) northeast.

The fog thinned but not until we had already flown over the Hawk battery's position, which was still engulfed. At the end of the fog bank, we descended to an altitude of approximately 200 ft., turned and flew back into the fog at the low altitude to try and pick out reference points to guide the helicopter to the Hawk position. Once inside the fog, visibility was sufficient so that we could pick up landmarks and navigate.

A Royal Army training area in the hills below the battery could be observed, and the main road leading from Zarqa and Mafraq to Iraq was sighted with a convoy of trucks headed for the Iraqi border. The training area runs north from the battery to within 10 mi. of the Syrian border. The Mach 2.7 Hawk has a 40-naut.-mi. range.

We landed on a pad near the battery headquarters. The Hawk unit is commanded by Maj. Mohammad Gwesmeh. He explained the operations and training of the unit, adding that until the past year, test firing with the Hawk missile was accomplished in the U.S. Now, however, firing is conducted in Saudi Arabia for selected members of Jordanian Hawk units.

AIR DEFENSE

This battery is a standard Hawk unit, one of a number in the central group for air defense. It is positioned to protect not only the high value industrial complex in Zarqa, but Royal air bases north and east against Syria, and to the west against Israeli aircraft.

The Hawk site is close enough to Israel's northern border so that Israeli aircraft can reach the position at low altitude within 1.5 min., the major said. Approximately the same warning time exists for Syrian fighters, but lack of advanced avionics forces them to operate at medium-to high-altitudes, not the low flight levels of the Israeli Air Force/General Dynamics F-16s that constitute the basic threat to the Hawk missile sites.

The battery headquarters at the position is in the saddle of a ridgeline and the missile launchers are located on fingers of the hill, leading off in several directions. They are positioned to provide overlapping coverage.

M-42 Duster air defense guns are located on the outer perimeter of the site to provide limited protection for the missile crews.

Jordan needs at least 25 Hawk batteries in a mobile configuration and could absorb and operate effectively 28 batteries composed in assault firing platoons, air defense officers here said. "The mobility is more important than additional numbers of launchers," according to Maj. Gwesmeh.

Under the U.S. Army's Improved Hawk concept, an assault fire unit can be split off from a standard battery as an independent element to enhance mobility and area coverage. But this is not possible here when the batteries are fixed in position.

The assault fire unit is especially suited for gap filler missions requiring minimum numbers of personnel and configured for autonomy, low-altitude air defense.

The assault unit can be employed to extend air defense closer to the forward edge of the battle area. An improved assault fire unit split off from a battery includes:

A continuous wave acquisition radar.

An improved platoon command post.

An illuminator.

Three launchers, each armed with three Hawk missiles.

TARGET TRACKING

Battery training here is constant, with a high volume of aerial targets to track with the radar systems of the battery. Aircraft taking off from and approaching the international airport in Amman pass this way often, and nearby fighter bases provide targets of opportunity for radar acquisition and tracking.

The Hawk missile batteries operated by Jordan came both from the U.S. Army inventory and off the Raytheon production line. The first three batteries came directly from Army units.

BATTERY EQUIPMENT

The major items of equipment associated with an Improved Hawk battery are:

Pulse acquisition for detection of medium-to-high altitude targets.

Continuous wave radar for low-altitude target detection.

Manual and electronic target processing within control central centers.

Range-only radar, a J-band pulse radar.

Illuminator designed to illuminate the target with radio frequency energy and to provide a reference signal to the missile.

Hawk (homing all the way killer) missile, a semiactive homing weapon with proportional guidance for navigation.

Detection of a target occurs when the parameters from the acquisition radar meet criteria from the automatic data processor selection. The target is then eligible for automatic threat ordering.

The automatic data processor identifies the target by correlating with identification friend or foe returns. The automatic data processor designates a firing section to engage a target. The high-power illuminator locks on and tracks the designated target throughout the air defense engagement.

The high-power illuminator provides data to the selected launcher to aim and fire the missile. The target intercept evaluation function of the battery begins after the missile warhead detonates. The fire control officer, using the high-power illuminator Doppler data, determines whether or not the missile has destroyed the target, or if other missile launches are required.

CLUTTER REJECTION

The pulse-acquisition radar of the system operates in L-band frequency. It uses moving target-indication circuits to provide high clutter rejection and staggered pulse repetition rate to minimize moving-target-created blind speeds within the unambiguous range coverage.

The sensor includes several advanced electronic counter-countermeasures receivers designed to overcome specific types of jammers.

Off-the-air tuning permits frequency changes to avoid enemy jamming.

Low-altitude target detection is provided by the improved continuous wave radar operating in X-band in alternating continuous wave and frequency modulated/continuous wave modes to provide range rate and range data.

The X-band frequency allows the well-defined antenna lobe to be positioned very low in altitude to provide coverage of low-flying aircraft down to the horizon.

The improved acquisition radar and the pulse acquisition radar are synchronized at a scan rate of 20 rpm. The frequency modulation is applied at a rate asynchronous to the scan rate to prevent dead coverage during frequency-modulated sawtooth flyback at the same azimuth on successive scans.

With a new single-sideband unit that separates the approach and recede sidebands, the improved continuous-wave acquisition radar can handle high-speed targets. The receiver is split into main and side receiver to blank strong sidelobe signal responses as well as electronic countermeasures.

Analog output of the receivers is converted for a digital signal processor using a time compression technique to process the complete Doppler spectrum in 29 filters. This signal processor detects approaching targets and processes the digital output into the automatic data processor.

An analog output also is available for display on the azimuth speed indicator and planned speed indication displays in the battery control central.

Gwesmeh explained that range-only radar operates in J-band to establish range on an aircraft target when an illuminator is unable to obtain this information because of countermeasures.

The range-only radar can generally remain free from jamming by staying in a receive only mode and scanning its tunable radio frequency bandwidth for the presence of jamming. During a tactical engagement, the radar may be called automatically by an illuminator or it can be operated manually.

TARGET SEARCH

The illuminator searches a designated elevation sector for targets, locks on reflected energy and tracks the target in radial speed and angular position. It can acquire high-speed targets, track small cross-section targets and perform with short acquisition and data processing time. It also has an electronic counter-countermeasures capability.

The illuminator operates in J-band with continuous wave low altitude and sector search capabilities and feed through nulling.

The Hawk missile seeker is solid state, including the microwave local oscillator. The design provides high gain and good sidelobe control for a limited aperture size, as well as being capable of a monopulse tracking scheme.

The receiver is an inverse monopulse design where the bandwidth is narrowed to its ultimate very near the front end. The inverse technique eliminates large signals and some electronic countermeasures that restrict dynamic range of conventional receivers.

WARHEAD DESIGN

The Improved Hawk missile uses a fragment pattern warhead design tailored to provide a high kill probability at large miss distances to increase the single-shot kill probability against multiple targets.

The launcher slews to azimuth and elevation angles of the illuminator, and provides power to activate missile gyros, electric and hydraulic power supplies. After the launcher aims the missile at a target and the gyros are up to speed, a lead angle command is sent from the automatic data processor to the launcher through the illuminator.

The seeker head is space stabilized and the missile body is pointed at the lead angle. The launcher activates the missile motor for launch.

The launcher is equipped with electronic cutouts and sensing circuits to allow a shoot-around capability for obstructions in the field of fire.

This permits missile shots in all emplacement situations.

The commander here explained that most of the air defense personnel in the Royal Air Force are professional military and remain in the field 10–15 years, moving from one Hawk battery to another.

Mr. KENNEDY. Mr. President, I send a joint resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The joint resolution will be stated.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 223) to prohibit the sales of certain advanced weapons to Jordan.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

Mr. BYRD. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard to the second reading.

The resolution will remain at the desk, pending its second reading, until the next legislative day.

The joint resolution reads as follows:

SENATE JOINT RESOLUTION 223

Mr. KENNEDY (for himself, Mr. HEINZ, Mr. INOUYE, Mr. KASTEN, Mr. CRANSTON, Mr. BOSCHWITZ, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BAUCUS, Mr. BENTSEN, Mr. BIDEN, Mr. BINGAMAN, Mr. BOREN, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. BYRD, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DIXON, Mr. DODD, Mr. DURENBERGER, Mr. EAGLETON, Mr. EXON, Mr. FORD, Mr. GLENN, Mr. GORE, Mr. GORTON, Mr. GRASSLEY, Mr. HARKIN, Mr. HART, Mrs. HAWKINS, Mr. HECHT, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUMPHREY, Mr. JOHNSTON, Mr. KERRY, Mr. LAUTENBERG, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. MATSUNAGA, Mr. MATTINGLY, Mr. MCCONNELL, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. PACKWOOD, Mr. PELL, Mr. PRESSLER, Mr. PROXMIRE, Mr. PRYOR, Mr. RIEGLE, Mr. ROTH, Mr. ROCKEFELLER, Mr. SARBANES, Mr. SASSER, Mr. SIMON, Mr. SPECTER, Mr. SYMMS, Mr. TRIBLE, Mr. WEICKER, and Mr. WILSON) introduced a joint resolution (S.J. Res. 223), which reads as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

DISAPPROVAL OF PROPOSED SALES

SEC. 1. Prior to the commencement of direct bilateral negotiations between Jordan and Israel, the President may not issue a letter of offer with respect to any of the proposed sales to Jordan of advanced weapons systems, including advanced aircraft and advanced air defense systems, that are described in numbered transmittals pursuant to section 36(b) of the Arms Export Control Act submitted to the Congress on October 21, 1985. Transmittal Nos. 86-05A, 86-05B and 86-06.

PROHIBITION OF DELIVERIES

SEC. 2. If a letter of offer has been issued for any sale described in Section 1 of this Act before the enactment of this Act and that letter of offer is accepted, the President shall make no deliveries to Jordan pursuant to that sale without specific authorization by the Congress.

Mr. BYRD. Mr. President, I wish to state for the record why I objected, so that that objection will not be misunderstood.

This is the procedure for forcing the resolution on the calendar. Mr. KENNEDY appropriately made the request for both readings, under rule XIV. It was necessary that there be a second objection, and that is why I made the objection. I have no personal objection to taking up the matter, and I believe I am a cosponsor of the resolution.

Mr. CRANSTON. Mr. President, I am delighted to join with the Senator from Massachusetts [Mr. KENNEDY] in taking the steps we have taken today in opposition to the Jordanian arms sale. I believe it would not be in the security interests of the United States to escalate the arms race in the Middle East. That can only lead to greater expenditures for military purposes, less stability in that explosive part of the world, new dangers for our own security interests in that part of the world, and new dangers for the only certain democracy and our No. 1 ally in the Middle East—Israel.

I have been delighted to work with the Senator from Massachusetts and others in gathering signatures on the resolution of disapproval on the proposed Jordan arms sale. I will do my best to see that this Congress does not approve of this sale. I believe it is not in our national security interests.

I have great respect for King Hussein of Jordan and his efforts to be cooperative in the peace process. Beyond Anwar Sadat, he has been the most vocal Arab leader in the Middle East over the past few decades talking of the need to achieve peace with Israel and the other countries presently involved in a state of war with Israel. But while Egypt actually managed to make peace with Israel, King Hussein has continued only to talk about peace. Peace between Jordan and Israel never has been established. There never has been an end to the

state of war between Jordan and Israel.

Many of the conditions of belligerency remain between Israel and Jordan. The Government of Jordan does not recognize the Government of Israel and in effect does not recognize yet the right of the nation of Israel to exist. It seems to me to be very unwise to provide arms to Jordan under these circumstances.

I have discussed what the implications would be with Prime Minister Peres and Foreign Minister Shamir. I asked both of them what would be the consequences in terms of Israel's economy and military budget if this Jordan arms sale went through. And both leaders replied, in effect:

> We would have to abandon the efforts we are making—like efforts that are being made in your own country—to restrain military spending. We would have to spend more, not less, on military matters. That would do great harm to an economy that already is in considerable difficulty.

Along with the proposed Jordanian arms sale, we are considering, and probably will soon have before us, a request from the Reagan administration for arms sale to Saudi Arabia which could total as much as $3 billion on top of the $1.9 billion sale for Jordan. That would be an escalation of military expenditures of $5 billion in the Middle East for arms to nations in a state of war with Israel. I do not see how this would serve our national interests.

I asked Secretary of State Shultz, when he was before the Foreign Relations Committee, who would pay for the arms sales to Jordan. He, replied frankly that American taxpayers would be required in part to pay. We would have to have an appropriation to loan money to Jordan so that they could purchase the arms in the United States. Thus, we, in effect would be escalating the situation where we provide arms in one way or another, at costs to American taxpayers, to both sides in an arms race. And that seems to me to be folly.

There is no objection on the part of this Senator, no objection on the part of any that I know of, to making arms available to Egypt because Egypt has worked out a peace with Israel, our ally, No. 1 ally in the Middle East. And if Jordan is able to follow through on all the talk about peace and engage in negotiations that actually lead to a resolution of the state of war and to the establishment of peace between Jordan and Israel, then if Jordan feels a need for arms because to threats from Syria and elsewhere, we should be willing to proceed to provide those arms.

I, for one, do not believe that we should provide arms under present circumstances. Nor do I believe that we should provide arms to Jordan simply if Jordan enters into discussions with Israel. That is not enough. Discussions can go on for years and for decades, as we found out in the efforts to negotiate a peace with North Vietnam. The talks went on for years and years without progress. So for me simply sitting down and talking would not be enough. We would have to have talks that lead to positive acts for the establishment of peace between Jordan and Israel. And I will do my best to see that we do not approach an arms sale until that condition is met.

Mr. HEINZ. Mr. President, I rise today to join my distinguished colleague from Massachusetts, Senator KENNEDY, in introducing a joint resolution disapproving the administration's request for the sale of advanced weapons to Jordan. Our resolution says that prior to the commencement of direct bilateral negotiations between Jordan and Israel, the United States should not sell advanced fighter aircraft, mobile anti-aircraft missiles, or any other advanced arms to Jordan.

Our resolution neither excludes the possibility of a long-term security relationship with Jordan, nor our future support for such a relationship. But, such support cannot be based on King Hussein's good intentions. It can only be based on his actions. Mr. President, the sentiment remains strong among Republicans and Democrats alike, that selling advanced weapons at this time, prior to direct negotiations between Israel and Jordan, is premature and unwarranted. This is the basic precondition to any long-term security relationship between Jordan and the United States. And the fact of the matter is, Mr. President, that direct negotiations do not now exist.

We all welcome King Hussein's statements 3 weeks ago at the United Nations and during his visit to Washington that he is prepared to negotiate with the Government of Israel, promptly and directly, under the basic tenets of United Nations Security Council Resolutions 242 and 338. We applaud King Hussein's efforts to revive the peace process and hope that his efforts can bring a lasting peace to the Middle East. President Reagan is correct when he says that, "We must be prepared to support those who take risks for peace." Indeed, our approval last June of $250 million in new economic aid to Jordan should be viewed as our strong encouragement for King Hussein's efforts.

However, we cannot accept the King's public statements of intent, as welcome as they are, as being sufficient concrete progress toward peace with Israel to warrant a transfer of advanced weapons to Jordan. For that reason, we think the timing of the administration's request for such an arms sales is unfortunate. By introducing the controversial issue of weapons sales to Jordan at this time, when concrete progress in the peace process may finally be possible, the administration is raising unnecessary and potentially insurmountable obstacles to continued progress toward negotiations between Jordan and Israel.

Mr. President, we are not seeking a deliberate confrontation with the administration on this issue. Indeed, we have shown the utmost restraint in pressing our conviction that the time is not right for the sale of advanced weapons to Jordan.

Last June, 73 Senators cosponsored Senate Resolution 177 opposing the sale of advanced weaponry to Jordan until King Hussein enters into direct negotiations with Israel. On September 9, after learning of the administration's intention to try again to submit a request for the sale of advanced weaponry to Jordan, I wrote to Secretary Shultz reiterating our opposition to any sale until the King enters into direct negotiations with Israel and asking him to take into consideration the views of the majority of the Congress on this issue.

On September 26, 23 of the 26 Republican cosponsors of Senate Resolution 177 sent a letter to the President, reiterating our opposition to the sale and urging him to consult further with us prior to the submission of a request for the sale of any sophisticated weapons for Jordan. The very next day, the President transmitted to Congress advance notification of the proposed sale.

Finally, Mr. President, I wrote again to Secretary Shultz just a few days ago, informing him that more than half of the Senate Republicans and two-thirds of the Senate had already come out against the proposed sale, and urging him to postpone indefinitely bringing formal notification before the Congress. On Friday, the Republican leadership warned the administration that the sale would have little chance of success. Nevertheless, formal notification has come just the same.

Mr. President, I do not question King Hussein's sincerity when he says he is prepared to enter into direct negotiations with Isreal. But, I am even more concerned today than I was several months ago when we introduced Senate Resolution 177 about both his ability to deliver the PLO to the negotiating table committed to U.N. Resolution 242 and 338, and Israel's right to exist and his desire to allow the Soviet Union and all the parties to the conflict a place of prominence at the negotiating table.

Mr. President, despite King Hussein's assertion of the PLO's commitment to U.N. Resolutions 242 and 338, Yaser Arafat still has not explicitly stated such a commitment. The tragic affair of the Italian cruise ship, *Achille Lauro*, raises serious questions about the PLO's ability or even willingness

to participate in the Middle East peace process.

The PLO's performance in London last week was also disturbing. Since February, Mr. President, Jordan and the Palestinians have sought to have such a joint Jordanian-PLO delegation received by a Western leader. But last week's meeting in Britain was called off when one of the two PLO representatives refused to sign a statement, which Britain and Jordan said had been previously agreed upon, renouncing terrorism and violence and recognizing Israel's right to exist.

Doesn't this repudiate Arafat's alleged commitment to King Hussein when they started their joint peace move last February? How is it possible to believe that the PLO is committed to U.N. Resolutions 242 and 338, when at every opportunity to explicitly state such a commitment, they refuse to do so.

Indeed, in the aftermath of the hijacking of the *Achille Lauro* and the diplomatic failure in London, how can we draw any other conclusion than that the PLO is a dangerous and irresponsible partner for peace and remains committed to the destruction of Israel.

In addition, although the King has called for direct negotiations with Israel, he continues to do so under so-called appropriate auspices, which he defines as an international conference hosted by the Secretary General of the United Nations to which the five permanent members of the Security Council and all the parties of the conflict would be invited. Mr. President, two of the five permanent members of the Security Council have no relations with Israel. And, as far as all parties of the conflict are concerned, although King Hussein may be ready to recognize and negotiate directly with Israel, the Soviet Union, Syria, and the PLO are not.

Mr. President, we especially do not need the good offices of the Soviet Union—a nation which broke off relations with Israel almost 20 years ago—to bring peace to the Middle East. The Soviets continue to stand for all that is wrong in that troubled region: terrorism, subversion, and the direct support of nations dedicated to the destruction of the State of Israel. While we can appreciate the King's desire to buffer himself against radical Arab States, allowing the Soviets a place of prominence will only lend further credibility to those who seek to sabotage an Israeli-Jordanian peace agreement.

Mr. President, we also understand Israel's concern that her security should not be put in jeopardy as the result of a transfer of highly sophisticated weaponry to a neighbor that has not yet in concrete and irreversible ways committed itself to the peace process. At a time when Israel's defense forces are attempting to reconstitute themselves and when Israel is addressing serious economic problems caused in part by a heavy defense burden, it would be wrong for us to up the military ante by providing Jordan with sophisticated weapons. And, who is to say, Mr. President, that in this volatile region of the world, where the cycle of terrorism refuses to abate, that these weapons won't fall into Soviet, Syrian or PLO hands at some future time.

Finally, Mr. President, I believe that going ahead with the Jordan arms sale under today's conditions will weaken the Government of Israel led by Shimon Perse and its ability to accept risks in the peace process.

In short, we cannot, in all good conscience, support the sale of sophisticated arms to Jordan at this time when so many obstacles to constructing a meaningful peace process have yet to be resolved. When negotiations between Israel and Jordan actually go forward, that is the time to consider Jordan's request for sophisticated weapons.

Mr. President, it is my hope that King Hussein succeeds in moving the peace process forward in such a way that can lead to direct negotiations with Israel. We join President Reagan in his hope that negotiations can begin before the end of the year. It is my expectation that on the basis of such results this Nation will then examine the need to enter into a long-term security relationship with Jordan. But such a relationship can only be based on results, as words alone cannot suffice, and it is the goal of our resolution to insure that until such time as Jordan actually sits down in direct peace negotiations with Israel, the instruments of war will not ensnare the efforts to bring peace to the area.

I ask unanimous consent that certain additional material be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, DC, October 18, 1985.

Hon. GEORGE SHULTZ,
Secretary of State, Department of State, Washington, DC.

DEAR SECRETARY SHULTZ: Once again, I am writing to express my very deep concern about the President's intention to forward a request to the Congress for the sale of advanced weapons to Jordan.

As you know, Senator Kennedy and I have been circulating a draft resolution of disapproval of the arms sale to Jordan. The other original sponsors are Senators Bob Kasten, Rudy Boschwitz, Daniel Inouye and Alan Cranston. More than 67 Senators have already agreed to be cosponsors of this legislation—including a majority of all Senate Republicans. I anticipate additional cosponsors over the weekend.

Mr. Secretary, I believe that the fate of the proposed arms sale is crystal clear and I urge you now to postpone indefinitely bringing formal notification before the Congress. We applaud King Hussein's efforts to advance the peace process, and we hope that his efforts can bring lasting peace to the Middle East. Our approval last June of $250 million in new economic aid to Jordan should be viewed as our strong encouragement for King Hussein's efforts. But, the sentiment remains strong among Republicans and Democrats alike that selling advanced weapons at this time, prior to direct negotiations between Israel and Jordan, is premature and unwarranted.

It is my hope that you will take into full consideration the views of the majority of the Congress on the important issue of arms sales to Jordan.

Sincerely,

JOHN HEINZ,
U.S. Senator.

U.S. SENATE,
Washington, DC, September 26, 1985.

President RONALD REAGAN,
The White House, Washington, DC.

DEAR MR. PRESIDENT: We are writing to express our very deep concern about the Administration's intention to submit requests for new major arms sales to Jordan.

As you know, we have cosponsored Senate Resolution 177, opposing the sale of advanced weaponry to Jordan until King Hussein enters into direct negotiations with Israel. All told, 73 Senators cosponsored this legislation.

We remain firmly convinced that the circumstances under which Senate Resolution 177 was orignially offered have not changed. The sale of advanced weapons or sophisticated aircraft to Jordan can never be justified until the Jordanian government joins the Camp David Peace Process and begins direct negotiations with Israel. Until that happens, such sales will jeopardize both the security of Israel and progress toward peace in the Middle East.

Further confirmation of the sense of the Senate on this issue, indeed the sense of the entire Congress, can be found in the International Security and Development Cooperation Act of 1985, which you signed into law on August 8, 1985. Section 130(c) specifically states that there must be a Presidential certification of Jordan's public commitment to the recognition of Israel and to negotiate promptly and directly with Israel.

Mr. President, we do not believe you can make such a certification at this time. It is clear that King Hussein cannot recognize Israel or begin direct negotiations until Yasser Arafat is prepared to do so as well. Despite King Hussein's assertions to the contrary, we've heard no explicit statements from Yasser Arafat on the subject at all.

In Secretary Shultz's June 20, 1985 letter to Senator Kasten regarding the administration's special request for economic assistance for Jordan, he assured him that, "prior to the submission of any request relating to the provision of arms to Jordan, the Administration will engage in broad-based and constructive consultations with the Senate, seeking the development of a true consensus that such transfers are appropriate."

Mr. President, we urge you to consult further with us prior to the submission of a request for the sale of any sophisticated weapons for Jordan.

Sincerely,

Alfonse D'Amato, John Heinz, Larry Pressler, Don Nickles, Frank Murkowski, Chuck Grassley, Mark Andrews, Bill Armstrong, Bill Cohen, Dan

Quayle, Mack Mattingly, David Durenberger.

Lowell Weicker, James Abdnor, Chic Hecht, Mitch McConnell, Paula Hawkins, Arlen Specter, Pete Wilson, Bob Packwood, Gordon J. Humphrey, Bob Kasten, Jr., Rudy Boschwitz.

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, DC, September 9, 1985.

Hon. GEORGE P. SHULTZ,
Secretary, U.S. Department of State, Washington, DC.

DEAR MR. SECRETARY: I am writing to express my very deep concern about the administration's reported intention to submit requests for new major arms sales to Jordan.

As you know, Senator Kennedy and I sponsored S. Res. 177, opposing the sale of advanced weaponry to Jordan under current circumstances. All told, 71 of my Senate colleagues joined us in cosponsoring this legislation—and indication of the depth of Senate opposition.

I remain firmly convinced that the circumstances under which S. Res. 177 was originally offered have not changed. The sale of advanced weapons or sophisticated aircraft to Jordan can never be justified until the Jordanian government joins the Camp David Peace Process and begins direct negotiations with Israel. Until that happens, such sales will jeopardize both the security of Israel and progress toward peace in the Middle East.

Further confirmation of the sense of the Senate on this issue, indeed the sense of the entire Congress, can be found in the International Security and Development Cooperation Act of 1985, which was signed into law on August 8, 1985. Section 130 specifically states that no notification may be made with respect to advanced arms sales to Jordan unless that country "is committed to the recognition of Israel and to negotiate promptly and directly with Israel under the basic tenets of United Nations Security Council Resolutions 242 and 338."

Mr. Secretary, in your June 20, 1985 letter to Senator Kasten regarding the administration's special request for economic assistance for Jordan, you assured him that, "prior to the submission of any request relating to the provision of arms to Jordan, the administration will engage in broad-based and constructive consultations with the Senate, leading to the development of a true consensus that such transfer are appropriate."

It is my hope that such consultations will take place and that the Congress will have ample opportunity to express its views opposing any request for new arms sales to Jordan.

Sincerely,

JOHN HEINZ,
U.S. Senate.

---

73 COSPONSORS OF JORDAN RESOLUTION INTRODUCED JUNE 4, 1985

DEMOCRATS—47

Kennedy, Edward M.; Baucus, Max; Bentsen, Lloyd; Biden, Joseph R., Jr.; Bingaman, Jeff; Boren, David; Bradley, Bill; Bumpers, Dale; Burdick, Quentin N.; Byrd, Robert C.; Chiles, Lawton; Cranston, Alan; DeConcini, Dennis; Dixon, Alan J.; Dodd, Christopher J.; Eagleton, Thomas F.; Exon, J. James; Ford, Wendell H.; Glenn, John; Gore, Albert, Jr.; Harkin, Tom; Hart, Gary; Heflin, Howell; Hollings, Ernest F.; Inouye, Daniel K.; Johnston, J. Bennett; Kerry, John F.; Lautenberg, Frank R.; Leahy, Patrick J.; Levin, Carl; Long, Russell; Matsunaga, Spark M.; Melcher, John; Metzenbaum, Howard M.; Mitchell, George J.; Moynihan, Daniel Patrick; Nunn, Sam; Pell, Claiborne; Proxmire, William; Pryor, David; Riegle, Donald W., Jr.; Rockefeller, John D., IV; Sarbanes, Paul S.; Sasser, Jim; Simon, Paul; Stennis, John C.; Zorinsky, Edward.

REPUBLICANS—26

Heinz, John; Abnor, James; Andrews, Mark; Armstrong, William L.; Boschwitz, Rudy; Cohen, William S.; D'Amato, Alfonse; Danforth, John C.; Durenberger, Dave; Gorton, Slade; Gramm, Phil; Grassley, Charles E.; Hawkins, Paula; Hecht, Chic; Humphrey, Gordon J.; Kasten, Bob; Mattingly, Mack; McConnell, Mitch; Murkowski, Frank H.; Nickles, Don; Packwood, Bob; Pressler, Larry; Quayle, Dan; Specter, Arlen; Weicker, Lowell P., Jr.; Wilson, Pete.

SENATE RESOLUTION 177 INTRODUCED JUNE 4, 1985 AND REFERRED TO THE COMMITTEE ON FOREIGN RELATIONS TO ASSURE ISRAEL'S SECURITY, TO OPPOSE ADVANCED ARMS SALES TO JORDAN, AND TO FURTHER PEACE IN THE MIDDLE EAST

Resolved, Whereas Israel, is a stable, democratic and reliable ally of the United States;

Whereas the security of Israel is in the national interest of the United States;

Whereas Jordan continues to oppose the Camp David peace process;

Whereas Jordan has aligned with Iraq, whose government is committed to the destruction of Israel;

Whereas Jordan is purchasing advanced weapons from the Soviet Union;

Whereas the sale of advanced arms to Jordan would jeopardize the security of Israel and increase the overall instability of the region;

Whereas promises to sell advanced U.S. arms to Jordan set the stage for an unnecessary and divisive confrontation with Congress; and

Whereas an escalation of the arms race in the Middle East is contrary to the interests of the United States, Israel and Jordan.

It is the sense of the Senate of the United States of America that:

1. The United States should not sell advanced fighter aircraft, mobile anti-aircraft missiles, or any other advanced arms to Jordan under present conditions, in which Jordan continues to oppose the Camp David peace process and purchases arms from the Soviet Union, and in which such sales jeopardize both the security of Israel and progress towards peace in the Middle East.

2. The United States should ensure that Israel retains its qualitative military edge over any combination of Mideast confrontation states.

3. The United States should focus its efforts on bringing Jordan into direct peace negotiations with Israel.

Mr. HEINZ. Mr. President, I am, of course, very pleased that there are 74 cosponsors of the resolution. It has strong bipartisan support. We have 29 Republicans, more than half of the Republican Members of the Senate. Because I think we all have a very great deal of respect for Jordan's King Hussein, some people may wonder why there is such strong bipartisan support for this resolution. Certainly, we applaud his efforts to advance the peace process and hope that his efforts can bring a lasting peace to the Middle East. Indeed, our approval last June of some $250 million in new economic aid to Jordan should be reviewed as our strong endorsement for the King's efforts.

What I think we need to be careful of, and the reason that so many of us have joined in introducing this resolution, is that we are concerned about putting everything up front and having no leverage left afterward. It is one thing for the King to say in his public statements of intent that he is prepared to negotiate with the Government of Israel promptly and directly, under the basic tenets of U.N. Security Council resolutions 242 and 338. It is another for Jordan to actually sit down in direct negotiations with Israel. Our resolution simply says that we will disapprove any such arms sale until direct, bilateral negotiations between Jordan and Israel have in fact, begun.

In short, you might say that what we want is performance, not promises or statements of intent. Direct negotiations between Israel and Jordan is the basic precondition that we believe would lead to a long-term security relationship of the type contemplated by the long-term national security relationship of the type contemplated by the President between ourselves and Jordan.

I would only add that this seems to be an unfortunate time for the peace process in the Middle East. We all have great hopes for the peace process. But, frankly, the hijacking of the *Achille Lauro* and the hijackers' possible links to Abbas and the PLO and Yasser Arafat raise some serious issues. The refusal of a PLO member of joint Jordanian-PLO delegation in London to affirm Israel's right to exist and renounce terrorism also poses a serious problem. The prospects for moving the peace process in the right direction do not look as bright as we would like them to look.

Therefore, in light of those events, some of my colleagues doubt even more, not the willingness of the King, but the ability of the King at this time to deliver a Palestinian delegation to the negotiating table committed to United Nations Resolutions 242 and 338 and, most importantly, Israel's right to exist.

Mr. President, I thank my colleagues for their attention on this matter. I very much appreciate the cosponsorship of the resolution. I have appreciated the good working relationship of the Senator from Massachusetts in this matter, along with Senator INOUYE, Senator KASTEN, Senator CRANSTON, and Senator BOSCHWITZ. All

have been a very important part of this effort.

Mr. SPECTER. Mr. President I want to express my strong opposition to the administration's proposal to sell $1.9 billion in advanced arms to Jordan.

It is my sense that the United States should not proceed with such an arms sale to Jordan until Jordan recognizes the State of Israel and takes concrete and affirmative steps to commence direct peace negotiations with the State of Israel.

I am pleased to cosponsor the resolution of disapproval that the administration not proceed with this sale of arms to Jordan. A sense of the Senate resolution had 73 cosponsors. In addition, that resolution also had the support of over half of the Members of the House of Representatives.

I had the opportunity to meet with King Hussein of Jordan during his recent trip to Washington. At this meeting King Hussein pledged to end the state of belligerency between Israel and Jordan. Although he made this statement to a group of Senators, I question King Hussein's long term commitment in light of the Jordanian delegation walking out of the United Nations General Assembly during Israeli Prime Minister Shimon Peres' recent address.

I believe that the arms sale should not proceed for several reasons. The sale to Jordan will have an adverse affect on Jordan's willingness to move forward in the peace process. If the United States agrees to provide these weapons, the United States will have made it clear that Jordan can stand still in the peace process and still get the arms it desires.

Supplying these weapons will erode Israel's margin of security, thereby increasing the importance of the strategic depth offered Israel by the West Bank. This will also weaken the Government of Israel and their ability to accept risks in the peace process. This air defense package will increase Jordan's offensive capabilities by providing them with a means of countering the cornerstone of Israel's defense, its air superiority.

Providing sophisticated arms to Jordan before they make peace with Israel would focus attention on the instruments of war rather than on efforts to bring peace to the area and would facilitate an Arab offensive along Israel's long and vulnerable border with Jordan.

In the 1970's, the United States waited until after Egypt entered direct peace negotiations with Israel before supplying arms to the Egyptians. This is a basic principle that also must be applied to Jordan. Providing Jordan with arms at this time would reward them for not moving forward in the peace process and discourage other Arab nations from participating.

I strongly believe that the Camp David accord is the only means to reach a peaceful settlement to the problems in the Middle East. A sale of advanced weapons would undermine the peace process set in motion by the Camp David accords.

Mr. President on October 10 I wrote to President Reagan expressing my opposition to this proposal and I ask that this letter be inserted in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, October 10, 1985.

The PRESIDENT,
The White House, Washington, DC.

DEAR MR. PRESIDENT: On October 1, 1985, a number of us met with King Hussein of Jordan during his visit to the Senate. During this meeting King Hussein declared the state of belligerency between Israel and Jordan to be over. Although King Hussein made this statement to members of Congress, he still is unwilling to make it publicly.

King Hussein claims to be committed to ending the state of belligerency between Israel and Jordan. I must question his commitment, however, in light of the recent action by the Jordanian delegation to the United Nations. The Jordanian delegation joined other Arab nations in walking out of the U.N. General Assembly on October 2 when Israeli Foreign Minister Yitzhak Shamir addressed this body. The Egyptian delegation remained.

King Hussein's approach to the peace process is entirely different from Anwar Sadat's. Sadat wanted the return of the territory, but in exchange for the Sinai, he was prepared to give Israel peace and diplomatic relations. King Hussein has not yet provided concrete evidence that he is willing to recognize Israel and begin direct negotiations.

The United States must not sell advanced weapons to Jordan until King Hussein is committed to negotiate with Israel. The Camp David Accord is the only framework for a peaceful solution to the Arab-Israeli conflict. There can be no peace without prior recognition of Israel's legitimacy.

In light of Jordan's unwillingness to enter direct negotiations with the State of Israel, I will oppose any sale of arms to Jordan until it takes concrete and affirmative steps to recognize the State of Israel and commence direct negotiations.

Sincerely,

ARLEN SPECTER.

NATIONAL BUSINESS WOMEN'S WEEK

Mr. DOLE. Mr. President, 57 years ago, the National Federation of Business and Professional Women's Clubs began National Business Women's Week, calling it a time "to dramatize women's contributions to the economic, social, and political life of the community, State, Nation, and the world." Each year since then, BPW has observed the week with special activities, seminars, and ceremonies in honor of women's contributions to the Nation's business and economic development. In recent years, the President has officially proclaimed the third full week of October as National Business Women's Week. Governors and mayors throughout the country have followed suit with similar proclamations at the State and local level.

The number of women in the work force has increased dramatically since the first observance of the week over half a century ago—it currently exceeds 47 million. Though barriers still remain for women entering the marketplace, many doors previously closed to them have been opened. Women's expanded opportunities in the business arena have been encouraged by the important work carried out by BPW in educating employers and the public in general about women's talents, abilities, and accomplishments. BPW continues this work through, for instance, its national council on the future of women in the workplace which honors employers who are particularly responsive to the needs and aspirations of their women employees.

This year, as in years past, BPW is joined by other women's organizations and businesses in paying tribute to women in the business sector. I join these groups in saluting these women and the vast contributions they have made to America's economy and work force.

THE HOLLINGS-RUDMAN AMENDMENT TO THE DEBT CEILING EXTENSION LEGISLATION

Mr. LEAHY. Mr. President, last week I voted for an amendment offered by Senators HOLLINGS, RUDMAN and GRAMM, a bipartisan effort to amend the labyrinthine budget process and balance the Federal budget by 1991. The decision to support the plan was one of the most thought-out ones I have had to make. It is tough medicine. But, the circumstances are far from ordinary.

The President of the United States asked Congress to increase the limit on the Federal debt to $2 trillion. The debt has grown so large in the last 5 years, that all of the Federal taxes paid by Vermonters this year will only pay the interest on our indebtedness for 2 days.

We, in the Senate, could not in good conscience vote to increase the debt limit to such enormous proportions unless some real action was taken to reduce deficits.

The amendment to the debt ceiling legislation sponsored by Senators HOLLINGS and RUDMAN had more than 40 cosponsors from both parties. It would require the President to submit a budget with deficits within certain limits until 1991, when the President must submit a balanced budget. Congress too must meet those deficit limits.

In order to live within our means, any new proposal for spending above the deficit limits would have to be offset by cuts in spending elsewhere or increased revenues.

In addition, if Congress fails to live up to its obligations, the President may order across-the-board cuts in most programs—defense including—until and unless Congress comes up with a better way of cutting excess spending.

Half of the excess spending would be reduced by cutting automatic increases in most entitlement programs. The programs themselves would not be reduced, only inflation adjustments would be limited. And Social Security would be exempt from the cuts, becuase the Social Security trust fund would be removed for the unified budget.

The Social Security trust fund is valued at more than $60 billion and was intended to pay for itself. It now does, with a $6 billion surplus this year and a projected surplus of $116 billion in 1990. The trust fund has been paying for itself, and more. By keeping the trust fund in the unified budget, we have used Social Security surpluses to wrongly hide the true size of the Federal deficit.

In addition, most means-tested entitlement programs were exempted from the automatic cuts in inflation adjustments. Means tested programs, such as child nutrition and Aid to Families with Dependent Children, serve the very poor, who can ill afford to have their assistance lag behind inflation. Cutting automatic inflation adjustments in these programs could drive thousands of Americans below the poverty level.

This aspect of the plan, I believe, is in keeping with our efforts to restore fiscal responsibility in Government, yet remain a compassionate and civilized Nation.

The other half of the automatic, across-the-board cuts would come from all domestic and defense discretionary programs.

A lot of confusion has surrounded the debate on the across-the-board spending cuts. The confusion stems from the rumor that the cuts are inevitable and automatic. Critics have suggested that the across-the-board mechanism may give the administration the tool it has always wanted to cut domestic social spending.

Mr. President, I hope I can clarify some of the confusion. The most important thing to remember about the across-the-board spending cuts is that they may only take effect if Congress passes a normal budget resolution with deficits exceeding certain targets. And those targets are modest by most accounts. Each year, $36 billion in spending would have to be reduced or raised through revenues. This year, the budget resolution cut and raised a total of $37 billion, and Congress was roundly criticized for not going far enough.

If the system works, the across-the-board cuts will never be ordered. In addition, Congress should be able to produce the savings required to live within the limits set.

To those who suggest that the administration will demand that Congress meet the deficit targets by cutting spending only and not raising any revenue, I think the record needs to be examined. The administration may not support raising individual tax rates, but has, itself, proposed a moderate minimum tax on corporations that have avoided taxation. The administration's corporate minimum tax would raise almost $10 billion.

In addition, in the unlikely event that across-the-board spending cuts may be ordered, the amendment prevents the President from picking and choosing which programs to cut. All programs, besides Social Security and means-tested entitlement programs would be subject to a uniform cut. Senator KERRY and I were successful in ensuring that all military contracts would be subject to the cuts, as well, except those where cancellation or reduction would prompt a penalty larger than any potential savings.

Finally, I was able to secure an amendment, which I hope will contribute to our effort to bring Federal spending in toe, without ever having to experience across-the-board spending cuts. My amendment would require all large Federal contracts with built-in inflation assumptions to be adjusted for the actual rate of inflation each year. Such an adjustment last year saved $500 million in the F-16 fighter contract alone. And the General Accounting Office estimates that up to $40 billion in other such savings can be found. The savings from these inflation adjustments would be applied to reducing the deficit before any across-the-board spending cuts could be ordered. And, hopefully, as a result of the amendment, they never will be ordered.

It is important to note also that the Hollings-Rudman plan is flexible. Its tough new rules may be waived in times of war or in a serious recession.

This is tough medicine and there is no doubt that some cuts are going to hurt, but we've been living beyond our means and we have to stop now.

We reached this point, where we have to increase the debt ceiling to $2 trillion, because we were told we could cut taxes, increase defense spending and still balance the budget. Maybe it was smart politics, but it wasn't very good economics, and I opposed it.

That is how we got here, but we're not going to get out of it by laying blame or playing partisan politics.

It is going to take a bipartisan effort like the Hollings-Rudman proposal. This plan adds teeth to the across-the-board freeze on all Federal spending, which I have supported for the last 3 years. It changes the budget process itself to give Congress the discipline it hasn't had the courage or the political will to muster.

Now this important measure will be the subject of a House-Senate conference. Both Houses of Congress have a historic opportunity. Unless we act to increase the debt ceiling the Government will go out of business. And unless we act also to reduce deficits, America is going to go out of business.

U.S. HOLOCAUST MEMORIAL MUSEUM

Mr. KENNEDY. Mr. President, last Wednesday was the official groundbreaking ceremony for the U.S. Holocaust Memorial Museum on the museum's future site here in Washington, DC. It is fitting that America's Holocaust memorial is now rising on America's most hallowed ground. The Mall that stretches from the Capitol past the great monuments of our Nation will now include a new and worthy memorial that will proclaim to all the world: "America will never forget, and America joins Israel in resolving—never, never again."

At the ceremony, bits of earth from Auschwitz, Bergen-Belsen, Dachau, Theresienstadt, Treblinka, and the Warsaw Jewish Cemetery were mixed with American soil. Most young people will not visit those murderous sites of horror, yet many will visit the Holocaust Museum—and they will see for themselves the limits of humanity; they will learn what human beings can do to other human beings.

Elie Wiesel, Chairman of the U.S. Holocaust Memorial Council, himself a Holocaust survivor, eloquently stated the purpose of the museum during the groundbreaking ceremony:

> This Museum is not intended to awaken hatred or to separate people—quite the opposite: It is meant to bring people closer together. Faced with our memories, the visitor will have no choice but to become more sensitive to his or her fellow being's anguish.

To a large extent, Elie Wiesel deserves much of the credit for the establishment of the Holocaust Museum. Through his leadership and dedication, Elie Wiesel has brought the need for this museum to the attention of the American people as well as the world. And his tireless efforts have succeeded in making his goal of the museum a reality.

Mr. President, I ask unanimous consent that the text of Elie Wiesel's speech at the groundbreaking ceremony be inserted in the RECORD and urge my colleagues to read his insightful words.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY ELIE WIESEL, CHAIRMAN, U.S. HOLOCAUST MEMORIAL COUNCIL

Your Excellencies, Secretary Hodel, Distinguished Members of Congress, Honored Guests, Ladies and Gentlemen.

Today, as we begin to lend a physical dimension to our relentless quest for remembrance, it is fitting to express our profound gratitude to Congress and to the people of the United States for the help and encouragement they have offered us in carrying out our historical mandate.

Outside of Israel, ours is the only nation in the world that has made a commitment to establish a national museum dedicated to the memory of six million Jews, all victims of the Holocaust and millions of other victims of Nazism.

The help we have received has always been bipartisan in both houses of Congress. The administration—irrespective of its political party—has never refused to assist us in our various efforts. The Secretary of the Interior, the Secretary of the Army, the Secretary of State and their respective staffs have given us their indispensable support. The general public has responded to our appeals with the characteristic generosity of the American people. As for the President of the United States, not only has he often participated in our Remembrance Ceremonies, but he has also graciously accepted to serve as Honorary Chairman of our Campaign to Remember. On behalf of the United States Holocaust Memorial Council, its advisers and staff, I thank them, and I thank you—from the depths of my heart.

Now it is up to us to continue. If we fulfill our mission, future generations will benefit from it. But the task is neither simple nor easy. The story we must tell cannot be told—not in its entirety. In our case, the sum of the fragments does not convey the full message. Words, images, memories, prayers, fears, agonies: How does one communicate the burning of a ghetto? Or the arrival of a convoy at Birkenau at midnight? Or the daily massacre of ten thousand men, women, and children, some buried alive, at Babi Yar? Woe unto us, for the killer's imagination surpassed that of his victims. Furthermore, by pushing the crime to its ultimate limits he deprived us of the language to speak of his crime.

What, then, do we wish the future visitor to remember, to learn? The fragility of the human condition? The vulnerability of culture and education? The monstrous powers of political fanaticism? The dangers inherent in indifference? The fact that it was possible for an evil regime to consider cynically, calmly, scientifically, the annihilation of an entire people and be persuaded of its right and obligation to do so? All this is part of the tale—and more, much more.

Some lessons may have an immediate and urgent effect. Terror must be fought wherever it is aimed against innocent civilians. Individual terror that cost the life of an old Jewish invalid is today as abhorrent as state terror was when, from Hitler's Berlin, it dominated part of Europe from 1933 to 1945.

Terror must be outlawed as must genocide. We cannot leave this place today without appealing once more to the United States Senate to ratify the Genocide Treaty. I am not sure whether such treaties will prevent mass murder, but the absence of such treaties may give the enemy of humankind the wrong signal. Would a Genocide Treaty have prevented the murder of the Jews by the Nazis? I doubt it. But its absence gave the enemy of humankind the wrong signal.

In killing Jews the killer has killed more than Jews. This tragedy has affected more than its Jewish victims. Whoever kills Jews ends up killing other minorities, other adversaries, other religious groups, other nationalities.

In Occupied Europe, the Nazis and their local accomplices, oppressed, tormented, persecuted, imprisoned and executed French heroes of the resistance, Yugoslav and Greek and Russian partisans, Ukrainian peasants, Bulgarian and Polish patriots, Dutch workers, Belgian students, Norwegian intellectuals, Danish policemen, German and Austrian anti-Nazi militants, Italian anti-Fascists, Czechoslovakian freedom fighters. Lidice and Oradour are but extreme examples of what SS rulers intended to do—and often did—throughout their universe in order to crush those who refused to submit to their terror. And they eliminated Gypsies, homosexuals, the mentally retarded, the mentally sick.

Using death as an instrument, they sought to rearrange the universe so as to give violence and injustice the attributes of divinity.

But their main effort was directed against the Jewish people. "Who remembers the Armenians?" Hitler asked with disdain. Who will remember the Jews?

In a perverse way, he was right. No one cared about the Jews. They were abandoned. The world knew and kept silent. Hitler knew that the world knew—and thus felt reassured in his belief that he was doing humankind a favor by cleansing it of its Jewish elements. And so more ghettos were erected and emptied, more communities uprooted and massacred. How are we to remember them? If we could inscribe their names on stone, the monument would be larger than this entire city. What other way is there for us to turn past experiences into acts of remembrance? What should we emphasize first? The helplessness of the victim? The inexorable urge of the killer to destroy? The children, frightened children, marching quietly in procession toward the flames? The old men and women chased toward mass graves? In those times we were a people without children, and children without grandparents. We have seen them vanish into darkness and ascend an invisible ladder of fire reaching the sky.

One enters those memories with fear and trembling; for one's sanity is endangered. But we must enter them. We open them as one opens gates to secret kingdoms. Come and see. Come and learn. Learn what human beings can do to other human beings. Learn the limits of humanity. Learn, and hope is possible—forget, and despair is inevitable.

This Museum is not intended to awaken hatred nor to separate people—quite the opposite: it is meant to bring people closer together. Faced with our memories, the visitor will have no choice but to become more sensitive to his or her fellow being's anguish.

The Jewish people has a history of persecution and suffering. But never before have its victims endured such torment; never before has the enemy deprived them of their resting place. For the first time in our history, multitudes of Jews died and were not buried.

Our heart is their cemetery; our memory, their resting place.

The killer killed them once—and there is nothing on earth that we can do about it. But, if they are forgotten, they will be killed a second time—and this we can—and must—prevent.

A great Hasidic Master once said, "If you wish to find the spark, look for it in the ashes."

GIOVANNI AGNELLI

Mr. KENNEDY. Mr. President, on October 15, one of the truly great industrialists and humanitarians of our time, Giovanni Agnelli, received the 1985 "Man of Conscience Award" from the Appeal of Conscience Foundation in New York City.

The accumulated good works of the appeal of conscience over the past two decades have created a powerful worldwide network of religious, business, and community leaders. Their voices of conscience are being heard in even the most dangerous and repressive corners of the Earth.

No person more clearly symbolizes the noble spirit and high goals of the appeal of conscience than Giovanni Agnelli. As one of the world's most respected business leaders, he has used his tireless energy and talent to advance international peace and human understanding. His progressive leadership in the realm of international commerce is matched only by his commitment to the cause of social justice and human rights.

Mr. President, I believe that all of us will be interested to read Mr. Agnelli's eloquent remarks in receiving this honor, and I ask unanimous consent that the text of his address may be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY GIOVANNI AGNELLI, CHAIRMAN OF THE BOARD OF FIAT IN ACCEPTING THE APPEAL OF CONSCIENCE FOUNDATION'S ANNUAL MAN OF CONSCIENCE AWARD

I am deeply honored by your award.

Honored because yours is a group which has done so much to promote that endangered yet to us cardinal value: Tolerance.

Honored also because in the process you have so wisely stressed the importance of understanding among nations. The kind of international cooperation across the board which you work for is no longer just a desirable option. I believe it has become an absolute prerequisite if our countries are to cope successfully with the challenge I propose to discuss with you—modern technology and its implications for employment.

But I am honored perhaps above all because what you have celebrated since 1965, and what we celebrate again together today is . . . Conscience—Free Conscience.

In anticipation of our meeting today, I found myself trying to phrase something I have felt all my life. Perhaps I can best express it with a comparison.

Think for a moment of . . . well, the quiet elation you and I have felt at one time or another in front of a work of art. Surely it has to do with that unmistakable sense of a free conscience leaping from the artist's work.

I would argue that such creative energy is not so different after all from what an in-

dustrialist experiences—an an entrepreneur; as an employer; and as a citizen: In short, as one of many free consciences banded together for a common good. Or perhaps I should say: If we, in the world of industry, lose sight of this dimension (free consciences) then we will fail not only in our immediate responsibility as entrepreneurs; but as a result we will also fail in our broader responsibility as members of a decidedly humanist and democratic policy.

In other words, it strikes me that to appeal to conscience is in more ways than one to appeal to creativity: Precisely the kind of free creativity which alone, I believe, can yield the answers to the challenge of technology.

This challenge, quite simply, is this: Technology is often called a job-killer. For all the improvements it brings to our lives, technological progress does tend to reduce job opportunities—at least for a while. And failing to deal adequately with this phenomenon, we as free, democratic societies face the potential of massive numbers of people who will remain unemployed.

There are several well-known causes to the unprecedented technological development of the last decade:

On the one hand, the world's economic balance has been profoundly altered. In these days of sagging oil prices, it may be tempting to forget the energy shocks of the Seventies. Yet, by their amplitude, they have helped to jolt us into the technological high gear of today.

At the same time, the principal markets have grown to worldwide dimensions, with a corresponding reduction of many of the traditional obstacles to competition.

Last but not least, formidable new competitors have emerged in strength. I am thinking in particular of Japan and the nations of Southeast Asia.

Naturally, these and other factors have prompted industries to improve their products and to renovate drastically their productive apparatus. Taking the fullest advantage of technological progress, they have aggressively sought to reduce their costs through productivity increases across the board.

This sudden intensification of technological innovation in industry during the late Seventies and early Eighties amounts to what some have called—with reason, I believe—yet another "industrial revolution".

Its impact on employment has coincided with what turned out to be a phase of stagnation in the world economy. Furthermore, it has been compounded by the arrival en masse on the job market of the so-called baby-boom generation.

Some consolation at least can be derived from the fact that this particular demographic surge has now peaked. In fact it is likely to ebb substantially as we enter the Nineteen-nineties. And yet we (whether we are in industry, government or the labor movement) remain confronted with what I believe is a challenge of historic proportions. A challenge that needs to be faced with the utmost realism.

I come from a continent that is particularly hard-hit. In many countries of Europe the unemployment rate now exceeds 10 percent. But as you know only too well, this phenomenon affects all industrialized countries. [So much so that I would rank it along with Third-World development and debt and the American deficit as one of the three foremost problems of today.

I know I need not describe to you the ills of unemployment: The blight visited upon the life of every jobless; and the consequences for our societies and political decision-making when this blight multiples into tens of millions of—literally speaking—left outs.

Let me, however, stress at least two of the most worrisome features of this trend:

Unemployment as we know it in Europe, and to some extent as you know it in America, no longer seems to respond as readily as it did to cyclical patterns of growth, stagnation and recession. In the recent past, in fact, cyclical upswings did not restore the jobs which had disappeared during recessionary phases. Our unemployment has become largely structural in nature.

In addition, joblessness takes a particularly heavy toll on youth. In my country, for instance, more than a third of the young who seek employment cannot find work. Such a rate is by no means exceptional in Europe—nor, I understand, in some of America's largest cities.

Speaking for myself and many colleagues in the business world, I think a challenge of this magnitude engages in an unprecedented way our responsibility, both as industrialists and as citizens. And the case I would like to make before you is that there need not be a contradiction between the two. The pragmatic diagnosis (technology as an unstoppable factor of improvement of our lives) does not contradict the moral argument: Growth is not really "growth" if it leaves by the wayside entire segments of our communities. In other words, appearances notwithstanding, the equally pressing demands of solidarity and productivity are not mutually exclusive.

On the contrary—

It is both as an industrialist and as a citizen that I can identify some of the most commonly used wrong cures:

One consists in blaming technology itself. I am reminded of the English Luddites who, at the beginning of the Nineteenth Century, were destroying their machines in the hope of saving jobs. The past is littered with such examples of wrongheadedness. Just how wrongheaded, the subsequent history has clearly shown: During the last hundred years the population of Europe has doubled; In the same period, however, thanks precisely to creative uses of technological progress, job opportunities have more than tripled.

It is perhaps inevitable that technology should awaken a powerful fear of the unknown, a powerful fear of change. Yet, the record speaks for itself. Think for instance of the time when radio was introduced, or the large computers of the Fifties, or today's microchips: Every wave of technological progress has opened up myriads of unsuspected uses for the greater benefit of all.

Another common mistake, particularly frequent in Europe, consists in trying to preserve at all costs activities that are no longer economically viable; and in spreading out existing jobs among more people. More than ever, government and industry alike must be mindful of the pains and necessary transitions of the process of industrial adjustment. But they should not forget either that in the end, a successful industrial adjustment is one that helps the old to wither away and the new to become stronger.

Job creation depends on economic growth. Economic growth, in turn, depends on the ability of industry to succeed in the midst of a worldwide competition that requires greater efficiency, innovation, lower costs and higher quality. In short, the problem of our economic systems is to free as much as possible entrepreneurial and creative energies.

As an industrialist and as a citizen, I am of course grateful to the many generous voices which keep reminding us of our broader social responsibility. But at times I find them less than helpful when, mistaking the entrepreneur for some abstract benefactor, all they do is urge us to hire, hire, hire.

To those who argue that the entrepreneur's responsibility to his shareholders and his responsibility to society are in conflict, I would say this: In the end, we are left with no choice but to grow, and to do so without leaving behind entire portions of society. As participants in a political system that represents us, we all share a primarily political responsibility. I don't know if we will ever see the day when societies are run as well as some enterprises are—that is: to the benefit of all involved. In the meantime, we in industry fully accept our larger responsibility—But not at the cost of undermining what we do best. For what we do best (Enterprise) already constitutes our greatest contribution to the general welfare.

Before closing, let me go a bit further and try to define what this larger responsibility is all about: as an industrialist and as a citizen, I would suggest to you that an intelligent, carefully designed degree of social democracy may well be an indispensable feature of our capitalist future.

Needless to say, by "social democracy" I do not mean a return to the old familiar cliches: Bureaucracy, all-pervasive waste, the proliferation of special interests and the like. All these things can only compound the many rigidities in the economy and in the labor markets which already hinder growth.

What I have in mind, rather, is a concerted effort on the part of all social partners to bring back into the fold those who are otherwise in danger of being left out.

This requires first of all a massive investment in education. Purpose, creativity, the sense of belonging to a civilization of shared values all begin in the classroom. Someone has said that the jobs of the future are jobs where "knowing how to understand" will be at least as important as knowledge per se or "know-how". We need a school that no longer isolates general information from professional information. A school open to the realities of the outside world and capable of eliciting a true "culture of innovation".

More broadly, we need to spare no efforts to achieve a much larger participation of all in the political process; and to draw the young into the ranks of productive society.

Finally, a priority for both government and private industry should be to work together to help the growth of all service sectors in our economies: These are precisely the sectors where today's and tomorrow's technological advances can also be the greatest creators of jobs.

What all this amounts to is, in effect, a possible "third way" between two major pitfalls: On the one hand, an exclusive reliance on a "monetarist" view of human activity at the expense of all broader considerations; on the other, the stifling constraints of old-time social models. Although as industrialists we are intent on continuing unimpeded to do what we do well, our responsibility is broader and calls for active involvement in the problems of our communities. But not, in effect, to create a society half made up of "assisted" people ("assistiti") against which Pope John Paul II warned a few months ago in Brussels.

I recognize that what I have briefly outlined this afternoon represents a tall order. As an agenda, it will severely test the creativity in each of us that I alluded to in the beginning. It is kind of free, responsible creativity which cannot flourish without free conscience. This is why I would like to congratulate your Foundation for twenty years—a generaton—of work on behalf of this, perhaps the most precious dimension of human life. And why I will forever cherish your generous award.

H.R. 2959, THE ENERGY AND WATER DEVELOPMENT CONFERENCE REPORT, 1986

Mr. DOMENICI. Mr. President, on Thursday, October 17, the Senate agreed to the conference report on H.R. 2959, the energy and water development appropriation bill of 1986. The tables showing the relationship of the conference agreement to the fiscal year 1986 budget resolution were inadvertently omitted from the RECORD at that time.

Mr. President, I support the conference agreement on the energy and water appropriation bill.

I commend the members of the conference for producing a bill that meets the subcommittee's 302(b) allocation under the budget resolution.

H.R. 2959, provides $15.3 billion in budget authority and $8.2 billion in outlays for fiscal year 1986 for the Corps of Engineers, the Bureau of Reclamation, the Department of Energy, and other agencies.

With outlays from prior-year budget authority and other adjustments taken into account, fiscal year 1986 budget authority and outlays associated with this conference agreement would total $15.3 billion and $15.6 billion, respectively.

Compared to the subcommittee's 302(b) allocation under the budget resolution, this bill is under by less than $50 million in both budget authority and outlays.

Mr. President, I ask unanimous consent that a table showing the relationship of the bill to the subcommittee's 302(b) allocation, the President's request, the House-passed level, and the Senate-passed level, and other related tables be inserted into the RECORD at the conclusion of my remarks.

Again, Mr. President, I support this conference agreement and commend the Appropriations Committee and conferees for producing the first fiscal year 1986 appropriations bill within the budget resolution's levels for the President's signature.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ENERGY AND WATER DEVELOPMENT SUBCOMMITTEE SPENDING TOTALS—CONFERENCE AGREEMENT

[In billions of dollars]

	Fiscal year 1986	
	Budget authority	Outlays
Outlays from prior-year budget authority and other actions completed	(1)	7.4

RILEY GARNER—A SHELBY COUNTY INSTITUTION

Mr. SASSER. Mr. President, my good friend, Riley Garner recently announced his candidacy for reelection to the office of Shelby County trustee. I believe that the people of Shelby County are well served by Riley's decision.

Quite simply, Riley Garner is a Shelby County institution. He was first elected as county trustee in 1947. Ever since he has held his office he has performed his duties as county trustee in a manner that has earned the trust and respect of the people of Shelby County.

When Riley first took office in 1947 his office processed about 60,000 tax bills which altogether totaled some $3 million. In 1984 his office handled some 300,000 tax bills totaling about $155 million. Yet even with this increased work load, the number of employees in Riley's office still stands at 17—the same number of employees that were in his office in 1947. That is a noteworthy accomplishment, Mr. President.

When Riley took office, he was faced with the task of collecting some $3 million in delinquent taxes owed to Shelby County. And since 1947 he has been able to make tremendous strides in reducing the amount of delinquent taxes that are owed to the county. Throughout his tenure in office, between 98 and 98.5 percent of all taxes that are owed to Shelby County are collected in full. While he was doing that, I am informed that Riley was able to turn back to Shelby County about 69 percent of his budget that was alloted for his office during this past year. The message is a simply one-Riley does an excellent job and he does it well within budget.

But Riley is more than a good public official. He is an outstanding citizen as well. He cares deeply about the people of Shelby County. His list of civic achievements is long and varied. He has received the Dr. James Bodley Americanism Award from the Memphis American Legion. He has received the BPO Elks Outstanding Service Award. He has been the chairman of the Memphis Easter Seal Society and was past chairman of the Tennessee Society for Crippled Children and Crippled Adults. He has been instrumental in insuring the success of fundraising drives for St. Jude's Hospital, Baptist Hospital, Methodist Hospital, St. Joseph's Hospital and many other worthy Memphis Institutions. In short, Riley has worked long and hard to improve the quality of life in Memphis and Shelby County.

Riley Garner is a model citizen and a model public official. He cares deeply about his fellow citizens, and I believe that the people of Shelby County care deeply about him. I wish Riley Garner well in the years ahead as he continues his duties as county trustee and as a civil leader of Shelby County.

AN INTERNATIONAL COVENANT DEFINING TERRORISM

Mr. ANDREWS. Mr. President, recent events have once again brought the subject of terrorism to the center of America's attention. While we all abhor terrorism, the term itself is often too imprecise, too freighted with political judgment and too often open to misunderstanding to be a useful category in American extradition law. However, the humanitarian sentiment and principle behind our opposition to terrorism must not be misunderstood. What cannot be achieved directly may have to be achieved indirectly.

Terrorism, in common parlance, refers to those acts or threats of violence which are calculated to instill fear—indeed terror—in the minds of the target population. That is why, when we think of terrorists, we think first of persons who attack or threaten presumptively innocent or helpless persons, or who kidnap, bomb, or murder for symbolic reasons. Terrorism, in its most perjorative sense, refers to acts or threats of violence that are wanton, indiscriminate, and without any immediate, practical objective.

Americans have, unfortunately, been targets of terrorist activities for some time. Just recently, the Soviet Union found that it, too, had to face a terrorist attack on its diplomatic staff in Lebanon. We believe it is time for the two superpowers and their respective allies to make a concerted effort to totally eliminate sanctuaries for international terrorists who commit serious offenses against individuals of other nations.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter to President Reagan, cosigned by a number of us in the U.S. Senate, to urge the adoption of an international covenant that would define international terrorism and deny political sanctuary to such individuals throughout the world.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, October 21, 1985.

Hon. RONALD REAGAN,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: The civilized world today stands at a crossroads between unchecked international terrorism and the rule of law. Your forthcoming summit meeting with Soviet General Secretary Mikhail Gorbachev offers a unique and historic opportunity for you, as the leader of the free world, to begin the process that will lead to the elimination of this dark shadow of terrorism which threatens the security of every nation and all peoples.

You go to the summit with both the legal and moral authority necessary to propose to Mr. Gorbachev that the Soviet Union and the United States join in adopting an international covenant that would define terrorists as those who attack or threaten presumptively innocent or helpless persons, or who kidnap, bomb, or murder for symbolic reasons. This covenant would also bind its signatories to deny political sanctuary to all such individuals throughout the world.

All governments have an obligation to protect the lives of its citizens from violence and to bring their assailants to justice. But justice can only be assured if all nations unite in declaring terrorists persona non grata. Cowardly vigilantes must be denied sanctuary and sustenance by civilized societies. Such united action by the world community will go far in ridding society of their ilk. Your leadership, in joint cooperation with Mr. Gorbachev, will give this document the necessary moral authority to unite the world's nations against such continued barbarous activity.

Terrorists have thrown down the gauntlet before the civilized world. Mr. President, you have a unique opportunity to lead the community of nations in meeting and eradicating this challenge to world order.

We therefore pledge our firm support to you in an effort to persuade Mr. Gorbachev to join in covenant with the United States in treating terrorism as a cancer that must be completely excised for the good of all civilized society.

Best wishes.
Sincerely,

MARK ANDREWS.

Mr. ANDREWS. Mr President, I welcome my colleagues' endorsement of this letter to President Reagan. If they are interested in cosigning, I ask them please to contact our office as soon as possible. We intend to send it out at the end of the week.

THE CHILEAN SITUATION

Mr. DURENBERGER. Mr. President, on September 23, Senator LUGAR and I introduced Senate Concurrent Resolution 68, which expresses the Senate's support for Chile's National Accord for the Transition to Full Democracy. At the same time, we circulated a letter to Cardinal Juan Francisco Fresno of Santiago conveying the Senate's support for this effort of Chile's many democrats to renew their country's traditional adherence to democratic principles and processes. These expressions of support for Chilean democracy have received substantial backing in the U.S. Senate. I'm pleased to report that a bipartisan group of 22 Senators—consisting of many committee chairmen, conservatives, moderates, and liberals—have spoken with one voice in favor of a return to democracy in Chile.

Several bills reflecting the Senate's concern about the current situation in Chile are now being considered by the Foreign Relations Committee. I have been assured by the chairman of that committee that these resolutions on Chile shall receive immediate consideration, so that the Senate may take a firm stand on this important foreign policy matter.

Despite numerous constraints, the National Endowment for Democracy has initiated several important projects in Chile which seek to strengthen democratic groups and institutions in that country. NED has, for example, facilitated a nongovernmental relationship between Chile and the State of Washington through the Partners of the Americas Program. This partnership will allow for continued exchanges in the areas of youth, agricultural groups, and farmer cooperatives, and women and small business development. NED also organized an international symposium on the problems of contemporary democracy at the Institute of Political Science at the Catholic University of Santiago. This conference brought together distinguished political scientists from Latin America and the United States to discuss democratic philosophies and to examine transition experiences in various countries from authoritarian regimes to pluralistic democracies.

Perhaps the most significant of the NED projects in Chile required the active involvement of the Minnesota

Association of Cooperatives [MAC]. Minnesota is justly proud of its long tradition of success in cooperative activity. NED initiated a $90,000 pilot project in 1984 and 1985 which established a program of exchanges and "sister co-op" relationships between U.S. cooperatives and their counterparts in Chile. As a result of this program, several Chilean cooperatives have requested the formation of sister cooperatives in the United States. In speaking with members of the MAC, I've learned that the Chilean participants gained an understanding of the political role of our U.S. national and State cooperative organizations for nonpartisan political action. The Chileans have responded by creating their own lobbying organization to represent the entire Chilean cooperative movement before a rather hostile government. They came to appreciate the need for united political action to maintain and expand their democratic cooperatives.

The success of this international cooperative effort and NED's role in its implementation suggests that we can and should do more to aid Chile's democratic institutions. Simply expressing our verbal support for a transition to democracy in Chile is not enough. We do have the technical expertise and the experience to strengthen the organization of democratic political parties and legislative institutions, to improve the functioning of the judicial system, to assist independent journalists who seek to establish a free press, and to aid the growth of democratic labor unions. While the men and women of the Department of State, the Agency for International Development, and the United States Information Agency perform their tasks extremely well, the NED can do much to strengthen democracy in Chile through private, nongovernmental efforts. I would hope that the Senate would keep this in mind as we debate the future of the NED during consideration of the Commerce, Justice, and State appropriations bill.

Mr. President, I ask unanimous consent that a letter to Cardinal Fresno on the Chilean National Accord for the Transition to Democracy and a summary of the report of a delegation from the U.S. Overseas Cooperative Development Committee which visited Chile in March of 1985.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, October 4, 1985.

His Eminence JUAN CARDINAL FRANCISCO FRESNO,
Archbishop of Santiago, Santiago, Chile.

DEAR CARDINAL FRESNO: We write to express our concern over the slow process of democratization in Chile and to convey our support for the return of democracy in your country.

As we believe that a restoration of democracy is the best way of assuring Chile's political, economic, and social stability, we have joined in this effort to express our solidarity with responsible Chilean democratic leaders who seek to assist the restoration of democracy and respect for law in Chile. It is our fervent hope that all responsible sectors in Chile will treat the National Accord for the Transition to Full Democracy with the seriousness that the reconciliation process demands. We further believe that the current situation in Chile demands a coherent, long-term, and positive approach on the part of American policy-makers.

Terrorism, human and civil rights violations, a substantial Communist party committed to the violent overthrow of the government, the national debt crisis, are only a few of the current obstacles to be overcome in achieving genuine political stability. Perhaps the most difficult challenge of all is forging a broad consensus on the institutional means of rebuilding a stable democracy in your country and marshalling the will, and taking the risks, to put in place a democratic order that satisfies the aspirations of the Chilean people. We therefore wish to express our strong support for the effort represented by the National Accord for the Transition to Full Democracy.

Sincerely,

Senators Richard G. Lugar, Dave Durenberger, Wendell H. Ford, Paul Simon, Larry Pressler, Mark Hatfield, Rudy Boschwitz, Paul Trible, Robert Dole, J. James Exon, John F. Kerry, Mark Andrews, John Heinz, Pete Wilson, Frank Murkowski, Nancy Landon Kassebaum, Bill Bradley, Tom Harkin, John C. Danforth, William S. Cohen, Pete V. Domenici, Ernest F. Hollings.

COOPERATIVES IN CHILE'S TRANSITION TO DEMOCRACY

(Findings from a study tour by U.S. cooperative representatives)

EXECUTIVE SUMMARY

Cooperatives in Chile are functioning well as grassroots, democratic self-help organizations committed to assisting low- and moderate-income people. They are important forces for economic and political democracy. Adversely affected by Chilean politics and economics, they have suffered for 15 years under the current and previous administrations. As a result, many cooperatives failed. But the situation has stabilized and cooperatives are growing again.

Cooperatives are member-owned businesses governed through one person, one vote. In Chile today, they are often the most direct experience of low- and moderate-income people with democratic practice. Cooperative elections are honest. Divergent viewpoints on issues important to members are openly expressed, debated and voted. Leadership is developed through elections to voluntary boards of directors. Annual meeting are often well attended and support from members is demonstrated through the use of cooperative services such as credit, agricultural supplies and marketing, electricity and housing.

Chilean cooperatives contain a variety of political viewpoints from support of the current government to active opposition. They have extraordinary access to democratic elements in society and are advocates of a return to democratic life in Chile.

While the study team was in Chile, there was a national strike, resignation of the entire cabinet and declaration of a state of siege. Violence from terrorists of the extreme left and right, and from government security forces, is on the rise. Yet the study team believes that a national movement for democracy has clearly emerged. It is strongly rooted and has momentum.

The key issue is the type of democracy: either an "authoritarian" and highly controlled model supported by the military government, or a more open political system with an early timetable for elections. The study team believes that the majority of Chileans support an early return to true democracy but also fear destabilization of society from forces of the extreme right and left.

The United States Government needs to understand the full dimensions of this difference between various visions of democracy. U.S. policies and programs should be initiated to support those democratic voices in Chile which are seeking a peaceful transition to civilian rule.

The newly created National Endowment for Democracy can make a constructive contribution in supporting and strengthening democratic institutions in Chile through non-governmental approaches. The study team recommends a major focus of the National Endowment on support for political parties, the press, labor unions, private businesses and cooperatives in their efforts to bring about democracy in Chile. Such programs need to be long term and sustained.

In regards to cooperatives, the study team recommends support for a follow-on program to undertake a comprehensive review of the legal and administrative obstacles to cooperative development in Chile. This effort should be geared to improving the image of cooperatives as important free enterprise institutions. It should enhance the capacity of cooperatives to influence government policies, and generate a better understanding by government officials of the special contributions cooperatives can make to economic and political life.

The study team also recommends creation of a cooperative center for the advancement of self-help cooperatives and similar democratic organizations for assisting low income people. Given the recent difficulties of cooperatives, universities and other supportive organizations need to be re-engaged in cooperative development in a comprehensive, systematic and grassroots way. An intellectual and resource center is needed for combining the practical business operations of cooperatives with a commitment to helping the poor.

The universities of Chile, which once played a significant role in cooperative education and training, should be encouraged to review and expand such programs. Nonprofit Chilean organizations and foundations need to be encouraged to pool their resources in support of cooperatives and other democratic private institutions. Outside donor agencies should assist these organizations as well as continue and expand support directly to cooperative organizations and federations. U.S. cooperatives will seek ways to support these cooperative educational efforts in Chile.

U.S. cooperatives are renewing their historic relationship with Chilean cooperatives. As part of this effort, U.S. cooperatives are sponsoring a 15-person Chilean cooperative delegation to the U.S. in April 1985. The delegation will observe the role of cooperatives in U.S. economic and political life. The exchange will lead to the creation of cooperative-to-cooperative relationships for technical exchange, trade and interaction.

ACCOLADES TO THE UNIVERSITY OF IOWA HAWKEYES

Mr. HARKIN. Mr. President, I would like to take this opportunity to recognize some talented young athletes who distinguished themselves in the minds of Iowa sports fans again last Saturday. I am speaking, of course, of the University of Iowa Hawkeyes, the Nation's No. 1 football team. Their fine ball club, led on the offense by quarterback Chuck Long, running back Ronnie Harmon, wingback Scott Helverson, and split end Bill Happel, thoroughly dominated a fine Michigan defense to earn a unanimous No. 1 ranking from the three major college polls: A.P., U.P.I., and U.S.A. Today.

The game last weekend proved once again that the University of Iowa, under the guidance of 7th-year coach Hayden Fry, plays great football in pressure situations. The contest in Iowa City matched Michigan's unyielding defense against Iowa's smooth passing offense. But when the Hawks were down in the fourth quarter, 10–9, it was their hard-hitting defense, under the leadership of cornerback Nate Creer and linebackers Larry Station and George Davis, which forced the Wolverines to give up the ball. The Iowa Hawkeyes then started the final and conclusive drive of the contest on their own 22-yard line with 5½ minutes remaining.

The pressure was on to quickly turn the score around or face defeat, and in classic Iowa style, much the way their offense had dominated the whole game, the Hawks rolled flawlessly down the field in perfect position for a field goal.

Then, in the intense silence of 66,350 fans with only 2 seconds remaining in the game, Rob Houghtlin confidently kicked a 29-yard field goal. Iowa is proud of Houghtlin and his teammates who represent excellence in a human endeavor that resembles, in many ways, the game of life.

Football, with all its setbacks and thrills, can today be a metaphor for the people of Iowa who truly have an honest, hardworking, No. 1 spirit.

I am sure my colleagues will want to join with me in congratulating the No. 1 college football team in America—the Iowa Hawkeyes.

U.S. NAVIGATION SYSTEM

Mr. HATFIELD. Mr. President, last week a serious accident occurred to Welland Lock No. 7 on the St. Lawrence Seaway. The collapse of this inland waterway structure will delay for weeks the export of thousands of tons of grain. The resultant delays will be extremely costly to shippers and could further damage our competitive position in the export markets. These grain exports, as well as other farm produce shipments, help offset our soaring trade deficits and are the lifeblood to many U.S. farmers.

This incident helps underscore the critical importance of a healthy, efficient transportation infrastructure. In many areas, I believe there is a growing awareness of the need to maintain and enhance our transportation system. In recent years, we have have seen efforts to rehabilitate our highways, repair bridges, expand mass transit systems, improve airport facilities, and restore our railroads.

In one critical area, however, we have not yet started to address the issue of serious decay and deterioration of our infrastructure—the inland waterway system. The national waterway system is an integral part of the intermodal transportation network which is necessary to move bulk materials and products to domestic and international markets. Since 1924, the Corps of Engineers has been responsible for assuring the operation of the national waterway systems. The corps operates and maintains about 219 lock and dam facilities and other control structures on some 25,000 miles of inland and intercoastal waterways. For the last 35 years, resources have been primarily directed to extending the waterway system rather than developing the existing system. Consequently, needed maintenance, including rehabilitation, often has been postponed. Priorities must now shift to upgrading the existing waterways.

We simply cannot ignore any longer the condition of many locks and dams on this important national waterway system. Over 42 percent of the structures on this system are over 40 years old. Many key locks and dams were constructed over 50 years ago. They are obsolete and cannot accommodate existing and future traffic. As a result, bottlenecks at the Nation's locks seriously affect shipping, and pose dangerous safety problems.

In 1976, the Corps of Engineers began the first major assessment in 70 years of the inland waterways of the United States. This study, known as the "National Waterways Study," was finally completed in March 1983 after a show of strong support from Congress. The "National Waterways Study" again highlights the immediate need to address the bottlenecks which are choking our aging waterway system.

We also should point out that these waterways form a system which feeds our Nation's ports. There is also a growing need to modernize facilities and deepen our ports which serve as a gateway to inland waterways and the rest of the transportation system. As an example of the critical importance of our deep-draft port system, let me sight some statistics. Our ports move each year 887 million tons of cargo to foreign countries, valued at $318 billion, and this generates $6.4 billion in customs revenues. More than 1 million jobs are provided by the ports. It is estimated that ports contribute $96 billion to personal income each year in this country. Through the Coast Guard and Corps of Engineers, we spend about $700 million annually on the operations and maintenance of our navigation system. This represents only about 10 percent of the direct revenues which are received through customs assessments and a minuscule fraction of the total benefits from the system.

As my colleagues know, congressional inaction and executive branch opposition have stalled our efforts to restore the national navigation system. The last major construction authorization for the Corps of Engineers was enacted in December 1970—15 years ago. The corps construction program now is half what it was only 4 years ago. Some people applaud that. I do not. Nor do the people who look for navigation improvements on the Mississippi, the Ohio, and the Columbia to increase commerce and continue building a strong economy. Nor do electric power consumers who wish to reduce the cost of coal, our abundant energy resource. Nor do our beleaguered farmers in Iowa, Kansas, and Montana who depend on the movement to market of grain, corn, and other produce. Nor do the people of Maryland, Alabama, and Texas who await deeper draft harbors to increase trade and correct our dangerous trade imbalances.

In light of the obvious impact on our national economy, I am still amazed when members of the press and others leap to criticize the funding of water projects as pork barrel. We also see a growing tendency from politicians to scorn these projects as pork barrel.

And yet, each and every year, the President requests and Congress enacts hundreds of millions of dollars for the operation of these water projects, most of which are for our navigation system. Each and every year, farmers, the coal industry, utilities, port officials, city managers, industry leaders, and hundreds of individual citizens testify in support of these water projects and call for the improvement of the navigation system.

I suspect that even Scrooge himself when presented with the facts would be convinced of the importance of these projects. Let me end by quoting our former Director of the Budget Office, Mr. David Stockman:

> Passage of legislation to maintain and improve our Nation's ports enhances our international trade position and translates into jobs in our coal fields, and grainfields, railroads, trucking industry, and port communities. A modern port system improves our national security since it enhances America's capacity to assist our allies to meet their energy and food requirements.

The incident at Welland Lock No. 7 is symptomatic of a more fundamental problem—the health of our navigation system.

We must begin to focus on the long-term health of our navigation system. We should resist the temptation to adopt simple slogans which kill progress and reform. There is a growing problem and we must intensify our efforts to restore and enhance these vital water projects.

I ask unanimous consent, Mr. President, that the October 16 article from the Washington Post entitled "Seaway Accident Jars Grain Mart," be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 16, 1985]

SEAWAY ACCIDENT JARS GRAIN MART

(By Kevin Klose)

CHICAGO, Oct. 15—Gloom spread across the midcontinent today at news that an accident has closed the St. Lawrence Seaway for as many as three weeks at the height of the grain-shipping season.

Corn prices tumbled on the Chicago Board of Trade and, from Duluth and Thunder Bay on Lake Superior to Cleveland and Buffalo on Lake Erie, port officials mourned as the voyages of dozens of ships in the Great Lakes came to an unexpected halt.

The stoppage began Monday when a 150-foot section of wall collapsed in a key lock of the Welland Canal, which carries ships around the Niagara Falls between Lake Erie and Lake Ontario.

After conferring most of the day, officials at the St. Lawrence Seaway Development Corp. headquarters in Massena, N.Y., said a temporary wall of steel bracing must be erected to stabilize the remaining wall in Welland Lock No. 7 before the lock can be fully drained and engineers can inspect the damage and chart the rebuilding.

Meanwhile, commodities experts and shipping agents throughout the Great Lakes region in the United States and Canada said that this is the worst possible time of year to disrupt the Seaway.

Millions of tons of grain are moving eastward from Midwest corn and soybean farms to foreign ports. Winter normally closes the Seaway, starting about Dec. 10 to 20.

Capt. Richard Legros, the harbor master in Thunder Bay, Ont., on the northern coast of Lake Superior, the largest grain port in Canada, declared: "It will be devastating for everyone from Thunder Bay right on down the Seaway. It's a chain reaction. It's very serious. . . . I'm holding my breath."

Grain traders in Chicago responded to the news with a selling spree of futures contracts in corn. The price fell 2 cents a bushel today for December-delivered corn, after closing Monday at $2.22¾.

David Bartholomew, a senior commodities analyst at Merrill Lynch Pierce Fenner & Smith, said the Welland accident "already is having its effect on the market."

"There is a depression in the nearby [December] prices, basically affecting corn," he said. "The accident keeps grain here in the Midwest, instead of getting it out. Delays in shipping may cause buyers to buy from some other origin."

Dale Gustafson, an analyst at Drexel, Burnham, Lambert here, said, "Nobody at this time of year wants to be left with corn on their hands."

John Adams, deputy chief engineer of the seaway, said, "There're going to be ships at anchor and port facilities idle until traffic resumes. Traditionally, this is the busiest time of year."

Adams said there were 18 ships westbound in the 26-mile-long Welland Canal and 12 vessels eastbound when the mishap occurred. The canal consists of eight locks that raise or lower ships a total of 326 feet between Lake Erie and the lower Lake Ontario.

Those ships cannot proceed, and scores of others now are caught trying to get out of the Great Lakes. Still others are unable to enter the system and are waiting in the St. Lawrence River or out in the Atlantic.

The seaway, which celebrated its 25th year of operation last year, suffered an 18-day shutdown last year when a bridge in Valleyfield, Quebec, jammed halfway open. The shipping season was extended to make up the lost days.

When the section of the lock wall fell at 10:35 a.m. (EDT) Monday, it jammed the Liberian-registered Furia, eastbound with a cargo of grain, against the lock. The ship was extricated Monday night and was found to have suffered little damage.

Said the Coast Guard's Chief Petty Officer Richard Schmidt, at the Buffalo, N.Y., station: "It's like a highway just washing out. The canals are a major thoroughfare from the ocean to the Great Lakes."

IOWA GENERAL ASSEMBLY EXPRESSES OPINION ON FARM BILL

Mr. GRASSLEY. Mr. President, the Republican leadership of the Iowa General Assembly recently wrote me in order to express their concerns and preferences for the farm bill.

I would like to share this pertinent letter with my Senate colleagues in order to provide them with an informative view of the Iowa agricultural economy.

The Iowa General Assembly GOP members' main concerns are that legislation be directed toward generating more net income for agriculture and toward deferring debt repayment and mortgage foreclosures for viable borrowers. Regarding the Farm Credit System, the members desire interest rates to be brought to a level that is closer to the historical level. They believe the solutions must encompass all elements of the economy that depend on agriculture.

The members ask Congress to objectively assess the impact of the farm program on grain processing and livestock production industries. Also, the members neither endorse nor reject a referendum, but they do believe that farmers need reasonable alternatives that are accompanied by clear, detailed information. Finally, the members stress that legislative options must be made for farmers as quickly as possible in order to prepare for the 1986 crop.

I urge my colleagues to give serious consideration to the concerns expressed in this letter, which I ask unanimous consent to have printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

IOWA GENERAL ASSEMBLY,
September 30, 1985.

Senator CHARLES GRASSLEY,
Hart Senate Office Building, Washington, DC.

DEAR CHUCK: Since the Iowa Legislature adjourned in early May, the farm problem has continued to be of major concern. Republican members of the House and Senate met today—on the eve of the expiration of the 1981 farm program—to develop a unified farm policy statement and provide our input as the farm bill is debated by Congress.

As legislators from one of the country's key agriculture states, we feel it vital to move beyond the stage of "sending a message" to Washington and develop a consensus of how Iowa lawmakers can help agriculture and agriculture-related businesses survive. Moreover, we are convinced that though solutions to the farm problem will lie mostly at the federal level, it will not be solved by simply "passing the buck" to the federal government. And we feel that working directly and cooperatively with our congressional delegation is the most important and constructive step we can take to deal with the problem.

Though we are well aware that no farm measure will garner total unanimity, we believe that some basic policy agreement is critical if significant improvement is to be made in Iowa's farm-based economy. Further, we urge you to consider the potential ramifications for Iowa of the House and Senate versions of the farm bill and related proposals that are still active at the federal level.

Specifically, we feel the following concerns must be addressed:

1. Efforts to improve the agricultural economy should be directed to help farmers, main street businesses and agriculture-related industries.

2. Priority consideration should be given to generating more net income for farmers and farm-related industries. As a step to holding down production costs, interest rates must be reduced. As a step to enhance income, equitable support prices must be established.

3. To alleviate the farm credit problem, we support legislation which would defer debt repayment and mortgage foreclosures for viable borrowers.

4. In developing a farm program, Congress must assess the impact of that program on grain processing and livestock production industries.

5. Though we neither endorse nor reject a referendum, we believe that farmers need reasonable alternatives, accompanied by clear and detailed information. This information must include the effect of any referendum on family farms and agriculture-related industry.

6. It is imperative that options be available to farmers as soon as possible for timely decision-making regarding the 1986 crop.

In addition, we consider your immediate action on problems with the Farm Credit System to be as important as that on the

farm bill. Interest rates in the Farm Credit System must be closer to historical levels. Federal Land Bank interest rates that are currently five percent above prime and 10 percent above inflation are unacceptable.

The farm problem is not a partisan issue. It is not confined to individual farmers, poor managers or large operations. It is affecting the main streets in nearly every town and city in Iowa. We need solutions that will encompass not only the farm sector, but those elements of the economy that depend upon agriculture. In short, we need to do anything and everything possible to save Iowa and the family farm.

We appreciate your time and involvement in today's meeting and hope that you will give serious consideration to these concerns.

Sincerely,

CALVIN O. HULTMAN,
Senate Minority Leader.
DELWYN STROMER,
House Minority Leader.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

RECESS UNTIL 2 P.M.

The PRESIDING OFFICER. Under the previous order, the hour of 12 o'clock having arrived and passed, the Senate will now stand in recess until 2 p.m.

Thereupon, the Senate, at 12:04 p.m., recessed until 2:01 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer. (Mr. HATFIELD).

LABOR, HEALTH AND HUMAN SERVICES AND EDUCATION APPROPRIATIONS, 1986

The PRESIDING OFFICER. The clerk will report the pending business.

The assistant legislative clerk read as follows:

A bill (H.R. 3424) making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1986, and for other purposes.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. The Chair recognizes the assistant majority leader.

Mr. SIMPSON. Mr. President, on behalf of the leader, we want to proceed, and will under the proper course, with the measure that is before the body. I believe there is an amendment by Senator PROXMIRE, and then final passage will be coming.

I yield to the Senator from Connecticut, and share with my colleagues the fact that we do want to proceed. And the leader indicates that we hope to take a spirited attitude toward our work.

Thank you very much.

AMENDMENT NO. 835

(Purpose: Across-the-board 5 percent discretionary cut)

Mr. PROXMIRE. Mr. President, I understand that the Labor-HHS-Education appropriation bill is pending.

The PRESIDING OFFICER. The Senator is correct.

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The bill clerk read as follows:

The Senator from Wisconsin [Mr. PROXMIRE] proposes an amendment numbered 835.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 77, after line 3, insert:

SEC. 515. Notwithstanding any other provision of this Act, the total budget authority provided by this Act for payments not required by law shall be reduced by 5 per centum: *Provided*, That of the amount provided in this Act for each appropriation account, activity, and project for payments not required by law, the amount reduced shall not exceed 8 per centum.

Mr. PROXMIRE. Mr. President, I will briefly discuss the amendment.

Mr. President, this amendment would make an across-the-board cut in the discretionary funds—not in the entire appropriation—which constitutes about 30 percent. It is a little over 30 percent of the total. Those discretionary funds would be cut 5 percent or $1.65 billion. I make this proposal recognizing that the lower base will result in a saving of over $8 billion in the 5 years in budget authority and over $7 billion in outlays. So it is going to make it much easier for us to stay within the limitations that are being set for us in the Gramm-Rudman-Hollings amendment in 1987, 1988, 1989, 1990, and so forth.

It seems to this Senator this is precisely the kind of cut that we have to make as I will indicate shortly.

The bill as reported from committee exceeds the President's discretionary budget, and I stress discretionary because there is a great number of programs here which are obligated which I do not touch in my amendment.

But the bill exceeds the President's discretionary budget by $4.6 billion. So my amendment would preserve approximately two-thirds of the increase the committee made in the President's budget. The President's recommendations are 15-percent below the committee figure. This amendment does not cut back to the President's level. It cuts only 5 percent or one-third of the way back to the administration figure. My amendment also preserves the funding priorities set by the committee, and would permit no more than 8 percent to be taken out of any individual account. So there is no way that the administration can kill a program which the Senate has decided to continue, with no more than 8 percent to be taken out of any individual account or activity or project. That gives the department and agencies funded by the bill the flexibility to protect certain vital programs by taking more than 5 percent out of the other programs but it would not allow the administration to kill a program, would not allow the administration to project that the Congress in its wisdom added to the President's budget request.

Of course, it will be painful for the discretionary programs funded by the bill to absorb cuts of this magnitude. If we are serious about coming to grips with a $2 trillion budget deficit, we might as well realize that these are the kind of choices we are going to be forced to make. Just how tough will it be for the programs funded by the bill to absorb a 5-percent cut? It will mean a much harder look at administration overhead, it will mean cutting consulting spending to the bone, it will mean a sharp economy in travel costs, and it will mean cutting some programs somewhat.

What it will not mean, however, is the total elimination or severe crippling of individual efforts funded through the bill. Programs for the handicapped will receive more than they did in 1985. The committee's decision to more than double funding for attack on AIDS will remain in place by the large.

Initiatives of the Congress opposed by the administration can be cut, as I say, by no more than 8 percent.

Mr. President, I want to make it clear there are a number of programs in this appropriation that would not be touched. It does not touch unemployment assistance, or Medicaid. As we all know, Medicare and Social Security are not in this bill anyway. They are not under the jurisdiction of the Appropriations Committee. They are in the Finance Committee. We obviously do not affect that at all. It does not affect supplemental security income. It does not affect aid to families with dependent children, it does not affect social service block grants, it does not affect foster care, and it does not reach guaranteed student loans or higher education facility loans.

So of the total health, education, and other spending covered by the bill, this amendment affects about $33 billion or about 30 percent of the total $108 billion in budget authority in the jurisdiction of the committee. It is only that 30 percent that I would cut at all. I would cut that by 5 percent. I want to repeat, Mr. President, maybe I am being too repetitious. But I want to make it as clear as I can to the body that the President's recommendation is 15-percent below the committee

figure, and this simply proposes a 5-percent cut of one-third of the way.

Mr. President, this amendment could easily be subtitled "the shared sacrifice amendment." If misery loves company, there is a lot of companionship here. The amendment does not play favorites. It does not shift the Senate priorities. It does not rubberstamp the administration's budget game plan. However, it does send out a message loud and clear that we do care about the budget deficit. We do recognize the fact that every federally funded program is going to have to bear part of the pain with coming to grips with that deficit. I hope my colleagues will shoulder the part of the pain, and vote for the amendment.

Mr. President, I yield the floor.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, does my colleague from Wisconsin desire the yeas and nays?

Mr. PROXMIRE. I very much appreciate the Senator asking. I would like the yeas and nays on this. I would prefer if we could have the up and down if that is possible. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There appears to be a sufficient second. [Laughter.] There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, I would have hoped that the amendment of the distinguished Senator from Wisconsin were brought here instead by the bighearted administration that we have down in the White House. But it is not. It is brought by a very decent, good man who has done everything in his power to see that money goes to those that are in need. I think in this particular instance his fiscal responsibility overwhelms matters of the heart. In any event, I am very proud of this particular piece of legislation—as I think the Senator should be, his amendment notwithstanding—as every member of the Appropriations Committee and every Member of the U.S. Senate should be. It has been carefully crafted. It has been carefully crafted to meet the needs of those persons who deserve our special care. That includes everyone who has a particular disadvantage, be it physical, be it mental, be it economic, be it by virtue of any circumstance. One of the things that bothers me is our preoccupation with the entitlement programs, Social Security included. Every time we so distort and skew the budget so as to protect Social Security and some of the entitlements the impact is even greater on those who also need our special care.

In this bill are those activities of Government that relate to those who are afflicted by disease such as cancer, heart, arthritis, diabetes, and many other afflictions—some well known and others less known. In this bill are the moneys to take care of the mentally retarded and disabled of this Nation. In this bill are those moneys that account for vocational training and aid for our young people who are desirous of higher education. In this bill are maternal and child health care services. In this bill are the moneys for the training of nurses. In this bill are the grants and the moneys that go to the National Institutes of Health, and certainly that money which goes to pursue the matter of researching a cure for AIDS. In this bill are the moneys that go to alcohol and drug abuse.

I have a great deal of pride in my support for Social Security, but I suggest to you it is not the only activity in this Nation. I think the sooner we understand that the better off we are going to be in terms of our budgets. Yes, the elderly are deserving of our attention and our care, and so are the young people. But so are those who are sick in mind or body.

I would hope that the Senate would reject this 5-percent across-the-board cut.

I just want to make it clear that I find this a very difficult amendment to deal with in terms of its sponsor. I think Senator PROXMIRE is as fine a person as has ever set foot on the floor of the Senate. I usually get agitated about these matters, but this one leaves me in a quandary. As I said, there are no better Senator than the sponsor of this amendment.

As far as the amendment is concerned, it is not one that I feel we should act upon favorably. I hope the Senate will defeat it and indeed lay claim to probably one of the best pieces of legislation to come forward from this body in the sense of something that is geared to meet the needs and fulfill the opportunities of the country in a very, very positive way.

The two big subcommittees in Appropriations are Defense and this Subcommittee on Labor, Health and Human Services. What the Senate has before it today is the business of life. The Defense Subcommittee has the business of death.

For that reason, I believe we can all take a great deal of pride in the passage of this appropriations bill.

Mr. PROXMIRE. Mr. President, I will be very brief. I want to thank my good friend, the chairman of the subcommittee, for his kindness and gentleness. He clobbered me yesterday on an amendment I had and I assumed he would probably have similar success today.

I think we should understand that if we really mean business about this deficit we have talked about so much we have to make cuts everywhere. As I say, we cannot reach the entitlement programs. I am not trying to do it. They are not reached in this amendment. We do not touch unemployment benefits. We do not touch the black lung disability or retirement pay or the Public Health Service or Medicaid.

As I say, the Social Security matters are out of our hands anyway because they are in the Finance Committee.

We do not touch family social services, social services block grants.

Most of the provisions in the law that help people who cannot help themselves are not touched at all. For those who are touched, this is a 5-percent cut.

As I say, it is not as if we were making the kind of 15-percent cut the administration recommended. In all fairness to the administration, although their value judgments are different than many in this Chamber including this Senator, they do represent the expertise of this Government. They made recommendations and after my amendment is adopted we would still be above what they recommended.

It seems to me this vote is an indication of whether or not Senators are really serious about making a reduction in the enormous budget deficit that constitutes the biggest economic problem of our time.

Mr. WEICKER. Before we vote on this, and I do not think I will have the opportunity later because we will be moving to another vote after this matter is terminated, I would like to pay a special tribute to a very valuable member of the committee staff who suffered very, very severe injuries just 2 days ago. Tom van der Voort, Senator PROXMIRE's principal assistant, counterpart to John Doyle on my right, was seriously hurt in an automobile accident which involved breaking both his legs and fractured a vertebrae in his neck. I think everyone should know that I look upon this gentle, scholarly man as much as an adviser in matters relating to the work of this committee as any member of either the chairman's staff or my own staff. He is a great credit to the Government of the United States. I know that we all wish him well in his recovery because, indeed, the work of the committee suffers with his absence from it.

Mr. PROXMIRE. Mr. President, I want to thank my good friend, the chairman of the subcommittee, for that tribute to Tom van der Voort. Tom was on my staff for 10 or 15 years and then he went directly to the Appropriations Committee staff. I think all Members, including the present Presiding Officer, the chairman of the committee, know of his great skill, hard work, and dedication.

This was a real tragedy. I talked to his wife last night at some length and she feels there is no question that he is going to make it. But he is still in in-

tensive care. He may have broken his neck as well as both his legs. It was a terrible thing to happen.

The nurses are delighted with his humor. He is the kind of fellow who is smiling right through it.

Again, I thank my good friend for paying such a gracious and thoughtful tribute.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Wisconsin. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. INOUYE] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 29, nays 69—as follows:

[Rollcall Vote No. 237 Leg.]

YEAS—29

Armstrong	Helms	Quayle
Boren	Humphrey	Roth
Denton	Laxalt	Simpson
Domenici	Long	Symms
East	Lugar	Thurmond
Exon	Mattingly	Trible
Garn	McClure	Wallop
Goldwater	Nickles	Warner
Gramm	Nunn	Zorinsky
Hecht	Proxmire	

NAYS—69

Abdnor	Eagleton	Matsunaga
Andrews	Evans	McConnell
Baucus	Ford	Melcher
Bentsen	Glenn	Metzenbaum
Biden	Gore	Mitchell
Bingaman	Gorton	Moynihan
Boschwitz	Grassley	Murkowski
Bradley	Harkin	Packwood
Bumpers	Hart	Pell
Burdick	Hatch	Pressler

Dixon	Kerry	Stennis
Dodd	Lautenberg	Stevens
Dole	Leahy	Weicker
Durenberger	Levin	Wilson

NOT VOTING—2

Inouye	Mathias

So the amendment (No. 835) was rejected.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 836

(Purpose: To correct an error in Amendment No. 830, previously adopted)

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration. First, I ask unanimous consent that it be in order to consider this amendment at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The bill clerk read as follows:

The Senator from Wisconsin [Mr. PROXMIRE], on behalf of Mr. BUMPERS, proposes an amendment numbered 836.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 22, line 3 (as previously amended), strike out "$59,906,000:" and insert in lieu thereof "$59,702,000".

Mr. PROXMIRE. Mr. President, this is a technical amendment to correct an arithmetical error in an amendment offered by Senator BUMPERS to the Childhood Immunization Program. Senator BUMPERS cannot be here at the moment, and he asked me to offer the amendment on his behalf.

I understand that the manager of the bill will accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 836) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider to vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 837

(Purpose: To correct an error in amendment No. 783, previously adopted)

Mr. WEICKER. Mr. President, I send an amendment to the desk and ask unanimous consent that the amendment be in order for immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The bill clerk read as follows:

The Senator from Connecticut [Mr. WEICKER] proposes an amendment numbered 837.

Mr. WEICKER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 36, line 18, strike out "$2,012,122,000" and insert in lieu thereof "$2,009,422,000".

Mr. WEICKER. Mr. President, this amendment would correct an error in amendment No. 783, which I called up yesterday on behalf of the Senator from Florida [Mrs. HAWKINS]. As Mrs. HAWKINS' statement in yesterday's RECORD will show, the amendment agreed to was intended to raise the appropriation for the Runaway and Homeless Youth Act by $3 million. The amendment that I have sent to the desk, to which the Senator from Florida has agreed, would insert the correct amount in the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 837) was agreed to.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I rise in support of H.R. 3424, the fiscal year 1986 Labor, Health and Human Services, Education and related agencies appropriation bill as reported by the Senate Appropriations Committee.

I have a table showing the status of the appropriation bills to date compared to the budget totals. This bill is within the 302(b) allocation made by the Appropriations Committee. While there will be $0.4 billion in outlay savings unassigned to the appropriation subcommittees to be made up in the remaining bills, this bill is within the crosswalk, and I support it. My table will illustrate this point.

Mr. President, H.R. 3424 as reported provides $95.4 billion in budget authority and $81.4 billion in outlays for programs in the Departments of Labor, Health and Human Services, Education, and related agencies. The bill, together with outlays from prior-year budget authority and other adjustments is at the subcommittee's 302(b) allocation.

The bill includes $3.5 billion for training and employment services including programs authorized by the Job Training Partnership Act. This amount includes $1.9 billion for State block grants and $665 million for summer youth training and employment.

The bill funds the Job Corps at its fiscal year 1985 level—$617 million.

H.R. 3424 funds health service programs at slightly above last year's level. The maternal and child health block grant is funded at last year's level—$478 million—and the primary care block grant is funded at $405 million, $22 million above last year's level.

AIDS [acquired immune deficiency syndrome] research and treatment is funded at $206 million, which is $106 million above last year's level. This funding level addresses the problem of the Nation's No. 1 health problem which has doubled each year since 1981 and infects as many as 1 million people.

The committee funds 6,000 new and competing grants for the National Institutes of Health. This is the same

level of grants agreed to in the Senate-passed version of the budget resolution. The total funding for NIH in the bill is $5.5 billion.

The Alcohol, Drug Abuse and Mental Health Administration will receive $996 million, which is $74 million more than last year. Mental health research is funded at $216 million—$23 million more than last year.

The bill contains $90 million for science and math education, $10 million less than the administration requested. The bill provides $438 million for higher education programs. Of this, $175 million is earmarked for the special programs for the disadvantaged, popularly known as TRIO. This amount is the same as the fiscal year 1985 appropriation and $93 million more than the administration requested.

Mr. President, I ask unanimous consent that a table showing the relationship of the reported bill to the congressional budget, the House-passed bill, and the President's request and a summary of total appropriations action to date, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LABOR, HEALTH AND HUMAN SERVICES, EDUCATION AND RELATED AGENCIES SUBCOMMITTEE, SPENDING TOTALS—SENATE-REPORTED BILL

[Dollars in billions]

	Fiscal year 1986	
	Budget authority	Outlays
Outlays from prior-year budget authority and other actions completed	11.0	32.4

Source: Senate Budget Committee Staff.

Mr. CRANSTON. Mr. President, there are two aspects of the Appropriations Committee's recommendations that I wish to highlight particularly.

FUNDING FOR AIDS RESEARCH AND OTHER PUBLIC HEALTH ACTIVITIES

First, Mr. President, I am very pleased that H.R. 3424, the fiscal year 1986 Labor-HHS-Education and Related Agencies Appropriations Act as reported would provide a total of $221 million for AIDS activities. I would like to congratulate the distinguished chairman of the Appropriations Subcommittee on Labor-HHS-Education, Mr. WEICKER, and ranking minority member, Mr. PROXMIRE, for placing a high priority on programs to combat AIDS and halt the spread of this deadly disease.

Of that total, $205 million is for AIDS research and public education programs at the Centers for Disease Control, National Institutes of Health, and Alcohol, Drug Abuse, and Mental Health Administration. That's $85 million over the administration's amended request of $120 million. These additional funds will ensure that progress on all fronts—in research to find effective therapies and vaccines to treat and prevent AIDS and in education and public information efforts to increase awareness about ways to reduce the risks of contracting AIDS—is made as rapidly as possible.

RESEARCH

I am especially pleased that the committee proposes to increase by 80 percent—from $70.5 million to $128 million—the budget for AIDS research at NIH. This level of funding would enable scientists to make an accelerated effort to see that promising drugs—to inhibit the virus which causes AIDS, to stimulate the immune system, and to treat opportunistic infections—are vigorously pursued and properly tested. In addition, this measure includes $6.9 million for the Centers for Disease Control to fund the

purchase and distribution of experimental drugs for the treatment of AIDS patients not included in the NIH clinical trials.

This increase was a result of testimony received at a September 26 Appropriations Subcommittee hearing on AIDS and consultation between the distinguished subcommittee chairman, Mr. WEICKER, and individual researchers. During that hearing, I presented testimony, which I will ask to be inserted in the RECORD at the conclusion of my remarks, urging that an additional $70 million be included to expand clinical research efforts and develop a compassionate drug program. Thus, I am very pleased that nearly that amount—$64.2 million—was added for such purposes.

COMMUNITY EDUCATION

With respect to public education programs, I would also like to extend my appreciation to the subcommittee chairman and ranking minority member for their help and support in the development and adoption of language in the October 4 report accompanying this measure—Senate Report 99-151, page 50—specifying certain components that the committee desires CDC to include in its health education/risk factor reduction program on AIDS. I believe that these guidelines will help ensure that the CDC, in collaboration with outside experts, will develop an effective national program that meets the needs of the public in general as well as the population in high-incidence communities. With a vaccine, regrettably unlikely to be developed for a number of years, education and risk reduction remain the only currently available means to halting the spread of this dreaded epidemic.

CONCLUSION

Mr. President, since the AIDS epidemic began 4 years ago, our country's biomedical researchers have made tremendous progress in identifying the causative agent of AIDS and deciphering many of its mysteries. Although no cure or vaccine has been developed, scientists continue to express optimism that effective therapies may soon be developed to treat those who are already sick, and that a means to prevent the onset of this disease may also be found. The fiscal year 1986 funding included in this bill should help to ensure that our scientists and public health officials have every opportunity to deliver on their optimism and bring an end to this terrible epidemic.

Again, I pay tribute to the Senator from Connecticut [Mr. WEICKER] for his great foresight with respect to this most urgent public health threat.

Mr. President, I ask unanimous consent that the text of my September 26 hearing testimony be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TESTIMONY OF SENATOR ALAN CRANSTON

Mr. Chairman, I am pleased to have this opportunity to present testimony on the devastating AIDS epidemic. I would like to express my deep appreciation to you, Senator Weicker, as distinguished Chairman of this Subcommittee, for holding this hearing today on AIDS—the first in the Senate—to examine what steps need to be taken this year to help bring us closer to stopping the spread of this deadly disease and, ultimately, to eliminate it. I would also like to congratulate you for your steadfast support and leadership in ensuring that adequate resources are made available for fighting AIDS.

RESEARCH

During the first few years of the AIDS crisis, it was most critical to channel our efforts into basic research. Because of that effort, in less than four years scientists have identified the HTLV-III/LAV virus as the causative agent of AIDS, unraveled its many symptoms, and devised a blood screening test to safeguard the nation's blood supply. Years of basic research have produced a solid scientific foundation on which efforts to develop effective therapies to treat AIDS and a vaccine making it possible ultimately to eradicate AIDS can be developed.

Thus, at this point, rapid advances are being made in therapeutics and new compounds are becoming available that warrant thorough study of their potential for effectively treating AIDS. Many such drugs are reaching the point at which first and second stage clinical trials are possible, and many more are awaiting safety and efficacy testing.

As a result, there is a growing consensus within the scientific community that now is the time to make an accelerated effort to see that promising drugs are vigorously pursued and properly tested. However, the Administration's budget request—even as modified by Health and Human Services Secretary, Margaret Heckler's July 19, 1985, submission, to add $9.7 million for research for vaccines and therapeutics—does not allow for expanding and expediting efforts that are needed in order for us to develop as swiftly as reasonably possible the ability to treat and ultimately cure and prevent AIDS. Under the Administration's budget, many potentially beneficial therapies will go untested and many individuals with AIDS who desire to participate in clinical trials will be unable to do so. Hence, we would not be making the maximum effort to halt the spread of this killer disease.

In this connection, I would note that, because of the unavailability in the United States of many drugs undergoing clinical trials elsewhere, some Americans with AIDS have left the country for France or Mexico, away from the supportive environment of their families and friends, in order to participate in clinical trials or to obtain experimental drugs.

Based on the foregoing, I believe that additional funds should be included in the FY 86 Labor/HHS/Education Appropriations Act to implement a vigorous investigative effort for effective treatments. According to some of the most prominent AIDS researchers in the country, $70 million above the current budget request is needed for this effort. I further understand that NIH has under development a coordinated plan of new initiatives in AIDS research, particularly in the area of therapeutics, which would warrant such an investment in FY 86. The additional funding would enable scientists to search for and develop new drugs to inhibit the virus, to stimulate the immune system, and to treat "opportunistic" infections often associated with AIDS.

Development of effective drugs to inhibit the virus is an essential component to finding a cure for AIDS. Moreover, these drugs hold great promise in preventing individuals who have been infected with HTLV-III/LAV but have not developed AIDS or AIDS-related complex—a less severe or pre-AIDS condition—from developing symptoms or possibly transmitting the virus to other people. More than one million Americans may have already been infected and, while most may never develop AIDS, they may remain infectious for many years.

Now is the time, as part of an expanded AIDS research effort, to establish regional AIDS treatment evaluation units to test promising drugs on a wide range of patients—those with a full range of AIDS symptoms and those with varying stages of AIDS related complex—in order to gather scientific data, quickly and accurately, about their effectiveness. Ten such units throughout the country would be able to provide treatment to large numbers of individuals in or near the cities in which they live. In addition, these evaluation units would enable multi-center clinical trials of AIDS treatments to be coordinated and conducted in a uniform manner.

Researchers in my home state of California have repeatedly stated that state and local governments have supported the cost of basic and clinical research in their laboratories because federal funds were unavailable. With thousands of AIDS patients throughout the country, it is critical that the federal government provide leadership in battling AIDS by supporting and coordinating such research efforts.

The additional funding would also provide for the acceleration of efforts to improve medical diagnostic capabilities on AIDS. Although the antibody blood-screening test has nearly completely eliminated the threat of transmitting the virus through the blood supply, it is not useful as a diagnostic tool for AIDS or for detecting the presence of the virus in blood or blood components. Moreover, the procedures currently used to detect the virus or to confirm the presence of the antibody to the virus are costly and laborious.

Finally, I understand that the Public Health Service is considering a research program for the formulation, production, and distribution of so-called "compassionate drugs" for AIDS—under which Investigational New Drug exemptions could be granted for selected non-FDA approved drugs when there are no other therapies to treat the disease. Such a program could help avert the recent situation regarding HPA-23, in which many Americans went to Paris to receive treatment because it was previously unavailable in the U.S. Some of the additional $70 million could also be used in connection with this new program.

COMMUNITY EDUCATION AND RISK REDUCTION

Mr. Chairman, I am pleased that Secretary Heckler's July 19 budget submission, which your Subcommittee has approved, adding $40.7 million to the FY 1986 funding for AIDS activities, included $21.7 million for community health education and risk reduction for AIDS. Without a vaccine to the HTLV-III virus—and the development of

one appears to be years away—prevention through such a program is our best hope for limiting the spread of infection. This $21.7 million would be invaluable to states, local communities, and community-based health organizations in their efforts to educate both the general public and members of high-risk groups about AIDS.

In this regard, I very much appreciated the help and support that you, Mr. Chairman, and Senator Proxmire, the ranking Democrat on the Subcommittee, and others provided in the development and adoption of report language in the June 13 report accompanying the FY 85 Supplemental Appropriations Act—S. Rep. 99-82 requesting the Centers for Disease Control to develop a comprehensive education and risk reduction program. I would note that the program, as outlined in the budget request, is consistent with the Committee's directive.

INAPPROPRIATENESS OF FUNDING BY TRANSFER

Mr. Chairman, I am also pleased that the Subcommittee rejected the Administration's proposal to expand efforts on AIDS by using funds originally intended for other programs—the National Health Service Corps, the Indian Health Service, the CDC virology laboratory, and the National Institutes of Health.

As I noted in my September 13 letter to you, Mr. Chairman, which I have appended to my testimony, I opposed such a diversion of funds because it would disrupt many ongoing programs and would fail to recognize that the AIDS problem can only be solved by a coordinated, sustained effort which requires a long-term funding base—not the repeated shuffling of funds at the last minute.

CONCLUSION

In conclusion, Mr. Chairman, I strongly urge that the Committee on Appropriations include in the Labor/HHS/Education Appropriations Act an additional $70 million, above the Administration's request, for the purposes of expanding clinical research efforts and developing a compassionate drug program.

PROTECT THE JOB CORPS

Mr. CRANSTON. Second, Mr. President, I wanted to take a moment to express my support for the provisions in the pending measure that would provide $617 million for the Job Corps for fiscal year 1986. This amount is the same level at which the program was funded in this fiscal year and will permit the program to support a level of approximately 40,000 average enrollment. The amount is $23 million less than the level approved by the House—$640 million—which would support a level of 40,500 average enrollment.

As Members may recall, the President proposed eliminating the Job Corps Program in fiscal year 1986 and using funds available for the program in fiscal year 1986 solely for the purpose of shutting the program down, terminating staff, and closing centers.

I strongly opposed this proposal. On January 24, I introduced Senate Resolution 50, a resolution expressing the sense of the Senate that the Job Corps Program has been a cost-effective and successful effort to assist disadvantaged young men and women in obtaining and holding employment, that the Senate's commitment to the program should be made. On February 27, I joined with the distinguished chairman of the Committee on Labor and Human Resources, Mr. HATCH, in introducing Senate Concurrent Resolution 22, a concurrent resolution that blended together my resolution and Senate Concurrent Resolution 16, a resolution introduced by the Senator from Utah on February 20. My statements on those measures appear in the CONGRESSIONAL RECORD at S688 and S1407, respectively. At the present time, 21 Members of this Chamber have indicated their support for this important program by consponsoring one of the resolutions.

Mr. President, I am very pleased that our efforts as well as those of others in both bodies who support the Job Corps Program have been successful and that the Job Corps Program will be continued. It is a program of proven success and demonstrated effectiveness that deserves to continue to carry on its very special 20-year tradition of assisting low-income young men and women to become productive, contributing adults.

I know that the chairman of the Labor-HHS Appropriations Subcommittee, Mr. WEICKER, is also a very strong supporter of this program and that he shares my concerns. I congratulate him on this matter and note my full support for this appropriation level.

BLACK LUNG

Mr. BYRD. Mr. President, I have long been concerned over the growing delays in the processing of black lung claims, and I am pleased that this bill includes the necessary funding to begin to address this problem at the administrative law judge level.

As one who has been a supporter of the Black Lung Program since the day of its inception in 1969, when I consponsored legislation, which was enacted, to establish the Black Lung Benefits Program to help address the plight of those persons who are affected by this dreadful occupational disease, I am familiar with the problems that the program has indeed encountered over the years.

Let me stress that there is no cure for black lung disease. There is only coping with it. Its victims gasp for breath more often than not. These are the people I hear from. I know the plight of families from firsthand experience. I grew up in a coal miner's home. My foster father was a coal miner in the days when the miners wore cloth caps and used carbide lamps. My wife's father was a coal miner. My wife's sister's husband died last year from black lung and cancer of the lung. His father was killed in a slate fall at Stotesbury where my foster father worked in the mines. Stotesbury is where I married my wife and we had our first child. A coal mining community.

I have seen these men as they have struggled to breathe. I have seen them as they sat up at night in a rocking chair because that was the way they had to sleep. They could not lie down, could not get their breath. I know about the sorrow of their loved ones who are powerless to do anything about it.

I receive hundreds of letters and telephone calls each year from West Virginians about the delays in the processing of claims. Delays that inflict even greater hardship on families already under a great deal of pressure and pain.

By 1984, the backlog of black lung claims increased to the point where it was not unusual for an individual to wait up to 7 years or longer for a final decision, if he appealed his claim through the Benefits Review Board. And these long delays in processing claims were brought about by two major bottlenecks. One of those bottlenecks was addressed when I added $1.6 million in the fiscal year 1985 appropriations bill to expand the Benefits Review Board from three to nine members.

The second major bottleneck is at the administrative law judge level. At the end of 1980, there were 8,970 cases pending at the hearing level. Currently, there are 21,073 cases pending at the hearing level. This means that if the Office of Administrative Law Judges received a request for hearing in October 1985, one would wait, could wait, until October 1988, or longer before receiving a fair hearing. And that backlog is an outrage; 21,000 miners are waiting. And members of the families of the 21,000 miners are waiting.

The best solution is to hire more judges and borrow more judges to hear more cases and to process more claims. If the Office of Administrative Law Judges could dispose of 10,000 cases a year, beginning in fiscal year 1986 an increase of 3,000 in the number of cases that they are projecting to dispose of in fiscal year 1985, we could alleviate the backlog of cases pending at the administrative law judge level by the end of 1988.

This measure includes my amendment to add $3.5 million for the Office of Administrative Law Judges to provide for the hiring of 15 additional administrative law judges, 26 attorneys, and 19 support staff and will also allow for the establishment of a temporary office.

Without taking action to reduce those backlogs, the delays in processing will only continue to grow at the expense of those who are least able to wait. The sick and the poor.

The men and the women who work in this Nation's coal mines and who do

the vital work of extracting coal deserve no less than prompt consideration of their claims.

I want to thank the distinguished chairman of the Senate Labor, Health and Human Services, Education, and Related Agencies Appropriations Subcommittee, Mr. WEICKER. As always, the chairman has exhibited understanding and compassion for the plight of those afflicted with this disease.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. WEICKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. INOUYE] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 83, nays 15, as follows:

[Rollcall Vote No. 238 Leg.]

NOT VOTING—2

Inouye	Mathias

So the bill (H.R. 3424), as amended, was passed.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. HATCH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I move that the Senate insist upon its amendments and request a conference with the House of Representatives on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer [Mr. HATFIELD] appointed: Mr. WEICKER, Mr. HATFIELD, Mr. STEVENS, Mr. ANDREWS, Mr. RUDMAN, Mr. SPECTER, Mr. MCCLURE, Mr. DOMENICI, Mr. PROXMIRE, Mr. BYRD, Mr. HOLLINGS, Mr. CHILES, Mr. BURDICK, Mr. INOUYE, Mr. HARKIN, and Mr. STENNIS, conferees on the part of the Senate.

THE EXTENSION OF THE 1971 INTERNATIONAL WHEAT AGREEMENT

Mr. PELL. Mr. President, today the Senate is being asked to extend the 1971 International Wheat Agreement through June 30, 1986. The International Wheat Agreement is composed of two conventions, the Wheat Trade Convention of 1971 and the Food Aid Convention of 1980, which modified the original Food Aid Convention of 1971 to increase the minimum levels of food aid commitments. If the Senate concurs this will be the seventh time that the Wheat Trade Convention has been extended and the second time that the Food Aid Convention of 1980 has been extended.

The Wheat Trade Convention has no mechanisms for interfering in the market, but rather serves very useful functions as an international forum for collecting data on wheat trade and as a locus for discussions to promote international trade in wheat products. The Food Aid Convention commits members to provide minumum annual quantities of food aid, which in the case of the United States totals 4.470 million metric tons annually and is met through already authorized food aid programs under Public Law 480.

The Committee on Foreign Relations considered these conventions on September 24 and unanimously recommended that the Senate give its advice and consent to ratification. I urge my colleagues to support these conventions.

EXECUTIVE SESSION

1983 PROTOCOLS FOR THE FURTHER EXTENSION OF THE 1971 INTERNATIONAL WHEAT AGREEMENT

Mr. WEICKER. Mr. President, what is the pending business?

The PRESIDING OFFICER (Mr. D'AMATO). Under the previous order, the Senate will now go into executive session to conduct a rollcall vote on the resolution of ratification to Executive Calendar No. 3, which the Clerk will state.

The legislative clerk read as follows:

Calendar No. 3, Treaty Document No. 98-5, 1983 Protocols for the Further Extension of the 1971 International Wheat Agreement.

The PRESIDING OFFICER. The question is on agreeing to the Resolution of Ratification.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS], is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. INOUYE], is necessarily absent.

The PRESIDING OFFICER. Are there are other Senators in the Chamber who wish to vote?

The yeas and nays resulted—yeas 98, nays 0, as follows:

[Rollcall Vote No. 239 Ex.]

YEAS—98

Abdnor	Glenn	Metzenbaum
Andrews	Goldwater	Mitchell
Armstrong	Gore	Moynihan
Baucus	Gorton	Murkowski
Bentsen	Gramm	Nickles

NAYS—0

NOT VOTING—2

Inouye	Mathias

The PRESIDING OFFICER. Two-thirds of the Senators present having

voted in the affirmative, the resolution of ratification is agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution of ratification was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEGISLATIVE SESSION

Mr. DOMENICI. I ask unanimous consent to resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. DOMENICI. Mr. President, I ask unanimous consent the Senate now resume debate on S. 1730, the reconciliation bill.

The PRESIDING OFFICER. Is there objection?,

Mr. BYRD. Mr. President, I object.

Mr. DOMENICI. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the role.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CONSOLIDATED OMNIBUS BUDGET RECONCILIATION ACT OF 1985

Mr. DOMENICI. Mr. President, I renew my unanimous-consent request that the Senate proceed to the reconciliation bill which is pending.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The clerk will report.

The legislative clerk read as follows:

A bill (S. 1730) to provide for reconciliation pursuant to section 2 of the First Concurrent Resolution on the Budget for Fiscal Year 1986 (S. Con. Res. 32, 99th Congress).

The Senate resumed consideration of the bill.

Mr. PACKWOOD. Mr. President, it is my extreme pleasure, as chairman of the Committee on Finance, to rise today to encourage the adoption by this body of the $38 billion of deficit reductions as agreed to by our committee during its recent budget reconciliation markup. I want to briefly outline the entire Finance Committee package.

These deficit reductions are not merely my goals, but also those of the overwhelming majority of the members of the Committee on Finance—Democrats and Republicans, conservatives, moderates and liberals alike.

In more than fulfilling our mandate under the congressional budget, the Committee on Finance sought a package that would offer a blend of Federal outlay restraints and increases in revenues which would allow the Senate, the Congress and the Nation to honor its commitments to all Americans.

We believe this package is a worthy complement to the efforts of the other 10 committees of jurisdiction in this budget-writing process.

I am, of course, proud to offer the spending reduction provisions of the Committee on Finance package as a goal met in a manner both fair and equitable.

Specifically, the committee was able to reach its assigned spending reduction goal in a fashion that should not prove injurious to America's elderly and less fortunate, the citizens served by a multiplicity of programs under the committee's umbrella.

A number of programs for lower income people, such as Aid to Families with Dependent Children [AFDC] and Supplementary Security Income [SSI], were not touched.

The reductions the members of the Committee on Finance crafted in the Medicare and Medicaid Programs totaled approximately $12 billion, in the 3-year period covering fiscal years 1986 through 1988.

Our proposed Medicare and Medicaid cuts are modest, indeed, in comparison to the $319 billion the Federal Government will spend for these two programs over the 3 years addressed by the legislation now before us.

However, Mr. President, even the modest cuts which were made, were made only—and I must stress "only"—after our members were assured they would neither unduly harm nor improperly burden the beneficiaries of these Federal programs.

In considering Medicare reductions, for instance, the majority of the reductions proposed are to be achieved by controlling the rate of increase in payments to providers—namely, hospitals and physicians.

But, even here, Mr. President, we have attempted to be more generous to these providers than what they might otherwise receive.

Allow me to illustrate this point.

Hospitals will be allowed a modest increase of one-half of 1 percent in their Medicare reimbursement rates under our committee's proposal.

The administration, on the other hand, has proposed, by regulation, to permit hospitals absolutely no increase in their level of reimbursement.

Some of the other savings we have achieved within our package stem from reducing unnecessary expenditures.

By example, a wide range of sources, including members of the Nation's medical community, have noted that a second surgical assistant is totally unnecessary at routine cataract operations. Our package realizes over $100 million in savings by prohibiting Medicare reimbursement for these assistants at routine operations.

Similarly, the Medicaid spending reductions are affected through increasing collections from private insurance companies which insure Medicaid recipients. This will legitimately reduce Federal and State expenditures—without hurting those recipients.

Our Committee on Finance package also contains a number of other proposals which address Medicare and Medicaid problems. These include the multiplicity of problems which are associated with administration of the Home and Community-Based Services Waiver Program.

In summary, Mr. President, I believe the Committee on Finance's spending reduction package will, if enacted, improve a number of programs while achieving significant savings without placing an undue burden on those who can least afford it, and I'm referring here, of course, to our Nation's impoverished and aged citizens.

While attempting to strike a marriage of equity and fairness with our spending reductions, the committee proposal for $15.757 billion in new revenues represents the end product of considerable deliberation and compromise.

We are pleased, Mr. President, that our revenue package fulfills and slightly exceeds the target assigned us under the budget instructions.

It is with no understatement intended or implied that I note, for the RECORD, that our revenue choices were not easily made.

Any American who has won a desk on this floor knows that raising revenues involves difficult choices, choices many of us would often rather not be called upon to make at all. But make them we must; and that is just what we did, albeit only after many hours of debate, analysis, and negotiation.

The Committee on Finance reached its choices on revenue increases after weighing the effects of its proposals, options, and alternatives on the overall, broad-based economy of this Nation and on the ordinary citizens of this great Republic. I believe we have brought the Senate a product of compromise, one we hope our colleagues will be able to support with their votes.

Allow me to explain the components of the revenue side of our offering, Mr. President.

Included in the package is a provision requiring State and local government workers to be covered by Medicare, effective on October 1, 1986.

We suggest the elimination of income-averaging by former full-time students.

The 16-cents per pack Federal excise tax on cigarettes is made permanent under our proposal and we suggest a

new Federal excise tax on smokeless tobacco and chewing tobacco.

The committee proposal requires additional enforcement personnel for the Customs Service and the Internal Revenue Service, actions which should yield a major increase in compliance.

And the finance plan also contains the Superfund tax and an import duty to fund certain outlays under the Trade Act of 1974.

So, Mr. President, allow me to conclude by complimenting my colleagues on their earnest attempt to meet our spending reduction and revenue increase targets in the spirit of compassion and compromise. It has been my privilege to observe my Committee on Finance colleagues recognize the necessity of compromise, the need for compassion, and the statesmanship essential to the melding of those two qualities.

I would hope our package is the integral linchpin of this budget reconciliation bill which we intended it to be.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. DOMENICI. I thank the Chair.

Mr. President, we are now on reconciliation, and I understand that plans are to remain on reconciliation for a few hours this afternoon. As I understand it, we now have 10 hours remaining. The distinguished Senator from Rhode Island [Mr. CHAFEE] is on the floor, and I understand from him that he is prepared to offer an amendment which would increase the cigarette tax. I am going to yield the floor shortly so that he may do that. However, I would like to make just a couple of observations, and I yield this time to myself off the bill.

We have 10 hours remaining, and this is a rather extensive reconciliation bill in terms of changes in the substantive laws of the land. I would like to call to the Senate's attention that there are a number of provisions in this bill which I would say, without fear, might be called possibly extraneous.

Mr. CHILES. The Senator says "without fear possibly"?

Mr. DOMENICI. Without fear, there are at least some. There are some who might want to challenge over a hundred provisions. They are everywhere, from revenue provisions to welfare, Medicaid, food stamps, and the like.

Since I am not sure that Senators have focused on this issue, I should like to make part of the RECORD at this point a list I have called possible extraneous provisions. The reason I say "possible" is that there is no hard and fast rule as to what "extraneous" means. This list is our best effort at setting forth the possible extraneous programs.

I ask unanimous consent that this list be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

POSSIBLE EXTRANEOUS PROVISIONS

The following list of extraneous provisions was compiled by the majority and minority staff of the Senate Budget Committee.

Page and line of provision	Title I: Agriculture, Nutrition, and Forestry
	Food Stamps and Commodity Distribution:
p. 4, l. 11–24	Publicly operated community health centers.
p. 5, l. 1–4	Modify thrifty food plan definition.
p. 5, l. 5–20	Expanded definition of disability.
p. 5, l. 21–p. 6, l. 20	Food distribution on Indian reservations.
p. 6, l. 21–p. 8, l. 3	Regulatory clarification of third party payments as reimbursements.
p. 9, l. 11–p. 10, l. 7	Child support payments.
p. 10, l. 8–20	Changes definition of homeownership component of CPI.
p. 11, l. 16–p. 12, l. 3	Self-employment income.
p. 14, l. 14–19	Burial plot in resource test.
p. 14, l. 20–p. 16, l. 11	AFDC and SSI categorical eligibility.
p. 16, l. 22–p. 28, l. 17	Strengthen work requirement tests.
p. 29, l. 15–19	Alternative issuance systems.
p. 29, l. 20, p. 32, l. 5	Simplified application process.
p. 32, l. 6–15	Redemption of coupons.
p. 32, l. 16–p. 33, l. 3	Expand food stamp eligibility to homeless.
p. 33, l. 4–15	Authorize special certification procedures in high error rates areas.
p. 33, l. 16–25	Increase eligibility verification procedures.
p. 34, l. 1–14	Photo identification procedures.
p. 34, l. 15–24	Change food stamp issuance procedures.
p. 35, l. 1–11	Establish fraud detection units.
p. 35, l. 12–p. 37, l. 15	Provide information at SSA offices.
p. 37, l. 16, p. 38, l. 6	Extend SSI cash-out demonstration project.
p. 38, l. 7–p. 40, l. 12	Link disqualification of food stamp and WIC retail stores.
p. 40, l. 13–22	Expand liability definition in over-issuance cases.
p. 46, l. 22–p. 47, l. 2	Set administrative standards for review of office hours.
p. 50, l. 8–18	Pilot projects for eliminating cash change.
p. 51, l. 5–14	Prohibit transfer of funds from food stamps to OIG and OGC.
p. 52, l. 2–13	Allow transfer of section 32 commodities.
p. 52, l. 14–22	Reauthorize commodity distribution program.
p. 52, l. 23–p. 54, l. 3	Reauthorize commodity supplemental food program.
p. 54, l. 4–p. 56, l. 18	Reauthorize TEFAP with section 32 commodities.
	Agricultural Credit:
p. 59, l. 1–16	Conduct a study of construction of rural water and waste disposal facilities.
p. 59, l. 17–p. 60, l. 10	Broaden eligibility for 5 percent and 7 percent water waste facilities and community facility loans.
p. 64, l. 5–26	Broaden Secretary's authority to settle debt obligations of FmHA borrowers.
p. 65, l. 1–10	Allow FmHA borrowers to transfer to another county.
p. 65, l. 11–p. 67, l. 2	Authorize prospective loan payments from proceeds generated from leasing of mineral rights on FmHA secured real property.
p. 67, l. 3–p. 72, l. 3	Establish procedures for FmHA agricultural loan applicant hearings.
p. 69, l. 14–p. 72, l. 3	Establish hearing procedures for FmHA rural development loans.
p. 69, l. 14–p. 72, l. 3	Require study of administrative appeals.
p. 72, l. 4–p. 75, l. 11	Provide for sale or lease of farm land in FmHA inventory.
p. 75, l. 12–26	Release of normal income security.
p. 76, l. 1–p. 77, l. 19	Loan summary statements.
p. 82, l. 14–p. 83, l. 7	Require study of farm and home plan.
p. 83, l. 8–p. 84, l. 10	Require study of Farm Credit Administration.
p. 92, l. 9–p. 93, l. 17	Title II: Armed Services Committee: Medicare reimbursement for CHAMPUS patients.
	Title III: Banking, Housing, and Urban Affairs: No extraneous provisions in bill.
	Title IV: Commerce, Science, and Transportation: No extraneous provisions in bill.
p. 131, l. 11–19	Title V: Energy and Natural Resources: FERC administrative provision.
	Title VI: Environment and Public Works: No extraneous provisions in bill.
	Title VII: Finance
	Medicare:
p. 149, l. 1–18	Application of revised hospital wage index.
p. 161, l. 14–p. 162, l. 25	Continuation of Medicare reimbursement waivers for certain hospitals participating in regional hospital reimbursement demonstrations.
p. 163, l. 1–16	Continuation of hospital cost control systems for certain States.
p. 163, l. 17–p. 164, l. 6	Valuation of assets for donations of State property to nonprofit corporations.
p. 164, l. 7–16	Indirect teaching adjustment for certain clinics.
p. 164, l. 17–25	Psychologists' services.
p. 165, l. 1–24	Extension and payment for hospice care.
p. 166, l. 1–21	Moratorium on laboratory payment demonstration.
p. 166, l. 22–p. 167, l. 6	Home health waiver of liability.
p. 167, l. 7–12	Moratorium on implementation of home health payment regulations.
p. 167, l. 13–p. 168, l. 4	Studies relating to physical therapists and other professionals.
p. 170, l. 14–19	Continuation of end stage renal disease networks.
p. 170, l. 20, p. 171, l. 3	Extension of certain medicare municipal health services demonstration projects.
p. 171, l. 4–p. 174, l. 20	Coverage of respiratory care services for ventilator-dependent individuals.
p. 175, l. 10–p. 179, l. 2	Access to skilled nursing facilities.
p. 180, l. 1–13	Timely publication of payment rates for health maintenance organizations.
p. 191, l. 8–p. 193, l. 14	Correction of inappropriate medicare reasonable charge determinations for hospital-based physicians.
p. 199, l. 1–p. 202, l. 19	Demonstration of preventive health services under medicare.
p. 208, l. 5–p. 209, l. 14	Extension of On Lok waiver.
p. 209, l. 15–p. 210, l. 2	Additional members of Prospective Payment Assessment Commission.
p. 210, l. 3–18	Removal of prohibition on comments by medicare and social security actuaries relating to economic assumptions.
p. 210, l. 19–25	Extension of GAO reporting date.
p. 211, l. 2–12	Health maintenance organization membership on peer review organization boards.
p. 211, l. 13–p. 212, l. 3	Peer review organization reimbursement.
p. 212, l. 19–p. 213, l. 10	Substitute review pending termination of a peer review organization contract.
	Medicaid:
p. 214, l. 7–p. 215, l. 12	Services for pregnant women.
p. 215, l. 13–p. 216, l. 20	Technology dependent children.
p. 216, l. 21–p. 217, l. 10	Optional hospice care.
p. 217, l. 11–18	Extension of Texas long-term care waiver.
p. 225, l. 20–p. 228, l. 6	Revaluation of assets under Medicaid Program.
p. 228, l. 7–16	Beginning date of optional coverage for individuals in medical institutions.
p. 228, l. 17–23	Optional coverage of children.
p. 229, l. 1–p. 230, l. 3	Overpayment recovery rules.
p. 230, l. 4–11	Waiver extensions for home and community-based services.
p. 230, l. 12–22	Waiver renewals for home and community-based services.
p. 232, l. 19–24	Life safety code recognition.
p. 233, l. 1–7	Regulations for intermediate care facilities.
p. 233, l. 8–p. 235, l. 5	Modifying application of Medicaid HMO provisions for certain health centers.
p. 235, l. 6–15	Annual calculation of Federal medical assistance percentage.
p. 236, l. 9–17	Wisconsin health maintenance organization waiver.
p. 236, l. 18–p. 238, l. 10	Clarification of Medicaid moratorium provisions of the Deficit Reduction Act of 1984.
p. 238, l. 11–p. 239, l. 19	Home and community-based services demonstrations.
p. 239, l. 20–p. 240, l. 9	Participants under home and community-based service waivers.
p. 240, l. 10–17	New Jersey demonstration project relating to training of AFDC recipients as home health aides.
p. 240, l. 18–p. 243, l. 5	Intermediate care facility correction plans.
	Maternal and Child Health:
p. 243, l. 7–16	Elimination of 2-year limit for obligation of funds under maternal and child health block grant.
p. 243, l. 17–p. 244, l. 15	Children with special health care needs.
	Social Security:
p. 244, l. 17–p. 245, l. 19	Demonstration projects involving the Disability Insurance Program.
p. 245, l. 20–p. 250, l. 19	Disability Advisory Council.
p. 250, l. 20–p. 251, l. 24	Taxation of Social Security benefits received by certain citizens of possessions of the United States.
p. 252, l. 1–10	Application of dependency test to adopted great-grandchildren for purposes of child's insurance benefits.
p. 252, l. 11–22	Elimination of requirement for publication of revisions in pre-1979 benefit table.
p. 252, l. 23–p. 253, l. 6	Formula clarification.
p. 253, l. 7–23	Extension of 15-month reentitlement period to childhood disability beneficiaries subsequently entitled.
p. 254, l. 1–14	Charging of work deductions against auxiliary benefits in disability cases.
p. 256, l. 5–21	State coverage agreements.
p. 257, l. 1–26	Effect of early delivery of benefit checks.
p. 258, l. 1–p. 261, l. 8	Preservation of benefit status for disabled widows and widowers who lost SSI benefits because of 1983 changes in actuarial reduction formula.
p. 261, l. 9–25	Exemption from social security coverage for retired Federal judges on active duty.
p. 262, l. 1–p. 264, l. 2	Recovery of overpayments.
p. 264, l. 3–p. 265, l. 2	Study of benefit formula notch.
	AFDC and SSI:
p. 265, l. 11–p. 268, l. 2	Quality control studies and penalty moratorium.
p. 270, l. 1–13	SSI passthrough relating to State supplementation.
p. 268, l. 3–25	Recovery of excess funding for automated systems.

Page and line of provision	Title I: Agriculture, Nutrition, and Forestry
p. 270, l. 14–p. l. 24	Provisions relating to medicaid coverage under the adoption assistance program.
p. 272, l. 1–p. 273, l. 6	Extension of voluntary placement and ceiling and trigger provision relating to foster care.
p. 273, l. 7–p. 279, l. 14	Independent living initiative.
	Revenue Provisions:
p. 312, l. 1–p. 320, l. 24	Employers required to provide certain employees and family members with continued health insurance coverage at group rates.
p. 321, l. 1–p. 321, l. 15	Exclude parents of airline employees from tax on free airline tickets.
p. 321, l. 16–p. 324, l. 14	Extend free airline pass privileges to in-house support personnel of airlines.
p. 324, l. 15–p. 325, l. 24	Specify when campus housing provided to faculty is tax-exempt.
p. 326, l. 1–p. 327, l. 25	Reduce alternative minimum tax for insolvent taxpayers.
p. 328, l. 1–p. 329, l. 23	Allow Gulf Coast Waste Disposal Authority to issue IDB's.
p. 330, l. 1–p. 333, l. 21	Clarify treatment netting of gains and losses by cooperatives.
p. 334, l. 1–p. 334, l. 5	Extend moratorium on research and development allocation.
p. 372, l. 3–p. 415, l. 9	Tobacco price support program (Agriculture Committee jurisdiction).
p. 431, l. 17–24	Terminate black lung fund's authority to borrow from general revenues.
p. 432, l. 1–24	Miscellaneous exemptions from unemployment tax.
p. 433, l. 9–13	Increase the Treasury limit on long term bonds from $200 billion to $250 billion.
p. 433, l. 21–p. 436, l. 22	Amend and extend existing provisions awarding attorney's fees against the United States in tax cases.
p. 447, l. 19–p. 448, l. 13	Title VIII: Governmental Affairs: Amendment to improve the benefits provided under the Federal Employees Health Benefit program (FEHBP) in medically underserved areas.
	Title IX: Labor and Human Resources:
p. 517, l. 14–p. 529, l. 10	Reforms of graduate medical education to set physician manpower goals.
p. 499, l. 1–p. 517, l. 13	Public Health Service Act amendments to require hospitals to treat the indigent and to require employers to provide health insurance.
	Title X: Small Business: No extraneous provisions in bill.
	Title XI: Veterans' Affairs: No extraneous provisions in bill.

Mr. DOMENICI. Mr. President, in my opinion we have some responsibility to address the fact that the listed provisions are possibly extraneous. I should like very much to avoid setting a precedent that we are willing in reconciliation to accept as part of reconciliation such a large number of extraneous provisions as we have before us.

On the other hand, I understand that, for the most part, most of these provisions have very broad support.

As chairman of the Budget Committee, I am in a position that, from time to time, Senators say, "We should not be using reconciliation for such broad purposes." Some even think the Senate ought not to instruct authorizing committees to change laws within their jurisdiction, even if we ask them to change it in a way that saves money. We have argued that before, and clearly the precedents are that authorizing committees can be instructed as part of the reconciliation process.

We now have committees submitting extraneous provisions to reconciliation because of the benefits of time and germaneness restrictions on consideration of reconciliation bills. These Budget Act limitations on debate and amendments are a very serious matter.

I do not intend, as chairman of the Budget Committee, to be the traffic cop and move to strike all extraneous provisions. Obviously, extraneous provisions are subject to a motion to strike. Any Senator who wants to strike them, can offer a motion and and have a vote.

However, I think that before we finish here, we should give some consideration to an approach that would provide that if the Senate wants to take up a reconciliation bill which contains extraneous provisions, we should consider, from the standpoint of the institution, agreeing that they are possibly extraneous, and handling them separately.

If we did that by unanimous consent, then at least we would avoid setting the precedent that the Senate is not concerned about extraneous provisions.

I am in the process of developing that kind of unanimous-consent language. I will not propose it now. There are a number of interested Senators, and I will begin to circulate it as an idea to get out of the dilemma we are in.

Having said that, let me repeat that I do not intend to try to strike these extraneous matters en bloc. I do not like the fact that the reconciliation bill contains extraneous provisions when some committees do not want to even use reconciliation. I clearly think, however, that we have the responsibility to avoid setting the precedent that we don't care about extraneous provisions.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. DOMENICI. I yield the floor.

Mr. CHILES. Mr. President, the Budget Committee discussed this and in the Budget Committee they actually made a motion. I read from the report:

NONBUDGETARY PROVISIONS

The Budget Committee believes that the inclusion of non-budgetary provisions in a reconciliation bill is inconsistent with the spirit and letter of the Budget Act, damages the credibility of the budget process, and could have the effect of circumventing Rule XXII of the Standing Rules of the Senate.

The problem of so-called "extraneous matters" became a major issue in 1981, during Senate consideration of S. 1377, the Omnibus Reconciliation Act of 1981. A number of provisions which we determined to be clearly extraneous were stricken from that bill. A special time agreement was entered into with respect to other provisions which some Senators contended were extraneous.

The Budget Committee has authorized the Chairman and Ranking Minority Member to consult with the Chairman and Ranking Minority Members of committees which have submittted legislation, and with the Senate Majority and Minority leadership, to identify any clearly extraneous matters in this bill and to reach an agreement on any amendments which may be necessary to eliminate such matters from the bill. The Budget Committee recommends that such amendments as agreed upon be adopted by the Senate.

This is no small matter. I think it is one of great importance. We are about to embark on a precedent here that may haunt us for a long time.

I think we have all discussed the great traditions of the U.S. Senate and the fact that we are a body of rules, that those rules have been of long standing. Those rules are made to protect the body and to protect a minority, to protect the committee system, to protect our way of doing business that prohibits steamrollering and prohibits a bare majority from being able to ride roughshod over the rest.

I remember, as a freshman in the Senate, when there was considerable debate about whether we were going to allow the amendment of our rules, whether they were continuing rules, whether they existed from our Congress to another, and whether we should change the rule for the vote on rule XXII. That went on for 3 years and consumed hours and hours, and I listened to some interesting debate and a lot of history.

We know that at one time rule XXII fell into disrepute because it was used as an effort to block civil rights legislation at the time, and the term "filibuster" came into play at that time. But the interesting thing was that even during that process, a majority was never totally thwarted and eventually ruled the day.

On the other side of the coin, I think that rule XXII has protected the country time after time in the rushing through of appointments. There would be a totally different makeup of the U.S. Supreme Court if it were not for rule XXII. There would be a totally different procedure with regard to treaties that had been adopted if it were not for rule XXII. Probably the one characteristic that most distinguishes this body from any other parliamentary body in the world is the right of extended debate.

Here, through a process that was streamlined on the pure question of budgetary matters, we now see the door being opened by interpretation of some rulings that will allow simply a bare majority on any committee to put material in here that is not even within the jurisdiction of the committee. So one committee can go into another committee's jurisdiction.

My goodness, if that had come up in the 1970's, if someone had raised that, I know that we would have censured whoever would have tried to do it. No one would have thought about trying to do that. We have enough chaos in this body.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. CHILES. I yield.

Mr. BYRD. The Budget Reform Act would not be on the books. The Senate would not even have adopted what has become a monstrosity, the way it is being used. It would not have been on the books. We would not be arguing

about the situation today, because this had never been anticipated.

Mr. CHILES. I thank the distinguished minority leader. The Senator from West Virginia is exactly right. It would not have been on the books. He is one who is continually trying to protect the Budget Act against people saying that we have too much power and we are into too many things and we are changing the system and we are causing these delays.

We are begging this body: "Don't put this on our back. Don't do this to the Senate or to us as the Budget Committee."

We know that it is only a question of time before this has to explode, when a bare majority takes over.

So this is something we will be talking about a lot during the next 10 hours.

We may not be able to stop things under it. I hope that we can at least get some process that allows people to have their shot at any of these extraneous amendments that are there, the hundreds of them, but at the same time does not set some kind of a binding precedent or a precedent that will come back and haunt us.

We had a major procedural crisis last year over the Grove City civil rights bill. Yet a majority of any committee in the Senate could have caused the entire bill to be here in this bill and protected from the filibuster. So whatever side you are on some of these questions, whether it is line-item veto or prayer in the school or Grove City, this lends itself for abuse of a one-vote majority being able to come and destroy all the precedents, all of the rules that have governed the Senate in the past.

Mr. President, I hope we are going to be able to work this situation out so that we will not be setting this kind of precedent.

Mr. PRESSLER. Mr. President, S. 374, as amended would reauthorize funding for the Travel and tourism Administration. This legislation would authorize funding of $12 million, $13 million, and $14 million for fiscal 1986 through 1988, respectively. This is limited funding for an agency that has increased revenues from foreign sources and contributed favorably toward reducing our trade deficit.

Travel and tourism is the third largest retail industry in the United States and one of the top three employers in 39 States. The aggressive programs of the USTTA have had a positive economic impact on each State in this country and the dollar amounts will grow. It is estimated that by 1990 tourism will be out No. 1 retail industry.

USTTA is the umbrella that brings Government and the travel and tourism industry together, developing programs that the industry could not otherwise achieve. There are nine overseas offices. Each office has an aggressive marketing plan and a cooperative advertising program with industry, selling America as a generic destination. Their theme is "America. Catch the Spirit."

Mr. President, I urge my colleagues to "catch the spirit" by joining in support of these funding levels for the USTTA. This funding is more than justified by the increasing importance of travel and tourism to the American economy. Each of us, in every State, will benefit from the outstanding job being done by the USTTA.

Mr. DOMENICI. Mr. President, I would like to take just one more minute, if I might. I have a letter dated October 18 that was sent to the distinguished majority leader, who in turn gave it to the Senator from New Mexico and others. That letter, from the Chief of Staff to the President, Mr. Reagan, indicates that the President's advisers will recommend that the President not sign the reconciliation bill if some of the bill's provisions are not deleted.

I do not think I am discussing anything new, but I am not sure it has been made a part of the RECORD, and I would like to do that at this point, after just pointing out that the letter objects to three separate provisions that have to do with taxes—the financing of the Superfund, the additional 8-cent tax on tobacco which is extended, and a new tax on imports to finance an expanded Trade Adjustment Assistance Program.

It goes on to discuss what he, on behalf of the White House staff, sees wrong with those provisions or at least objectionable. Then this letter objects to three other provisions, dealing with the OCS Lands Act, section 8(g); overturning or delay of several Medicare regulations; and the moratorium on collection of financial penalties levied on States for erroneous payments they have made under AFDC and Medicare. So that this will be a matter of record, I ask unanimous consent that it be printed in the RECORD.

Mr. BYRD. Will the distinguished Senator yield?

Mr. DOMENICI. I am pleased to yield.

Mr. BYRD. The Senator is placing in the RECORD a letter. Would I be presumptious to ask the distinguished chairman of the Budget Committee to read the letter so that all of us will have the benefit of knowing fully what is in the letter as we proceed to debate the reconciliation matter this afternoon?

Mr. DOMENICI. I have no objection. As a matter of fact, I will do that and also will give to the distinguished minority leader the letter.

Mr. BYRD. I thank the distinguished chairman.

Mr. DOMENICI. It is dated October 18.

As you know, the administration has serious reservations about the reconciliation bill pending before the Senate. I believe it is important for you to know that if some of the bill's provisions are not deleted, the President's advisers will recommend that he not sign it.

One serious problem with the bill is that it contains three separate tax increases—a new broad-based tax on manufacturers to finance Superfund, an extension of the additional 8-cent tax on tobacco, and a new tax on imports to finance an expanded trade adjustment assistance program. The President opposes such tax increases. The value-added Superfund tax runs counter to the principle that hazardous waste cleanups should be financed by those who are chiefly responsible for the problem, and it would impose huge administrative burdens. The new import tax is contrary to our GATT obligations, and would tax the 60 percent of our imports that now enter duty free. The President has not changed his view that the additional 8-cent cigarette tax should be allowed to expire this year.

There are at least three other seriously objectionable provisions.

First, the bill's provision to settle the OCS Lands Act section 8(g) issue is unacceptable. The Committee's action will result in the loss of $6–$12 billion to the Federal Treasury in the years ahead.

Second, the administration is strongly opposed to provisions of the Finance Committee bill that would overturn or delay several medicare regulations promulgated in final form by the Administration. Although the reconciliation bill shows medicare savings involving these issues of $7.7 billion, the Senate provisions would, in fact, raise outlays over current law by $949 million in 1986–88.

Third, the bill's moratorium on collection of financial penalties levied on States for erroneous payments they have made under AFDC and Medicaid would seriously undermine administration and congressional efforts to deter fraud, waste, and abuse.

In short, this bill is not acceptable in its current form.

Sincerely,

I would ask my distinguished friend, the minority leader, if he would mind charging that reading equally to his side and mine.

Mr. BYRD. Not at all.

The letter is signed by Donald T. Regan?

Mr. DOMENICI. Yes, I indicated that at the outset.

Mr. BYRD. I thank the distinguished Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 839

(Purpose: To increase the cigarette tax by 8 cents)

Mr. CHAFEE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Rhode Island [Mr. CHAFEE], for himself, Mr. BINGAMAN, Mr. HATFIELD, Mr. STAFFORD, Mr. PELL, and Mr. BRADLEY proposes an amendment numbered 839.

Mr. CHAFEE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment reads as follows:

On page 372, strike out lines 5 through 10 and insert in lieu thereof the following:

SEC. 790. INCREASE IN TAX ON CIGARETTES.

(a) RATE OF TAX.—Subsection (b) of section 5701 of the Internal Revenue Code of 1954 (relating to rate of tax on cigarettes) is amended—

(1) by striking out "$8" in paragraph (1) and inserting in lieu thereof "$12"; and

(2) by striking out "$16.80" in paragraph (2) and inserting in lieu thereof "25.20".

(b) FLOOR STOCKS.—

(1) IMPOSITION OF TAX.—On cigarettes manufactured in or imported into the United States which are removed before November 15, 1985, and held on such date for sale by any person, there shall be imposed the following taxes:

(A) SMALL CIGARETTES.—On cigarettes, weighing not more than 3 pounds per thousand, $4 per thousand;

(B) LARGE CIGARETTES.—On cigarettes, weighing more than 3 pounds per thousand, $8.40 per thousand; except that, if more than 6½ inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per thousand, counting each 2¾ inches, or fraction thereof, of the length of each as one cigarette.

(2) LIABILITY FOR TAX AND METHOD OF PAYMENT.—

(A) LIABILITY FOR TAX.—A person holding cigarettes on November 15, 1985, to which any tax imposed by paragraph (1) applies shall be liable for such tax.

(B) METHOD OF PAYMENT.—The tax imposed by paragraph (1) shall be treated as a tax imposed under section 5701 of the Internal Revenue Code of 1954 and shall be due and payable on December 2, 1985, in the same manner as the tax imposed under such section is payable with respect to cigarettes removed on November 15, 1985.

(3) CIGARETTE.—For purposes of this subsection, the term "cigarette" shall have the meaning given to such term by subsection (b) of section 5702 of the Internal Revenue Code of 1954.

(4) EXCEPTION FOR RETAILERS.—For taxes imposed by paragraph (1) shall not apply to cigarettes in retail stocks held on November 15, 1985, at the place where intended to be sold at retail.

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendment made by subsection (a) shall apply with respect to cigarettes removed after November 14, 1985.

(2) CONFORMING AMENDMENT.—Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended by striking out "and before November 15, 1985".

Mr. CHAFEE. Mr. President, I am joined in this amendment by Senators BINGAMAN, HATFIELD, STAFFORD, PELL, and BRADLEY.

Mr. President, I would be glad to enter into a time agreement with the floor managers of the bill if they so sought.

Mr. DOMENICI. Mr. President, I say to the Senator, I would rather not at this time, although in very short order I believe we will be able to do that.

Mr. CHAFEE. If I understand, we have 2 hours anyway; is that correct?

The PRESIDING OFFICER. There are 2 hours on first-degree amendments.

Mr. CHAFEE. Evenly divided.

Mr. President, the amendment I have sent to the desk and cosponsored by Senators BINGAMAN, HATFIELD, STAFFORD, PELL, and BRADLEY—and we are open to others, there is no limitation on the number that can cosponsor this—provides that the current excise tax on cigarettes of 16 cents will be continued and will be increased by an additional 8 cents, making a total of 24 cents cigarette tax per package.

This amendment does not earmark the revenue. This amendment will decrease the deficit by an additional $4 billion over the next 3 years.

The thrust of this amendment is twofold: First, we need the additional revenue. When we are running a deficit that has been estimated between $174 billion and $200 billion for 1986, I think we better take every penny we can find.

The second rationale for the amendment, Mr. President, is that increased taxes on cigarettes decrease consumption, particularly amongst the younger people, and prevents them from being cigarette addicts for the balance of their lives.

Each of us, Mr. President, whether a smoker or not, pays for the health care needs of smokers, either through health insurance premiums or through our taxes funneled into government programs which care for those ailing as a result of having smoked an excessive number of cigarettes.

According to the Office of Technology Assessment, cigarette smoking accounts for $22 billion in medical care costs and $43 billion in lost economic productivity each year—$22 billion in medical costs, $43 billion in lost productivity each year. Cigarette smoking costs taxpayers $4.2 billion a year through Medicare and Medicaid Programs.

Dr. Gerald Oster, an economist with Policy Analysis, Inc., of Boston, testified before the House Ways and Means Committee in June of this year that reimbursement to society for all of these costs would require an increase in the cigarette tax to $3 per package, and reimbursement for medical care costs alone would require an increase in the tax to 30 cents a package—an additional 30 cents.

Mr. President, I am only asking for 8 cents additional, making a total of 24 cents.

Medical evidence of the incidence of tobacco-related diseases among users of cigarettes demonstrates the correlation between smoking and increased health care costs. An increased Federal excise tax on cigarettes is a tax imposed on tobacco users for the resulting excess health care costs they impose on our health care system—in other words, have those who are causing the excess cost bear part of the burden—part of the burden, Mr. President; nowhere near the complete burden.

All of us clearly have an interest in promoting better health in the general population, the long-term benefits for federally funded health care programs are clear. In these times of fiscal austerity, we must closely examine the health care costs imposed on taxpayers by tobacco users. The deficit is increasing and health care spending accounts for a major portion of the Federal budget. It is fair to ask smokers to contribute more for the costs they impose on our health care programs.

Not only would an increased excise tax on this product be fair and help reduce the deficit, but it will also help discourage smoking.

In the Tax Equity and Fiscal Responsibility Act [TEFRA], the legislation we passed, Congress doubled the excise tax on cigarettes from 8 cents to 16 cents for a 3-year period ending October 1, 1985. In "Cigarette Taxation: Doing Good by Doing Well," author Kenneth Warner stated that the doubling of the excise tax caused one and a quarter million adult Americans to stop smoking and one-half million teenagers to stop or not start smoking. Teenage smoking decreased by 14 percent. Adult smoking decreased by 4 percent.

By helping to discourage smoking, an increased excise tax will help improve the overall health of the country. Cigarette smoking is the No. 1 preventable cause of death and disability in this country—the No. 1 cause. That is not disputed. Over 350,000 Americans die of smoking-related diseases annually. Nine million people suffer from chronic bronchitis and emphysema due to smoking. Anyone who has ever seen a sufferer of emphysema knows well the ravages of that disease.

There are those who say that smoking is a decision each of us should make and that Congress should not be attempting to influence these decisions through an excise tax. However, there are some personal decisions which have a great impact on all of society—smoking falls into this category as I pointed out by the demands it makes on our national health care system.

It creates an increased demand on our health care system, much of which is subsidized by the Federal Government. All of us, whether we smoke or not, pay for the health care needs of smokers—either through insurance premiums or our taxes.

Early this month I held a hearing on the issue of an increase in the ciga-

rette excise tax in the Subcommittee on Taxation and Debt Management. It was clear from those hearings that there is a great deal of support for an increase in the excise tax from a wide variety of health organizations.

I have a list of 44 health organizations that are interested in the increase in this tax. It ranges from the American Cancer Society, American Heart Association, American Lung Association, American College of Obstetricians and Gynecologists, American College of Physicians—44 of the most imminent health organizations in our Nation.

Mr. President, I ask unanimous consent to have printed in the RECORD the list of organizations supporting an increase in the Federal cigarette excise tax.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

LIST OF ORGANIZATIONS SUPPORTING AN INCREASE IN THE FEDERAL CIGARETTE EXCISE TAX

1. American Cancer Society—the world's largest voluntary health agency, devoted to research, education, and service to the cancer patient, with over 2.3 million members.

2. American Heart Association—one of the largest voluntary health agencies in the U.S., and the only such agency that devotes all of its resources to the goal of reducing premature death and disability due to cardiovascular disease and stroke.

3. American Lung Association—the nation's oldest voluntary health organization, committed to the prevention and control of lung disease.

4. American Public Health Association—an association of over 50,000 community health leaders and health professionals working for the public health.

5. American Association of Retired Persons—the largest organization representing older persons, with 18 million members; committed to advocacy and programs to meet the needs of the older population.

6. Association of State and Territorial Health Officials—the professional organization representing the chief health officials of every state and territory in the United States.

7. Children's Defense Fund—a national public charity that provides a strong and effective voice for children and adolescents, particularly those from poor and minority families, in public policy forums.

8. National Board, Young Women's Christian Association (Y.W.C.A.) of the U.S.A.—an organization of 2.5 million members and participants working to promote equity, justice, peace, freedom and dignity for all people, but particularly for women and girls.

9. National Council on the Aging, Inc.—a national organization representing providers of services to the elderly which serves as a principal advocate for issues of concern to our older population.

10. National Association of Elementary School Principals—a professional organization serving more than 22,000 elementary and middle school principals in the United States and overseas, and believing that the progress and well-being of the child must be at the forefront of all elementary and middle school plans and operations.

11. American Association of Dental Schools—an organization representing all sixty dental schools in the United States, their faculties and students, and their dental hygiene and hospital-based residency programs.

12. American Diabetes Association—a national voluntary health organization whose two-fold mission is to support the search for prevention or cure for diabetes and to improve the well-being of people who have diabetes and their families; consisting of 170,000 members, 5500 professional members, 58 affiliates, and 700 chapters.

13. American Medical Student Association—an independent organization of more than 30,000 medical students committed to improvement of medical education and ensuring access to quality health care services.

14. Adventist Health Network—people who enjoy helping others, through education and direct assistance, in 800 centers connected with Adventist churches and schools across the country.

15. American Association of Preferred Provider Organizations—a professional association of competitive alternative health care delivery systems.

16. Association of American Cancer Institutes—all 59 privately and publicly funded cancer centers across the country, providing research, care, and teaching.

17. American Academy of Allergy and Immunology—a professional organization dedicated to the advancement of knowledge and practice of allergy and immunology and providing better care to victims of these diseases.

18. Asthma and Allergy Foundation of America—a nationwide network of over 100 chapters and support groups and tens of thousands of concerned individuals banded together with a common mission to eradicate asthma and allergic diseases.

19. American Gastroenterological Association—4,000 physicians concerned with digestive diseases.

20. Center for Science in the Public Interest—a consumer advocacy membership organization that seeks to improve national policies with regard to health and nutrition.

21. Association of Schools of Public Health—representing the 23 accredited graduate schools of public health in the United States.

22. National Tax Equality Association—a business coalition examining current tax reform, with 1,500 business members.

23. American Association for Respiratory Therapy—a 27,000 member professional association for respiratory therapy practioners across the country.

24. American Academy of Otolaryngology—Head & Neck Surgery, Inc.—a professional association concerned with ear, throat, nose, head and neck surgery, with approximately 7,500 members.

25. American College of Osteopathic Pediatricians—a professional organization of osteopathic physicians providing care to children.

26. Association of Junior Leagues—an international women's volunteer organization with 244 member leagues in the U.S. representing approximately 149,000 individual members, promoting the solution of community problems through voluntary citizen involvement, and training members to be effective voluntary participants in their communities.

27. National Perinatal Association—an interdisciplinary organization of professionals providing health care to infants and pregnant women.

28. American Academy of Otolaryngic Allergy—an organization of physicians specializing in the treatment of the ears, nose, throat and related structures of the head and neck, with 1,200 members.

29. American Society of Clinical Oncology—4,500 clinical oncologists specializing in the treatment of cancer.

30. American Nurses Association—the largest professional association representing registered nurses in the country, with 185,000 members.

31. American Society of Internal Medicine—representing 18,000 physicians who specialize in internal medicine, and concerned with the socioeconomics of medical care delivery.

32. National Association of Children's Hospitals and Related Institutions (NACHRI)—represents 82 children's hospitals nationwide. Its goal is to serve as an advocate for improved child health and the delivery of comprehensive quality health services for all children.

33. American College of Chest Physicians (ACCP)—is a professional medical speciality society representing more than 11,000 physicians, scientists and educators specializing in pulmonary and cardiovascular diseases.

34. American Council on Science and Health (ACSH)—is a national consumer education association directed and advised by a panel of scientists from a variety of disciplines. ACSH is committed to providing consumers with scientifically balanced evaluations of issues relating to food, chemicals, the environment, and health.

35. American Academy of Pediatrics—an organization of 27,000 pediatricians dedicated to the health, safety and well-being of infants, children, and adolescents in North, Central, and South America.

36. The United Methodist Church, Department of Human Welfare—The United Methodist Church has 9.5 million members. The Department of Human Resources is responsible for the Church's positions on issues of public health and policy.

37. American Licensed Practical Nurses' Association—a professional association of more than 3,000 licensed practical and vocational nurses who provide bedside nursing in settings including nursing homes, hospitals, clinics, community health centers.

38. American College of Cardiology—A 14,000 member, nonprofit professional medical society and teaching institution, dedicated to ensuring optimal care for persons with cardiovascular disease or those with the potential of developing cardiovascular disease, and through education and socio-economic activities, to contributing significantly to prevention of cardiovascular disease.

39. American Nephrology Nurses' Association—an organization representing approximately 3000 registered professional nurses and allied health professionals involved in all modalities of care and treatment, including hemodialysis, peritoneal dialysis, and transplantation, of patients with renal disease.

40. National Alliance of Senior Citizens, Inc.—a national membership organization which focuses its attention on major issues facing older Americans; it is moderate to conservative in political philosophy, and has a membership of more than 3.5 million persons.

41. Terry Gotthelf Lupus Research Institute—established to help millions of lupus victims in the world and to encourage, coordinate, and direct future progress in the etiology, diagnosis, and treatment of this illness.

42. American Medical Association—a voluntary society of physicians founded to promote and improve the science and art of medicine and the betterment of public health. With approximately 250,000 members, the AMA's varied activities are directed toward achieving excellence among physicians and assuring the American public of the highest quality medical care possible.

43. American College of Obstetricians & Gynecologists—an organization representing over 25,000 obstetricians and gynecologists who specialize in women's health care.

44. American College of Physicians.

Mr. CHAFEE. Mr. President, I would also like to point out that there is a great deal of support throughout our country for an increase in the excise tax on cigarettes. In February of 1984, a poll found that 77 percent of registered voters supported an increase in the tax to 32 cents a pack. That is only to 24 cents.

I ask uanimous consent that the Time magazine article describing these results be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MAIN STREET IS WORRIED TOO

While the White House feuds and Wall Street frets about runaway federal deficits, Main Street is deeply concerned too. The issue has become the most visible and powerful symbol of the general public's fears about the outlook for the U.S. economy.

That was the main finding of a new poll conducted for Time by Yankelovich, Skelly & White. The survey of 1,000 registered voters, taken from Jan. 31 to Feb. 2, found that nearly 90% view the deficits as a serious economic problem. Even more, 95%, consider Congress to be responsible for the present and projected budget gaps, while 87% blame President Reagan.

When respondents were asked what should be done about the deficits, only a fraction favored cutting social spending. The majority said that they would prefer to see a decrease in military outlays. In addition, they rejected an increase in personal income taxes as a means of reducing the shortfall. By far the most popular revenue-raising measure was a higher tobacco tax.

Those questioned were surprisingly unimpressed by the drop in inflation, which tumbled from 12.4% in 1980 to 3.8% last year. A stunning 44% of the respondents were unaware that inflation had gone down. Only 20% thought that the end of spiraling prices had affected them a lot. Slightly more than one-third, by contrast, said the break in inflation had not affected them at all. When asked to pick reasons for inflation's decline, two-thirds cited the drop in oil prices as a cause. Some 59% mentioned the recession and high unemployment, while 54% saw President Reagan's economic policies as a factor.

The survey also found that most Americans still consider joblessness, which has fallen from 10.7% to 8% in the past 15 months, a major concern. As many as 75% of those polled said that they regard unemployment as a key voting issue. Still more, 80%, expect the level of inflation to influence their vote. One out of every two respondents said inflation would be at its present level at the end of 1984. And while 28% look for a higher year-end rate, only 19% thought that the level would drop.

Many of those polled remain convinced that business occupies an unduly privileged position in American society. More than half said that companies do not pay enough taxes, while seven out of ten thought that corporate managers were overpaid. A sizable majority favored raising business taxes in order to close the budget gap.

The survey showed that much of the public was scarred by the 1981–82 recession and remains wary about the outlook for the future. Fully 50% of those questioned reported no improvement in their standard of living over the past year. Moreover, people's expectations about how they will fare in the coming months have barely improved since the depth of the slump in December 1982. Some 50% saw better days ahead for themselves when questioned then, compared with 52% today.

The public is clearly concerned about the future of the economy. Yankelovich found that 52% believe the recovery that got under way just over a year ago will prove to be temporary. Only 40%, on the other hand, said they expect the economic improvement to last.

Mr. CHAFEE. Mr. President, I have talked generally about the health risks involved with cigarette smoking, I would like to take a moment to be more specific.

SMOKING FACTS

First. Over 350,000 Americans die each year of the effects of cigarette smoking: That is 1,000 every day.

Second. Cigarette smoking costs our society in excess of $41 billion annually in health care costs, lost work time and lost productivity.

Third. More than one out of every seven deaths in this country are smoking related.

Fourth. Eighty percent of all lung cancer deaths in this country are caused by smoking.

Fifth. Cigarette smoking causes one-third of all heart disease deaths in this country and heart disease accounts for nearly one-half of all deaths.

Six. Perhaps almost 10 percent of all persons now alive—or 24 million Americans—may die prematurely of heart disease attributable to cigarette smoking, unless smoking habits are changed.

Seven. Listen to this statistic, Mr. President. Children of smoking parents have an increased risk of bronchitis and pneumonia early in life and seem to have a small but measurable difference in the growth of lung functions.

Eighth. Listen to this one. Maternal smoking during pregnancy significantly increases the risk of spontaneous abortion, miscarriage, bleeding during pregnancy, still-birth, and sudden infant death syndrome.

These are just some of the health risks associated with cigarette smoking. And all of them cost the Federal Government money. They either cost the Government money directly through programs like Medicare and Medicaid, or through increased premiums in private health insurance for which we provide a tax deduction.

Why is it argued that it is wrong to ask those individuals who smoke to pay a little more—just 8 cents more per package—for the costs they impose on the rest of us?

One objective to raising the excise tax is that it is regressive—that is it affects the poor, minorities and the elderly more than other groups. Research by Dr. Jeffery Harris of the Massachusetts Institute of Technology indicates, however, that low-income Americans smoke less than middle-income Americans. Professor Harris also finds that older Americans have much lower smoking rates than the general population. He also found that in considering the number of cigarettes smoked per day, the actual dollar burden of a cigarette tax increase is greater for whites than for blacks in every income category.

These findings are confirmed by the 1979 Surgeon General's report on smoking and health. That report documented that smoking rates among males are highest among middle income levels, while smoking rates for women rise steadily with income. The poorer the woman, the less likely she is to smoke.

In short, the cigarette tax falls most heavily on people who are well able to afford it.

If we look at cigarette excise taxes from a historical perspective the increase we are proposing in this amendment is clearly not extreme. Inflation has resulted in a reduction in cigarette taxes in real terms and as a percentage of the price of cigarettes. The Federal excise tax was increased only twice during the post-war period: From 7 cents per pack in 1950 to 8 cents in 1951; and from 8 cents to 16 cents in 1982. This translates to a decline in the tax rate measured in 1984 dollars from 37.5 cents in 1946 to 8.6 cents in 1982, followed by an increase to 16 cents in 1984. The Federal tax—as a percentage of the price per package of cigarettes—declined from 42.2 percent to 10.7 percent between 1947 and 1982; it now stands at 16.6 percent, about the same rate as in 1975. Mind you—compare that to what is was in 1947—42 percent of the cost.

Now, Mr. President, another argument we will be listening to today is that an increase in the excise tax will signal the death knell of the tobacco farmer. No one who supports an increase in the excise tax wants to see these farmers bankrupt, in fact a major reform of the Tobacco Program is part of the reconciliation legislation we are considering today.

But, the fact is that consumption will continue to decrease without this amendment—although probably at a slower rate. I don't think that we can in good conscience, especially in these days of tremendous deficits, vote on this issue based on a desire to continue

encouraging the production of a product that results in such huge health care costs to the Federal Government.

Mr. President, how much time do I have left?

The PRESIDING OFFICER (Mr. SYMMS). The Senator controls 47 minutes.

Mr. CHAFEE. Mr. President, I yield whatever time the Senator from New Mexico desires.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. BINGAMAN. Mr. President, I will use just a few minutes, if I may.

Mr. President, I am pleased to join with the distinguished Senator from Rhode Island, Senator CHAFEE, in offering this amendment. I believe that this is an important and necessary measure.

This is a straight-forward amendment. It provides for an increase in the cigarette excise tax from 16 to 24 cents, with no earmarking of funds. It is a pragmatic and reasonable step toward addressing a serious threat to the health of this Nation, cigarette smoking. Before I go on to explain why I believe this tax will benefit us at both the individual and national levels, I would like to draw the Senate's attention to why we need to look at this matter in the broader context of health promotion.

In the landmark publication "Healthy People," the Surgeon General outlined the strong relatonship between our lifestyle and the new health problems facing us as a nation and listed 15 priorities which must be addressed. Cigarette smoking is one of several risk factors that contributes to the increasing incidence of cardiovascular disease—the No. 1 cause of death in America. Cigarette smoking is the No. 1 preventable cause of death.

Americans are becoming increasingly aware of the health threat posed to this Nation by cigarette smoking. This new health consciousness serves both the individual and the national interest.

At the individual level, Mr. President, cigarette smoking will kill 350,000 Americans this year. This human toll from smoking can be prevented. Recently, Harvard University's Institute for the Study of Smoking Behavior and Policy concluded that an excise tax on cigarettes is perhaps the most effective available tool to deter smoking and to reduce smoking related cost to the Federal Government. If we increase this tax, the institute explains, cigarette consumption would drop dramatically, especially among young people. For example, a 16-cent tax increase would diminish the number of teenage smokers by 17 percent or 820,000 teens. As for those smokers aged 36 and older, 630,000 would quit if the excise tax were increased to 32 cents per pack.

In addition to the health consequences of smoking, the economic costs are enormous. The Office of Technology Assessment estimates that disease and lost productivity from smoking cost our economy $65 billion a year. That is $2.17 for each pack of cigarettes sold.

Cigarette taxes have an interesting history. First imposed during the Civil War, they were raised periodically until 1951. Between 1951 and 1982 cigarette excise taxes remained unchanged. In 1982, Congress passed the Tax Equity and Fiscal Responsibility Act, which is better known as TEFRA. TEFRA raised the cigarette excise tax from the 1951 8 cent tax to 16 cents until October 1 of this year. Current law extends the 16 cent tax until November 14. It is interesting to note that if the cigarette tax had been raised to keep pace with inflation since 1951, we would today have a tax of 32 cents per pack. This amendment would raise the tax to only 24 cents.

No earmarking of funds is called for in this amendment. I happen to believe in earmarking funds raised by a tax such as this to address the causes and effects of cigarette smoking. Earlier this year I introduced legislation which does just that. I hope that later this year we can carefully consider earmarking funds for Medicare as well as for health promotion and disease prevention. At this time, though, Mr. President, I am pleased that a simple increase of the cigarette excise tax is before the Senate.

Finally, some will argue that this is a regressive tax and inherently unfair. One may argue that excise taxes such as this are indeed regressive. However, the question of the fairness of an excise tax on cigarettes can only be answered accurately if we look at the effects of cigarette smoking on all Americans, smokers and nonsmokers. Is it fair that nonsmokers pay billions of dollars in taxes each year to help cover the health care costs incurred by smokers? I think not, Mr. President. Clearly, it is not fair. Whatever unfairness may lie in a cigarette excise tax is, I believe, outweighed many times by the unfair burdens imposed on all Americans by the high incidence of smoking in our society.

This is not a partisan issue. I commend my colleagues on both sides of the aisle who have worked to address this matter both on the floor and in committee, especially the distinguished Senator from New Jersey, Senator BRADLEY, and the distinguished Senator from Rhode Island, Senator CHAFEE and I urge all my colleagues to support this amendment.

Mr. President, let me very briefly say that I think the primary thrust of the argument that the Senator from Rhode Island has made is correct; that is, that the evidence is overwhelming that an increase in tax on cigarettes would have the effect of reducing the incidence of smoking in this country, and particularly so among teenagers and people who have not yet started to smoke, people who might become smokers in the coming years.

I think that is an important reason in support of this amendment. I think it is clearly justified. It is good public policy to increase the tax. I agree with the Senator from Rhode Island that this is an increase which is reasonable. It is not excessive in light of the historic tax rate that has been imposed in this country. The amendment should be supported by the Senate. I thank the Senator for yielding.

Mr. CHAFEE. Mr. President, I thank the Senator from New Mexico for those fine remarks.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, I yield the time that I have in opposition to the distinguished chairman of the Finance Committee, Senator PACKWOOD.

The PRESIDING OFFICER. The Senator has that right.

The Senator from Oregon.

Mr. PACKWOOD. Mr. President, let me explain the situation regarding the tobacco tax and the Tobacco Program in the reconciliation bill.

Admittedly, putting the Tobacco Program into the reconciliation bill is unusual, but it is not unheard of for a committee to deal with matters in another committee's jurisdiction when previously approved by the chairman and ranking member of the second committee. The Finance Committee did it 2 years ago on the Airport Development Program. The Commerce Committee, which had jurisdiction over spending of the money, asked the Finance Committee, which had jurisdiction over the raising of it, to put the matter into reconciliation.

At that time, the ADAP Program had uniform support by almost everyone in the Senate. There was no serious objection raised to the procedure because it had been requested by the chairman and ranking member of the Commerce Committee. The Finance Committee did it as an accommodation to the Commerce Committee.

That is one precedent. It is a valid precedent. What the Finance Committee did then involved nothing more or less than what the committee did by putting the Tobacco Program in the Finance Committee reconciliation package at the request of the chairman and the ranking member of the Agriculture Committee. The precedent is exactly the same.

Why did we do it? We knew that if we attempted to add any cigarette tax to a bill passed by the House, we would face a filibuster and we would face a veto. We also knew that the cigarette tax expired on the 1st of Octo-

ber. For those of us who wanted to keep the cigarette tax at its present level, the reconciliation bill offered the only avenue we had to avoid a filibuster. That was my concern.

Regardless of what I may think of the merits of the cigarette tax, and I believe there was close support for a higher tax in the committee, it is clear that the higher the tax the greater the risk of a filibuster in opposition to it. I perfectly understand the reasons for the filibuster. Having been one who has used that process myself I find on balance that it is important to maintain the rules the way they are. From time to time that means that legislation gets delayed for a period of time. I have no quarrel with those who use the filibuster against me as I hope they have no quarrel when I use it against them.

In exchange for inserting the cigarette tax extension into the reconciliation bill, we also agreed to insert the tobacco support program. The tobacco support program will save about $235 million over what we would otherwise spend under the existing program. I want to be careful in the use of that word "save", so that no one misinterprets it to mean an increase in spending.

The question is how much do we spend on the tobacco program absent any change in law as compared to how much would we spend on the program with the change in the law approved by the Finance Committee. We will save $235 million over what we would otherwise spend. The program approved by the Finance Committee was the program which the representatives of the tobacco States wanted and were willing to accept. Those representatives feared that the program might possibly run out, that it might possibly not be extended.

So a bargain was struck. The tobacco State representatives agreed that they would not raise objections to our extension of the cigarette tax at 16 cents and we, in exchange, would insert the tobacco support program which, in addition, would save some money. So we both raised money by keeping the tax at 16 cents.

Whatever my personal views might be on a 24-cent or 32-cent cigarette tax I am not here to debate. I am here to stand behind the agreement which has been made between the Finance Committee and the Agriculture Committee. We have struck what we think is a fair bargain so that each achieves part of what we wanted to achieve. Otherwise, neither of us might have been able to achieve any part of our objective. It was perfect example of the art of compromise.

Therefore, I would oppose the effort of my good friend from Rhode Island to increase the tobacco tax to 24 cents or to any other figure that may be suggested. I believe we have taken a good step for the country, as big a step as we could have taken. I do not think we could have passed the 16-cent cigarette tax standing by itself. I think the tax would have gone down to 8 cents and that would have been the end of it. Clearly, the President would have vetoed it standing alone in any event.

We were able to add it to the reconciliation for another reason. We could also see the possibility of the Gramm-Rudman amendment being enacted. We could see the need for additional revenues. Whether or not the Gramm-Rudman amendment will finally be enacted is at the moment being determined by a conference between the House and the Senate with members from many committees in the House and three committees in the Senate.

On balance, considering what we hopefully will do on the debt ceiling, the compromise struck between the Agriculture Committee and the Finance Committee is a fair arrangement for all concerned.

I am fully aware that there will be another time when we will again visit the issue of 24, 30, or 36 cents a pack cigarette tax. This is not the time or the place for it. I would hope that my colleagues would turn down the amendment of my good friend from Rhode Island.

The PRESIDING OFFICER. Who yield time?

The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I listened with interest to the accurate description the distinguished chairman of the Finance Committee gave, but I do not think he meant to give the impression that this is a bargain that everybody in the Finance Committee was involved in. Certainly, I was never involved in any such agreement. Indeed, as hast been pointed out, I made the motion for the 32 cents a pack and was defeated. But there was nothing that subsequently transpired that may be part of any agreement that the tax would remain at 16 cents.

Mr. PACKWOOD. So there is no misunderstanding, the Senator from Rhode Island was not involved in that decision. I believe he has stated very clearly that he was not part of this arrangement.

Mr. THURMOND. Mr. President, I rise in opposition to the pending amendment. Adoption of this amendment would further increase the Federal excise tax on cigarettes from the 16 cents per pack provided for in the reconciliation bill to 24 cents per pack.

The 16-cents-per-pack tax already represents a doubling of what current law would establish. As my colleagues know, the additional 8-cents-per-pack tax was scheduled to sunset this year. However, the Senate Finance Committee has proposed a permanent extension of the additional 8-cent tax, making the total permanent tax equal to 16 cents per pack. In so doing, the committee also included in the reconciliation bill a section which would achieve a much needed and important reform of the current tobacco price support program. Increasing cigarette taxes beyond the recommendation of the committee, however, would have an extremely detrimental effect on the thousands of small family farmers who depend upon tobacco for a substantial portion of their incomes.

Mr. President, tobacco in all its forms has been, and remains, the most heavily taxed single consumer product. If cigarette taxes are further increased, many cigarette manufacturuers, in an effort to hold down cigarette prices, will likely turn to cheap, subsidzed, foreign-produced tobacco. This would hurt not only our farmers, but also the U.S. balance of trade. Increased tobacco imports would mean less U.S. tobacco purchased domestically. Thousands of small farmers could lose their main source of income through this loss of business. In addition, our balance of payments would suffer.

If the U.S. Congress further increases cigarette taxes and the manufacturers do not absorb all or at least part of an increased cigarette tax, the increased price will primarily impact individuals with low to moderate incomes. Although some groups have argued that the cigarette tax should be increased because a higher price would force these consumers to smoke less, I believe that most people will continue to smoke, whatever the cost. Personally, I do not smoke and do not encourage others to smoke. However, I do not believe that it is sound public policy to use the tax system as a means of dictating the smoking habits of the individual.

Mr. President, I urge my colleagues to oppose this increase in taxes.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. I yield to the Senator from North Carolina such time as he may desire.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the chairman and I thank the Chair.

First, I wish my distinguished friend (Mr. CHAFEE) a happy birthday. I confess, however that I hope it will not be too happy when the vote is taken. The Senator is my good friend.

He and I were talking a few minutes ago and I made the observation that the argument here is not about tobacco or the merits of smoking. I have never engaged in arguments about smoking and health. None of my children smokes and I hope none of my grandchildren will. What I try to bring before the Senate, Mr. President, is the prevention of the livelihoods of some 200,000 farm families who are

dependent on the growing income they earn by tobacco.

As for Senator CHAFEE's amendment, when time has been yielded back or used or a combination thereof, a point of order will be raised, and I suspect it will be sustained. Of course, the Senator will be within his rights to appeal the ruling of the Chair.

Let me point out that in my judgment, this amendment is not germane. The tobacco provision of the budget reconciliation bill merely strikes the October 1, 1985, data relative to the so-called sunsetting of the tax. The effect of striking the date is to maintain the Federal excise tax at 16 cents, but that amount is not mentioned. Nowhere is this legislation is there a provision which specifically sets the tax at 16 cents or at any other level. It is my understanding that the only amendments in order on a budget reconciliation bill are those to strike or to change numbers and dates or to limit or restrict the scope of the provisions. This amendment to increase the tax above 16 cents adds new provisions to the bil rather than striking the entire provisions, and does not change numbers or change dates or limit or restrict the scope of the provisions. In fact, it could be argued that increasing the tax expands or broadens the scope of the existing excise tax provision.

So, when the time has expired one way or the other, either by yielding it back or using it, a point of order certainly ought to be raised against this amendment, perhaps by the distinguished chairman of the Committee on Finance or the distinguished chairman of the Committee on the Budget—or I shall be glad to do it.

Preliminary to that, Mr. President, on behalf of the approximately 200,000—some estimates are that there are as many as 300,000—tobacco farmers, I must oppose this amendment. As the Chair will recall, it was my amendment to the Tax Equity and Fiscal Responsibility Act of 1982 that called for the temporary 16-cent Federal existing tax to sunset back to its original level of 8 cents on October 1, 1985. Therefore, it is somewhat of an anomaly for me to go to BOB PACKWOOD as I did and discuss the arrangement that was eventually arrived at.

The sunseting provision which I added to that 1982 act was a position to which I was committed. I felt that the sunset should take place. But time passes and circumstances change. Here in 1985, I find myself representing just about everybody concerned in terms of the production of tobacco advocating that the sunset provision not be implemented.

Having said that, Mr. President, if the repeal of the sunset provision were likely be considered and the concern was to avoid extended debate, we concluded that tobacco growers deserved some degree of protection from the adverse effects of the tax increase. It was felt that the most appropriate way to achieve this was to amend the Finance Committee reconciliation package to include our tobacco program provisions as a companion measure to the 16-cent permanent tax. That was entirely fair because our actions were intended to establish a direct tie between the cigarette tax increase and, as Senator PACKWOOD has eloquently explained it, the reform of the Tobacco Program. The 16-cent excise tax and the Tobacco Program modification therefore became a package. I reluctantly gave my support to the 16-cent tax in exchange for a reform of the program.

I will say this, Mr. President. If we can accomplish this, I believe it will be the last time that at least this Senator will be on this floor trying to reform the Tobacco Program. I think this will do the job because it lowers the support price to below the market level and the excess price has been the cause of the problem. So I think it is important to emphasize the benefits of maintaining the tobacco package in its entirety, unamended and unmodified.

The agreement that is the basis for the tobacco legislation is a fine-tuned, delicately balanced instrument. It is the product of months of continuous and constant negotiations among the growers, the cigarette manufacturers—everybody across the spectrum. If anyone here thinks it has been easy to bring all these people together, let me assure my colleagues it has not been easy. We counted up not long ago and, since the first of this year, I have personally been involved in over 100 meetings, conferences, studies, and telephone calls of an important nature concerning this reform of the Tobacco Program. Many of the participants in the development of this package have been dragged kicking and screaming toward what we have now. The point is that I do believe that with rare exception, most people understand this is the only way that we can preserve the livelihoods of the people in whom I am interested. That is the group of up to 300,000 tobacco farmers.

Cigarette manufacturers have made clear to me that they will not participate in the buy-out of the surplus stocks in stabilization if the cigarette tax goes above 16 cents. So that blows us out of the water in terms of securing the reforms that gives us any hope of restoration of a substantial export trade and all the other benefits to our economy. So I have to fight as best I can to preserve the package that Senator PACKWOOD and others and I have worked out.

Let me say here and now that I am grateful to Senator PACKWOOD for all the cooperation he has given us. The buy-out is an interdependent part of the Tobacco Program reform. The negotiated package would be severely damaged if the companies were forced to take a walk as a result of the tax rate of 24 cents.

One more point and I shall conclude and let the others speak. Every step of the way I have endeavored to act in good faith, and have. So have those with whom I have dealt, and not all of them are entirely friendly to my position. Not all of them are entirely friendly toward my position, but where we have disagreed we have agreed to disagree agreeably. So we come to the point now where we are going to decide whether the 250,000 to 300,000 tobacco farmers will have a chance to survive or whether we are going to turn over tobacco production to foreign producers with all of its implications.

Many press reports, including the Washington Post, indicated some time back that the President was going to veto the 45-day extension of the cigarette tax. The President and I had a conversation, and I am grateful to him for his judgment that he ought to go along with that extension. Now, the President has also—and I will say this because it ought to be a matter of record—gone on public record as being inclined to veto even a permanent extension of the cigarette tax at the current level of 16 cents. Now, if he is going to veto that, what will he do to Senator CHAFEE's proposal to elevate it to 24 cents?

Now, I cannot and will not ask the President to sign anything greater than 16 cents.

Another reason why the tax should not be increased is that the budget reconciliation package is already $2.8 billion over in projected savings. Now, excise taxes always seem to be an attractive target to make up any shortcomings in revenue, but according to the statistics available to me the Senate is living up to its obligation without any added taxation, and we all know how the President feels about increased taxes.

I do thank the Senator from Oregon for yielding to me.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. I yield such time as the Senator from Kentucky may need.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, I thank the distinguished manager of the bill, the Senator from Oregon [Mr. PACKWOOD], for allowing me to have some time to speak on this issue. This is probably one of the most important issues to the constituency that I represent. It is as important to my State as is, to the distinguished Senator from Rhode Island, jewelery and silver and silver plate. I am sure he does not

want a tax placed on those just as I want no additional tax on cigarettes.

But let me make a couple of points, if I may, Mr. President. We have worked on this package for a year. Many fine people in my State have traveled from town to town hold meetings on this issue. Our farmers have pitched in and have been able to hire some people to help put some language together that would be agreeable to them. They have come together with manufacturers. They have sacrificed in this piece of legislation that we are hoping to pass as much as any group of people in this country. They understand that things change. They understand that people have to give and to sacrifice. But they do not have to give all their blood.

Let us look at what we are attempting to do with this amendment. I think the farmers, the growers, and the manufacturers have arrived at an agreement. We reduce the support price approximately 35 cents a pound. That is a good and substantial reduction. Two, we have arrived at an agreement to eliminate the surplus of tobacco over a period of time. Three, we have, in my opinion, allowed approximately $2 billion to come back to the Commodity Credit Corporation. The GAO said that this bill would save, from the time of its enactment in this fiscal year, in 3 years $235 million, over 5 years it would be $500 million. And fourth, we have imposed a new tax on smokeless tobacco.

For all practical purposes the additional 8 cents is a new tax because it should have sunsetted on September 30. The President has sent word that he is not very happy with that extension, but hopefully if we can hold it at 16 cents, the companies then will be a part of the agreement, and the legislation will become law.

We must look at that small farmer, Mr. President. We talk about damaging little people. In my State, there are approximately 101,000 small farmers with an average of three-quarters of an acre of tobacco—three-quarters of an acre. Think about that—a small, small piece of income. And we are saying here today that we not only want to increase the tax to twice what we were, we want to increase it three times. We are saying to that small farmer, who asks very little but pays a lot, to go out of business. Oh, we are going to hear this is for our health, but we are not arguing health, we are arguing the survival of tobacco and the cost, due to increased taxes, the less purchases of domestic leaf.

Let me say this to you, Mr. President: If this legislation is defeated—and it will be defeated if we increase the tax beyond 16 cents—there will be no Tobacco Program. Just think about it a little bit. All that surplus will belong to the Government and we can get rid of it the best way we can at a cost of $4 billion. When you can grow tobacco from fence row, to fence row, any amount that you want—there is no limitation—the cost is going to go down. You can buy generics now. Oh, we have been told on this floor today what cost cigarette smoking has been to the taxpayers through Medicare and Medicaid. Well, let me ask this question: If the health groups claim that cigarette smoking has cost the taxpayers $4.2 billion through Medicare and Medicaid. the total cost to the Federal Government of Medicaid and Medicare Programs for fiscal 1984 was approximately $82.5 billion. If tobacco users amount to only $4.2 billion, that clearly means there must be a group out there responsible for a larger part of it.

Let me get down to the point that is so important—the package:

First, we have increased the basic tax; second, we have taxed smokeless; third, we have reduced the cost to the Federal Government, and fourth, if this agreement is not held, then we have no Tobacco Program. Our farmers will vote it out. All of the costs of the surplus tobacco will be borne by the taxpayers as a whole. We have a proposal to work it out and to save at least $3 billion—at least $3 billion.

Go to the GAO report, the blue book, let me read from the Comptroller General's report. It says, as it relates to who would be paying in the future:

> Because a program is no longer in effect, any losses on this tobacco, to the extent not offset by previously collected assessments, would be paid by the taxpayer.
>
> Should flue-cured and burley producers also decide against approving a program, whether in response to an increased assessment or for some other reason, future assessments could not be placed upon them, and taxpayers would be liable for any losses that occur on flue-cured and burley tobacco under loan.

So if you begin to look at all the facts and try to understand it, we have offered a whale of an opportunity to save the taxpayers money. Why kill us now? We have come more than half way, and now you want to drop the ax on the little fellow, the three-quarter of an acre small farmer, 101,000 of them in my State.

You will stand up and squeal pretty good when we offer a 20-percent tax on some jewelry and silver and silver plate. I can hear the squeals. I can hear everybody saying, "You can't do that to us. It is our main income." Well, this is our main income in our State, especially in the rural area.

I implore my colleagues: Let us not go this route. We have made an agreement. It is good for everybody concerned. It hurts the farmer more than anybody else. The grower is hurt more than anybody else. Yet, we keep wanting to do a little more. All I have heard today is "farm crisis," "in debt," "hard times." Yet, we stand on this floor and want to put a little more hard times on the little fellow in the farm community.

I yield the floor.

Mr. PACKWOOD. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 30 minutes and 51 seconds.

Mr. PACKWOOD. I yield 8 minutes to the Senator from Kentucky, and then I will yield to the Senator from Virginia.

Mr. McCONNELL. I thank the Senator from Oregon, the chairman of the Finance Committee, and I thank him especially for his understanding and cooperation in this most important issue to a number of tobacco States.

As my colleague from Kentucky has said very eloquently, when you are talking about tobacco as it relates to Kentucky, you are talking about the basis of our economy.

Tobacco price support programs account for more than 9 percent of the jobs in the State of Kentucky. The total cash flow of Kentucky's tobacco crops exceeds $1 billion. Indirect benefits from this crop amount to over $2.5 billion.

Fully 3 percent of Kentucky's gross State product is directly dependent on continuation of the Tobacco Program. Just a 1-percent loss in tobacco output causes a loss of 545,000 jobs and $25 million to Kentucky's economy.

Loss of the Tobacco Program would cause a decline of over $1.5 billion in farmland values. Fully $130 million in State tax revenues is generated as a direct result of this program.

Kentucky county governments would lose $50 million in property tax revenues without a Tobacco Program. This loss would be particularly devastating to local school systems, county services, and county roads.

Over 150,000 Kentucky farmers produce tobacco, and 250,000 families share in the proceeds. It affects 50 percent of Kentucky's 3.8 million citizens. Over two-thirds of Kentucky's farmers depend on tobacco production for over 50 percent of their gross income.

This is even more significant when you realize that 75 percent of Kentucky's farmers have net farm income of less than $10,000. Tobacco production accounts for 12 percent of the employment in Kentucky's 10 poorest counties; per capita income is less than the Kentucky average.

Farm supply dealers would be devastated, as over 40 percent of gross sales are related to tobacco production.

On a county level, the loss of the Tobacco Program in a moderate tobacco county would account for a loss of income roughly equal to what the new General Motors factory is expected to bring to Spring Hill, TN.

Mr. President, I think that puts the issue in perspective in terms of the impact of this crop on Kentucky.

What are we talking about in this debate? The issue, I assure Senators, is not smoking. You can eliminate the Tobacco Program. You can raise the cigarette tax, as the distinguished Senator from Rhode Island has suggested. There will still be smoking.

What this whole issue is related to is the welfare of the farmers of Kentucky, North Carolina, Virginia, Tennessee, South Carolina, and neighboring States, who make a significant amount of their income from growing this legal crop. There is no good alternative in many parts of our State. In the eastern part of Kentucky, where the hills and mountains are found in virtually every county, there is not much flat land. What can you do profitably on one-half acre?

As my distinguished colleague from Kentucky [Senator FORD] pointed out, the average size of the tobacco allotment in our State is about three-quarters of an acre, and many are much smaller. If you eliminate the tobacco support program or raise the tax on cigarettes so high that production is reduced, the net result is that there is no alternative for these small growers in the hills and mountains. You cannot grow anything else at a profit on one-half acre up a "holler." It is not possible.

The University of Kentucky has done all kinds of studies about alternate crops, and they have come up with the same answer: There is nothing else you can do profitably and legally on one-half acre of a "holler."

This compromise, worked out in the Finance Committee, is a fair and reasonable one. It did not have the support of every Senator on that committee, but it had the support of most. There is something in it for the growers. There is something in it for the Government in terms of much needed revenue. There is something in it for everyone. It is a fair compromise.

Mr. McCONNELL. Mr. President, many of my colleagues have raised the question: Why is comprehensive tobacco legislation included in a budget reconciliation? I think that is a fair question, with some very compelling answers.

The distinguished chairman of the Agriculture Committee, Senator HELMS; my colleague from Kentucky, Senator FORD; and I proposed to members of the Finance Committee that the Tobacco Program Improvement Act of 1985 be included as an amendment to the budget reconciliation package. We did so because it was clear that an unfair burden of taxation was going to be placed on our tobacco growers in the form of a regressive cigarette tax. I think a few observations regarding cigarette excise taxes are appropriate here.

At a time when we are confronted with $200 billion budget deficits, revenue enhancing measures like excise taxes are certainly attractive ways to reduce the deficit. And there is no doubt whatsoever that cigarette excise taxes should be considered by the Senate Finance Committee, which has jurisdiction over revenue-raising matters. But why penalize those Americans who can least afford a tax increase, including the 150,000 tobacco farmers in my home State of Kentucky who depend on tobacco production for their livelihoods?

The reality is that as a share of total income, cigarette excise taxes hit those households with incomes in the bottom 20 percent six times harder than households in the top 20 percent. Clearly, if Congress wants to raise revenues by imposing an excise tax on cigarettes, then we must be willing to do so, as I said before, at the expense of those least able to pay. In my mind, the Federal Government should not enact tax policy which discriminates among individuals on the basis of their consumption preferences, especially when this discrimination has a disproportional affect on the least advantaged among us.

Simply put, increasing taxes on tobacco products is a bad idea. The tobacco industry, which will take an unfair rhetorical beating from several Members of this body during today's debate, contributed $35 billion, $35 billion, Mr. President, to the Nation's economy in direct and indirect benefits last year and accounted for 2 million jobs nationwide, according to a Wharton School of Finance study. In an environment of mounting trade deficits, the tobacco industry enjoys a trade balance of some $3 billion, despite accusations that imported tobacco is destroying the domestic tobacco industry. Tobacco should not be singled out to bear the brunt of $200 billion deficits and underfunded social progams.

But, if the repeal of the 8 cents per pack sunset provision of the cigarette excise tax was likely to be considered, we then concluded that tobacco growers deserve some degree of protection from the adverse effects of the tax increase. We decided the most appropriate way to protect our tobacco growers was to urge our colleagues on the Finance Committee to amend the reconciliation package to include our tobaccor program provisions as a companion measure to the permanent 16-cent cigarette tax. The committee agreed to that proposition because this was the fairest way to accommodate the need for Federal revenue without destroying the tobacco farmer.

Furthermore, I understand that other Senators plan to offer amendments which significantly raise the cigarette excise tax above the 16-cent level which was approved by the Senate Finance Committee. Mr. President, according to reports, the Senate Budget Committee has already exceeded its required budget savings goal by some $1.8 billion, so there is no reasonable justification for an additional tax increase in the excise tax above the recommended 16-cent level. During committee deliberations, members of the Senate Finance Committee noted that increases in the excise taxes were detrimental to family tobacco farmers and offered the Tobacco Program improvement legislation in the budget reconciliation so that these hard-pressed farmers would not be subjected to undue hardship because of the tax increase. Further excise tax increase are absolutely unneeded and unfair to the farmers I represent. I also might remind my colleagues that President Reagan almost vetoed the 45-day extension of the cigarette tax and nothing would "make his day more" than to have the opportunity to veto an excessive and unnecessary tax increase. Enough, Mr. President, is enough.

There have also been rumblings that some of my colleagues are concerned that the $235 million in savings which CBO estimates will result from enactment of our tobacco legislation would be attributed to the Senate Finance Committee instead of the Senate Agriculture Committee. Each committee has already acted independently to meet its reconciliation goals. The Budget Committee has already reported the results of these efforts, S. 1730, which includes some $82 billion in savings. I say to my friends, as a Senator who is concerned about savings as much as anybody, that it really doesn't matter now which committee gets the budget savings. What does matter is that failure to take action now on the Tobacco Program could provoke tobacco growers to vote out the Tobacco Program at a cost of several billion dollars to the Treasury and the taxpayers.

Currently, Mr. President, the Tobacco Program operates at no net cost to the taxpayers. The costs associated with carrying 1.5 billion pounds of tobacco are entirely borne by the growers themselves through an assessment paid on each pound of tobacco they sell. The current per-pound assessment of 30 cents per pound is becoming prohibitive and without a meaningful legislative remedy, growers will simply walk away from the program by voting against price support and production controls in next year's statutory referendum. That 1.5 billion pounds of tobacco would then be owned by Uncle Sam.

The statutes further provide that as the lending agent for the Department of Agriculture, CCC assumes the financial obligation for all tobacco which is forfeited to the Government

by the producers. In the event, GAO estimates the loss to the taxpayers would be in excess of $1.2 billion; I say that is a conservative estimate—$3 billion is more likely.

So, Mr. President, the real budget savings made by including the Tobacco Program Improvement Act in the Budget Reconciliation Act won't show up in anybody's savings box score. They show up in a fiscally responsible Tobacco Program where tobacco companies and tobacco growers share equally in the future costs of the program.

There is a further precedent for including Tobacco Program improvements in a reconciliation package. The House of Representatives' Ways and Means Committee has already accepted a proposal to earmark 1 cent of a 16-cent cigarette tax to offset any costs associated with the Tobacco Program—a proposition that we do not support. With this precedent already established, it was our judgment that Senate conferees would be in a better position to deal with the issue of modifications to the Tobacco Program in conference with the House, if provisions for improvements in the Tobacco Program were also included in the Senate Budget reconciliation report.

I repeat, Mr. President, precedence for including tobacco legislation in matters of finance was already established in the other body. Our actions were taken because similar action has already been taken in the House.

That in a nutshell is why tobacco legislation is included in a budget deficit discussion. But there are some other issues involved that should also be addressed here.

The agreement between grower groups and the tobacco manufacturers that is the basis for the Tobacco Program Improvement Act of 1985 is an extremely tenuous agreement. Very long and difficult negotiation led to this agreement and all of the parts therein are critical to the whole. If one single part of this agreement is changed substantially, then the prospect for the necessary improvements in the tobacco program are very dim.

Let me cite one example, Mr. President, of what I mean. A 1-cent increase in the cigarette tax translates to a 15-percent loss in sales to cigarette manufacturers. So what? Right?

Wrong. A 15-percent loss in cigarette sales volume costs billions of dollars in sales to the cigarette companies. That means that my Kentucky family farmers will be forced to substantially reduce their acreage of tobacco at a time when their backs are already against the wall because companies need less tobacco. As a result of the loss in revenue, these companies will not be in a position, nor will they have the inclination, to spend the billions of dollars which will be required to purchase 2 billion pounds of surplus tobacco now held in the loan inventory. The companies, therefore, decide not to participate in the inventory buyout, which is an integral part of the agreement. I submit to my colleagues that with no buyout, the agreement crumbles and the taxpayers will be left holding the bag for $4 billion worth of tobacco.

Mr. President, a comment should also be made addressing the health issue. I recognize that the health issues surrounding tobacco are not going to go away. But I think I need to emphasize an important point to my colleagues. People are going to smoke even if there is not a viable tobacco program. So the real issue is not whether people will continue to smoke cigarettes, but whether tobacco—a legal crop—will be grown by a handful of corporate farmers in one or two States or by hundreds of thousands of small family farmers. As a matter of economic and social policy, I prefer to think the latter is desirable.

In conclusion Mr. President, I would urge my colleagues to reject any attempt to dismantle this agreement. The parties of the tobacco family have displayed unprecedented unity to reach this point and it is critical that the entire agreement remain intact. The Senate Finance Committee has reached a very reasonable compromise on the issue of cigarette excise taxes; growers and companies have reached a very reasonable compromise on the future direction of the tobacco program; and now it is time for the Senate to act responsibly.

The livelihoods of 150,000 family farms in Kentucky depend on it.

Mr. President, in closing, I should like to make one other observation. I am confident that there are many here today who support the Chafee amendment and believe that an increase in the cigarette tax will have an effect on consumption. If you look at the statistics, your immediate conclusion is that it might adversely affect consumption, but now consumption has leveled out. I venture to guess that what will really happen if the cigarette tax is increased, as the distinguished Senator from Rhode Island suggests, the cigarette manufacturers would simply find a way to obtain the tobacco more cheaply. That is, import additional tobacco, as the distinguished chairman of the Agriculture Committee, the Senator from North Carolina, knows in order to maintain their profit margin; and the net loser in all this will be the growers in North Carolina, Kentucky, Virginia, Tennessee, South Carolina, and other States. The tobacco will come from someplace else overseas.

To give a few statistics along that line, during the period of the 8-cent cigarette tax increase in the last 3 years, the value of imports of unmanufactured leaf tobacco increased by 55 percent, from $342 million in 1982 to $574 million in 1984.

During the same period, the collective national marketing quota for burley and Flue-cured tobacco was reduced by over 300 million pounds, or a 19-percent decrease in the amount of tobacco that an individual grower could plant.

Even with this significant reduction in plantings, loan stocks of burley, and Flue-cured increased by 375 million and 270 million pounds, respectively.

So, if the cigarette tax is increased again, the companies will simply go elsewhere to buy cheaper tobacco to retain their profit margins. The purchase of foreign tobacco and the large inventory stocks will mandate that the Secretary of Agriculture lower quotas, even though cigarette production has not dropped since 1982.

Therefore, an increase in the tax will only lead to less domestic tobacco being produced and more tobacco being imported.

In summary, Mr. President, no good purpose is served by extending this tax beyond the 16-cent level. I hope the amendment of the Senator from Rhode Island will be defeated.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. Mr. President, I yield 5 minutes to the Senator from Virginia.

Mr. WARNER. Mr. President, I thank the distinguished Senator from Oregon. I shall be very brief.

Mr. President, I think this tax ought to be called the blue collar tax, the Chafee blue collar tax, because in effect what it does is to penalize the small farmer, as so eloquently pointed out by the two distinguished Senators from Kentucky, and falls directly on the working man and woman as they purchase their cigarettes. The affluent individuals will accept this tax and it will not affect their lifestyles whatsoever, but this tax will directly impact the working men and women.

It seems to me this issue was carefully resolved in the Finance Committee and we would be well advised to leave it as it was decided by that committee.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. Mr. President, let me just ask this one question. I told the Senator from Tennessee I would yield him some time, however, we have used a fair amount of time on our side already. I do not know if the Senator from New Jersey is ready to speak. I simply want to find out if the Senator wants to go before or after the Senator from Tennessee?

Mr. BRADLEY. I will go after the Senator from Tennessee.

Mr. PACKWOOD. I yield 5 minutes to the Senator from Tennessee.

The PRESIDING OFFICER. The Senator from Tennessee is recognized for 5 minutes.

Mr. SASSER. Mr. President, I thank the distinguished Senator from Oregon.

Mr. President, I strongly oppose this effort to increase the excise tax on cigarettes. As my colleagues have indicated, the amendment before us would have a devastating impact on tobacco farmers across the Nation. The well-being of these thousands of family farms seems to be lost on the supporters of this amendment, but it is painfully clear to those of us who have tobacco farmers in our home State.

In my home State of Tennessee, we have some 38,000 farms on which tobacco is grown. And while my colleagues usually associate tobacco with States such as Kentucky or the Carolinas or Tennessee or Virginia, it is worth noting that tobacco is grown in 17 States. From Massachusetts and Connecticut to Wisconsin and Indiana, you will find tobacco farmers. Tobacco is a vital crop to farmers and related businesses across the country.

The importance of tobacco to our Nation's farmers is seen in the fact that tobacco is usually the sixth largest cash crop in America. In 1983, tobacco farm sales totaled $3.4 billion, 4.6 percent of all crop sales for that year and 2.4 percent of the value for all farm commodities. Tobacco and tobacco products added $57.6 billion to the Nation's gross national product in 1979. The Department of Agriculture reports that, both directly and indirectly, tobacco generates 2 million jobs, $30 billion in wages and earnings and $15.5 billion in capital investment per year.

It is not as though the tobacco farmer and those who sell tobacco products do not already add mightly to the tax coffers of the Federal Government and of State and local governments. In 1983, for example, it is estimated that nearly $9 billion in taxes on tobacco products was collected, $4.7 billion by the Federal Government and $4.2 billion by State and local governments. As I noted earlier, tobacco sales for that year totaled only $3.4 billion. Thus, the taxes collected on tobacco products amounted to more than 2.5 times tobacco farm sales.

I cannot think of another industry which has such a wide margin between taxes paid and income from sales. Yet, we are being asked to stretch this margin even further by increasing the excise tax even more. Let me remind my colleagues that we have already accepted what amounts to an 8-cent increase in the excise tax by forgoing the sunset of the 16 cent excise tax.

If my colleagues believe that this tax increase will leave farmers unscathed while cigarette companies see profits fall, they are mistaken. The companies have found ways to maintain profitability when faced with tax increases in the past, and they will do so if this tax increase passes. Indeed, one area where the companies will cut costs to maintain profits is the cost of domestic leaf. With the leaf tobacco provided by farm families accounting for 40 percent of the companies' production costs, this will be a clear target for cost cutting. And where will they go? They will go to more imported tobacco.

The companies' response to doubling of the excise tax in 1982 clearly shows that tobacco farmers pay the price for increasing the excise tax. Domestic leaf usage has dropped 16 percent since 1982. The companies reduced purchases of domestic leaf and turned to greater imports of cheaper tobacco and technological advancements to maintain profits. The net result of the tax increase was increased economic exposure for small family farmers and for tobacco growers.

Mr. President, farm families across the country are still reeling under severe economic stress. It would be a grave mistake to further compound the financial hardship of farm families at this time. Yet, this amendment would do just that. I ask my colleagues not to turn their backs on small farm families across the country and urge them to join in our effort to defeat this amendment.

I thank the distinguished Senator from Oregon for yielding to me.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, I yield to the distinguished Senator from New Jersey such time as he desires.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. Mr. President, I thank the distinguished Senator from Rhode Island for yielding.

Mr. President, last spring on this floor, the Senate considered the budget resolution for fiscal year 1986. Included in the budget resolution was an assumption that allowed the tax on a pack of cigarettes to drop from 16 cents a pack to 8 cents per pack. Also in that resolution was an assumption that sizably increased the out-of-pocket costs that senior citizens pay for Medicare.

As the Senate considered the budget resolution, I offered an amendment on the floor which would have kept the cigarette tax at 16 cents and would have eliminated the increase in the medical premium that senior citizens have to pay.

I thought at that time that the fight was worth making that we were, as a body, encouraging people to smoke cigarettes—which was detrimental to their health—and then we were, as a body, in the same bill requiring senior citizens to increase what they have to pay for health services.

Mr. President, that amendment failed by 2 votes. But, Mr. President, the bill that we are now considering has retained the cigarette tax at 16 cents and also has not increased beyond current law what senior citizens have to pay for Medicare.

Mr. President, I think that the effect of that amendment that was offered last spring—where Senators were put on the record—is not unrelated to the fact that now the Senate has indeed done what that amendment proposed and, Mr. President, it is in that I rise to cosponsor the amendment offered by the Senator from Rhode Island to raise the tobacco tax from 16 cents to 24 cents a pack. Senators are faced again with voting for or against a provision that enjoys widespread public support, and it is my hope that at a future time, if this amendment is not adopted, that the Senate will again reverse its position, just as it has done in this bill concerning the amendment that I offered on this floor last spring.

Mr. President, with that argument aside, there are many reasons why we should raise the tax. The cigarette tax has declined significantly in real terms over the decades. The tax stood at 6 cents per pack in 1919 and was raised to 8 cents a pack in 1951. The 16-cent Federal tax currently represents less than 20 percent of the current average market price per pack. That is significantly less than the 37 percent of the price that was represented in 1951 by the 8-cent tax.

Therefore, Mr. President, the first reason why we should raise the tax that the real tax on a pack of cigarettes had declined significantly—not increased—since 1951.

Second, Mr. President, virtually all scientific evidence points to the conclusion that the health costs of smoking—in terms of dollars and lives—is large. According to the Congressional Research Service, smoking deaths exceed 300,000 annually, and smoking contributes to 30 percent of the over 400,000 annual U.S. deaths due to cancer. According to studies of the National Center for Health Statistics and the Office of Technology Assessment, about $12 to $35 billion a year is spent on medical care for smoking-related diseases, and $25 to $60 billion a year is lost in earnings attributable to morbidity or premature mortality from smoking-related diseases.

Mr. President, another study indicated that about 6 percent of Federal Medicare and Medicaid expenditures go for treating victims of smoking, and roughly 12 percent of Social Security disability insurance recipients are on the rolls due to smoking-related diseases.

Mr. President, a third reason why we should support this amendment is that raising the tax will indeed reduce

usage, and I would argue in particular it would reduce usage of the most vulnerable segment of our population—children. Per capita cigarette consumption has generally remained steady for the past 20 years, but according to the Department of Agriculture, consumption decreased by 5 percent between 1982 and 1983 due to the 8-cent increase in excise tax on cigarettes.

Mr. President, the experts appear to be in agreement that the increase in the price of cigarettes does indeed bring about a decrease in consumption. The decrease is small among addicted adults, but, Mr. President, this is the point: the reduction is quite large among teenagers who either quit smoking all together or decide not to start. According to recent testimony we had before the Finance Committee, if Congress decided to increase the Federal tax by 8 cents to 24 cents per pack, close to 2 million Americans, including 1 million young people, will be encouraged to quit smoking or to avoid taking up the habit all together. Currently, between one and four smokers die from smoking-related illnesses. Therefore, Mr. President, this tax increase has major implications for one select group of Americans—half a million premature deaths of Americans can be avoided if this tax is raised.

Mr. President, we heard the distinguished Senator from Virginia say this is a blue-collar tax. Mr. President, research by Professor Harris of MIT indicates that low-income Americans smoke much less than upper-income Americans. Professor Harris also found that older Americans, which make up a sizable fraction of the low-income group, have much lower smoking rates than the general population. Professor Harris' findings on income and smoking have been corroborated in addition by the 1979 Surgeon General's "Report on Smoking and Health." That report documented that smoking rates among males are highest among middle and upper middle levels of income while smoking rates for women rise steadily with income. The poorer the woman, the less likely she is to smoke.

In summary, Mr. President, there are many reasons why this cigarette tax should be raised. While many other taxes have been increased in recent years, the cigarette tax has declined significantly in real terms over the decades. The cost of smoking—in terms of dollars and lives—is large, and raising the tax will reduce cigarette usage, particularly among young people.

So, Mr. President, I urge that the Senate support this amendment, not only for the reasons that I have offered—not only because it will reduce health care costs and reduce the taxes that will have to be paid in future years to pay for the health care costs associated with smoking, not only because kids in this country would be spared the health threat that cigarettes pose to them, not only because 70 to 80 percent of people support this kind of a tax increase, not only because it would help reduce the deficit—but because, Mr. President, sooner or later the Senate will go on record, I believe, supporting this kind of amendment. And, from my perspective, the sooner the better.

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. I yield to the Senator from North Carolina.

Mr. FORD. Mr. President, I would like to have 1 minute to rebut the Senator from New Jersey. That is all it would take.

Mr. EAST addressed the Chair.

The PRESIDING OFFICER. (Mr. WILSON). The Senator from North Carolina.

Mr. EAST. Mr. President, I shall be brief, and probably we are overindulging the subject rapidly. I will not attempt to enlarge on any particular dimension of it. Aside from the good points that have already been made by my distinguished colleague about the cigarette- and tobacco-producing States, one thing I find troublesome in this effort is you are trying to really, it occurs to me, accomplish prohibition by taxation, and I think the Senator from New Jersey has conceded that the higher the tax the less people will consume.

I query whether that is not an abuse of the revenue-raising system where you simply tax something out of existence. If we want to go to prohibition, perhaps we might try a constitutional amendment as we did with drinking some decades ago, and follow that route. But I am troubled where it is admitted by those supporting the tax that the purpose of it is to bring about the prohibition of tobacco smoking. I would prefer greater intellectual honesty in which we simply set out by some scheme, legislative or constitutional amendment, and prohibit the smoking of tobacco. I do not suppose anyone would support that. But, in effect, I think that is what this taxation is attempting to do. And in doing so, I would point out that it is a regressive tax. It hits hardest on those least able to pay. Probably smoking, whether one likes it or not, is the luxury of the working men and working woman in this country, and those at the lower end of the economic scale, as is true with any regressive tax, bear the great burden of it.

The wealthy, the rich, those who are substantially well off, pay a bit more for a package of cigarettes, of course, but they will not have great concern about it.

I think finally I would note, Mr. President, that this particular package is a carefully crafted one of compromise, trying to deal with this issue of taxation as well as to deal with the general issue of the Tobacco Program. I think it is in the best interest of all concerned that this amendment be rejected.

I appreciate the opportunity to speak to it.

Mr. President, since 1982 when the cigarette excise tax was increased from 8 cents to 16 cents, consumers of tobacco products have borne an inordinate share of the taxes that are imposed at all levels of government. Last year smokers paid Federal, State, and local governments more than $9 billion in tax revenue. This is nearly three times the amount our small, struggling tobacco farmers made for their 1984 crop.

The increased excise tax has hurt most the people who are least able to pay. Recently, Prof. Glen Chappell of East Carolina University released a study on the impact of tobacco taxes, part of which I quote:

> While the tobacco taxes may be attractive sources of additional revenues, their imposition is not without some surprising negative effects. In terms of economic efficiency, tobacco taxes restrict output, raise prices, distort consumer decisions, and reduce overall economic welfare. Furthermore, tobacco taxes are inequitable both because they descriminate against consumers who prefer the taxed tobacco products and because the tobacco products that are taxed are those comprising a larger portion of poor and minority consumers' budgets.

But now I find myself in a strange predicament. In order to save the Tobacco Program that is so vital to the economies of 22 States, I must support the same excise tax that has damaged not only the economic welfare of 55 million Americans who choose to smoke, but also the economic welfare of nearly 700,000 families who are directly engaged in producing tobacco, the 276,000 family farms that depend on tobacco for their livelihoods, and the 50,000 workers who earn their living manufacturing tobacco.

In weighing all of these factors, I find that saving the Tobacco Program is the most important consideration. The language contained in this budget reconciliation plan is the result of a year's work. Many long meetings between grower organizations and tobacco companies has lead to the development of the Tobacco Program Improvement Act of 1985. This legislation is critical to the long-term, well-being of this important part of the American agriculture industry, and that is why it should be included in the budget reconciliation.

Mr. President, once again, our tobacco farmers already have taken more than their fair share of cuts and reductions so that they can preserve

their livelihood. Without this legislation, I fear, tobacco farmers easily could lose that livelihood. I strongly urge my colleagues to join with me in supporting this critical legislation.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I congratulate the distinguished Senator from New Jersey for his remarks. I thought they were right on target.

What this amendment is all about, Mr. President, in summation, is this: As has been pointed out earlier, a lot has been said on this amendment. I do want to thank those who have spoken in favor of it. It seems to me we are making two points here.

First, we need the revenue. When we are running these horrendous dificits every year, every additional cent, every dollar, every million or billion dollars we can achieve is good for the Nation.

Second, this is a health measure. A vote in favor of this amendment is a vote to improve the health of our Nation. There is a direct correlation between the size of the tax and the amount of smoking, and particularly in connection with young people. The young people are in the group that do not have enough financial elasticity so they can continue to buy cigarettes at the increased price.

As has been pointed out, when we went from 8 to 16 cents, there was a fairly dramatic decrease in the number of young people who were smoking, who took up smoking or continued smoking.

This is not as great an increase as nearly passed in the Finance Committee. There by a vote of 10 to 8 an increase of 32 cents a pack was defeated. This is a total of 24 cents.

I think anybody who has ever had a relative, a friend, or an acquaintance or has seen anybody who suffers from emphysema, which to me is one of the most frightening ailments I have seen, or who has seen loved ones suffering from cancer of the lungs, cancer of the chest, the heart ailments that are associated with smoking, will realize that we ought to step up and support this amendment.

It is not going to solve the problem completely but it will help. I urge my colleagues to support this amendment.

Mr. PACKWOOD. I yield 1 minute to the Senator from Kentucky.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, as Barnum said, there is a sucker born every minute. He forgot to tell us about the people who were looking for him.

The tobacco companies are not going to reduce their ability to earn income. What they will do is buy cheaper tobacco, foreign tobacco, imported tobacco.

This tax is a question of saying to society that we are going to put you in the social behavior area we want you in by taxing you and by passing a law here in the great deliberative body of the U.S. Senate. That, in my opinion, is wrong. That is all this tax is about, trying to force smokers into a particular social environment or social behavior by this tax.

It is wrong. They will find a way to get around it. They will bring in imports from foreign countries that will have pesticides and chemicals that we do not want. I encourage my colleagues to vote against this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator from Oregon has 11 minutes and 10 seconds. The Senator from Rhode Island has 29 minutes and 45 seconds.

Mr. CHAFEE. I suggest the absence of a quorum and ask that it be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative assistant proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask the distinguished chairman of the Finance Committee if he will yield back the remainder of his time.

Mr. PACKWOOD. Mr. President, I am happy to yield back the remainder of my time to the chairman of the Budget Committee.

Mr. DOMENICI. Mr. President, how much time remains under the control of the Senator from New Mexico and how much under the control of the Senator from Rhode Island?

The PRESIDING OFFICER. Twenty-six minutes, fifty-five seconds remain under the control of the Senator from Rhode Island; 5 minutes under the control of the Senator from New Mexico.

Mr. DOMENICI. I am prepared to yield back the remainder of my time if the distinguished Senator from Rhode Island is.

Mr. CHAFEE. Mr. President, I yield back the remainder of my time.

Mr. DOMENICI. Mr. President, I make a point of order that the pending amendment, because it is not germane to the reconciliation bill, as provided in section 305(b)(2) of the Congressional Budget Act of 1984, is out of order.

Mr. CHAFEE. Mr. President, pursuant to section 904(b) of the Budget Act, I move to waive the germaneness requirement contained in section 305(b) of that act for the consideration of my pending amendment.

The PRESIDING OFFICER. Under the Budget Act, there is 1 hour of debate evenly divided on the motion.

Mr. DOMENICI. Mr. President, if the Senator is prepared to yield back his time, I am prepared to yield back mine.

Mr. CHAFEE. I would like to have a rollcall vote on my motion to waive germaneness.

Mr. DOMENICI. Mr. President, I would like to table the motion to waive the germaneness requirement, so I would be pleased to yield back my time.

Mr. CHAFEE. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second on the motion to waive?

There is a sufficient second.

The yeas and nays were ordered.

Mr. DOMENICI. Mr. President, there is a motion——

Mr. CHAFEE. Mr. President, next, the Senator from New Mexico is going to move to table my motion. That is satisfactory with me. I am prepared to yield back my time if he is on this debate on germaneness.

The PRESIDING OFFICER. Is all time yielded back?

Mr. DOMENICI. Mr. President, I yield back the remainder of my time.

Mr. CHAFEE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back on the motion to waive.

Mr. DOMENICI. I ask for the yeas and nays on my motion to lay on the table the motion to waive section 305(b)(2) of the Budget Act.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. CHAFEE. Mr. President, before we go to the vote, I think if the Chair could point out what vote does what on this motion to table. The motion to waive the Budget Act is a vote no on the motion to table. Am I correct?

The PRESIDING OFFICER. The pending question is the motion of the Senator from New Mexico to table the motion of the Senator from Rhode Island to waive the Budget Act requirement.

Mr. CHAFEE. So those in favor of the increase in the cigarette tax will vote no on the motion to table.

The PRESIDING OFFICER. The Chair is exceeding its prerogative in responding to the question of the Senator from Rhode Island.

Mr. DOMENICI. Regular order, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the motion

of the Senator from New Mexico to table the motion of the Senator from Rhode Island. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Missouri [Mr. DANFORTH] and the Senator from Maryland [Mr. MATHIAS] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri [Mr. EAGLETON] and the Senator from Hawaii [Mr. INOUYE] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 66, nays 30, as follows:

[Rollcall Vote No. 240 Leg.]

YEAS—66

Abdnor	Gore	Melcher
Andrews	Gramm	Metzenbaum
Armstrong	Grassley	Murkowski
Biden	Harkin	Nickles
Boren	Hart	Nunn
Bumpers	Hawkins	Packwood
Byrd	Hecht	Pressler
Chiles	Heflin	Pryor
Cochran	Heinz	Quayle
Cranston	Helms	Riegle
D'Amato	Hollings	Rudman
DeConcini	Humphrey	Sasser
Denton	Johnston	Simpson
Dixon	Kassebaum	Stennis
Dodd	Kasten	Stevens
Dole	Kerry	Symms
Domenici	Laxalt	Thurmond
Durenberger	Long	Trible
East	Matsunaga	Wallop
Exon	Mattingly	Warner
Ford	McClure	Wilson
Goldwater	McConnell	Zorinsky

NAYS—30

Baucus	Glenn	Moynihan
Bentsen	Gorton	Pell
Bingaman	Hatch	Proxmire
Boschwitz	Hatfield	Rockefeller
Bradley	Kennedy	Roth
Burdick	Lautenberg	Sarbanes
Chafee	Leahy	Simon
Cohen	Levin	Specter
Evans	Lugar	Stafford
Garn	Mitchell	Weicker

NOT VOTING—4

Danforth	Inouye
Eagleton	Mathias

So the motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Chair will now rule on the point of order. The amendment of the Senator from Rhode Island introduces a new subject matter not currently contained in the bill and for that reason it is not germane. The point of order is well taken. The amendment falls.

The Senator from New Mexico.

Mr. DOMENICI. Mr. President, Senators have asked what we intend to do next. I understand the distinguished Senator from Maine, Senator MITCHELL, has an amendment involving cigarette taxes and another subject all in one amendment. It will be our intention to take that up at this point.

I understand the Senator will be willing to take less than a full hour. Is that correct?

Mr. MITCHELL. The Senator is correct.

Mr. DOMENICI. We probably would be willing to come to a time agreement on that.

The distinguished majority leader indicated that after the vote on that amendment, whatever the vote, we would not have any further votes this evening.

So it would be our intention to proceed with the Mitchell amendment at this time.

Mr. BYRD. Mr. President, will the distinguished Senator who is chairman of the committee yield to me for another question?

Mr. DOMENICI. Indeed I yield.

Mr. BYRD. Mr. President, is the distinguished manager of the resolution in a position to tell the Senate at this time when we will begin our study on the matter tomorrow?

Mr. DOMENICI. I am sorry, I say to the distinguished minority leader. Someone was handling me a note about the pending amendment and I did not hear the entire question. Would he mind repeating it, please?

Mr. BYRD. Yes. I simply asked when the Senate would be expected to resume consideration of the reconciliation measure tomorrow.

Mr. DOMENICI. I have not asked the distinguished majority leader. Perhaps the majority whip knows. I think we have an intervening appropriation bill in the morning. But I am uninformed beyond that.

Mr. SIMPSON. Mr. President, on behalf of the leader, with whom I have not conversed in recent moments, I would say it is the intent to go forward at an early hour and to proceed this week at 8 a.m. or 8:30 a.m. with our Senate opening and continue to process this measure and another appropriation measure.

I cannot be more specific other than to say that there will be rollcall votes likely in the morning hours and continual opening of the Senate at 8 a.m. or 8:30 a.m. in an effort to process the business at hand.

Mr. BYRD. Mr. President, I would hope that the Senate would not return to the reconciliation measure so early tomorrow, may I suggest to the distinguished majority whip. The attendance is not too good so early and yet the time would run whether or not the attendance is good.

I would hope that we would not resume consideration of the reconciliation measure before 11 a.m. if the distinguished majority whip and the distinguished majority leader would kindly agree.

Mr. SIMPSON. Mr. President, I say to the distinguished Democratic leader, we will try to accommodate that. I can assure him tonight we have the limitation of several other functions and will not likely press for further rollcall votes this evening and I will get back to the distinguished Democratic leader and see if we cannot accommodate him.

Mr. BYRD. I thank the distinguished majority whip.

Mr. MITCHELL. Mr. President, will the Senator yield?

Mr. DOMENICI. I am pleased to yield.

Mr. MITCHELL. Did I understand the assistant leader just to state that there would not be a vote? It is my intention to proceed with my amendment as we discussed and to have a vote on it.

Mr. DOMENICI. I did not understand the distinguished majority whip to say there would be no further votes this evening.

Mr. SIMPSON. Did I not say that?

Mr. DOMENICI. It is our intention to try to dispose of the Senator's amendment tonight. I cannot say whether that will require one vote or two, or whatever it will be, but that is our intention.

Mr. MITCHELL. I thank the Senator. I wanted to make sure.

Mr. DOMENICI. While there are Senators present on the floor, might I just make this announcement: We now know of three amendments that Senators have told us they have. We are going to try to rotate back and forth between the two sides as we have in the past.

If Senators have amendments that they are aware of—there are also serious germaneness issues on a bill like this—I would be pleased to start making a list and do my best to accommodate Senators, but at this moment I only know of three. If Senators could start getting them here we might be able to accommodate them even as to time.

With that, I am prepared to yield the floor if the Senator from Maine is prepared to offer his amendment.

Mr. MITCHELL. I thank the Senator.

AMENDMENT NO. 840

(Purpose: To delay medicare coverage of current State and local employees, and to increase the cigarette tax by 4 cents for 3 years)

Mr. MITCHELL. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maine [Mr. MITCHELL] for himself, Mr. COHEN, Mr. KERRY, and Mr.

SIMON proposes an amendment numbered 840.

Mr. MITCHELL. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 421, line 8, strike out through page 422, line 21, and insert in lieu thereof the following:

(c) EFFECTIVE DATES.—

(1) HOSPITAL INSURANCE TAXES.—The amendments made by subsection (a) shall apply to service performed by an individual on or after his applicable effective date as determined under paragraph (3).

(2) MEDICARE COVERAGE.—

(A) IN GENERAL.—The amendments made by subsection (b) are effective with respect to an individual on and after his applicable effective date as determined under paragraph (3), and the amendments made by paragraph (2) of that subsection apply to service performed by an individual on or after his applicable effective date.

(B) TREATMENT OF CURRENT DISABILITIES.—For purposes of establishing entitlement to hospital insurance benefits under part A of title XVIII of the Social Security Act pursuant to the amendments made by subsection (b) or the provisions of subsection (d), on the basis of medicare qualified State and local employment, no individual may be considered to be under a disability for any period before his applicable effective date.

(3) APPLICABLE EFFECTIVE DATE.—An individual's applicable effective date is—

(A) October 1, 1986, in the case of an individual who is not an employee of a State or political subdivision (or instrumentality which is wholly owned thereby) on September 30, 1986; and

(B) October 1, 1987, in the case of an individual who is such an employee on September 30, 1986.

(d) TRANSITIONAL PROVISIONS.—

(1) IN GENERAL.—For purposes of sections 226, 226A, and 1811 of the Social Security Act, in the case of any individual who—

(A) performs service during the October in which his applicable effective date occurs which constitutes medicare qualified State and local governmental employment (as defined in section 210(p)(1) of such Act); and

(B) performed service prior to his applicable effective date, which would constitute medicare qualified State and local governmental employment if performed after his applicable effective date,

such individual's State and local governmental employment performed before his applicable effective date shall be considered to be "employment" (as defined for purposes of title II of such Act), but only for the purpose of providing the individual (or another person) with entitlement to hospital insurance benefits under part A of title XVIII of such Act.

On page 372, strike out lines 5 through 10 and insert in lieu thereof the following:

SEC. 790. INCREASE IN TAX ON CIGARETTES.

(a) RATE OF TAX.—Subsection (b) of section 5701 of the Internal Revenue Code of 1954 (relating to rate of tax on cigarettes) is amended—

(1) by striking out "$8 per thousand" in paragraph (1) and inserting in lieu thereof "$10 per thousand ($8 per thousand after October 14, 1988)"; and

(2) by striking out "$16.80 per thousand" in paragraph (2) and inserting in lieu thereof "$21.00 per thousand ($16.80 per thousand after October 14, 1988)".

(b) FLOOR STOCKS.—

(1) IMPOSITION OF TAX.—On cigarettes manufactured in or imported into the United States which are removed before November 15, 1985, and held on such date for sale by any person, there shall be imposed the following taxes:

(A) SMALL CIGARETTES.—On cigarettes, weighing not more than 3 pounds per thousand, $2 per thousand;

(B) LARGE CIGARETTES.—On cigarettes, weighing more than 3 pounds per thousand, $4.20 per thousand; except that, if more than 6½ inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per thousand, counting each 2¾ inches, or fraction thereof, of the length of each as one cigarette.

(2) LIABILITY FOR TAX AND METHOD OF PAYMENT.—

(A) LIABILITY FOR TAX.—A person holding cigarettes on November 15, 1985, to which any tax imposed by paragraph (1) applies shall be liable for such tax.

(B) METHOD OF PAYMENT.—The tax imposed by paragraph (1) shall be treated as a tax imposed under section 5701 of the Internal Revenue Code of 1954 and shall be due and payable on December 2, 1985, in the same manner as the tax imposed under such section is payable with respect to cigarettes removed on November 15, 1985.

(3) CIGARETTE.—For purposes of this subsection, the term "cigarette" shall have the meaning given to such term by subsection (b) of section 5702 of the Internal Revenue Code of 1954.

(4) EXCEPTION FOR RETAILERS.—The taxes imposed by paragraph (1) shall not apply to cigarettes in retail stocks held on November 15, 1985, at the place where intended to be sold at retail.

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendment made by subsection (a) shall apply with respect to cigarettes removed after October 14, 1985.

(2) CONFORMING AMENDMENT.—Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended by striking out "and before November 15, 1985".

Mr. DOMENICI. Mr. President, might I ask the distinguished Senator from Maine, is he prepared to shorten the 1 hour that is allowed for him? We are prepared to shorten our 1 hour in opposition without waiving germaneness.

Mr. MITCHELL. I am prepared to do that.

Mr. DOMENICI. Mr. President, I ask unanimous consent that there be 1 hour equally divided between the distinguished Senator from Maine and the Senator from New Mexico in opposition thereto and I do that without waiving the germaneness defenses that might be applicable to the pending amendment.

The PRESIDING OFFICER. (Mr. PRESSLER). Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I yield the time in opposition to the distinguished chairman of the Finance Committee where jurisdiction of this matter lies.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. Mr. President, this amendment would delay for 1 year the implementation of mandatory Medicare coverage for State and local government employees.

Under the bill as reported by the Finance Committee, all States and local government employees will be mandatorily covered under the Medicare Program as of September 30, 1986.

My amendment would leave that date untouched as to new State and local employees but would delay coverage for 1 year until September 30, 1987, for current State government and local government employees. This delay would give each of the States and the municipalities throughout the country an additional year to raise the revenues necessary to finance the employer's portion of the Medicare tax.

I am deeply concerned about the negative impact this provision will have on State governments and on local governments across the Nation. As to State government employees, the most severe effect will be felt in seven States which have independent State retirement systems and, therefore, have one or at most a very few of their employees covered under the Social Security Program but as to municipalities—and Senators should be aware of this—this will have an adverse effect in every State in the Union, every single State.

Let me deal first and briefly with State government employees. There are currently seven States—Alaska, Colorado, Louisiana, Maine, Massachusetts, Nevada, and Ohio—which have independent State retirement systems and as a result none or very few of their employees are covered under Social Security. The cost to providing Medicare coverage to State employees will be an added burden on those States at a time when they and other State governments are attempting to deal with cutbacks in Federal funding in a variety of programs.

In my own State of Maine, a rural State with a population of only 1 million people, mandatory Medicare coverage for State government employees will add, in State government expenses, $6 million a year. The State will be forced to reduce critical ongoing programs or enact higher taxes. And that will be true in each of the seven States that I have mentioned. Ohio, for example, one of the other States, will be forced to raise $45 million a year to cover the Medicare employer portion of the tax on State employees.

But while the provision will affect State government and State employees in only seven States, the provision will have an adverse effect on municipalities in every single State. The cost of this for 1 year is $2.2 billion. And so

what we are saying to the municipalities of this country is that we, the Congress, are compelling them to raise their local taxes by $2.2 billion a year and we are compelling them to do it immediately at the end of this fiscal year.

This burden, which is to pay for the employer's share of the Medicare tax, will fall upon municipalities in this country at the same time that they face the loss of $4.6 billion in general revenue sharing which they have been receiving. Local governments across this country have been hit hard over the last 5 years as a result of those Federal budget cuts which we all know are necessary. But that assault of recent years will turn next year into a tidal wave and make the job of State and local governments extremely difficult, if not impossible.

In essence, we at the Federal level are transferring the most difficult fiscal policy decisions to those at the local level. We are cutting back a variety of programs, we are eliminating revenue sharing, and then, at the same time, we come in and mandate an increase in the cost of local governments to the tune of $2.2 billion a year.

The net effect on local governments—I limit this now to local governments—the net adverse effect in 1 year is $6.8 billion. That is the amount of revenue that local governments will lose through the termination of revenue sharing, $4.6 billion, plus the new added costs, imposed on them in the form of the employer's portion of the Medicare tax, $2.2 billion.

This is occuring at a time when the administration is proposing to repeal the local property tax deduction and while the Federal Government remains paralyzed over decisions as to whether or not to raise revenue. If this bill passes as reported by the Finance Committee, almost every city and town in America will be forced to increase its property tax to raise the additional revenues required by the bill.

As a matter of tax equity, I believe it unfair to mandate an increase in the most regressive source of public revenues, the property tax. As a matter of policy, it is inconsistent, to say the least, for Federal officials to engage in the rhetoric we hear daily in this Congress, about not raising Federal taxes while we, at the same time, take an action which compels many municipalities in America to raise their taxes. Inconsistent is the kindest way to describe that action.

My amendment will do one thing and one simple thing only. It will delay for 1 year the mandatory coverge of current State and local government employees under Medicare, to give States and those municipalities that 1 year to prepare for and to implement the tax increases that will be necessary at the local level to meet this added burden. It is incredible that we would impose a new tax burden of $2.2 billion a year on municipalities in America at exactly the same time that we eliminate general revenue sharing which reduces their revenues by $4.6 billion we give them no time to plan for it, no time to accommodate for this added burden. And we give them no time to increase the taxes that will be necessary to meet this burden.

The 1 year delay in Medicare coverage for current State and local government employees will result, as I noted earlier, in a loss of projected revenue of $2.2 billion, spread over 3 years as the budget reconciliation bill contemplates.

I know we are all concerned about the Federal budget deficit, and so I offer as part of this amendment a second proposal which would place an additional 4-cent tax on cigarettes, thereby raising the cigarette tax to 20 cents a pack. That will generate approximately $2.2 billion over the 3-year period and offset the revenues lost as a result of the 1-year delay in mandatory Medicare coverage. The tax on cigarettes in my amendment is not a permanent tax. It is intended to be temporary for the 3-year period only so that it will achieve the objective of offsetting the $2.2 billion cost of the 1-year delay in mandatory Medicare coverage.

We have already had extensive debate on the proposal to increase the cigarette tax 8 cents so I will be very brief. The Senate should know that the Federal excise tax on cigarettes was at 8 cents for the 32-year period from 1951 to 1983. For 32 years, the tax was not increased. It was increased in the Tax Equity and Financial Responsibility Act of 1982. It took effect in 1983 to go from 8 cents to 16 cents. That tax was scheduled to expire—that is, to return to the 8-cent level—on October 1, 1985, but in recent legislation was extended on an interim basis until November 15. The provision in S. 1730, as approved by the Finance Committee, would repeal the sunset date thereby establishing the tax at the 16-cent level on a permanent basis.

My amendment, as I noted earlier and I repeat now, would provide for a 4-cent increase in the Federal excise tax on cigarettes for a 3-year period, from November 15, 1985, to November 15, 1988. Its objective and purpose is to raise sufficient revenues to offset the loss that would occur from the 1-year delay in mandatory Medicare coverage for current State and local government employees.

I urge Members of the Senate to consider the impact that this mandatory provision will have on State and especially local governments in your States. I repeat, every single State will be adversely affected as to the municipalities in that State and will be forced to increase their taxes by $2.2 billion a year to meet this cost at exactly the same time that they will be losing the $4.6 billion from revenue sharing.

Mr. President, I urge the Members of the Senate to support this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. Mr. President, the arguments against this amendment obviously are not those that were used against the amendment offered by the Senator from Rhode Island. There an agreement had been made between the Agriculture Committee or the Finance Committee, or at least a majority of the members of both, to save the Government money in the tobacco program in exchange for Senators, who otherwise would filibuster the cigarette tax increase, to not filibuster.

This is a different issue. The issue involves whether or not the State employees should pay taxes into the Medicare system and that their employer—the State or local governments—should pay taxes into the Medicare system.

And I emphasize pay taxes into it rather than using the word "Medicare" because what we have discovered is that most State and municipal employees are covered by Medicare. They are normally the residual beneficiary of someone else in private employment, and by virtue of that residual beneficial interest they are covered by Medicare. Example: Sally works for the city of Bangor, ME. Her husband, Mike, works for International Paper. He pays Social Security taxes, International Paper pays for Social Security taxes, and Medicare taxes are paid. No Medicare taxes are ever paid on Sally, ever. Mike becomes 65, Sally becomes 65, and she is covered although the taxes were never paid for her.

Contrast that situation slightly. Mike works for International Paper in Maine. Sally, instead of working for Bangor, the city of Bangor, ME, works for L.L. Bean—24 hours a day, 365 days a year. Right? She works for L.L. Bean. Now, working for L.L. Bean, she is covered by Medicare and she pays taxes. Her employer pays taxes. But she gets no greater benefits than she gets by working for the city of Bangor and having no taxes paid at all. She gets exactly the same benefits whether she works for L.L. Bean or the city of Bangor. So the question first becomes one of fairness. Should those who are going to benefit from the Medicare system pay something?

We made one exception as a matter of social policy years ago. It is a good exception. We said if one spouse works in the marketplace for money and the other spouse does not work in the marketplace for money, works at

home the entire time, never receives any wages—not from the city of Bangor, not from L.L. Bean—that non-income-earning spouse is still covered by Medicare. That is a matter of social policy. We thought that was good policy. But we did say, for those who worked in the marketplace, even though they are going to get the same benefits that the spouse who never works in the marketplace gets, they are going to pay something into Medicare. This is because we realized fully that if you were going to extend Medicare benefits to spouses who don't earn wages, you were going to have to put some wage-earning spouses' money into the system to a greater extent. That is a social transfer policy.

Let me review this. Mike works, his wife does not work in the marketplace at all, and she is covered. She is covered even though she never pays any taxes. Mike works, Sally works for L.L. Bean, L.L. Bean pays taxes, even though Sally has no more benefits than if she does not work at all. Now in addition, we currently say, as a matter of social policy, Sally, you and L.L. Bean are going to pay taxes into the fund unless you work for the city of Bangor or for the State of Maine. Then you are not going to pay any taxes into the fund. That is wrong as a matter of social policy. If we are going to say that everyone who is employed for money pays something into the Medicare fund, even though they will get no greater benefits than if they never worked to pay anything into the fund, then everyone who works for wages ought to pay something into the fund. That's the first question.

Second question—a matter of timing. The Budget Committee would have included all current and new employees under the Medicare System on January 1, 1986—next January, 2½ months from now. The Finance Committee thought that was too rapid. And the Senator from Maine and others argued very cogently in the committee that it was too rapid. So we changed that date to October 1, 1986, a 9-month slip from what the Budget Committee had.

I think we have a fair compromise. This reconciliation bill is going to be passed, and sent to the President I would think in the next 2 weeks, 3 weeks, hopefully. That gives States and local governments ample time to pick up a payment that we require of every other employee and every other employer.

So, apart from the nonwage-earning spouse who gets Medicare benefits as a matter of social policy even though he or she pays nothing into the fund, we say everyone else should pay, and that includes municipal employees, country employees, State employees, and L.L. Bean employees.

So, I hope very much that the amendment of my good friend from Maine will be defeated. I think on policy reasons the employees have finaly been added to the Medicare system. Second, I would hate to jeopardize this whole reconciliation bill by adding a provision that would lose revenues and by adding yet again an addition to the cigarette tax to pay for the lost revenues. We will have a tough enough time getting this passed and not having it vetoed with the 16-cent cigarette tax. You add that, and I think we bring the whole reconciliation crashing down.

I urge the defeat of this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. I yield 5 minutes to the Senator from Illinois.

Mr. SIMON. Mr. President, and my colleagues, I am pleased to rise in support of the amendment of the Senator from Maine. Much of what the distinguished chairman of the Finance Committee says is correct. There is an inequity here. It is historically not quite correct to say that Sally is the cause of some of our problems in Medicare. I am not suggesting that Senator PACKWOOD has said that. In fact, a lot more Sallies are working than we ever anticipated when Medicare was passed. A percentage of women, spouses working is much higher than anyone thought it would be, but medical costs have risen much more rapidly. Medical costs last year rose 7 percent, about double the rate of inflation; the year before that, 13.2 percent, about triple the rate of inflation. So Medicare faces real problems. We do need additional revenue. It is equitable that everyone pay in, and I would add I favor that on Social Security also. Social Security is not the topic covered right here. But I think it makes sense if we do it gradually.

My fear—and I was, I think, 1 of 28 in the House some years ago who voted for Social Security across the board for everyone in this Nation.

I still favor it—but I think if we are going to achieve it, we ought to do it gradually. I think probably it is the only way it will really be achieved.

I think what the Senator from Maine offers here is a sensible way of gradually moving in that direction. It is not only the States that are mentioned by the Senator from Maine. School districts in Illinois face real problems. If we impose all of this on them in one fell swoop, it is going to be a problem.

I tend to favor the approach of the Senator from Maine. It is a gradual one. It eventually will cover everyone. It is going to increase revenue, not quite as rapidly as we would do otherwise. But it will provide equity and it does it in a sensible, gradual way. Let me add beyond the immediate issue the whole question of Social Security coverage. I also think we have to be looking toward that, and also doing it gradually reassuring teachers' retirement systems, State police retirement systems, municipal retirement systems, and all the others that they are not in jeopardy—that they in fact will benefit by giving new employees the option of coverage under Social Security or coverage under both systems.

But I think what the Senator from Maine offers us now is a chance to move in the right direction but do it gradually without imposing unnecessarily on local governmental agencies.

That approach makes sense to me. I am pleased to support the amendment of the Senator from Maine.

I yield back the balance of my time.

The PRESIDING OFFICER. Who yields time?

Mr. MITCHELL. I yield to the Senator from Massachusetts.

Mr. KERRY. Mr. President, I rise to join my distinguished colleague from Maine and my colleague from Illinois in support of this measure.

First of all, I would thank the chairman of the committee, however, for having listened to us at least to the distance that we have seen some changes with respect to this measure, but I think there are still serious reasons for concern.

I do not disagree with anything the chairman said about why it is appropriate ultimately for someone to be paying the tax. I think we are sympathetic to that and that is appropriate.

The issue here is when and how—it is not whether. The when and how are very important.

In a State like Massachusetts, the difference between the proposal of my colleague from Maine and the proposal that is currently in the reconciliation is the difference in one year of $5 million and in the second year of some $17 million.

In addition, what we are doing here if we go ahead and mandate that both new and current employees become subject to this in September 1986 is, we are mandating across this country that the most regressive tax in the country will be increased, because every single community in this country in order to meet the gap will have to make it up by raising property taxes. That is the least desirable tax that this body should want any community to have to subject themselves to.

In addition, Mr. President, I believe that it is vital that we deal fairly with employees across this country who entered into a contract with their communities, local and State, and who have a right to believe that the contract they entered into was not going to be suddenly abrogated or changed on them without the appropriate

amount of time to make a transition in order to make adjustments in their own situation. It seems to me when we suddenly mandate that they are going to be paying that tax, and that their health care programs and even their retirement health benefit programs will subject themselves to alteration, I think that is instilling a sudden difficulty into the process.

Third, I think it is realistic for us and probably important for us to recognize that every single other program that has gone through this institution in the course of the budget process has seen cuts that are going to be felt by local and State communities—EPA programs, UDAG programs, housing programs, industrial development bond program recently, food stamp cut, the WIC cuts. Every single one of them. In a lot of States, because people are being responsible, those cuts are being made up by local and State revenues.

So here we are already pinching, cutting, forcing local communities to be far more restrictive than at any time before and yet we are turning around in one more instance and denying them their ability.

I strongly urge that we do this, which is a revenue neutral process.

Mr. MITCHELL. Mr. President, I yield 3 minutes to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio.

DELAYING MEDICARE COVERAGE FOR STATE AND LOCAL EMPLOYEES

Mr. GLENN. Mr. President, I rise in the support of the pending amendment. It would phase in Medicare coverage for State and local employees, thereby giving States and municipalities additional time to raise revenue or make other budget adjustments necessary to finance the employer share of the Medicare payroll tax.

The budget bill now before the Senate mandates Medicare coverage of State and local employees, not already under Social Security, beginning September 30, 1986. The amendment phases in this proposed tax by requiring that State and local employees hired after September 30, 1986, begin paying the Medicare payroll tax the next year. The effective date of the proposed tax on current State and local employees would be delayed by 1 year, until September 30, 1987.

Adoption of the amendment would make the Federal deficit reduction plan more equitable and fair. Federal deficit reduction should not consist of sudden and major cost-shifting to State and local governments. Yet the bill before the Senate would impose a new and substantial additional tax burden on State and local governments next year as they begin to pay the employer's share of the Medicare tax—1.45 percent of salary for each employee. While this is being implemented, the Federal budget plan before the Senate also proposes to cut other sources of funding which are critical to these governments, including elimination of general revenue sharing.

According to estimates, the proposed Medicare tax will raise more than $5 billion over the next 3 years. Five billion dollars. The Governor's office in Ohio estimates that the first 6 months of this new Medicare tax will cost my home State government an estimated $21.8 million. The first full year will cost an estimated $44.7 million. These figures do not even include the cost of the tax to individual local governments in the State.

However, the bulk of the $5 billion in new Federal tax revenue will come from local employees—our teachers, our firefighters, our policemen, and their employers—and cities and municipalities without a ready revenue base. I am sure that many of my colleagues share my concern about what the tax will cost their local governments, school systems, and fire and police departments.

Mr. President, my remarks today focus on cities and towns because I think that the Medicare proposal will probably cause the greatest financial hardship on these governments. Municipalities have a regressive property tax as their principal public revenue source. Otherwise, they are largely dependent on funds from the State and Federal government.

The distinguished Senator from Massachusetts just spoke of how municipalities are dependent upon property taxes for their principal public revenue source.

Because this Medicare proposal impacts municipalities in almost every State, I urge my colleagues to take a moment and think about how they are going to explain their vote on this amendment to their local policemen, schoolteachers and firefighters. For example, most of us in this body agree that our Nation's schoolteachers are underpaid, and we have said we wish we could pay our children's teachers more. However, if we do not modify the budget legislation now before us, we will be taking out an additional 1.45-percent bite out of the paychecks of about one-third of these teachers next fall.

Since most State governments already participate in Social Security, the proposed Medicare tax will only really impact State employees and State retirement programs in seven States, my home State of Ohio being one of those States. I have always argued that those governments, whether State or local, which took the initiative to set up retirement benefit systems as good as or better than Social Security should not be penalized because they had the foresight and leadership to establish these systems.

When the Social Security Act was passed in 1935, State and local workers were excluded from participating in Social Security because there were constitutional concerns about Federal taxation of these governments. In 1951, they were allowed to join Social Security on a voluntary basis, but only if they did not benefit from any State or local government retirement program, and if they were not police and firefighters. It was only eventually that we opened Social Security's doors to almost any State and local employee group who wanted to join the Federal system.

Mr. President, I am not happy with the proposed Medicare tax. I am not even particularly pleased with the proposed amendment. Quite simply, if it is successfully adopted by the Senate, it only works to make a bad situation a little better and a bad budget plan a little fairer.

In its original form, this year's Federal deficit reduction plan included a proposal to mandate Social Security coverage of State and local employees not already under the system. I am pleased that this proposal has been scaled back to only mandate Medicare coverage. However, I would like to remind my colleagues that many of us in this body have argued that Social Security and Medicare trust fund decisions should not be made for the purposes of Federal deficit reduction. We vote for this all the time, and yet these kinds of decisions are continually made in the context of the budget reconciliation legislation.

Mr. President, I commend the distinguished Senator from Maine [Mr. MITCHELL], for offering the pending amendment and I urge my colleagues to support it.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. Mr. President, I yield 3 minutes to the Senator from Kentucky.

Mr. FORD. Mr. President, I sympathize with the distinguished Senator from Maine, the Senator from Massachusetts, and the Senator from Ohio that we can have problems. My State has problems, too.

I rise in opposition to the amendment by my distinguished colleague from Maine, Senator MITCHELL. Let me say from the onset, that I support what he is trying to do, I just do not support the way he attempts to pay for it.

I do not support the provisions of the reconciliation bill, as reported from the Finance Committee, which impose a new tax on State and local governments—and that is exactly what it is, Mr. President, and new Federal tax on State and local governments. The Finance Committee recommenda-

tions extend the hospital insurance tax for Medicare to current and newly hired State and local workers. This is not a voluntary election for Medicare coverage—it is a mandate, and that mandate means a new tax on State and local governments.

In Kentucky, we have four basic groups of State and local employees who are not currently covered by Medicare. The largest of these groups is the Kentucky schoolteachers, representing approximately 44,000 employees. The cost to the Commonwealth of Kentucky for Medicare coverage for this group alone is estimated at $12.5 million. That is a hefty tax for my State, and one which we are not in a position to fund.

This tax is particularly onerous as it falls on the Kentucky schoolteacher. The Kentucky Teachers Retirement System is actuarily sound. Kentucky teachers pay for postretirement medical insurance. To impose this additional tax on them is simply unfair and unnecessary.

Since 1939 the Kentucky Teacher's Retirement System has provided Kentucky teachers with a sound, funded, retirement system. As my colleagues may remember, public employees were prohibited from participating in Social Security under the original provisions of the act. Kentucky teachers pay into the retirement system at a rate of 9.6 percent, which is matched by the State. Of that contribution, approximately 1 percent goes to a postretirement medical insurance program. The current cost of the fund is $15 million, and is expected to rise to about $20 million in the next 2 years. The program is basically funded by active teachers, at the 1-percent contribution rate, but retired members also pay a nominal premium for the medical coverage.

There are currently 44,000 active teachers supporting postretirement medical coverage for 22,000 retired teachers and spouses. It would be punitive, at best, to add an additional 1.45 percent Medicare tax on these public employees. For a Kentucky teacher earning $20,000 a year, and that is a high salary for a Kentucky teacher, the additional cost for future Medicare coverage would be $290.

At a time when we in Congress are striving to encourage our young people to enter the teaching profession, and provide incentives for those who are currently teaching to remain in the field, we should not be adding a new tax to State and local employees. It is unfair to single out this group of workers as a means of producing revenues for deficit reduction.

This new tax represents a fundamental shift in philosophy for our Government. This new tax is nothing short of an attempt to shift the burden of deficit reduction from the Federal Government to the State and local governments. This provision is expected to produce $4.7 billion in new revenues over the next 3 years. Half of that amount will come from the employees, and the other half from State and local governments. We are taxing our States, cities, and counties to balance the Federal budget. It is a bad precedent, and one I do not support.

There is a grave misconception about the fiscal position of our States and cities and their ability to fund their portion of this new Medicare tax. Our State and local governments are in no better position to finance the Federal debt than are we.

As Congress continues to cut vital Federal assistance to these governments, in particular, our recent move to eliminate the General Revenue-Sharing Program, as well as decreased funds for other programs, we force our State and local governments to pick up more and more of the burden of providing for the health, safety, and security of our citizens. There are no surplus dollars in the treasuries of these governments to pay for their share of the mandatory Medicare coverage. This move will require new tax initiatives, and that will take time.

The Senate Finance Committee recognized this need by delaying the provisions of this new tax for 1 year. But that is not enough time for these governments to prepare for this new burden. The amendment by the Senator from Maine, Senator MITCHELL, attempts to address this problem by further delaying the provision requiring mandatory Medicare coverage for current employees, by 1 year. I support the intent of what my distinguished colleague is doing. I support giving our States and communities additional time to try to meet this new responsibility, and I would like to support him on his amendment.

I do not think it goes far enough. I would prefer that we not tax the State and local governments at all; and if we must tax them, then let us tax only those newly hired State and local employees. We can be up front with them—they will come on board knowing that they must contribute to Medicare coverage. Taxing current employees not only unfairly burdens State and local governments and employees, but does so without sufficient warning.

If we must make any move in this direction, I would support the House Ways and Means Committee provision which would only tax newly hired State and local employees. Such a tax would place a minimal initial burden on the States and communities, but would achieve the purpose of bringing these workers into the Medicare system over time, giving the States, cities, and counties an opportunity to prepare for the fiscal responsibility of one-half of this tax. At the same time, covering only new hires would give non-Social Security retirement programs, such as the Kentucky teachers' retirement program, a chance to adjust their system as their funding base changes.

However, I cannot support the amendment before us which would delay the new Medicare tax, at a cost of $2.2 billion over 3 years, and pay for that cost by increasing the cigarette excise tax by 4 cents thereby raising the tax to a total of 20 cents.

Let me say from the beginning that I do not support the extension of the current 16-cent excise tax, which was scheduled to sunset on October 1. I agreed not to oppose the Finance Committee action continuing this tax in exchange for recognition of the devastating effects this continuing tax will have on farm families in my State, and the ability to mitigate these effects by tying the Tobacco Improvement Act, S. 1418, to the tax package. The package offered in the Finance Committee by the majority leader, Senator DOLE, repealed the sunset of the cigarette tax; instituted a new tax on smokeless tobacco at a rate of 8 cents per pound on chewing tobacco and 24 cents on snuff; and included the provisions of S. 1418, legislation designed to make the tobacco program more market oriented.

This was a carefully negotiated agreement between the major tobacco manufacturers, and both Burley and Flue-cured growers. For 3 weeks we hammered out our differences, and on the final day this group spent 17 long, tedious hours working out the final package which became S. 1418, the Tobacco Improvement Act of 1985. This agreement then became part of the Finance Committee measure under reconciliation.

It was offered in committee as a three-part package, and was adopted with the agreement that I, and certain other tobacco State senators, would not oppose the repeal of the tobacco excise tax sunset. But let me be clear, any move to change the provisions, to increase the tax at all, will result in this agreement falling apart. As I have said, that means that the farmers will vote this program out, and then we really will have problems.

I see a lot of crocodile tears around here lately that we ought to start the Gramm-Rudman this year instead of next year. If we started this year, we would be in a lot more trouble than we are in now.

When we start trying to bail out the communities, we look to the cigarette taxes. We are going to take care of it for 1 year but it is going to take 3 years of taxes on cigarettes to pay for 1 year. So we are short for 2 years, and the 4 cents stays on.

We look at the possibility of a veto. I do not want this bill vetoed. I think it is a good bill. We have worked hard to

put it together. But yet you come down on one point.

Is there not some other place you can put a tax? Is there something else you can do to pickup this money?

Let me tell you what you are doing. If the 4 cents is not enough, do you know what will happen? The local communities can put a cigarette tax on. The States can put a cigarette tax on. Why not let them take care of themselves rather than us trying to tell them, "You have a 1-year delay."

The other day on the floor I was defending revenue sharing. I did not see a whole lot of people trying to help me do that. We nibbled away at revenue sharing which was damaging the communities and the States by the loss of funds. Yet you want to come back to one place—tobacco—and take that way to pay for the delay for only 1 year.

The House Ways and Means position, by the way, which has not been voted on yet, is that you take on new hires—not everybody, just those that are hired new. I would like to have an amendment to the effect that that is what we do in conference.

We are going to conference. There are a lot of things that can be worked out. I have a great deal of confidence in those who will negotiate in that conference committee on what can be done.

I say again, a tax is a tax is a tax. And the Senator is putting on a new tax. It is not germane. We have already had that vote. The Chair has already ruled. Now all we have is the delay for 1 year. I think we ought to have it as it is, have a sense-of-the-Senate resolution that we do not want to pick these current employees up, that we want just new hires; then we can get the job done. I suggest that to my colleagues.

Tobacco, and the smoking public who enjoy a legal product, are contributing their fair share to deficit reduction. We should not further penalize middle- and low-income Americans who, of their own free will, enjoy this product, by increasing the cigarette excise tax. Even though I sympathize with what the Senator from Maine is doing, I cannot support him, and I urge my colleagues to defeat this amendment.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. FORD. I yield the floor, Mr. President.

Mr. PACKWOOD. Mr. President, let me emphasize again what we have already done in comparison with what the Budget Committee would have done. It is not just Medicare. The Budget Committee's assumption when we got this bill was that, one, we would cover all employees, current employees and new employees, with Medicare on January 1, 1986; all new employees on Social Security on January 31, 1986, and we would change the method of applying the new Social Security tax schedule to new employees of State and local governments. The revenue expected to be raised by that method was $9.1 billion as of January 1, 1986.

We just about cut that in half, slightly less than $5 billion. We have extended the time 9 months, we have not brought in Social Security, and I think it is a fair compromise, and one that ought to be adopted by this Chamber.

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. MITCHELL. Mr. President, I should like to respond, if I could, to the point made by the Chairman. It has become a standard operating procedure in Congress in the last few years to have an initial position taken that is totally unreasonable, virtually impossible to implement, and then, at the last moment, to move off that position to another which then, by virtue of its comparison to the initial position, is hailed as a reasonable compromise.

Here we are, in the fall of 1985. There are virtually no State legislatures which are in session. We receive a proposal that would mandate—mandate—tax increases in many States and in almost every municipality in the country, and leave them no time to do so. Then the Finance Committee gets that, a position clearly not possible to implement, not seriously intended, in my judgment, ever to be adopted, but merely to stake out an original negotiating position so that a secondary position would seem, in comparison, to be reasonable. That is precisely what we have here.

I want to emphasize one further point: The cigarette tax increase would not be permanent under the amendment I am proposing. It would be for 3 years only, sufficient to cover or offset the loss of revenue in the 1 year delay of Medicare coverage.

Finally, the Senator from Oregon, the distinguished chairman of the Committee on Finance, made, as always, a very eloquent agrument in terms of the policy on whether or not Medicare coverage should apply uniformly to employees throughout the country. That decision has been made. That has nothing to do with this amendment. This amendment raises one question and one question only: That is the date on which mandatory coverage for current employees of State and local governments will apply. New hires will remain covered mandatorily as of September 30, 1986. The only question has nothing to do with policy; it has to do with timing. I would say it is simply fairness to give the municipalities the time to prepare for and to enact the new taxes which this will require.

The chairman himself will recall that when I raised this in the Finance Committee and said, it is inconsistent for Federal officials like us to go around saying to people, "We are not raising your taxes," then to pass a bill which requires every town in America to raise taxes, the chairman said, very forthrightly, "Nobody is kidding themselves; this is a tax increase." The problem is it is a tax increase which every selectman, mayor, and alderman in America will have to impose because we are making them do it so we can go around and say to our constituents, "We are not raising your taxes at the Federal level."

If we are going to do that, and we obviously are going to do that, all I am saying is give them the time to plan for it, to consider what tax increase is better under this circumstance, and to put it into effect. That is the only issue.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MITCHELL. Mr. President, I ask for a division of my amendment on page 3 between lines 15 and 16.

The PRESIDING OFFICER. A division is requested.

Mr. PACKWOOD. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Oregon has 17 minutes, 59 seconds. The Senator from Maine has 2 minutes and 52 seconds.

Mr. PACKWOOD. Do I understand that the division is requested on the cigarette tax part of the amendment first?

The PRESIDING OFFICER. That will be voted on second.

Mr. PACKWOOD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, I want to make sure the Senate understands now on what we are going to vote. The amendment of the Senator from Maine has been divided. We are going to vote on, first, his portion of the amendment which delays for 1 year the extension of Medicare coverage to current employees; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. PACKWOOD. And, second, we will then vote on the increased cigarette tax?

The PRESIDING OFFICER. The Senator is correct.

Mr. PACKWOOD. The Senate has already shown by what I think is a very preponderant vote its disinclination to vote for an increase in the cigarette tax above the present 16 cents, but that is the second part of this amendment. That is out. For the moment we are going to vote on delaying the extension of Medicare payments for 1 year at a cost of about $2.2 billion. I believe my good friend from Maine will indicate that is roughly the cost. So we are going to have a budget loss of $2.2 billion the first half of this amendment and hope we pick it up later. Maybe we will, maybe we will not. But I hope we are not going to start down this process of loss and hope, loss and hope, loss and hope because indeed it is a loss of about $2.2 billion if we delay the extension of Medicare coverage for current employees for 1 year. I would again urge that my colleagues defeat this amendment in its entirety and start by defeating the first segment of it.

Mr. MITCHELL. Has the Senator completed?

Mr. PACKWOOD. Yes.

Mr. MITCHELL. Mr. President.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. I merely want to repeat two points that I made earlier, and I ask all Senators to consider it. The first is that municipalities in every State will be required to raise its taxes if my amendment is defeated. And they will have to do so with very little time to plan for, prepare for, and enact that tax increase. They will be forced to do that by actions we are taking so that we can continue to go around and tell the American people, "We are not raising your taxes." And every Senator who votes for the committee bill and against my amendment is in fact voting for a tax increase, as the Senator from Oregon, the chairman of the committee, forthrightly acknowledged during the Finance Committee deliberation. What we are doing is voting to compel selectmen and mayors and aldermen to raise taxes at the local level so we can go around and keep saying, "We are not raising your taxes." And as I said in my earlier remarks, inconsistent is the most generous phrase I can use to describe that behavior. Now, this can be done. This is not a question of whether Medicare will apply. It is a question of when. And if we are going to impose that burden on all these municipalities, all of the property taxpayers in this country, at the very least we ought to have the courtesy and the decency and the spirit of fairness to permit them to have time to prepare for, plan for, and enact the tax increase so they can actually get the revenue when they are forced to start paying the bill that we are now imposing on them.

Mr. PACKWOOD. Mr. President, if we are going to talk about equities and going around increasing people's taxes, what is sauce for the goose is sauce for the gander. Let us reverse the coin. Medicare costs are going up. Medicare taxes are levied upon, at the moment, a relatively definable group of employees, and if we do not bring the State and municipal employees into it then the Medicare taxes are going up on the others who are already paying Medicare taxes. And we can stand back and say we did not increase your taxes. They are going to go up one way or the other and the question is, are they going to go up more on those who are currently paying them or are we going to bring into the system everyone who is not now paying them. But to say on the one hand, "Oh, no, we are not going to raise your taxes," or, if we put this in, "We are going to raise your taxes," it cuts both ways. We either increase the taxes on those currently covered or we try to make the base broader and more fair by bringing in under coverage those who now pay no taxes at all and get 100 percent of the benefits. I would argue that the equities are more on the side or bringing everyone in and having them all pay taxes than to raise the taxes more than we would otherwise raise them because we do not include within the base those who pay no taxes at all.

Mr. MITCHELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. I merely respond by saying the reason State and local government employees were not under Social Security and Medicare is because we, by law, prohibited them from being under Medicare for many years. That is the reason for it. Now we are adopting a provision that requires them to come under it. And the equity of that has been decided. That is not being debated. The only question is, should we do so in a precipitous manner so that the $2.2 billion tax we are requiring these towns to put into effect will occur at precisely the same time that they lose the $4.6 billion from revenue sharing that they are going to lose—a negative effect on the financial condition of the municipalities of America of $6.8 billion at one time.

All my amendment will do will be to delay for 1 year that portion of the adverse impact that is attributable to the mandatory coverage under Medicare. They are still going to have to pay. The equity question is resolved. The only question is when. If we are going to do it, and it should be done, I say give 1 additional year to prepare it.

The PRESIDING OFFICER. Who yields time? If no one yields time, all time is equally divided.

Mr. DOLE. Mr. President, how much time remains?

The PRESIDING OFFICER. Eight minutes and twenty-six seconds for the Senator from Oregon, and no time for the Senator from Maine.

Mr. DOLE. How much time remains on the bill?

The PRESIDING OFFICER. Seven hours and eight minutes.

Mr. DOLE. Mr. President, I am going to move to table division 1 of this amendment. As I understand, the amendment has been divided. My motion to table will be on the first part of the amendment.

Mr. President, I hope the amendment will be tabled. We just went through an exercise here, many of us, 70-some Senators, on the so-called Gramm-Rudman amendment, and all the things we were concerned about; and now we are trying to find some easy way out.

Mr. President, I yield back the remainder of the time, and I move to table division 1 of this amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table division 1 of the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the the Senator from Missouri [Mr. DANFORTH], the Senator from Arizona [Mr. GOLDWATER], the Senator from Oregon [Mr. HATFIELD], the Senator from Maryland [Mr. MATHIAS], and the Senator from Pennsylvania [Mr. SPECTER] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Oklahoma [Mr. BOREN], the Senator from Missouri [Mr. EAGLETON], the Senator from Hawaii [Mr. INOUYE], and the Senator from Mississippi [Mr. STENNIS], are necessarily absent.

The PRESIDING OFFICER (Mr. BOSCHWITZ). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 66, nays 25, as follows:

[Rollcall Vote No. 241 Leg.]

YEAS—66

Andrews	Denton	Gorton
Armstrong	Dole	Gramm
Baucus	Domenici	Grassley
Bingaman	Durenberger	Hatch
Boschwitz	East	Hawkins
Byrd	Evans	Hecht
Chafee	Exon	Heflin
Chiles	Ford	Heinz
Cochran	Garn	Helms
DeConcini	Gore	Hollings

Humphrey	Moynihan	Sasser
Johnston	Nickles	Simpson
Kassebaum	Nunn	Stafford
Kasten	Packwood	Stevens
Laxalt	Pressler	Symms
Long	Proxmire	Thurmond
Lugar	Pryor	Trible
Matsunaga	Quayle	Wallop
Mattingly	Riegle	Warner
McClure	Rockefeller	Weicker
McConnell	Roth	Wilson
Melcher	Rudman	Zorinsky

NAYS—25

Abdnor	Dixon	Levin
Bentsen	Dodd	Metzenbaum
Biden	Glenn	Mitchell
Bradley	Harkin	Murkowski
Bumpers	Hart	Pell
Burdick	Kennedy	Sarbanes
Cohen	Kerry	Simon
Cranston	Lautenberg	
D'Amato	Leahy	

NOT VOTING—9

Boren	Goldwater	Mathias
Danforth	Hatfield	Specter
Eagleton	Inouye	Stennis

So the motion to table division one of amendment No. 840 was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, parliamentary inquiry. What happens to the second division now?

The PRESIDING OFFICER. The yeas and nays have been ordered on it and that would now be in order.

Mr. DOLE. Mr. President, let me yield to the distinguished Senator from Maine. I have indicated to my colleagues that there would be no more votes this evening. I hope we might be able to vitiate that.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the yeas and nays on division two be vitiated.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. DOLE. Mr. President, have we disposed of that?

The PRESIDING OFFICER. We would still have to voice vote that.

The question is on agreeing to division two.

Division two was rejected.

Mr. GARN. Mr. President, the Banking Committee has today reached agreement on a bill to achieve the savings called for under the budget reconciliation instructions. I wish to clarify the committee's intent on one provision in that legislation, the one dealing with an improvement in the Urban Development Action Grant Program. The bill provides that "To the extent the Secretary of HUD deems appropriate, the extent of other Federal assistance to be made available—in addition to UDAG—shall be considered" in applying certain selection criteria. I want to make it clear that the term "other Federal assistance" does not refer to financing provided through State or local bonds that may involve exemption of Federal taxation.

Mr. RIEGLE. Mr. President, I want to commend the Banking Committee chairman for his work on this legislation. I also want to make it clear that the term "other Federal assistance" in this case does not include financing through IDB's or other forms of financing that do not involve direct Federal funding to the project. The UDAG Program is intended to encourage cities, States, and private business to use all of the resources at their disposal to help develop the economies of distressed cities. This provision is consistent with that objective. I also want to point out that the committee intends to leave it up to the Secretary of HUD to determine the extent to which non-UDAG funding should be considered in UDAG project selection.

Mr. GARN. Mr. President, I agree with Senator RIEGLE in his interpretation of that provision.

Mr. DOLE. Mr. President, let me indicate to my colleagues that we do hope to be on the DOT appropriations bill by 9 o'clock in the morning. I have discussed that with Senator CHILES and Senator ANDREWS. Hopefully, we could complete action on that appropriation bill by 12 or 1 o'clock and then come back to reconciliation tomorrow afternoon.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond the hour of 7:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

REFERRAL OF SENATE JOINT RESOLUTION 156

Mr. DOLE. Mr. President, I ask unanimous consent that the Veterans' Affairs Committee be discharged from further consideration of Senate Joint Resolution 156, a joint resolution authorizing a memorial to be erected in the District of Columbia, and that the joint resolution be referred to the Committee on Energy and Natural Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 3:27 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled bills and joint resolutions:

S. 1726. An act to amend section 51(b) of the Arms Export Control Act, relating to the funding of the Special Defense Acquisition Fund;

H.R. 2959. An act making appropriations for energy and water development for the fiscal year ending September 30, 1986, and for other purposes;

S.J. Res. 92. Joint resolution to designate October 1985 as "National Foster Grandparent Month"; and

H.J. Res. 79. Joint resolution to designate the week beginning October 6, 1985, as "National Children's Week."

The enrolled bills and joint resolutions were subsequently signed by the President pro tempore [Mr. THURMOND].

ENROLLED BILL AND JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, October 22, 1985, she had presented to the President of the United States the following enrolled bill and joint resolution:

S. 1726. An act to amend section 51(b) of the Arms Export Control Act, relating to the funding of the Special Defense Acquisition Fund; and

S.J. Res. 92. Joint resolution to esignating October 1985 as "National Foster Grandparent Month."

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1899. A communication from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a listing of supplemental contract award dates for the period November 1 to December 31, 1985; to the Committee on Armed Services.

EC-1900. A communication from the Deputy Assistant Secretary of the Air Force (Logistics and Communications), transmitting, pursuant to law, a report on converting the protective coating function at Bolling Air Force Base, Washington, DC, to performance by contract; to the Committee on Armed Services.

EC-1901. A communication from the Secretary of the Army, transmitting, pursuant to law, a report stating that the Sgt. York Program has exceeded the Program Acquisi-

tion Unit Cost baseline by more than 25 percent; to the Committee on Armed Services.

EC-1902. A communication from the President and Chairman of the Export-Import Bank of the United States, transmitting, pursuant to law, a report on loan, guarantee and insurance transactions supported by Eximbank during August 1985 to Communist countries; to the Committee on Banking, Housing, and Urban Affairs.

EC-1903. A communication from the Assistant Attorney General (Antitrust Division), transmitting, pursuant to law, the results of a study of various agreements between the Government and the private sector under the Defense Production Act for fiscal year 1984; to the Committee on Banking, Housing, and Urban Affairs.

EC-1904. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report on Federal statutes, treaties, regulations, and policies which may have an adverse effect on commercial space launches; to the Committee on Commerce, Science, and Transportation.

EC-1905. A communication from the Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the 60-day period prior to October 18, 1985; to the Committee on Foreign Relations.

EC-1906. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a list of reports issued by the General Accounting Office during September 1985; to the Committee on Governmental Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources, with an amendment in the nature of a substitute:

S. 426. A bill to amend the Federal Power Act to provide for more protection to electric consumers (Rept. No. 99-161).

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 238. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to consideration of S. 1706.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Joseph A. Grundfest, of the District of Columbia, to be a Member of the Securities and Exchange Commission for the term expiring June 5, 1990.

(The above nomination was reported from the Committee on Banking, Housing, and Urban Affairs with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. CHAFEE:

S. 1782. A bill to amend the Internal Revenue Code of 1954 to impose a one dollar and twenty cents per pound excise tax on snuff and a forty cents per pound excise tax on chewing tobacco; to the Committee on Finance.

By Mr. LEVIN:

S. 1783. A bill to clarify the application of section 2406 of title 10, United States Code, relating to cost and price management, and to delay the effective date of such provisions: to the Committee on Armed Services.

By Mr. HEINZ (for himself and Mr. CHAFEE):

S. 1784. A bill to amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 to enhance retirement security by broadening retirement benefit delivery, strengthening the present system of voluntary employer-sponsored pensions, and encouraging growth and development of the private pension system by simplifying the administration of pension plans; to the Committee on Finance.

By Mr. KENNEDY (for himself, Mr. HEINZ, Mr. INOUYE, Mr. KASTEN, Mr. CRANSTON, Mr. BOSCHWITZ, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BAUCUS, Mr. BENTSEN, Mr. BIDEN, Mr. BINGAMAN, Mr. BOREN, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. BYRD, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DIXON, Mr. DODD, Mr. DURENBERGER, Mr. EAGLETON, Mr. EXON, Mr. FORD, Mr. GLENN, Mr. GORE, Mr. GORTON, Mr. GRASSLEY, Mr. HARKIN, Mr. HART, Mrs. HAWKINS, Mr. HECHT, Mr. HEFLIN, Mr. HELMS, Mr. HOLLINGS, Mr. HUMPHREY, Mr. JOHNSTON, Mr. KERRY, Mr. LAUTENBERG, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. MATSUNAGA, Mr. MATTINGLY, Mr. McCONNELL, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. NICKLES, Mr. NUNN, Mr. PACKWOOD, Mr. PELL, Mr. PRESSLER, Mr. PROXMIRE, Mr. PRYOR, Mr. RIEGLE, Mr. ROTH, Mr. ROCKEFELLER, Mr. SARBANES, Mr. SASSER, Mr. SIMON, Mr. SPECTER, Mr. SYMMS, Mr. TRIBLE, Mr. WEICKER, and Mr. WILSON):

S.J. Res. 223. A joint resolution to prohibit the sales of certain advanced weapons to Jordan.

By Mr. EAGLETON (for himself and Mr. DANFORTH):

S.J. Res. 224. A joint resolution to designate November 30, 1985 as "National Mark Twain Day"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MATTINGLY (for himself and Mr. DIXON):

S. Res. 242. A resolution to express the sense of the Senate that Congress should not change the Federal income tax treatment of State and local debt obligations; to the Committee on Finance.

By Mr. GOLDWATER (for himself and Mr. NUNN):

S. Con. Res. 80. A concurrent resolution to authorize the printing of 2,000 additional copies of the Committee Print of the Committee on Armed Services (99th Congress, 1st Session) entitled "Defense Organization: The Need for Change"; to the Committee on Rules and Administration.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CHAFEE:

S. 1782. A bill to amend the Internal Revenue Code of 1954 to impose $1.20-per-pound excise tax on snuff and a 40-cent-per-pound excise tax on chewing tobacco; to the Committee on Finance.

TAX ON SMOKELESS TOBACCO

● Mr. CHAFEE. Mr. President, today, I am offering legislation which would impose an excise tax on smokeless tobacco products: chewing tobacco and snuff. The tax I am proposing amounts to $1.20 per pound for snuff and 40 cents per pound for chewing tobacco. Using the most common forms of selling these products, this tax would equal approximately 8 cents per package.

The use of smokeless tobacco products is on the rise in the United States after many years of a small but steady decline. Data from States indicate that as many as 22 percent of 11th graders dip snuff or chew tobacco. The use of these products has been linked with several short- and long-term health risks. The Public Health Service has determined that the use of smokeless tobacco does pose a cancer threat and results in other oral conditions.

Smokeless tobacco products do not carry a health hazard warning, but the use of these products is a dangerous practice that increases a person's risk of cancers of the cheek and gum. It may also increase the risk of other oral cancers—for example, cancers of the back of the throat, voice box, and esophagus.

We can applaud the Smokeless Tobacco Council's efforts to advise young people against using these products until they are grown up. But we all know from our experience with cigarette smoking that this approach has little effect. The fact of the matter is that children won't stop using smokeless tobacco unless it is priced higher than they can afford. Every time the price on a package of cigarettes went up, teenage smoking was reduced dramatically. The dangers we are talking about here are just as great. Teenagers are using chewing tobacco and snuff in place of cigarettes because they think it is safe. It is not safe.

It is time to take meaningful action on this issue. We need to have an ef-

fective labeling policy and an effective tax.

Legislation to require labeling of smokeless tobacco products, S. 1574, was introduced earlier this year. I am a cosponsor of that legislation. Today, I am introducing the second part of the effort—a meaningful excise tax on the product.

Mr. President, I ask unanimous consent that the text of my legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1782

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. TAX ON SMOKELESS TOBACCO.

(a) IN GENERAL.—Section 5701 of the Internal Revenue Code of 1954 (relating to rate of tax) is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new subsection:

"(e) SMOKELESS TOBACCO.—On smokeless tobacco, manufactured in or imported into the United States, there shall be imposed the following taxes:

"(1) SNUFF.—On snuff, one dollar and twenty cents per pound and a proportionate tax at the like rate on all fractional parts of a pound; and

"(2) CHEWING TOBACCO.—On chewing tobacco, forty cents per pound and a proportionate tax at the like rate on all fractional parts of a pound.".

(b) CONFORMING AMENDMENTS.—

(1) The heading of chapter 52 of such Code is amended by inserting "SMOKELESS TOBACCO," after "CIGARETTES".

(2) Section 5702(c) of such Code (defining tobacco products) is amended by striking out "and cigarettes" and inserting in lieu thereof ", cigarettes, and smokeless tobacco".

(3) Section 5702(d) of such Code (defining manufacturers of tobacco products) is amended by striking out "cigar or cigarettes" each place it appears and inserting in lieu thereof "cigars, cigarettes, or smokeless tobacco".

(4) Section 5702 of such Code is amended by adding at the end thereof the following new subsections:

"(n) SMOKELESS TOBACCO.—The term 'smokeless tobacco' means any snuff or chewing tobacco.

"(o) SNUFF.—The term 'snuff' means any finely cut, ground, or powdered tobacco that is not intended to be smoked.

"(p) CHEWING TOBACCO.—The term 'chewing tobacco' means any leaf tobacco that is not intended to be smoked.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to smokeless tobacco removed after September 30, 1985.●

Mr. BRADLEY. Mr. President, I rise as a cosponsor of S. 1782, a bill to impose a Federal tax of $1.20 a pound on snuff and 40 cents a pound on chewing tobacco. This level of taxation comes out to about 8 cents per container of smokeless tobacco, about half the level of the current Federal tax for cigarettes. Currently, there is no Federal tax on smokeless tobacco.

Why, Mr. President, should we impose a tax on smokeless tobacco? The answer is simple. We need to do whatever we can to reduce the use of this product. Use of smokeless tobacco is linked to a number of serious health problems, including cancer, periodontal bone destruction, tooth abrasion, and gingival recission. The American Cancer Society estimates that 10 percent of the 9,500 oral cancer deaths in this country are attributable to smokeless tobacco. The World Health Organization last year concluded that there is a direct link between use of snuff and cancer.

In India and the Philippines, where chewing tobacco is frequently used, oral cancer is the most common malignancy seen—comprising almost 40 percent of all cancers. Of those oral cancers, 70 percent are on the cheek lining, the area where tobacco or tobacco mixed with betel nut is positioned.

The American Academy of Head and Neck Surgeons recently testified that smokeless is a "* * * major health hazard with a causal relationship to oral and other cancers, dental disease and other maladies."

Mr. President, in 1980, the American Cancer Society estimated that 22 million Americans use smokeless tobacco. Its use is on the rise. According to the Library of Congress, per capita consumption of snuff among males 18 and over increased 60 percent since 1978. Surveys show that in Colorado, 25 percent of the male high school students use smokeless tobacco daily; in Oklahoma, 22 percent; in Texas, 20 percent. In the Texas study, 55 percent of the chewers started before their 12th birthday. Incredibly, in Oklahoma, 7 percent of the third graders use smokeless tobacco.

Mr. President, all the evidence shows that the imposition of a tax on tobacco products reduces consumption. When the cigarette tax was raised by 8 cents in 1982, cigarette usage dropped by over 5 percent, and the drop in usage among youth was even more pronounced.

Mr. President, I believe it is unconscionable that young people are being encouraged to use smokeless tobacco. We need to send a clear message that this product has serious health consequences. We need to provide disincentives to its use. For the sake of America's youth, I urge my colleagues to act quickly on this legislation.

By Mr. LEVIN:

S. 1783. A bill to clarify the application of section 2406 of title 10, United States Code, relating to cost and price management, and to delay the effective date of such provisions; to the Committee on Armed Services.

COST AND PRICE MANAGEMENT

● Mr. LEVIN. Mr. President, today I am introducing legislation to amend one of the procurement reform provisions incorporated in the conference report on the fiscal year 1986 Department of Defense authorization bill. These substantive amendments are necessary, in my judgment, to avoid the implementation of a requirement that has not been fully reviewed by the appropriate committees of jurisdiction and, if it takes effect in the present form, would impose a substantial new paperwork and reporting burden on both the Department of Defense and defense contractors without adequate justification.

The DOD conference report, which passed the Senate on July 30, adds a new section to the procurement provisions applicable to the Department of Defense. Section 917 of the conference report adds a new section 2406 to title 10, United States Code, and requires a "defense agency"—as defined in that section—that awards certain types of contracts to "cause to be recorded" certain cost information about a contractor.

The parliamentary situation which the conferees were faced with on this provision precluded any changes from being made to the language. As a result, there is considerable confusion about the meaning and intent of many of the terms and requirements of the new section. For example, does this section impose a new information collection and reporting system on both contractors and the Department of Defense? What does "cause to be recorded" mean in terms of DOD's implementation? When is a time standard "widely used in the United States?"

In my judgment, it is important that Congress clarify exactly what information we are looking for, how that information is to be collected, and from whom that information is to be obtained. This is too important a matter to be left to the regulatory discretion of the Department of Defense. It is for that reason that I have taken the initiative to introduce this bill. This bill deserves to be adopted by the Congress at the earliest practical opportunity. The sooner the better.

Mr. President, although I have a number of questions and problems with the current language of this provision, my proposal today is that we make only three changes. First of all, I would delay for 180 days the effective date of section 917 of the fiscal year 1986 Department of Defense Authorization Act. This delay will provide time so that the Senate Armed Services Committee and others can more carefully review the need for this provision and the specific information that will be required to be collected. It will provide the Congress with an opportunity to assess the value of the information collected to the Department of Defense and to the Congress.

Second, my bill adds a new subsection to the current provision to make it clear that the Department of Defense will not have to record the information required under the section if the contractor does not already maintain that information when the provision takes effect. The information gathering and reporting requirements under the current section will be expensive to implement by the Government because of both the increased costs associated with the contractual modifications that will be required and because of the additional internal Department of Defense systems that will need to be established. It will also cost a great deal to the companies who do not already collect this information. We should not randomly require expensive new recordkeeping and reporting requirements where the value of this information to Congress and to Pentagon auditors, analysts, and negotiators is so questioned and unclear.

The third element of my bill makes it clear that after the 180-day delay in the effective date of section 917, the reporting requirement would extend to "covered contracts" in existence on the effective date, provided that the contractor maintains that information. That last provision is critical to the intent of my bill.

Mr. President, this bill is very timely and should be passed immediately. I have had some discussion with our colleagues in the House and I am led to believe that if the Senate were to enact this bill in the very near future that the House might be willing to accept it. For the sake of clarity of legislative intent, for the sake of fundamental fairness in the imposition of substantial new paperwork and reporting burdens, and for the sake of good legislation, I would urge my colleagues to support and pass this bill.●

By Mr. HEINZ (for himself and Mr. CHAFEE):

S. 1784. A bill to amend the Employee Retirement Security Income Act of 1974 and the Internal Revenue Code of 1954 to enhance retirement security by broadening retirement benefit delivery, strengthening the present system of voluntary employer-sponsored pensions, and encouraging growth and development of the private pension system by simplifying the administration of pension plans; to the Committee on Finance.

RETIREMENT INCOME POLICY ACT

● Mr. HEINZ. Mr. President, today I am introducing the Retirement Income Policy Act of 1985 to refocus retirement income policy on the goal of delivering adequate retirement benefits to the Nation's work force.

In America, Mr. President, the hope of a secure retirement is founded on the receipt of a monthly Social Security check supplemented by employer-financed pension benefits. With encouragement from the Federal Government through the tax system, employers and labor unions have voluntarily set up and funded programs to provide retirement security for workers. In the past three decades, these plans have expanded in both number and breadth of coverage, until today, one out of every two American workers is covered by a pension at his or her place of work.

While the emergence of a system of pensions has been truly remarkable, pension coverage and benefit delivery have not yet become widespread enough to serve as adequate supplementation for Social Security benefits. Coverage has stagnated over the last decade, and has even begun to decline in recent years; and benefit delivery still results from long job tenure and stable career patterns.

Although employer-sponsored retirement plans hold the promise of substantial benefits for most American workers, this promise is, in many cases, yet to be realized. Today pensions provide only 14 percent of the income the elderly receive, and only 25 percent of elderly families receive any pension income. Although the generation of workers retiring today are benefiting somewhat more from the pension system than previous retirees, only half of the families retiring on Social Security today are receiving income from pensions, and only half of them are receiving more than $400 a month.

THE NEED FOR A RETIREMENT INCOME POLICY

Mr. President, I firmly believe that we must take action now to strengthen and broaden the delivery of pension benefits to future generations of retiring workers who are at this moment performing the work that could earn them those benefits. The obstacle course these workers must negotiate today to earn an adequate pension is not a simple one nor is it clearly marked. There are risks and unanticipated hazards that even the best planners cannot foresee.

To even get on the track to a pension, a worker has to face the greatest obstacle on the course—that of finding a job covered by a pension plan. Today, only 52 percent of the American work force is covered by a pension plan at their place of employment—there are 47 million workers who do not even have the opportunity today to earn a pension benefit.

Pension coverage, however, is only the beginning. Before a covered worker can earn the right to receive a benefit—that is, "vest", the worker must stay with the same employer for a specified number of years. Most workers are in plans that will vest a benefit only after 10 years of uninterrupted service. Most workers, however, change jobs more frequently than every 10 years. In fact, the probability is less than 50–50 that a male starting a full-time job at age 45 will stay on that job for 10 years. The probability is even lower for women, part-time, or younger workers. Furthermore, average job tenure is declining. Fifteen years ago, the average male worker age 40 to 44 had been on his current job for 9.5 years, today a male worker that age has remained on the job only 8 years. Only a worker who is loyal or doesn't get a better job offer, or isn't laid off or fired by the employer will eventually earn the right to receive a pension benefit.

Workers who have vested pension benefits still stand a chance of facing retirement without benefits. Some may leave the company before retirement, either deferring their small benefits until retirement or cashing them out and spending them. Recent data show that only 5 percent of the lump-sum cash distributions taken before retirement are rolled into a retirement savings account, and only 32 percent are used in any form which might result in savings, including the purchase of a home. Even among older and better educated workers, fewer than half of the distributions are retained as retirement savings.

Those who reach retirement with vested benefits may find that they are reduced or even eliminated through integration with Social Security if their Social Security benefits are deemed to provide most of what the employer has set as a retirement income goal.

At the end of this obstacle course are the rewards. They are plentiful for those who have encountered the fewest hazards on the course—who have found a pension-covered job and have stayed with it for a full career. Those who have faced the highest hurdles and the most false starts, however, will finish the course with nothing.

I question whether we can be content to rely for retirement income on a system that leaves so much to chance and that stacks the odds against particular career patterns and types of employment. I wonder how our retirement income programs, structured the way they are today, will be able to keep pace with the changes now going on in the work force and deliver the benefits this Nation will need in the future. Unless we plan to continue our heavy reliance on Social Security benefits, we must begin today to encourage a broader delivery of greater pension benefits to future generations or retirees.

Mr. President, the bill I am introducing today is intended to encourage employer-sponsored plans to deliver better retirement benefits to more workers. I believe there is clear evidence that this legislation, if enacted, could substantially improve retirement income in the future. Today, only 38

percent of families with a head age 67 receive income from an employer-sponsored pension, and the average income from pension benefits is $3,200—in 1985 dollars. If we do nothing, retirement income will improve somewhat in the future since today's workers, women in particular, are working more years at higher wages in pension-covered jobs than their parents, and these younger workers stand to benefit from recently enacted pension legislation. A recent forecast prepared by ICF, Inc. shows that without further legislation by 2020 the proportion of families with heads age 67 receiving pensions will increase to 63 percent, and the average family income from pensions will increase to $7,700—in 1985 dollars. However, the enactment of only two of this bill's provisions would increase the proportion of families receiving benefits to 81 percent, and the average income from pensions to $11,100.

This concern over the delivery of benefits is not just a matter of increasing retirement income, it is also a matter of improving the equity and fairness of our tax system. As the Congress considers the broad question of tax reform in this and coming years, it is inevitable that it will review the distribution of the nearly $45 billion a year in tax benefits to employer-sponsored pension plans and their participants. Can this distribution of benefits be viewed as fair when some workers receive much more adequate retirement income from pensions than do others? While I believe it is inevitable that these kinds of judgments will be made about the tax system, judgments about the distribution of pension tax benefits should not be made with reference only to tax policy.

I am introducing this bill today because I believe it offers a coherent vision of retirement income policy that can help guide tax and pension law changes toward the goal of enhancing retirement income security. This kind of framework is badly needed before the Congress has to consider any more separate legislative provisions in tax bills tinkering with the pension system.

Let me say that I am committed to pursuing a greater consistency in legislation affecting pension plans, to simplifying the rules that govern pension plans, and to reducing the disruptive effects of new legislation on plan sponsorship and administration. There will not be a common thread in our patchwork of pension legislation, however, until we have a clearer sense of a national policy with regard to retirement income. This bill is intended to raise those kinds of issues, to suggest a framework for our retirement income policy, and to establish some national priorities. Whether we take these questions up this year in tax reform, or in tax or pension legislation over the next few years, we will eventually have to resolve them, and I intend this bill to give us a starting point in the debate.

RETIREMENT AND NONRETIREMENT SAVINGS PLANS

The central theme of this legislation is to draw a clearer distinction between retirement plans and nonretirement savings plans. In recent years this distinction has been clouded by a proliferation of tax-favored vehicles for capital accumulation. While many of these are viewed as promoting savings for retirement, there is a growing trend in these savings vehicles to make the money available to employees before retirement. The basic social policy reason for deferring taxes on the contributions and earnings of a pension trust has been to encourage employers and employees to defer income for use in retirement.

While the promotion of savings for a variety of more immediate needs may be desirable for other social policy reasons, it should not be encouraged to the detriment of adequate preparation for retirement. Retirement is the most expensive and financially threatening period in anyone's life. It demands a steady flow of income over a lengthy period of time—15 years on average for a male retiring at age 65—and a particularly lengthy life or poor health can easily exhaust savings and assets. Some will argue that it is sound social policy to encourage savings for any purpose since savings promotes capital formation. In the rush to encourage capital formation, however, we must be careful not to gain short-term savings by diverting long-term savings that has traditionally occurred through employer-sponsored pensions.

This legislation would clarify that plans designed primarily to accumulate assets for retirement and to pay benefits in retirement are, in fact, retirement plans. Plans designed to generally accumulate capital for no specific purpose would be considered nonretirement savings plans. Employers would be able to offer nonretirement savings to employees who are covered under a retirement plan providing a meaningful retirement benefit.

The essential differences between the two types of plans would be in the form of benefit distribution and the tax treatment of elective employee contributions. Retirement plans are, in concept, plans that make distributions to participants in the form of annuities commencing at retirement and continuing over the participant's remaining life. The bill would allow retirement plans to distribute in other forms to individuals upon disability, death, or separation from service after age 59½. It would also permit direct transfers of accrued benefits to a participant's individual retirement arrangement [IRA] upon separation from service before retirement. Nonretirement savings plans are in concept merely savings accounts and would be permitted to distribute in any form at virtually any time.

The bill would continue to allow employees to make tax-free contributions only to retirement plans. Employee contributions to nonretirement savings plans would be taxable. Nontaxable employee contributions—through a salary reduction arrangement with an employer—are an effective incentive for employees to save, and one that is costly to the Treasury. They have only been made generally available as a means to encourage retirement savings within the past 7 years. Savings for an event as distant as retirement is the most difficult to encourage, particularly among younger workers. We believe it is reasonable to continue to direct the most effective savings incentives toward savings for this distant and very costly period in people's lives.

Features, such as deferred vesting or integration with Social Security, that employers use to fit plan benefits to retirement income objectives, are associated in this legislation only with retirement plans. Nonretirement savings plans, because they meet general savings objectives, would vest quickly and could not be integrated with Social Security.

Finally, because of the increasingly critical role retirement plans will have to play in the well-being of older Americans, this legislation would encourage retirement plans to deliver adequate benefits to a wider spectrum of workers in retirement through broadened coverage, earlier vesting, more effective rollover preretirement distributions, and limitations on pension integration.

Mr. President, before I discuss the provisions of this legislation, I would like to take a moment to describe the way this legislation was developed. Over the last 9 months, we have been working with a group of pension experts who work for private corporations, labor organizations, and pension consulting firms to develop a cohesive retirement policy that can address the concerns of a variety of interests. In August, we circulated a draft of this bill for comments from a broad range of organizations. I was heartened by the reception that the draft received and the thoughtful and constructive comments we received from many organizations. We have been able to respond to most of them in making modifications in this draft. We continue to encourage further comments and suggestions on this legislation as we work to guide it through the legislative process.

COVERAGE

Two approaches are adopted in this legislation to expand pension coverage. The first is intended to expand

coverage among firms that already sponsor pension plans, and the second to increase the adoption of pension plans by small firms that have not offered them in the past.

The legislation would expand coverage among firms with pension plans by limiting the opportunities now available to exclude classifications of employees from coverage. These provisions respond to a concern that under current rules employers have broad discretion to exclude groups of workers from coverage. ERISA provided a number of statutory exclusions from coverage, including the exclusion of workers who are part time—working less than 1,000 hours per year—younger than age 21, or have less than a year of service. Most people probably believe these are the only groups that can be excluded from coverage. The law, however, only requires that 70 percent of the remaining workers be covered—fewer under plans that require employee contributions. In addition, plans may cover an even smaller percentage by excluding groups of workers as long as the classification of those covered is not discriminatory in favor of the highly paid.

The potential for abuse is evidenced by the testimony of Madeline S. before a hearing I chaired on June 14 this year of the Special Committee on Aging. Although she has worked for the same New York bank for 23 years, working more than the ERISA minimum of 1,000 hours a year, her employer has classified her as an hourly employee and has excluded her, and others like her, from participating in the bank's pension plans.

The coverage provision in this bill would not modify the statutory exclusions from coverage of part-time, very young, or newly hired workers. It would require a more complete coverage of the remaining workers. The basic concept behind it is that employees working side by side in the same plant or product line should not be treated differently under the pension plan. All workers in a single business division with earnings below the Social Security taxable wage base ($39,600) would have to be covered under some plan, and all plans offered in a business division would have to be comparable. It should be noted that this provision would extend coverage to nearly all workers, since only 6 percent of the work force have earnings above the Social Security wage base. It is assumed that employers will provide adequate retirement benefits for upper management and highly paid employees without a coverage requirement.

The bill includes a special coverage rule for plans which require employee contributions as a condition for participation. Because of the contributory requirement, participation in these plans is voluntary. While we feel that public policy should encourage voluntary savings for retirement, we are also concerned that voluntary savings vehicles may begin to replace employer-financed retirement programs which have traditionally had much broader participation. It is important if voluntary savings plans are to satisfy social policy objectives for providing retirement income that they maintain a standard of broad participation. The original draft of this bill, circulated for comment on August 1, required that 70 percent of eligible employees actually participate in a contributory plan. Several who commented noted that this standard would be too high for a contributory plan if distributions from these plans were limited. In response to this concern, we have reduced the participation requirement to 60 percent for contributory plans that supplement a fundamental retirement plan and are not used to provide the meaningful retirement benefit for nonretirement savings plan qualification.

Where companies operate multiple business divisions—that is, they have clearly distinct product lines or widely separated locations—this bill would permit them to maintain distinct and noncomparable retirement plans in each division, or even to maintain no plan in some divisions. In any division in which they operate a plan, however, they would have to fully cover everyone with earnings below the Social Security wage base. The purpose of this provision is to permit employers to retain flexibility in fitting retirement benefits to the needs of their labor force and to permit companies to spin off joint ventures, initiate innovative projects, or acquire subsidiaries without having retirement plan coverage rules interfere in these business decisions.

To prevent employers from setting up or defining business divisions solely for the purpose of carving out groups of workers, the bill would require that, in the aggregate, a corporation or controlled group cover 80 percent of the workers with earnings below the Social Security wage base under a retirement plan. Several of those commenting on a draft of this bill circulated in August noted that a strict 80-percent coverage requirement could influence employment or other business decisions of employers. A company might avoid hiring workers in a noncovered division to keep the proportion of noncovered workers below 20 percent, or a company may be discouraged from acquiring a noncovered subsidiary because the acquisition would disqualify the retirement plans in their other subsidiaries.

While we are concerned about the effects of an aggregate test, we are also concerned that in the absence of some overall requirement, companies would be encouraged to set up a home office or white collar division to avoid covering other workers under pensions. We have added special rules to make the aggregate test a "rolling test"—that is, an average over time and not a fixed amount in any one year—and to provide a grace period for acquisitions. We are interested in hearing of other ways the test might be structured to prevent abuse without interfering in normal business transactions.

The second approach taken in this legislation to expanding coverage is to improve the incentives for small employers who have not had plans in the past to offer plans. While the most significant gains in coverage will depend upon the adoption of plans by small firms, it is difficult to encourage small employers to adopt pensions. Small firms are often discouraged from sponsoring a pension plan for their employees because of the administrative complexity involved in adopting and administering a pension plan. In addition, small firms often have low profit margins which make it unlikely that they will realize any tax advantages from providing pensions.

Under current law, small employers can establish simplified employer pensions [SEPS] and make contributions on behalf of employees. While these plans are simple to administer, an employer paying little or nothing in corporate taxes may have no incentive to make substantial pension contributions. This legislation provides employers with fewer than 25 employees the opportunity to let employees make tax-free contributions to a SEP through voluntary salary deduction. This change in law would combine the two most attractive features to small employers—the simplicity of a SEP and the tax advantages of a 401(k)—in a single pension vehicle. Simplified nondiscrimination rules are included to ensure that with voluntary contributions the SEP still broadly benefits employees without requiring the complex discrimination test of a 401(k) plan.

VESTING

The majority of workers participating in pension plans today must work for 10 years for the same employer before they become entitled to any pension benefit under the plan and most workers do not remain on the same job this long. More importantly, workers are becoming even more mobile, and average job tenure is on the decline. Increasing worker mobility will weaken the ability of workers to earn pension benefits unless retirement plans can adopt to the change in career patterns.

The legislation we are introducing today makes a simple change in the law to accelerate vesting. Current law provides three different vesting options, the most popular of which is 10-

year "cliff" vesting. Under our legislation, employers could adopt any vesting schedule for a retirement plan, but would be required to have fully vested plan participants by the end of their 5th year of service. Multiemployer plans would not be subject to this change because they currently enable workers who change employers in most case to continue earnings benefits under the same plan.

Nonretirement savings plans would be required to vest the employer's contributions more rapidly than a retirement plan. Because this type of plan encourages savings for a variety of purposes and accumulating can be readily available to participants, vesting is required after a year of service by the participant. This enables employees to have access to account balances for more immediate needs as contributions are made.

PENSION INTEGRATION

The changes in pension integration rules proposed in this section are intended to both simplify the current rules and minimize the reduction in pension benefits that can occur as a result of integration with Social Security.

Essentially, this change in the law would shift the focus of Federal policy from a concern with how pension integration is structured to a concern with the ultimate effect of integration on pensions benefits. Current rules attempt to specify a rational relationship between pension benefits and the employer's Social Security commitment. Employers can take their old age, survivors and disability insurance contributions or a benefit based on them into account in establishing a different rate of contribution or benefit on earnings above and below an integration level which is based on the Social Security tax base. Alternatively, employers can reduce benefits by no more a specified percentage of the Social Security benefit. The problem with this approach is that it is overly complex, and it can result in lower-paid workers receiving no pension contributions or benefits while higher-paid workers are able to fully benefit from the plan.

The new integration rules proposed in this legislation are comparatively simple. In their essence, the new rules state that employers cannot provide as a result of integration, less than half the contribution or benefit above the integration level or that would be paid without integration. In other words, retirement plans can use differential contribution or benefit rates above and below the integration level, but the effect cannot be to have a rate above the level more than twice the rate below the level. Alternatively, retirement plans can reduce pension benefits by any uniform fraction of Social Security, but cannot reduce the pension benefit to less than 50 percent of the amount that would be paid without integration.

The change in integration rules will have the effect of improving pension benefits for lower-paid workers without forcing employers to make major changes in plan design. In addition, the greater simplicity of these rules should reduce the administrative burden for employers of meeting current integration rules. Some critics of pension of integration suggest that the Congress should simply outlaw this practice altogether. They argue that the employer's ability to adjust pension benefits to take Social Security into account is inherently discriminatory, and that all employees should receive uniform benefits. Most employers view pension integration as a fair way to meet reasonable, income-replacement goals without having to adopt complex pension plan designs. In fact, Social Security replaces a higher proportion of preretirement earnings for a lower-paid worker than it does for a higher-paid worker. As a result, pension plans replacing a uniform percentage of earnings could replace, in combination with Social Security, a proportion of earnings that is too low for higher-paid workers and higher than desired for lower-paid workers. Where integration is prohibited, employers would most likely make adjustments either in the design of their qualified retirement plans or by offering nonqualified retirement plans to avoid wide variations in replacement rates.

CONTRIBUTION AND BENEFIT LIMITS

Currently, employers can provide annual contributions to a defined contribution plan or accrue benefits for employees in a defined benefit plan subject to specified limits on the amount that can accumulate for any individual. For a defined contribution plan, contributions may not exceed the lesser of 25 percent of compensation or $30,000. For a defined benefit plan, the benefits funded under the plan cannot exceed 100 percent of compensation or $90,000. Where employees are covered by a combination of defined benefit and defined contribution plans, contributions and benefits are further limited by a complex, combined limit (defined in IRC Code, section 415E). In the past, the dollar limits were indexed for inflation so that the funding of pension benefits could remain reasonably stable and the maximum benefit funded could remain consistent with compensation levels over time. Over the last few years, however, the Congress has reduced the contribution and benefit limits substantially and frozen the indexing at the $90,000 and $30,000 levels until 1987.

Recent legislation has yielded a policy on maximum contributions and benefits that makes little sense. First, the current limits encourage managers and owners to prefer defined contribution plans to defined benefit plans. With the current 3-to-1 relationship between benefit and contribution limits, highly-paid employees can accumulate higher pension benefits over a normal period of employment under a defined contribution plan than is possible under a defined benefit plan. In addition, highly paid individuals who have multiple plans can achieve the highest benefits under the current, combined limits by emphasizing defined contributions. Second, the lack of indexing in the benefit and contribution limits makes it increasingly difficult for employers to adequately fund plans to provide future retirement benefits to today's younger, middle-income workers. It also encourages employers to adopt nonqualified retirement plans (which are not subject to regulation under the Tax Code) to provide benefits to highly paid workers—further reducing the scope of pension arrangements that are required to meet minimum standards for coverage and benefit delivery.

This legislation proposes a significant change in the structure of the section 415 limits, with the intent of encouraging through these limits a more stable and reasoned approach to limiting tax-supported pension accumulations. Two new concepts are introduced in this legislation: wage-related contribution and benefit limits; and a simplified relationship between these limits that would eliminate the combined limit and establish roughly equivalent levels based on a 4-to-1 relationship between contributions and benefits. This policy in intended to be neutral with regard to the choice between defined contribution and defined benefit plans and to establish limits which bear a stable relationship to wages over time.

This legislation would establish wage-related pension limits in recognition that pension benefits are based on wages, and stability in pension replacement rates and funding requires a fixed relationship to wages over time. The pension limits would be set in relation to the Social Security taxable wage base, partly because it is a handy mechanism—the taxable wage base is automatically adjusted annually for the increase in average wages, and partly because pensions already are designed to supplement Social Security, and it is sound policy to relate features of the pension system to Social Security levels. The relationship between the contribution and benefit levels and the wage base is actually quite simple: The dollar contribution limits would be 50 percent, and the dollar benefit limits would be 200 percent. Under a 5-percent-wage-growth assumption, the defined-benefit limit would be $91,800 and the defined-contribution limit would be $22,950 in

1988 when indexing resumes on the current limits of $90,000 and $30,000.

The elimination of the combined limit is an additional change which simplifies the administrative burden on plan sponsors. Under our provision, there is no reduction in the limits for combined defined-benefit and defined-contribution plans, although all defined-contribution plans are subject to somewhat lower limits then they are permitted under current law. While this permits individuals to accumulate more under a combination of plans than they can accumulate under any single plan, it has the advantage of restoring some degree of parity between defined-benefit and defined-contribution plans in terms of the benefit accumulations possible under each. In addition, the accumulation possible at high levels of income under a variety of plan arrangements over a working career is roughly the same under our new limits as the accumulation possible under the current, combined limits.

Although this legislation has proposed uniform rules for retirement and nonretirement plans in general, one set of unique rules—the so-called top heavy rules—remain left untouched by this bill. We recognize that it is awkward to leave a series of special rules based largely on plan size in place in a bill purporting to establish consistent policy for employer-sponsored plans. Once the kinds of benefit protections provided to employees of small firms through the topheavy rules are adopted more broadly, these special rules and the elaborate definitions of topheavy plans should be dropped from the Internal Revenue Code.

DISTRIBUTIONS

The rules governing distributions from retirement plans are key to improving the delivery of retirement benefits in the future. Currently, a variety of distribution rules apply to pension profits-sharing, and stock bonus plans. Some plans can provide distributions to remployees while they still work for their employers. All plans can provide a distributions to departing workers, although not all plans do. Employers can make mandatory distributions to employees without their consent if the accured pension is $3,500 or less. More than half (56 percent) of the workers covered by employer-sponsored plans are in plans that will provide some form of lump-sum cash distribution when they leave the employer prior to retirement.

Federal policy has been ambivalent on the question of whether workers should be encouraged to retain preretirement distributions for retirement. On the one hand. The Congress has encouraged workers to save their lump-sum amounts by permitting a continued deferral of taxes on amounts that are rolled into an individual retirement arrangement [IRA] within 60 days. On the other hand, the Congress has encouraged workers to spend their lump-sum distributions by permitting them to pay artifically low taxes on amounts they don't roll over under the unique "10-year forward averaging" provision. The 10-year forward averaging provision results in a especially low tax payment because it computes the tax rate as if the individual has no other income and is receiving the distribution in 10 annual installments.

Federal policy has not been effective in encouraging plans and participants to retain retirement accumlations for retirement needs. Recent evidence suggests that most workers who receive a lump-sum distribution consume it and do not save it for retirement. Only a small percentage of distributions appear to be rolled over in retirement savings accounts.

This legislation would increase future retirement income by encouraging the retention of retention of amounts accumulated for retirement until retirement occurs. Retirement plans would be encouraged to distribute benefits to participants at retirement in the form of periodic payments over their remaining lives. Benefits could be distributed in other forms to participants, or their beneficiaries, upon the participant's death, disability, or separation from service after age 59½. Otherwise, benefit accruals would have to be transferred directly to a participant's IRA. Amounts deposited directly in an IRA would be more likely to remain there and less likely to be used for other purposes. The bill would increase the IRA withdrawal penalty to discourage the use of IRA's for short-term savings purposes. The bill would also repeal 10-year forward averaging and capital gains treatment of lump-sum distributions.

Several of those commenting on the pension legislation questioned the use of age 59½ as a target retirement age, rather than a lower age consistent with ages at which workers now often retire—for example, age 55. It is not our intent in borrowing this age from current law to express any Federal policy on the appropriate age of retirement or to suggest a national retirement age. In fact, as a matter of policy, this bill clearly states that the age of retirement should be an individual decision, and that workers should be encouraged by public policy to continue working throughout their productive years. The recent increase from age 65 to age 67 in the age for the payment of full Social Security benefits in the future would suggest that if the Congress is taking any position on this issue, it is to encourage later not earlier retirement. For the purposes of defining an age after which more liberal distribution rules would apply, it was sufficient in this bill to retain current law.

EFFECTIVE DATE

Finally, we are acutely aware that any pension legislation—even that which may simplify some requirements—has a disruptive effect on the employer-sponsored plans. In the past 3 years alone, the Congress has enacted three substantial laws affecting pension plans. It is inevitable that the Congress will continue to legislate pension changes in the coming years, even if the changes proposed in this legislation are not enacted.

To reduce the disruptive influence of this legislation, we have drafted substantially deferred effective dates. In no case would changes become effective within the first 2 years after enactment. Thereafter, employers would have to include the changes whenever they amended their plans, and in no case later than the end of 1990. We are hopeful that the idea of timing future pensions changes to become effective every 5 years can catch on in the Congress, so that the need to make plan amendments can be minimized.

CONCLUSION

In closing, Mr. President, let me reiterate that this legislation is intended to help guide diffuse pension and tax laws toward the goal of enhancing retirement security. We have incorporated a substantial number of proposals in this bill, and there are as many that we could have included, but did not. I am most greatful to the small group of pension experts who gave a tremendous amount of their time and valuable insight to the preparation of this legislation. I am also greateful to the many organizations and individuals who took the time to carefully review our earlier draft and suggest changes—most of which we were able to incorporate. We have attempted, in developing this legislation, to think through and test out some of the consequences before introducing the bill. It is my sincere hope that Members of both Chambers from both sides of the aisle will help us work on taking this first effort and fashioning it into a national retirement income policy.

Mr. President, I ask unanimous consent that the attached section-by-section analysis of the bill appear in the RECORD following this statement. I ask unanimous consent also that the text of the bill be printed in the RECORD following this statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1784

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

This Act may be cited as the "Retirement Income Policy Act of 1985".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Findings and declaration of policy; national retirement income policy goals.
TITLE I—AMENDMENTS TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974
Subtitle A—Participation Requirements
Sec. 101. Retirement plans and nonretirement savings plans.
Sec. 102. Retirement income requirements.
Sec. 103. Maintenance of adequate retirement plan coverage.
Sec. 104. Retirement plan coverage required as prerequisite for nonretirement savings plan coverage.
Subtitle B—Limitations on Contributions and Benefits
Sec. 111. Cash or deferred arrangements under retirement plans.
Sec. 112. Maximum amount of covered compensation.
Subtitle C—Vesting Standards
Sec. 121. Minimum vesting standard reduced from 10 years to 5 years for retirement plans and 1 year for nonretirement savings plans.
Subtitle D—Pension Integration
Sec. 131. Prohibition of discriminatory treatment of participants under pension plans; integration of retirement plans with OASDI and other governmental retirement programs.
Subtitle E—Coverage and Portability
Sec. 141. Early distributions of benefits restricted to direct transfers to individual retirement accounts or annuities.
Subtitle F—Effective Date and Technical Amendments
Sec. 151. Effective date.
Sec. 152. Technical amendments.
TITLE II—AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954
Subtitle A—Participation Requirements
Sec. 201. Retirement plans and nonretirement savings plans.
Sec. 202. Retirement income requirements.
Sec. 203. Maintenance of adequate retirement plan coverage as qualification requirement.
Sec. 204. Retirement plan coverage required as prerequisite for nonretirement savings plan coverage.
Subtitle B—Limitations on Contributions and Benefits
Sec. 211. Deductibility of employer and employee contributions.
Sec. 212. Cash or deferred arrangements under retirement plans.
Sec. 213. Deductible amount of contributions to individual retirement accounts or annuities limited by amount of deductible contributions to retirement plans made under cash or deferred arrangements.
Sec. 214. Wage-based limitations for benefits and contributions.
Sec. 215. Conforming amendments relating to taxation of annuity income.
Subtitle C—Vesting Standards
Sec. 221. Minimum vesting standard reduced from 10 years to 5 years for retirement plans and 1 year for nonretirement savings plans.
Subtitle D—Pension Integration
Sec. 231. Integration of retirement plans with OASDI.
Subtitle E—Distributions
Sec. 241. Denial of 10-year averaging and capital gains treatment for lump-sum distributions.
Sec. 242. Increase in additional tax on early distributions from an individual retirement account, etc.
Subtitle F—Coverage and Portability
Sec. 251. Early distributions of benefits restricted to direct transfers to individual retirement accounts or annuities.
Sec. 252. Special rules for simplified employee pensions.
Sec. 253. Integration under simplified employee pensions prohibited.
Sec. 254. Wage-based contribution limitations under simplified employee pensions.
Subtitle G—Effective Date
Sec. 261. Effective date.

SEC. 2. FINDINGS AND DECLARATION OF POLICY; NATIONAL RETIREMENT INCOME POLICY GOALS.

(a) FINDINGS.—The Congress finds that—

(1) the growth in the size, scope, and number of employee pension benefit plans has been substantial over the past quarter of a century;

(2) since the enactment of the Employee Retirement Income Security Act of 1974, the number of workers and their families receiving benefits under these plans has steadily increased;

(3) for most workers and their families the benefits paid by employee pension benefit plans are a necessary supplement to benefits received through the old-age, survivors, and disability insurance program under title II of the Social Security Act;

(4) although the number of participants covered under these plans has increased, nearly half of current workers are not covered under any plan, and that percentage has remained relatively constant for the past decade;

(5) even among workers covered by employee pension benefit plans, only 50 percent of those covered are currently entitled to receive benefits from those plans;

(6) the current rules regarding coverage, vesting, and integration of employee pension benefit plans with benefits under the old-age, survivors, and disability insurance program under title II of the Social Security Act tend to impede the policy goals of broadening of coverage and improving benefit delivery, particularly for mobile workers;

(7) current incentives for plan formation have been inadequate and special incentives are needed to encourage small businesses to establish employee pension benefit plans;

(8) the lack of consistency and coordination of the rules governing various types of employee pension benefit plans has led to an erosion of the fundamental concept that retirement plans should provide retirement benefits;

(9) the frequency with which legislative changes affecting employee pension benefit plans have been enacted over the past decade have led to both uncertainty as to what the law requires and substantial additional administrative expenses for such plans which, in turn, has discouraged the growth and development of employee pension benefit plans; and

(10) the lack of an articulated national retirement income policy has encouraged such frequent and piecemeal changes.

(b) DECLARATION OF POLICY.—It is hereby declared to be the policy of this Act to articulate certain basic national retirement income policy goals and to make certain changes to the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 in pursuance of these goals.

(c) NATIONAL RETIREMENT INCOME POLICY GOALS.—It is the sense of the Congress that the following national retirement income policy goals should be pursued:

(1) The old-age, survivors, and disability insurance program under title II of the Social Security Act should be the universal and fundamental source of retirement income security for each American.

(2) Retirement benefits provided by such program should be supplemented with benefits provided from employer-financed retirement plans.

(3) Retirement benefits provided by such program and employer-financed pensions should be supplemented by individual savings for retirement.

(4) The current voluntary system of employer-sponsored retirement plans should be retained; and the growth and development of such plans should be encouraged.

(5) Although the age of retirement should be an individual decision, workers should be encouraged by public policy to remain in the work force throughout their productive years.

(6) Employer-sponsored retirement plans should be sufficiently flexible to deliver adequate retirement benefits to workers with a variety of career patterns.

(7) Benefits which are accumulated for retirement should be retained for that purpose.

(8) Although elective approaches to retirement savings may be useful in supplementing employer-financed retirement benefits, public policy should be developed with the recognition that employer-financed retirement programs can be more effective in delivering benefits to a broad cross-section of the population.

(9) Employer-sponsored savings for purposes other than retirement should be encouraged for employees participating in a meaningful retirement program.

(10) To the extent possible, retirement income should be provided from a variety of sources and should be sufficient to maintain an employee's preretirement standard of living throughout retirement.

TITLE I—AMENDMENTS TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

Subtitle A—Participation Requirements

SEC. 101. RETIREMENT PLANS AND NONRETIREMENT SAVINGS PLANS.

Section 3 of the Employee Retirement Income Security Act of 1974 (relating to definitions) (29 U.S.C. 1002) is amended by adding at the end thereof the following new paragraph:

"(41) RETIREMENT PLAN AND NONRETIREMENT SAVINGS PLAN.—

"(A) RETIREMENT PLAN.—The term 'retirement plan' means a pension plan which meets the retirement income requirements of section 211.

"(B) NONRETIREMENT SAVINGS PLAN.—The term 'nonretirement savings plan' means a pension plan which is not a retirement plan.

"(C) CONVERSION RESTRICTION.—No amendment to a retirement plan shall be treated as having the effect of converting the retirement plan to a nonretirement savings plan.".

SEC. 102. RETIREMENT INCOME REQUIREMENTS.

Part 2 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 (relating to participation and vesting) is amended—

(1) by redesignating section 211 as section 212; and

(2) by inserting after section 210 the following new section:

"RETIREMENT INCOME REQUIREMENTS

"SEC. 211. (a) IN GENERAL.—A plan is a retirement plan (within the meaning of section 3(41)(A)) and meets the retirement income requirements of this section only if the plan—

"(1) provides for distribution of the accrued benefit with respect to each participant commencing not earlier than upon—

"(A) the later of—

"(i) the participant's attainment of any age at or above age 59½, or

"(ii) the participant's separation from service,

"(B) the participant's disability, or

"(C) the participant's death,

except that, in the case of any such distribution other than upon disability or death, the plan may provide for such distribution upon separation from service earlier than is allowed under subparagraph (A) if such distribution is in a retirement income form described in subsection (b), and

"(2) provides for the distribution commencing not later than the later of—

"(A) the end of the plan year in which the employee attains age 70½, or

"(B) in the case of an employee other than an owner-employee (within the meaning of section 401(c)(3) of the Internal Revenue Code of 1954), the end of the plan year in which the employee retires.

"(b) RETIREMENT INCOME FORMS.—The retirement income forms described in this subsection are the following:

"(1) a distribution in the form of—

"(A) an annuity for the life of the participant,

"(B) a qualified joint and survivor annuity (within the meaning of section 205(d)), or

"(C) a level distribution over life expectancy (which may be adjusted not more frequently than annually to account for changes in life expectancy and reasonable assumptions based on previous investment performance under the plan),

"(2) a distribution described in paragraph (1), adjusted to allow for periodic supplements which—

"(A) terminate upon commencement of entitlement to benefits under title II of the Social Security Act, and

"(B) after adding benefits otherwise paid under the plan for periods for which such supplements are paid, do not exceed the amount of projected total benefits under such title II and the plan upon such commencement of entitlement, or

"(3) benefits in the event of sickness, accident, or disability referred to in section 3(1).

"(c) SPECIAL RULE RELATING TO TRANSFERS FROM PLANS DIRECTLY TO INDIVIDUAL RETIREMENT ACCOUNTS OR ANNUITIES OR TO OTHER RETIREMENT PLANS.—A plan shall not be treated as failing to meet the retirement income requirements of this section solely because the plan provides for a direct transfer to an individual retirement account (within the meaning of section 408(a) of the Internal Revenue Code of 1954), to an individual retirement annuity (within the meaning of section 408(b) of such Code), or to another retirement plan (which provides for acceptance of such transfers) of the accrued benefit with respect to the participant upon the participant's separation from service under the plan in accordance with section 203(e).".

SEC. 103. MAINTENANCE OF ADEQUATE RETIREMENT PLAN COVERAGE.

(a) IN GENERAL.—Part 2 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 (relating to participation and vesting) (as amended by the preceding provisions of this title) is further amended—

(1) by redesignating section 212 as section 213; and

(2) by inserting after section 211 the following new section:

"PLAN COVERAGE REQUIREMENTS APPLICABLE TO EMPLOYER

"SEC. 212. (a) IN GENERAL.—Each employer maintaining a pension plan for an employee in the employer's relevant work force shall meet the coverage requirements of this section. An employer meets the coverage requirements of this section if each employee who is in the employer's relevant work force and who is under the social security contribution and benefit base is eligible to participate in a retirement plan maintained by the employer.

"(b) SPECIAL RULES IN THE CASE OF ALLOWABLE SUBDIVISIONS OF THE RELEVANT WORK FORCE.—In any case in which the relevant work force of the employer consists of two or more allowable subdivisions, the requirements of this section shall be treated as met if the requirements of paragraphs (1) and (2) are met.

"(1) 80-PERCENT COVERAGE REQUIREMENT.—

"(A) IN GENERAL.—The requirements of this paragraph are met if—

"(i) the employer's coverage percentage as of the end of the last fiscal year of the employer is at least 80 percent, or

"(ii) the average of the employer's coverage percentages as of the end of each of the last 5 fiscal years of the employer (or all preceding fiscal years of the employer if less than 5) is at least 80 percent.

"(B) COVERAGE PERCENTAGE DEFINED.—For purposes of this paragraph, the term 'coverage percentage', in connection with any employer, means the percentage of the relevant work force of the employer constituting employees who are under the social security contribution and benefit base and are eligible for participation in a retirement plan maintained by the employer.

"(2) TOTAL COVERAGE REQUIRED IN ANY ALLOWABLE SUBDIVISION IN WHICH ANY COVERAGE IS PROVIDED.—The requirements of this paragraph are met if, in each allowable subdivision in which one or more employees are eligible to participate in a retirement plan maintained by the employer, each employee who is under the social security contribution and benefit base is eligible to participate in a retirement plan maintained by the employer.

"(c) REQUIREMENTS MAY BE MET BY MAINTENANCE OF TWO OR MORE PLANS.—The provisions of subsections (a) and (b), to the extent they require maintenance by an employer of a retirement plan with respect to any employee, may be met by maintenance by the employer of one of more retirement plans in at least one of which the employee is eligible to participate.

"(d) SPECIAL RULE FOR CONTRIBUTORY PLANS.—

"(1) IN GENERAL.—In the case of a retirement plan providing for mandatory contributions, the requirements of subsection (a) shall be treated as met only if at least 60 percent of the employees made eligible to participate in accordance with subsection (a) or (b)(1) actually participate.

"(2) INCREASE IN REQUIRED PERCENTAGE FOR PLANS PROVIDING SUBSTANTIAL BENEFITS.—In the case of a plan with respect to which the applicable requirements of paragraphs (1) and (2) of section 213 are met, the phrase '70 percent' shall be substituted for the phrase '60 percent' in paragraph (1).

"(e) DEFINITIONS.—For purposes of this section—

"(1) RELEVANT WORK FORCE.—The term 'relevant work force' of an employer means all employees of the employer, excluding any employee who—

"(A) does not meet the requirements for participation in any pension plan established or maintained by the employer solely by reason of failure to satisfy minimum age or service requirements prescribed by such plan as a condition of participation in such plan,

"(B) is not a participant in any pension plan established or maintained by the employer and is included in a unit of employees covered by an agreement which the Secretary finds to be a collective bargaining agreement between employee representatives and one or more employers, if there is evidence that retirement benefits were the subject of good faith bargaining between such employee representatives and such employer or employers,

"(C) is included in a unit of employees covered by an agreement pursuant to which a plan is maintained by the employer and which the Secretary finds to be a collective-bargaining agreement between air pilots represented in accordance with title II of the Railway Labor Act and one or more employers (unless the principal duties of such employee are not customarily performed aboard aircraft in flight), or

"(D) is a nonresident alien and receives no earned income (within the meaning of section 911(d)(2) of the Internal Revenue Code of 1954) from the employer which constitutes income from sources within the United States (within the meaning of section 861(a)(3) of such Code).

"(2) UNDER THE SOCIAL SECURITY CONTRIBUTION AND BENEFIT BASE.—An employee is 'under the social security contribution and benefit base' if the employee's compensation is at a rate less than the contribution and benefit base under section 230 of the Social Security Act.

"(3) ALLOWABLE SUBDIVISION.—The term 'allowable subdivision' of a relevant work force means—

"(A) a portion of the relevant work force consisting of so much of such relevant work force as serves in the work force of a separate business unit of the employer, as defined in regulations of the Secretary of the Treasury distinguishing such unit solely on the basis of its distinct locality or its separate product line, and

"(B) the portion of the relevant work force consisting of so much of such relevant work force as does not serve in the work force of any such separate business unit.

"(4) MANDATORY CONTRIBUTIONS.—The term 'mandatory contributions', in connection with a participant in a plan, means

amounts contributed to the plan by the participant which are required as a condition of employment, as a condition of participation in the plan, or as a condition of obtaining benefits under the plan attributable to employer contributions.".

(b) ELIMINATION OF 3-YEAR RULE UNDER MINIMUM PARTICIPATION STANDARDS.—Subparagraph (B) of section 202(a)(1) of such Act (29 U.S.C. 1052(a)(1)(B)) is amended by striking out "(B)(i) In the case of any plan which provides" and all that follows down through "(ii) In the case of any plan maintained" and inserting in lieu thereof "(B) In the case of any plan maintained".

SEC. 104. RETIREMENT PLAN COVERAGE REQUIRED AS PREREQUISITE FOR NONRETIREMENT SAVINGS PLAN COVERAGE.

Part 2 of subtitle B of title I of the Employee Retirement Income Security Act (as amended by the preceding provisions of this title) is further amended—

(1) by redesignating section 213 as section 214; and

(2) by inserting after section 212 the following new section:

"RETIREMENT PLAN COVERAGE REQUIRED AS PREREQUISITE FOR NONRETIREMENT SAVINGS PLAN COVERAGE

"SEC. 213. An employer may not maintain a nonretirement savings plan, in which any employee within the relevant work force (within the meaning of section 211(e)(1)) of the employer maintaining the plan is eligible to participate, unless, under at least one retirement plan which is maintained by the employer and in which the employee is eligible to participate—

"(1) in any case in which such retirement plan is a defined benefit plan, the accrued benefit of each participant is equivalent to an amount expressed as a percentage of compensation (within the meaning of section 415 of the Internal Revenue Code of 1954) and such percentage equals or exceeds the product derived by multiplying the participant's years of participation required to be taken into account under section 204 by 0.5 percent, or

"(2) in any case in which such retirement plan is a defined contribution plan, the employer contribution with respect to each participant for each plan year is not less than 3 percent of the participant's compensation (within the meaning of section 415 of the Internal Revenue Code of 1954) for such plan year.".

Subtitle B—Limitations on Contributions and Benefits

SEC. 111. CASH OR DEFERRED ARRANGEMENTS UNDER RETIREMENT PLANS.

Part 2 of subtitle B of title I of the Employee Retirement Income Security Act (as amended by the preceding provisions of this title) is further amended—

(1) by redesignating section 214 as section 215; and

(2) by inserting after section 213 the following new section:

"SEC. 214. (a) GENERAL RULE.—A plan may include a cash or deferred arrangement only if such plan is a retirement plan and such arrangement meets the requirements of this section.

"(b) CASH OR DEFERRED ARRANGEMENT.—For purposes of this section, a cash or deferred arrangement is any arrangement which is part of a plan and under which a covered employee may elect to have the employer make payments—

"(1) as contributions to a trust under the plan on behalf of the employee, or

"(2) to the employee directly in cash.

"(c) NONFORFEITABILITY.—A cash or deferred arrangement meets the requirements of this section only if it provides that an employee's right to the employee's accrued benefit derived from employer contributions made to the trust pursuant to the employee's election is nonforfeitable.

"(d) APPLICATION OF DISCRIMINATION STANDARDS.—

"(1) RELATIONSHIP BETWEEN DEFERRAL PERCENTAGES OF HIGHLY COMPENSATED EMPLOYEES AND OTHER ELIGIBLE EMPLOYEES.—

"(A) ALTERNATIVE TESTS.—A cash or deferred arrangement shall not be treated as meeting the requirements of this section unless the actual deferral percentage for highly compensated employees (as defined in subsection (e)) for each plan year bears a relationship to the actual deferral percentage for all other eligible employees for such plan year which meets either of the following tests:

"(i) 1.5 MULTIPLIER TEST.—The actual deferral percentage for the group of highly compensated employees is not more than the actual deferral percentage of all other eligible employees multiplied by 1.5.

"(ii) 2.5 MULTIPLIER TEST.—The excess of the actual deferral percentage for the group of highly compensated employees over the actual deferral percentage for all other eligible employees is not more than 3 percentage points, and the actual deferral percentage for the group of highly compensated employees is not more than the actual deferral percentage of all other eligible employees multiplied by 2.5.

"(B) RULES FOR MORE THAN 1 PLAN.—The actual deferral percentage taken into account under this subparagraph for any employee who is a participant under 2 or more cash or deferred arrangements of the employer shall be the sum of the actual deferral percentages for such employee under each of such arrangements.

"(2) ACTUAL DEFERRAL PERCENTAGE.—For purposes of paragraph (1), the actual deferral percentage for a specified group of employees for a plan year shall be the average of the ratios (calculated separately for each employee in such group) of—

"(A) the amount of employer contributions actually paid over to the trust on behalf of each such employee for such plan year, to

"(B) the employee's compensation for such plan year.

For purposes of the preceding sentence, the compensation of any employee for a plan year shall be the amount of the employee's compensation which is taken into account under the plan in calculating the contribution which may be made on the employee's behalf for such plan year.

"(e) HIGHLY COMPENSATED EMPLOYEE.—For purposes of this section, the term 'highly compensated employee' means any employee who is more highly compensated than two-thirds of all eligible employees, taking into account only compensation which is considered in applying subsection (d).

"(f) TREATMENT OF ALLOWABLE SUBDIVISIONS.—In the case of any plan with respect to which the requirements of section 212 would not be met but for meeting the requirements of subsection (b)(1) of such section with respect to allowable subdivisions, the requirements of this section are not met unless such requirements are met if applied solely to each such allowable subdivision.".

SEC. 112. MAXIMUM AMOUNT OF COVERED COMPENSATION.

Part 3 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 is amended—

(1) by redesignating section 306 as section 307; and

(2) by inserting after section 305 the following new section:

"MAXIMUM AMOUNT OF COVERED COMPENSATION

"SEC. 306. (a) IN GENERAL.—The amount of a participant's compensation for any year (as defined in regulations of the Secretary of the Treasury) which may be taken into account under a pension plan for purposes of determining benefits and contributions may not exceed 500 percent of the contribution and benefit base (as in effect as of the beginning of such year) under section 230 of the Social Security Act.

"(b) PARTICIPANT'S COMPENSATION DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'participant's compensation' means the compensation of the participant from the employer for the year.

"(2) SPECIAL RULE FOR SELF-EMPLOYED INDIVIDUALS.—In the case of an employee within the meaning of section 401(c)(1) of the Internal Revenue Code of 1954, paragraph (1) shall be applied by substituting 'the participant's earned income (within the meaning of section 401(c)(2) of the Internal Revenue Code of 1954 but determined without regard to any exclusion under section 911 of such Code)' for 'compensation of the participant from the employer'.".

Subtitle C—Vesting Standards

SEC. 121. MINIMUM VESTING STANDARD REDUCED FROM 10 YEARS TO 5 YEARS FOR RETIREMENT PLANS AND 1 YEAR FOR NONRETIREMENT SAVINGS PLANS.

(a) IN GENERAL.—Paragraph (2) of section 203(a) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1053(a)) (relating to minimum vesting standards) is amended to read as follows:

"(2) A plan satisfies the requirements of this paragraph if it satisfies the requirements of subparagraph (A) or (B).

"(A) A plan satisfies the requirements of this subparagraph if—

"(i) in the case of a retirement plan, under the plan, a participant who has completed at least 5 years of service has a nonforfeitable right to 100 percent of the participant's accrued benefit derived from employer contributions, and

"(ii) in the case of a nonretirement savings plan, under the plan, a participant who has completed at least 1 year of service has a nonforfeitable right to 100 percent of the participant's accrued benefit derived from employer contributions.

"(B) A plan satisfies the requirements of this subparagraph if—

"(i) the plan is a multiemployer plan, and

"(ii) under the plan a participant who has completed at least 10 years of service has a nonforfeitable right to 100 percent of the participant's accrued benefit derived from employer contributions.".

(b) RULE OF APPLICATION.—The amendment made by subsection (a), upon taking effect as provided in section 151, shall apply with respect to participants who have completed at least one hour of service on or after the date of the enactment of this Act.

Subtitle D—Pension Integration

SEC. 131. PROHIBITION OF DISCRIMINATORY TREATMENT OF PARTICIPANTS UNDER PENSION PLANS; INTEGRATION OF RETIREMENT PLANS WITH OASDI AND OTHER GOVERNMENTAL RETIREMENT PROGRAMS.

Part 2 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 (as amended by the preceding provisions of this title) is further amended—

(1) by redesignating section 215 as section 216; and

(2) by inserting after section 214 the following new section:

"RULES AGAINST DISCRIMINATORY TREATMENT OF PLAN PARTICIPANTS

"SEC. 215. (a) GENERAL RULE.—The contributions and benefits provided under a pension plan may not discriminate in favor of employees who are—

"(1) officers,

"(2) shareholders, or

"(3) highly compensated.

"(b) EXCLUSIONS.—For purposes of this section, there shall be excluded from consideration—

"(1) employees not included in the plan who are included in a unit of employees covered by an agreement which the Secretary finds to be a collective bargaining agreement between employee representatives and one or more employers, if there is evidence that retirement benefits were the subject of good faith bargaining between such employee representatives and such employer or employers, and

"(2) employees who are nonresident aliens and who receive no earned income (within the meaning of section 911(d)(2) of the Internal Revenue Code of 1954) from the employer which constitutes income from sources within the United States (within the meaning of section 861(a)(3) of such Code).

"(c) NONDISCRIMINATORY INTEGRATION OF RETIREMENT PLANS WITH TITLE II OF THE SOCIAL SECURITY ACT AND OTHER RETIREMENT PROGRAMS UNDER STATE OR FEDERAL LAW.—

"(1) IN GENERAL.—A retirement plan shall not be treated as discriminatory within the meaning of subsection (a) merely because it is an integrated plan.

"(2) INTEGRATED PLAN.—For purposes of this subsection, the term 'integrated plan' means a plan which is discriminatory within the meaning of subsection (a) solely because the plan provides a contribution or benefit formula described in paragraph (3) or (4).

"(3) EXCESS PLAN REQUIREMENTS.—

"(A) EXCESS FORMULA.—The contribution or benefit formula of a plan is described in this paragraph if, under such formula, to an extent consistent with the requirements of subparagraph (C), contributions or benefits determined on that portion of compensation in excess of an integration level which is specified therein for each plan year and which meets the requirements of subparagraph (B) exceed contributions or benefits determined on that portion of compensation not in excess of such integration level.

"(B) INTEGRATION LEVEL.—An integration level provided under plan's contribution or benefit formula meets the requirements of this subparagraph if such integration level, as specified for each plan year, does not exceed the contribution and benefit base under section 230 of the Social Security Act as of the beginning of such plan year.

"(c) INTEGRATION RATIO.—

"(i) IN GENERAL.—The requirements of this subparagraph are met with respect to a plan's contribution or benefit formula if, under such formula, the ratio (expressed as a percentage) of—

"(I) the amount of employer contributions (in the case of a defined contribution plan) or benefits (in the case of a defined benefit plan) determined on that portion of compensation which is not in excess of the integration level, to

"(II) the amount of employer contributions (in the case of a defined contribution plan) or benefits (in the case of a defined benefit plan) determined on that portion of compensation which is in excess of the integration level,

is not less than 50 percent.

"(ii) ADDITIONAL RULES GOVERNING INTEGRATION RATIOS.—

"(I) GREATER INTEGRATION RATIOS UNDER DEFINED BENEFIT PLANS REQUIRED FOR PLANS WITHOUT ADEQUATE DISTRIBUTION OF VALUABLE PLAN FEATURES.—The Secretary of the Treasury shall provide by regulation for increases in the minimum ratio required under clause (i) for any defined benefit plan (or class thereof) to the extent necessary to eliminate any additional discrimination within the meaning of subsection (a) attributable solely to the value of the plan features (constituting the form of benefit, any preretirement benefits, the vesting schedule, the normal retirement age, and any actuarial adjustment factors) with respect to benefits attributable to compensation in excess of the specified integration level, taking into account the value of such features with respect to benefits attributable to compensation not in excess of the specified integration level.

"(II) GREATER INTEGRATION RATIOS UNDER CONTRIBUTORY PLANS REQUIRED FOR PLANS PROVIDING ADEQUATE BENEFIT RATES IN RELATION TO CONTRIBUTION RATES.—The Secretary of the Treasury shall provide by regulation for increases in the minimum ratio required under clause (i) for any plan (or class thereof) providing for mandatory contributions (within the meaning of section 212(e)(4)) to the extent necessary to eliminate any additional discrimination within the meaning of subsection (a) attributable solely to the ratio which employee contribution rates applicable to compensation which is not in excess of the specified integration level bears to employee contribution rates applicable to compensation which is in excess of the specified integration, taking into account the ratio which benefit rates applicable to compensation which is not in excess of the specified integration level bears to benefit rates applicable to compensation which is in excess of the specified integration level.

"(4) REQUIREMENTS FOR OFFSET PLANS.—

"(A) OFFSET FORMULA.—The contribution or benefit formula of a plan is described in this paragraph if, under such formula, to an extent consistent with the requirements of subparagraph (B), the normal retirement benefit with respect to each participant is expressed in the form of a benefit which is a specified percentage of compensation (without exclusion of any portion of compensation), reduced by a specified percentage (not in excess of 100 percent) of the primary insurance amount (within the meaning of section 215 of the Social Security Act) of such participant (or of any other individual on whose wages and self-employment income (within the meaning of sections 209 and 211 of such Act) such participant's entitlement to monthly benefits under title II of such Act is based), determined as of the earlier of the date of the commencement of such participant's entitlement to benefits under such title II or the date of such participant's separation from service.

"(B) MINIMUM BENEFIT.—The requirements of this subparagraph are met with respect to a plan if, under the plan, the accrued benefit derived from employer contributions (within the meaning of section 204(c)(1)) provided to each participant is not less than 50 percent of the accrued benefit derived from employer contributions which would be provided to such participant but for the reduction described in subparagraph (A).

"(C) LIMITATION ON REGULATORY AUTHORITY.—In any regulations prescribed by the Secretary of the Treasury under this paragraph, any criteria for determining whether the requirements of this paragraph have been met may not take into account the form of benefit, preretirement benefits, or similar plan provisions.

"(5) COORDINATION OF PLANS WITH OTHER STATE OR FEDERAL LAWS.—Principles similar to the principles applicable under the preceding provisions of this subsection shall apply in the case of plans coordinated with State or Federal laws other than title II of the Social Security Act.

"(d) TREATMENT OF MULTIPLE PLANS.—For purposes of this section, in any case which an employee is eligible to participate in two or more retirement plans which are maintained by the same employer, such plans shall be treated as one plan with respect to such employee.

"(e) REGULATIONS.—The Secretary of the Treasury may prescribe such regulations as are necessary or appropriate to carry out the purposes of this section.".

Subtitle E—Coverage and Portability

SEC. 141. EARLY DISTRIBUTIONS OF BENEFITS RESTRICTED TO DIRECT TRANSFERS TO INDIVIDUAL RETIREMENT ACCOUNTS OR ANNUITIES.

(a) GENERAL RULE.—Section 203(e) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1053(e)) (relating to restrictions on certain mandatory distributions) is amended—

(1) by redesignating paragraph (2) as paragraph (3); and

(2) by inserting after paragraph (1) the following new paragraph:

"(2)(A) Irrespective of the amount of the present value of the accrued benefit, in the case of any distribution of such benefit in a lump sum before the earlier of the participant's attainment of age 59½, disability, or death, such benefit shall not be treated as nonforfeitable unless such distribution is made—

"(i) in a direct transfer to an individual retirement account (within the meaning of section 408(a) of the Internal Revenue Code of 1954) or an individual retirement annuity (within the meaning of section 408(b) of such Code),

"(ii) after notice of such transfer to the participant (or, in the event of the participant's death, the participant's beneficiary), and

"(iii) except as provided in subparagraph (B), directly to an individual retirement account or individual retirement annuity—

"(I) which is designated in writing by the participant (or, in the event of the participant's death, the participant's beneficiary), and

"(II) which is demonstrated to the satisfaction of the plan administrator to be willing to accept such transfer.

"(B) If the participant (or beneficiary) makes no designation referred to in sub-

paragraph (A)(iii)(I) to an individual retirement account or individual retirement annuity described in subparagraph (A)(iii)(II) within the 60-day period following the date of the notice provided under subparagraph (A)(ii), the plan administrator may make such transfer to an individual retirement account or individual retirement annuity selected by the plan administrator.".

(b) SURVIVOR ANNUITIES.—Section 205(g) of such Act (29 U.S.C. 1055(g)) (relating to restrictions on cash-outs) is amended by adding at the end thereof the following new paragraphs:

"(4) The preceding provisions of this subsection shall apply only with respect to distributions made as transfers meeting the requirements of section 203(e).

"(5) Benefits distributed under a plan shall not be treated as other than nonforfeitable solely because such distribution is made as permitted under this subsection.".

Subtitle F—Effective Date and Related Rules

SEC. 151. EFFECTIVE DATE.

(a) GENERAL RULE.—The amendments made by this title shall apply with respect to any plan for plan years ending after the later of—

(1) 2 years after the date of the enactment of this Act, or

(2) the earlier of—

(A) the effective date of the first plan amendment adopted after the date of the enactment of this Act, or

(B) December 31, 1990.

(b) SPECIAL RULE FOR COLLECTIVE BARGAINING AGREEMENTS.—In the case of a plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before the date of the enactment of this Act, the amendments made by this Act shall apply to plan years ending after the later of—

(1) 2 years after the date of the enactment of this Act, or

(2) the earlier of—

(A) the date on which the last of the collective bargaining agreements relating to the plan terminates (determined without regard to any extension thereof ratified after the date of the enactment of this Act),

(B) the effective date of the first plan amendment adopted after the date of the enactment of this Act, or

(C) December 31, 1990.

SEC. 152. TECHNICAL AMENDMENTS.

The table of contents in section 1 of the Employee Retirement Income Security Act of 1974 is amended—

(1) by striking out the item relating to section 211 and inserting in lieu thereof the following new items:

"Sec. 211. Retirement income requirements.
"Sec. 212. Plan coverage requirements applicable to employer.
"Sec. 213. Retirement plan coverage required as prerequisite for nonretirement savings plan coverage.
"Sec. 214. Cash or deferred arrangements under retirement plans.
"Sec. 215. Nondiscriminatory integration of retirement plans with title II of the Social Security Act and other retirement programs under State or Federal law.
"Sec. 216. Effective dates.

and

(2) by striking out the item relating to section 306 and inserting in lieu thereof the following new items:

"Sec. 306. Maximum amount of covered compensation.
"Sec. 307. Effective dates.

TITLE II—AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954

Subtitle A—Participation Requirements

SEC. 201. RETIREMENT PLANS AND NONRETIREMENT SAVINGS PLANS.

(a) IN GENERAL.—Section 414 of the Internal Revenue Code of 1954 (relating to definitions and special rules) is amended by adding at the end thereof the following new subsection:

"(q) RETIREMENT PLAN AND NONRETIREMENT SAVINGS PLAN.—For purposes of this part—

"(1) RETIREMENT PLAN.—The term 'retirement plan' means a plan which meets the retirement income requirements of section 409A.

"(2) NONRETIREMENT SAVINGS PLAN.—The term 'nonretirement savings plan' means a plan which is not a retirement plan.

"(3) CONVERSION RESTRICTION.—No amendment to a retirement plan shall be treated as having the effect of converting the retirement plan to a nonretirement savings plan.".

(b) CONFORMING AMENDMENTS.—

(1) The sections specified in paragraph (2) are each amended by striking out "retirement plan" each place it appears and inserting in lieu thereof "retirement benefit plan".

(2) The sections specified in this paragraph are the following:

(A) subsections (a)(3), (a)(4)(C)(i), (c)(1), (e)(1), (e)(5), (f)(3)(A), (f)(5), and (f)(6)(A) of section 219 of such Code;

(B) section 221(b)(2)(A)(iii) of such Code;

(C) subsections (a)(5) and (a)(7) of section 402 of such Code;

(D) subsections (a)(4)(A)(ii) and (b)(8)(A)(ii) of section 403 of such Code;

(E) subsections (c)(2) and (d) of section 2517 of such Code;

(F) section 3405(d)(1)(A)(ii) of such Code;

(G) section 6049(b)(4)(B) of such Code;

(H) section 6058(d) of such Code;

(I) subsections (a)(1), (b)(3), and (c) of section 7476 of such Code, the heading of such section, and the item relating to such section in the table of sections for part IV of subchapter C of chapter 76 of such Code;

(J) the heading and subsection (a)(37) of section 7701 of such Code; and

(K) section 3001(a) of the Employee Retirement Income Security Act of 1974.

SEC. 202. RETIREMENT INCOME REQUIREMENTS.

(a) IN GENERAL.—Subpart A of part I of subchapter D of chapter 1 of the Internal Revenue Code of 1954 (relating to pension, profit-sharing, stock bonus plans, etc.) is amended by adding at the end thereof the following new section:

"SEC. 409A. RETIREMENT INCOME REQUIREMENTS.

"(a) IN GENERAL.—A plan meets the retirement income requirements of this section only if the plan—

"(1) provides for distribution of the accrued benefit with respect to each participant commencing not earlier than upon—

"(A) the later of—

"(i) the participant's attainment of any age at or above age 59½, or

"(ii) the participant's separation from service,

"(B) the participant's disability, or

"(C) the participant's death,

except that, in the case of any such distribution other than upon disability or death, the plan may provide for such distribution upon separation from service earlier than is allowed under subparagraph (A) if such distribution is in a retirement income form described in subsection (b), and

"(2) provides for the distribution commencing not later than the later of—

"(A) the end of the plan year in which the employee attains age 70½, or

"(B) in the case of an employee other than an owner-employee (within the meaning of section 401(c)(3)), the end of the plan year in which the employee retires.

"(b) RETIREMENT INCOME FORMS.—The retirement income forms described in this subsection are the following:

"(1) a distribution in the form of—

"(A) an annuity for the life of the participant,

"(B) a qualified joint and survivor annuity (within the meaning of section 417(b)), or

"(C) a level distribution over life expectancy (which may be adjusted not more frequently than annually to account for changes in life expectancy and reasonable assumptions based on previous investment performance under the plan),

"(2) a distribution described in paragraph (1), adjusted to allow for periodic supplements which—

"(A) terminate upon commencement of entitlement to benefits under title II of the Social Security Act, and

"(B) after adding benefits otherwise paid under the plan for periods for which such supplements are paid, do not exceed the amount of projected total benefits under such title II and the plan upon such commencement of entitlement, or

"(3) benefits in the event of sickness, accident, or disability referred to in section 3(1) of the Employee Retirement Income Security Act of 1974.

"(c) SPECIAL RULE RELATING TO TRANSFERS FROM PLANS DIRECTLY TO INDIVIDUAL RETIREMENT ACCOUNTS OR ANNUITIES OR TO OTHER RETIREMENT PLANS.—A plan shall not be treated as failing to meet the retirement income requirements of this section solely because the plan provides for a direct transfer to an individual retirement account (within the meaning of section 408(a)), to an individual retirement annuity (within the meaning of section 408(b)), or to another retirement plan (which provides for acceptance of such transfers) of the accrued benefit with respect to the participant upon the participant's separation from service under the plan in accordance with section 411(a)(11).

"(d) CROSS REFERENCE.—

"For application of section to definition of 'retirement plan', see section 414(q).".

(b) CLERICAL AMENDMENT.—The table of sections for subpart A of part I of subchapter D of chapter 1 of such Code is amended by adding after the item relating to section 409 the following new item:

"Sec. 409A. Retirement income requirements.".

SEC. 203. MAINTENANCE OF ADEQUATE RETIREMENT PLAN COVERAGE AS QUALIFICATION REQUIREMENT.

(a) QUALIFICATION DEPENDENT UPON ADEQUATE RETIREMENT PLAN COVERAGE.—Section 401(a) of the Internal Revenue Code of 1954 (relating to requirements for qualification of pension, profit-sharing, and stock bonus plans) is amended by inserting after paragraph (25) the following new paragraph:

"(26) PLAN COVERAGE REQUIREMENTS.—A trust forming a part of a plan shall not constitute a qualified trust under this section unless the employer maintaining the plan meets the coverage requirements of section 409B.".

(b) COVERAGE REQUIREMENTS OF EMPLOYER.—Subpart A of part I of subchapter D of

chapter 1 of the Internal Revenue Code of 1954 (relating to pension, profit-sharing, stock bonus plans, etc.) (as amended by the preceding provisions of this title) is further amended by adding at the end thereof the following new section:

"SEC. 409B. COVERAGE REQUIREMENTS APPLICABLE TO EMPLOYER.

"(a) IN GENERAL.—An employer meets the coverage requirements of this section if each employee who is in the employer's relevant work force and who is under the social security contribution and benefit base is eligible to participate in a retirement plan maintained by the employer.

"(b) SPECIAL RULES IN THE CASE OF ALLOWABLE SUBDIVISIONS OF THE RELEVANT WORK FORCE.—In any case in which the relevant work force of the employer consists of two or more allowable subdivisions, the requirements of this section shall be treated as met if the requirements of paragraphs (1) and (2) are met.

"(1) 80-PERCENT COVERAGE REQUIREMENT.—

"(A) IN GENERAL.—The requirements of this paragraph are met if—

"(i) the employer's coverage percentage as of the end of the last fiscal year of the employer is at least 80 percent, or

"(ii) the average of the employer's coverage percentages as of the end of each of the last 5 fiscal years of the employer (or all preceding fiscal years of the employer if less than 5) is at least 80 percent.

"(B) COVERAGE PERCENTAGE DEFINED.—For purposes of this paragraph, the term 'coverage percentage', in connection with any employer, means the percentage of the relevant work force of the employer constituting employees who are under the social security contribution and benefit base and are eligible for participation in a retirement plan maintained by the employer.

"(2) TOTAL COVERAGE REQUIRED IN ANY ALLOWABLE SUBDIVISION IN WHICH ANY COVERAGE IS PROVIDED.—The requirements of this paragraph are met if, in each allowable subdivision in which one or more employees are eligible to participate in a retirement plan maintained by the employer, each employee who is under the social security contribution and benefit base is eligible to participate in a retirement plan maintained by the employer.

"(c) REQUIREMENTS MAY BE MET BY MAINTENANCE OF TWO OR MORE PLANS.—The provisions of subsections (a) and (b), to the extent they require maintenance by an employer of a retirement plan with respect to any employee, may be met by maintenance by the employer of one or more retirement plans in at least one of which the employee is eligible to participate.

"(d) SPECIAL RULE FOR CONTRIBUTORY PLANS.—

"(1) IN GENERAL.—In the case of a retirement plan which provides for mandatory contributions, the requirements of subsection (a) shall be treated as met only if at least 60 percent of the employees made eligible to participate in accordance with subsection (a) or (b)(1) actually participate.

"(2) INCREASE IN REQUIRED PERCENTAGE FOR PLANS PROVIDING SUBSTANTIAL BENEFITS.—In the case of a plan with respect to which the applicable requirements of subparagraphs (A) and (B) of section 401(a)(27) are met, the phrase '70 percent' shall be substituted for the phrase '60 percent' in paragraph (1).

"(e) CONTINUED APPLICABILITY OF NON-DISCRIMINATION REQUIREMENTS.—Nothing in the preceding provisions of this section shall be construed to limit the requirements of section 401(a)(4).

"(f) DEFINITIONS.—For purposes of this section and section 401(a)(26)—

"(1) RELEVANT WORK FORCE.—The term 'relevant work force' of an employer means all employees of the employer, excluding any employee who—

"(A) does not meet the requirements for participation in any pension, profit-sharing, or stock bonus plan established or maintained by the employer solely by reason of failure to satisfy minimum age or service requirements prescribed by such plan as a condition of participation in such plan,

"(B) is not a participant in any pension, profit-sharing, or stock bonus plan established or maintained by the employer and is included in a unit of employees covered by an agreement which the Secretary finds to be a collective-bargaining agreement between employee representatives and one or more employers, if there is evidence that retirement benefits were the subject of good-faith bargaining between such employee representatives and such employer or employers,

"(C) is included in a unit of employees covered by an agreement pursuant to which a pension, profit-sharing, or stock bonus plan is maintained by the employer and which the Secretary finds to be a collective-bargaining agreement between air pilots represented in accordance with title II of the Railway Labor Act and one or more employers (unless the principal duties of such employee are not customarily performed aboard aircraft in flight), or

"(D) is a nonresident alien and receives no earned income (within the meaning of section 911(d)(2)) from the employer which constitutes income from sources within the United States (within the meaning of section 861(a)(3)).

"(2) UNDER THE SOCIAL SECURITY CONTRIBUTION AND BENEFIT BASE.—An employee is 'under the social security contribution and benefit base' if the employee's compensation is at a rate less than the contribution and benefit base under section 230 of the Social Security Act.

"(3) ALLOWABLE SUBDIVISION.—The term 'allowable subdivision' of a relevant work force means—

"(A) a portion of the relevant work force consisting of so much of such relevant work force as serves in the work force of a separate business unit of the employer, as defined in regulations of the Secretary of the Treasury distinguishing such unit solely on the basis of its distinct locality or its separate product line, and

"(B) the portion of the relevant work force consisting of so much of such relevant work force as does not serve in the work force of any such separate business unit.

"(4) MANDATORY CONTRIBUTIONS.—The term 'mandatory contributions', in connection with a participant in a plan, means amounts contributed to the plan by the participant which are required as a condition of employment, as a condition of participation in the plan, or as a condition of obtaining benefits under the plan attributable to employer contributions.".

(c) CONFORMING AMENDMENT.—Subsection (b) of section 410 of such Code (relating to eligibility) is repealed.

(d) ELIMINATION OF 3-YEAR RULE UNDER MINIMUM PARTICIPATION STANDARDS.—Subparagraph (B) of section 410(a)(1) of such Code (relating to special rules for certain plans) is amended by striking out "(B) SPECIAL RULES FOR CERTAIN PLANS.—" and all that follows down through "(ii) In the case of any plan maintained" and inserting in lieu thereof "(B) SPECIAL RULE FOR CERTAIN PLANS.—In the case of any plan maintained".

(e) CLERICAL AMENDMENT.—The table of sections for subpart A of part I of subchapter D of chapter 1 of such Code (as amended by the preceding provisions of this title) is further amended by adding after the item relating to section 409A the following new item:

"Sec. 409B. Coverage requirements applicable to employer.".

SEC. 204. RETIREMENT PLAN COVERAGE REQUIRED AS PREREQUISITE FOR NONRETIREMENT SAVINGS PLAN COVERAGE.

(a) GENERAL RULE.—Section 401(a) of the Internal Revenue Code of 1954 (relating to requirements for qualification of pension, profit-sharing, and stock bonus plans) (as amended by the preceding provisions of this title) is further amended by inserting after paragraph (26) the following new paragraph:

"(27) RETIREMENT PLAN COVERAGE REQUIRED AS PREREQUISITE FOR NONRETIREMENT SAVINGS PLAN COVERAGE.—A trust forming a part of a nonretirement savings plan, in which any employee within the relevant work force (within the meaning of section 409B(f)(1)) of the employer maintaining the plan is eligible to participate, shall not constitute a qualified trust under this section unless, under at least one retirement plan which is maintained by the employer and in which the employee is eligible to participate—

"(A) in any case in which such retirement plan is a defined benefit plan, the accrued benefit of each participant is equivalent to an amount expressed as a percentage of compensation (within the meaning of section 415) and such percentage equals or exceeds the product derived by multiplying the participant's years of participation required to be taken into account under section 411 by 0.5 percent, or

"(B) in any case in which such retirement plan is a defined contribution plan, the employer contribution with respect to each participant for each plan year is not less than 3 percent of participant's compensation (within the meaning of section 415) for such plan year.".

Subtitle B—Limitations on Contributions and Benefits

SEC. 211. DEDUCTIBILITY OF EMPLOYER AND EMPLOYEE CONTRIBUTIONS.

(a) DEDUCTIBILITY OF EMPLOYEE CONTRIBUTIONS TO RETIREMENT PLANS ONLY.—

(1) IN GENERAL.—Clause (i) of section 219(e)(2)(A) of the Internal Revenue Code of 1954 (relating to definition of qualified voluntary employee contributions) is amended by striking out "qualified employer plan" and inserting in lieu thereof "qualified retirement plan".

(2) CONFORMING AMENDMENTS.—

(A) DESIGNATION OF CONTRIBUTIONS NOT TO BE TAKEN INTO ACCOUNT.—Subparagraph (C) of section 219(e)(2) of such Code (relating to designation of contributions not to be taken into account) is amended by striking out "qualified employer plan" and inserting in lieu thereof "qualified retirement plan".

(B) QUALIFIED RETIREMENT PLAN.—Paragraph (3) of section 219(e) of such Code (relating to definition of qualified employer plan) is amended—

(i) by striking out "EMPLOYER PLAN" in the heading and inserting in lieu thereof "RETIREMENT PLAN";

(ii) by striking out "employer plan" in the text and inserting in lieu thereof "retirement plan";

(iii) by inserting "a retirement plan constituting" after "means"; and

(iv) by striking out "and" in subparagraph (B) and inserting in lieu thereof "or".

(b) DEDUCTIBILITY OF EMPLOYER CONTRIBUTIONS TO EMPLOYEES' ANNUITIES.—Section 404(a)(2) of such Code (relating to employees' annuities) is amended by striking out "and (22)" and inserting in lieu thereof ", (22), (26), (27), and (28)".

SEC. 212. CASH OR DEFERRED ARRANGEMENTS UNDER RETIREMENT PLANS.

(a) APPLICATION TO RETIREMENT PLANS.—

(1) IN GENERAL.—Paragraph (1) of section 401(k) of the Internal Revenue Code of 1954 (relating to cash or deferred arrangements) is amended to read as follows:

"(1) GENERAL RULE.—A retirement plan shall not be considered as not meeting the requirements of subsection (a) merely because the plan includes a cash or deferred arrangement meeting the requirements of this subsection.".

(2) CONFORMING AMENDMENTS.—Section 401(k) of such Code is further amended—

(A) by redesignating paragraphs (3), (4), and (5) as paragraphs (4), (5), and (6), respectively; and

(B) by striking out paragraph (2) and inserting in lieu thereof the following new paragraphs:

"(2) CASH OR DEFERRED ARRANGEMENT.—For purposes of this subsection, a cash or deferred arrangement is any arrangement which is part of a plan and under which a covered employee may elect to have the employer make payments—

"(A) as contributions to a trust under the plan on behalf of the employee, or

"(B) to the employee directly in cash.

"(3) NONFORFEITABILITY.—A cash or deferred arrangement meets the requirements of this subsection only if the arrangement provides that an employee's right to the employee's accrued benefit derived from employer contributions made to the trust pursuant to the employee's election is nonforfeitable.".

(b) DISCRIMINATION STANDARDS.—

(1) IN GENERAL.—Paragraph (4) (as redesignated) of section 401(k) of such Code (relating to application of participation and discrimination standards) is amended by striking out subparagraph (A) and inserting in lieu thereof the following:

"(A) RELATIONSHIP BETWEEN DEFERRAL PERCENTAGES OF HIGHLY COMPENSATED EMPLOYEES AND OTHER ELIGIBLE EMPLOYEES.—

"(i) ALTERNATIVE TESTS.—A cash or deferred arrangement shall not be treated as meeting the requirements of this subsection unless the actual deferral percentage for highly compensated employees (as defined in paragraph (5)) for each plan year bears a relationship to the actual deferral percentage for all other eligible employees for such plan year which meets either of the following tests:

"(I) 1.5 MULTIPLIER TEST.—The actual deferral percentage for the group of highly compensated employees is not more than the actual deferral percentage of all other eligible employees multiplied by 1.5.

"(II) 2.5 MULTIPLIER TEST.—The excess of the actual deferral percentage for the group of highly compensated employees over the actual deferral percentage for all other eligible employees is not more than 3 percentage points, and the actual deferral percentage for the group of highly compensated employees is not more than the actual deferral percentage of all other eligible employees multiplied by 2.5.

"(ii) RULES FOR MORE THAN 1 PLAN.—If 2 or more plans which include cash or deferred arrangements are considered as 1 plan for purposes of section 401(a), the cash or deferred arrangements included in such plans shall be treated as 1 arrangement for purposes of this subparagraph. The actual deferral percentage taken into account under this subparagraph for any employee who is a participant under 2 or more cash or deferred arrangements of the employer shall be the sum of the actual deferral percentages for such employee under each of such arrangements.".

(2) CLERICAL AMENDMENT.—Subparagraph (B) of such paragraph (4) (as redesignated) is amended by inserting "ACTUAL DEFERRAL PERCENTAGE.—" after "(B)".

(c) TREATMENT OF ALLOWABLE SUBDIVISIONS.—Subsection (k)(6) (as redesignated) of such section 401 is amended to read as follows:

"(6) TREATMENT OF ALLOWABLE SUBDIVISIONS.—In the case of any plan with respect to which the requirements of section 409A would not be met but for meeting the requirements of subsection (b)(1) of such section with respect to allowable subdivisions, the requirements of this subsection are not met unless such requirements are met if applied solely to each such allowable subdivision.".

(d) CONFORMING AMENDMENTS.—

(1) Section 125(d)(2) of such Code is amended by striking out "which includes a qualified cash or deferred arrangement (as defined in section 401(k)(2))" and inserting in lieu thereof "which is a retirement plan (as defined in section 414(q)) and which includes a cash or deferred arrangement (as defined in section 401(k)(2)) meeting the requirements of section 401(k)".

(2) Section 402(a)(8) of such Code is amended by striking out "qualified cash or deferred arrangement (as defined in section 401(k)(2))" and inserting in lieu thereof "cash or deferred arrangement (as defined in section 401(k)(2)) which meets the requirements of section 401(k) and is included in a retirement plan".

(3) Section 3121(v)(1)(A) of such Code is amended by striking out "qualified cash or deferred arrangement (as defined in section 401(k)(2))" and inserting in lieu thereof "cash or deferred arrangement (as defined in section 401(k)(2)) which meets the requirements of section 401(k) and is included in a retirement plan (as defined in section 414(q))".

(4) Section 3306(r)(1)(A) of such Code is amended by striking out "qualified cash or deferred arrangement (as defined in section 401(k)(2))" and inserting in lieu thereof "cash or deferred arrangement (as defined in section 401(k)(2)) which meets the requirements of section 401(k) and is included in a retirement plan (as defined in section 414(q))".

(5) Section 209 of the Social Security Act is amended, in clause (1) of the next to last undesignated paragraph, by striking out "qualified cash or deferred arrangement (as defined in section 401(k)(2) of the Internal Revenue Code of 1954)" and inserting in lieu thereof "cash or deferred arrangement (as defined in section 401(k)(2) of the Internal Revenue Code of 1954) which meets the requirements of section 401(k) of such Code and is included in a retirement plan (as defined in section 414(q) of such Code)".

SEC. 213. DEDUCTIBLE AMOUNT OF CONTRIBUTIONS TO INDIVIDUAL RETIREMENT ACCOUNTS OR ANNUITIES LIMITED BY AMOUNT OF DEDUCTIBLE CONTRIBUTIONS TO RETIREMENT PLANS MADE UNDER CASH OR DEFERRED ARRANGEMENTS.

(a) IN GENERAL.—Paragraph (3) of section 219(b) of the Internal Revenue Code of 1954 (relating to special rule for individual retirement plans) is amended to read as follows:

"(3) SPECIAL RULES LIMITING AMOUNT OF DEDUCTION.—

"(A) EFFECT OF CONTRIBUTIONS UNDER CASH OR DEFERRED ARRANGEMENTS.—If contributions to a retirement plan (within the meaning of section 414(q)) on behalf of the individual for the plan year ending with or during the taxable year have been paid by the individual's employer under a cash or deferred arrangement meeting the requirements of section 401(k), the amount of the qualified retirement contributions which are paid for the taxable year and which are allowable as a deduction under subsection (a) for such taxable year shall not exceed—

"(i) the amount determined under paragraph (1) for such taxable year, reduced by

"(ii) the amount of the contributions paid by the employer on behalf of the individual under the cash or deferred arrangement.

"(B) EFFECT OF QUALIFIED VOLUNTARY EMPLOYEE CONTRIBUTIONS.—If the individual has paid any qualified voluntary employee contributions for the taxable year, the amount of the qualified retirement contributions (other than employer contributions to a simplified employee pension) which are paid for the taxable year to an individual retirement plan and which are allowable as a deduction under subsection (a) for such taxable year shall not exceed—

"(i) the amount of the qualified retirement contributions which are paid for the taxable year and which are allowable as a deduction under subsection (a) after application of subparagraph (A), reduced by

"(ii) the amount of the qualified voluntary employee contributions for the taxable year.".

SEC. 214. WAGE-BASED LIMITATIONS FOR BENEFITS AND CONTRIBUTIONS.

(a) MAXIMUM AMOUNT OF COVERED COMPENSATION.—

(1) IN GENERAL.—Paragraph (1) of section 415(a) of the Internal Revenue Code of 1954 (relating to limitations on benefits and contribution under qualified plans) is amended—

(A) in subparagraph (B), by striking out "or";

(B) in subparagraph (C), by striking out "subsection (g)." and inserting in lieu thereof "subsection (g), or"; and

(C) by adding at the end thereof the following new subparagraph:

"(D) under the plan, the amount of a participant's compensation (within the meaning of subsection (c)(3)) for any year which may be taken into account for purposes of determining benefits and contributions exceeds 500 percent of the contribution and benefit base (as in effect as of the beginning of such year) under section 230 of the Social Security Act.".

(2) CONFORMING AMENDMENT.—Paragraph (2) of section 415(a) of such Code (relating to application to certain annuities and accounts) is amended by inserting "and subparagraph (D) of paragraph (1)," after "appropriate,".

(b) LIMITATION ON BENEFITS UNDER DEFINED BENEFIT PLANS.—Subparagraph (A) of section 415(b)(1) of such Code (relating to

limitation for defined benefit plans) is amended by striking out "$90,000, or" and inserting in lieu thereof the following: "200 percent of the contribution and benefit base (as in effect as of the beginning of the year) under section 230 of the Social Security Act, or".

(c) LIMITATION ON CONTRIBUTIONS AND OTHER ADDITIONS UNDER DEFINED CONTRIBUTION PLANS.—

(1) IN GENERAL.—Paragraph (1) of section 415(c) of such Code (relating to limitation for defined contribution plans) is amended—

(A) in subparagraph (A), by striking out "30,000, or" and inserting in lieu thereof the following: "50 percent of the contribution and benefit base (as in effect as of the beginning of the year) under section 230 of the Social Security Act, or"; and

(B) in subparagraph (B), by striking out "25 percent" and inserting in lieu thereof "20 percent".

(2) ANNUAL ADDITION.—Subparagraph (B) of section 415(c)(2) of such Code is amended to read as follows:

"(B) one-half of the employee contributions, and".

(3) SPECIAL SALARY REDUCTION LIMIT.—Section 415(c) of such Code is further amended by adding at the end thereof the following new paragraph:

"(8) SPECIAL LIMITATION FOR PAYMENTS BY EMPLOYERS PURSUANT TO QUALIFIED CASH OR DEFERRED ARRANGEMENTS.—Contributions and other additions with respect to a participant exceed the limitation of this subsection to the extent they include payments made by the employer for any year to a trust under the plan pursuant to a cash or deferred arrangement (within the meaning of section 401(k)(2)) in excess of 25 percent of the contribution and benefit base under section 230 of the Social Security Act.".

(4) SPECIAL LIMITATION FOR NONRETIREMENT SAVINGS PLANS.—Section 415(c) of such Code (as amended by paragraph (2)) is further amended by adding at the end thereof the following new paragraph:

"(9) SPECIAL LIMITATION FOR NONRETIREMENT SAVINGS PLANS.—Contributions and other additions with respect to a participant exceed the limitation of this subsection in the case of a nonretirement savings plan if, when expressed as an annual addition (within the meaning of paragraph (2)), such annual addition is greater than the lesser of—

"(A) 25 percent of the contribution and benefit base (as in effect as of the beginning of the year) under section 230 of the Social Security Act, or

"(B) 10 percent of the participant's compensation (within the meaning of subsection (c)(3)).".

(c) RULE RELATING TO LIMITATION IN CASE OF DEFINED BENEFIT PLAN AND DEFINED CONTRIBUTION PLAN FOR SAME EMPLOYEE APPLICABLE ONLY IN THE EVENT OF TOP-HEAVY PLAN PARTICIPATION.—Paragraph (1) of section 415(e) of such Code (relating to limitation in case of defined benefit plan and defined contribution plan for same employee) is amended by inserting "and at least one of such plans is a top-heavy plan (within the meaning of section 416(g))" after "employer".

(d) CONFORMING AMENDMENTS.—

(1) Section 415(c)(2) of such Code (defining annual addition) is amended by striking out "paragraph (1)" and inserting in lieu thereof "this subsection".

(2) Section 415(d) of such Code (relating to cost-of-living adjustments) is amended—

(A) in paragraph (1), by striking out "The Secretary" and all that follows down through "for increases" and inserting in lieu thereof "In the case of a participant who is separated from service, the Secretary shall adjust annually the amount taken into account under subsection (b)(1)(B) for increases";

(B) in paragraph (2), by striking out "PERIODS" and inserting in lieu thereof "PERIOD", and by striking out "The base period" and all that follows and inserting in lieu thereof "For purposes of this subsection, the base period taken into account is the last calendar quarter of the calendar year before the calendar year in which the participant is separated from service."; and

(C) by striking out paragraph (3).

SEC. 215. CONFORMING AMENDMENTS RELATING TO TAXATION OF ANNUITY INCOME.

(a) RULES FOR DISTRIBUTIONS FROM RETIREMENT PLANS TO WHICH EMPLOYEE MADE CONTRIBUTIONS.—Subsection (o) of section 72 of the Internal Revenue Code of 1954 (relating to special rules for distributions from qualified plans to which employee made deductible contributions) is amended—

(1) in paragraph (1), by striking out "qualified employer plan" and inserting in lieu thereof "qualified retirement plan";

(2) in paragraph (2)(A), by striking out "qualified employer plan" and inserting in lieu thereof "qualified retirement plan"; and

(3) in paragraph (5)(C), by striking out "EMPLOYER" in the heading and inserting in lieu thereof "RETIREMENT", and by striking out "employer" in the text and inserting in lieu thereof "retirement".

(b) LOANS FROM RETIREMENT PLANS TREATED AS DISTRIBUTIONS.—Subsection (p) of section 72 of such Code (relating to loans treated as distributions) is amended—

(1) in paragraph (1), by striking out "qualified employer plan" each place it appears and inserting in lieu thereof "qualified retirement plan";

(2) in paragraph (3), by striking out "EMPLOYER" in the heading and inserting in lieu thereof "RETIREMENT", and by striking out "employer" each place it appears in the text and inserting in lieu thereof "retirement"; and

(3) in paragraph (4) by striking out "qualified employer plan" and inserting in lieu thereof "qualified retirement plan", and by striking out "such employer plan" and inserting in lieu thereof "such retirement plan".

(c) 5-PERCENT PENALTY FOR PREMATURE DISTRIBUTIONS FROM ANNUITY CONTRACTS NOT APPLICABLE IN THE CASE OF NONRETIREMENT SAVINGS PLANS.—Subsection (q) of section 72 of such Code (relating to 5-percent penalty for premature distributions from annuity contracts) is amended—

(1) in paragraph (2)(E), by striking out "or";

(2) in paragraph (2)(F), by striking out "1982." and inserting in lieu thereof "1982, or "; and

(3) by adding at the end thereof the following new subparagraph:

"(G) from a nonretirement savings plan (within the meaning of section 414(q)).".

Subtitle C—Vesting Standards

SEC. 221. MINIMUM VESTING STANDARD REDUCED FROM 10 YEARS TO 5 YEARS FOR RETIREMENT PLANS AND 1 YEAR FOR NON-RETIREMENT PLANS.

(a) IN GENERAL.—Paragraph (2) of section 411(a) of the Internal Revenue Code of 1954 (relating to minimum vesting standards) is amended to read as follows:

"(2) EMPLOYER CONTRIBUTIONS.—A plan satisfies the requirements of this paragraph if it satisfies the requirements of subparagraph (A) or (B).

"(A) IN GENERAL.—A plan satisfies the requirements of this subparagraph if—

"(i) in the case of a retirement plan, under the plan, a participant who has completed at least 5 years of service has a nonforfeitable right to 100 percent of the participant's accrued benefit derived from employer contributions, and

"(ii) in the case of a nonretirement savings plan, under the plan, a participant who has completed at least 1 year of service has a nonforfeitable right to 100 percent of the participant's accrued benefit derived from employer contributions.

"(B) MULTIEMPLOYER PLANS.—A plan satisfies the requirements of this subparagraph if—

"(i) the plan is a multiemployer plan, and

"(ii) under the plan a participant who has completed at least 10 years of service has a nonforfeitable right to 100 percent of the participant's accrued benefit derived from employer contributions.".

(b) RULE OF APPLICATION.—The amendment made by subsection (a), upon taking effect as provided in section 261, shall apply with respect to participants who have completed at least one hour of service on or after the date of the enactment of this Act.

Subtitle D—Pension Integration

SEC. 231. INTEGRATION OF RETIREMENT PLANS WITH OASDI AND OTHER GOVERNMENTAL RETIREMENT PROGRAMS.

(a) IN GENERAL.—Subsection (l) of section 401 of the Internal Revenue Code of 1954 (relating to nondiscriminatory coordination of defined contribution plans with OASDI) is amended to read as follows:

"(l) NONDISCRIMINATORY INTEGRATION OF RETIREMENT PLANS WITH TITLE II OF THE SOCIAL SECURITY ACT AND OTHER RETIREMENT PROGRAMS UNDER STATE OR FEDERAL LAW.—

"(1) IN GENERAL.—A retirement plan shall not be treated as discriminatory within the meaning of subsection (a)(4) merely because it is an integrated plan.

"(2) INTEGRATED PLAN.—For purposes of this subsection, the term 'integrated plan' means a plan which is discriminatory within the meaning of subsection (a)(4) solely because the plan provides a contribution or benefit formula described in paragraph (3) or (4).

"(3) EXCESS PLAN REQUIREMENTS.—

"(A) EXCESS FORMULA.—The contribution or benefit formula of a plan is described in this paragraph if, under such formula, to an extent consistent with the requirements of subparagraph (C), contributions or benefits determined on that portion of compensation in excess of an integration level which is specified therein for each plan year and which meets the requirements of subparagraph (B) exceed contributions or benefits determined on that portion of compensation not in excess of such integration level.

"(B) INTEGRATION LEVEL.—An integration level provided under a plan's benefit or contribution formula meets the requirements of this subparagraph if such integration level, as specified for each plan year, does not exceed the contribution and benefit base under section 230 of the Social Security Act as of the beginning of such plan year.

"(C) INTEGRATION RATIO.—

"(i) IN GENERAL.—The requirements of this subparagraph are met with respect to a plan's contribution or benefit formula if, under such formula, the ratio (expressed as a percentage) of—

"(I) the amount of employer contributions (in the case of a defined contribution plan) or benefits (in the case of a defined benefit plan) determined on that portion of compensation which is not in excess of the integration level, to

"(II) the amount of employer contributions (in the case of a defined contribution plan) or benefits (in the case of a defined benefit plan) determined on that portion of compensation which is in excess of the integration level,

is not less than 50 percent.

"(ii) ADDITIONAL RULES GOVERNING INTEGRATION RATIOS.—

"(I) GREATER INTEGRATION RATIOS UNDER DEFINED BENEFIT PLANS REQUIRED FOR PLANS WITHOUT ADEQUATE DISTRIBUTION OF VALUABLE PLAN FEATURES.—The Secretary shall provide by regulation for increases in the minimum ratio required under clause (i) for any defined benefit plan (or class thereof) to the extent necessary to eliminate any additional discrimination within the meaning of subsection (a)(4) attributable to the value of the plan features (constituting the form of benefit, any preretirement benefits, the vesting schedule, the normal retirement age, and any actuarial adjustment factors) with respect to benefits attributable to compensation in excess of the specified integration level, taking into account the value of such features with respect to benefits attributable to compensation not in excess of the specified integration level.

"(II) GREATER INTEGRATION RATIOS UNDER CONTRIBUTORY PLANS REQUIRED FOR PLANS PROVIDING ADEQUATE BENEFIT RATES IN RELATION TO CONTRIBUTION RATES.—The Secretary shall provide by regulation for increases in the minimum ratio required under clause (i) for any plan (or class thereof) providing for mandatory contributions (within the meaning of section 411(c)(2)(C)) to the extent necessary to eliminate any additional discrimination within the meaning of subsection (a)(4) attributable solely to the ratio which employee contribution rates applicable to compensation which is not in excess of the specified integration level bears to employee contribution rates applicable to compensate which is in excess of the specified integration, taking into account the ratio which benefit rates applicable to compensation which is not in excess of the specified integration level bears to benefit rates applicable to compensation which is in excess of the specified integration level.

"(4) REQUIREMENTS FOR OFFSET PLANS.—

"(A) OFFSET FORMULA.—The contribution or benefit formula of a plan is described in this paragraph if, under such formula, to an extent consistent with the requirements of subparagraph (B), the normal retirement benefit with respect to each participant is expressed in the form of a benefit which is a specified percentage of compensation (without exclusion of any portion of compensation), reduced by a specified percentage (not in excess of 100 percent) of the primary insurance amount (within the meaning of section 215 of the Social Security Act) of such participant (or of any other individual on whose wages and self-employment income (within the meaning of sections 209 and 211 of such Act) such participant's entitlement to monthly benefits under title II of such Act is based), determined as of the earlier of the date of the commencement of such participant's entitlement to benefits under such title II or the date of such participant's separation from service.

"(B) MINIMUM BENEFIT.—The requirements of this subparagraph are met with respect to a plan if, under the plan, the accrued benefit derived from employer contributions (within the meaning of section 411(c)(1)) provided to each participant is not less than 50 percent of the accrued benefit derived from employer contributions which would be provided to such participant but for the reduction described in subparagraph (A).

"(C) LIMITATION ON REGULATORY AUTHORITY.—In any regulations prescribed by the Secretary under this paragraph, any criteria for determining whether the requirements of this paragraph have been met may not take into account the form of benefit, preretirement benefits, or similar plan provisions.

"(5) COORDINATION OF PLANS WITH OTHER STATE OR FEDERAL LAWS.—Principles similar to the principles applicable under the preceding provisions of this subsection shall apply in the case of plans coordinated with State or Federal laws other than title II of the Social Security Act.

"(6) TREATMENT OF MULTIPLE PLANS.—For purposes of this subsection, in any case which an employee is eligible to participate in two or more retirement plans which are maintained by the same employer, such plans shall be treated as one plan with respect to such employee.

"(7) REGULATIONS.—The Secretary may prescribe such regulations as are necessary or appropriate to carry out the purposes of this subsection.".

(b) COMFORMING AMENDMENT.—The first two sentences of paragraph (5) of section 401(a) of such Code (relating to requirements for qualification) are amended to read as follows: "A classification shall not be considered discriminatory within the meaning of paragraph (4) or section 410(b) (without regard to paragraph (1)(A) thereof) merely because it is limited to salaried or clerical employees. Neither shall a plan be considered discriminatory within the meaning of such provisions merely because the contributions or benefits of or on behalf of the employees under the plan bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of such employees.".

Subtitle E—Distribution

SEC. 241. DENIAL OF 10-YEAR AVERAGING AND CAPITAL GAINS TREATMENT FOR LUMP-SUM DISTRIBUTIONS.

(a) DENIAL OF CAPITAL GAINS TREATMENT FOR LUMP-SUM DISTRIBUTION TO BENEFICIARY OF EXEMPT TRUST.—Paragraph (2) of section 402(a) of the Internal Revenue Code of 1954 (relating to capital gains treatment for portion of lump-sum distributions to beneficiary of exempt trust) is repealed.

(b) REPEAL OF TAX ON LUMP-SUM DISTRIBUTIONS.—Subsection (e) of section 402 of such Code (relating to tax on lump-sum distributions) is repealed.

(c) DENIAL OF CAPITAL GAINS TREATMENT FOR LUMP-SUM DISTRIBUTIONS FROM EMPLOYEE ANNUITIES.—Paragraph (2) of section 403(a) of such Code (relating to capital gains treatment for certain distributions from employee annuities) is repealed.

SEC. 242. INCREASE IN ADDITIONAL TAX ON EARLY DISTRIBUTIONS FROM AN INDIVIDUAL RETIREMENT ACCOUNT, ETC.

Paragraph (1) of section 408(f) of the Internal Revenue Code of 1954 (relating to additional tax on early distributions from an individual retirement account, etc.) is amended by striking out "10 percent" and inserting in lieu thereof "20 percent".

Subtitle F—Coverage and Portability

SEC. 251. EARLY DISTRIBUTIONS OF BENEFITS RESTRICTED TO DIRECT TRANSFERS TO INDIVIDUAL RETIREMENT ACCOUNTS OR ANNUITIES.

(a) GENERAL RULE.—Paragraph (11) of section 411(a) of the Internal Revenue Code of 1954 (relating to restrictions on certain mandatory distributions) is amended—

(1) by redesignating subparagraph (B) as subparagraph (C); and

(2) by inserting after subparagraph (A) the following new subparagraph:

"(B) SELECTION OF INDIVIDUAL RETIREMENT ACCOUNT OR ANNUITY.—

"(i) IN GENERAL.—Irrespective of the amount of the present value of the accrued benefit, in the case of any distribution of such benefit in a lump sum before the earlier of the participant's attainment of age 59½, disability, or death, such benefit shall not be treated as nonforfeitable unless such distribution is made—

"(I) in a direct transfer to an individual retirement account (within the meaning of section 408(a)) or an individual retirement annuity (within the meaning of section 408(b)),

"(II) after notice of such transfer to the participant (or, in the event of the participant's death, the participant's beneficiary), and

"(III) except as provided in clause (ii), directly to an individual retirement account or individual retirement annuity) which is designated in writing by the participant (or, in the event of the participant's death, the participant's beneficiary) and which is demonstrated to the satisfaction of the plan administrator to be willing to accept such transfer.

"(ii) DISCRETION OF PLAN ADMINISTRATOR IN ABSENCE OF DESIGNATION.—If the participant (or beneficiary) makes no designation referred to in clause (i)(III) to an individual retirement account or individual retirement annuity described in clause (i)(III) within the 60-day period following the date of the notice provided under clause (i)(II), the plan administrator may make such transfer to an individual retirement account or individual retirement annuity selected by the plan administrator.".

(b) SURVIVOR ANNUITIES.—Subsection (e) of section 417 of such Code (relating to restrictions on cash-outs) is amended by adding at the end thereof the following new paragraphs:

"(4) APPLICATION OF DIRECT TRANSFER RULES.—The preceding provisions of this subsection shall apply only with respect to distributions made as transfers meeting the requirements of section 411(a)(11)(B).

"(5) NONFORFEITABILITY.—Benefits distributed under a plan shall not be treated as other than nonforfeitable solely because such distribution is made as permitted under this subsection.".

SEC. 252. SPECIAL RULES FOR SIMPLIFIED EMPLOYEE PENSIONS.

(a) SALARY REDUCTION ARRANGEMENTS PERMITTED.—Section 408(k) of the Internal Revenue Code of 1954 (relating to simplified employee pension defined) is amended by inserting after paragraph (5) the following new paragraph:

"(6) EMPLOYEE MAY ELECT SALARY REDUCTION ARRANGEMENT.—

"(A) IN GENERAL.—A simplified employee pension meets the requirements of this paragraph only if, under the terms of the pension—

"(i) an employee may elect to have the employer make payments—

"(I) as contributions to the simplified employee pension on behalf of the employee, or

"(II) to the employee directly in cash,

"(ii) an election described in clause (i)(I) is made or is in effect with respect to not less than 50 percent of the employees of the employer, and

"(iii) the deferral percentage for each calendar year of each participating owner-employee (within the meaning of section 401(c)(3)) is not more than the product derived by multiplying the average of the deferral percentages for such calendar year of all other participating employees by 1.5,

except that the requirements of this paragraph shall not apply with respect to any taxable year in the case of a simplified employee pension maintained by an employer with more than 25 employees as of the beginning of such taxable year.

"(B) TREATMENT OF CONTRIBUTIONS MADE UNDER SALARY REDUCTION ARRANGEMENTS.—For purposes of this title, contributions made by an employer on behalf of an employee to a simplified employee pension pursuant to an election made under subparagraph (A) shall not be treated as distributed or made available to the employee nor as contributions made to the simplified employee pension by the employee merely because the simplified employee pension includes provisions providing for such election.

"(C) DEFERRAL PERCENTAGE.—For purposes of this paragraph, the deferral percentage for an employee for a calendar year shall be the ratio of—

"(i) the amount of employer contributions actually paid over to the simplified employee pension on behalf of the employee for the calendar year, to

"(ii) the employee's compensation for the calendar year.

For purposes of the preceding sentence, the compensation of any employee for a calendar year shall be the amount of the employee's compensation which is taken into account under the simplified employee pension in calculating the contribution which may be made on the employee's behalf for such calendar year. The deferral percentage taken into account under this paragraph for any employee who is a participant under 2 or more simplified employee pensions of the employer shall be the sum of the deferral percentages for such employee under each of such simplified employee pensions.".

(b) FIDUCIARY DUTIES IMPOSED.—Section 408(k) of such Code (as amended by subsection (a)) is further amended by inserting after paragraph (6) the following new paragraph:

"(7) ASSUMPTION BY TRUSTEE OF FIDUCIARY DUTIES.—A simplified employee pension meets the requirements of this paragraph only if, under the terms of the pension, the trustee described in subsection (a)(2) assumes the fiduciary duties to which part 4 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 applies.".

(c) CONFORMING AMENDMENTS.—Section 408(k) of such Code is further amended—

(1) in paragraph (1)(A), by striking out "(4), and (5)" and inserting in lieu thereof "(4), (5), (6), and (7)"; and

(2) by redesignating paragraph (7) at the end as paragraph (8).

SEC. 253. INTEGRATION UNDER SIMPLIFIED EMPLOYEE PENSIONS PROHIBITED.

Paragraph (3) of section 408(k) of the Internal Revenue Code of 1954 (providing that contributions may not discriminate in favor of the highly compensated, etc.) is amended—

(1) in subparagraph (D), by striking out the last sentence, and

(2) by striking out subparagraph (E).

SEC. 254. WAGE-BASED CONTRIBUTION LIMITATIONS UNDER SIMPLIFIED EMPLOYEE PENSIONS.

Subparagraph (C) of section 408(k)(3) of the Internal Revenue Code of 1954 (requiring that contributions must bear a uniform relationship to total compensation) is amended—

(1) in clause (i), by striking out "the first $200,000" and inserting in lieu thereof "the first amount equal to 500 percent of the contribution and benefit base (as in effect as of the beginning of the taxable year) under section 230 of the Social Security Act"; and

(2) in clause (ii), by striking out "$100,000" and inserting in lieu thereof "250 percent of the contribution and benefit base (as in effect as of the beginning of the taxable year) under section 230 of the Social Security Act".

Subtitle G—Effective Date

SEC. 261. EFFECTIVE DATE.

(a) GENERAL RULES.—

(1) PLANS.—The amendments made by this title shall apply with respect to any plan for plan years ending after the later of—

(A) 2 years after the date of the enactment of this Act, or

(B) the earlier of—

(i) the effective date of the first plan amendment adopted after the date of the enactment of this Act, or

(ii) December 31, 1990.

(2) INDIVIDUAL RETIREMENT ACCOUNTS AND ANNUITIES.—The amendments made by this title shall apply with respect to any individual retirement account or individual retirement annuity for taxable years ending after December 31, 1990.

(b) SPECIAL RULE FOR COLLECTIVE-BARGAINING AGREEMENTS.—In the case of a plan maintained pursuant to one or more collective-bargaining agreements between employee representatives and one or more employers ratified before the date of the enactment of this Act, the amendments made by this Act shall apply to plan years ending after the later of—

(1) 2 years after the date of the enactment of this Act, or

(2) the earlier of—

(A) the date on which the last of the collective-bargaining agreements relating to the plan terminates (determined without regard to any extension thereof ratified after the date of the enactment of this Act),

(B) the effective date of the first plan amendment adopted after the date of the enactment of this Act, or

(C) December 31, 1990.

RETIREMENT INCOME POLICY ACT OF 1985 (RIPA) (SECTION-BY-SECTION ANALYSIS)

TITLE I: AMENDMENTS TO THE EMPLOYEE RETIREMENT INCOME SECURITY ACT (ERISA)

Section 101: Retirement Plans and Nonretirement Savings Plans

Creates a distinction between retirement and non-retirement savings plans. It amends Section 3 of ERISA to include the following definitions: "retirement" plans, meeting the requirements of amended Section 211 of ERISA; and, "non-retirement savings" plans which do not conform to the requirements of that section. Further, it prevents a retirement plan from being converted to a non-retirement plan.

Section 102: Retirement Income Requirements for Retirement Plans

Establishes uniform rules for distributions from retirement plans. A retirement plan may only distribute a participant's accrued benefit to the participant after separation from service only after the participant attains age 59½ (and must begin distributions before the taxable year in which the individual attains age 70½), or upon the disability or death of the participant. An exception to this rule is that plans may distribute benefits to the participant upon separation of service prior to age 59½ if they are provided in a "retirement income form".

"Retirement Income Form" is one of three kinds of distribution: (1) an annuity for the life of the participant; (2) a qualified joint and survivor annuity; or (3) a level distribution over life expectancy. These payments may periodically adjust for the payment of supplemental benefits prior to the receipt of Social Security benefits so long as those supplemental benefits do not exceed the amount of anticipated Social Security benefits.

Finally, a plan may transfer the accrued benefit of a plan participant directly to an IRA, individual retirement annuity, or another retirement plan when the participant ceases his employment with the employer.

Section 103: Coverage Requirements for Retirement Plans

Revises the coverage requirements for a qualified retirement plan. In general, an employer must provide that each of his employees in the "relevant workforce" who is paid less than the Social Security wage base ($39,600 in 1985) is eligible to participate in a retirement plan maintained by the employer. If the employer has two or more "allowable subdivisions", within any allowable subdivision where a plan is provided all of the relevant workforce paid less than the wage base must be eligible to participate, and in the aggregate of all subdivisions, 80 percent of the employer's relevant workforce must be eligible to participate. If the retirement plan is a contributory plan, 60 percent of those eligible to participate must actually participate, unless the contributory plan provides the "meaningful retirement benefit" for purposes of establishing the employer's eligibility to sponsor a non-retirement savings plan, in which case 70 percent of the relevant workforce must participate.

The relevant workforce consists of the group of employees other than those who are excluded under current law because: they have not met minimum service and vesting requirements; are covered by a collective bargaining agreement where there is evidence of good faith bargaining as to retirement benefits and they are not covered by a plan; are non-resident aliens who receive no earned income in the United States; or are certain airline pilots.

An allowable subdivision is a separate business unit of the employer distinguished solely on the basis of its producing a separate product line or having a distinct locality—as defined in regulation by the Secretary of the Treasury.

Section 104: Retirement Plan Coverage as a Prerequisite for Nonretirement Savings Plans

Requires that an employer maintaining a non-retirement savings plan covering an employee maintain at least one retirement plan covering that employee which accrues benefits of at least:

(a) in the case of a defined benefit plan, 0.5 percent for each year of participation;

(b) in the case of a defined contribution plan, 3 percent of a participant's compensation of each plan year.

Section 111: Cash or Deferred Arrangements in Retirement Plans

Restricts the availability of salary reduction under Cash or Deferred Arrangements (CODAs) to retirement plans and subjects CODAs to the uniform distribution rules for retirement plans. Retains current law discrimination rules for CODAs.

Section 112: Maximum Amount of Covered Compensation

Limits the amount of a plan participant's or self-employed individual's compensation which may be taken into account for determining the benefits and contributions to no more than 500 percent of the Social Security wage base.

Section 121: Acceleration in Vesting Standards

Amends current minimum vesting standards to require that retirement plans fully vest a participant who has completed 5 years of service. A non-retirement savings plan must fully vest a participant who has completed 1 year of service. Multiemployer plans must fully vest participants who have completed 10 years of service.

Section 131: Revised Integration Rules

Revises the rules governing the integration of private pension benefits with Social Security. With respect to excess plans, no contribution percentage or accrual rate for earnings above the integration level may exceed twice the contribution percentage of accrual rate for earnings below the integration level. With respect to offset plans, a plan may reduce pension benefits by any uniform percentage of Social Security provided that no participant's accrued benefit, after the reduction is applied, is less than half of what the participant's accrued benefit would have been without the reduction. No adjustments may be made with regard to receipt of ancillary benefits.

Section 141: Direct Transfer of Early Distributions

Modifies the treatment of early distributions from a retirement plan made by the employer of less than $3,500 without the consent of the participant, or above $3,500 with the participant's consent, to require that distributions not made in a retirement income form must be transferred directly to an IRA or individual retirement arrangement or other retirement plan designated by the participant. If the participant does not designate a vehicle, then the plan administrator may select one.

Section 151: Effective Dates

Establishes effective dates for the legislation. Amendments made by this legislation are effective no sooner than two years following enactment and no sooner than the first plan amendment adopted after the first two years, but, in any case, no later than December 31, 1990. In the case of collectively bargained plans, the provisions take effect no sooner than two years following enactment, and not sooner than the date that the last collective bargaining agreement relating to the plan terminates or the first plan amendment is adopted after the first two years, but in no case later than December 31, 1990.

Section 152: Technical Amendment

Makes a technical amendment to table of contents in Section 1 of ERISA.

TITLE 11: AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954

Section 201: Retirement Plans and Nonretirement Savings Plans

Parallel provisions to Section 101.

Section 202: Retirement Income Requirements for Retirement Plans

Parallel provisions to Section 102.

Section 203: Coverage Requirements for Retirement Plans

Parallel provisions to Section 103.

Section 204: Retirement Plan Coverage as a Prerequisite for Nonretirement Plans

Parallel provisions to Section 104.

Section 211: Deductibility of Employee and Employer Contributions

Permits employees to make deductible qualified voluntary employee contributions (QVECs) only to a retirement plan.

Section 212: Cash or Deferred Arrangements Nondiscrimination Rules

Amends section 401(k) regarding Cash or Deferred Arrangements to require that employers with allowable subdivisions meet the 401(k) non-discrimination rules separately in each allowable subdivision.

Section 213: Coordination of Elective Nontaxable Contributions

Reduces the amount of deductible contributions an individual can make to an individual retirement account or annuity in a taxable year by the amount of any contributions made to a cash or deferred arrangement (CODA) on behalf of that individual by an employer in any plan year ending in that taxable year. It further coordinates deductible contributions to an individual retirement account or annuity (IRAs), with Deductible Employee Contributions (DECs), and Qualified Voluntary Employee Contributions (QVECs) for the purposes of this section.

Section 214: Wage-Based Benefit and Contribution Limits

Amends the contribution and benefit limits (IRC Section 415) for all qualified plans to link them to the Social Security wage base as follows:

(a) The limitation on benefits under defined benefit plans is the lesser of 100 percent of compensation or 200 percent of the Social Security wage base;

(b) the limitation on contributions to a defined contribution plan is the lesser of 20 percent of compensation or 50 percent of the Social Security wage base; and one-half of after-tax employee contributions are considered as an annual addition.

In addition, there are internal limits on contributions to CODAs and to non-retirement savings plans under the overall defined contribution limit:

(a) CODA contributions may not exceed 25 percent of the Social Security wage base.

(b) Employer and employee contributions to non-retirement savings plans may not exceed the lesser of 25 percent of the Social Security base or 10 percent of the participant's compensation.

This section also repeals the combined limit on defined benefit and defined contribution plans (the "415(e)" limit) except in the case of top heavy plans.

This section additionally limits the amount of a plan participant's or self-employed individual's compensation that may be taken into account for determining benefits and contributions to no more than 500 percent of the Social Security wage base.

Section 215: Conforming Amendments on Taxation of Annuities

Makes clarifying clerical amendments to IRC Section 72 dealing with taxation of annuities.

Section 221: Acceleration in Vesting Standards

Parallel provisions to Section 121.

Section 231: Revised Integration Rules

Parallel provisions to Section 131.

Section 241: Denial of Favorable Tax Treatment for Lump Sum Distributions

Repeals ten-year forward averaging and capital gains treatment of lump sum distributions.

Section 242: Increase in Tax on Premature IRA Distributions

Raises the rate of the excise tax on premature distributions from an individual retirement account (IRA) to 20 percent.

Section 251: Direct Transfer of Early Distributions

Parallel provisions to Section 151.

Section 252: Special Rules for Simplified Employee Plans (SEP's)

This section, and the two that follow revise the rules concerning Simplified Employee Pensions (SEPs). A SEP maintained by an employer with fewer than 25 employees at the beginning of the taxable year may permit contributions through salary reduction as long as 50 percent of employees elect to defer income and the participating owner-employee does not defer more than 1.5 times the average deferral for all other participating employees. This section also requires that banks assume the fiduciary duties for the plan.

Section 253: Prohibition on Integration of SEP's

Prohibits integration of SEPs with Social Security.

Section 254: Limitation on Compensation Considered for a SEP

Limits total compensation that can be considered for purposes of establishing uniform contributions to a SEP to 500 percent of the Social Security wage base.

Section 261: Effective Dates

Parallel provisions to Section 151.●

● Mr. CHAFEE. Mr. President, I would like to join with my colleague Senator HEINZ in introducing the Retirement Income Policy Act of 1985.

I join with my colleague in introducing this measure because I would like to join the debate over what our national retirement income policy should be. Before I even start discussing the substance of the bill itself, I want to draw attention to the proposed effective date of this legislation—December 31, 1990.

As those of you familiar with pension plans are aware, the Congress has been changing the law in this area with much too much frequency, and it appears that we still do not have a

system which is satisfactory. I am joining with Senator HEINZ in suggesting comprehensive changes, but we have set the effective date very far in the future so that we can alleviate the hardship, expense, and uncertainty that these frequent changes have wrought. It is my hope that with adequate lead-time, the affected parties can get together and work out changes which will make the system work better for all.

This legislation is designed to increase the retirement security of American workers by encouraging a broader delivery of retirement benefits from employer-sponsored plans. The bill clarifies the distinction between retirement plans and nonretirement plans and establishes uniform rules for each. Through broadened coverage, earlier vesting, restrictions on preretirement distributions, and limitations on integration of private pension benefits with Social Security, the bill is designed to improve the current private pension system.

As a member of the Finance Committee and former chairman of the Subcommittee on Savings, Pensions and Investment Policy, I am well aware that the so-called tax expenditure for pension contributions and earnings is the largest single expenditure in the Federal budget. For fiscal 1986 the amount of revenue foregone as a result of the tax-favored status of employer-sponsored plans, IRA's and Keoghs is estimated to be almost $70 billion. As a tax policymaker, that figure catches my attention and I want to know where this revenue is going.

In 1974, is passed the Employee Retirement Income Security Act [ERISA]. Many of the problems which ERISA was designed to solve have been resolved and new problems have risen in their place. ERISA was enacted in part as a reaction to the financial failure of some private pension plans to provide adequate retirement security for their participants. The Congress was concerned that retirees would be left with empty promises from pension plans which had squandered plan assets, or employers who had gone out of business. Congress was also concerned with onerous vesting requirements which might have resulted in a loyal employee of 30 years being fired, just before vesting or retirement, and left without a pension.

But these are the horror stories of 11 years ago. Today we have other concerns. We are still concerned with fiduciary standards and the prudent management of plan assets which now total over $600 billion. But one of the major concerns of pension plans is tax planning. ERISA has created armies of experts—lawyers, accountants and actuaries—who work to assure that pension plans are tax-qualified. Indeed, tax exemption for the funds and tax deductions and deferral for the contributions are crucial to the growth of the private pension system.

I have said before, in the context of tax reform, that we should be examining all the tax expenditures in the Federal budget to see whether they are operating as intended. This bill attempts to do that for the $70 billion tax expenditure associated with retirement plans.

It attempts to broaden the coverage of pension plans and assure that the revenue loss associated with them is fairly distributed. It improves benefits for our mobile workforce by reducing the minimum vesting standard from 10 years to 5 years, and it prevents extreme reductions in retirement benefits for lower paid workers by limiting the extent of integration with Social Security. The limitations on tax-favored accumulations are tied to the Social Security wage base, and contributions to IRA's are limited if an employee is also participating in a salary reduction plan.

The bill also attempts to assure that the moneys in these tax-favored retirement plans are used for retirement by requiring early lump sum distributions from retirement plans to be placed in an IRA or other retirement plan. In addition, it repeals the favorable 10 years averaging treatment for lump sum distributions. However, recognizing that there is still a legitimate need for nonretirement savings, it seeks to allow a tax-favored vehicle for that as well, but only after an employer has provided for meaningful retirement benefits.

In summary, the introduction of this bill is meant to be the beginning of a debate on an appropriate retirement income policy. I welcome the comments and suggested changes of my colleagues and all other interested parties.●

By Mr. EAGLETON (for himself and Mr. DANFORTH):

S.J. Res. 224. A joint resolution to designate November 30, 1985, as "National Mark Twain Day"; to the Committee on the Judiciary.

NATIONAL MARK TWAIN DAY

Mr. EAGLETON. Mr. President, Samuel Langhorne Clemens, better known as Mark Twain, is one of Missouri's most beloved native sons and most famous authors. More than anything, his special wit and perception captured the essence of the American character.

November 30, 1985, will be the 150th anniversary of Mr. Twain's birth. As a tribute to this great American, it is appropriate to dedicate November 30, 1985, as "National Mark Twain Day." This will draw proper attention to not only a fine American who brought enjoyment to all Americans, but to a rare and talented human being who charmed the world. I ask that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 224

Whereas American journalist and author Mark Twain was born Samuel Langhorne Clemens in Florida, Missouri, and Hannibal, Missouri, was his boyhood home;

Whereas Mark Twain is recognized as one of America's greatest authors;

Whereas Mark Twain achieved international fame and his works have been translated into more than fifty languages;

Whereas Mark Twain is widely recognized as a humorist of extraordinary wit and as a social critic of rare perception;

Whereas the experience of Mark Twain in Hannibal became the basis of two novels, the Adventures of Tom Sawyer and the Adventures of Huckleberry Finn;

Whereas travels and experiences of Mark Twain in other regions of the United States became the basis for other works, including The Celebrated Jumping Frog of Calaveras County, A Connecticut Yankee in King Arthur's Court, Life on the Mississippi, and Roughing It;

Whereas Mark Twain succeeded in portraying the American spirit in a way which no other author has been able to duplicate;

Whereas the city of Hannibal maintains the Mark Twain Home and Museum as a historic site;

Whereas the city of Hannibal will be the site of special events and entertainment culminating in November 1985, to celebrate the one hundred and fiftieth anniversary of the birth of Mark Twain; and

Whereas November 30, 1985, is the one hundred and fiftieth anniversary of the birth of Mark Twain: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That November 30, 1985, is designated as "National Mark Twain Day", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

● Mr. DANFORTH. I am happy to sponsor, along with my colleague from Missouri, this resolution honoring Mark Twain, a great Missourian and American humorist, on the 150th year of his birth.

Mark Twain was born on November 30, 1835, in Florida, MO. As a writer, he drew almost exclusively from his own experiences. Hannibal, MO, and its environs, where he grew up, serve as the setting for his most famous works, "The Adventures of Huckleberry Finn" and "The Adventures of Tom Sawyer." As a young man, he lived and worked in California, where he wrote his first nationally recognized story, "The Celebrated Jumping Frog of Calaveras County." In later years, Twain settled in Hartford, CT, where he wrote and published all of his books. He also spent several years in New York, where he was married and is buried.

Twain's best known novel, "Huckleberry Finn," has allowed many generations of youngsters to experience vi-

cariously Huck's thrilling journey down the Mississippi River. The dialog in that novel crackles with life. The novel was also before its time in depicting blacks as human beings and not property. Another great American novelist, Ernest Hemingway, once said that modern American literature began with "Huckleberry Finn."

Mark Twain is recognized throughout the world as one of the greatest American authors, and I believe it is appropriate for this body to honor him in a special way on the 150th anniversary of his birth.●

ADDITIONAL COSPONSORS

S. 244

At the request of Mr. ABDNOR, the name of the Senator from Illinois [Mr. SIMON] was added as a cosponsor of S. 244, a bill to limit to the national median family income the amount of farm loss which may be deducted against nonfarm income by high income taxpayers in competition with full-time, family-sized farm operators.

S. 402

At the request of Mr. PRESSLER, the name of the Senator from Connecticut [Mr. WEICKER] was added as a cosponsor of S. 402, a bill to amend the Communications Act of 1934 to provide for specialized equipment for telephone service to certain disabled persons.

S. 670

At the request of Mr. PELL, the names of the Senator from Nebraska [Mr. ZORINSKY], the Senator from Pennsylvania [Mr. SPECTER], and the Senator from North Dakota [Mr. BURDICK] were added as cosponsors of S. 670, a bill to amend the National Labor Relations Act ot give employers and performers in the performing arts rights given by section 8(e) of such act to employers and employees in similarly situated industries, and to give to employers and performers in the performing arts the same rights given by section 8(f) of such act to employers and employees in the construction industry, and for other purposes.

S. 1084

At the request of Mr. GOLDWATER, the names of the Senator from Oklahoma [Mr. BOREN], and the Senator from Indiana [Mr. LUGAR] were added as cosponsors of S. 1084, a bill to authorize appropriations of funds for activities of the Corporation for Public Broadcasting, and for other purposes.

S. 1233

At the request of Mr. DOLE, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 1233, a bill to amend the Animal Welfare Act to ensure the proper treatment of laboratory animals.

S. 1250

At the request of Mr. HEINZ, the names of the Senator from New York [Mr. MOYNIHAN], and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of S. 250, a bill to amend the Internal Revenue Code of 1954 to extend the targeted jobs tax credit for 5 years, and for other purposes.

S. 1259

At the request of Mr. THURMOND, the name of the Senator from Maryland [Mr. MATHIAS] was added as a cosponsor of S. 1259, a bill to correct certain inequities by providing Federal civil service credit for retirement purposes and for the purpose of computing length of service to determine entitlement to leave, compensation, life insurance, health benefits, severance pay, tenure, and status in the case of certain individuals who performed service as National Guard technicians before January 1, 1969.

S. 1301

At the request of Mr. GRAMM, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of S. 1301, a bill to strengthen the counterintelligence capabilities of the Department of Defense, to amend the Uniform Code of Military Justice to establish penalties for espionage in peacetime, to provide increased penalties for espionage, and for other purposes.

S. 1355

At the request of Mr. LEAHY, the names of the Senator from Tennessee [Mr. GORE], the Senator from Alaska [Mr. STEVENS], and the Senator from Illinois [Mr. SIMON] were added as cosponsors of S. 1355, a bill to amend the Internal Revenue Code of 1954 to provide an income tax credit for expenses incurred by an individual taxpayer for the purchase of television subtitle equipment to be used by a hearing-impaired individual.

S. 1518

At the request of Mr. GLENN, the names of the Senator from Wisconsin [Mr. PROXMIRE], the Senator from Michigan [Mr. LEVIN], and the Senator from Michigan [Mr. RIEGLE] were added as cosponsors of S. 1518, a bill to provide for cost efficiency in the shipment of the U.S. Government cargoes, to establish the Great Lakes and St. Lawrence Seaway Advisory Council, and for other purposes.

S. 1544

At the request of Mr. ROTH, the name of the Senator from Connecticut [Mr. DODD] was added as a cosponsor of S. 1544, a bill to extend the Trade Adjustment Assistance Program to place such program on a sound financial basis and to reform such program to emphasize the retraining of workers.

S. 1570

At the request of Mr. SYMMS, his name was withdrawn as a cosponsor of S. 1570, a bill to amend the Fair Labor Standards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that act relating to maximum hours, to clarify the application of that act to volunteers, and for other purposes.

S. 1624

At the request of Mr. DECONCINI, the name of the Senator from North Carolina [Mr. HELMS] was added as a cosponsor of S. 1624, a bill to make ineligible for certain agricultural program benefits persons who are convicted under Federal or State law of planting, cultivation, growing or harvesting of controlled substances.

S. 1639

At the request of Mr. EXON, the names of the Senator from Utah [Mr. HATCH], the Senator from Missouri [Mr. EAGLETON], and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of S. 1639, a bill to authorize the minting of gold bullion coins.

S. 1734

At the request of Mr. COCHRAN, the names of the Senator from Iowa [Mr. GRASSLEY], the Senator from Indiana [Mr. LUGAR], and the Senator from Nebraska [Mr. ZORINSKY] were added as cosponsors of S. 1734, a bill to prevent distortions in the reapportionment of the House of Representatives caused by the use of census population figures which include illegal aliens.

S. 1754

At the request of Mr. GLENN, the names of the Senator from Minnesota [Mr. DURENBERGER], and the Senator from Arkansas [Mr. BUMPERS] were added as cosponsors of S. 1754, a bill to ensure adequate verification of peaceful uses of nuclear exports from the United States to the People's Republic of China, and for other purposes.

SENATE JOINT RESOLUTION 29

At the request of Mr. GLENN, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of Senate Joint Resolution 29, a joint resolution to designate the week of November 11, 1985, through November 17, 1985, as "National Reye's Syndrome Week."

SENATE JOINT RESOLUTION 179

At the request of Mr. KENNEDY, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as a cosponsor of Senate Joint Resolution 179, a joint resolution requesting the President of the United States to resume negotiations with the Soviet Union for a verifiable comprehensive test ban treaty.

SENATE JOINT RESOLUTION 209

At the request of Mr. D'AMATO, the name of the Senator from Texas [Mr. GRAMM] was added as a cosponsor of Senate Joint Resolution 209, a joint resolution to designate the period from October 28, 1985, through Octo-

ber 28, 1986, as the Centennial Year of Liberty in the United States.

SENATE JOINT RESOLUTION 213

At the request of Mr. FORD, the names of the Senator from Louisiana [Mr. JOHNSTON], and the Senator from Connecticut [Mr. WEICKER] were added as cosponsors of Senate Joint Resolution 213, a joint resolution to designate January 19-25, 1986, "National Jaycee Week."

SENATE JOINT RESOLUTION 222

At the request of Mr. D'AMATO, the names of the Senator from Alabama [Mr. DENTON], the Senator from Florida [Mrs. HAWKINS], the Senator from Pennsylvania [Mr. SPECTER], the Senator from North Carolina [Mr. EAST], and the Senator from Kansas [Mr. DOLE] were added as cosponsors of Senate Joint Resolution 222, a joint resolution concerning the cruel and inhuman killing of Leon Klinghoffer by international terrorists aboard the cruise ship *Achille Lauro*, because he did not submit to the demands of these terrorists.

SENATE CONCURRENT RESOLUTION 71

At the request of Mr. WEICKER, the names of the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Wisconsin [Mr. KASTEN], and the Senator from Georgia [Mr. MATTINGLY] were added as cosponsors of Senate Concurrent Resolution 71, a concurrent resolution to commemorate the accomplishments of Public Law 94-142, The Education for All Handicapped Children Act, on the 10th anniversary of its enactment.

SENATE CONCURRENT RESOLUTION 78

At the request of Mr. BRADLEY, the names of the Senator from North Dakota [Mr. ANDREWS], the Senator from Minnesota [Mr. DURENBERGER], the Senator from Arkansas [Mr. BUMPERS], the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Wisconsin [Mr. PROXMIRE] were added as cosponsors of Senate Concurrent Resolution 78, a concurrent resolution in support of universal access to immunization by 1990 and accelerated efforts to eradicate childhood diseases.

SENATE RESOLUTION 227

At the request of Mr. D'AMATO, his name was added as a cosponsor of Senate Resolution 227, a resolution urging a joint United States-Soviet effort to achieve worldwide disease immunization by 1990.

SENATE CONCURRENT RESOLUTION 80—AUTHORIZING THE PRINTING OF ADDITIONAL COPIES OF THE COMMITTEE PRINT ENTITLED "DEFENSE ORGANIZATION; THE NEED FOR CHANGE"

Mr. GOLDWATER (for himself and Mr. NUNN) submitted the following concurrent resolution; which was referred to the Committee on Rules and Administration.

S. CON. RES. 80

Resolved by the Senate (the House of Representatives concurring), That there shall be printed 2,000 additional copies of the Committee Print of the Committee on Armed Services (99th Congress, 1st Session) entitled "Defense Organization: The Need for Change", to be furnished to the Committee on Armed Services.

● Mr. GOLDWATER. Mr. President, on behalf of Senator NUNN and myself, I am submitting a Senate concurrent resolution to authorize the printing of additional copies of a study by the Senate Armed Services Committee staff entitled "Defense Organization: The Need for Change."

On October 16, 1985, the Armed Services Committee released this staff study to the public. Interest in this document is so great that within 2 days of its release, the committee had exhausted its supply of more than 1,000 copies. Because the committee is continuing to receive innumerable requests for copies from Members of Congress, agencies in the executive branch, and the public, Senator NUNN and I are seeking authority through a concurrent resolution to print 2,000 additional copies.

Mr. President, I urge the Senate and the House to act expeditiously on this matter so that copies of this important study may be distributed as widely as possible.●

SENATE RESOLUTION 242—FAVORING CONTINUATION OF THE PRESENT FEDERAL INCOME TAX TREATMENT OF STATE AND LOCAL DEBTS

Mr. MATTINGLY (for himself and Mr. DIXON) submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 242

Whereas the Federal Government has traditionally refrained from taxing the interest income of debt obligations issued by agencies of State and local governments;

Whereas this treatment by the Federal Government provides important fiscal aid to State and local governments in a nondiscriminatory manner and without administrative costs to the Federal Government;

Whereas this treatment by the Federal Government has provided a flexible, efficient, and economical means for State and local governments to fund public service facilities deemed important to needs of their citizens;

Whereas the lower debt service costs of tax-exempt bonds has helped to foster public-private partnerships for the more efficient delivery of municipal services;

Whereas action by Congress to reduce massive Federal budget deficits has necessitated curtailment of direct fiscal support for State and local governments for such purposes as revenue sharing, highway aid, and mass transit assistance;

Whereas the modernization of essential public infrastructures such as highways, bridges, water supply systems, and waste treatment systems is estimated to involve costs of $1 to $2 trillion for State and local governments over the next 15 years;

Whereas State and local governments will have to issue bonds to finance such modernization of such essential infrastructures;

Whereas the President has proposed to Congress changes in the Federal tax code which will have the effect of denying tax-exempt treatment to some 80 percent of the bonds issued by State and local governments during a typical year for traditional municipal purposes, including air terminals and port facilities, low-income housing, health care facilities, resource recovery plants, and urban redevelopment;

Whereas such proposal can diminish the market for State and local bonds by prohibiting the deductibility of interest costs associated with bond portfolios held by banks, the single largest institutional purchasers of State and local bonds;

Whereas whatever modest Federal revenue gains resulting from this denial of tax-exempt treatment of municipal securities must be balanced against—

(A) the loss of tax revenue which will result because of the inability of State and local governments to build projects without tax-exempt financing, and

(B) the large increase in debt service costs for State and local governments (probably over $40 billion through 1990) which will result from such denial;

Whereas such increased debt service costs of State and local governments may only be met through increased user fees and higher local taxes;

Whereas Congress in the Deficit Reduction Act of 1984 adopted provisions specifically designed to eliminate abuses in tax-exempt financing; and

Whereas the Congress should grant a reasonable period of time to observe the effectiveness of such remedial actions: Now, therefore, be it

Resolved, That it is the sense of the Senate that the Congress should not adopt additional statutory changes which will further curtail the issuance by units of State and local governments of obligations which are tax exempt under Federal income tax law.

Mr. MATTINGLY. Mr. President, for Senator DIXON and myself, I am submitting Senate Resolution 242, expressing the sense of the Senate that Congress should not change the Federal income tax treatment of State and local debt obligations.

As our colleagues must be aware through contacts with State and local officials, the Treasury's tax reform bill includes provisions which will deny tax-exempt eligibility for a significant portion of typical municipal bonds and will, therefore, sharply drive up the debt-service costs for financing the vast majority of public-service facilities. In fact, it is estimated that 80 percent of typical annual volumes will be denied tax-exempt treatment.

Senator DIXON and I do not propose this resolution as an attack upon either administration or congressional efforts to obtain genuine reforms in the Federal income tax system. We share with our colleagues a desire to enact legislation in this Congress which will simplify the Tax Code, con-

tribute to greater productivity and efficiency in our economy, and provide authentic aftertax gains in take-home pay for low- and middle-income families and individuals.

The Treasury's proposals relating to State and local bonds simply do not represent tax reform. Treasury has recommended new definitions of public purpose, new restrictions on arbitrage, and outright denial of tax-exemption for advance refundings, which complicate, rather than simplify, public financing by States and localities, for both bond issuers and bond investors.

Similarly, Treasury's recommendations remove incentives for the innovative and more efficient delivery of essential public services by State and local government. A most promising development of the past 10 years has been the growth of public-private partnerships and management agreements for the furnishing of a wide variety of municipal service from health care, to public transportation to waste treatment and resource recovery. A driving force for expansion of the privatization of public service facilities is the growth of sophisticated technology. With service activities such as resource recovery, which relies importantly on high-tech equipment, public agencies are finding it more cost-effective to enter into leasing or joint-venture arrangements with private vendors, who can adjust more quickly to the changing requirements of technology. Frankly, a financial incentive for these public-private partnerships is the ability to undertake capital finance at the lower coupon rates on tax-exempt bonds. The Treasury's recommendation will drastically retard, if not completely stop, this healthy trend of privatization for the delivery of essential public services.

Most importantly the Treasury's proposed restrictions on tax-exempt finance by State and local governments will probably have the net effect of decreasing rather than increasing the after-tax incomes of the average American taxpayer. Treasury has estimated that it will pick up an additional $13 billion of tax revenues over the 5 years 1986-90 through its municipal bond changes.

To begin with, this estimate of revenue gain is probably greatly overstated. An exhaustive analysis by the "big eight" accounting firm, Coopers and Lybrand, concludes that a more likely result will be a $2 billion gain over the 5-year period. But Federal revenue gain is only part of the equation. What will be the cost impact on State and local governments?

The Public Securities Association, which represents tne several hundred securities firms and banks which underwrite 95 percent of State and local debt obligations, estimates that, if enacted, the Treasury proposals will increase debt-service costs for States and localities for the period 1986-90 by approximately $40 billion. If essential public facilities are to be provided, there is only one way for State and local government to meet this higher borrowing cost and that is to increase user fees and tax levies. Whether we use the revenue estimate of the Treasury or of Coopers and Lybrand, the net result is an increase in the total tax bill—Federal, State and local—for most of our constituents.

What we will have is tax shifting from the Federal Government to State and local government. And in the process of shifting it is inevitable that a heavier burden will fall on lower income families, because user fees will always be more regressive than the Federal income tax rates. I trust most of our colleagues will agree that tax shifting of this sort from one level of government to another does not constitute genuine tax reform.

As all of us understand, the overhang of massive Federal deficits is requiring the Congress to mandate major cutbacks in direct Federal fiscal support for State and local government. The Budget Committee has reported a budget reconciliation resolution which terminates general revenue sharing. While Governors, mayors, and county officials have not welcomed these curtailments of Federal assistance, they, nevertheless, understand the demands which the Federal budget deficits impose on all elected public officials. What I think they will not understand, nor should we expect them to accept, are proposals, like the Treasury's restrictions on municipal bonds, which seriously impair their flexibility and capacity to respond to the added fiscal burdens confronting them.

Last, Mr. President, in the Deficit Reduction Act of 1984, we, in the Congress, imposed significant new restrictions on the growth of tax-exempt State and local bonds, specifically in the areas of industrial revenue bonds. We have permitted no reasonable interval to observe the operation of these restrictions. Mr. President, we cannot constantly fiddle with our Tax Code, for it seriously complicates financial planning by operating units in our economy, both public and private.

Mr. President, for the stated reasons, Senator DIXON and I hope that our colleagues will join with us in the sponsorship of this resolution calling for forbearance at the Federal level in changing the tax treatment of State and local bonds.

Mr. President, I ask unanimous consent that an article which appeared in the June 16, 1985 Boston Herald by Michael Hernandez, managing director of First Boston Corp., be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Boston Herald, June 16, 1985]

MUNICIPAL TAX EXEMPTION OUGHT TO BE PRESERVED

(By Michael D. Hernandez)

With the winds of tax reform blowing strongly in Washington, it is time to set the record straight about the Treasury Department's tax proposal. Although advertised with such appealing labels as "tax simplification" and "tax fairness," the Treasury plan would have serious public policy consequences if it is passed. What is particularly disturbing is that major portions of the Treasury proposal are based on an economic analysis that is in itself faulty.

If the Treasury proposal is implemented, it would cause extensive damage to state and local governments. Among other provisions, there would be severe restrictions on the federal tax exemption for interest on state and local government bonds. The supply of many existing forms of tax-exempt debt would likely decrease or be eliminated altogether, including industrial development bonds, student loan bonds, mortgage subsidy bonds, and bonds issued by certain tax-exempt and non-profit organizations (certain hospitals and universities, for instance). Public-private partnerships would in many cases no longer be feasible.

State and local governments would be faced with higher capital costs. In many cases they would be faced with having to raise taxes or fees, or would have to delay or cancel certain critical public purpose projects, including infrastructure improvements (highways, bridges, and the like).

It simply is not true—as the Treasury would have us believe—that a reduction in the total supply of tax-exempt bonds would lead to a significant increase in federal revenues. It is deceptive for the Treasury to attempt to "win over" Congress and the public to its plan by selling it as a means of reducing the federal deficit. In truth, an in-depth economic analysis of the tax-exempt market indicates that there would likely be little, if any, revenue growth to be derived from restricting the volume of tax-exempt financings.

Estimates by both the Congressional Budget Office (CBO) and the Treasury of revenue loss that can be attributed to tax-exempt bonds are inflated, in part because they are based on inaccurate assumptions about investors' portfolios. They assume that only investors in the highest tax brackets purchase tax-exempt bonds. Thus, they assume that if the supply of tax-exempt bonds were reduced, these investors would switch to fully taxable securities, and their new taxable interest income would be taxed at very high rates (45 percent to 50 percent). In fact, there are no data to support this conclusion, and there is a good deal of evidence to the contrary.

First, Federal Reserve data indicate that holders of tax-exempt securities can be found in many tax brackets. Thus, the assumption that only investors in the highest brackets would switch to fully taxable bonds if the supply of tax-exempt bonds were reduced is false, and the calculation of increased revenues from legislative restrictions is inaccurate.

Second, there is every reason to believe that high-tax-bracket investors would seek the many other tax advantaged investments available (especially capital gains on

common stocks, which are taxed at 40 percent of the earned income tax rate) prior to buying fully taxable securities.

Third, to the extent that there would be any movement to taxable investments, those individuals in the lowest tax brackets would be the first to shift.

Fourth, the CBO and Treasury estimates do not adequately take into consideration the offsetting federal revenue increases that occur when tax-exempt debt is utilized. These increases occur as the result of the lower interest cost deductions that are claimed and the new economic development that is kindled by tax-exempt bonds—economic development that increases corporate and personal income tax revenues derived from businesses and new employees.

Although the Treasury Department's most recent attack on the tax exemption is hardly the first—there have been assaults on the exemption both in Congress and in the courts since the early part of this century—the scope of the attack is wider and the potential damage far greater.

In the short run what is at stake is the immediate financial health of many states and localities. In the long run what is at stake is the inherent constitutional right of state and local governments to issue tax-exempt bonds to carry out their public purposes. Given the faulty economic basis of the Treasury Department's proposal, it is a debate which state and local governments should win easily on the merits. It is up to the public and Congress to see that they do.

Mr. DIXON. Mr. President, I am pleased to join my distinguished colleague from Georgia, Senator MATTINGLY, in proposing this sense of the Senate resolution urging the Congress to refrain from new tax actions affecting State and local bonds until we have had a reasonable interval to observe the impact of restrictions enacted last year in the Deficit Reduction Act of 1984.

Like many of my Senate colleagues, it has been my privilege to serve in State elective office, including the office of Illinois State Treasurer; and from this service I have a keen understanding of the cost-saving benefits States and localities receive from tax-exempt borrowing.

It has been alleged that some jurisdictions abused this special tax treatment by extending the privileges of State and local government borrowing to entities and activities operated by private, non-governmental organizations. In response to those allegations of abuse, Congress last year enacted corrective legislation to impose remedial restrictions, including volume limits applicable on a State-by-State basis.

However, before we have had any reasonable opportunity to see how effective those provisions are, the Treasury in its tax reform package has proposed a whole new series of additional restrictions. We are told that these new restrictions are also meant only to curtail abuses.

I do not believe these are proposals for remedying some marginal abuses, Mr. President. I think they are recommendations aimed right at the heart of tax-exempt borrowing by units of State and local government. According to experts who have analyzed the Treasury proposals, they would, if enacted, result in 80 percent of the typical annual volumes of State and local bonds being denied exemption from Federal income taxation.

I am confident that my colleagues in the U.S. Senate do not wish to enact this radical rescission of tax forbearance that traditionally obtained between the Federal Government and the States and their local governments.

It is appropriate, therefore, that the Senate express itself on this issue, and adopt the resolution offered by Senator MATTINGLY and myself. This resolution simply expresses the view that we should "go slow" in proposing additional changes in Federal tax laws applicable to bonds and other debt obligations issued by units of State and local government.

Mr. President, we are taking major actions—essential actions—in this Congress to reduce Federal spending and to control and ultimately eliminate the budget deficits that so endanger our economy. A number of these budgetary actions directly impact State and local government, imposing new cost burdens on them. As the Senator from Georgia has observed, Governors, mayors, and county officials, while not happy with these cuts in direct Federal assistance, nevertheless understand that these actions are essential if we are to bring the Federal budget back under control.

Likewise, Governors, mayors, and county officials understand and support the objectives of the effect to reform the Federal tax system. They, too, want a fairer and more equitable Tax Code, one that will encourage more efficient economic performance. They do not understand, though, and cannot support making changes in the Internal Revenue Code which instantly create fiscal burdens at the State and local level, additional burdens that will inevitably force increases in local taxes and user fees to support essential public services.

Yet this is just what will occur if we adopt the Treasury's recommendations relating to tax-exempt bonds. Their proposals will, at best, raise a relatively small amount in additional Federal tax revenues, while forcing States and localities to increase taxes and user fees to finance an additional $40 billion in interest costs on borrowings for essential public purposes such as health care, water and waste treatment, air pollution control, airport and harbor modernization, low and moderate income housing, economic development, and the like.

Mr. President, these particular recommendations of the Treasury are nothing more than "tax shifting" from one level of government to another. Such actions do not make our tax system fairer and they cannot be accurately described as tax reform. I join my distinguished colleague, Senator MATTINGLY, in urging Members of the Senate to cosponsor this resolution expressing our desire to protect the legitimate tax-exempt borrowing powers of State and local government.

AMENDMENTS SUBMITTED

LABOR, HEALTH AND HUMAN SERVICES, EDUCATION AND RELATED AGENCIES APPROPRIATION, 1986

PROXMIRE AMENDMENT NO. 835

Mr. PROXMIRE proposed an amendment to the bill (H.R. 3424) making appropriations for the Departments of Labor, Health and Human Services, and Education, and related agencies for the fiscal year ending September 30, 1986, and for other purposes; as follows:

On page 77, after line 3, insert:

SEC. 515. Notwithstanding any other provision of this Act, the total budget authority provided by this Act for payments not required by law shall be reduced by 5 percentum: *Provided*, That of the amount provided in this Act for each appropriation account, activity, and project for payments not required by law, the amount reduced shall not exceed 8 percentum.

BUMPERS AMENDMENT NO. 836

Mr. PROXMIRE (for Mr. BUMPERS) proposed an amendment to amendment No. 830, previously adopted by the Senate, to the bill H.R. 3424, supra; as follows:

On page 22, line 3 (as previously amended), strike out "$59,906,000" and insert in lieu thereof "$59,702,000".

WEICKER AMENDMENT NO. 837

Mr. WEICKER proposed an amendment to amendment No. 783 previously adopted by the Senate to the bill H.R. 3424, supra; as follows:

On page 36, line 18, strike out "$2,012,122,000" and insert in lieu thereof "$2,009,422,000".

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATION, 1986

EAGLETON (AND OTHERS) AMENDMENT NO. 838

(Ordered to lie on the table.)

Mr. EAGLETON (for himself, Mr. DANFORTH, Mr. CHILES, and Mr. CRANSTON) submitted an amendment intended to be proposed by them to the bill (H.R. 3244) making appropriations for the Department of Transportation and related agencies for the fiscal year

ending September 30, 1986, and for other purposes; as follows:

On page 30, immedately after line 24, add the following:

DISAPPROVAL OF PROPOSED DEFERRAL

The Congress disapproves the proposed deferral of budget authority (Deferral No. D86-21), pertaining to the Urban Mass Transportation Administration, as set forth in the message transmitted to the Congress by the President on October 1, 1985. This disapproval shall be effective on the date of enactment of this Act into law and the amount of the proposed deferral disapproved herein shall be made available for obligation.

Mr. EAGLETON. Mr. President, this amendment would disapprove the proposed deferral of some $223.6 million in funding for "new start" rail projects in five cities which Congress authorized last year.

The cities and the amounts affected are Los Angeles, $129 million; Miami, $71.5 million; San Diego, $11.3 million; Jacksonville, $1.8 million, and St. Louis, $10 million.

Mr. President, this proposed deferral has nothing to do with saving money. The administration makes it clear in its own deferral message that it fully intends to obligate the same $223.6 million for other transit projects which it believes have more merit. The only issue involved in this amendment is whether Congress or the bureaucrats at the Urban Mass Transportation Administration are going to set the priorities for the funding of new start rail projects. After thorough deliberation, Congress made its judgment. Some people in the administration disagree with Congress and want to set congressional directives aside through the device of this proposed deferral.

Mr. President, I will point out that the bill contains similar earmarks for new start rail projects.

To fail to disapprove this proposed deferral would make a mockery of the legislative process.

Mr. President, I have discussed this amendment with the distinguished chairman and the ranking minority member of the subcommittee and I believe that they are prepared to accept it.

OMNIBUS BUDGET RECONCILIATION ACT

CHAFEE (AND OTHERS) AMENDMENT NO. 839

Mr. CHAFEE (for himself, Mr. BINGAMAN, Mr. HATFIELD, Mr. STAFFORD, Mr. PELL, and Mr. BRADLEY) proposed an amendment to the bill (S. 1730) to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1986 (S. Con. Res. 32, 99th Cong.); as follows:

On page 372, strike out lines 5 through 10 and insert in lieu thereof the following:

SEC. 790. INCREASE IN TAX ON CIGARETTES.

(a) RATE OF TAX.—Subsection (b) of section 5701 of the Internal Revenue Code of 1954 (relating to rate of tax on cigarettes) is amended—

(1) by striking out "$8" in paragraph (1) and inserting in lieu thereof "$12"; and

(2) by striking out "$16.80" in paragraph (2) and inserting in lieu thereof "$25.20".

(b) FLOOR STOCKS.—

(1) IMPOSITION OF TAX.—On cigarettes manufactured in or imported into the United States which are removed before November 15, 1985, and held on such date for sale by any person, there shall be imposed the following taxes:

(A) SMALL CIGARETTES.—On cigarettes, weighing not more than 3 pounds per thousand, $4 per thousand;

(B) LARGE CIGARETTES.—On cigarettes, weighing more than 3 pounds per thousand, $8.40 per thousand; except that, if more than 6½ inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per thousand, counting each 2¾ inches, or fraction thereof, of the length of each as one cigarette.

(2) LIABILITY FOR TAX AND METHOD OF PAYMENT.—

(A) LIABILITY FOR TAX.—A person holding cigarettes on November 15, 1985, to which any tax imposed by paragraph (1) applies shall be liable for such tax.

(B) METHOD OF PAYMENT.—The tax imposed by paragraph (1) shall be treated as a tax imposed under section 5701 of the Internal Revenue Code of 1954 and shall be due and payable on December 2, 1985, in the same manner as the tax imposed under such section is payable with respect to cigarettes removed on November 15, 1985.

(3) CIGARETTE.—For purposes of this subsection, the term "cigarette" shall have the meaning given to such term by subsection (b) of section 5702 of the Internal Revenue Code of 1954.

(4) EXCEPTION FOR RETAILERS.—The taxes imposed by paragraph (1) shall not apply to cigarettes in retail stocks held on November 15, 1985, at the place where intended to be sold at retail.

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendment made by subsection (a) shall apply with respect to cigarettes removed after November 14, 1985.

(2) CONFORMING AMENDMENT.—Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended by striking out "and before November 15, 1985".

MITCHELL (AND OTHERS) AMENDMENT NO. 840

Mr. MITCHELL (for himself, Mr. COHEN, Mr. KERRY, and Mr. SIMON) proposed an amendment to the bill S. 1730, supra; as follows:

Beginning on page 421, line 8, strike out through page 422, line 21, and insert in lieu thereof the following:

(c) EFFECTIVE DATES.—

(1) HOSPITAL INSURANCE TAXES.—The amendments made by subsection (a) shall apply to service performed by an individual on or after his applicable effective date as determined under paragraph (3).

(2) MEDICARE COVERAGE.—

(A) IN GENERAL.—The amendments made by subsection (b) are effective with respect to an individual on and after his applicable effective date as determined under paragraph (3), and the amendment made by paragraph (2) of that subsection apply to service performed by an individual on or after his applicable effective date.

(B) TREATMENT OF CURRENT DISABILITIES.—For purposes of establishing entitlement to hospital insurance benefits under part A of title XVIII of the Social Security Act pursuant to the amendments made by subsection (b) or the provisions of subsection (d), on the basis of medicare qualified State and local employment, no individual may be considered to be under a disability for any period before his applicable effective date.

(3) APPLICABLE EFFECTIVE DATE.—An individual's applicable effective date is—

(A) October 1, 1986, in the case of an individual who is not an employee of a State or political subdivision (or instrumentality which is wholly owned thereby) on September 30, 1986; and

(B) October 1, 1987, in the case of an individual who is such an employee on September 30, 1986.

(d) TRANSITIONAL PROVISIONS.—

(1) IN GENERAL.—For purposes of sections 226, 226A, and 1811 of the Social Security Act, in the case of any individual who—

(A) Performs service during the October in which his applicable effective date occurs which constitutes medicare qualified State and local governmental employment (as defined in section 210(p)(1) of such Act); and

(B) performed service prior to his applicable effective date, which would constitute medicare qualified State and local governmental employment if performed after his applicable effective date,

such individual's State and local governmental employment performed before his applicable effective date shall be considered to be "employment" (as defined for purposes of title II of such Act), but only for the purpose of providing the individual (or another person) with entitlement to hospital insurance benefits under part A of title XVIII of such Act.

On page 372, strike out lines 5 through 10 and insert in lieu thereof the following:

SEC. 790. INCREASE IN TAX ON CIGARETTES.

(a) RATE OF TAX.—Subsection (b) of section 5701 of the Internal Revenue Code of 1954 (relating to rate of tax on cigarettes) is amended—

(1) by striking out "$8 per thousand" in paragraph (1) and inserting in lieu thereof "$10 per thousand ($8 per thousand after October 14, 1988)"; and

(2) by striking out "$16.80 per thousand" in paragraph (2) and inserting in lieu thereof "$21.00 per thousand ($16.80 per thousand after October 14, 1988)".

(b) FLOOR STOCKS.—

(1) IMPOSITION OF TAX.—On cigarettes manufactured in or imported into the United States which are removed before November 15, 1985, and held on such date for sale by any person, there shall be imposed the following taxes:

(A) SMALL CIGARETTES.—On cigarettes, weighing not more than 3 pounds per thousand, $2 per thousand;

(B) LARGE CIGARETTES.—On cigarettes, weighing more than 3 pounds per thousand, $4.20 per thousand; except that, if more than 6½ inches in length, they shall be taxable at the rate prescribed for cigarettes weighing not more than 3 pounds per thousand, counting each 2¾ inches, or fraction thereof, of the length of each as one cigarette.

(2) LIABILITY FOR TAX AND METHOD OF PAYMENT.—

(A) LIABILITY FOR TAX.—A person holding cigarettes on November 15, 1985, to which any tax imposed by paragraph (1) applies shall be liable for such tax.

(B) METHOD OF PAYMENT.—The tax imposed by paragraph (1) shall be treated as a tax imposed under section 5701 of the Internal Revenue Code of 1954 and shall be due and payable on December 2, 1985, in the same manner as the tax imposed under such section is payable with respect to cigarettes removed on November 15, 1985.

(3) *Cigarette.*—For purposes of this subsection, the term "cigarette" shall have the meaning given to such term by subsection (b) of section 5702 of the Internal Revenue Code of 1954.

(4) EXCEPTION FOR RETAILERS.—The taxes imposed by paragraph (1) shall not apply to cigarettes in retail stocks held on November 15, 1985, at the place where intended to be sold at retail.

(c) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendment made by subsection (a) shall apply with respect to cigarettes removed after October 14, 1985.

(2) CONFORMING AMENDMENT.—Subsection (c) of section 283 of the Tax Equity and Fiscal Responsibility Act of 1982 is amended by striking out "and before November 15, 1985".

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON NUCLEAR REGULATION

Mr. McCLURE. Mr. President, I ask unanimous consent that the Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Tuesday, October 22, 1985, in order to conduct a hearing on the extension of the Price Anderson Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. McCLURE. Mr. President, I ask unanimous consent that the permanent Subcommittee on Investigations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on October 22, 1985, in order to conduct a hearing on the Foreign Missions Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. McCLURE. Mr. President, I ask unanimous consent that the Subcommittee on Intergovernmental Relations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Tuesday, October 22, 1985, in order to conduct a hearing on the innovative State and local programs, to expand choices in education.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON EMPLOYMENT

Mr. McCLURE. Mr. President, I ask unanimous consent that the Employment Subcommittee of the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Tuesday, October 22, to conduct a hearing on the effect of trade on unemployment.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Tuesday, October 22, to conduct a meeting on the nominations of Vernon Grose, John Lauber, and Kenneth Hill, to be members of the National Transportation Safety Board.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

SCS PROJECTS AUTHORIZED

● Mr. STAFFORD. Mr. President, I would like to inform my colleagues of recent action taken by the Committee on Environment and Public Works with respect to certain small watershed projects of the Soil Conservation Service.

As my colleagues are aware, approval of Public Law 566 projects do not require an act of Congress for authorization; rather, they are authorized by resolutions of the Senate and House Public Works Committees.

Because of the importance of this action to the Senate and several of my colleagues, the Committee on Environment and Public Works announces such action in the RECORD and issues a report in the form of a committee print.

On October 10, 1985, the committee approved resolutions authorizing the construction of two projects: English Coulee watershed, North Dakota, and West Fork of Big Creek, IA and MO.

In addition, the committee approved a request by the Soil Conservation Service to raise the authorized cost ceilings on four previously authorized small watershed projects: South Fork watershed, Arkansas; Zuni Pueblo watershed, New Mexico; upper Muddy Boggy Creek watershed, Oklahoma; and upper and Mud River watershed, West Virginia.

I ask that the text of the approved committee resolutions and the letter to Secretary Block reporting the committee's action regarding the requested cost ceiling increases, be printed in the RECORD.

The material follows:

U.S. SENATE, COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS,
Washington, DC, October 16, 1985.

Hon. JOHN R. BLOCK,
Secretary, U.S. Department of Agriculture, Washington, DC.

DEAR MR. SECRETARY: In testimony before the Subcommittee on Water Resources of the Committee on Environment and Public Works on September 26, 1985, the Soil Conservation Service indicated that the cost of four small watershed projects previously authorized by Congress would exceed the authorized levels and would therefore need the consent of the Committee to complete their construction. The SCS also requested that the Committee approve resolutions authorizing construction of two new small watersheds projects.

The Committee on Environment and Public Works voted on October 10, 1985, to approve the higher cost levels of the previously authorized Public Law 83-566 projects listed below. The new cost limits will be the Federal cost listed, plus or minus such amounts, if any, as may be justified by reason of the fluctuation in the costs of construction, as indicated by engineering cost indices applicable to the type of construction involved.

No construction on any of these projects shall go forward unless the economic benefits of the project exceed the costs of proceeding to project completion. The previously authorized projects for which higher cost levels were approved are:

South Fork Watershed, Arkansas—$5,300,000, (using January 1985 prices);

Upper Muddy Boggy Greek Watershed, Oklahoma—$11,500,000, (using January 1985 prices);

Upper Mud River Watershed, West Virginia—$7,300,000, (using January 1985 prices);

Zuni Pueblo Watershed, New Mexico—$11,700,000, (using January 1985 prices).

In addition, the Committee also approved resolutions authorizing the English Coulee Watershed and West Fork of Big Creek Watershed projects. Copies of these resolutions, as approved, are attached.

We would appreciate your keeping this committee informed of progress on these projects.

Sincerely yours,

ROBERT T. STAFFORD,
Chairman.
LLOYD BENTSEN, *Ranking Minority Member.*

COMMITTEE RESOLUTION

Resolved by the Committee on Environment and Public Works of the United States Senate, That pursuant to the provisions of Section 2 of Public Law 566, Eighty-third Congress, as amended, the project for flood prevention and watershed protection, in the English Coulee Watershed, Grand Forks County, North Dakota, is hereby approved substantially in accordance with the report of the Soil Conservation Service, Department of Agriculture, dated January, 1983, with the conditions that (1) the approval of appropriations for the project be limited to—$2,493,500—the estimated Federal cost of the project as shown in the work plan for such project updated to current price levels, plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuation in the cost of construction as indicated by engineering cost indexes applicable to the type of construction involved; and (2) the purposes served by the project shall be those set forth in the watershed work plan submitted for the project and the scope of

the project purposes and of the project shall be substantially as set forth in such work plan.

ROBERT T. STAFFORD,
Chairman.
LLOYD BENTSEN,
Ranking Minority Member.

COMMITTEE RESOLUTION

Resolved by the Committee on Environment and Public Works of the United States Senate, That pursuant to the provisions of Section 2 of Public Law 566, Eighty-third Congress, as amended, the project for flood prevention, recreation, agricultural and municipal water supply, and watershed protection, in the West Fork of Big Creek Watershed, Ringold and Decatur Counties, Iowa, and Harrison and Daviess Counties, Missouri, is hereby approved substantially in accordance with the report of the Soil Conservation Service, Department of Agriculture, dated June, 1984, with the conditions that (1) the approval of appropriations for the project be limited to—$14,238,400—the estimated Federal cost of the project as shown in the work plan for such project updated to current price levels, plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuation in the cost of construction as indicated by engineering cost indexes applicable to the type of construction involved; and (2) the purposes served by the project shall be those set forth in the watershed work plan submitted for the project and the scope of the project purposes and of the project shall be substantially as set forth in such work plan.

ROBERT T. STAFFORD,
Chairman.
LLOYD BENTSEN,
Ranking Minority Member.●

NICARAGUAN ABRIDGEMENT OF CIVIL LIBERTIES

● Mr. BENTSEN. Mr. President, over these past months, as we have debated the question of what our national policy toward Nicaragua ought to be, many of us have expressed our concern about the direction that the Sandinistas seemed to be taking the Government of that country. We expressed the view that as self-avowed Marxist-Leninists, the Sandinistas did not come out of a political tradition that encouraged pluralism and dissent. Indeed, it appeared to many of us that the few signs of political tolerance and respect—even minimal respect—for opposition views in Nicaragua were designed more as a public relations ploy than as any kind of indication of what would happen if the Sandinistas succeeded in consolidating their power.

Troubling episodes like the continuing intermittent censorship of La Prensa, the one opposition newspaper in Nicaragua, and a refusal to allow the homilies of Cardinal Miguel Obando y Bravo to be broadcast without prior submission to the Government censor were dismissed by the Sandinista leadership as merely "excesses of the bureaucracy" or "military necessity." The cynicism of the nine Commandantes became quite evident when patterns of censorship were examined: lesser censorship as congressional votes on aid to the Contras was imminent, followed by a greater imposition of censorship when the votes were done.

Nevertheless, critics of U.S. policy toward Nicaragua could somehow comfort themselves with the belief that things were not as bad there as they might have been, and that overall there was reason to hope that the situation might improve with time. Such hope received a cruel blow this past week when Nicarguan President Daniel Ortega announced a new and far-ranging "State of Emergency." An indication of the extent of his actions is evident in the titles to editorials in two of our Nation's leading newspapers: "Nicaragua Bares the Nightstick," was the way the New York Times—October 18—analyzed it, while the Washington Post—October 21—addressed its editorial to "Regression in Nicaragua."

Neither of these newspapers has a history of strong support for the administration's policies toward Nicaragua; the opposite would be close to the truth. But Ortega's actions were so outrageous that reasonable people all across the political and ideological spectrum have cause to be troubled by what is happening in Nicaragua.

The state of emergency declared by Ortega on October 15 was but the culmination of a month of repressive actions by the Sandinistas, primarily directed against the Roman Catholic Church and its dynamic leader, Cardinal Obando y Bravo. This period began on September 12 when armed Sandinista officials raided the studios of Radio Catolica and stopped the broadcast of the cardinal's prerecorded homily. A La Prena article reporting the raid was censored. On September 25 armed Sandinista officials again raided the studios of Radio Catolica and again interrupted the broadcast of the cardinal's homily. On September 26, the Ministry of the Interior informed the church that the mass could not be broadcast without prior censorship.

On October 10 the church was informed that its new newspaper La Iglesia was required to register with the Ministry of the Interior. The church protested that this would result in prior censorship. On October 12, the first issue of La Iglesia was published. Trucks carrying copies of the newspaper to churches were stopped by police and the copies were confiscated. The driver was forced to retrace his route, and previously-delivered copies were also confiscated. Armed guards then went to the church offices and took the remaining copies of the newspaper, together with printing equipment, printing plates, and negatives. In response, the church then submitted the application for registering La Iglesia to the Ministry of the Interior. The application was rejected, and authority to publish was denied.

Finally, on October 15, came Ortega's sweeping announcement of new or reinstated measures that could end virtually all of the remaining civil liberties in Nicaragua. Under these new measures, Nicaraguans can no longer form labor unions or go on strike; can no longer hold rallies or demonstrations; and can no longer move freely throughout the country or live where they wish. Ortega's decree also suspended for 1 year the right to a speedy trial; the right to appeal convictions; the right against imprisonment except for cases specified in law; presumption of innocence until proven guilty; right to privacy of mail; and the right to refuse to incriminate oneself.

Apologists for the Sandinistas may well echo the official Nicaraguan line in suggesting that the Government of Nicaragua was driven into these actions by the military activities of the Contras. This is ironical in light of the official Sandinista pronouncement that the Contras are on the verge of defeat.

I would suggest instead that they were driven to these actions by the growing expressions of discontent in Nicaragua and the Sandinista realization that the Contras are a force which is accumulating the strength needed to mount major military operations against the Soviet-supplied Sandinista army. Resistance to the reimposition of the draft and the growing outspokenness of the token political opposition were strong indications that the Sandinistas are losing their hold on the populace in Nicaragua. Ortega's actions are the traditional response of a totalitarian state when it is confronted with internal opposition, and given the models set for him by his Cuban, East German, Bulgarian, and Soviet advisers, it is unrealistic to have expected him to react in any other way.

Virgilio Godoy, the respected head of the Independent Liberal Party in Nicaragua, announced that Ortega's actions were a "near-fatal blow to the political process in Nicaragua," and I do not see how they can be read any differently. Anyone who had the slightest doubts about the direction the Sandinistas are taking Nicaragua should have had them removed by these latest actions; and anyone who has wondered about what would happen in Nicaragua if the pressure exerted by the Contras were removed should have had their eyes opened. If there is one lesson to come out of this for those of us who will have to make decisions next year on further support for the Contras, it is that we have seen what the future would be, Sandinista-style.●

TRIBUTE TO ROBBIE LYLE

● Mr. BUMPERS. Mr. President, I would like to take this opportunity to congratulate Robbie Lyle on her selection as president of the National Council of Educational Opportunity Associations. She is currently director of Upward Bound and other special services at Arkansas State University in Jonesboro, AR.

The success of the Upward Bound Program at ASU is due in no small part to Robbie's boundless energy and determination, so it seems especially fitting that she will serve as president of NCEOA during the 20th anniversary of Upward Bound. It is typical of her dedication and hard work that she was able to bring a group of students to Washington recently, a trip they hardly expected when they entered the program. Many of these students had never been outside Arkansas, and without Robbie's leadership would never have had this chance to expand their horizons.

Recently Robbie appeared before the Senate Labor and Human Resources Subcommittee on Education, Arts and Humanities to speak in support of the TRIO programs. These programs have been remarkably successful in achieving their goals. They provide nonfinancial assistance, such as information, tutoring, counseling, academic advice, as well as remedial and supplemental instruction, to low-income students and those who will be the first in their family to attend college. Upward Bound graduates are four times as likely to receive a baccalaureate degree as students in similar circumstances who do not have the benefit of these services.

Far too often the contributions of our educators go unrecognized. Too often we hear more about the problems or the shortcomings of a few than about the priceless work the vast majority do for our very future, our children. I believe the achievements of the Robbie Lyles of our schools and colleges should be brought to the public's attention more often. Robbie will bring to the NCEOA the same energy, creativity, and determination that has been vital to the success of the TRIO programs which she directs. With her experience and her ability to lead, the National Council of Educational Opportunity Associations will continue to make significant contributions to the future of our students.●

MISSION FOR COUSTEAU

● Mr. CHILES. Mr. President, we have all heard the axiom that timing is everything. In the Senate, we are fully aware of the momentum and timing of a particular piece of legislation, for oftentimes it can mean the difference between its defeat and final passage. Candidates running for political office take great pains to avoid peaking too early or too late in their political campaigns. Negotiators sitting at a bargaining table temper their responses, and wait for the appropriate time to tender an offer or agree to a compromise.

With this in mind, I believe we need to look at the timing of Jacques Cousteau's trip to Cuba. In late October, Cousteau is scheduled to visit the island. As a guest of Fidel Castro, this renowned marine explorer will have the opportunity to continue his oceanographic projects in Cuba. He will also have the opportunity to meet with Fidel Castro. What better time to bring up the subject of Cuba's political prisoners? We need only recall recent past visits by celebrities and officials to remind ourselves that while they offer Fidel Castro opportunity to play for the cameras, they also have resulted in the release of Cuban political prisoners.

Mr. Cousteau's trip and request for freedom of political prisoners may provide Castro the opportunity to masquerade as humanitarian and defender of human rights. Let Mr. Castro ham it up. The facade will not last. His release of a few will not erase the fact there are thousands more imprisoned in Cuba. Nevertheless, his release of a few will mean freedom to a handful of Cubans who have been denied liberty far too long. I believe the timing is right to make such a request. And Jacques Cousteau, a man revered by citizens of all countries of the world, is the person to make this request.

On the House side, a letter initiated by Congressman LARRY SMITH and signed by 37 Congressmen has been sent to Cousteau. This letter makes note of Cousteau's special commemoration by President Reagan as a recipient of the U.S. Medal of Freedom and highlights the fact that freedom is routinely denied to thousands of Cubans in Castro's jails. Cousteau's involvement is requested in the cases of Ariel Hidalgo, Richardo Bofill, and Santos O. Mirable, long-term political prisoners.

I would like to add my voice in support of this effort. The plight of the Cuban political prisoner is not an easy one. Fidel Castro solely holds the key to his freedom. As we seek opportunities for the freedom of Cuba's political prisoners, the Cousteau trip may prove to be an appropriate vehicle of liberty for a chosen few. I believe it to be worthy of pursuit.

Mr. President, I ask that the text of the articles from the Miami Herald and New York Times be printed in the RECORD.

The articles follow:

[From the Miami Herald, Oct. 17, 1985]

MISSION FOR COUSTEAU

Some people grow roses in order to give a cut flower as a parting gift to visiting friends. Fidel Castro doesn't grow roses in Cuba to give visiting dignitaries. Instead, he keeps hundreds of long-term political prisoners in dungeons so that when an important visitor comes he can release a few of them as proof of his concern for human rights.

Mr. Castro has been practicing this cruel form of gardening for more than a decade. He released 26 prisoners last year to the Rev. Jesse Jackson. He has released prisoners to please Regis Debray, a former French guerrilla fighter who now holds a high office in France's Socialist government, and in response to American congressmen.

Another such opportunity will present itself when Jacques-Yves Cousteau. French undersea explorer and citizen of the world, visits Cuba on Oct. 25. The Cuban-American National Foundation has urged Mr. Cousteau specifically to ask Mr. Castro to free three long-term captives: Ariel Hidalgo, Ricardo Bofill, and Santos Mirabal. Two of them—Mr. Bofill, a university professor, and Mr. Mirabal, arrested in his teens in 1966—have been singled out for attention by Amnesty International's latest report on human-rights violations.

In theory, Mr. Castro should be asked to release all political prisoners. That is unrealistic, however. For 26 years Mr. Castro has jailed and executed political opponents on whim. Time and again he has proven that only he holds the key to Cuba's jails. He decides who should be jailed, who should be kept in jail even after completing a sentence, and who should be released.

Mr. Cousteau should ask his Cuban host to release all long-time political prisoners, a group that Amnesty International estimates numbered 140 at the end of 1964. But, if Mr. Castro limits his largesse to two or three, it would be appropriate for Mr. Cousteau to ask for the release of the three men mentioned by the Cuban-American National Foundation. Every political prisoner to escape the dungeons in Cuba is one less person that Mr. Castro can use to traffic in human suffering.

[From the Miami Herald, Oct. 7, 1983]

CUBA JAILS PROF AIDED BY FRENCH

(By Barbara Gutierrez)

A former associate dean of Havana University who sought refuge in the French Embassy in Havana has apparently been jailed by the Cuban government after his safety was pledged to French officials.

According to Miami resident Maria Elena Bofill, her husband, Ricardo Bofill, a member of the Communist Party until 1967, when he was arrested for anti-Castro activities was seized Saturday at a friend's.

"I'm truly desperate, because as far as I know he has disappeared," she said.

"We've heard reports of his arrest, and it's probably correct," said a State department spokesman who asked not to be named. "Insofar as our people over there tell us, it is correct."

According to Mrs. Bofill, French President Francois Mitterrand had intervened on behalf of Bofill, who was released last year after serving 7½ years for his alleged involvement with an anti-Castro splinter group within the Communist Party.

Bofill attempted to seek refuge in the French Embassy in Havana on April 29 after several months of persecution by the government, his wife said.

While Bofill remained inside the embassy, Cuban guards surrounded the compound, she said. This led Ambassador Pierre Descamps to speak to Cuban Vice President Carlos Rafael Rodriguez on behalf of Bofill. Rodriguez "gave his word of honor that he

[Bofill] would not be bothered," his wife said.

[From the New York Times, Sept. 29, 1983]

CUBA SAID TO JAIL ACADEMIC, UPSETTING THE FRENCH

(By John Vinocur)

PARIS, September 29.—Cuba has arrested the former vice rector of the University of Havana after promising France that he would be allowed to leave the country, French officials say.

The arrest last Saturday of Ricardo Bofill has caused considerable irritation and some embarrassment to the Socialist Government, which has sought to maintain good relations with the Castro regime. Three of President Francois Mitterrand's Cabinet ministers have traveled to Cuba in the past year, and the possibility of a visit to France by Fidel Castro has been a recurring theme in the French press.

The case involves an attempt by Mr. Bofill to seek refuge in the French Embassy in Havana on April 29. While pursuing an unusually successful academic career, Mr. Bofill became disillusioned with the Castro Government and was accused of belonging to an anti-Castro faction within the Communist Party. Since 1967 he has received two prison sentences and served more than seven years in jail.

According to his wife, who lives in Miami, Mr. Bofill went to the French Embassy because he had been threatened by telephone and his mail had been intercepted. Once he was there, she said in a telephone conversation today, the embassy was surrounded by security policemen.

She said she knew nothing of his activities in the intervening period, but learned of his disappearance on Saturday and was told on Monday that he had been arrested.

ON CUBAN RESPONSE

On Tuesday Francois Gutmann, the second-ranking official at the Foreign Ministry here, summoned the Cuban Ambassador, Alberto Boza, to "request information in relation to the present rumors concerning Mr. Ricardo Bofill." The use of the word "rumors" was a diplomatic euphemism because French officials privately confirmed Mr. Bofill's arrest.

A spokesman for the ministry said today there had been no Cuban response to the request as yet.

French anger about the situation appeared linked to the fact that the Cubans had broken their word and apparently waited to arrest Mr. Bofill until Foreign Minister Claude Cheysson completed a planned visit to Havana in August. In addition to Mr. Cheysson, Transport Minister Charles Fiterman, a Communist, and Jack Lang, Minister Delegate for Cultural Affairs, have visited Cuba in the last 14 months.

The opposition press here has seized on the affair, and today Le Quotidien de Paris asked in a headline, "Did the French Embassy 'turn over' an anti-Castro opposition figure to the Cubans?" An earlier statement by the ministry of External Relations here said Mr. Bofill left the French Embassy of his own accord.

Last year the Socialist Government played an important role in obtaining the release from prison in Cuba of the anti-Castro poet Armando Valladares. This time, said Fernando Arrabal, the Spanish writer, who lives in Paris and has corresponded with Mrs. Bofill, the Government behaved with unusual naivete.●

NATIONAL DAY OF RECOGNITION P.O.W/M.I.A.

● Mr. MATTINGLY. Mr. President, yesterday, I introduced Senate Joint Resolution 220, providing for the designation of September 19, 1986, as "National P.O.W./M.I.A. Recognition Day." The resolution was cosponsored by Senators MURKOWSKI, THURMOND, HOLLINGS, and DIXON. I ask that the text of the resolution be printed in the RECORD and that the permanent RECORD be corrected to reflect the printing of the resolution's text following my remarks on the day of introduction.

The resolution follows:

S.J. RES. 220

Whereas the United States has fought in many wars;

Whereas thousands of Americans who served in such wars were captured by the enemy or are missing in action;

Whereas many American pirsoners of war were subjected to brutal and inhuman treatment by their enemy captors in violation of international codes and customs for the treatment of prisoners of war and many such prisoners of war died from such treatment;

Whereas many Americans are still listed as missing and unaccounted for and the uncertainty surrounding their fate has caused their families to suffer acute hardship; and

Whereas the sacrifices of American prisoners of war and Americans missing in action and their families are deserving of national recognition: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That September 19, 1986 shall be designated as "National P.O.W./M.I.A. Recognition Day", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to commemorate such day with appropriate activities.●

BUFFALO FOUNDATION ENJOYS NOBEL LIMELIGHT

● Mr. MOYNIHAN. Mr. President, we all shared in the excitement surrounding the announcement of the Nobel Prize winners last week. In New York, as I have noted previously in the RECORD, Dr. Herbert A. Hauptman of the Medical Foundation of Buffalo won the Nobel in chemistry. Dr. Hauptman's achievement has brought long-deserved recognition and publicity to that small but excellent research institute.

I was particularly pleased to read in the New York Times Sunday the story of the Medical Foundation's newfound fame. Mr. President, it is gratifying to see credit given where it is so rightly due. I commend this article to the attention of the Senate, and ask that it be printed in the RECORD.

The article follows:

BUFFALO FOUNDATION ENJOYS NOBEL LIMELIGHT

BUFFALO, Oct. 19—As dozens of reporters and photographers began to pour into the Medical Foundation of Buffalo on Wednesday, someone asked Jane F. Griffin, a research scientist, if there had ever been a news conference there before.

"Are you kidding?" Dr. Griffin answered. "Nobody even knew we existed."

That situation has changed dramatically since the announcement Wednesday that the foundation's research director, Dr. Herbert A. Hauptman, had shared the 1985 Nobel Prize in chemistry.

Suddenly, Dr. Hauptman is a celebrity. And the research center—which has specialized in endocrinology, the study of the body's glands—is sharing in the recognition after nearly three decades of anonymity to people in the Buffalo area.

"It's magnificent!" said William L. Duaz, an associate research director. "It just about blew the roof off this place."

BEGINNINGS IN CARRIAGE HOUSE

The research center was begun in 1956, when endocrinology, according to the center's founder, Dr. George F. Koepf, "wasn't much more than looking at a dwarf and knowing that something had gone wrong with his glands."

Dr. Koepf, a Buffalo-born internist, was fascinated by the possiblities of studying the human body's glands and the hormones they produce. When a wealthy patient whom he had treated provided a $3 million endowment, Dr. Loepf and two colleagues opened the center in a carriage house behind one of the mansions on Buffalo's stately Delaware Avenue.

By the 1970's, the staff had grown to its present level of about 50 members, half of whom hold Ph.D's. It had also moved to an unassuming office building on the city's East Side, where it now occupies four floors.

The building is in the shadow of Buffalo General Hospital and in the same neighborhood as the Rosewell Park Memorial Institute, a well-known cancer research hospital.

"Because of where we're located and the esoteric nature of our work, people think that we're part of Roswell Park," Dr. Griffin said. In fact, the foundation remains a small, private organization financed largely by grants from the National Institute of Health and the National Science Foundation, but also through private contributions.

With greater national and international recognition than in the Buffalo area, according to Dr. Duax, the foundation holds twice-annual open houses to combat the identity problem.

Dr. Hauptman's specialty, crystallography—the study of crystals, specifically in such bodily substances as hormone molecules—has become very significant in scientific circles. As a result, the foundation, with the largest X-ray crystallography staff in the nation, has become "extraordinarily well known for a place of its size," Dr. Duax said.

CORDUROYS AND SNEAKERS

The foundation has gained recognition for more than Dr. Hauptman's development of mathematical approaches to speed the analysis of crystal structures. It also developed a quick method of ascertaining the presence of steroid hormones in pregnant women, an indication of possible health problems for the unborn child during the late stages of pregnancy. Researchers at the center also have made important advances in studying how the hormone estrogen is made in the body.

The nature of the work may be unfamiliar, but the working atmosphere at the foundation is comfortable.

"It's a casual place where people come to work in corduroys, sneakers and flannel shirts, and socialize with each other after work," Dr. Griffin said. The average age of staff members is 33 or 34 years old, she said.

Since last week's announcement, things may never be the same at the foundation, but Dr. Duax said he did not expect the staff to change its determined focus.

"Maybe it's an obsession, but 24 hours after the announcement, everybody was back in the laboratory or in front of a computer terminal," he said.●

DAR CHAPTER—ANDERSON, IN

● Mr. LUGAR. Mr. President, I rise in recognition of the Kik-tha-we-nund Chapter of the National Society of Daughters of the American Revolution (NSDAR) in Anderson, IN.

This is an active DAR chapter that is in constant search of information to help its membership be better, more well-informed Americans. Since 1890, the DAR has promoted historical, educational, and patriotic work throughout the United States and abroad. The DAR has done much for the preservation of historic places and education, always forwarding the great spirit of America.

I salute in particular the Anderson DAR vice regent, Mrs. William C. Dearing. Since 1976, Mrs. Dearing has been a model member and citizen providing leadership in her previous roles as chapter recording secretary and registrar. She continues to be a contributing factor to the Anderson DAR, her community, and her Nation.

I wish the chapter well in its meeting on October 30, 1985, and I charge it before this great body to continue its steady course.●

ORNL SCIENTIST RECEIVES 1985 E.O. LAWRENCE AWARD

● Mr. SASSER. Mr. President, Dr. Anthony P. Malinauskas, a physical chemist at the Department of Energy's Oak Ridge National Laboratory, has been named by Secretary of Energy John S. Herrington as one of six national recipients of the 1985 Ernest Orlando Lawrence Memorial Award for outstanding contributions in the field of nuclear energy.

The Lawrence Award was established in December 1959 to honor the memory of Dr. E.O. Lawrence, who invented the cyclotron and established the two major laboratories at Berkeley and Livermore, CA, that now bear his name.

The awards are given to U.S. citizens who are relatively early in their careers and have made recent meritorious contributions to the development, use, or control of nuclear energy. The work may be in any area of science related to nuclear energy, including medicine and engineering.

Secretary Herrington will present the Lawrence Awards at a special ceremony to be held in DOE's Forrestal Building auditorium on November 25, at 3:30 p.m.

Mr. President, I ask that the biographical information about Dr. Anthony P. Malinauskas be printed in the RECORD.

The material follows:

BIOGRAPHICAL INFORMATION—ANTHONY P. MALINAUSKAS

Dr. Anthony P. Malinauskas was born in Ashley, PA, on March 24, 1935. He graduated from King's College (Pennsylvania) in 1956. He received his Ph.D. in physical chemistry from the Massachusetts Institute of Technology in 1962, after which he joined the research staff of the Reactor Chemistry Division, Oak Ridge National Laboratory (ORNL). In 1966 he became Group Leader of the Gas Transport Properties Group, a position he held until 1973 when he was named Section head of the Chemical Development Section. Since 1983 he has been Director of the U.S. Nuclear Regulatory Commission programs at ORNL.

Anthony Malinauskas has made many innovative technical contributions in diverse areas of science. He conducted gaseous diffusion experiments in order to explore how gas molecules pass through solids. He was instrumental in the development of the first mathematically rigorous and consistent theory of gas transport in porous media, called the "dusty gas model." He performed the first series of experiments designed specifically to measure the efficiency of inelastic molecular collisions in the transfer of energy between translational and rotational degrees of freedom using the phenomenon known as "thermal transpiration." This work led to the development of the first consistent treatment of "slip" in aerosol motion.

Dr. Malinauskas has also made many significant contributions in the area of nuclear reactor safety; he was the first to recognize the possible formation of "oxyhydroxide" compounds which could enhance the volatility of some of the fission product oxides, and has conducted studies of such oxyhydroxide formation with tellurium dioxide. His analysis of fission product transport phenomena in high temperature gas-cooled reactors and in molten salt reactors provided insights into safety issues associated with these potentially important systems.

A major concern during the accident at the Three Mile Island Unit-2 (TMI-2) nuclear reactor was the anticipated release of large quantities of radioactive iodine and its ingestion by the local populace. Surprisingly little radioiodine actually escaped into the atmosphere, a key issue identified by the President's Commission that investigated the accident. Dr. Malinauskas, working with D. O. Campbell at Oak Ridge National Laboratory (ORNL) and W. R. Stratton at Los Alamos National Laboratory, accounted for the anomaly by showing that the most likely chemical form of the fission product was an iodide, and not elemental iodine, as was previously assumed in light water reactor safety analyses. This indicated that the Regulatory Guides concerning iodine behavior in design basis accidents would significantly overstate radioiodine releases to the biosphere in those accidents where large quantities of water are present and where the containment structure remains largely intact. This finding helped trigger the current, massive international effort to reexamine the so-called "source term" for the analysis of consequences of nuclear reactor accidents. Dr. Malinauskas also directed the effort that led to the development and testing of the approach that was used successfully to decontaminate some 700,000 gallons of highly radioactive primary coolant from TMI-2.

Dr. Malinauskas is a member of the American Chemical Society, the American Physical Society, the American Nuclear Society, and Sigmi Xi, the honorary research society.●

CHILD IMMUNIZATION

● Mr. D'AMATO. Mr. President, I rise today in support of legislation introduced by my distinguished colleagues, Senators LUGAR and PELL, which seeks to immunize all of the children in the world by 1990. I commend my colleagues on this proposal, and I pledge my full support in working toward this cause.

Senate Resolution 227 calls for a joint United States-Soviet effort to achieve worldwide child immunization by 1990. This is an ambitious goal diplomatically and logistically. The Soviet Union and the United States have been involved in very few joint humanitarian efforts. This legislation would encourage those efforts and would possibly proliferate better relations between the Eastern and Western blocs.

Additionally, this legislation focuses on a worthy and feasible cause—improving the health of the children all over the world. This is an enormous task. Over 4 million children die every year from diseases that could be prevented by immunization. Many of these diseases—like polio, measles, whooping cough, diphtheria, tetanus, and tuberculosis—are combatable diseases. In other words, these 4 million deaths can be eliminated through a fairly simple vaccination.

Logistically, immunization of all children in the world is difficult. An immunization program can only be effective when it is endorsed by the governments of each recipient country. This endorsement is increasing hard to get because many of the countries which need immunization have significant overpopulation problems. Housing, unemployment, health, and education—all volatile political issues—suffer as a result of overpopulation. Consequently, immunization is not possible until a government can be convinced that immunization is in the best interests of the country. This is an ambitious goal, but not an overwhelming one. A joint United States-Soviet effort certainly would make an impact on many needy countries.

An additional barrier to worldwide immunization is reaching those individuals who vitally need the immunization. Most countries and areas which are marked by high rates of child death are quite remote. Transport is difficult and medical resources are scarce.

Furthermore, some degree of continuity is necessary in order for an immunization program to be effective. A child must be vaccinated a number of times in order to be immune from disease. Continually reaching these individuals is difficult in the Third World. Communication is poor and individuals do not always value medical treatment.

Although there are enormous barriers to worldwide immunization, there are significant gains to be made. I am convinced that with a concerted effort, these gains are possible and attainable.

I call on my colleagues to support this bill in an effort to jointly promote the health and welfare of the children of the world.●

ORDERS FOR WEDNESDAY

RECESS UNTIL 8:30 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that, once the Senate completes its business today, it stand in recess until the hour of 8:30 a.m. on Wednesday, October 23, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I further ask unanimous consent that, following the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business not to extend beyond the hour of 9 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, following routine morning business, it will be the intention of the majority leader to turn to the consideration of H.R. 3244, the Department of Transportation appropriations bill. Votes are expected prior to the hour of 12 noon in relation to H.R. 3244, though I am advised by the managers that there really are not many amendments, at least that have been brought to their attention. It could be that we could take care of many of those amendments between the hour of 9 and before any vote occurred.

Mr. BYRD. Mr. President, may we have order in the Senate? It is difficult for the official reporter to understand what the majority leader is saying.

The PRESIDING OFFICER. There will be order in the Senate.

The majority leader.

Mr. DOLE. Mr. President, as I was indicating, it is my hope that we could dispose of all of the noncontroversial amendments by voice vote early on when we get to the DOT appropriations bill—there are a number of those—then rollcall votes could be delayed. But that will be the call of the managers and they have indicated that they would be prepared to start, unless there is some objection, at 9 a.m.

Then in the afternoon, it would be the intention of the majority leader to resume consideration of S. 1730, the reconciliation bill, and votes can be expected throughout the day on Wednesday, October 23.

I think it is fair to say that we could be here well into the evening. We would like to finish the reconciliation bill tomorrow so on Thursday morning, if everything works well, we could go to State Department and Justice. And then on Thursday afternoon, depending on what happens with the textile bill—there is some talk about that being placed in the reconciliation bill, but if that does not happen—we will go to the Micronesia bill.

RECESS UNTIL 8:30 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move the Senate stand in recess until the hour of 8:30 a.m., Wednesday, October 23.

The motion was agreed to; and, at 7:21 p.m., the Senate recessed until tomorrow, Wednesday, October 23, 1985, at 8:30 a.m.

NOMINATIONS

Executive nominations received by the Senate October 22, 1985:

THE JUDICIARY

Alan B. Johnson, of Wyoming, to be U.S. district judge for the district of Wyoming vice a new position created by Public Law 98-353, approved July 10, 1984.

IN THE ARMY

The U.S. Army Reserve officer named herein for appointment as a Reserve commissioned officer of the Army, under the provisions of title 10, United States Code, sections 593(a) and 3384:

To be brigadier general

Col. Harvey G. Gulley, [redacted].

IN THE NAVY

The following-named U.S. Naval Reserve officers, to be appointed permanent lieutenant commander in the line of the U.S. Navy, pursuant to title 10, United States Code, section 531:

Beaufort, Barry Wayne
Benn, Charles Michael
Lefler, Carl J., Jr.
McCrae, James A.
Nelson, Patrick Andrew
Parker, Charles W.
Ries, Jerome Roland
Tune, John E.
Vetter, Thomas Greg

The following-named U.S. Naval officers, to be appointed permanent lieutenant in the line of the U.S. Navy, pursuant to title 10, United States Code, section 531:

Wright, James Vincent

CONFIRMATION

Executive nomination confirmed by the Senate October 22, 1985:

Department of Justice

Charles Fried, of Massachusetts, to be Solicitor General of the United States.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

EXTENSIONS OF REMARKS

1985 NOBEL LAUREATE IN ECONOMICS SPEAKS ON GRAMM-RUDMAN

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. OBEY. Mr. Speaker, yesterday morning, Prof. Franco Modigliani, of Massachusetts Institute of Technology, the 1985 Nobel Laureate in Economics, testified before the Joint Economic Committee concerning the long-term effects of the Federal deficit, and the problems of the Gramm-Rudman approach in dealing with these deficits.

Professor Modigliani maintains that the deficits are mortgaging the future economic prospects of the American people, and that Gramm-Rudman is not a serious response to this issue. In short, Professor Modigliani says that the way to cut the deficit is to cut the deficit; not to establish an elaborate procedural substitute for guts which will defer the actual cutting until a couple of years down the road.

The full text of Professor Modigliani's statement follows:

TESTIMONY BEFORE THE JOINT ECONOMIC COMMITTEE BY PROF. FRANCO MODIGLIANI, MIT, CAMBRIDGE, MA

Let me first thank you for this opportunity of presenting my deeply felt and long matured views on that scourge which is the current and prospective huge deficit, and on the Gramm-Rudman amendment recently passed by the Senate.

In my presentation I will first review the considerations that lead me to the conclusion that the current and perspective deficit of the United States is of a magnitude such as to cause a clear and present danger and call for immediate remedial action. The threat is not so much perhaps to us present in this room—middle aged Americans with access to secure jobs—but to other groups which, even if not directly represented here, should be of concern to you, namely to the younger and future generations of Americans and to most of the other nations of this world both developed countries and those struggling to develop. This conclusion is the result of 35 years of research which has been singled out in the citation for the recently awarded Nobel Prize.

I will examine next why, in my view, the Gramm-Rudman is entirely inadequate to face the problem and is, in fact, actually mischievous in that it may lull you into believing that you have absolved your task and can forget it till after elections.

I. THE U.S. DEFICIT AND THE THREATS IT POSES

My analysis and empirical evidence support, without a shadow of a doubt, the traditional conclusion of both economists and common-sense people that individual and national consumption, and hence saving, is basically controlled by considerations other than whether the government happens to run a deficit and how large it is. This conclusion implies that when the government runs a deficit, or dissaves, national saving—the sum of private and public saving—declines by roughly a dollar for each dollar that the deficit is higher. But this, in turn means that each dollar of deficit crowds out a dollar of private investment, except to the extent that it increases reliance on foreign capital.

How does the crowding out occur? Basically through interest rising enough to do two things: (1) ration out among investors the reduced flow of funds available, except to the extent that (2) foreign capital is attracted through a rise in the return available in this country relative to that available elsewhere. (Note that nothing says that interest rates must be higher than in years of lower deficit—it just says that they will be higher than they would be otherwise.)

These immediate effects of a large (noncyclical) deficit—and our deficit is enormous, especially in relation to our saving capacity—are the cause of a series of ruinous consequences, both long and short run, both domestic and international.

Long-run Consequences

These are the most insidious because they come on gradually and hence are hard to detect in the beginning. They all work through the stock of national private capital. Capital in the form of plant, equipment, houses, inventories, is what makes our labor productive and supports the American standard of living. In so far as the deficit crowds out investment, it progressively reduces the capital available to future generations, making them poorer. One can show that the resulting loss of income is roughly equal to the higher taxes that future Americans will have to pay to service and repay the additional public debt.

In so far as the deficit attracts foreign capital and is thus financed by borrowing abroad, the effect is essentially the same, for though the capital and before-tax income may be less seriously impaired, future generations will have to pay out of that income, through higher taxes, the resources needed to pay interest and principal.

Short-run effects

But there are also important short run effects which are visible for any one who wants to see. First, the enormously high long term interest rates even after adjustment for current and prospective inflation, are making it nearly impossible for young people to buy a house—except perhaps with enormous strains on their finances—or for the lucky ones on those of their parents. Don't let anybody tell you that the high interest is the fault of the Fed—the Fed has no choice as long as it must avoid resurgence of inflation and the deficit is as large as it is.

Second, in so far as the high interest attracts foreign capital, this occurs through foreign investors endeavoring to buy dollars to invest in U.S. assets, thus bidding up the price of the dollar. This makes American goods and services more expensive relative to foreign goods, reducing exports and increasing imports. The resulting deficit or net import of goods can be used for investment, replacing, accordingly, the reduced flow of national saving.

It is this mechanism that has given rise to the huge deficit in the current account balance now running at something like 130 billion per year and is playing havoc with those sectors of the American economy that are open to foreign competition. In addition to the mass displacement of jobs and capricious redistribution of profits, this phenomenon is creating, as is well known, tremendous pressure for protectionist legislation. Resisting such pressure will be hard as long as our deficit is so large, but giving in would be tragic. As we learn from history, protectionist measures are sure to lead to retaliation. The outcome will be an inversion of the trend toward the opening up of trade led by America which has contributed as much as anything else to the unprecedented growth of world trade, income and well being in the post war period. The answer to the trade deficit is not protectionism—which, incidentally, would probably be only partially effective as it could lead to higher interest rates and a higher dollar. The answer is to cut the deficit deep and quick, before the protectionist wave overwhelms us.

The third deleterious effect of the deficit concerns the solvency and very viability of the debtor countries. These countries have no doubt overborrowed and not spent productively all the proceeds of their borrowing, for which blame goes to them as well as to the bankers that uncautiously lent to them. But the problem is immensely complicated by a circumstance for which they cannot be blamed. The interest rate at which they borrowed, which was low or even negative, has been raised to unprecedented levels by the U.S. deficit.

If we fail to bring down the deficit and interest rates quickly, the consequences can be extremely serious. The economics of many of the debtor countries are cracking under the strain of servicing their debt, and growth has been replaced by contraction. This is bad per se, but in addition we remain under the risk of some form of default. Related to this is the risk of domestic bank panic because of the resulting bank losses, and of the need to intervene, to make up the losses, by public money.

The fourth ill effect of our high interest rates is perhaps the least understood and has to do with the current stagnation throughout the industrial countries, and in particular among the members of the European Common Market. In a world of floating rates and considerable capital mobility, our high interest rates force these countries into a matching relatively high interest rate posture. This is necessary in order to prevent even more outflow of capital resulting in further devaluation of their currency, imported inflation and further deficit in the U.S. current balance.

But a policy of high interest rates discourages investment and hence reduces aggregate demand and employment—unless offset by a large deficit American-style—something which, understandably, they refuse to do.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.

Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

The result of this situation is that, today, the Common Market unemployment has reached levels approaching those of the great depression. It averages around 10 percent to 11 percent—with much higher rates for some countries—which correspond to something like 13 percent to 14 percent in this country. It is for this reason that these countries have desperately tried to persuade our Administration to take some action to bring down the deficit and interest rates.

There are those inside and outside the Administration that, at least until recently, have tried to deny these ill effects essentially by arguing that the deficit does not reduce national saving. They maintain that as the government saves less the private sector will automatically consume less or save more out of net-of-tax-income. The argument is based on a wild fantasy about every person realizing that because of the deficit his children will have to pay more taxes, and hence saving more in order to bequeath to them enough capital to pay for the higher taxes. There is really no need to argue about this view, which, while it might have some fascination as an Ivory Tower exercise, has no empirical relevance whatever. This is shown by a large body of evidence both for the United States and for many other countries, reported in several papers of mine, published and in course of publication. It is enough to look at the behavior of the saving rate in the United States to find that since the big rise in the deficit in 1982 the saving rate has been, if anything, lower than the average in the last 25 years. It is equally sufficient to look around to see that all the phenomena that we expect to be associated with the crowding out of national saving have, in fact, occurred.

Let me finally note one paradox. Suppose the Administration were correct in maintaining that the deficit leads people to consume less, just as though they were taxes. How can then the President argue that taxes must not be raised regardless of the deficit because of disincentive effects when, not taxing, has exactly the same disincentive effect?

II. THE GRAMM-RUDMAN AMENDMENT

I come now to the question of why, in my view, that amendment cannot be regarded as adequate to accomplish the needed task—cut the deficit now and cut it deeply, with no ifs, ands, or buts. I applaud, of course, the stated intention of the amendment, namely bringing the high deficits to an end. My objections are of three types: First, the magnitude and timing of the cuts; second, the way in which the cuts are to be executed. Finally, I have numerous detailed objections arising from the rush with which the bill has been together:

(1) The amendment does not call for a large cut now—say one-half the deficit. Indeed, as Representative Obey has correctly pointed out, it does not call for any cut whatever this year and for hardly any cut next year. Rather than going through the painful exercise of cutting the deficit, it instructs future Congressmen to cut the budget—if they feel like it—for obviously a future Congress can readily revise the law and perhaps instruct a yet future Congress to do the unpleasant job!

(2) The supporters of the present amendment, after going through the nearly meaningless exercise of ordering future Congresses to cut the budget, endeavor the show how tough they are by placing an enormous number of detailed constraints on future Congressmen as to how they should go about cutting the budget. Many of these details are, in my view—to borrow an expression from my grandson—plain "mickey mousing." Others are positively harmful, like those establishing exceptions to the deficit cutting procedure when, and only when, income is expected to decline. It has been shown repeatedly that such formulation courts economic instability and that if the path of the deficit is to be prescribed in advance then the target should be something like a "full employment" deficit.

But, frankly, if you are not going to cut the budget yourself, I see little reason why you should dictate to others how to do it.

In the light of this view, I shall not waste time on some of the shoddy details of the bill—a task which has been carried out quite adequately in several previous testimonies.

To conclude, my strong recommendation to you is cut the budget now and cut it deeply. Don't waste your time and lose credibility by telling others what to do, if you don't have the courage to do it yourself. About all, don't be trapped in the taboo that taxes must not be raised, even if it means a continuation of the deficit. American tax rates are not particularly high. And don't believe in the nonsense of the Laffer Curve, at which you should laugh, as an overwhelming number of economists do. Finally, remember that if you refuse to raise taxes in the presence of a deficit, you are raising taxes anyway, though not those of our generation but those of your children.

Let me end with a sketch of a bill to replace Gramm-Rudman. It should establish a target for a large reduction in the deficit and state that whatever reduction has not been accomplished through cutting expenditures by some nearby date, will automatically be made up by tax increases.

MODESTO PASTOR IS EXPERT IN LEADERSHIP

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. COELHO. Mr. Speaker, last month, the Reverend William Yaeger of the First Baptist Church of Modesto, CA, celebrated two very special occasions—his 60th birthday and his 18th anniversary of service to the First Baptist Church.

Reverend Yaeger is indeed a special man. He is a community leader in every sense of the word, providing leadership, community service, evangelism, and stewardship to the people of Modesto. Under his guidance, the membership of the church has grown tremendously since he first arrived in Modesto in 1967. But his leadership also extends beyond our community, as he has helped 9,000 other pastors with their ministries over the years through his Institute of Church Imperatives.

The dynamic but caring ministry that Reverend Yaeger has built is certainly one that he and the First Baptist Church can be very proud of. On behalf of the citizens of Modesto, I would like to congratulate Reverend Yaeger at this special time and thank him for all that he has done for our community.

An article appeared recently in the Fresno Bee which, I think, shows great insight about Reverend Yaeger's ministry. In recognition of all that he has done, I ask that this article be reprinted here in the RECORD.

[From the Fresno (CA) Bee, Sept. 28, 1985]

MODESTO PASTOR IS EXPERT IN LEADERSHIP

(By Michael J. McManus)

MODESTO.—Two weeks ago, the Rev. William Yaeger celebrated his 60th birthday and his 18th year as pastor of the First Baptist Church of Modesto. Though 2,300 people had already been to Sunday morning services, about 1,400 returned for the Sunday evening service and celebration.

When he arrived in 1967, only 250 were in the Sunday morning service and 50 came at night. The budget has grown from $65,000 to $2.4 million for operations and $1 million for construction. This success has been so steady and so dramatic that 9,000 pastors have attended Yaeger's three-day Institute of Church Imperatives to learn how to do a better job.

During part of the celebration service, excerpts of letters from former church interns were read aloud: "I have learned from Pastor Yaeger so many vital principles of leadership" wrote a pastor in England. "You have been an example for me of a leader who demands excellence of himself and others, while embodying the tender heart of a pastor," said another.

Over and over, he was praised most for his leadership. Last year he summarized those leadership principles in a book which ought to be read by every pastor or serious lay church leader: "Who's Holding the Umbrella?"

In it he said "One does not need to be flamboyant, charismatic, or even outgoing to provide effective leadership." Instead, he described what he called being an "umbrella man," a "leader who gives himself to the ministry of Christ in such a way that he equips believers and provides abundant opportunities for them to serve. His ministry is spread out like a canopy or protective umbrella, under which others can grow and flourish—and eventually become leaders themselves."

Of course, a man holding an umbrella in a thunderstorm can become a lightning rod—the first to be attacked. "Intimidation by church members is one of the basic causes for the failure of many pastors," said Yaeger, recalling his early Modesto days.

(No denomination chews up pastors more viciously than Southern Baptists. The average tenure in Alabama is under two years, and 4,000 of the nation's 36,000 pulpits are empty.)

Yaeger recalled Jesus said, "I send you out as sheep in the midst of wolves. Therefore be wise as serpents and innocent as doves." Some foes were won over with quiet diplomacy. He shot down other attacks by saying "God sent me here," noting that the vote to invite him was unanimous.

A key first step was to set clear priorities through a "Committee of the Future." Its first goal was evangelism—equipping every church member to win "others to Christ."

The second priority was discipleship. Home Bible study groups of 10–12 people were formed with a commitment to meet for a year to study Scriptures wth a study guide. These small groups not only gave opportunities for fellowship, prayer and mutual support—but incubated future leaders as people learned to be accountable to one another.

Paul Fulfer, 68, had gone to church and Sunday school all his life, but it was not

until he was in a small Bible study that he discovered "the thrill of learning for the first time what Christ would have me do."

Out of a discipleship group formed in 1968, came four of the church's present staff. A former mayor of Modesto became minister of evangelism; the owner of a tire business is now church business manager; adult ministries is directed by a one-time salesman; and a civil engineer who came to Modesto to build a dam is now minister to singles.

Yaeger believes the least important criteria for choosing leaders is their skills. More important is a willingness to "work and train for the responsibility they will carry, proven godliness, spiritual maturity, and emotional stability. . . . Church leaders are developed, not discovered."

The key to church growth depends on how well the pastor "cares for those who serve with him and how much he will let them serve," Yaeger says. Most of his senior staff has been aboard for 10-15 years because he pays them well, praises them in public, criticizes privately, and protects them when unfairly attacked. The result: growing trust and continuity.

Equally important, in my view, is the way First Baptist makes decisions—more by unity than democracy.

Many Baptist churches make decisions at a monthly business meeting where any church member can vote. The meetings are often called "fight night." Yaeger was shocked by the first one he and his wife attended. People who had prayed with them, helped them make a commitment to Christ and hugged them were now yelling as they "engaged in political outrage and debate."

Therefore, First Baptist is governed by a single board of deacons composed of mature Christians who take the time needed to reach broad consensus of decisions.

Its model is the church described in the first chapters of Acts of the Apostles, where the disciples waited for the Holy Spirit to come, prayed together, praised God, and "were of one heart and soul."

MINISTER'S BREAKFAST

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. MITCHELL. Mr. Speaker, on Tuesday, October 15, 1985, the Honorable CHARLES HAYES of Illinois addressed a group of ministers from the Seventh District of Maryland who were here attending an annual minister's breakfast.

Congressman HAYES' address was very inspirational and well received by all attending. I am honored today to share with my colleagues those remarks:

Greetings!!!

Its a pleasure to appear before you today, especially since it was at the invitation of my friend—and—unfortunately, departing colleague, Parren Mitchell. When Parren asked me to speak to you, he asked that I give you an impassioned speech. I thought to myself, how am I going to impassion a group of pastors this early in the morning? With your divine teachings, perhaps you should be up here impassioning me to stay in the struggles that we Black Caucus members must deal with every day in the U.S. House of Representatives.

As a member of Parren's Committee on Small Business, I feel honored to have had the opportunity to serve under his leadership. Normally, when I hear about one of my committee mates deciding to retire, I take it with a grain of sugar, since it means that I will move up on the totem pole of seniority.

Parren's impending departure however, leaves a taste sugar cannot sweeten. His leadership and expertise in small business affairs, especially as an advocate of minority business, will leave a void larger than that beautiful Chesapeake Bay you have in Maryland.

While Parren may be moving on to another arena, I'm certain he knows that there is still plenty of work yet to be done. I know that no matter what arena he moves to, he will continue to fulfill his mission in life—helping those in need and speaking out against injustices that black and poor people are confronted with on a daily basis. Given Parren's history and that of the Mitchell Family, there is no way he will fade away. I know he will continue to speak out, as he has done as chair of the Small Business Committee, against the unjust affairs of corporate America.

As we discovered with General Dynamics, we have corporate executives who misappropriate millions of taxpayers hard earned dollars without so much as a slap on the hand. But don't let a poor person keep quiet about a part-time job in an effort to qualify for food stamps. Then the conservatives start talking about building new jails to put them in—while the corporate executives run away into oblivion with their illegal millions. What could be more unjust than having a President who proposes to tax unemployment benefits while we have Fortune 500 companies who pay absolutely no taxes.

When I was first elected to Congress to replace my friend and now mayor of Chicago, Harold Washington, Harold told me not to leave anything to chance and to always keep my guard up. Today, I would like to impart that advice to each of you in this room. In the political climate we find ourselves in today, we must always keep our guard up.

Not only do we have to guard against an uncertain future for the next generation, we must also guard against the erosion of past gains, in civil rights as well as economic rights.

There is no better example of what we are up against than right here in the U.S. House of Representatives. Here in the House, Congressional Black Caucus members total only 20 out of 435. Of our 20 here in the House, only one is a female. According to the last census count, black people in America total some 12 percent of the population. If we have 12 percent of the total number of Members in the House we would have 52 CBC members. And you know the story in the U.S. Senate. There we have no minority representation.

In short, we have a long, tough struggle ahead of us.

My conservative colleagues in the House would have you believe differently. They would have you believe that we have already done too much. That's why, on an almost daily basis, they belittle Government programs that help the poor, the hungry, the homeless, and minorities—all in the name of fiscal conservatism.

In all this debate, why is it that they never talk about the fact that their cherished President, the so-called "Great Communicator", has given us the bigest Federal Deficit in the history of our Nation? The biggest Federal deficits in the history of our Nation. They would have you believe that food stamps, school lunches and Social Security have caused our deficits. With their zeal to cut cut cut, we must constantly be on guard to prevent the erosion of past gains.

I know Parren is as upset as I am over this new effort to reduce the deficit and balance the budget by 1991. We know who paid the price of all their previous budget cuts. Need we ask who they expect to pay the price for their future cuts? We must keep our guard up.

As a result of their fiscal mis-conservatism, we now have more homeless citizens than ever before. We now have more people going hungry than ever before. We now have more unemployed people than ever before. We now have more people in the grips of the poverty than ever before. And according to what I hear, they are nowhere near finished. That's why we must keep our guard up.

Thanks to their fiscal mis-conservatism we now have millions of people who are confronted with the very real prospect of becoming part of a permanent poverty-stricken underclass of unemployed and unskilled Americans. Millions of people who are still waiting for the trickle to trickle down. I know what poverty means—having experienced it first hand in my youth and, more recently, experiencing it again during a visit to Sugar Ditch, Mississippi, with Jesse Jackson and Augustus Hawkins, another Black Caucus member and presently chairman of the House Committee on Education and Labor.

While some may have criticisms with Jesse's style or his methods, one thing must be said for the man—he has a God-given talent for focusing attention on the plight of the poor. If you will recall, Jesse was the only Presidential candidate during our last Presidential primary season to take a stand clearly in defense of the poor people of our Nation. The inhumane conditions that the people of Sugar Ditch are enduring, shouldn't be experiencd by anyone in a nation as rich as the United States. Yet, at the consent, and even urging of the white elected officials down there, the black residents are forced to live in filth, hunger and poverty. Their elected officials, in an effort to keep the blacks working in low to no paying farm jobs, have made the area off-limits to industries who could provide decent jobs and decent incomes for the residents there.

Yes, not only do we have the fiscal conservatives, we also have the color conservatives. I hear from them, too. I hear from who I call Clarence 1 and Clarence 2—The Clarences two: Clarence Pendleton, Chairman of the so-called Civil Rights Commission and Clarence Thomas, Chairman of the Equal Employment Opportunity Commission.

Clarence 1 of the Civil Rights Commission argues that this country's affirmative action policy is no longer necessary—that we need to take a radical turn to the right and embrace a "color blind society."

Clarence 2 of the EEOC, supports the absurd notion that the Commission no longer needs to investigate individual complaints of discrimination, but rather class action suits—suits that may take years and years to litigate and resolve.

Unfortunately, what the two Clarences fail to understand is that there are still too many issues in our Society that are decided on the basis of color—black and white and green—money green. Until we can end dis-

crimination in the work place, in housing, and in society in general, there is very much a need for a strong Civil Rights Commission and an EEOC. And until we can reduce our unemployment rates, by embracing policies that will put Americans back to work, that green will continue to elude vast numbers of minorities. We must keep our guard up.

Unemployed workers have now lost their unemployment and health benefits for themselves and their families due to the inconsistent and insensitive policies of the Reagan administration. It's an administration that refuses to recognize the American workers' contribution to this Nation's economy.

Today, official civilian unemployment is 7.1 percent. That equals about 9.274 million people. Official black unemployment is 15.3 percent; black youth unemployment is 38.3 percent. The unofficial figures are much higher because the official figures don't take into account those people who have simply stopped looking for work and therefore no longer report into the unemployment office.

I've tried to address this whole employment—unemployment issue with the introduction of two measures. My first bill, H.R. 1398, the Income and Jobs Action Act of 1985, seeks to put teeth into the Hawkins-Humphrey Full Employment Act. H.R. 1398 establishes an over-all economic policy which recognizes, one, the right to earn a decent living, and two, the right to an adequate income for adults unable to earn a living through paid employment.

My second bill, H.R. 3042, the High School Dropout Prevention and Reentry Act, seeks to reduce the number of children who do not complete their elementary and secondary education. In a society where we have such technological advances, it is imperative that we stem the tide of uneducated, unprepared youngsters—the majority of whom are black and hispanic.

Meanwhile, President Reagan calls for and gets $1.5 billion for the production of MX missiles under the guise of protecting our national security. At the same time, those of us who push for trade policies that will keep Americans working and put those who are unemployed back to work, we are called "Protectionists." If putting people to work, putting food on their tables, putting a roof over their heads, if that is being protectionist, well then so be it. We must keep our guard up.

I believe the greatest threat to the security of our Nation does not come from any external source, but from internal sources. I believe it comes from having people who are stricken by hunger, homelessness and poverty. Without a decent, income-providing job, it is impossible to plan a decent future, provide for family security or to participate in the mainstream of our society.

Not only must we in Congress keep our guard up, but you, as leaders in your communities, you must also keep your guard up.

Historically, the black church has always been at the forefront in the struggle for civil rights. It has always been the place where black people could get guidance and leadership in the struggle to fight discrimination, to fight poverty, to fight evil forces the bear ill-will for our people. I believe now is the time for it to return to that role.

I think it is imperative for you, as ministers to impress upon your congregations—the importance of staying alert to what the political climate means for their future and the future of their children. You must guard against their becoming complacent about their futures.

Don't let them take it for granted that just because they may have a job, just because they have food on their tables, that just because they may have a roof over their heads and live a comfortable lifestyle, don't let them take it for granted that the struggle is over.

They can't take it for granted that whomever runs for Parren's seat, and I hope Parren changes his mind about retiring, just because he or she may be black, will truly represent their concerns. They must keep their guard up.

The struggle is not over. We must keep our guard up.

CARIBBEAN BUSINESS' 10TH ANNIVERSARY

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. GARCIA. Mr. Speaker, this year marks the 10th anniversary of the Caribbean Business newspaper. Caribbean Business has successfully kept many of us interested in the region's development abreast of economic and business affairs.

The Caribbean Basin has become, over the past several years, a cornerstone of U.S. foreign policy, and rightfully so. The economic and political stability of the nations of the region can no longer be ignored. It is, therefore, important for U.S. policymakers—inside and outside of the Government—to be kept informed about regional affairs. Caribbean Business has enabled me to keep up with the rapidly changing situation in the Caribbean Basin. It has been an invaluable source of information.

I would like to congratulate the editor-in-chief of Caribbean Business, Mr. Manuel A. Casiano Jr., for the excellent job he and his staff have done for the past decade.

I would also like to include in the RECORD a letter of congratulations I sent to Manny Casiano.

HOUSE OF REPRESENTATIVES,
Washington, DC, October 16, 1985.

Mr. MANUEL A. CASIANO,
Publisher, Caribbean Business, Santurce, Puerto Rico.

DEAR MANNY: It gives me great pleasure to offer congratulations as you embark on the tenth year of the publishing of the Caribbean Business.

Caribbean Business is recognized as the Wall Street Journal of the Caribbean. It is a respected publication which continues to grow in stature. That is evidenced by the fact that is now a resource publication of the Library of Congress.

You and your family should take great pride in your accomplishments. You are a very talented and energetic family with an unsatiable appetite for excellence.

With best personal regards, I remain,
Sincerely,

ROBERT GARCIA,
Member of Congress.

INDIAN TRIBES AND THE FUTURE: INTRODUCTION OF THE INDIAN ECONOMIC DEVELOPMENT ACT OF 1985

HON. JOHN McCAIN

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. McCAIN. Mr. Speaker, in 1975 the Indian Self-Determination and Education Act—Public Law 93-638—was enacted with the purpose of promoting tribal self-sufficiency through tribal initiatives and with tribal control. Past Congresses and administrations have had many ideas about Indian economic development, but the Self-Determination Act still represents the greatest hope for economic development. Building upon the premise that Indian tribes can best determine their destiny, I am today introducing legislation to further extend self-determination—the Indian Economic Development Act of 1985.

Federal programs, in the control of Federal agencies, too often prove to be harbingers of parternalism, preventing tribes from developing in their own image and within their own ideas. Instead of bringing about self-sufficiency, many economic development programs have instead only shifted the bureaucratic emphasis. Programs designed to develop business managers have produced paper shufflers. It is time to bring private business into tribal economic development.

Essentially, the Indian Economic Development Act would be a catalyst for tribes to work with the business community in creating jobs, providing employment training, and enter an era of long-term economic development. I propose using Indian enterprise zones to stimulate tribal economies. I believe the incentives provided in this legislation are ideally suited to address the needs on many Indian reservations.

Poverty is a way of life on many reservations. Last June the Committee on Interior and Insular Affairs held hearings on the growth of Indian bingo. While that form of economic development is controversial, hearing witnesses brought home an important point. One tribe operating a high stakes bingo operation reported that in less than a year the tribe had reduced unemployment from 64 percent to 0—and more importantly, most of those now employed had never held a job. It is possible, on some reservations, to be born, live and die, and never have the opportunity to work. The Federal Government cannot find solutions to 25 to 75 percent unemployment without private capital, markets and management.

Reservation residents want to work. We need to provide tribes the means for economic development. I believe the problems facing tribes fall into several categories—remoteness, education, and natural resources.

Often the remote tribes have all of these problems. Schools are few, private training centers are distant, the infrastructure of the reservation is nonexistent, and the tribe

may not be blessed with usable natural resources. There may be little that we can do about natural resources, and the state of Indian education, hopefully, is at a turning point toward a system which will blend traditional beliefs with the modern world.

However, we can supplement education and training. Enterprise zones offer incentives to businesses to locate on reservations. Many companies have the experience and ability to train willing Indian workers which will help fill in the gaps of the current education system. This legislation also provides incentives for business to help remedy the infrastructure problems. Although enterprise zones are not a panacea, tribes with the willingness can benefit from zones and move on to long-term development.

Several previous Federal programs have laid the groundwork to accommodate enterprise zones. The Indian Tribal Governments Tax Status Act, the Indian Financing Act, among others, are highlights in Federal policy. Enterprise zones can provide private capital, private training and markets for those tribes with few advantages. For that reason I encourage my colleagues to support enterprise zones for Indian tribes.

This legislation is not without controversy. I hope my colleagues and the Indian community will review the legislation and bring their own ideas and comments to the committee for consideration. I know that critics of enterprise zones cite only the lost Federal tax revenues. By having economic development on Indian reservations, Federal income tax revenues will come from people who have been unemployed, or underemployed. Those new revenues will offset a good portion of the lost business taxes. Additionally, economic self-sufficiency derived from the zones will reduce the need for general assistance payments, Federal grants and other Federal payments.

I recognize that other aspects of the legislation may, at first, be controversial. I have talked to many business leaders, and their primary concern about locating on a Indian reservation is the fear of not having adequate recourse in contract and civil disputes. Therefore, the legislation encourages tribes to take actions separating the tribal government from tribal courts and businesses, put proper zoning plans in place, and adopt a general business attitude. The most controversial action that a tribe may take is that of partially waiving its sovereign immunity in contractual arrangements.

Like all governments, Indian tribes can only be sued when they allow lawsuits—or in some cases when Congress has decreed it. Last Congress we enacted legislation for a tribe to allow binding arbitration in contract disputes. While I agree with this approach, I believe it is up to each tribe to decide if and how it would waive sovereign immunity. The legislation provides that the Secretary would have the authority to approve tribal plans which apply only to enterprise zones, and would not diminish or encumber the trust assets of a tribe.

Economic development will require the diligence of tribes, the private sector and the Federal Government to achieve their goal of Indian self-sufficiency. I encourage my collegues to examine the legislation and support it. A brief summary of the Indian Economic Develpment Act of 1985, follows this statement.

OUTLINE: INDIAN ECONOMIC DEVELOPMENT ACT OF 1985

TITLE I—DESIGNATION OF INDIAN ENTERPRISE ZONES

Indian Enterprise Zones would be designated by the Secretary of the Interior, after consultation with the Secretaries of Commerce, Labor, HUD and Treasury, and the Administrator of SBA. The Secretary would be authorized to designate 30 such zones, with 10 set aside for small tribes (under 1000 population). For a zone designation the Secretary must be satisfied that the tribe has the authority to nominate the area, and has made the requisite tribal commitments, which include:

In writing, agree to take a course of action to encourage business development;

The course of action could include: reduction of tax rates, fees or royalties; increase in local services; reduction of red tape; involvement of local non-government organizations; assurance to non-tribal interests that their rights will be protected (separation of tribal courts from political influences); separation of tribal businesses from political actions; tribal plans, including zoning regulations; a limitation on tribal sovereign immunity for recourse in contract and other civil disputes.

A general criteria is provided to the Secretary in prioritizing zones designation—in an effort to remove subjective designations. A zone could be nominated by any tribal group—using the same definition as for the Indian Tribal Governmental Tax Status Act—which includes Alaska Native Corporations. Indian lands has a broad definition, using a "governed" standard (except for Alaska), but the zone must be on Indian lands.

The Secretary would only have 36 months to make the designations, and each designation could last up to 25 years. Provisions would be made for revocation of the designation.

TITLE II—FEDERAL INCOME TAX INCENTIVES

SEC. 201. Credit to Zone employers for 10% of the qualified increased new employment expenditures, plus an economically disadvantaged credit.

SEC. 211. Investment Tax Credit for Zone property. Qualified property could receive 5% (personal property; equipment) or 10% (construction property) and may be eligible for special 20% credit if it is determined to be an investment in the tribal infrastructure. Examples of infrastructure investments include roads, power lines, water systems, railroad spurs, and communication facilities. This investment must benefit the tribal infrastructure and be available to the general public.

SEC. 221. Reduction in capital gain tax rates for corporate and individual businesses in zone.

SEC. 231. Limitation on accelerated cost recovery deduction does not apply on property within the zone. Also allows small issue exemption on IDBs to continue within zone.

Note: Within this section the limitation on tribal governments to issue IDBs is removed, placing tribes on an equal footing with States for IDB purposes.

TITLE III—REGULATORY RELIEF

Generally, the title allows exemptions or waivers for certain federal regulatory procedures if the appropriate Secretary or Administrator determines will further job creation, community development, or economic revitalization within the zone.

TITLE IV—FOREIGN-TRADE ZONES

Section 401 establishes a preference for Indian Enterprise Zones to also be designated a Foreign-Trade Zone by the Secretary of Commerce.

TITLE V

The Secretary of the Interior would be authorized under the bill to administratively approve tribal plans for waiver immunity pursuant to tribal economic development plans, regardless of zone status. This could include binding arbitration, and must not encumber or diminish trust assets.

TROUBLE IN PANAMA

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. BARNES. Mr. Speaker, there is trouble in Panama. During the last several years, while most of Central America was in crisis, Panama seemed to be a stable, untroubled country on the road to democracy. The implementation of the Panama Canal Treaty has gone well. The anti-Americanism that was the centerpiece of Panamanian politics has cooled. The military in Panama took a new name and pledged to get out of politics. In May 1984, there were legislative and Presidential elections. Many of us had hoped that democratic institutions and civilian rule were about to become the norm in Panama.

Unfortunaely, that was not to be the case. The elections for President were clearly fraudulent. The Panamanian Defense Force stopped counting the ballots and declared its candidate President. Still, many observers withheld their protests because the new President was Nicholas Ardito Barletta, a world-class economist who has a reputation for honesty and hard work. President Barletta struggled to deal with Panama's severe economic problems, but did not have great success in mobilizing political support. Political problems for Presidents are not unusual. What is unusual in a democratic system is for the military to force the President to resign. Let the record be clear: President Barletta did not want to leave office; he was forced out.

Mr. Speaker, the United States has important interests in Panama. Perhaps paramount among these interests is our relationship with the people of Panama. The people want a role in determining their future. They want a political system that is open and allows free speech. The time of the military dictatorship is over. The United States must make clear to Gen. Manuel Noriega and everyone else that our support is clearly on the side of the democrats because that is where our interests are. The facade of democracy does not fool any one. This point was recently made by

editorials in the Washington Post and the New York Times. I am including these editorials so that all my colleagues will have the opportunity to read them. The material follows:

[From the New York Times, Oct. 3, 1985]

ADD PANAMA TO THE CRITICAL LIST

Strike Panama from list of restored Latin American democracies that the United States has been celebrating.

In a democracy, the military is not expected regularly to depose or impose presidents, as the Panamanian National Guard has done five times in three years. In a democracy, civilian critics of military power are not supposed to be decapitated, with the apparent collusion of the military, as happened two weeks ago to Dr. Hugo Spadafora.

In a democracy, journalists are not normally threatened by military intelligence operatives, and United States Ambassadors do not feel obliged to warn opposition newspapers that they risk being closed down unless they mute their criticism—as Ambassador Everett Briggs felt obliged this week to warn reporters and editors of La Prensa.

If what is happening in Panama counts as democracy, Nicaragua can fairly claim it is being subjected to a double standard. The right name for the Panamanian regime is dictatorship, and the country's real ruler is the National Guard commander, Gen. Manuel Noriega.

Panama faces problems, starting with the effects of the larger Latin debt crisis, which has dried up the normal flow of capital to the region. And the United States has every reason to try to get along with whoever governs Panama. But these realities do not oblige Washington to pretend that the power plays and brutalities of a military regime are consistent with democracy. General Noriega should not underestimate this country's strategic interest in Panama's political future.

America's access to the Panama Canal depends in the first instance on the stability of the regime that guarantees it. That guarantee is worth no more than the regime's credibility among its own people.

[From the Washington Post, Oct. 6, 1985]

POOR PANAMA

In August, the military strongman of Panama declared, in strongman lingo, "We, the Panamanian people, consider that economic intellectuals should give true solutions and not keep their heads buried in books of Harvard or Chicago." The other day he forced the resignation of the Chicago-educated economic intellectual, Nicolas Arditas Barletta, whose election as president he had assured 11 months earlier when he stopped counting the other candidate's ballots.

Panama is caught in a familiar and cruel vise between its people and its creditors. Something had to go: it was President Arditas Barletta, a decent man who had publicly warned that the country's inability to deal with austerity was taking it back to military rule. The new president was the vice president, a businessman who, in the photos, looks brave and scared. The fragility of many other Latin democracies writ large in poor Panama's predicament.

But the strongman: His name is Gen. Manuel Noriega. He is more than the successor to the populist dictator, Omar Torrijos, whose high-wire handling of the Panama Canal issue gave Panama a moment in the hemispheric sun in the 1970s. Gen. Noriega is an unsually willful man who suffers criticism poorly and is now engaged in denying a nagging charge that he had something to do with the fate of a Panamanian gadfly, Dr. Hugo Spadafora, who was found dead in Costa Rica in September, minus his head. Gen. Noriega is also muttering threats against La Prensa, a good newspaper.

The Reagan administration has attached much importance to the return of one Latin country after another to democracy on its watch. Panama, which was enjoying its first elected president in 16 years, is the first backslider of the 1980s. The great American interest in and daily preoccupation with the Panama Canal has tended to inhibit the official response. But to show its disfavor—and to avoid the obligatory newspaper photo of the check-handing ceremony—the administration deferred an aid grant. The Air Force Thunderbirds did not perform. The Panamanian military, accustomed to deference, has been reminded that its proper role is professional, not governmental. Gen. Noriega ought to understand that Panamanian officials cannot act like characters in a Grade B movie and expect to retain the confidence either of their own citizens or of the hemisphere's democrats.

THE RETIREMENT INCOME POLICY ACT OF 1985

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. CLAY. Mr. Speaker, today I am pleased to introduce the Retirement Income Policy Act of 1985. This legislation has two primary purposes: To establish certain national retirement income policy goals and to provide a framework for debate on how best to achieve some of those goals by recommending certain amendments to the Employee Retirement Income Security Act of 1974 [ERISA]. Similar legislation will also be introduced today by Senator JOHN HEINZ, chairman of the Subcommittee on Savings, Pensions and Investment Policy of the Senate Finance Committee and chairman of the Senate Special Committee on Aging.

For nearly 2 years, the members of the Subcommittee on Labor-Management Relations, which I chair, have been discussing the need for an articulated national retirement income policy. We have sought the assistance and advice of hundreds of private-sector employee benefits professionals, representing every conceivable interest group. We have had the benefit of research provided to us by the Congressional Research Service, the Employee Benefit Research Institute, and several of the major employee benefit consulting firms. We have reached out to our colleagues on both sides of the aisle, on the labor and tax committees, both here and in the other body.

Earlier this year, we held hearings on the need for a national retirement income policy. In addition to the broad policy questions, witnesses also discussed many specific areas of ERISA which would be affected were a national retirement income policy to be established.

Part of the problem, we learned, is that to the extent we already have an implicit national retirement policy, it is neither comprehensive nor internally consistent. Rather, it has evolved piecemeal, in recent years as a result of tax legislation, and usually without sufficient attention paid to the effects of the legislation on overall retirement policy. In the years since ERISA's enactment, comprehensive analysis of what workers can expect in retirement today and in the future as a result of current policy has been missing.

Missing, too, has been an understanding that the voluntary private pension system, as we know it, has evolved largely because of a combination of labor-management forces as well as tax incentives. Neither labor policy nor tax policy should be the sole driving force behind legislative change in this area. Whether we can expect expansion of coverage under private pension systems, greater delivery of benefits, or greater adequacy of private pension benefits to supplement Social Security in the future will depend on whether Congress is willing to exercise a form of legislative self-discipline. Before any additional legislation revising the minimum standards for plans set forth in ERISA is adopted, Congress must evaluate the likelihood of workers receiving retirement benefits under the current system and set both short- and long-term goals for the future. A fundamental part of that process is articulating national retirement income policy goals.

We were heartened in our efforts when the chairman of the Committee on Ways and Means asked our distinguished colleagues on that committee, Representative J.J. PICKLE, chairman of the Oversight Subcommittee, and Representative JIM JONES, chairman of the Social Security Subcommittee, to study national retirement policy issues. They have had several joint hearings and we applaud their efforts and have pledged to work with them. We agree with them that retirement issues need to be addressed and evaluated in a broader context than has been the case in the past.

Therefore, the Retirement Income Policy Act of 1985 proposes both a series of national retirement policy goals and legislative changes to implement some of those goals. The bill provides the framework for discussion of both the goals and the means to achieve them.

The legislation adopts the following policy goals:

First. Social Security should be the universal and fundamental source of retirement income security for each American;

Second. Retirement benefits provided by Social Security should be supplemented with benefits provided by employer-financed retirement plans;

Third. Retirement benefits provided by both of the above sources should be supplemented with individual savings for retirement;

Fourth. The current voluntary system of employer-sponsored retirement plans should be retained and the growth and development of such plans should be encouraged;

Fifth. Although the age of retirement should be an individual decision, workers should be encouraged by public policy to remain in the work force throughout their productive years;

Sixth. Employer-sponsored retirement plans should be sufficiently flexible to deliver adequate retirement benefits to workers with a variety of career patterns;

Seventh. Benefits which are accumulated for retirement should be retained for that purpose;

Eighth. Although elective approaches to retirement savings may be useful in supplementing employer-financed retirement benefits, public money should be developed with the recognition that employer-financed retirement programs can be more effective in delivering benefits to a broad cross-section of the population;

Ninth. Employer-sponsored savings for purposes other than retirement should be encouraged for employees participating in a meaningful retirement program; and

Tenth. To the extent possible, retirement income should be provided from a variety of sources and should be sufficient to maintain an employee's preretirement standard of living throughout retirement.

The Retirement Income Policy Act of 1985 does not attempt to addrss all of the policy goals described above. Rather, it has four primary objectives: to increase the number of workers covered under private pension plans, to improve the likelihood that participants covered under pension plans will actually receive benefits from those plans, to improve the adequacy of pension benefits received, and to simplify the administration of plans.

Expanding coverage under private pension plans is probably the most serious challenge facing the Congress. In terms of actual numbers, there are more workers covered under plans than ever before. In terms of the percentage of full-time workers covered, however, coverage has stagnated. Slightly more than half of employed individuals work in covered employment and that percentage has remained relatively fixed for a number of years. Unless changes are made to encourage employers without plans to adopt them, it is unlikely that we will see much additional growth in coverage in the future.

Usually when people discuss problems of pension coverage, they are referring to the problem described above. Our hearings revealed, however, that another coverage gap also exists. Many employees who work for companies that have plans are not covered under those plans. Because of the way that current law works, as long as a "fair cross-section" of employees at all compensation levels are covered under the pension plan, the plan is considered nondiscriminatory and not all employees must be covered.

The Retirement Income Policy Act of 1985 addresses these two coverage problems by revising some of the current rules governing simplified employer plans [SEP's] to make them more attractive to small employers—the typical employer without a plan today—and by prescribing new coverage tests for all plans.

Another major area of proposed reform relates to the delivery of benefits. More specifically, the bill improves the likelihood that covered participants will actually receive benefits from their pension plan. The bill achieves that end in several ways.

First, the period of service required for vesting is shortened to 5 years. Under current law, although three different minimum vesting options are prescribed, most plans use "10-year cliff vesting." As a result, most employees must work a full 10 years before they have a right to pension benefits. Unfortunately, a significant number of workers, particularly female workers, no longer stay at one job for 10 years. Worker mobility has increased dramatically over the past decade. According to the Bureau of Labor Statistics, for workers age 35–39, the median job tenure in 1981 among men was 6.6 years and for women 5.7 years. For workers age 40–44, the median job tenure in 1981 among men was 9.5 years and for women 8 years. Thus, reducing the period of service required for benefits would certainly improve the likelihood that more workers will receive benefits under their plans.

Second, the bill would assure that more covered workers will receive benefits by revising the current rules governing the "integration" of pension benefits with Social Security benefits. For many years, the Internal Revenue Code has permitted employers to take benefits their workers will receive under Social Security into account when they establish the benefit or contribution formula under the plan. This authorization under the code, called pension integration, in effect permits a plan to adopt a formula favoring highly compensated workers without violating the ERISA rules against discrimination in favor of those workers with respect to benefits or contributions. There are two main methods of pension integration: excess and offset. The current rules are quite complicated and some employers have taken full advantage of the rules to design their plans in such a way as to "integrate out" lower paid workers, that is, structure the plans to provide no benefits at all for those workers. The Retirement Income Policy Act of 1985 would prohibit the practice of integrating workers out of their pensions and would simplify and make more equitable the remaining rules governing integration.

Another major objective of the bill is to improve pension adequacy. It accomplishes this objective in several different ways. First, all current types of tax-favored employeee pension benefit plans would be divided into two functional categories: retirement plans and nonretirement savings plans. Today, a wide variety of tax-favored "retirement" arrangements exist. Some are better designed than others to assure that benefits will actually be used to provide retirement income. Unlike both the Treasury and President's tax reform proposals which would force all plans to become retirement plans to retain their current tax-favored status, this bill recognizes that the employer-based savings for purposes other than for retirement should be encouraged once employees participate in meaningful retirement programs. Cash or deferred arrangements, commonly known as section 401(k) plans, used to supplement employer-financed retirement arrangements, can significantly increase the likelihood that some workers will have personal savings in retirement.

In addition, several provisions in the bill reinforce the policy objective that benefits which are accumulated for retirement should be used for that purpose. Retirement plans will be required to pay benefits in a retirement income form, generally as annuities over the life expectancy of the participant or, for married participants, over the life expectancies of both the participant and spouse. Of course, many plans today pay benefits in a lump sum. Witnesses at our hearing indicated that most participants who receive a lump sum payment, particularly younger workers, tend to spend it rather than save it. If the purpose of the tax incentives granted to employer-financed plans is to encourage the provision of retirement income for workers, then steps must be taken to assure that the benefits which flow from those plans are generally kept until retirement. Therefore the bill provides that plans may only distribute benefits in a lump sum to participants who have reached age 59½; lump sum payments to younger participants cannot be distributed directly to the participant but must be rolled over from the plan to an Individual Retirement Account [IRA] or to another retirement plan.

Another aspect of pension adequacy relates to the maximum limits on contributions and benefits under retirement plans. When ERISA was enacted in 1974, maximum limits under section 415 of the Internal Revenue Code were set at the lesser of $75,000 or 100 percent of compensation for defined benefit plans and the lesser of $25,000 or 25 percent of compensation for defined contribution plans. Those limits were automatically adjusted annually as changes in the Consumer Price Index occurred. Combined limits also exist under current law.

In 1982, however, the law was changed to reduce the overall dollar limits to $90,000 (from $136,425) for defined benefit plans and to $30,000 (from $45,475) for defined contribution plans. In addition, any cost-of-living adjustments to those limits were suspended until 1988. Current tax reform proposals would even more severely curtail those basic limits. The ostensible purpose of the 1982 changes was to limit "tax abuse" by highly compensated employees. The purpose of the current proposals to limit the section 415 limits is to reduce tax expenditures. Although these cutbacks may make sense from a tax policy point of view, the implications for retirement income policy are quite troubling.

One absolute certainty exists: The 1982 amendments did little to reduce the overall benefits of the highly compensated. Since the section 415 limits for qualified retirement plans were lowered and frozen, companies simply shifted a greater portion of

benefits which would otherwise be paid under the qualified plan to nonqualified unfunded executive compensation arrangements. The people whose benefits were reduced, however, were the upper middle-income workers, and now, as a result of a few years of the frozen section 415 limits of the middle-income and rank and file workers with long service are being hit. More and more companies are moving even moderately compensated workers out of qualified plans to avoid having to reduce their overall benefits to meet the section 415 tests.

Why is that so troubling? From a retirement policy point of view, more and more workers who are not highly compensated are being shoved out of qualified plans into unfunded nonqualified arrangements that are not subject to ERISA. Those nonqualified plans are not covered by any nondiscrimination rules or by any of the minimum standards—vesting, funding, and so forth. Rather than moving us toward a goal of greater retirement income security for all Americans, the current legislative trend toward lowering the maximum limits on contributions and benefits is actually moving us toward a position of lesser retirement income security for many workers. It is time to reverse that trend.

The Retirement Income Policy Act of 1985 revises the current section 415 limits and links them to the Social Security taxable wage base. Since pensions are deferred wages, it is far more sensible to index the limits to changes in wages then to changes in prices. Under the act, the limitation on benefits under defined benefit plans would be the lesser of 100 percent of compensation or 200 percent of the Social Security taxable wage base. The limitation on contributions under a defined contribution plan would be the lesser of 20 percent of compensation or 50 percent of the Social Security taxable wage base. In addition, internal defined contribution limits for cash or deferred arrangements [CODA's] are set at 25 percent of the wage base and for nonretirement savings plans at the lesser of 10 percent of compensation or 25 percent of the wage base.

In early August, Senator HEINZ and I circulated a draft of this legislation to over 150 members of the employee benefits community. Overall, the comments we received were quite favorable. We appreciate the time many individuals and companies took to make constructive suggestions. We are in the process of responding to those letters.

Two threads, however, ran through many of the comments we received. People are tired of piecemeal legislative changes which require annual plan amendments. Even though they may have had problems with certain parts of the proposal, nearly all the commentators praised the comprehensive approach taken by the bill. On the other hand, no one begged us to pass any new legislation immediately. Several of the commentators demanded that instead of new legislation, Congress pass a moratorium on legislative changes so that plans and participants would have time to absorb the many changes which have occurred over the past few years. In recognition of those legitimate concerns, we have proposed a prospective effective date for the Retirement Income Policy Act of 1985 which is no earlier than 2 years after date of enactment. The amendments made by the act would be effective when the first plan amendment is adopted after that 2-year date, but in no case later than December 31, 1990. Similar rules are provided for collectively bargained plans.

One of the things that makes the Retirement Income Policy Act of 1985 so different from most pieces of pension legislation we have seen in the past is its long gestation period—nearly a year. We have used that time to examine what impact the bill's enactment might have on the actual receipt of pensions. Senator HEINZ and I believe that there is clear evidence that this legislation could significantly improve retirement income in the future.

Today, only 38 percent of families with a head of household age 67 receive income from an employer-sponsored pension, and the average income from those benefits is $3,200 (in 1985 dollars). If we do nothing further to change current law, retirement income will improve somewhat in the future. Three factors drive that improvement. First, since today's workers are earning higher wages for more years in pension-covered jobs than their parents, their benefits are likely to be higher. In addition, the increased number of women in the work force is likely to improve their chances of pension receipt. Finally, younger workers stand to benefit from the pension legislation which has been enacted in the past few years. A recent forecast prepared by ICF, Inc., shows that without further legislation, by 2020, the proportion of families with heads of household age 67 receiving pensions will increase to 63 percent, and the average family income from pensions will increase to $7,700 (in 1985 dollars). However, the enactment of only two of the Retirement Income Policy Act of 1985's provisions (5-year vesting and the new distribution rules) would increase the proportion of families receiving benefits to 81 percent, and the average income from pensions to $11,100.

It is time for Congress to adopt a comprehensive and consistent national retirement income policy. Without such a policy against which to measure each legislative proposal as it comes along, the goal of providing a secure retirement free of economic anxiety for every American will never be achieved. We need a detailed plan to reach our goal. This legislation provides both a framework and an impetus for the development of such a plan—a national retirement policy. I urge my colleagues to join with me in support of the Retirement Income Policy Act of 1985.

SUPERFUND

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. LENT. Mr. Speaker, one of the pressing issues for the House to address in the remaining weeks of this session is legislation to extend and expand the "Superfund" Program to clean up our Nation's hazardous waste sites.

On August 1, 1985, the Energy and Commerce Committee reported to the House H.R. 2817, the Superfund Amendments of 1985. Since that time, four other committees have considered H.R. 2817. Three of those four committees have left the basic Superfund Program established by H.R. 2817 intact. Only the Public Works and Transportation Committee reported a complete substitute to H.R. 2817.

Mr. Speaker, I, along with many of my colleagues, spent many months working on the Superfund reauthorization bill reported by the Energy and Commerce Committee. This is a well crafted bill that has achieved the delicate balance between the desire to mandate cleanup standards and schedules and the need to give the Administrator of the Environmental Protection Agency the flexibility to manage the program. I am sorry to say that the bill as reported by the Public Works and Transportation Committee is not such a bill and does not provide an efficient, effective cleanup program.

An editorial in yesterday's Washington Post points out some of the problems with the Public Works and Transportation Committee's Superfund bill. I commend it to the attention of my colleagues.

Mr. Speaker, I ask that the Washington Post editorial, "Superfund * * *," be inserted at this point in the RECORD for the benefit of the Members.

SUPERFUND

Superfund legislation, having languished in the House for the last few months, picked up steam recently as it moved through three more committees. It also picked up added baggage that, despite intentions to the contrary, may actually slow its effectiveness in cleaning up toxic dump sites.

The House must still reconcile the issues raised by the various committee bills—including the final big question of how to finance Superfund—and work out its differences with the Senate, which has already cleared a generally reasonable bill, in a manner acceptable to the White House. Any serious hitch along the way could force Congress to resort to a simple short-term extension of current law—and less progress against toxic hazards.

Apart from its dilatory tendencies, Congress has been slow to reauthorize Superfund because there are genuine uncertainties about how to determine which dumps are hazards, how to clean up those that are and how to assign responsibility for their creation in the first place. Advocates of fast, mandatory action often fail to acknowledge that evidence of actual harm from dump sites is still scanty and that each site can present unforeseeable challenges. While Rita Lavelle's shenanigans as Superfund

chief should not be forgotten, many of the deficiencies of past cleanup efforts arose from ignorance about how best to proceed rather than from deliberate shortcutting.

Arguably the most efficient way to deal with toxic dumps would be to give considerable discretion to the EPA to assess hazards, assign liabilities and select cleanup methods. But the House Public Works Committee, stiffening requirements in a bill reported earlier by the Energy and Commerce Committee, wants to keep EPA on a shorter rein by setting strict timetables for cleanups and precise standards for reducing each type of toxic. The Judiciary Committee also would allow citizen groups to push their own cleanup priorities by suing EPA to force cleanup of specific sites. And while the various measures would make some reforms that might speed cleanup agreements among liable parties, Judiciary would add a new courtroom opportunity for both liable companies and citizen groups to block EPA cleanup efforts if they disagreed with the method chosen.

Given unlimited time and money, all this judicial and community review might produce a somewhat safer cleanup effort—but even that's not a sure thing. And time is important where a dump may leak into ground water. Nor is Superfund money "free"—though it may seem so to districts clamoring for their share. No matter how the taxes to finance the fund are levied, cleanup costs will ultimately be added to the prices of the goods bought by consumers or they will show up in jobs lost to foreign competitors. Those costs will be much higher—and progress much slower—if the new Superfund bill encourages lawsuits instead of cleanup.

GORBACHEV'S JEWISH GAFFE

HON. H. JAMES SAXTON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. SAXTON. Mr. Speaker, I would like to bring to the attention of my colleagues an outstanding article by Alan Dershowitz which was printed in today's Washington Times. Mr. Dershowitz gives a devasting rebuttal to Mikhail Gorbachev's statement that he would like to hear of countries that give more rights to Jews than the Soviet Union.

GORBACHEV'S JEWISH GAFFE

When instructing the jury on how to assess the credibility of a witness, a trial judge generally notes that if a witness has been caught in one lie, the jury should view the rest of his testimony with suspicion.

It's useful to keep that bit of folk wisdom in mind as we assess the credibility of the Soviet Union's new media superstar, Mikhail Gorbachev.

The young Soviet leader recently gave the following "testimony" in response to a question about human rights and Soviet Jewry that was put to him by a French journalist: "Well, I can tell you, if there is another country in the world in which Jews have the social and political rights to the extent they have in our country, I would be delighted to hear about it."

Well, perhaps this bit of demonstrable nonsense from the mouth of Mr. Gorbachev wasn't quite a lie. After all, Mr. Gorbachev didn't assert that Soviet Jews were treated well. He simply said that he would be "delighted to hear" about any other country that gives Jews more rights.

Mr. Gorbachev's willingness to "hear" reminds me of the old story of the Bolshevik who brags to a skeptic about the wonders of Soviet science. The Bolshevik claims that Soviet scientists have developed a technique for talking to dead people hours after they've expired. "Sure," says the skeptic, "they can talk, but will the corpse listen?"

In the hope that Mr. Gorbachev may listen, let me venture to tell him about the rights Jews have in other countries that are denied them by his country. (Much of what is true for Jews applies equally to other religious minorities, but I will discuss the rights of Jews, because that is the group singled out by Mr. Gorbachev.)

In other civilized countries, Jews can teach their children the tenets, language, and culture of their religion. In the Soviet Union, the teaching of these subjects is a crime punishable by imprisonment. Even during Mr. Gorbachev's short tenure, an average of one Hebrew teacher per month has been jailed.

In other countries, Jews are free to support or criticize Israel. In the Soviet Union, consistent condemnation of Israel is a prerequisite for advancement and acceptance. It's no surprise that there are currently no Jews in positions of real power in the Soviet Union, despite the fact that there are at least 3 million Jewish citizens of that nation.

In other countries, Jews are admitted to universities on the basis of their accomplishments. In the Soviet Union, certain university departments are entirely closed to Jews, while in others, Jewish enrollment is restricted by rigid and tiny quotas.

In other countries, Jews aren't required to carry papers that identify them as Jews. In the Soviet Union, Jews are specifically identified by "nationality" on their internal passports.

In other countries, private anti-Semitism is tolerated under the rubric of free speech. In the Soviet Union, anti-Jewish propaganda is officially promoted in party-controlled publications, despite Lenin's condemnation of anti-Semitism as "the socialism of fools."

Most important, in every other country in the world (except Syria), Jews are free to exercise their most fundamental right: the right to leave and live their lives elsewhere. In the Soviet Union, hundreds of thousands of Jews are either overt or covert "refuseniks"—people who would like to emigrate, but who have been refused permission.

This last point is the true test of Mr. Gorbachev's hypothesis. If Mr. Gorbachev is right—if Soviet Jews do, in fact, have more rights in the Soviet Union than in other countries—then the proof would be if they were to remain in his wonderful country even if the exit gates were suddenly to open.

How about it, Mr. Gorbachev, are you willing to put your testimony to the test of truth?

Why not declare a one-month free-exit period, during which any Soviet citizen dissatisfied with his or her rights could opt to leave?

Let Mr. Gorbachev then try to convince "his" Jews that they have more rights in the Soviet Union than in other countries. Perhaps some will be persuaded. Certainly others won't. Those who are persuaded should be free to remain. Those who aren't should be free to leave.

At the very least, Mr. Gorbachev should release the one Jew who has been denied all of his rights. That man is Anatoly Shcharansky—who, for the past eight years, has been languishing in the Gulag for the "crimes" of wanting to join his wife in Israel and speaking out on human rights.

Mr. Shcharansky is in ill health. There are rumors that Mr. Gorbachev might be willing to release him, along with Andrei Sakharov, as a good-will gesture in anticipation of the upcoming summit. That would be a welcome gesture, and it would help to restore some of Mr. Gorbachev's tarnished credibility following his false testimony about Soviet Jews.

One way to correct an untruth is to change the facts to make them correspond to what has been said. Giving all Soviet citizens the rights Mr. Gorbachev has said they have would be a welcome change.

TROUBLES IN THE OIL INDUSTRY CONTINUE

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. FLORIO. Mr. Speaker, I am inserting in the RECORD a recent article describing the continuing troubles in the oil industry due to the massive restructuring that is going on.

The consequences include lost jobs, falling wages, volatile prices, and an influx of foreign purchasers. For the most part, all of this is taking place without consideration by Federal officials of the costs to local communities and the national interest. I am afraid this is one more policy of neglect we will come to regret.

[From the New York Times, Oct. 9, 1985]

A SHAKEOUT IN EAST'S REFINERS

PHILADELPHIA, Oct. 8.— A Dutch oil trader could soon be one of the biggest gasoline dealers in the East.

The dealer, John Deuss, recently completed the purchase of the Atlantic Richfield Company's oil refinery here. Now he intends to bid on the other sprawling refinery at the mouth of the city's Schuylkill, the Gulf Oil plant that was put on the block in early September by Gulf's parent, the Chevron Corporation.

The sale of the Arco refinery and Chevron's decision to solicit bids—and the sudden emergence of Mr. Deuss as an important new force in the region—are only the latest developments in what many analysts describe as a shakeout in the East Coast refining industry, which is concentrated in Pennsylvania, New Jersey and Delaware.

SURPLUS IN SLUGGISH MARKET

Eastern refiners have been pressed by a worldwide excess of gasoline, heating oil and other refined products, a widening flow of imports and a sluggish consumer market. Some have responded by cutting back, and others have even abandoned the nation's most populous region. But further changes seem certain, analysts say.

A flat market for oil products already has caused more than 100 refineries to close throughout the country since the early 1980's, leaving about 220 plants. Most of the casualties have been small plants in the Middle West and West. Eastern and Gulf Coast plants, which enjoyed a proximity to either supply or markets, were hurt but not

as badly. Now, analysts fear that the East Coast refineries will face more serious difficulty.

Further market slippage for the refineries in the East—including eight major facilities within 30 miles of Philadelphia—could be devastating, analysts say, because of the prevalence in the region of aging plants and higher-than-average wages.

"NOT THE MOST EFFICIENT"

"The East Coast may be hit harder than some other places," said Lee H. Solomon, a Dallas-based consultant to United States oil companies. "Generally, East Coast refineries are not the most efficient."

Total refining capacity for the region—all East Coast states plus West Virginia—has already dropped 15 percent since January 1981, sliding to 1.6 million barrels a day by the middle of last month, from 1.9 million, according to Energy Department figures. The region's capacity represents about 10 percent of the national total of 15.6 million barrels a day, down from 18 million in January 1981.

A major uncertainty hanging over the refiners is the impact of increased foreign participation in the region. Besides Mr. Deuss, who has a history of large oil deals involving South Africa, the Soviet Union and others, Kuwait's Government-owned petroleum company is reported to be considering a bid for the Gulf plant and other Chevron properties. The Kuwait Petroleum Corporation tried to purchase a Gulf Oil refinery in Louisiana from Chevron last year, but lost in the bidding to the Standard Oil Company (Ohio).

A COMPETITIVE ADVANTAGE

Both the Kuwaitis and Mr. Deuss, who is said to have close ties to Oman and to members of the Organization of Petroleum Exporting Countries, could establish commanding market positions on the East Coast by importing low-priced crude oil to process in their refiners, analysts speculate.

Mr. Deuss paid a total of $192 million in the Arco deal, excluding oil supplies on hand, a price that most industry analysts consider to be extremely low. That, plus his trading experience and connections to the Middle East, could give him an important competitive edge, analysts said.

Mr. Deuss, who is head of a global network of oil trading and marketing concerns, also got 550 service stations in New York and Pennsylvania in the deal for Arco's 125,000-barrel-a-day refinery. He also ended up with 2,000 of Chevron's stations, stretching from New England to Virginia, which were put on the block with the 174,000-barrel-a-day Gulf plant. The bidding on the Chevron properties is scheduled to close in mid-October and a final decision on selling the properties is expected by the end of the year.

All of the eight refineries operating near Philadelphia have been affected by the new operating climate. Those that have not been put on the block have made significant cuts in their work force, either through layoffs or attrition. And all are involved, one way or another, in the continuing reshuffle of service stations and other marketing facilities by major oil companies throughout the East.

The Sun Company, for example, slashed the payroll at its Marcus Hook, Pa., refinery by more than 1,000 workers last year, 20 percent of the total, even as it was swapping its Florida gasoline outlets for Mobile stations closer to its suburban Philadelphia home.

Equally dramatic were the cutbacks at Texaco's former Eagle Point refinery, on the New Jersey side of the Delaware River. Forced to divest itself of the plant as part of its $10.1 billion merger with Getty, Texaco sold Eagle Point to the Coastal Corporation of Houston.

Coastal, which nurtures a reputation within the oil industry for no-frills operations, told Eagle Point's 485 employees that neither they nor their union contracts were part of the sale. The refinery was shut down briefly and the workers formally laid off just before the deal was closed earlier this year, and although many were rehired by the new owners, the plant now operates with about 300 workers and no union contract, according to a Coastal spokesman.

TOTAL WAGES DECLINE

Wages in the refining industry in the Philadelphia area totaled around $334 million last year, down 6.4 percent from the year before because of the staff cutbacks, according to Andrew Moody, an economist with Chase Econometrics, the forecasting firm based in Bala Cynwyd, Pa. The Philadelphia area now accounts for only 6 percent of all employment in the United States oil industry, down from 9 percent in the 1950's, Mr. Moody said.

Elsewhere in the East, some refineries, such as Chevron's in Perth Amboy, N.J., have been closed completely. Others, including Exxon's giant plant in Linden, N.J., and the Hess refinery at Woodbridge, N.J., have mothballed various operations that were running far under capacity. Much of the gasoline, heating oil and other petroleum distillates they produced have been replaced by cheaper products from the Gulf Coast and abroad.

Those imports have been rising sharply since the beginning of this year, reaching 371,000 barrels a day at the end of August from slightly more than 200,000 barrels a day in January, according to an Energy Department report.

Robert Speir, an oil analyst with the department, said the East Coast received the bulk of that flow, as oil traders and producers sought to take advantage of rising retail gasoline prices. Ironically, Mr. Speir said, that price rise was prompted by United States oil refiners cutting back production themselves in order to prop up sagging pump prices here.

"The importers are taking advantage of the situation that U.S. refiners created," Mr. Speir said.

In other efforts to cope with the changing industry environment, some refiners have been trying to make their plants more flexible with new equipment designed to expand their ability to process different crude oils. For example, Mobil recently installed at its Paulsboro, N.J., refinery a $20 million alkylation unit that increases the output of high-octane unleaded gasoline.

Analysts say the logistical advantage that Eastern refineries have by being close to their markets is lessened or eliminated because their equipment is older and their costs for both labor and energy are higher.

The refiners' largest worries, however, remain the price of crude oil and the appetite of the retail market for their products. Some executives, such as the vice president for fuels at Sun, J. Van Dyck Fear, remain optimistic that the declining cost of crude oil eventually will cause East Coast demand to rise.

Others are less hopeful, "I don't ever expect to see demand rebound," said Mr. Solomon, the Dallas consultant. He predicts another 400,000 to 500,000 barrels a day of refining capacity will be shut down nationwide before the situation stabilizes, with most of the cuts coming along the East and Gulf Coasts.

THE SISTER OF CHARITY OF NAZARETH'S 100TH ANNIVERSARY COMMEMORATION

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. DYSON. Mr. Speaker, I would like to bring to the attention of my colleagues the 100th anniversary celebration of the Sister of Charity of Nazareth in St. Mary's County, MD.

As we in Maryland commemorate the Sister of Charity of Nazareth's untiring and unwavering commitment of faith during the past century, I believe it is altogether fitting that we give thanks to the sisters who, over the generations, have brought comfort and light to so many people. On momentous occasions such as this, we not only share remembrances of a rich and vibrant past, but we also prepare to perpetuate ideals far into the future.

On November 3, St. Mary's Academy will help mark the centennial anniversary of the Sister of Charity of Nazareth's continuous service to the people of southern Maryland. As this special day approaches, I praise the sisters for their spirit of compassion and charity, and hope that their community continues to grow and prosper in the years to come.

THE LATIN DEBT CRISIS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. GARCIA. Mr. Speaker, the Washington Post ran an editorial and an article today on the Latin American debt crisis.

Both pieces offer insight on how to handle this growing problem. I maintain that the heavy burden of debt is the biggest threat to Latin democracies. The more we know about this pressing crisis, the better we will be prepared to offer reasonable solutions.

I am submitting both articles for my colleagues' perusal.

[From the Washington Post, Oct. 22, 1985]

LATIN DEBTS AND SOLUTIONS

As the American proposal on world debt takes shape, the first reaction from Latin America seems to be that there's not enough money in it. But the amount of new lending required will depend heavily on the Latin governments themselves. There's another element of any solution that requires much more attention than it's been getting, and that is the flow of money going there in direct investment.

To the extent that the indebted countries can attract new investment, it will displace

the need for additional loans. But if they cannot, the outlook becomes more somber than ever. It is not realistic to think that any likely amount of help from the World Bank, and coerced lending from the commercial banks, will suffice by itself to balance the Latin countries' accounts.

The rich countries have their own responsibilities here. The commercial banks may have to write off some part of their past loans. The industrial countries will probably have to put up more money to support expanded lending by the World Bank. The United States in particular is contributing to the Latins' troubles with its own huge—and hugely self-indulgent—budget deficits. By keeping American interest rates high and drawing in capital from all over the world, the United States makes it much harder and more expensive for the Latins to attract the capital they desperately need.

But there is also much that only the Latins themselves can do. A lot of their present debt, for example, was generated by financing the flight of capital from their own countries. That is not true of Brazil, but it happened on a large scale in Mexico and, especially, in Argentina. Latin banks borrowed dollars in the United States and sold them to customers who sent them right back to New York and Miami for safekeeping. The great challenge for these countries now is whether they can re-establish an atmosphere in which their own citizens decide to bring their money home.

That's not going to be easy. Mexico had nearly accomplished the feat early last year but then miscalculated and overstimulated its economy. Wealthy Mexicans, foreseeing another surge of inflation and devaluation, quickly began shipping their money north again. The questions of internal stability and attraction to movable money can only be resolved by the Latins themselves.

The proposal that the U.S. secretary of the Treasury, James A. Baker, made at Seoul calls for solutions that share costs between borrowers and lenders. But it also calls for a measure of change in the structure of the indebted countries' economies. The object is to get these economies growing again, steadily and strongly. To do that will require—among other things—a climate in which investment capital again flows freely into Latin America.

[From the Washington Post, Oct. 22, 1985]

VOLCKER URGES MORE LOANS TO LATIN DEBTORS—ADDRESSES BANKERS

(By James L. Rowe, Jr.)

Federal Reserve Board Chairman Paul A. Volcker yesterday urged commercial banks to increase lending to Latin American debtor nations to stimulate economic growth in those countries, and said that it would require a relatively small boost in lending.

Volcker said that the U.S. government's plan to encourage growth in the economies of Latin American debtor nations would involve only a 2.5 percent to 3 percent yearly increase in bank lending to the region.

That is a far slower rate than the rate at which banks boosted their loans to Latin America in the late 1970s and early 1980s.

Volcker said that the $20 billion U.S. Treasury Secretary James A. Baker III wants banks to lend over the next three years is about what Mexico alone borrowed from commerical banks in 1981.

The Federal Reserve chairman told reporters that "everybody will be better off" if banks cooperate with the debt plan unveiled by Baker earlier this month during the annual meetings of the World Bank and International Monetary Fund in Seoul.

At a press conference following an address to the annual convention of the American Bankers Association, Volcker said it was up to banks whether to increase their lending to developing nations on a bank-by-bank basis or as a group. Since the onset of the so-called Latin American debt crisis three years ago, banks have negotiated collectively with individual debtor nations.

Volcker also met with executives from more than 100 of the nation's biggest banks yesterday to outline the Banker proposal and to urge them to join in the plan to resuscitate Latin American economies. Although many of the debtor nations have resumed economic growth—after devastating recessions in 1982, 1983 and early 1984—their income levels are no higher than they were a decade ago.

The Baker proposal is a recognition that Latin American nations are chafing under the austerity programs they have imposed during the last three years. Those measures represent an effort by the debtor nations to husband dollars to pay their more than $350 billion in foreign debts, about $230 billion of which is owed to commercial banks.

The plan not only calls for a $20 billion increase in commercial bank lending over the next three years, but also for a $9 billion increase in lending from multinational institutions such as the World Bank and the Inter-American Development Bank. Many of the loans from the official institutions would be tied directly to domestic economic changes that would require the debtor nations to dispose of some of their money-losing, inefficient state companies and open up their economies to more internal and external competition.

"Happily, that is the direction in which new leaders in Latin America—democratically elected leaders—have repeatedly said they want to take," Volcker said in remarks prepared for delivery to the bankers group.

He told the bankers that more growth cannot be achieved in Latin America without a "moderate" increase in lending from commercial banks, but said that the banks and the countries have a "common interest in sustainable growth—growth necessary to meet the legitimate aspirations of the borrowers and growth not unduly dependent on external finance."

He said the growth would "progressively lighten both the heavy debt burdens of the borrowers, relative to the size of their economies, and the exposure of the lenders, relative to their assets and capital."

Volcker said that debtor nations that take steps to reform their economies and to continue to pay their debts "can legitimately ask that they have some assurance" of increased loans from commercial banks and international institutions as long as the countries "do their part of the job."

PERSONAL EXPLANATION

HON. HAROLD ROGERS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. ROGERS. Mr. Speaker, on Wednesday, October 16, I was unable to be present for the vote on final passage of H.R. 1409, the military construction authorization for fiscal year 1986. Had I been present for rollcall No. 369, I would have voted "aye." In addition, had I been present I would also have voted "aye" for rollcall No. 362, providing military construction appropriations for fiscal year 1986.

LEON KLINGHOFFER REPRESENTED WHAT IS BEST IN AMERICA

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. WEISS. Mr. Speaker, Leon Klinghoffer represented what is best in America. He was a courageous and determined man who fought injustice all his life. During the Second World War, he served his country in the Army Air Corps. After the war, he realized a dream of millions of Americans—starting with little more than their own ingenuity and determination, he and his brother built a company to manufacture a product which they themselves had invented. As a philanthropist, he then shared his good fortune generously with others.

In recent years, partly paralyzed by a stroke, he refused to accept the limitations of his disability. He set for himself the goal of escorting his daughter Ilsa at her wedding 2 months hence, and had he lived he would not have rested until he had achieved that goal.

When he was attacked by the *Achille Lauro* terrorists, Leon Klinghoffer, disabled as he was, resisted courageously.

Mr. Speaker, it is altogether fitting that we honor this brave American. Together with Senator D'AMATO, I am therefore introducing legislation to confer the Congressional Gold Medal of Achievement on Leon Klinghoffer posthumously. I invite all members of the House to join me as cosponsors.

H.J. RES. 425

Joint resolution concerning the cruel and inhuman killing of Leon Klinghoffer by international terrorists aboard the cruise ship *Achille Lauro*, because he did not submit to the demands of the terrorists

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled.

Concerning the cruel and inhuman killing of Leon Klinghoffer by international terrorists aboard the cruise ship *Achille Lauro*, because he did not submit to the demands of these terrorists.

Whereas the Italian cruise ship *Achille Lauro* was on a peaceful journey in the Eastern Mediterranean Sea in international waters;

Whereas, the *Achille Lauro* was seized by a group of terrorists for the purpose of frightening and threatening the passengers, their relatives, and law-abiding citizens everywhere, and for the purpose of drawing attention to the terrorists' goals;

Whereas the terrorists were armed and dangerous and attempted to force the passengers and crew of the *Achille Lauro* into submission to further their purposes of terror, anarchy, hate, and death;

Whereas the terrorists have been charged under United States law with hostage-taking, piracy, and conspiracy to commit both;

Whereas Leon Klinghoffer, a 69-year-old, dearly beloved American who was crippled and confined to a wheelchair, did not submit to the demands of the terrorists; and

Whereas the terrorists brutally killed Leon Klinghoffer by shooting him several times and throwing his body overboard because he resisted their demands;

Now therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That

(1) the Congress award posthumously to Leon Klinghoffer a Congressional Gold Medal to show Congress' admiration for the bravery of Leon Klinghoffer, a handicapped senior citizen, who, during his kidnapping by terrorists on the high seas, did not submit to terrorist demands to further the objectives of terrorism, and who gave his life as a result of this resistance;

(2) the Secretary of the Treasury is directed to strike and issue this gold medal in accordance with the national medals provisions of section 5111 of title 31, United States Code;

(3) the President is authorized to present this gold medal, on behalf of the Congress, to Marilyn Klinghoffer, the widow of Leon Klinghoffer; and

(4) such sums as may be necessary to provide and present this fitting tribute are hereby authorized to be appropriated.

FOREIGN INVESTMENT IN U.S. ASSETS INCREASING

HON. JOHN BRYANT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. BRYANT. Mr. Speaker, foreign investment in U.S. assets—made attractive by America's record budget deficits, which have driven up interest rates, and made possible by our Nation's record trade deficits, which are depositing billions of our dollars on foreign shores—is increasing rapidly.

Foreign governments, corporations, and individuals own $1 trillion in U.S. assets here that we are aware of and conceivably much, much more that we do not know about. Foreign interests can invest here freely—and, if they choose, largely anonymously—while Americans are generally denied the same opportunities for ownership of assets abroad as most countries of the world have either outright prohibitions against certain types of investment, limitations on the extent of out-of-country ownership, or complicated protectionist approval procedures.

I have introduced the "Foreign Investment Disclosure and Reciprocity Act," H.R. 2582, to require full public disclosure of major foreign holdings here and to demand that other countries accord our investors the same investment opportunities there that we permit their investors here.

Although this issue thus far has received relatively little public attention, it is of major importance with regard to the U.S. position in the world economy. For that reason, I would like to call to the attention of my colleagues and the American public a recent article in the Washington Post which details some of the increasing foreign investment here of which we are aware.

FOREIGN FIRMS EYE UNITED STATES FOR ACQUISITIONS

(By Michael Schrage and David A. Vise)

Shearson Lehman Bros. merger chief Stephen Waters believes that when he goes to London later this month to speak at a financial conference, the most crowded session will be his primer on how to pursue a hostile takeover—American style.

The session's popularity is just one sign of a recent surge in curiosity and activity by foreign companies tempted by the prospect of acquiring U.S. corporations.

The increasing globalization of consumer and industrial markets, he desire to buy a stake in the relatively robust U.S. economy, and, more recently, the decline of the dollar have combined to ignite a new acquisitiveness in the United States by some of the largest multinational corporations from abroad.

The surprise is "the dimensions of interest," and Jeffrey Rosen, head of international mergers and acquisitions at First Boston Corp. "It is no longer confined to $25 million-to-$50 million deals or, at the outside, $200 million deals.

"What we are seeing is a significant interest in very large acquisitions across a broad spectrum of industries and much greater U.S.-style sophistication in terms of acquisition techniques. People are no longer afraid of a deal that may require a more aggressive approach to get the deal done."

"It's brutal, blunt, direct and fast," said Citicorp mergers and acquisition specialist Kamal Mustafa, referring to the effect of U.S. takeover tactics adopted by foreign companies. "It's got all the efficiencies associated with a lack of tact."

Musafa and Rosen point to last year's $2.9 billion takeover of Carnation Co. by Switzerland's giant Nestle Co. Inc. as the "watershed" acquisition that sparked the multi-billion-dollar takeover-bid boom. The also cite Dutch-British conglomerate Unilever's bid for Richardson-Vicks Inc. and London-based Hanson Trust PLC's bid for SCM Corp. this year as examples of foreign companies willing to risk hostile-takeover bids.

Part of this new aggressiveness is directly attributable to the frenetic pace of domestic U.S. merger and acquisition activity.

If foreign companies were to delay, "most of the big deals would be gone," according to Citicorp's Mustafa. "These companies want to buy the No. 1, 2 or 3 American companies [in their industries]—if they buy Nos. 4, 5 or 6, they might not get anywhere."

For example, Unilever, eager to expand its consumer-products presence in the United States, has not given up after failing in its bid to acquire Richardson—Vicks Inc. Even though Unilever's bid for Vicks led to the sale of the company to Procter & Gamble Co.—Unilever's biggest competitor—Unilever spokesman Humphrey Sullivan said last week that the company is looking for another U.S. acquisition target.

Consequently, foreign companies now are working with U.S. investment bankers to assure that they have a crack at premium American companies. Citicorp said that it has doubled the number of its international mergers and acquisitions specialists over the past year. Goldman, Sachs & Co. has moved international merger specialists from New York to London. First Boston said it will "significantly increase" the number of professionals it has working on international deals.

The specialists stress that corporate strategies, not favorable exchange rates, are the motivating force behind most major acquisitions.

"The real point is that exchange rates are not driving this activity," First Boston's Rosen said. "It is much more fundamental than that. I was in England for a couple of days this week, and we asked British companies what effect the weaker dollar would have on their acquisition strategy. The consistent response was, 'It's merely the icing on the cake, and we're hungry for the cake.' "

"I don't feel the strength and weakness of the dollar has any major impact," said Michael Henning, managing partner of Ernst & Whinney in New York. "As long as [foreign companies] borrow in dollars to make the acquisition in dollars, they are hedged."

However, venture capitalist Frederick Adler, a financier who specializes in leveraged buyouts, stated, "A European technology executive from a $1 billion-a-year company commented to me that, since the drop in the dollar, their interest has increased. We've seen a pick-up in interest and it's a logical pick-up."

Increased interest has been especially noticeable in high technology, a segment that has attracted foreign companies, even though it is undergoing a major shakeout.

"The cheaper dollar has to make it easier for foreign companies to come in," said Gilbert Mintz, a partner at Broadview Associates, which is a broker for mergers and acquisitions in the data-processing-services industry. "The cheaper price for American technology is going to spur a brisk round of foreign acquisitions here in America. It will be interesting to see what their impact will be on American software firms. We've seen interest from a number of foreign firms—Thorn EMI, Olivetti, Reuters, Pergamon . . . .

"The major area of aggressive interest seems to be Great Britain, and there's also interest from France. I think it's just a matter of time before the Japanese get their act a little bit more together."

British companies led foreign activity last year with 50 major deals in industries ranging from retail to oil to industrial products, according to Mergers & Acquisitions magazine. Canadian and Japanese companies were the next most active.

But a key difference recently has been the size of deals—Royal Dutch Shell's $5.4 billion acquisition of Shell Oil, Broken Hill Proprietary Co. of Australia's $2.4 billion acquisition of General Electric Co.'s Utah International Co. and Hanson Trust's $487.6 million acquisition of U.S. Industries Inc.

Several Japanese companies—such as computer giant Fujitsu Ltd. and ballbearing manufacturer, Minebea Co. Ltd.—already have shown a willingness to come into the United States by taking over U.S. firms. Fujitsu's stake in the Amdahl computer company and Minebea's recent acquisition of New Hampshire Ball Bearings Inc. reflect Japanese desires to establish equity positions in U.S. companies that have a good technology and distribution base.

"An American company is good for ideas, development capabilities and marketing," said Takami Takahashi, Minebea's president. "We're much better at the production."

25 LARGEST FOREIGN ACQUISITIONS OF U.S. INTERESTS 1984

Acquirer	Acquired/merged firm	Price (millions)
1. Broken Hill Proprietary Co. (Australia)	Utah International Co	[1] $2,400.0
2. Bank of Montreal (Canada)	Harris Bankcorp, Inc	546.6
3. Hanson Trust PLC (England)	U.S. Industries, Inc	487.6
4. Fuji Bank Ltd. (Japan)	Commerical finance units of Walter E. Heller International Corp	[1] 425.0
5. News Corp., Ltd. (Australia)	Business publications division of Ziff-Davis Publishing Co	[1] 350.0

"We are looking at companies for the Japanese," said Citicorp's Mustafa. "They are starting to fine-tune their criteria for acquisitions. While there are no hostile acquisitions yet, one of them will come in on a public issue and win a bidding war, and there is a certain tendency to follow the leader in Japan, so that would mean more hostile-acquisition activity."

While some merger experts believe that hostile takeover bids by such foreign companies as Unilever and Hanson are the beginning of a round of aggressive foreign takeover attempts, Sir Gordon White, who directs Hanson's U.S. activities, said last week that he thinks just the opposite is true. White said that his company's controversial fight for control of SCM Corp. is exposing unfair and complex antitakeover tactics used by U.S. corporations, which will discourage future hostile takeover bids by foreigners.

The feedback I'm getting from Great Britain and France is that they are horrified," White said last week. "They cannot understand how companies in the U.S. are allowed to put in restrictions that take power away from shareholders. In Britain, the shareholders get the best deal. I don't see [other foreign companies] coming over. They cannot understand these tactics. I can't imagine French or Italian companies [getting involved in a takeover attempt in which aggressive antitakeover tactics are used]. They don't even speak the same language. They'd [end up] jumping off the Empire State Building."

Ironically, merger and acquisition battles between American firms also may spark new foreign acquisitions, Mustafa said.

"In the U.S., one of the few defenses that exist against hostile takeovers is the white knight," or friendly company, he said. "However, American white knights often change color overnight to gray or black" to pursue their own ends, according to Mustafa. As a multinational corporation itself, Citicorp has been collecting a stable of foreign companies to act as potential white knights to rescue beleaguered American takeover targets. "The foreign white knight doesn't change color that fast," he said.

THE REAGAN ADMINISTRATION'S DEFINITION OF RACISM

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. RANGEL. Mr. Speaker, the Reagan administration has embarked upon a campaign for disinformation in the area of civil rights. This is certainly not a new tactic, but it has become apparent that civil rights enforcement is in jeopardy.

It is in jeopardy because President Reagan talks about promoting racial equality, but has done little to match his words with action. The administration has issued a barrage of statements proclaiming that the need for Federal initiatives in civil rights enforcement is no longer necessary. Rather, minorities and women should rely upon the kindness of the private sector and local governments.

Someone should inform the White House that disadvantaged groups were discriminated against precisely because the Federal Government was kept out of the civil rights market.

One blatant example of Reagan's lack of understanding in this area is Prince Edward Academy in Farmville, VA. Prince Edward Academy has a long history of racist admissions policies. In fact, it was founded in the late fifties when the Farmville area closed its public schools rather than allow them to be integrated. Prince Edward Academy has since refused to admit black students, despite a recent declaration of an open-admissions policy.

The administration has given the academy tax-exempt status based solely upon its declared open-admissions policy. No attempt has been made to determine whether this policy is enforced, and no one in the administration has voiced his or her opposition to this obvious example of discrimination.

I would like to bring the following article by William Raspberry to the attention of my colleagues. It is a good analysis of the Prince Edward case. I urge my colleagues to read it closely:

[From the Washington Post, Oct. 11, 1985]

THE RACISM DOESN'T SEEM TO MATTER

(By William Raspberry)

The counterrevolutionary philosophers of the Reagan administration are back: attacking the remedy and ignoring the disease.

In their most recent clock-reversing actions, they have (1) gone out of their way to interfere in a settlement worked out between the city of Omaha and a group of black police officers and (2) granted tax-exempt status to a Virginia school that came into existence as a means of thwarting the Supreme Court's 1954 desegregation decision.

In the Omaha case, the black officers, disappointed that a new pool of 170 candidates for the police academy included only five blacks, took the matter to federal court. U.S. District Judge C. Arlen Beam did not say how many blacks, if any, must be hired, but he did order the city to add 27 to 35 black applicants to the pool.

That was enough to start the Justice Department counterrevolutionaries screaming "Quotas!" Department lawyers have asked Judge Beam to strike that part of his order calling for adding blacks to the pool.

Deputy City Attorney Jim Fellows is asking the feds to butt out. The city considers the matter settled and would prefer to get on with training the new officers it needs.

Prince Edward County, Va., became a national symbol of "massive resistance" when, rather than bow to the Supreme Court's 1954 desegregation decree, county officials

simply shut down the public school system. Black children in that economically depressed area either were taught at home for the next five years, without any official support or concern, or else shipped off to live with relatives. Whites, meanwhile, pooled their resources and opened the whites-only Prince Edward Academy.

There had been some limited consolation in the fact that the Internal Revenue Service has disallowed tax-exempt status for the school (as counter to public policy), meaning that the school would at least be subject to federal taxes and that contributions to it would not be tax deductible.

Now the Reagan administration has reversed that policy and given the academy its tax-exempt blessing. It turns out that (according to its application to the IRS) the academy's board adopted an open-admissions policy last year. It still has no black students, mind you, but that is because none has applied. It does, its statement boasted, have American Indian, Vietnamese, Spanish, German and French students.

Well, la-de-dah.

As James Ghee, the state NAACP president and a resident of Farmville, understated it, "I am surprised to see that the academy, by merely making a statement that it doesn't discriminate, would be granted its tax-exempt status back. Nothing has changed in the policies or procedures of Prince Edward Academy."

Ghee's remark underlines the most striking aspect of the Reagan administration's approach to racial discrimination: its obsession with process and its lack of interest in results.

An administration seriously concerned about segregation, discrimination and other impediments to equal opportunity would want some concrete evidence that Prince Edward Academy had mended its ways. The presence of black students would be persuasive, but so would signs of a serious effort to recruit black students. But for the counter-revolutionaries, who are more comfortable with racism than race-specific remedies, the plain statement of open admissions is enough.

An administration that understood—and cared about—the importance of the appearance of racial fairness would want to know why Omaha, with a black population of upwards of 12 percent, would have a police recruit class of less than 3 percent. It would be open to the possibility of a reasonable explanation (and also open to the possibility that the numbers were symptomatic of a wider problem), but it would ask the question.

But for those in this administration who believe the wrong side won the civil rights revolution, real-world results are a side issue. Given the choice between an ideologically pure approach and a reasonable outcome, they'll fake ideological purity every time.

THE SANDINISTAS SHOW THEIR TRUE COLORS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. BIAGGI. Mr. Speaker, several months ago I voted for legislation that passed both Houses to provide $27 million in humanitarian aid to the Contras in Nicaragua who are working to restore democracy in that nation. I voted for the aid in large measure because of two fundamental and related concerns I have about the Sandinista regime in Nicaragua.

The first relates to their increasing and open tendency to be aligned with the Soviet Union. This included several celebrated visits that President Ortega made to Moscow in recent months in pursuit of Soviet aid.

The second concern relates to the brutal internal policies practiced by the Sandinistas in Nicaragua. In many respects their alignment with the Soviet Union has produced a Soviet-like state in Nicaragua.

During the heat of the debate in Congress as to whether or not to provide the aid to the Contras, President Ortega made a number of claims of reforms and contended that the allegations made against his government were unwarranted. The Congress disagreed and voted to provide the aid to the Contras.

This week, it appears that the Sandinistas are displaying their true colors. On Tuesday, President Ortega announced that he was suspending a wide range of civil rights and was broadening a national state of emergency first established in March 1982.

According to a report filed by UPI and reported in the October 16 Washington Post:

The rights that were suspended cover the right to public meetings, to strike, to freedom of expression, to move about freely within the country and to organize into labor groups.

The article continued:

Legal experts said the measures announced today permit police or other authorities to raid and search homes. They also suspend protection against unwarranted detention, the right to a speedy trial and the right to appeal convictions.

The suspension of rights announced by President Ortega will last for 1 year. In his statement Ortega charged the United States with sabotage and used this as his justification for imposing these harsh measures.

The administration's response to this action was swift and critical. White House spokesman Larry Speaks said:

It's a clear example of Nicaragua tightening their control over their country and violating basic freedoms by refusing to tolerate dissent. Our reaction will be that these individuals have trampled on the civil liberties as few countries have ever done. Now it's in the area of personal freedom and privacy.

I contend that the Congress voted properly in supporting the efforts of the Contras in Nicaragua. We cannot concede the nation of Nicaragua to the Soviets whether directly or indirectly. The Soviet sphere of influence is spread far enough and should not be extended further. It is important that we maintain our position in supporting of the democratic forces in Nicaragua. It is obvious what they are fighting. Despite attempts at deception, the Ortega regime is anti-American, antidemocratic and needs to have continued pressure brought on it if there is to be any chance for improvement.

At this point in the RECORD, I insert an article from today's New York Post which focuses on the latest developments in Nicaragua.

NICARAGUA FOR RIGHTS SUSPENSION

(By Niles Lathem)

WASHINGTON.—The Reagan administration blasted the Nicaraguan government yesterday for suspending civil rights.

U.S. officials called the suspension a "further step" toward imposing a totalitarian regime.

The administration also accused the Nicaraguan government of particularly harsh treatment of members of the Nicaraguan Catholic church, including forcing priests into military service.

The tough statements came amid reports that Nicaraguan President Daniel Ortega is seeking a U.S. visa to travel throughout the nation making speeches.

State Dept. spokesman Bernard Kalb refused comment on the request and other officials said no final decisions on it had been made.

Earlier this week Ortega claimed his country could no longer tolerate U.S.-directed "sabotage and political destabilization."

He broadened the state of emergency in his country by taking a series of steps to suspend a wide range of civil rights for one year.

The steps include warnings against criticizing government policies and suspension of the rights to strike, meet publicly and move freely within the country.

The state of emergency also permits Nicaraguan security police to raid homes at will.

And it suspends all protection against false arrests or unwarranted detention, as well as the right to appeal convictions, State Dept. legal experts said.

"The Sandinista government has taken a further step toward imposing a totalitarian regime on the people of Nicaragua," said Kalb.

Denying that U.S. support of Nicaraguan freedom fighters had anything to do with the rights suspension, Kalb added:

"The action is the result of the growing disillusionment with the Sandinista regime by large sectors of the population and reflects the Sandinistas' fear of their own people."

The U.S. also provided fresh details about the persecution of the Nicaraguan church.

These include a late September decision to force 11 seminarians into military service, an Oct. 12 raid on all the Catholic church's presses and printing equipment used to publish its newspaper the Iglesia, and an occupation yesterday of the church's Social Service Agency by security officers, who refused to let clergymen enter.

"The Sandinistas obviously fear the strong support for the Nicaraguan church by the great majority of the Nicaraguan people," Kalb said.

CONGRESSIONAL SALUTE TO THE VALLEY ROAD COVENANT CHURCH OF MONTCLAIR, NJ, UPON THE CELEBRATION OF THE 90TH ANNIVERSARY OF ITS FOUNDING

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. ROE. Mr. Speaker, on Saturday, October 26, the people of Montclair, my congressional district, and the State of New Jersey will join with the pastor, Rev. John R. Martz, and the congregation of Valley Road Covenant Church of Montclair, NJ, to observe and commemorate the 90th anniversary of the founding of this highly esteemed parish. This historic event salutes our citizens of Swedish heritage who, over these past 90 years, have, by their example, engendered the esteem and respect of the residents of our community through their steadfast faith, hope, and charity in promulgating the richness of their religious culture through the establishment of the Valley Road Covenant Church.

Mr. Speaker, the faith and devotion of our people in a full communion of understanding, ever caring and respecting the individual religious beliefs of his or her fellow man has been the lifeline of our democracy—ever inspiring our people with hope and urging the individual on to great achievements and purpose in pursuing the fulfillment of his or her dreams and ambitions. The exemplary leadership and outstanding efforts of our citizens so important to our quality of life are in the vanguard of the American dream and today we express our appreciation to Pastor Martz and his predecessors whose dedication and unselfish devotion in promulgating spiritual guidance, good will, fellowship, and brotherhood in service to God have truly enriched our community, State, and Nation.

At the outset, may I commend to you the most esteemed pastors who have served the congregation of the Valley Covenant Church over the past 90 years with sincerity of purpose throughout the years in perpetuating its sterling principles in serving God by proclaiming His Word and ministering to the needs of the congregation and the community, as follows:

PASTORS WHO HAVE SERVED THE CHURCH

1895—Rev. C.J. Larson.
1897—Rev. C.G. Elstrom.
1900—Rev. Otto Nelson.
1901—Rev. C.M. Ahlberg.
1904—Rev. I.A. Astrom.
1908—Rev. Jonas Anderson.
1910—Rev. Arthur Bowman.
1913—Rev. Henry R. Nelson.
1918—Rev. Arthur Lindblade.
1923—Rev. G.A. Suber.
1930—Rev. J.J. Huleen.
1939—Rev. S.V. Hanson.
1944—Rev. Donald Hare (interim).
1946—Rev. Leonard O. Anderson.
1950—Rev. Wallace J. Starratt.
1953—Rev. Robert A. Sturdy.

1970—Rev. Thomas D. Anderson.
1973—Rev. Michael D. Redmond.
1979—Rev. John R. Martz.

Mr. Speaker, I know that you and our colleagues here in the Congress will want to join with me in extending our heartiest congratulations and best wishes to the pastor of Valley Road Covenant Church and all of the members of the congregation of this historic occasion.

The quality of the leadership of members of the most reverend clergy and our citizens of Swedish heritage who settled in the township of Montclair, NJ, and founded Valley Road Covenant Church is most eloquently intertwined in the history of the church. I would like to insert at this point in our historic journal of Congress a brief chronology of the history of the Valley Covenant Church, as follows:

HISTORICAL NOTES ON THE VALLEY ROAD COVENANT CHURCH

1893—A group of Swedish Immigrants organized a Missionary Society; meetings were held in the chapel of the First Presbyterian Church in Montclair.

1895—This group organized as a Congregation under the name "Swedish Christian Mission Church." Charter members included six men and 16 women.

1898—The group affliated with the Congregational denomination with the names "Swedish Congregational Church."

1899—The present church building was erected.

1900—The Church affiliated with Eastern Missionary Association, now known as the East Coast Conference of the Evangelical Covenant Church of America.

1924—The parsonage was erected on a lot adjoining the church. The historic house on the rear of that lot became the Church Annex, now also serving as the home of the sexton.

1929—The Church was remodeled and a pipe organ was installed.

1953—The front of the Church was remodeled. This changed the entrance, giving a new foyer, and provided three rooms for office and teaching space.

1954—The Church affiliated with the Evangelical Mission Covenant Church of America, now known as the Evangelical Covenant Church of America. The name of the Church was changed to Valley Road Covenant Church.

1957—The fellowship hall and Christian Education building was erected, and the sanctuary was extensively refurbished.

1976—Worship service structure was modified to include interaction Service.

1985—Annex apartment was modernized and completely redecorated by the church family.

Mr. Speaker, the 90th anniversary of Valley Road Convenant Church will be celebrated on Saturday, October 26, with a rich civic and religious program, as follows:

NINETIETH ANNIVERSARY DINNER

(October 26, 1985—5:30 p.m.)

Greetings: Kart Greene, Church Chairman.
Invocation: John Martz, Pastor.
Dinner: Ray Juebler, Host.
Move to Sanctuary.
Welcome: John Martz, Pastor.
Opening Hymn No. 29: "Praise to the Lord, The Almighty".
Scripture Reading: Susan Fichtelberg.
Prayer: Ann Gustafson.
Special Music: Paul Liljestrand.
Greetings from Friends: Ed Gustafson.
Choir Anthem: "Welcome Home, Children" (arr. Ron Huff).
Greetings from Former Pastor: Kevin McBride.
Special Music: Paul Liljestrand.
Highlights from the Past: Elaine Fiveland.
Hymn No. 383: "Great Is Thy Faithfulness".
Message: Rev. Robert Erickson.
Special Music: Paul Liljestrand.
Benediction.

Mr. Speaker, I am pleased to have this opportunity to seek national recognition of the distinguished pastors and congregation of Valley Road Covenant Church. In their dedication and devotion to our people, in service to God and mankind, they have truly enriched the cultural, educational, and religious endeavors of our community, State, and Nation. We do indeed salute them and the members of the Valley Road Covenant Church of Montclair, NJ, upon the commemoration and celebration of their 90th anniversary.

AN ARMS AGREEMENT DOES NOT A PEACE MAKE

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. BROOMFIELD. Mr. Speaker, arms control is not the only issue over which the United States and the Soviet Union have a major disagreement. While all of us hope that our two countries will someday have a truly peaceful relationship, peace will not be won by a naive assessment of the differences which separate our two nations. The arms control issue is one of the many problems which our country and the Soviets have to resolve.

The Soviet experience is very different from the American one. Their historical development and relations with other states in the region have created their deep paranoia about protecting "Mother Russia." Their traditions and their view of religion are very different from our own. Communism's definition of the nature of man and his role in a society are far removed from that given by our democratically oriented forefathers. Human rights are very important to us while the Soviet leaders in the Kremlin see that issue in another light. They show little concern about their bloody incursion into Afghanistan and the ongoing tragedy in that poor country. They showed callous disregard for the downing of the Korean airliner and the horrible loss of so many lives to include a Member of the House of Representatives.

Communism still justifies the Berlin Wall and the tragic murders of the many who have tried to flee to freedom in the West.

Mr. Gorbachev has cleverly played down these real differences in some of this recent public relations forays in the West. He has stressed that the upcoming meeting will only be successful if major progress is made on an arms control agreement. He has deliberately put President Reagan on

the spot in the forthcoming talks while ignoring the other important areas of disagreement between our two nations.

With much fanfare to get the attention of the world, Mr. Gorbachev has repackaged some old Soviet arms control ideas and has told the world that this new proposal is so good that the United States cannot afford to turn it down. He has paraded around Europe telling our allies that if President Reagan fails to accept the new Soviet arms initiative there could be difficult times ahead.

Mr. Gorbachev has equated a new arms control agreement with the very survival of mankind. He has taken his arms control offer on a road show and has suggested that our President is against peace if our Government fails to buy off on the deal. What has he said, however, about progress in the other areas which divide our Government from the Kremlin leaders? Very little, in fact. He dismissed most of them with a wave of the hand.

I believe the American people clearly see Mr. Gorbachev's strategy and can see through his obvious trickery. We all know that flexibility is a two way street that must be walked by both sides. I urge our President to be fair but tough in Geneva. With these thoughts in mind, I commend the following article from the Washington Post to my colleagues in the Congress.

OBSESSION

(George F. Will)

Several years ago, I heard President Reagan say approximately this:

"I would like to take the Soviet leaders up in a helicopter over Los Angeles." (Here I thought: Good, he is going to push them out. But, no.) "I would point to all the small houses with swimming pools and I would say 'Those are the workers' houses!"

Surely Ronald Reagan does not think the hard men of the Kremlin are misguided Lane Kirklands, labor leaders mistaken about how best to raise living standards. But Reagan may illustrate the great, and perhaps fatal, paradox of American politics:

He is thumpingly successful because he is thoroughly American—moderate, amiable, reasonable and convinced that others are too. That is, he has the constricted political imagination natural in a sheltered, liberal nation to which history has been kind. Hence he is, as the most successful American leaders are most likely to be, especially apt to underestimate the terrible dynamic of the Soviet system. One manifestation of this misunderstanding is the sweet thought that the regime's leaders would be susceptible to the taming example of American freedom and affluence.

I mention this now because The Post reports that recently the president was flying over New Hampshire and said to the governor how much he would like to take Gorbachev to "any house down there" to meet "the working people." What does the president think such a visit would accomplish? Perhaps: the Gorbachev palm slapped to the Gorbachev forehead, and a thunderstruck exclamation, "Marx goofed! I have seen the future, and lots of kitchen applicances, and it and they work. So dismantle the Gulag!"

Is this another "It's all a horrid misunderstanding" theory of the Cold War? Usually the "misunderstanding" is a mutual misassessment of the other's peaceful intentions. In this case, the supposed misunderstanding concerns how best to satisfy the common man.

This theory founders on the fact that the thin slice of Soviet society that has power also has material comforts. The regime is driven by the need to justify the exemption of the privileged few from the dismal life led by the many. The regime derives its legitimacy, such as it is, from the pretense that it is custodian of History's progressive impulse. That is why the Soviet regime is not—cannot be—in the live-and-let-live business.

If the leader of this regime were not following in the shuffling footsteps of three cadaverous leaders, he would be seen to have the charisma of suet pudding. Yes, he is "resplendent" in his "gleaming white shirt" (words from the introduction to his self-interview in Time). But he is also a truculent liar; he is truculent when dismissing as "insubstantial" all complaints about Soviet violations of its Helsinki undertakings. He is a liar explaining how tickled Jews are about the privilege of remaining in the Soviet Union.

The "bold, new" arms control proposal is bold in offering something so old. It is traditional Soviet algebra; X equals X plus Y plus Z. The Soviets offer X (50 percent reduction of "strategic" forces); the United States will give X, and will count its intermediate-range forces as strategic, and will kill its attempt to catch up with the Soviet strategic defense initiative. The Soviet side wins not by getting us to accept its equation, but by getting us to talk, exclusively, the arcane; antiseptic algebra of arms control:

It is axiomatic; control the agenda and you control the meeting. Regarding summit meetings, the axiom is; control the presummit conversation and you control the event. And look what is happening. Throughout the 1970s conservatives sensibly criticized the policy of treating arms control as the centerpiece of U.S.-Soviet relations. Today we see a Gresham's law of political discourse. The dry arcana of arms control has driven out talk of all other things, including: Afghanistan, Poland, Angola, Nicaragua, yellow rain, terrorism, arms-control violations, Helsinki violations, etc.

In another way, too, America is paying the price of its arms control obsession. So eager were the Nixon and Carter administrations for agreements, they prenegotiated (in Washington) proposals compatible with the Soviet buildup. Then they settled for agreements that were, essentially, mere snapshots of the rising force levels. But Soviet levels rose faster. Today they are so large and varied that a mutual cut of 50 percent could be tailored that would leave the Soviets with an enhanced strategic advantage.

The lament of correct thinkers within the administration is; the Soviets would never attend a "Sakharov Summit" or an "Afghanistan Summit," but here we go to a "Star Wars Summit." And the (definite article, "the") question already is: what will Reagan give up to make it a "success"? This, too, is a reason why, when I hear people praising summits, I want to take them up in a helicopter and . . .

THE UNYIELDING CLAUDE PEPPER

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. LEHMAN of Florida. Mr. Speaker, to have this opportunity to insert this article entitled, "The Unyielding CLAUDE PEPPER" in the CONGRESSIONAL RECORD is a great privilege.

My dear friend and colleague, CLAUDE PEPPER, is a remarkable man. He has already achieved so much during his life of public service, and yet he continues to champion the needs of the unfortunate and to represent the causes of our senior citizens.

The article about this great man follows:

[From the Washington Post Magazine, Oct. 20, 1985]

THE UNYIELDING CLAUDE PEPPER—THE OLDEST CONGRESSMAN

CLAUDE PEPPER HATES BEING 85

(By Pete Earley)

Rep. Claude Pepper, at 85 the oldest member of Congress, is late. It's only 6:40 a.m., but the Florida Democrat is behind schedule as he rushes into a waiting CBS-TV network limousine.

"They want to talk about abuse of the elderly," says Rochelle Jones, Pepper's press aide. He waves her silent and attaches two hearing aids. Jones begins again: "One question they will ask you is, 'Who is the typical victim? . . .' "

"I know. . . .," says Pepper.

"Another question is: 'Are there any parallels between the person who abuses the elderly and. . .' "

"Any what?" Pepper interrupts.

"Parallels," Jones repeats, leaning close to Pepper's left ear. "Any parallels between elderly abuse and child abuse?"

". . . I've forgotten, but I think there is more elderly abuse than child abuse, or was it the other way around?"

"No," says Jones loudly, "there is more elderly abuse . . . it's increased since you held hearings in 1981 by 4 percent per year or about 100,000 cases."

"In child abuse?"

"No, elderly abuse."

"Yes, when did we start?"

"You held the first hearings in 1981."

"1981?"

"1981. That's correct. . ."

The CBS television studio on M Street is confusing. Correspondent Bob Schieffer, who is in a New York studio, will interview Pepper during "The CBS Morning News." Schieffer's face will appear on a large television screen at Pepper's right. But Schieffer's voice will come from a floor speaker near Pepper's left foot. Pepper, meanwhile, is told to look neither left nor right, but straight ahead into a camera.

"Rochelle?" calls Pepper, as the "CBS Morning News" title appears on screen.

"Yes sir?"

"The hearings, were they before our full committee?"

"Yes, sir."

"And they were in . . ."

"In 1981, sir."

"1981, okay, okay. 1981."

More than anyone else, Claude Denson Pepper is seen as *the* spokesman for the 26 million Americans aged 65 or older.

A Time magazine cover of Pepper in 1983 called him "Champion of the Elderly." He is known on Capitol Hill as "Mr. Social Security" because of his dogged fights to spare it from cuts. He remains the most sought-after campaign speaker in the Democratic Party because he can draw huge crowds of the aged, the fastest growing segment of society, the one with the best voting record.

"Claude Pepper has come to symbolize the elderly in this country," says Jack Ossofsky, executive director of the National Council on the Aging.

Pepper's enthusiasm is inspiring. Although he is paunchy, hard of hearing, slightly stooped and has a mechanical valve in his heart that beats with the help of a pacemaker. Pepper regularly works 15 hours—or more—a day, chairs the powerful House Rules Committee and travels frequently, carrying his own bags, thank you.

When he had his pacemaker surgically inserted three years ago, he is said to have asked: "How long will the battery in this thing last?"

"About 10 years," the doctor replied.

"Then you'd better give me three of them now," Pepper said. "I'll come back later for more if I need them."

"An older woman once told me that you can foresee old age, but you can't fore-feel it," says Ossofsky. "Claude not only sees the issues, he is aware and feels them. He has an insight that you only get when you are there . . ."

As with any person his age, being there shows. Pepper often takes afternoon naps, forgets names and retells the same stories. Sometimes he asks his staff to drive him from his congressional office across the street to the House for a vote because he is too tired to walk.

Pepper denies that he has lost any physical or mental ground, and he resents the senility microscope placed on him. He at first takes on a witty composure to charges that he may be slipping. "I've had to slow down a bit," he says , smiling. "Some Sundays when it is hot and I'm playing golf, I get tired at about the 16th hole and it takes me a bit longer than normal to shoot all 18."

Pushed, he becomes irritated, complaining that reporters do not ask such questions of other congressmen. All Pepper has to do is accidentally push the elevator's up button when he wished to go down and there are whispers.

"I do my best," he says. "I try to put in a full day." He rises early, works late and has taken on a full agenda. Besides protecting Social Security, there are immediate concerns within his own district: Radio Marti, which broadcasts U.S. propaganda to Cuba, needs $3 million and Florida bankers want him to keep a branch-banking bill bottled up. His 1986 reelection campaign needs money. There is an autobiography to finish.

"So much to do," he says. "So much to do. I'm just too busy to get any older," he quips. Later that evening he becomes more introspective. He talks of his wife, Mildred, who died of cancer in 1979 after 42 years of marriage. Her death rocked him: "I never think of myself as an old man. It shocks me in a way to think that I am. But I am actually an old man! I don't believe it. I don't believe it. It happens so gradually . . . No one wants to go unless you are in some terrible, terrible pain. You just don't want to go."

The real difference between himself and his colleagues, he says, quietly, is "they have more time . . ."

Pepper grew up poor in rural Alabama, the oldest of four children.

"I remember earning 65 cents per day as a youngster doing plowing," Pepper recalls. "On the way home I stopped at the drugstore and bought a grape juice drink. It cost me 10 cents and, my, it was so delicious, cold and sweet. I remember thinking that I hoped I could see the day when I could finish one of those grape drinks and say, 'Give me another.' "

He has always worked. He paid his own room and board at the University of Alabama by hauling coal and ashes every day at a power plant and later waited tables to help finance his legal education at Harvard.

"I shudder to think what I would have become if I hadn't been able to get a good education," says Pepper.

After graduation Pepper taught briefly and then settled in Florida where he developed a reputation for defending the poor and uneducated. In one case, he kept the state from executing one of his clients for 19 years until prosecutors gave up. Pepper's client died in jail, of old age.

Pepper was elected to the state legislature in 1928, but was voted out of office after one term after he refused to support a resolution that censured Lou Hoover, the wife of Herbert Hoover, for inviting a black person to a White House tea. Pepper left rural Florida after that for Tallahassee and took his parents with him. He cared for both of them until they died.

Eight years later, Pepper was elected to fill a vacant Senate seat. He immediately fell under President Franklin Delano Roosevelt's spell.

Pepper's loyalty to FDR prompted the New York Herald Tribune to write "when the White House has an important balloon to send up, it invites Senator Pepper to supply the necessary oratorical helium for the ascension."

That loyalty to FDR helped end Pepper's Senate career. In 1944, Roosevelt asked Pepper to support the veto of a tax bill favored by Edward Ball, the politically powerful businessman who controlled the multimillion-dollar DuPont estate in Florida. Pepper agreed and Ball vowed revenge.

Pepper soon made another powerful enemy by joining a movement at the 1948 Democratic convention to dump Harry S Truman. Time magazine reported that Truman summoned then Congressman George Smathers to the White House and said: "I want you to beat that son-of-a-bitch Claude Pepper."

Smathers challenged Pepper in 1950, waging a campaign that is described by Robert Sherrill in his book, Gothic Politics in the Deep South, as the "most elaborate crusade of political annihilation ever conducted in southern politics."

Pepper was mercilessly attacked for his antisegregation views and openness toward the Soviet Union, branded at one point as "Red Pepper."

He was soundly defeated and returned home broke. In the next eight years, he built a profitable law firm in Miami. He lost a Senate bid in 1958 but was elected in 1962 to a newly created House seat in Dade County where the population had doubled in a single decade and 80 percent of the registered voters were Democrats.

Pepper was, at first, a politician without a cause. But in the mid-'60s, when Miami's crime rate became the highest of any large city, Pepper hustled a bill through Congress that created a joint House-Senate committee on crime. He became its chairman. The committee was criticized as being a publicity stump for Pepper and was abolished in 1974.

In 1977, Pepper was named chairman of the House Select Committee on Aging and he quickly gave it national prominence by using many of the same publicity gimmicks that earlier had incurred his peers' contempt.

This time, though, Pepper had a track record: a concern about the elderly that can be traced back to his state legislature days when he penned a law that allowed persons age 65 and older to fish without state licenses.

Protecting Social Security from budget cuts soon became his chief goal. In 1982, Pepper campaigned for 70 Democratic candidates in 25 states and at each stop blistered President Reagan for proposing cuts in benefits.

"I would grab the hand of the Democrat that I was helping, and I would raise it high and I would say, 'And this man or woman promises you that he or she will vote against cutting Social Security.' "

Nevertheless, when the Social Security package reached the House floor in March 1983, Pepper lost. His colleagues gave him a standing ovation after his speech and then overwhelmingly rejected his proposal.

"I know who they are," Pepper says of the Democrats whom he helped elect and who later voted against him. "And when there has been an opportunity for me to do something for them, I haven't done it."

Recently, Pepper has been quietly voting more conservatively because his district now has more Cuban Americans—50 percent—than anywhere else in America. Most are not liberal.

"Rep. Pepper has grown more conservative," says Richard A Pettigrew, chairman of the Dade County Democratic Executive Committee," but he has remained essentially true to his fundamental vision of this country—that everyone, no matter how lowly their beginnings, deserves an opportunity."

And as Pettigrew sees it, the congressman has satisfied his constituency: "Quite frankly, Pepper could be reelected here posthumously."

WGBS radio talk show host David Gold was blunt during a recent on-air broadcast in Miami: "Do you think that Claude is playing with both oars in the water?"

It's a question, says Tom Fiedler, the Miami Herald's political editor, being asked in local political circles.

"It's clear that Pepper gropes a lot of the time to orient himself to what he is doing," Fiedler said. "I think he is slowing down mentally."

Radio host Gold, who has had Pepper as a guest on his show, is harsher: "No one wants to talk about it because he is such an endearing man, but I think Pepper at times, is incoherent, especially if you get him off subjects that he knows by rote like Social Security. His staff protects him and drags him around by the nose."

Pepper's image in Washington is different. "He is simply brilliant," says Christopher J. Matthews, administrative assistant to House Speaker Thomas (Tip) P. O'Neill Jr. (D-Mass.).

"I have been simply dumbstruck by Representative Pepper's ability to recall details about his discussions with President Roosevelt, talk about complicated budget matters and then weave them together lucidly to make a point," says Dr. Robert Butler, founding director of the National Institute

on Aging at the National Institutes of Health.

Adds Rep. David E. Bonior (D-Mich.), a member of the House Rules Committee: "I've never known Pepper to have had any trouble following any issues."

Several other House members, who would not allow their names to be used, criticized Pepper, saying he engages in political demagogy and is more comfortable with generalities than substance. Not one, however, questioned his mental abilities.

Pepper's severe hearing loss could explain much of the criticism levied by Gold, who complained that Pepper kept asking him his name during breaks on his radio show.

The aging council's Ossofsky recalls a press conference during which Pepper seemed confused until a reporter repeated his question. "Then Pepper effectively galvanized the room by answering it better than anyone else on the panel."

The most often quoted incident of Pepper seeming to be confused occurred in June 1984 during a fierce House battle over the MX missile. So crucial was the vote that the Reagan administration had dispatched Air Force jets to ferry back out-of-town congressmen who might vote for the missiles. In the House itself, Speaker O'Neill, cigar in hand, hovered, counting votes, pressuring party members who wavered. In the end, MX opponents won the skirmish in three votes: 199 to 197, 198 to 197 and 199 to 196.

Pepper, who eventually supported building the MX, did not vote.

The next day, the media speculated that Pepper had avoided the vote as a favor to O'Neill. But Pepper denies that. "The speaker," Pepper said, "came over and he said, 'If I were a man your age, I'd go home and go to bed.' He said there probably wouldn't be any more votes and if there were any, they would be late at night. I thought about it awhile, and then I went home and went to bed."

O'Neill's press aide declined to comment on Pepper's explanation, but congressional aides and reporters found it damaging. "Either O'Neill hoodwinked him which is his fault, or he simply didn't know what was going on," said a Hill aide.

Yet, during a recent debate on whether the House should cut $3 million from the budget of Radio Marti, Pepper rose and without notes and little preparation delivered a speech so eloquent that his colleagues stopped talking among themselves and later applauded loudly.

"Let us not silence, let us not soften the voice of liberty and freedom and democracy," Pepper said. "Let us put wherever we can the arm of words, as we did in other days of this country with our Declaration of Independence, ideas more powerful than guns."

"Claude Pepper is bound to have slipped some with age," says Pettigrew. "But I'd rather have Claude Pepper at 75 percent than most politicians at 110 percent."

Claude Pepper holds a photograph of his wife in his hands as he sits in his apartment dining room. "Many people thought she was the most beautiful woman in Washington when we first came here. She was so intelligent and so witty."

He looks around. "Everything is exactly the same here as it was when Mrs. Pepper left it," he says. "I feel a considerable closeness to her here. I didn't want to disturb the place that I'd been with her.

"Her toilet articles are all in our bathroom and on the shower curtain there is a little note: 'When you finish your bath, please close the curtain.' Apparently, I had been leaving the curtain open so Mrs. Pepper left me this note. It's still up there."

He recalls the first time he saw her. "She was wearing a bright yellow dress and when I saw her, I said, 'That's the prettiest girl I have ever seen. I've got to meet her.' "

Five years later, they were married. She was sick with the flu at the time. "I always used to joke that she probably wouldn't have said 'yes' if I hadn't caught her at a weak moment," Pepper jokes.

"They were just a delightful couple," says comedian Bob Hope, a family friend. "Mildred had a delightful sense of humor . . . I know that Claude was really knocked out when she left."

The Peppers spoke only once about the possibility of Mildred dying after doctors diagnosed her cancer.

"We were having breakfast one morning in Miami. She was sitting across the table from me and suddenly, she said with considerable sadness in her face, 'Claude, I guess we have just about come to the end of the road.'

"Well, I burst into tears and rushed around and embraced her, and I said, 'Don't say that. I can't live without you!' And she never said a word again about it.

"I realized later that one of the greatest tragedies of my life was that I never told her, we never talked about, how much, I, uh, but you see I never abandoned hope. I always thought that they would find some cure, and I never wanted her to get down, so I just never talked to her about her, uh, going. I later found out that she had known her condition all along. I hadn't hidden anything from her. I'd only missed the chance to say goodbye.

"That has caused me much sadness, much sadness."

Pepper later spoke adamantly in Congress in favor of a bill that would have allowed patients suffering terminal illnesses such as cancer to use heroin.

"I told them about my wife's suffering . . . about that killing, terrible pain, but they were afraid that they'd be accused of voting for drugs, the bunch of damn weak, spineless bastards."

He was at her side when she went into a coma and he was still there days later when she died.

"At night," says Pepper, "when I go into our bedroom and look at her bed next to mine, I say, 'Hello darling, hey' and I sit down and think of her and talk to her and that helps, but I still get very lonely for her, very lonely."

"I think my brother would be dead in six months if he ever retired," says Frank Pepper. "After Mildred died, his job became his life."

Claude Pepper is having trouble eating. A stream of admirers interrupt him at the Columbia Country Club.

"You are one of this country's greatest Americans," says one white-haired man.

"God bless you, Claude Pepper," say another.

"My, my," says Pepper, "people say the nicest things to me."

"I have always considered politics a form of ministry," he says. "It has an almost religious feeling to it. That's why I can't understand this man Reagan.

"I hope I will be around in a few years when the spell of his personality wears off and serious-minded politicians sit down and try to evaluate him. Is he a clown, a barker at a circus? Who is this man? This Ronald Reagan?"

He is asked: "What will historians say when Claude Pepper is gone?"

He is genuinely startled at the thought. Claude Pepper does not consider death, and he has no immediate answer.

Inside the CBS studio, Pepper sits slumped in a chair on the small stage set, the floor speaker by his foot, the screen to his right, the camera dead ahead. He stares straight forward. He is tired. Earlier, he had complained: "I don't know how many more of these I want to do. It's too hard getting up at 5:30." He looks very old.

"Okay sir, five seconds," the cameraman says, and begins the countdown on the fingers of his outstretched hand. As the seconds tick off, Claude Pepper begins a remarkable transformation. He shifts his body forward, he looks suddenly alert, his right hand moves upward, ready to stab the air to make a point. Hang on, America, curtain coming up.

When Schieffer asks how serious a problem abuse of the elderly is, Pepper is center stage, his voice loud and commanding.

"It's extremely serious, Mr. Schieffer, and it is growing more serious all the time. Our committee on aging held its first hearing on this subject in 1981 and we were shocked to find out the extent of this abuse. It has increased about 4 percent, about 100,000 cases per year since we held those hearings." The timing between words and phrases is perfect, the diction flawless.

"Who are the victims, Congressman?" Schieffer asks. "And who are the people causing this abuse?"

"Most of the abuse comes from intimate family members," says Pepper, accentuating key words, preparing now for the touching tale. "For example, we had a shocking case where a son robbed his mother of her money and beat her up and raped her. . ."

"What should be done?" asks Schieffer.

Pepper doesn't flinch. His reactions are as polished as Sir Laurence Olivier launching into Richard the III's final soliloquy. The words tumble out effortlessly.

"We must set up organizations to encourage and put pressure on those who have knowledge about abuse of the elderly to report that abuse," says Pepper. "States must pass tougher laws to prevent elderly abuse and federal funds must be allocated to organizations that make preventing such abuse a priority." He ends, of course, with a warning directed to the audience: "Almost every case where an elderly person is confined is a prospective case of abuse. . ."

It has been another successful performance by the master politician. Claude Pepper, the poor southern boy who at 15 dreamed of being president of the United States, has been tested once again. He can still bring down the house.

THE 40TH ANNIVERSARY OF THE UNITED NATIONS

HON. ROBERT T. GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. GARCIA. Mr. Speaker, the Secretary General of the United Nations, Javier Perez de Cuellar, wrote an article for the New York Times for the occasion of that organization's 40th anniversary.

No matter how one feels about the United Nations, Mr. Perez de Cuellar offers

persuasive arguments on the need for the United Nations. I agree with his assessment, and I applaud his work. I am submitting his article for the RECORD.

[From the New York Times, Oct. 20, 1985]

THE UNITED NATIONS "SIMPLY MUST BE MADE TO SUCCEED"

(By Javier Pérez de Cuéllar)

UNITED NATIONS, N.Y.—Recent events have underlined the uncertain nature of the times in which we are living. We are facing new phenomena alien to the relatively orderly world of sovereign governments about which the United Nations Charter was written. Never in history has there been a time when governments needed so much to cooperate with each other.

In the last few weeks, we have been forcibly reminded that between the massive weaponry of the nuclear powers on the one hand, and the desperation of the underprivileged on the other, there lies a great vacuum of legitimate and respected international authority. The pervasive problem of terrorism is but one symptom of this condition. The vacuum can only be filled by building a working international system in which all participate—a system that not only guarantees order but makes our planet run more evenly in the interests of all its inhabitants.

At present, the only place where that can be attempted is the United Nations. I hope that this 40th anniversary year may serve to emphasize this positive aspect of the United Nations and thereby diminish its use as a forum for purely adversarial action.

There is now, especially in this part of the world, widespread though not always justified criticism of many aspects of the performance of the United Nations. There is no doubt that the organization has not been able to live up to all the high hopes placed in it. Nor did its founders foresee the massive changes that the world has gone through since San Francisco. Criticism is essential for the proper evolution of any political institution, and I hope that this anniversary year will provide the occasion for considering remedies for at least some of the organization's shortcomings.

The response to the 40th anniversary suggests that a serious effort is under way to review past performance and create the conditions for a more effective future. I do not think that some 90 heads of state and 137 foreign ministers would come to the General Assembly if they did not believe in the purposes of and necessity for the United Nations.

I am convinced that the United Nations simply must be made to succeed. The alternatives are unthinkable. I also believe that in the last 40 years, the United Nations has made a major contribution to the betterment of the human condition, and that many of its activities have already proved to be indispensable.

If there were no General Assembly, for example, a large majority of the nations of the world would not have a forum in which to express their views and discuss with other governments the many problems that are now of common concern—as, for example, the vigorous discussion now taking place on the international debt crisis.

And where else can all foreign ministers come each year to meet their colleagues—including those from countries with which they do not have diplomatic relations—to explain the policies of their governments? For all the heated debate, I do not think our interdependent world could reasonably dispense with the General Assembly. It is too often forgotten, for instance, that more international law has been codified through the General Assembly in the past 40 years than in all previous human history.

Similarly, if there were no Security Council it would, in the first place, be an admission that a system of collective security encompassing all nations is impossible to attain. It was precisely for this purpose that the Security Council was created. The Council has many obstacles to face, not least the lack of unanimity of its permanent members. This essential unanimity has, however, been affirmed at critical moments in the past, and most recently on Oct. 9 when all 15 members condemned "terrorism in all its forms wherever and by whomever committed." And while the Council has not worked as its founders meant it to work, it remains an indispensable refuge in times of great international crisis, a place where the rush of events can be slowed and acceptable ways found to move from fatal confrontations.

The United Nations has conducted 13 peacekeeping operations in various parts of the world. If we were to remove any of the existing peacekeeping operations, in the Golan Heights, in Cyprus or in Lebanon, a severe internationl crisis would almost certainly occur. Because they keep the peace and maintain quiet by nonviolent means, these operations do not always receive the credit they deserve. No one paid much attention to the Emergency Force in the Sinai until it had to be removed in 1967. The consequences of the war that followed are with us to this day. Our current peacekeeping operations are of comparable importance.

Meanwhile, if there were no Secretary General or Secretariat, the "honest broker" function of the United Nations would be seriously diminished. Past Secretaries General have been asked to perform vital intermediary tasks because they were universally acceptable as impartial servants of the whole community of nations.

At present, for example, the Secretary General is the accepted intermediary on matters relating to Afghanistan, the Iran-Iraq war and Cyprus. These are exceptionally difficult problems, with a large potential for escalation. But they cannot be contained and eventually resolved without efforts to negotiate a solution through an agency that all parties can accept.

If the office of the High Commissioner for Refugees did not exist, there would be no universally recognized authority for the protection or assistance of refugees and no permanent focal point for organizing emergency action when a new refugee problem arises. There are now more than 10 million refugees in the world. If the United Nations Relief and Works Agency for Palestine Refugees, which looks after nearly two million displaced Palestinians, no longer existed, not only would a major moral obligation of the international community go by default, but a violent destabilization of the area would almost certainly result.

It is also generally agreed that the specialized agencies of the United Nations, among them the United Nations Children's Fund (Unicef) and the United Nations Development Program, carry out valuable tasks in their different fields. This is as it should be. Our newly interdependent world demands cohesive and effective international institutions if humanity is to survive in tolerable conditions. The relief efforts in Africa, which the United Nations coordinated, and which almost certainly saved several million lives, is one recent and dramatic illustration.

Yet we must make clear that the main reason for which the United Nations was founded, "to save succeeding generations from the scourge of war," is, in the nuclear age, more vital and relevant than ever. The task is infinitely difficult and sometimes discouraging. But since it affects all humanity, and is rightly the concern of all nations, great or small, the question of disarmament is transcendently important. Looking back over 40 years, we see that in times of greatest danger, all nations, not least the most powerful, have felt the necessity to turn to the United Nations and the machinery created in 1945, using it as best they could to stop the fighting and thus to avoid larger and perhaps fatal confrontation.

The Arab-Israeli war of 1948, the simultaneous crises of Suez and Hungary in 1956, Lebanon in 1958, the Congo in 1960, the Cuban missile crisis of 1962, Cyprus from 1964, the India-Pakistan wars of 1965 and 1971, the Middle East war of 1973, Lebanon in 1978—all illustrate the use of the United Nations as an essential instrument of the world community in times of grave danger.

In between times, nations go their own ways. There are far too many conflicts that neither the United Nations nor anyone else has been able to control. We have a very long way to go before we reach the "common ground for peace" that Franklin D. Roosevelt spoke of in 1945. No one is more conscious than I of the feeling of frustration to which the proceedings of the United Nations often give rise.

But I believe firmly that the founders were right and that in our interconnected world, there is no substitute for the United Nations nor for the tasks it already performs. The main concern must be to make it far more effective for the future.

GROUNDBREAKING FOR THE U.S. HOLOCAUST MEMORIAL MUSEUM

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. LANTOS. Mr. Speaker, on October 16 in a moving ceremony, ground was officially broken for the U.S. Holocaust Memorial Museum. During the ceremony, which was witnessed by people from across the United States, soil and ashes from the Nazi death camps of Auschwitz, Bergen-Belsen, Dachau, Theresienstadt, and Treblinka and from the Warsaw Jewish Cemetery were mixed with soil from our own United States and placed in the foundation of the Memorial.

It is significant that the United States and Israel are the only two nations on earth which have taken steps to remember this blackest of nightmares by establishing Holocaust memorials. It is appropriate that our Nation should have such a memorial because this great Nation has accepted with open arms many of the survivors of that ultimate example of man's inhumanity to man.

The museum being built here in Washington, DC, will be a most important addition to the great buildings in our nations capital. Located on the Mall near the

Smithsonian Institution, the National Archives, and the National Gallery of Art, this building will be a place of education, as well as a memorial. As Elie Wiesel, the chairman of the U.S. Holocaust Memorial Council, said: "In this place, dedicated to the noble and urgent cause of remembrance, we pledge to tell as much as posible, as truthfully as possible, what Nazi Germany and its accomplices did to six million Jews and to the other millions of victims of Nazi atrocities. * * * In this place we shall try to bear witness for the dead and the living."

A few days ago, Mr. Speaker, when I spoke from the well of this House, I quoted Elie Wiesel—the witness, victim, chronicler, and conscience of the Holocaust—and placed in the RECORD his moving speech at the groundbreaking ceremony.

Today, I would like to place in the RECORD the statements of the other distinguished American leaders who spoke during the groundbreaking ceremony: Mr. Mark E. Talisman, vice chairman of the U.S. Holocaust Memorial Council; the Honorable Donald P. Hodel, Secretary of the Interior, who spoke on behalf of President Ronald Reagan and read a letter from the President; the Honorable BOB DOLE, majority leader of the Senate, and the Honorable TOM FOLEY, majority whip of the House of Representatives.

HON. MARK E. TALISMAN, VICE CHAIRMAN OF THE U.S. HOLOCAUST MEMORIAL COUNCIL

Friends, we are gathered in a place that is dear to every American. We stand not fifteen hundred yards from the monument to our first President. We are at the very heart and soul of our beloved country. We gather here in this hallowed place to break this earth together, to consecrate this place as a memorial to the victims of the Holocaust.

It is here that a true memorial shall rise to those who were felled by tyranny and oppression. The dehumanization and degradation which swelled and swallowed a whole people occured in the midst of an ancient cultured, civilized society gone mad. When actions would have breached those laws, those laws were altered by otherwise civilized, educated people. Eventually, few remained to be mained, brutalized and murdered. Most of all it was the starkness of the silence from good people which ultimately abetted the killers and encouraged them to complete their incomprehensible mission of destruction and death.

We not are learning the extent to which governments and their people acquiesced to the practicalities of the times as millions of innocent Jews and untold others were destroyed. Had they done otherwise, there would be no need at all to be here today to commence this holy work of permanent national remembrance.

Some ask in good faith, "Why here, in this place"? I respond clearly, "What better place then here at the seat of our government", so as to remind us forever of our precious responsibility never to allow the darkness of the Holocaust to be repeated against any people.

I am sure you would agree that we who are here today, need no such reminders. It is for the sake of your children and mine and for their children far into the future that we dedicate this sacred place. If six million people can be annihilated simply because of who they were, then, anything is and will be possible.

But, should we weep continually over the horrors we have learned from the Holocaust? As our Chairman has observed, it no longer does any good. Instead, we must commit ourselves and our country, through this special place, to teach what happened and why. We must show what the peoples and villages and towns and communities were like—the 4400 such places which no longer exist on this earth—in order to help our children sense, and maybe even comprehend, the depth of the chasm which is called the Holocaust.

From this knowledge will come meaningful remembrance and, we all hope, the commitment necessary to give us the confidence that the future of children yet unborn will be safe from the scourge which swept Europe and engulfed and diminished every person on this earth.

Last Friday, with the help of colleagues from the United States, we personally dug the sacred soil of Terezin near Prague. It now joins those from the other camps where death was their paramount duty. These holy soils now are before us to be mingled with our beloved country's rich and consoling earth. May they rest in peace in the knowledge that here, on this place today, we commence the sacred task of remembrance and teaching, joining firmly with our colleagues at Yad Vashem in Israel, and dozens of other centers of learning throughout our great land in a bond of cooperation and commitment toward our sacred goal.

HON. DONALD P. HODEL, SECRETARY OF THE INTERIOR

I stood in the Rotunda of the Capitol last April. It was part of this nation's somber observance of the Days of Remembrance. Speaker after speaker, regardless of his faith, implored us to remember the Holocaust.

We free people of the world do remember—in many ways. In Israel, there is Yad Vashem. I was there not quite 2 years ago, and was privileged to lay a wreath at the flame which will flicker eternally in that dark and stone-cold room. It was a gripping, moving experience. No civilized man or woman could fail to be moved.

In the United States, we have the Days of Remembrance Commemoration. And, thanks to the efforts of many men and women—from all walks of life and of many religious faiths—this country will have its own Holocaust Memorial and Museum. But it will come into being, and will achieve its rightful place as an important part of our Nation's Capital, only if a broad cross-section of America understands its purpose and contributes to its funding.

It is in this regard that we should take note that President Reagan has agreed to serve as Honorary Chairman of the fundraising effort. As I am sure you know, it is most unusual for the President of the United States to assume such a position with a private, nongovernmental activity.

President Reagan's participation serves as a clear and unmistakable signal to the entire nation that successful completion of the United States Holocaust Memorial and Museum is an important objective of the American people and that it is most deserving of the moral and financial support of all of us.

Ladies and gentlemen, it gives me great pleasure to deliver to you a personal message from the President.

THE WHITE HOUSE,
Washington, October 15, 1985.

I am pleased to send greetings to all those gathered for the groundbreaking for the Holocaust Memorial Museum.

We are building this museum not just to pay our respects to the memory of the victims of an immense tragedy, nor merely to provide the living with a reminder of the horror which even now is slipping out of living memory and into history. We build today for our posterity.

With our children and our children's children in mind, we are creating on this spot a place of remembrance and mourning. Although some have questioned the wisdom of placing the memorial for a European catastrophe so close to the gleaming symbols of our democracy, the lessons of the Holocaust—the brutal, even diabolical perversion of power, unchecked by law and devoid of faith in God—do belong here. When, in the years to come, our children emerge from this museum with the lessons of totalitarianism fresh in their minds, those soaring white monuments to democracy, justice, and freedom under God will gleam all the more brightly in the sunlight of freedom.

Today, much of the world still struggles to rid itself of the rule of godless tyrants and murderers. This memorial will stand always to remind us of the nobility of that struggle and the perils we face if we remain indifferent. God bless you.

RONALD REAGAN.

On an official and personal note, I would like to comment briefly on the working relationship between the Holocaust Memorial Council and the Department of the Interior. Not quite 2 weeks ago, I exercised my responsibility as Secretary to approve the architectural plans for the memorial and museum and to certify to the Congress that funds were available to complete construction. I could not have done so had it not been for the tireless efforts of so many of you, who have made this great day possible, and my confidence that the American people will heed your call for support, so that this noble project can become a vital part of the heart of the world capital of freedom.

But, you ask, why do we have need for these museums and memorials? Why do we seek to remember such a painful episode in history?

The short answer is that if we dare let ourselves forget, we may not be sufficiently vigilant when other Hitlers take those first, almost unnoticeable steps toward tyranny. We must be vigilant to incipient tyranny wherever it occurs, because, as is etched on front of our National Archives, "Eternal Vigilance is the Price of Liberty."

But that merely is a political or societal reason for remembering the Holocaust. I submit, however, that there is an even more important reason for remembering:

We serve God by remembering. If remembering the Holocaust can help us—or our brothers and sisters in the world—avoid the physical and emotional pain of terror and barbarism, we and they obviously are better off for it. But, crucial as that is to our general well-being, I am more concerned about the well-being of our souls.

When Hitler destroyed men, women and children, he sinned against them; but he quite surely also sinned against God. And when the rest of mankind tolerates that happening, we just as surely sin against God.

I firmly believe the Lord did not put man and woman on earth with indifference as to how they treated each other. I have faith that we are commanded by God not merely to be kind to one another; but to stand tall and to take those steps that are within our God-given abilities when we sense that evil has reared its ugly head.

We therefore must remember the Holocaust—now and forever—if we are to remain able as vigilant children of God to serve him.

If I am correct in this respect, then let it be said that those of you who are the builders of the memorial and museum truly are doing the work of the Lord.

HON. BOB DOLE, SENATE MAJORITY LEADER

Forty years ago, General Dwight Eisenhower visited one of the recently liberated concentration camps in Europe. Knowing that it would be a wrenching experience, even for someone used to the terrible sights of war, he nonetheless felt he had to go, "in order," he said, "to be in a position to give first-hand evidence of these things, if ever, in the future, there develops a tendency to charge these allegations merely to 'propaganda'."

We are here today for the same reasons. After four decades, memories—even horrible memories—can fade. After four decades, many of those who survived the holocaust and could tell us how really was—many of them have passed from our midst. And after four decades of peace in Europe and dramatic political changes around the world, with former enemies now fast friends and formers allies now our adversaries, it is hard sometimes to recall or even believe how something so vast and inhuman could ever have happened.

The museum whose construction we start today will remind us that it did happen. Even more important, it will remind us that—unless we are vigilant in our defense of liberty for all—it could happen again, to any of us.

Though the massive tragedy of the Holocaust fell upon the Jews of Europe, this will not be a Jewish museum. Though it will sit on this impressive site in our Nation's capital, it will not be an American museum.

It will be a museum about, and for, all the people of the world. It will speak with equal meaning and importance to us all. If any of us are faced with persecution, none of us will be really secure. If any of us begin to forget what happened during the Holocaust, all of us will face a greater risk that it could happen again.

And if any doubt that it could, I would ask them to turn their thoughts at this hour to Rome, where the body of Leon Klinghoffer is about to arrive. When people driven by ignorance and hate continue to murder, when people like Leon Klinghoffer—whose only crime is their religion or color or ethnic orgin—continue to die, then it can happen again. If we let it.

I have been pleased to lend my efforts in a small way to the construction of this museum. I am gratified to be here today, to see this physical evidence of how far campaign has come in such a short time.

Our task, though, is only just begun. Let all of us continue to work together until this great structure is completed. Even more important, let all of us continue to work together to create a world in which the hatred of prejudice and the threat of violence will be only a memory. That along will be a truly worthy memorial to those millions who lost their lives during the Holocaust.

HON. THOMAS S. FOLEY, MAJORITY WHIP OF THE U.S. HOUSE OF REPRESENTATIVES

Thank you. I greet you on this solemn occasion in the name of the Speaker and the Members of the House of Representatives. President Reagan, and before him, President Carter, and every member of the House of Representatives and the Senate have committed themselves to this great project. This project of remembrance, this project of concern for the most dastardly single act ever committed against a people. It has been asked and answered many times why here, amid the symbols of our National life, and that answer has been given by Secretary Hodel and others.

It is totally fitting that we who celebrate the freedom and the sacred character of individual life and our National life should find it on the shrines of our own District, a memorial to remind us of the most dastardly act of barbarism and primitivism that is possible in humankind as well.

It is perverbial that memory fades and time heals, but the American people are determined, by the erection of this memorial, that memory will not fade, nor time totally heal the understanding of what the Holocaust was. An understanding that is necessary for generations yet unborn, so that there can be a common determination by free people everywhere that this shall never happen again, not to Jews, not in Europe, not to any people, not anywhere. And it is the undertaking of the American people today to make this great Museum and Memorial a reality that we share the earth of our country with the blessed remains of those who struggled and died in this terrible and unequalled act of barbarism.

We are thus blending the past to the future and we are committing ourselves and our people to see that, while the memory does not fade, the consciousness of what has happened prevents it's ever happening again. We celebrate today, in a way, this horrible past, not just so that it not happen again, but so that we recognize what has occured and we undertake to remember, not only a terrible act of barbarism, but a triumph of the human spirit.

IOSIF BEGUN

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. WIRTH. Mr. Speaker, I wish to bring the plight of Iosif Begun, a prisoner-of-conscience in the Soviet Union, to the attention of our colleagues. Mr. Begun applied for permission to emigrate to Israel in 1971. Permission was denied and Mr. Begun was stripped of his job. As the Soviet Government would not employ him, Mr. Begun began to give Hebrew and Jewish culture lessons. For this he was attacked in the media and arrested in 1977 for not being employed. After a 2-year exile in Siberia, Mr. Begun was arrested again for returning to his home without a residence permit. Following 3 years of internal exile and a brief period of freedom, Iosif Begun was arrested for a third time on November 6, 1982. Charged with "anti-Soviet agitation and propaganda," Mr. Begun was sentenced to 7 years in a labor camp and 5 years of internal exile, the maximum possible sentence. Since that time, Iosif Begun has been subjected to numerous punishments and has required hospitalization.

Mr. Speaker, Iosif Begun's situation is indicative of the broader plight of Soviet Jewry. Over the past 5 years, the Soviet Government's brutal treatment of its Jewish citizens has intensified. The level of emigration has dropped from more than 50,000 in 1979 to fewer than 1,000 last year. Soviet Jews applying for exit visas are subject to several forms of persecution. Removed from their jobs, often beaten and imprisoned, these brave individuals still struggle for basic human rights. The right to freely leave and return to one's country is guaranteed under the Helsinki accords, to which the Soviet Union is a signatory. We must protest the Soviet Government's continued failure to meet their obligations as a partner in this international agreement.

We must also condemn the Soviet's program designed to crush the spirit of Soviet Jewry. In an attempt to stamp out Jewish cultural identification, the Soviet Government has arrested many who, like Iosif Begun, teach Hebrew and Jewish culture to those interested in maintaining the proud Jewish tradition. These courageous teachers are portrayed in the media as enemies of the state. Following their arrests, often on trumped-up charges, they are often savagely beaten by KGB agents. In addition, an official anti-Jewish propaganda campaign is coordinated by the "Anti-Zionist Committee of the Soviet Public." Faced with these attacks, Soviet Jewry is sliding into a state of desperation—exactly what the Soviet Government wishes to achieve.

To demonstrate America's commitment to Soviet Jews, my wife, Wren, and 20 other wives of U.S. Representatives formed the Congressional Spouses' Committee of 21. One of their projects entails adopting a prisoner-of-conscience, such as Iosif Begun. Wren and the other 20 members of the committee correspond with these courageous people to bolster their hopes for freedom and emigration. The committee has asked their spouses to help in this effort. Our position as representatives of the American people makes it absolutely essential that we vigorously object to the brutal treatment of Jews in the Soviet Union. Twenty of you have joined me, and our spouses, by sending letters to President Reagan asking him to pressure the Soviet Union to respect international accords and basic human rights. I hope that our colleagues will join this worthwhile effort. I would like to insert the text of my letter to President Reagan in the RECORD at this time.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, DC, October 22, 1985.

President RONALD REAGAN,
The White House, Washington, DC.

DEAR MR. PRESIDENT: I am writing you today on behalf of Iosif Begun, a prisoner-of-conscience in the Soviet Union.

The Soviet Union has branded Mr. Begun a criminal based on the "crimes" of teaching Hebrew, studying Jewish history and cul-

ture, and seeking to emigrate to Israel. None of these activities are criminal. They are basic and universally recognized human rights which are protected under the Helsinki accords to which the Soviet Union is a signatory.

Mr. Begun was sentenced to twelve years at imprisonment and internal exile on October 14, 1983. Since that time he has been subjected to periods of isolation and loss of mail and commissary privileges for offenses such as removing his shirt during an exercise period. Mr. Begun's wife and son have not been permitted to visit him since 1982.

It is our duty as a nation to protest the immoral and illegal treatment of Iosif Begun. I urge you to emphasize America's concern for the plight of Soviet Jewry—and in particular that of Mr. Begun—during your November summit meeting with General Secretary Gorbachev. It is essential that we show our support for these brave individuals imprisoned for following their moral and religious principles.

With best wishes,

Respectfully yours,

TIMOTHY E. WIRTH.

Mr. Speaker, the Soviet Union must realize that our concern for the human rights situation in their nation will affect our diplomatic, political, and economic relations. The upcoming summit is the ideal forum to express American concern and for this reason I ask my colleagues to join me in this call to President Reagan. Now is the time for us to speak out on behalf of Soviet Jews, before their situation deteriorates further.

CONTAINER CORPORATION'S GIFT TO THE SMITHSONIAN INSTITUTION

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mrs. COLLINS. Mr. Speaker, it gives me great pleasure to rise today and commend the Container Corp. of America for donating their advertising art collection to the Smithsonian Institution's Museum of American Art. This unique collection is made up of 311 original pieces of art commissioned by the company for use in its advertising campaigns spanning the last 50 years.

I hope my colleagues will join me in my commendation of the Container Corp. of America's contribution to "America's Attic."

I would like to provide for my colleagues' review, a proclamation submitted on behalf of Container Corp. of America.

PROCLAMATION: CCA ART DONATION TO SMITHSONIAN INSTITUTION

Whereas, Container Corporation of America (CCA) a company founded nearly 60 years ago in Chicago, Illinois, one of the largest U.S. producers of paperboard, corrugated shipping containers and folding paperboard cartons with annual sales of nearly $2 billion, and

CCA employs 11,000 people domestically, operating facilities in Dolton, Carol, Stream, Addison and with headquarters in Chicago, and in 23 other states, and

CCA is a company committed to environmental concerns and is the largest recycler of wastepaper in the country, and

CCA is a company that views packaging as an essential link in the chain that moves products from manufacturer to consumers througout all aspects of the economy, and

CCA is a company committed to design excellence and innovation—and it was this commitment to excellence and innovation that inspired the creation of the long-running ad campaign that formed the cornerstone of CCA's corporate identity.

For more than 50 years CCA used ideas and art to create an advertising campaign which distinguished it from all other box manufacturers by its innovation, creativity and longevity.

Now, after sharing this art collection with communities throughout the country as a traveling exhibit and using it as its corporate advertising campaign, CCA is donating the entire collection—311 pieces—to the Smithsonian Institution, National Museum of American Art.

This collection, representing the work of more than 200 artists, will now be shared with, viewed and appreciated by the American people for years to come.

Whereas, Container Corporation of America is a good corporate citizen, a major employer and a dedicated patron of the graphic and modern arts.

We hereby acknowledge the donation by Container Corporation of America of its entire collection of corporate advertising art to the Smithsonian Institution National Museum of American Art in Washington, D.C., for a special exhibition October 24, 1985, through January 19, 1986, and to become part of its permanent collection including special showings and regional tours.

MEDICARE BENEFITS FOR AIDS PATIENTS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. WEISS. Mr. Speaker, today I am introducing legislation which would provide urgently needed Medicare benefits to many individuals suffering from acquired immune deficiency syndrome [AIDS].

AIDS patients fall victim not only to a dreaded disease, but also to catastrophic medical bills at a time when they are least able to pay. It has been estimated by researchers at the Centers for Disease Control that the average cost of hospitalization totaled $140,000 per AIDS patient. This staggering medical bill does not include expenses for outpatient, nursing, and home health care. The costs to care for AIDS patients tend to be high because these individuals often require successive admissions to hospitals, longer stays due to severe medical complications, more intensive nursing care, and higher levels of pharmaceuticals, supplies, and special equipment.

Most AIDS patients are unable to afford such astronomical costs for health care. Many have lost private health insurance because their debilitating condition leaves them unable to work. Others have exhausted their insurance coverage because of the catastrophic nature of their illness. And many may be unable to obtain private health insurance, because some insurance companies are questioning their obligation to provide coverage for AIDS patients.

The legislation that I am introducing would expedite the availabiltiy of Medicare benefits for those AIDS patients who, under current law, already qualify for its coverage by virtue of their disabled status. AIDS patients, who are unable to work and have contributed the requisite number of quarters into Social Security, are eligible for the Social Security Disability Insurance [SSDI] Program. In fact, in 1983 the Department of Health and Human Services added AIDS to its list of qualifying impairments for disability to help in the processing of these cases.

Once entitled to disability benefits, AIDS patients, like all SSDI recipients, must then wait 2 years before they can receive Medicare coverage. Unfortunately, individuals afflicted with this terrible disorder often die before they can qualify for coverage.

With this legislation, many AIDS patients would be assured access to quality care without facing the threat of bankruptcy. The bill also provides desperately needed assistance to localities which have been carrying the financial burden of providing services and health care to those affected by this epidemic. To cope with the epidemic, many of our cities are drawing on already scarce economic, medical, technical, and human resources.

This bill does not set up a new program or confer a new entitlement, it merely assures that AIDS patients have access to Federal health benefits to which they are entitled. One reason for initially establishing this lengthy waiting period was to ensure that Medicare would only be available to those whose disabilities prove to be severe. There is no question that AIDS sufferers meet this condition—tragically, no one has yet recovered from this fatal disease.

Additionally, the legislation would allow the Health and Human Services Secretary, at his or her discretion, to provide reimbursement for experimental treatments that are administered as part of an approved clinical protocol. Because there is no known treatment for AIDS, much of the medical care involves therapies that are experimental. In view of the newness of this disorder, its fatal effect, and the uncertainties surrounding its treatment, the bill would provide important flexibility to the Secretary to determine the need and appropriateness of reimbursing for experimental care.

Mr. Speaker, a growing number of American men and women, from all walks of life are suffering from this frightening disease. AIDS knows no geographic boundaries—it has afflicted citizens across the entire country. I believe that the Federal Government must assume its share of responsibility to guarantee that victims of this epidemic do not want for medical care because they lack sufficient resources. The Congress must continue to demonstrate its leadership in fighting this epidemic, not

only by funding research and public education activities, but also by helping provide needed health care to those who struggle daily with this disease.

H.R. 3602

A bill to amend title II of the Social Security Act to waive, for 5 years, the 24-month waiting period for medicare eligibility on the basis of a disability in the case of individuals with acquired immune deficiency syndrome (AIDS), and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. 5-YEAR WAIVER OF 24-MONTH WAITING PERIOD FOR MEDICARE ELIGIBILITY FOR INDIVIDUALS WITH AIDS.

(a) IN GENERAL.—Section 226 of the Social Security Act (42 U.S.C. 426) is amended by redesignating subsection (h) as subsection (i) and by inserting after subsection (g) the following new subsection:

"(h)(1) Subject to paragraph (2), in the case of an individual who is medically determined to have acquired immune deficiency syndrome (AIDS) and who files an application for hospital insurance benefits under part A of title XVIII pursuant to this subsection, subsection (b) shall be applied as if—

"(A) in paragraph (2)(A), ', and has for 24 calendar months been entitled to,' were deleted;

"(B) in paragraph (2)(B), ', and has been for not less than 24 months,' were deleted;

"(C) in paragraph (2)(C)(ii), ', including the requirement that he has been entitled to the specified benefits for 24 months,' were deleted;

"(D) in the matter in the first sentence following subparagraph (C), 'first month' were substituted for 'twenty-fifth month'; and

"(E) in the second sentence, 'twenty-fourth' were deleted.

"(2) Paragraph (1) shall not result in an individual becoming entitled to hospital insurance benefits under part A of title XVIII for any month before the first month in which the individual both—

"(A) is medically determined to have acquired immune deficiency syndrome, and

"(B) has filed an application under paragraph (1).

"(3) For purposes of this subsection, an individual will be presumed to have acquired immune deficiency syndrome (AIDS) if the individual has been diagnosed, in accordance with standards established by the Secretary after consultation with the Director of the Centers for Disease Control, as having such disease.".

(b) EFFECTIVE DATE AND 5-YEAR SUNSET.—The amendments made by subsection (a) shall take effect on the first day of the first month that begins more than 45 days after the date of the enactment of this Act and shall apply to services furnished during the five-year period beginning on that first day.

SEC. 2. RECOGNIZING USE OF EXPERIMENTAL TREATMENT FOR AIDS PATIENTS.

(a) IN GENERAL.—Section 1862 of the Social Security Act (42 U.S.C. 1395y) is amended by adding at the end the following new subsection:

"(j) In making determinations under subsection (a)(1)(A) in the case of expenses incurred for items and services furnished in the treatment of acquired immune deficiency syndrome (AIDS), the Secretary shall take into account, and find as reasonable and necessary, a treatment that is experimental in nature if the treatment is in accordance with a clinical protocol recognized as appropriate by the Secretary.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to items and services furnished on or after the first day of the first month that begins more than 45 days after the date of the enactment of this Act.

HOUSTONIAN OF THE YEAR—GEORGE MITCHELL

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. LELAND. Mr. Speaker, recently Houston City magazine presented their first annual Houstonian of the Year Award to George Mitchell. Mr. Mitchell has brought four competitive universities together to form the Houston Area Research Center. He developed an idyllic urban center called the Woodlands and has helped to preserve Galveston's past and to develop its resort properties.

George Mitchell's works and the needs of Houston and the world were described by the magazine, as being inextricably entwined.

The Houstonian of the Year Award is presented to the person who, in the magazine's view, has contributed the most in the past year to the Greater Houston community.

I am particularly pleased to congratulate George Mitchell on this honor and I am therefore submitting for the RECORD the October issue of Houston City magazine.

HOUSTONIAN OF THE YEAR—GEORGE MITCHELL

(By Tom Overton)

"We at Houston City are proud to announce the recipient of our first annual Houstonian of the Year Award, presented to the person who, in our view, has contributed the most in the past year to the greater Houston community. The future of Houston will be tied directly to those precious individuals who care about the quality of life here, and who are willing to share their vision and hard work so that the rest of us may benefit. We can think of no one who deserves this award more than George Mitchell. His quiet can-do attitude and good works continue to enrich Houston immeasurably.—Lute Harmon.

George Mitchell's work and the needs of Houston and the world are inextricably entwined. Unplanned and uncoordinated urbanization prompted him to develop an idyllic urban center called The Woodlands. He brought four major, competitive universities together to form the Houston Area Research Center to develop technologies that will carry Houston into the twenty-first century. And by spending to preserve Galveston's past and develop resort properties, he is doing his part to ensure that city's future. Even though he stands to profit handsomely from his labor, he obviously is motivated by something more noble than personal gain.

A modest, self-effacing man who speaks softly, George Mitchell is not an easily recognizable Houstonian. Perhaps that is because he doesn't seek congratulatory publicity and can hardly be described as flashy or flamboyant. He drives himself to work, doesn't wear cowboy boots with his suits, doesn't smoke or drawl, and drinks in extreme moderation. Yet he is one of the richest men in the United States (depending on oil prices) and he has done more for Houston then an army of his peers.

Mitchell grew up in Galveston during its wild days of gambling and prostitution. He is the son of Savvas Paraskivopoulis, an uneducated but ambitious Greek goatherd who immigrated to this country at the turn of the century. Paraskivopoulis changed his name to Mike Mitchell, the name of a railroad boss who threatened to fire him because Paraskivopoulis was too hard to write. After a brief stint in Houston as a shoeshine, Mike Mitchell moved to Galveston and opened a laundry and several other businesses while raising a family. Mitchell and his wife scraped and saved to put their children through college.

While a student at Texas A&M, George Mitchell sold sandwiches and stationery, sometimes making as much as $300 a month while studying petroleum engineering and geology. He lettered in tennis and commanded a battalion in the Aggie Corps. In 1940, Mitchell graduated at the top of his class and went to work at Amoco for $126 a month. As the war in Europe picked up speed, the U.S. Army Corps of Engineers picked up George Mitchell, who at age 23 supervised more than 100 men and the construction of military installations along the Gulf Coast.

After the war, Mitchell struck out on his own. He lined up six clients who each paid him $50 a month for his engineering and geological services. Mitchell later joined his brother, Johnny, in wildcatting ventures. Johnny had the ability to find money, but oil had eluded him until joined by George, whose background in petroleum engineering and geology, plus an interest in new technology, boosted significantly the number of producing wells. Johnny, George, and a family friend, Merlyn Christie, quickly built a successful energy company.

Mitchell Energy made many profitable discoveries, but the biggest came in 1953. Acting on a tip from a Chicago bookmaker, Mitchell drilled in a Wise County field that was a graveyard of dry holes. He used new technology that fractured rock in a way that allowed more trapped or "tight" gas to escape. The Wise County find ultimately became the source of about 10 percent of the natural gas used by the city of Chicago.

Mitchell continued to built the company after his two partners sold their shares. In 1963, Mitchell Energy moved into real estate, and planning for The Woodlands began. Many of the same skeptics who laughed at the idea of drilling in Wise County were certain that Mitchell was crazy to build a "new town" near perfectly suitable old ones. When The Woodlands opened in 1975, *Forbes* magazine asked what a smart explorationist was doing in real estate. Indeed, it was a bad time for real estate. Inflation and mortgage interest rates soared. But by 1979 it was clear that The Woodlands was a success, the only one of thirteen federally guaranteed "new towns" to make it.

The Woodlands' population of 20,000 is predicted to increase to 180,000 by the year 2000. By then, Mitchell hopes, The Woodlands will be a part of Houston, which will be a city of 5 million residents. He hopes Houston also will include Clear Lake and First Colony, along with other communities forming a "string of pearls" around a cen-

tral core. "As the whole city of Houston grows to 5 million people you have to be responsible to the whole city," he says. "You can't let these hundreds of political subdivision say, 'To hell with you,' while they use Houston's roads and airports and keep our citizens with the brains, ability, and the tax base."

To remain healthy, Houston will have to do more than maintain its tax base; it will have to further diversify its economy and maintain its technological edge in the oil business. Mitchell is working to accomplish these goals through the Houston Area Research Center (HARC), a consortium of the University of Texas, Texas A&M, the University of Houston, and Rice University. Utilizing regional strengths—the city's prominence as a geoscience center, the Texas Medical Center, Johnson Space Center—HARC tackles twenty-first century projects too big for any single institution or the private sector. HARC is currently under a Department of Energy contract to design components for the world's largest and most advanced atom smasher. The research center also seeks to develop commercial application for lasers, improvements in geoscience technologies, and includes a center to study population growth.

HARC will find another void in Houston's economic picture: that of providing venture capital for medical and space technology companies. "We are working on a project called Cardiovascular Systems," he says. "This company is getting ready to go into production of a device that recirculates blood during a heart bypass operation. It takes a lot of blood, but with this device about 90 percent of the blood is salvaged at the point of the operation so you don't need as many transfusions, which is a very important thing when you think about AIDS, hepatitis, and everything else."

Sitting on the edge of the couch in his downtown office, Mitchell leans forward with intensity as he describes his vision of the Texas Gulf Coast in the next century and beyond. But by the year 2000, all of Galveston's 1,200 historical buildings will have been restored (currently, only about 200 have been saved). George and Cynthia Mitchell have used their own funds to restore the Tremont Hotel, to open the Wentletrap Restaurant, and to restore other buildings on The Strand. Mitchell Energy and Development owns half of the San Luis (a luxury hotel that says something about Mitchell's desires for the island) and is developing a couple of subdivisions.

He says oil has a good future in Houston for the next 30 or 40 years, although it will never be what it was in the Seventies. Natural gas, however, is the fuel of the future. There is plenty of it, it is cheap, clean, and efficient. Mitchell notes that coal presents serious environmental problems such as acid rain, and that cries from environmentalists will only get louder. Nuclear energy, he says, is out because of regulatory problems, its cost, and because "no one knows how to dispose of the plants and spent fuel yet."

Exotic methods of getting energy—oil from shale, the Great Plains Gasification Project, liquid natural gas from foreign sources—have been put on the back burner. "So," Mitchell concludes, "oil and gas and conservation are the best hopes we have for the next 25 or 30 years."

Mitchell is worried about the amount of oil imported to the U.S., not because he is in the business of selling domestic crude, but for national security reasons. The United States is currently importing about five million barrels a day—about 33 percent of all the oil we use—from the Mideast. By 1989 or 1990, imports are expected to increase to seven million barrels or 45 percent of all we use. In spite of the current glut and low prices, Mitchell warns the OPEC will be back in firm control by 1990. If there were another embargo, the U.S. could make up the five million barrels a day with domestic production—"but it would take us fifteen years to reach that if we doubled the number of wells in production today," he warns.

The price of oil per barrel, however, is too low to encourage domestic exploration, a business that generally results in two producing wells of every ten drilled. Mitchell believes that imports of oil should be held to 18 percent of what we use, and that the oil industry needs tax incentives, much like the real estate industry has with its mortgage interest deductions.

Another potential problem facing Houston and all of Texas is the possibility of political turmoil in Mexico. What would happen to the economy if suddenly illegal immigration tripled or quadrupled? In August a seminar conducted at The Woodlands brought authorities from Mexico and the United States, including former President Jimmy Carter, to discuss population-related issues.

In spite of all he has accomplished and his vision of the future, George Mitchell cannot solve all the world's problems. Politics, power, and money will most likely complicate practical solutions to common problems. But at least Houston has a global thinker who is setting an example.

SALUTE TO THE READING LIEDERKRANZ

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. YATRON. Mr. Speaker, I rise to ask my colleagues to join me in honoring the Reading Liederkranz on its 100th anniversary. Its membership has planned a number of events to commemorate this important occasion, and the celebration will culminate with an anniversary concert and dinner on November 9, 1985.

The Liederkranz, a German Singing and Sport Society, was founded on July 23, 1885. It orginally served solely as a singing society, but, in response to the growing influx of Germans into the Reading area, it soon became the hub of Reading's German coummunity. While the Liederkranz's famous choir has justifiably received a large amount of attention, its social club is also quite popular. It has, as well, fielded successful soccer teams for decades.

The invaluable contributions of Germans to the development of our Nation are widely recognized. The Liederkranz continues this tradition with its outstanding contributions to the Reading area. In keeping with century-old practice, the Liederkranz strives to perpetuate Germanic folk culture and traditions and to promote solidarity between Germans and Americans. Its 100th anniversary has been observed with a variety of festivities, including a saengerfest, a soccer tournament, an Oktoberfest, and the celebration of German-American Day.

As these commemorative events wind down, the Liederkranz will undoubtedly continue in its role as an integral part of the Reading community and a home away from home for the many German-Americans in our area. I wish the Liederkranz continued life and growth as it embarks on its second century.

HISTORY OF THE ABM TREATY REINTERPRETATION: THE SHORT COURSE

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. GARCIA. Mr. Speaker, the Washington Post had an interesting article today on the history of the Reagan administration's reinterpretation of the ABM Treaty. I thought the article might be useful in light of a related hearing in the House Foreign Affairs Committee today and in light of the President's upcoming summit with Mikhail Gorbachev.

One subject that seemed to be on the minds of our NATO allies, when many of us met with them at the North Atlantic Assembly meeting in San Francisco last week, was, of course, the summit, but also Star Wars and the ABM Treaty.

Since I'm certain that this issue is also on the minds of my colleagues, I thought the Post's article would make good background reading.

[From the Washington Post, Oct. 22, 1985]

ABM REINTERPRETATION: A QUICK STUDY

Young Lawyer's New Look at 1972 Pact Triggers Controversy

(By Don Oberdorfer)

Early last month, in what might have seemed just another document review by just another government lawyer, the Defense Department asked former New York assistant district attorney Philip Kunsberg to read the fine print of one of the most important arms control agreements between the United States and Soviet Union—the Antiballistic Missile Treaty of 1972.

Kunsberg, 35, whose background includes battles against pornographers and the Mafia but no arms control experience, spent less than a week studying secret records of the ABM negotiations. His conclusions, outlined in a 19-page report, have triggered an uproar in Washington and Moscow by leading to a reinterpretation of the treaty—and reversing the legal positions of four U.S. presidents, including President Reagan—to allow nearly unlimited development and testing of the components of Reagan's Strategic Defense Initiative, the so-called "Star Wars" shield against nuclear missiles.

What seemed at first glance to be an obscure issue of treaty interpretation—intriguing mostly to lawyers—has become a central question affecting the future of the U.S. arms policy, Star Wars and the summit meeting next month between Reagan and Soviet leader Mikhail Gorbachev.

The Kunsberg conclusions, modified and embraced as administration policy, strikes at the heart of the Soviet Union's preemi-

nent objective at the summit and arms talks under way in Geneva—curbing the U.S. strategic defense program. The Soviets have described such curbs as their essential requirement for any superpower of agreement in limiting offensive nuclear missiles.

Kunsberg's unlikely entrance into global power politics began last spring when he was hired as a Pentagon staff lawyer by Fred C. Ikle, undersecretary of defense for policy, and Richard N. Perle, assistant secretary for international security policy, both Star Wars advocates. One of his first tasks in early May was to analyze the ABM Treaty to gauge its impact on strategic defenses.

The traditional interpretation of the treaty accepted by the United States since its signing and ratification by the Senate during the Nixon administration—and repeated in reports to Congress by every administration since—had been that the pact bans "testing" and "development" of mobile and space-based ABM weapons based on "new physical principles" such as laser beams, directed energy weapons and the other exotic technology of Star Wars.

The ban is not flatly stated in the treaty but is based on the cumulative evidence of several phrases and statements, some ambiguous. Reagan, in unveiling his SDI dream on March 23, 1983, had promised that Star Wars would be conducted "consistent with our obligations" under the ABM Treaty.

Nevertheless, trying to fit Star Wars within the treaty restrictions had become increasingly problematic as the U.S. program moved closer to a phase requiring technical testing of potential components. In April the administration offered an interpretation of the treaty that distressed arms control advocates. In a report to Congress, the Pentagon argued that major Star Wars tests planned in coming years would involve only restricted "subcomponents" of systems, or would be tested against satellites in space instead of incoming rockets, and thus not violate ABM stipulations.

As Kunsberg began his review, however, he was "astonished by the rather large gap between what the treaty said and what was attributed to it," according to a source familiar with Kunsberg's thinking. His suggestion that the treaty might allow even more room for Star Wars was followed by a request from Perle in early September to have Kunsberg examine more closely the record of treaty negotiations in order to evaluate the backing for the widely accepted restrictions on "exotic" ABM systems such as those now contemplated for U.S. strategic defenses.

There was no doubt, according to Kunsberg's subsequent report, which included extracts of the negotiating record, that the United States had sought a tight ban on "exotic" ABM systems of the future except for those (unlike Star Wars) in a fixed land-based mode. But Kunsberg concluded that the Soviets had never agreed and, to the contrary, consistently rejected the broad ban advocated by the United States. Kunsberg did not interview any of the U.S. negotiators, but drew his conclusions from the written record.

Perle "almost fell off the chair" when presented with Kunsberg's report, the assistant secretary later remarked. Suddenly most of the problems posed for future Star Wars "testing" and "development" by the ABM Treaty seemed of doubtful validity, and Kunsberg's analysis even questioned whether Star Wars "deployment" would be curbed by the treaty.

Perle and the Defense Department lost no time in presenting their dramatic new findings about the ABM Treaty restrictions to an interagency committee. The new Pentagon position seized the attention of officials concerned with arms negotiation policy, who quickly understood the large-scale significance of the "new interpretation" for SDI, the ABM Treaty and U.S.-Soviet relations on the eve of the summit.

Secretary of State George P. Shultz called in the newly installed State Department legal adviser, Abraham D. Sofaer, 47, who came to Washington this summer after six years as a U.S. District Court judge in New York City. Charged by Shultz with studying the issue, Sofaer began his review of the negotiating record as maintained in Foggy Bottom. In addition, he held lengthy discussions with Paul H. Nitze, the administration's senior arms control adviser and the only senior member of the 1972 ABM negotiating team still in government.

Sofaer found the Pentagon report to be more opinion than analysis but, after several all-night bouts of study, reached a conclusion close to that of the Defense Department. He concluded that the U.S. negotiating team had tried—but failed—to convince the Soviet Union to ban future "devices" which might be invented to do the antimissile job.

Sofaer also concluded that while the treaty does not ban testing or development of space-based futuristic ABM systems, unlike the Pentagon he concluded it does ban their "deployment."

Sofaer's conclusions were reported to Nitze and Shultz in a series of memos, the most extensive and authoritative of them on Thursday, Oct. 3.

The following day, Oct. 4, the administration's high-level Special Arms Control Policy Group (SACG) met to discuss the issue at the White House under chairmanship of White House national security affairs adviser Robert C. McFarlane. During this meeting, according to informed sources, Pentagon representatives accepted Sofaer's position, rather than their broader one.

The discussion moved toward acceptance of the Sofaer position as new government policy, several sources said, though no formal agreement was reached. There are conflicting reports about whether there was a consensus around the table.

Toward the close of the late-afternoon meeting, McFarlane ordered a new position paper written to discuss a new legal position on the ABM Treaty that relieves the United States of most of the restrictions on Star Wars. At least some of those present expected to thrash out the issues further in connection with preparation of this paper.

All this had taken place in secret, without the knowledge of even well-informed people outside government. Last month, when the former counsel to the ABM Treaty negotiations, John D. Rhinelander, was asked by a journalist about rumors of a new treaty interpretaion, he advised his caller that "this is too ridiculous to take seriously" and promptly forgot about it.

The shift became public in a way that is still a puzzle to many in government, on a "Meet the Press" interview with McFarlane Oct. 6. In response to a question from Marvin Kalb which did not mention the ABM Treaty, McFarlane volunteered the view that "testing" and "development" of ABMs based on "new physical concepts" is "approved and authorized by the treaty" rather than banned.

This startling pronouncement by a high official, almost a 180-degree reversal of the longstanding U.S. position on the treaty, was a shock to the ABM Treaty's negotiators and other arms control advocates, to U.S. allies in Europe and arms control-minded members of Congress.

When Gerard C. Smith, chief negotiator of the 1972 treaty and a well-respected veteran of six administrations, learned that McFarlane's pronouncement was a serious expression of policy rather than a mistake, he denounced the new interpretation as erroneous and said it would "make a dead letter" of the ABM Treaty.

In an interview, Smith questioned "the whole idea of searching the [negotiating] record" for the meaning of the treaty. He said that, while some of the final language was "not the best," it was clear to him and other U.S. negotiators that the Soviets explicitly agreed to tight limits on future "exotic" ABM systems such as those envisaged in the Strategic Defense Initiative.

Smith said the most important negotiations on this point took place in a "working group" headed by Sidney Greybeal for the United States and a then little-known Soviet official named Viktor Karpov, who went on to be chief strategic arms negotiator for Moscow in 1979–83 is chief Soviet negotiator at the current offensive and space arms talks in Geneva.

Greybeal was reported by Smith and others to be certain that the Soviets clearly agreed in the working group to ban "testing" and "development" of space-based and other "mobile" ABMs based on exotic technology. (Greybeal declined to be interviewed on this matter.) Prof. Albert Carnesale, a dean of the John F. Kennedy School of Politics at Harvard University, who was a member of the Greybeal-Karpov working group, said in an interview that his understanding at the end of the negotiations was that space-based exotic weapons could not be tested or developed.

"Any other interpretation doesn't make sense," Carnesale said.

Retired Lt. Gen. Royal B. Allison, who was the senior military official on the U.S. ABM negotiating delegation, said in an interview he was deeply involved in the discussions of this issue because the Joint Chiefs of Staff were determined to leave room for "research and research-testing" in case "exotic" ABMs such as lasers could someday be developed.

"Nowhere did I understand that we retained the right to development and full-scale testing of new systems," Allison said. He added, "I didn't have any doubt in my mind as to what the Soviets had approved. If there had been any doubt you can be sure we would have announced it."

Of the members of the former U.S. negotiating team, only Nitze was consulted by Kunsberg, Sofaer or other U.S. officials in connection with the reinterpretation of the ABM Treaty. Sofaer's position is that the U.S. negotiators may have sincerely believed they had a Soviet agreement, but that the record is devoid of evidence to that effect.

Sofaer has also said, though, that the record is incomplete: new documents were still coming to light even after his report that galvanized the government.

Nitze's position, as a senior official of the Reagan administration, was the most important to the internal deliberations. Nitze declined to make a public statement of what he believed the treaty to provide when it was signed in 1972 or what he has come to believe now.

However, sources close to him said Nitze is now convinced that the Soviet delegation re-

jected U.S. efforts to ban "testing" and "development" of exotic ABMs, though they did agree that "deployment" would have to be negotiated by the two sides.

From the beginning of the internal debate six weeks ago, Nitze is reported to have taken the position that, legalities aside, the most vital job of the administration was to "keep faith" with the interpretation of the treaty previously presented to U.S. allies, Congress and the public. Nitze appears to have been the driving force behind Shultz' proposal, ultimately accepted by Reagan in a showdown White House meeting Oct. 11, that the "new" ABM interpretation be accepted by the administration as a matter of law, but that the "old" ABM interpretation restricting Star Wars testing and development be retained as a matter of administration policy.

The final decision, signed by Reagan according to official sources, did not say how long he would continue to observe the "old interpretation." Since it is now judged to be valid only as a matter of presidential policy, rather than as treaty law, it could be presumably be abandoned whenever convenient.

The Soviet Union, which had little to say as the "new interpretation" of the ABM Treaty became a matter of public debate in Washington, began to warm to the subject late last week.

The chief of the Soviet general staff, Marshal Sergei F. Akhromeyev, accused the Reagan administration of "deliberate deceit" in reinterpreting the ABM Treaty. In a Pravda article, Akrohmeyev charged McFarlane with having "distorted the essence of the treaty" by "trying to substantiate the lawfulness of experiments" that would lead to a space-based ABM.

Among the several mysteries remaining about the administration's reinterpretation of the 1972 treaty is why the issue came to the fore now, when the Star Wars program is still about five years away from breaking though the bounds of the treaty as previously interpreted, at least as the treaty's prohibitions have been applied by the Reagan administration.

Some of the advocates of the new interpretation said the timing was essentially a coincidence caused by the "fresh look" at the evidence by the two new government lawyers. Others, including a senior White House official, said the issue arose now because "people are staking out their ground" for the long term before the Reagan-Gorbachev summit.

Some in the administration are "very nervous" that Reagan might agree to some restraints on SDI in his meeting with Gorbachev and are moving to forestall such a possibility by reinterpreting the ABM Treaty now, this official said.

On the other, and at the moment the losing, side, the official said, are those who still hope for compromise with Gorbachev on SDI as the essential building block of a broad U.S.-Soviet agreement.

THE TRANSPORTATION TRUST FUNDS DON'T BELONG IN THE GENERAL BUDGET

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. SHUSTER. Mr. Speaker, when this House considers reconcilation tomorrow, we will have the opportunity to strike a blow for honesty in budgeting.

I urge my colleagues to support removing the transportation trust funds from the unified budget because self-financing, deficit-proof trust funds, do not belong in the general fund budget.

Trust funds were brought into the general budget in 1967 to help finance the Vietnam war—and tomorrow we will have the opportunity to correct this mistake. Let's use our dedicated transportation trust fund dollars to build better highway, aviation, and transit systems for America—not to build up misleading surpluses that mask the real budget deficit.

THE 75TH ANNIVERSARY OF THE STANISLAUS MEDICAL SOCIETY

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. COELHO. Mr. Speaker, on October 22, 1985, the Stanislaus Medical Society will celebrate the 75th anniversary of its founding in 1910.

The purposes of the society are to promote and develop the science and art of medicine, while conserving and protecting the public health. It was organized by Dr. W.J. Wilhite and Dr. B.F. Surryhne among the small number of doctors practicing medicine in the area in 1910. Since that time, the society has grown to its present membership of over 400, and has contributed immeasurably to the quality of medical care in Stanislaus County through education, training, and support.

I would like to congratulate the officers of the Stanislaus Medical Society, Dr. William L. Boddie and Dr. Rita M. Chafkin, and all of its members on the occasion of its 75th anniversary. On behalf of the people of Stanislaus County, I would like to salute the society for all that it has done to improve medical care in our community over the years.

CONGRESSIONAL TRIBUTE TO THE WEST SAN GABRIEL VALLEY CONSORTIUM

HON. MATTHEW G. MARTINEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. MARTINEZ. Mr. Speaker, I rise today to honor the West San Gabriel Valley Consortium for its work in the training and job placement of welfare recipients, poverty persons, older workers, the handicapped, refugees, and displaced workers. Their job training and placement programs since its inception in 1976 have made important contributions to my district and to the cities the consortium serves, which include Alhambra, Bell Gardens, Montebello, Monterey Park, Rosemead, San Gabriel, and Temple City.

The achievements of the West San Gabriel Valley Consortium speak for themselves. In fiscal year 1985, 686 residents of the San Gabriel Valley were placed in job-related training provided by the consortium. The earnings of graduates of the training program exceeded over $3.3 million, a figure based on current hourly wages for those placed on jobs.

The consortium has begun to institute new programs to complement its successful job training program. The consortium is now pursuing the practice of taking their trainees off welfare rolls when they are placed in suitable training occupations. Also, the consortium has instituted a Summer Youth Employment Program for 1,400 low-income youth in its area.

Mr. Speaker, organizations such as the West San Gabriel Valley Consortium should be commended for the outstanding contributions they make to the community. As chairman of the Employment Opportunities Subcommittee of the Education and Labor Committee, which has primary oversight responsibilities over the Job Training Partnership Act, I have worked with job training programs throughout the country. From my work with the West San Gabriel Valley Consortium, I know their program is one of the finest in the country, and I am sure that the consortium will continue its fine work in serving the San Gabriel Valley. It is my hope that other organizations will follow the lead of the consortium, and provide needed job training and placement to help solve this country's severe unemployment problem.

BUDGET QUACKERY

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. LEHMAN of Florida. Mr. Speaker, a recent Miami Herald editorial very clearly sums up the Gramm-Rudman plan to balance the Federal budget. The editorial is on target in calling this legislation quackery. As such it will only delay rational and realistic approaches to solving the deficit problem.

We, in the Congress, must have the commitment and the courage to devise a plan that will confront the difficult choices now before us rather than abdicate our constitutional responsibilities as legislators.

I urge my colleagues to read the following editorial:

[From the Miami Herald, Oct. 15, 1985]

BUDGET QUACKERY

Is there a doctor in the House? The U.S. Senate has sent over a deficit-reduction bill that's badly in need of one. Not even major surgery could make this bill viable. It would be better off dead.

The Senate's bill, you'll recall, requires trimming $36 billion-plus off projected Federal deficits each year through 1991, when the deficit theoretically would vanish altogether.

Ordinarily such deficit reductions might be achieved through lower spending, higher taxes, or some combination of the two. With the tax-increase route blocked by President Reagan's opposition and veto power, however, budget cuts inevitably will be the method used the most.

If Congress, can't decide where to trim, moreover, the bill mandates automatic cuts across the board, with two types of spending spared: Social Security and interest on the $2 trillion-plus national debt.

There's the rub. Together the two exempt categories account for 40 percent of the budget. This means that 100 percent of the cutting would be done in the other 60 percent of the budget, which includes the military. Given the Pentagon's clout, there's every reason to believe that other Federal programs will bear the brunt of the cuts.

It's easy to dismiss those other categories of Federal spending as "social of Federal spending as "social programs," a label that evokes visions of do-good bureaucrats and welfare queens. When the cutting actually begins, however, it'll be obvious that there's more than fat in the budget's socalled discretionary spending. What's more, if a recession hits between now and 1991—and odds are that one will—counter-cyclical spending such as unemployment benefits may prove impossible to contain, much less to reduce.

This whole approach is quackery. It's a poor substitute for the conscious exercise of the rational judgmetn required to sort through national priorities and make tough, politically risky decisions. Sooner or later, this sorting-through will have to be done.

In the meantime, the chances are good that the Senate bill's year-to-year method of reducing the deficit, if it ever worked at all, would come undone quickly. As the budget cutting moved closer to the bone, the fragile congressional consensus in support of this approach would be ever harder to sustain.

This bill's ultimate danger, then, is the same as with other forms of quackery: that experimenting with this purported panacea will serve only to delay administering the bitter medicines that really work. The House therefore ought to reject it, lest the American people be fooled into thinking that the Federal deficit fever actually has been cured.

WORLD WAR II HERO DESERVES RECOGNITION

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. DORGAN of North Dakota. Mr. Speaker, this summer I met Sam Sortland from Ambrose, ND. He was asked to recount some of his experiences as a prisoner of war in World War II at POW/MIA Day in Williston, ND.

As a result of my visit with Mr. Sortland, I attempted, through contacts with the Pentagon, to get Sam Sortland a Purple Heart for his service during World War II. However, I discovered that a 1946 War Department policy precludes the awarding of the Purple Heart to prisoners of war injured as a result of war crimes.

Although Sam Sortland is not eligible for a Purple Heart, he and others like him are heroes.

I wanted to note in the CONGRESSIONAL RECORD that Sam Sortland fought with the Army Air Corps in Corregidor and endured 3 years in a Japanese prison camp in Manila.

Cpl. Sam Sortland served with the 803d Engineer Battalion, Company A. His job was building airfields in the Philippines and Corregidor. But Corporal Sortland couldn't build an airfield on Corregidor because his company was locked in battle on a beachhead until May 6, 1942, when Sam was taken prisoner by the Japanese.

At a prison camp in Manila, he endured starvation and torture until he was liberated by the U.S. Rangers on February 4, 1945. At the time of his release, Corporal Sortland was blind and weighed only 70 pounds.

Although Sam Sortland is not eligible for the Purple Heart, on behalf of all North Dakotans, I want him to know how proud we are of his bravery and how grateful we are that his sacrifice and that of thousands of other men and women like him enabled our democracy to triumph over despotism.

SOUTHWESTERN BELL'S OPERATION IDENT-A-KID

HON. ALAN WHEAT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. WHEAT. Mr. Speaker, the phrase "necessity is the mother of invention" was first made famous about 250 years ago. Today, Southwestern Bell Telephone of Kansas City, MO, is proving the wisdom of those words.

Southwestern Bell Telephone employees saw a need for a program to help combat the increased number of child abduction crimes in our country. The result is Operation Ident-A-Kid, a volunteer program started in 1984 to fingerprint and photograph children in western Missouri, particularly in Kansas City.

Under the guidance of the company's community relations teams, Southwestern Bell Telephone employees volunteer their time on weekends to help fingerprint and photograph children at shopping centers and malls. Each parent that participates in the program receives an identification card that includes a child's age, weight, birthmarks, scars, and fingerprints as well as a current photograph. In 1984, 2,700 children in the Kansas City metropolitan area and other towns in western Missouri were fingerprinted. The program blossomed this year and more than 18,000 children participated in the program.

The program does more than simply fingerprint and photograph children. At each location, Southwestern Bell Telephone employees distribute information in keeping children safe at home and outside the home. The parents also receive illustrated pamphlets that explain to children how to use emergency telephone numbers. Local law enforcement officials have augmented Southwestern Bell's efforts by going to the shopping malls with the company's employees and answering questions from parents and children on protective measures.

Mr. Speaker, Southwestern Bell Telephone traditionally has been, and remains, a company with a genuine concern for the communities it serves. With the growing number of crimes against children, Operation Ident-A-Kid is one way the company demonstrates its caring attitude. I want to join with the many parents who have participated in the program to express my gratitude to Southwestern Bell and its altruistic employees who participated in this program.

LUPUS AWARENESS WEEK

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. GREEN. Mr. Speaker, Sunday, October 20, marked the beginning of National Lupus Awareness Week 1985. I should like to take a moment to speak about this disease, which claims 50,000 new victims every year. Unfortunately, the medical community does not know what causes lupus, nor does it have a cure.

What is known is that Systemic Lupus Erythematosus is an autoimmune disease—a disease caused by a malfunction of the immune system itself, rather than by invasion of a foreign body. It affects over 500,000 Americans, 90 percent of whom are woman, usually in their childbearing years. The severity of the disease varies among women, but it can be fatal.

This week we will consider the conference report on H.R. 2409, a bill which includes a new temporary Lupus Erythematosus Coordinating Committee within the National Institutes of Health to plan, develop, coordinate, and implement comprehensive Federal initiatives on lupus research. I believe this is an essential step in the efforts toward curing this disease.

However, it is also important that public awareness of lupus be expanded. This week provides a special opportunity to teach Americans about this illness. I should like to commend the Lupus Foundation of America for its leading role in this initiative. The S.L.E. Foundation in New York's 15th Congressional District is but one of many chapters around the country which provide information, referral and counseling services to Lupus victims and their families.

These free services, as well as community outreach and education programs, have been in place in New York and throughout the United States for 15 years. Only through continued support for medical research into immune system disorders and greater public awareness of the nature of this disease will we ultimately discover a cure.

QUEENS HOSPITAL CENTER CELEBRATES 50TH ANNIVERSARY

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. ACKERMAN. Mr. Speaker, I rise today to pay tribute to an outstanding health care facility, the Queens Hospital Center, on the auspicious occasion of its 50th anniversary, which will be celebrated on October 24, 1985.

Since New York City Mayor Fiorello H. LaGuardia dedicated Queens General Hospital in 1935 as the first public general hospital in the borough, this facility has been an important leader in medical care for all of New York. Combining with Queens Borough Hospital and Triborough Hospital, the new Queens Hospital Center featured an all-volunteer staff of physicians that was in the forefront of cancer research and had one of the few pain clinics in New York City.

As the institution approaches its 50th anniversary, the men and women of the Queens Hospital Center have renewed their commitment to innovative, quality medical care. The hospital opened the first alcoholic rehabilitation center in Queens, and sponsors an excellent teen-pregnancy program as well as participating in WIC. With its fine health care and strong dedication to the Queens community, the Queens Hospital Center continues to play an important role in New York City medical care.

Mr. Speaker, the Queens Hospital Center will mark its 50th anniversary with a series of symposia, ending with a gala dinner-dance on Thursday, October 24. By using the occasion not only to celebrate the past 50 years, but also to discuss the critical issues of medical care in Queens County today, the Queens Hospital Center again demonstrates its devotion to finding medical solutions that fit the needs of the community.

Mr. Speaker, the doctors, nurses, staff, and administrators of the Queens Hospital Center have worked hard to bring the best possible medical care to Queens County. I would particularly like to acknowledge the fine work of Lorraine Tredge, the executive director of the Queens Hospital Center, and Dr. Irving Margolis, president of the medical board. Their impressive accomplishments, and the achievements of the entire staff, have strengthened the tradition of excellence at the hospital center.

Mr. Speaker, I call on all of my colleagues in the U.S. House of Representatives to join me now in congratulating the men and women of the Queens Hospital Center on the joyous occasion of its 50th anniversary.

TRIBUTE TO GRACE FISHER ATKINS

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. DIXON. Mr. Speaker, I take this opportunity to pay tribute to a woman who has been an inspiring catalyst in the lives of many people. From 1946 to 1969, Grace Fisher Atkins owned the residence at 3743 West Adams Boulevard in Los Angeles. During that time, Grace rented rooms and served as surrogate "mom" to several male college students who needed a place to live. Under Grace's careful guidance, those young men completed their education and are now serving their communities as successful citizens in a variety of professions and occupations including medicine, law, politics, acting, law enforcement, and business.

On October 26, 1985, the young men of 3743 West Adams Boulevard, their families and friends will gather at the Airport Marriott Hotel for a reunion and to pay tribute to Grace Fisher Atkins. Although I was not one of Grace's roomers, I lived behind her home on West Adams Boulevard for several years and can also attest to the warm heart and generous nature that has inspired this richly deserved tribute.

A devoted wife and mother, Grace is a woman of many interests. She received her bachelor's degree from UCLA and her master's from the University of Southern California, where she has also done doctoral course work, in the field of psychology. Grace has served as president of the Delta Sigma Theta Sorority and the Kappa Mothers' Club, and is a respected member of the NAACP and the Urban League. She obtained a real estate license in 1944, and has been credited with many creative real estate transactions during her career, including the sale of West Adams Gardens, an entire block of homes near USC.

Her interest in education led to teaching credentials from the State of California in elementary and secondary education, and her 20 years of service to Los Angeles city schools has been highlighted by the receipt of life diplomas from the State for those instruction levels.

An accomplished seamstress, Grace won a design competition in Seattle, WA, and at the age of 19 was designing clothes for Marilyn Miller, Jeanne Dixon, Helen Hayes, and Marian Anderson. She later taught dress design and construction at Jefferson Adult School from 1935 to 1942.

Grace Fisher Atkins is living a full and rewarding life. It is my privilege to join in the warm accolades and expressions of sincere appreciation to be extended to Grace on October 26. Her life serves as an inspiration to us all, and I am honored to have been able to share with my colleagues this brief glimpse of a truly remarkable individual.

OREGON WINERIES

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. AuCOIN. Mr. Speaker, last year Oregon's small, family owned wineries produced 580,000 gallons of wine for shipment to 36 States, the United Kingdom and Japan. Wine production added $10 million to the State's treasury. It is clear that Oregon wineries will be significant contributors to Oregon's economic future in years to come.

Winemaking season is now underway back home. Oregon's 48 bonded wineries turn out some of the finest wines in the world. For those who profess to be world-class gourmets, that statement could be construed as hometown chauvinism. Mr. Speaker, our Oregon wineries have proven time and again that when it comes to going for the gold, they're No. 1:

Eyrie Vineyard, established by David and Diana Lett in 1966, was the first vineyard to produce in the Willamette Valley. In 1980, Eyrie won second place in worldwide Burgundy competition in France.

Ponzi Vineyard is well-known for its fine Pinot Noir. In 1981, my good friend Dick Ponzi won a gold medal for this excellent wine at the International Wine and Spirits Competition in Bristol, England.

Taulatin Vineyards, owned by Bill and Virginia Fuller, captured a gold medal in 1982 at the International Wine and Spirits Competition in London for its fine 1980 Pinot Noir.

1983 was a banner year for Oregon vineyards. Among several competition winners, Amity Vineyard's 1982 White Riesling was named "Best of Show" at the San Francisco Wine Festival and received a gold medal at the Atlanta International Wine Festival. Tualatin Vineyard also went for the gold in Atlanta with its 1980 Chardonnay and got it.

Oak Knoll and Knudsen Erath shared the honors in 1983 when both received "Best of Show" for their 1980 Pinot Noirs at the All-American Wine Competition in New York.

Oregon wineries had another banner year in 1984. Knudsen Erath's 1980 Pinot Noir took the "American Champion" award in New York. Tualatin's 1980 Pinot Noir and 1981 Chardonnay each garnered a "Grand Award" in the London International Wine and Spirits Competition—the first winery so honored in the event's history. The London show included more than 1,000 entries representing all of the world's major wine-producing regions.

In 1984, my good friends Bill Blosser and Sue Sokol won a gold medal for the Sokol Blosser Winery's 1981 Chardonnay at the San Francisco Wine Fair.

Eyrie Vineyard's 1982 Pinot Noir and Knudsen Erath's 1981 White Reisling each won a gold medal in 1984 at New York's All-American Wine Competition.

This year, Oregon wineries again have received top honors. Oak Knoll won a silver medal for its 1982 vintage-select Pinot Noir, while Sokol Blosser was recognized for its 1983 Yamhill County Hyland Vineyard Pinot Noir at the Tri-Cities Regional Wine Festival. Oak Knoll's 1982 vintage-select Pinot Noir was awarded a silver medal at the West Coast Wine Competition in Reno, NV.

Mr. Speaker, I take great pride in pointing out that the majority of Oregon's award-winning wines are grown and produced in the First Congressional District, which I represent.

I'm told we've had perfect winemaking weather this year. The 1983 Pinot Noirs are just now coming out, a vintage widely heralded as the finest in the Oregon wine industry's 22-year history. As more and more wineries open their doors—including Monrovia, Rex Hill, Veritas, Bethel Heights and Garden Valley—I know that Oregon wines will continue to merit the national and international acclaim which has been awarded them thus far.

COMMEMORATION OF 200TH ANNIVERSARY OF THE LAND ORDINANCE OF 1785

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. APPLEGATE. Mr. Speaker, I would like to make my colleagues aware of the celebration of the 200th anniversary of the signing of the Land Ordinance of 1785. The East Liverpool Ohio Historical Society, in my district, hosted a 2-day celebration on Saturday, September 28, and Sunday, September 29, to honor those pioneers who participated in the survey that began when a stake was driven in the north shore of the Ohio River, at the corner of what is now Ohio and Pennsylvania in the city of East Liverpool, OH, on September 30, 1785. This celebration has a great State and national significance in that this is the bicentennial year of the survey of the Northwest Territory, which eventually became the five States of Ohio, Indiana, Illinois, Michigan, and Wisconsin, and included approximately 177,150,000 acres. The territory also included what is now the part of Minnesota east of the Mississippi River.

The Land Ordinance of 1785 was a major step forward in the settlement of the country northwest of the Ohio River. This ordinance, as passed by a fledgling Congress, instructed U.S. Geographer Thomas Hutchins to personally survey a line 42 miles to the west from the point on the north shore of the Ohio River opposite of the northern point of the Pennsylvania/Virginia lines. The scientific system of surveying and of subdividing the land with clearcut establishment of both boundaries and titles was paramount in the development of a policy for the disposition of the lands in the western territory of the United States. This ordinance could not have been put into effect without the foresight and leadership of the First Federal Congress of the United States.

The rectangular survey opted for by Congress was one of the great features of the Land Ordinance of 1785 that has been retained in our national land system ever since. The ordinance also included all of the best features of the New England land system. This important achievement in the founding of our country was proof of the prudence and direction which guided the First Federal Congress.

This ordinance, drafted by Congress, could not have been carried out without the coverage and bold spirit of the surveyors under Thomas Hutchins, first geographer of the United States. These surveyors, who have often gone unnoticed, faced many great perils in the Northwest Territory to carry out the orders as directed by Congress, including hostile Indians who were unwilling to surrender land to "greedy" Americans. It is important that we remember these men and the risks that they exposed themselves to in order to support and uphold the directive of our First Federal Congress.

The contribution which the Land Ordinance of 1785 made in the establishment of our country cannot be forgotten and the individuals who drafted and implemented this ordinance will forever stand in the history of our Nation.

Mr. Speaker, I am particularly pleased to draw to the attention of my colleagues this major event in the history of the United States, as I was there to speak at the celebration of the East Liverpool Historical Society. We should all applaud this tremendous land development in the founding of our country.

YOUTH OPPORTUNITY WAGE ACT OF 1985

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. COATS. Mr. Speaker, I would like today to add my support to H.R. 1811, the Youth Employment Opportunity Wage Act of 1985, which was introduced by my colleague, Congressman TRENT LOTT, at the request of the President.

Despite economic growth over the past 3 years, youth unemployment remains extremely high, particularly for minorities. The unemployment rate for all youth, 16 through 19 years of age, was 19.5 percent in July 1985, while the unemployment rate among black youth was 41.3 percent. These rates are unacceptable and passage of H.R. 1811 can bring them down.

Many teens are unemployed because they lack skills to earn the minimum wage; such youths are unable to find jobs even in the summer, when youth employment is at its peak. In July 1984, only 61 percent of all white youth and 34 percent of black youth were able to find jobs.

This proposal, which would apply to youths age 19 and under, has the potential to create 400,000 summer youth jobs across the country at no additional cost to taxpayers. Teenagers would be permitted to accept employment for 75 percent of the statutory minimum wage from May 1 to September 30. The authorization for the youth wage would extend for three summers after which a full evaluation would be made to determine the effectiveness of the youth wage in creating summer jobs for youth as well as any adverse effects on other workers.

Some have opposed the youth minimum wage on the basis that employers would abuse its provisions by substituting teen workers for full-time employees. However, H.R. 1811 specifically addresses this issue by strictly penalizing employers for this practice. These employers would be subject to various legal remedies including a $10,000 fine, 6 months in prison, and payment of back wages.

The proposed legislation would enable employers to expand job opportunities for teenagers during the summer months and would enable many to find jobs, earn money, and gain the skills needed for future work. I urge my colleagues to join me in cosponsoring this worthwhile legislation.

LATCHKEY CHILDCARE ACT OF 1985

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. EDGAR. Mr. Speaker, today I am introducing legislation to reauthorize the Latchkey Daycare Program which was originally authorized in Public Law 98–558. It establishes a program to allocate money to public agencies and nonprofit organizations to establish before- and after-school child care programs in existing school facilities or community centers. Unfortunately, funding legislation for this important program was never passed.

Although each year more and more women enter the job market, each year more and more women live under the poverty line. If we can enable more women to hold down jobs by improving our day care network, we could bring more women out of the clutches of poverty.

Over the past several decades, child care has become a desperate problem for many American families. Approximately 47 percent of women with children under the age of 1 are working, yet there has been limited response to the drastically increased need for child care.

Thirty-six percent of all mothers who are currently not employed and whose family income is under $15,000 reported to the Census Bureau that they would work if adequate day care was available. Currently, many women have to make the ugly choice between living below the poverty line or leaving their children at home alone.

Imagine if you will, the pain of a single mother, unable to afford day care and far

away from her family, when she has to leave a feverish child at home so she can keep her job. Single mothers have to make this kind of choice every day.

The child care program which I outlined above would represent a small initial effort by the Federal Government to address this growing problem. In my area of Pennsylvania alone, surveys show that 43 percent of the families are interested in after-school child care located in elementary schools. Many parents are employed outside the home and are dissatisfied with their current child care arrangements. Employing school buildings for after-school child care has several advantages, including the provision of a safe, familiar environment for children and the utilization of empty space.

Mr. Speaker, I urge my colleagues to review this important legislation and add their names as cosponsors. It is high time that the Federal Government rejoin State and local efforts to improve the availability, affordability, and reliability of child care services.

SENIOR CITIZENS WORKING FOR THE PUBLIC GOOD

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. SKELTON. Mr. Speaker, it seems we often hear of the problems an aging population will bring for our society, but, rarely do we dwell on the benefits that may result from this trend. Therefore, I would like to take a few minutes to recognize the achievements of the Foster Grandparent Program because I believe that highly successful program provides a shining example of the contributions older Americans can and do make toward the welfare of our Nation.

The growth of the Foster Grandparent Program illustrates the willingness of our senior citizens to provide public service. In its first year of operation, 782 foster grandparents volunteered for 33 projects in 27 States. Today, 19,000 senior citizens serve as foster grandparents to 65,000 children in 245 projects nationwide. In my home State, 2,200 children receive guidance and affection from 630 older Missourians. 125 of those senior citizens reside in or around Higginsville, MO, and enrich the lives of children who reside in rural areas of my district.

It is hard to conceive of a program for which the Federal Government gets a better return on its investment than the Foster Grandparent Program. For a relatively small amount of funding, the Foster Grandparent Program assists greatly in the physical, psychological and social development of thousands of children. In addition to helping care for physically, emotionally and mentally handicapped children, foster grandparents provide personal warmth to the abused and neglected and work closely with children who have been in trouble with the law.

Mr. Speaker, the Foster Grandparent Program is, above all, an eloquent answer to those who wrongly believe senior citizens have nothing to contribute to society. Therefore, I believe it is highly appropriate that we are marking the twentieth anniversary of the Foster Grandparent Program by designating the month of October as "National Foster Grandparent Month."

IMPRISONMENT OF KOSTADIN KALMUKOV

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. DIOGUARDI. Mr. Speaker, I rise to bring to the attention of my fellow colleagues the plight of Mr. Kostadin Kalmukov, who has been designated by Amnesty International as a "prisoner of conscience." Mr. Kalmukov's case is being closely monitored by Amnesty International's Group 154 of mid-Westchester, NY.

Mr. Kalmukov is a 55-year-old electrotechnician from Bulgaria. He is a husband, father of two children who are adherents of the Pentacostalist faith. In 1984, Mr. Kalmukov was arrested and sentenced to a period of no less than 5 years in prison as a result of his desire to be excused from work on the two holiest days of his religion's observance, those being Christmas and Easter Sunday. Both of these are "non-recognized" by the Bulgarian Government and deemed mandatory "work days" under the oppressive stronghold of their government(s).

In addition to the charges and prison sentence put forth upon Mr. Kalmukov, Amnesty 154 was able to obtain information regarding alleged acts of severe mistreatment which go against all United Nations statutes—article 3—protecting all persons from cruel unusual punishment and torture.

The "alleged" act most fresh in the minds of our friends at Amnesty 154 took place on December 25, 1984, when Mr. Kalmukov allegedly protested working on Christmas Day, apparently those were sufficient grounds enough for Mr. Kalmukov to be beaten into a state of unconsciousness—a practice very common behind the Iron Curtain. After the beating, Mr. Kalmukov was stripped of his clothing and put in a punishment cell in which he remained for 3 days. Let us not forget that Christmas is not the warmest time of the year in Eastern Europe.

At this point in time, Amnesty 154 is doing their utmost in keeping up with Mr. Kalmukov's health and personal statute as he awaits his release. We know their help in this fight is second to none.

And finally, in this statement we, as thankful members of a free society, urge the Soviet backed totalitarian Government of Bulgaria to release its grip of undue tension that it puts upon its people and in turn on people of the world alike.

I call for the immediate release of Kostadin Kalmukov.

IN SUPPORT OF H.R. 3008

HON. RICHARD J. DURBIN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. DURBIN. Mr. Speaker, I wish to take this opportunity to express my unqualified support for H.R. 3008. October 9, 1985, is a benchmark in American civil rights history. The passage of the Federal Equitable Pay Practices Act, by a vote of 259–162, represents a critical step toward eradicating wage discrimination in the Federal Government and achieving the civil rights goals set out over 20 years ago.

This measure provides for a long-overdue study of the Federal classification and compensation system to determine if there exists any occupational segregation or wage discrimination based on sex, race, or ethnicity. As was recommended by the GAO, the study will be conducted by an independent consultant and overseen and evaluated by a bipartisan, 11-member commission made up of representatives from the administration, the Congress, Federal employee unions, and women's and civil rights groups.

Contrary to some of the distortions proffered by H.R. 3008's detractors, the measure will not apply to or in any way affect the private sector. It simply calls for a straight forward study of the Federal employment system.

The Federal classification system has not been thoroughly examined since its inception in 1923. The number of women and minorities in the work force and the nature of their jobs have changed dramatically since then. It is only reasonable and just to conduct this thorough review.

Evidence of wage discrimination and occupational segregation in the Federal Government has been well documented. In 1982, when several House committees began an exhaustive series of hearings on this subject, it was disclosed that the average working woman earned at least 40 percent less than the average working man. Female State and local government workers were slightly better off, earning at most 71.5 percent of the salary of the average male worker.

Further, a GAO study revealed that in addition to a wage gap of $9,000 per year, there existed extreme occupational segregation in the Federal civil service. While 46 percent of the Federal work force is comprised of women, 85.5 percent of all female Government employees are concentrated in 8 percent of the occupations—those at the lower end of the pay scale.

Our landmark civil rights laws have weathered some rough storms in recent years. It is regrettable that so much effort has been focused on staving off erosion of these important laws rather than on refining and improving them. The Federal Equitable Pay Practices Act is a refreshing step toward bolstering the Civil Rights and Equal Pay Acts of the 1960's. I am proud to support this measure.

COMMEMORATING LODGE 525 OF THE POLISH NATIONAL ALLIANCE

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 26, 1985

Mr. CONTE. Mr. Speaker, on Saturday, October 26, 1985, Lodge 525 of the Polish National Alliance in Holyoke, MA, is celebrating its 85th anniversary. The distinguished history of Lodge 525 began on October 29, 1900, when it was accepted by the executive committee of the Polish National Alliance in Chicago. Initially, the group had 25 members, and began supporting recently-immigrated Poles with material and moral support. The lodge, which has grown to over 500 members, provides a fraternal insurance policy to each of its members. Throughout its history, Lodge 525 has been dedicated to assisting Poles assimilate into American culture and has been active in the Holyoke community.

In 1937, the organization founded Pilsudski Park in Holyoke, and to this day there are numerous dances, picnics and other civic events held in park. The Polish people who have struggled hard to achieve their independence and freedom in America remain committed to their Polish heritage, and the lodge's activities provide an opportunity for them to gather together, listen to Polish music and speak Polish with good friends.

Lodge 525 is part of the largest ethnic-fraternal benefit society in the country—the Polish National Alliance. Back at its founding in 1880, the alliance was a small group with only $162 in its treasury. But the organization has grown rapidly, and now boasts over 300,000 members in 36 States with $180 million in assets. The Polish National Alliance is involved in a number of worthy activities including the allocation of $10 million in scholarships, as well as putting out daily and biweekly Polish newspapers.

Mr. Speaker, I cannot emphasize enough what a valuable contribution the Polish National Alliance and Lodge 525 have provided for the Pioneer Valley of Massachusetts and our society in general. The first Polish immigrants struggled hard to settle in western Massachusetts and throughout the United States. The language barrier made finding jobs in the mills difficult. Those who found them were often overworked and exploited. Farmers put in long hours tilling the land, and the return was small. In essence, the first Polish emigrees were a solitary people: they spoke a different language, dressed a little differently, ate different foods, and did not always understand the ways of those who lived around them.

But throughout these difficult times, Polish immigrants were united and sustained by a strength and confidence in themselves, family, life and their church. Over time, they became less afraid of being different and more secure as a united and vibrant community. The Polish National Alliance, along with one of its original lodges—number 525 in Holyoke—have been invaluable in this process.

Let me close, Mr. Speaker, by saying that it is a privilege and honor for me and the people of my district to have had such an accomplished and respected group as Lodge 525 in Holyoke for 85 years. The Polish community has a proud heritage—both in Europe and in this country. Saturday's anniversary and the achievements of Lodge 525 of the Polish National Alliance over the last 85 years are testament to this fact. I congratulate the lodge and all its members on their anniversary, and I know that another 85 years—just as successful—await them.

INTRODUCTION OF CHEROKEE HYDRO BILL

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. SYNAR. Mr. Speaker, today I have introduced legislation that will allow the Cherokee Nation of Oklahoma to take great strides in improving the economic well-being of its people and its future generations. The bill I have introduced will provide authority for the Army Corps of Engineers to own, operate and maintain a hydroelectric generating facility that the Cherokee Nation intends to design, construct and finance. The Cherokees have proposed to provide 100 percent—and I emphasize 100 percent—of the financing for adding a hydroplant to the existing W.D. Mayo Lock and Dam No. 14 on the Arkansas River. Upon completion, the Corps of Engineers would assume ownership of the facility and operate the plant in connection with its current responsibilities at the lock and dam. Power from the 40 megawatt facility would be marketed by the Southwestern Power Administration, thereby providing needed low-cost electricity for its preference customers. In turn, the power sales will cover the Federal costs associated with the corps' maintenance of the powerplant, reimbursement costs associated with construction of the facility by the Cherokees and a reasonable annual royalty payment to help secure the economic well-being of the tribe.

Mr. Speaker, the arrangement I have just outined has been the source of extensive discussions by all parties involved. Indeed, I believe that all of the parties are in agreement about the enormous near and long-term benefits offered by this proposal.

Perhaps most important, this bill provides exciting opportunities. It provides the Cherokee Nation the opportunity to create jobs in an economically depressed area of excessive unemployment. It also provides the tribe the opportunity to expand its economic development program into a first-of-a-kind venture that offers financial stability and prosperity for years to come.

In addition, it provides a unique and as yet untested experiment in connection with this administration's policy to seek out new partnerships with non-Federal interests in financing water development projects.

We are all well aware of the tremendous budget constraints facing the Government today. This bill, providing the necessary authority for the corps to operate and maintain the hydroplant upon completion of construction, offers economic benefits to the Cherokee Nation and regional electricity consumers without expending any Government funds. The Cherokees are willing to accept the full financial responsibility of this novel proposal. I comment them for their courage and foresight. And I also commend them for bringing forth what I hope becomes the benchmark for similar future efforts to provide local economic development opportunities while recognizing the severe budgetary limitations we face as a nation.

I therefore urge my colleagues to join with me in support of this legislation.

SOVIET JEWRY

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. MAVROULES. Mr. Speaker, I am compelled to once again address my colleagues on a matter of fundamental human rights—specifically the issue of Soviet Jewry. It is an issue that I have addressed on a number of occasions in the past. It is an issue that many of my distinguished colleagues have sought to confront. Time and time again, we find ourselves increasingly more concerned over this compelling problem.

Because, Mr. Speaker, the sad fact is that the problem persists. It not only persists, it appears to get worse. Indeed, the violation of basic human rights, to this day, remains a way of life in the Soviet Union. And because the problem persists, so too does our responsibility to speak out in the name of justice and humanity. As I have often said, it is the moral responsibility of the free world to stand firm in opposition to the Soviet's continued refusal to respect even the most basic of human liberties.

The problem must be confronted. I believe, Mr. Speaker, that the issue of Soviet Jewry is particularly important at this period in time. We all know that we are now on the eve of a most critical summit meeting between President Reagan and Soviet leader Gorbachev. As the summit draws near, it is essential that we clearly define our intentions and goals. We must enter this critical meeting with an understanding of our priorities, and with a firm conviction and determination to aggressively pursue those issues which are of most vital concern.

Now it is clear that the reduction of our nuclear arsenals is of central importance. And I most certainly do not wish to underscore the importance of arms control. But I would like to say that the nature of our relationship with the Soviet Union will rest

on other considerations as well. And I submit today that the issues of human rights is an integral and extremely influential factor in that relationship.

Mr. Speaker, what I am saying is quite simple. And that is that our efforts to reduce the arms race, and to better our relations with the Soviet Union, must never compromise our condemnation of Soviet human rights violations. There is little question that the Soviet Union engages in the systematic violation of its citizens' most basic liberties and freedoms. Its refusal to allow its Jewish citizens to emigrate is a clear and compelling illustration of this lawlessness.

Let us never compromise our position on this issue. Let us never forget that the preservation of basic human rights must remain at the heart of any international relationship. For to do so, Mr. Speaker, would compromise the very values upon which America was founded.

COMMEMORATION OF 100TH ANNIVERSARY OF ST. AGNES CHURCH

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. APPLEGATE. Mr. Speaker, I am privileged to bring to the attention of my esteemed colleagues the 100th anniversary of the founding of St. Agnes Church in Mingo Junction, OH. This church represents 100 years of faith, worship, and hard work on the part of individuals of all nationalities who realize that they are all part of one family under God.

The parishoners who built the two church buildings, the two school buildings, the rectory, and the convent at great sacrifice to themselves, were men and women of profound faith and they passed this faith on to their succeeding generations. As a parish, there was and still is today great pride in Catholic education. The dedication made by the Franciscan Sisters of Christian Charity of Manitowoc in educating the young in the faith since the beginning of the 100 years should be commended. Today St. Agnes and its satellite parishes maintain and operate an outstanding institution of learning in the diocese.

As you can well imagine, countless blessings have occurred in the parish of St. Agnes over this 100-year period. Several young parishes were born out of St. Agnes, which in the beginning bordered Holy Name, Steubenville on the north, and Martins Ferry to the south. Evidence of the flourishing faith in St. Agnes Church can be seen in the many vocations of priests, sisters, and brothers. Since 1885, a multitude of people have received new life of Christ through the waters of Baptism. Thousands have received the Eucharist and thousands were confirmed in the Spirit. Many graces and blessings were bestowed on men and women who pledged their love before the alter of God in Holy Matrimony. There were also many days when the dead were commended to Almighty God in Christian Burial.

St. Agnes has weathered many hard times as she has passed from the 19th century and into the 20th. The struggles of wartime and the hardships brought on by the Great Depression are just a few of the difficulties with which all Americans have had to contend during these years. Through these 100 years, the prayers and support of all the parishoners of St. Agnes, in addition to the realization that the Blessed Lord was always at their side and that St. Agnes, their patroness, was constantly interceding, helped them through the difficult times.

Mr. Speaker, I take great pride in commemorating this 100-year anniversary of St. Agnes Church in my district, in Mingo Junction, OH. This parish is an outstanding example of the continuation of and dedication to the Christian faith in our country. St. Agnes Church has gained momentum 100 years later that moves not only the parish, but all those who behold it.

ALEXANDER NEPOTE—ARTIST EMERITUS OF SAN MATEO COUNTY, CA

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. LANTOS. Mr. Speaker, the French Novelist Marcel Proust said, "Thanks to art, instead of seeing a single world (our own) we see before us as many worlds as there are original artists * * *. Only through art can we get outside of ourselves and know another's view of the universe."

On the San Francisco Peninsula, Mr. Speaker, we are fortunate indeed to have a highly talented, highly original artist who continues to lead us into other new and unique worlds through his art—Alexander Nepote.

For the past 40 years the bay area has been blessed with his artistic genius. He received his education at the California College of Arts and Crafts in Oakland, where he received his B.A. Ed. in 1939. Alex also studied at the university of California, Berkeley, and at the Mills College Graduate School in Oakland, where he received his M.A. in 1942. For the last 25 years, he has lived in Millbrae.

Alexander Nepote's professional career began when, at the age of 20, his works were accepted by the jury for display by the Oakland Museum of Art's Annual Watercolor Exhibition in 1934. Since that time his works have been seen throughout the United States and around the globe.

In addition to his own artistic achievements, Alex also sought to share his gift with others. He and I served together for many years on the faculty of San Francisco State University. While I concentrated on the mundane problems of international economics, he focused on the sublime world of art.

Mr. Speaker, I could list at great length Alex's accomplishments—exhibitions, collections, awards, and honors. The list is almost endless, and it provides only a monocromatic, one-dimensional record of an outstanding multifaceted and colorful career.

I do want to mention a few, however, which give some of the flavor of his outstanding record. A brief sampling of exhibitions in which his work has been seen includes the Third International at Sao Palo, Brazil; Expo 70 in Osaka, Japan; Art of the Pacific Basin in Aukland, New Zealand; Americans 1962 at the Richmond, VA, Museum of Art; and an exhibition of West Coast Watercolorists in London, England. His works are held in a number of public and private collections, including the Metropolitan Museum of Art in New York, and the Museums of Art of San Francisco, Oakland, and Denver.

In describing the philosophy of his work, Alexander said, "My reactions, which are embodied in my paintings, are the result of an intensive search: to see, as best I can, beyond the obvious to the hidden deeper realities. It is not my intention to describe a parcel of landscape which may interest me, but to suggest the inner spirit which is felt and experienced at a particular place."

Mr. Speaker, in recognition of his lifelong artistic achievements Alexander Nepote will receive the Congressional Artists Emeritus Award for the 11th Congressional District of California. It is an honor for me to make this award to a man who through the medium of art has helped us get outside of ourselves, helped us to see many worlds rather than just our own, and—most important—has helped us see the hidden deeper realities of the world around us. His accomplishments are part of our national heritage. I am delighted to share them with my colleagues in the Congress and to make them a permanent part of our nation's history by placing them in the CONGRESSIONAL RECORD.

COMMANDANTE ORTEGA: WHAT HE DIDN'T TELL THE UNITED NATIONS

HON. GERALD B. H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. SOLOMON. Mr. Speaker, Commandante Daniel Ortega, the leader of Nicaragua's ramshackle Sandinista revolution, took his case to the United Nations yesterday. Not since Yasir Arafat, sidearms on his belt, swaggered to the U.N. podium a decade ago has the U.N. General Assembly given a hearing to a more disreputable character.

As was to be expected, Ortega launched into a tirade against the United States and everything else that he thought smacked of "colonialism, neo-colonialism, imperialism, racism," and other calamities, real and imagined. As was also to be expected, Ortega's speech was nothing more than a tired recitation of half-truths, exaggerations, ideological ravings, and outright lies.

One would get the impression from listening to Ortega that if the United States would only cease and desist its humanitarian support for those Nicaraguans who are struggling to win back their country then all would be sweetness and light in Central America. Unfortunately, the truth is more complicated.

Ortega's vision is uncomplicated by the inconveniences of free elections, religious tolerance, and free expression. As befits the leader of any Marxist/Leninist military junta, Ortega neither understands nor tolerates political opposition. If he were content to enslave only Nicaragua he would probably be dismissed as just another pathetic, posturing dictator who enjoys his moment in the sun before being overthrown. But Ortega has proclaimed a "revolution without borders" and has turned the once beautiful and industrious country of Nicaragua into the prototype of a brave new world that he wants to extend to all of Central America and beyond.

Just what has Commandante Ortega managed to accomplish for the Nicaraguan people? And why have Nicaraguans, disillusioned with their stolen revolution, taken up arms against Ortega and his thugs? The answers to these questions are found by studying those facts that Ortega didn't tell the United Nations.

Armed opposition to Ortega didn't take to the field until 3 years after the Sandinista revolution brought Ortega to power.

During those first 3 years of Ortega's rule:

Ortega and his henchmen managed to accumulate an external debt greater than that which was accumulated under the Somoza regime over a period of 40 years.

More than 10 percent of all Nicaraguans fled the country. Those Nicaraguans staying behind were faced with 35 percent inflation and an unemployment rate of 30 percent.

Agricultural production in Nicaragua plunged by 50 percent. The country began to import sugar, rice, beans, and corn—staple foods in which Nicaragua has been self-sufficient prior to Ortega's taking power.

Free trade unions were suppressed. The Catholic Church came under relentless harassment. And freedom of the press went out the window.

Thousands of Miskito Indians—guardians of a unique culture—were herded into concentration camps, all in the name of a "literacy campaign."

Ortega and his cronies collaborated with the PLO, Soviet, Cuban, North Korean, Bulgarian, and other allies (all of whom are so concerned about the well-being of Central America!) to consolidate the several guerrilla movements in El Salvador under Nicaraguan control.

The Nicaragua Permanent Human Rights Commission, investigating hundreds of disappearances and executions, found itself out of business and its archives confiscated.

And, finally, the biggest nonsurprise of all: Humberto Ortega, Daniel's brother and fellow junta member, decided to belabor the obvious when he admitted, "Marxism/Leninism is the scientific doctrine that guides our revolution * * * without Marxism/Leninism Sandinism cannot be revolutionary."

All of this happened, mind you, when the United States and other free countries were plying Ortega with over $1 billion in aid. Only when it became abundantly clear that Ortega had no intentions of following through on his promises for a free, pluralistic society did armed opposition take to the field.

No, Ortega wouldn't think of reminding the United Nations about these important facts. Nor could we pretend to speak for the 10,000 political prisoners languishing in his Nicaraguan gulag.

The desperado who addressed the United Nations yesterday cannot be expected to tell the truth. Nor, for that matter, can the United Nations be expected to recognize the truth. But let it never be said that we Americans are afraid of the truth. Let us continue to support our President's policy in Central America and turn back this Communist plague that threatens the future of every person in this hemisphere.

IN HONOR OF A LEADER—TISH SOMMERS

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Ms. OAKAR. Mr. Speaker, late last week, a leader in the women's community died after a long battle with cancer. Tish Sommers, cofounder of the Older Women's League, will be missed by many of the advocates of civil rights who were fortunate enough to know this fine woman. I will personally miss her wisdom and guidance very much.

Tish Sommers was not only a pioneer of the women's movement itself, she brought to the movement a new dimension, which stated that older women, many who have been displaced by the death of a spouse or because of divorce, need equal rights and economic security also. She coined the term "displaced homemakers."

Before giving my colleagues a short history of the contributions that Tish made to our society, I would like to share one of her most inspiring remarks:

I realized early on how important strong, positive joyous role models are. Too many women fear aging, but there's another way to go: Bring together all you've learned and focus on what's important. It's far easier to face death if you've made a valuable contribution and not just let life pass by.

Having founded the Women's Action Training Center in Oakland, CA, Sommers went on to draft the first State and Federal legislation to provide job training to displaced homemakers. Two years after the first displaced homemakers bill was introduced in California, 23 State legislatures had passed displaced homemaker legislation and 400 displaced homemaker centers had been established across the country. In 1975 Sommers founded the Alliance for Displaced Homemakers. By 1978, the concept of the displaced homemaker was incorporated into Federal law.

Sommers began her career as a women's rights activist in the midsixties. "This was not just another cause, but something that affected me personally," she said. "I viewed feminism as a progressive step in the larger struggle again human oppression." In 1971–72 she served on the national board of NOW, the National Organization for Women. She was also the inspiration behind NOW's Task Force on Older Women, the first nationwide group to explore older women's issues.

With Laurie Shields, author of "The Displaced Homemaker," Sommers organized the Older Women's League at the 1980 Des Moines Miniconference on Older Women. As a consequence of that conference and Sommers' organizing efforts in preparation for the 1981 White House Conference on Aging, in 1981, older women's concerns were for the first time recognized as distinct issues to be addressed by Federal policy. Speaking at the national conference, Sommers, then 67, described the delicate economic situation of older women, setting an agenda for older women's rights which OWL continues to follow. Today, OWL has over 14,000 members in 100 chapters around the country and continues to work for Social Security protection, adequate health insurance, pension rights, caregiver support services, and jobs for older women.

As with displaced homemakers, in establishing OWL, Sommers gave voice to a group of women whose problems had previously gone unrecognized. Describing OWL's work, she also described its benefits. "As we work to improve the facts of life for older women, we gain strength which will make our own last years more productive and joyous. As we build a new road to aging, that road builds us."

In keeping with her longtime motto, "don't agonize, organize," Sommers spent the first half of this decade as OWL's president, working toward improving the image and economic security of older women. She brought older women's problems to the public with an Ad Council-sponsored campaign and a variety of Mother's Day activities. This year OWL members nationwide sent Mother's Day cards to all the Members of Congress. The cards read, "Your Mother Didn't Bring You Up So You Could Let Other Mothers Down" and the campaign is widely acknowledged to have helped stave off another round of Social Security cuts.

Most recently, battling stage four cancer, Sommers has focused her attention on the issues confronting older women facing death or coping with the death of someone close. Characteristically refusing to be categorized as a victim, she has extrapolated from her experience to organize others around the problems she knows so personally. With former Senator Jacob Javits who also suffers from a terminal disease, she organized a recent forum on living wills and other issues around death and dying.

"Life and death are intertwined," she said in her keynote speech, "for we are all terminal cases. And we're all going to die sooner or later." Explaining women's claim to the issues surrounding death and dying, she called them the "handmaidens of death," since women tend to outlive men and, as caregivers, traditionally are "the last face a person sees before death."

Over the years Tish Sommers has been recognized for her leadership and expertise by a variety of appointments to State and national boards and commissions. She was appointed by President Reagan to the National Advisory Committee of the White House Conference on Aging. Gov. Edmund G. Brown, Jr., appointed her to the California Commission on Aging. She has also served on the National Board of the National Council on the Aging and the National Steering Committee of the Gray Panthers. She has published numerous articles published in magazines and journals for the aging community and authored a 1973 book "The Not So Helpless Female." She recently completed a forthcoming book on women as caregivers.

WHY IS THE COMMERCE DEPARTMENT AIDING AND ABETTING AN UNFAIR TRADE PRACTICE

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. TRAFICANT. Mr. Speaker, I spoke on the floor earlier today, under the 1-minute rule, regarding a situation which greatly concerns me. I want to take this opportunity to explain further this situation.

I raised this concern initially in defense of the RMI Co, a major manufacturer of titanium products in Niles, OH, which is in my district. However, I believe this situation points out a fundamental problem with our trade policies, particularly with how they are administered by this administration.

Last year RMI had successfully prosecuted an antidumping suit before the International Trade Commission [ITC]. On November 30, 1984, the ITC rendered its decision finding three major Japanese manufacturers of titanium guilty of dumping. On that same day antidumping duties were imposed on Osaka Titanium—15.09 percent duty imposed—Nippon Soda—56 percent duty imposed—and Toho Titanium—34 percent duty imposed).

Despite this clear violation of U.S. trade law, the Commerce Department continues to make purchases of Japanese titanium for the national defense stockpile. Under current practice, the Federal Government need not comply with current U.S. trade law when making purchases for the stockpile. At the time the Commerce Department published it final determination in the antidumping investigation of titanium sponge from Japan, it excluded from the scope of its order certain imports entering the U.S. under TSUSA item 833.00 for a GSA stockpile purchase. These sales were excluded on the grounds that the suppliers in question had relied on past administrative practice exempting certain defense purchases from antidumping duties. The Department stated, however, that:

> Further reliance on this past practice would not be well advised. We intend to undertake a careful and thorough review of issues relevant to the waiver of antidumping and countervailing duties . . . and will publish the results of this review within six months.

This practice is currently under review. The Department held a hearing on this issue on February 8, 1985. At that time it was announced that a decision would be reached by April 1, 1985. However, no decision has yet been made.

I have written Secretary Baldrige asking that a decision to end this practice be made as soon as possible. I have attached to be included below a copy of this letter.

It is clear that these titanium purchases made by the Commerce Department are undercutting U.S. industries illegally. Current U.S. trade law protect U.S. industries from "dumping" by foreign manufacturers. "Dumping" occurs when a foreign industry sells large quantities of a resource or product to U.S. markets at prices below market value. Duties are imposed so to raise the price of the "dumped" import to the prevailing market value.

The "dumping" which occurred in this situation is clear and well documented. RMI Co. followed the proper legal procedures as set out in current U.S. trade law for disputing this practice. Not only did RMI win in its initial case, it has subsequently defeated an appeal by one of the manufacturers.

So, the situation I am setting out is not a case of "knee-jerk" protectionism. Rather, it is a clear situation of U.S. trade law standing up against unfair trade practices. Yet, this administration has failed to stand up for the "level playing field" it says it seeks in international trade policy. The field is now tilted toward Japan, and the President has his foot on the scale.

What is amazing is that Secretary Baldrige has failed to act to end this practice despite the fact that his own Department has recommended that it be stopped.

It's crazy that the Federal Government is helping foreign countries put American industries out of business by purchasing illegally dumped goods. I call on President Reagan to be true to his word on the promises he made that he would be tough on unfair trade practices and to see that this practice is stopped.

Some might argue that our national defense needs justify such a policy. This is ridiculous. This is not a case of an important strategic material which can be obtained no other way. It just isn't fair for the Defense Department to undercut U.S. industries this way. Our national defense needs do not justify this practice. The greatest contribution we can make to our national defense is to assure that our economy is strong. A prerequisite to a strong economy is a level playing field for international trade.

The application of antidumping duties in a situation such as does not cause imports to be more expensive than domestically produced items. Instead, it merely assures that fair, competitive price levels are maintained so that American industries can compete on a fair basis with foreign industries. This is not a case of U.S. industry coming "hat in hand" asking for protection. RMI is only asking for the level playing field the President promised.

Americans all across the country are telling the Congress that while we need tax reform, the lack of trade reform is killing us; we are concerned about the budget deficits, but the trade deficit is costing us our jobs. America can no longer tolerate being a trade patsy.

I hope that my colleagues will lend their support to my effort to see that this injustice is corrected.

HARLAN BARRY RETIRES AS CITY MANAGER OF LARKSPUR, CA

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mrs. BOXER. Mr. Speaker, I would like to bring to the attention of my colleagues the retirement of a real public servant, Harlan Barry, who has been city manager of Larkspur, CA.

Mr. Barry began dedicating himself to Larkspur in 1970 when he became assistant city manager. He became city manager in 1974.

Upon commencement of his term as city manager, Larkspur was confronted with an insurance crisis. Mr. Barry's initiative and ability caused him to found and chair the Marin County Risk Management Authority, a self-insurance program which still exists today and includes eight cities. This program saved many valuable dollars by pooling coverage of worker's compensation, liability, property, and dental insurance.

Mr. Barry has been instrumental in the preservation and development of Larkspur's natural, commercial, and residential areas. As city manager, he led the city to acquire Piper Park, Hamilton Park, and Bon Air Landing. Furthermore, Mr. Barry supervised the completion of Larkspur's general plan, the expansion of the Bon Air Center, the acquisition of Northridge open space, the creation of the heritage district for Larkspur's downtown area, the merging of the Larkspur and Conte Madera Police Departments and the half-million-dollar restoration of the city's library. Under his auspices, the Larkspur Landing commercial, office, and residential project was developed in conjunction with the Larkspur Ferry Terminal.

Mr. Barry's leadership style is one that includes hands-on assistance in times of need. During the flood and storms of 1982, Mr. Barry was out in the community with sandbags and shovels literally digging his community out of a natural disaster.

Mr. Barry's commitment to his community and country began long before he became city manager. Born in Illinois, he came to Larkspur as a small child. After graduating from the old Larkspur-Corte Madera School, he attended the University of California at Berkeley and received a degree in business administration in 1960. Upon graduation, he entered the U.S. Navy and was stationed in Okinawa.

Mr. Barry's dedication and accomplishments are admirable. He will be missed as city manager of Larkspur but will, assuredly, remain one of the city's most outstanding citizens.

THIRTY YEARS OF ANN LANDERS—AMERICA SAYS THANKS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. BIAGGI. Mr. Speaker, on October 16 when millions of Americans opened their newspapers to the familiar page where Ann Landers' column runs, they were in for a slight surprise. Instead of the traditional Dear Ann, we found instead Dear Readers. Why the change in format? Very simply, it is explained in the column's very first line. "Today is my 30th anniversary as Ann Landers." I join the followers and admirers of Ann Landers in wishing her a happy anniversary.

As Ann Landers herself points out, "I have written seven columns a week, 365 days a year since October 16, 1955. That adds up to 10,950 columns." What a remarkable achievement and testament to the work ethic. She continues, "Never has there appeared in this space a notice saying "Ann Landers is on vacation." There are not many people today who can claim the same.

For the past 30 years, Ann Landers' name has been a household word. She has been sought after for advice to the lovelorn, the troubled and the confused. She has provided comfort and counsel to thousands of readers who have either written in to seek her help or who turn to her column every day seeking advice to similar problems. She has been psychiatrist, doctor, mother, father, and/friend to countless numbers of people, young and old, male and female.

I believe that Ann Landers symbolizes what America is all about. She gives her readers hope and the ability to dream of better days. She has been honest with her responses and has often relied on the wisdom of God as words to live by. She has been consistent, yet has also changed with the ever-changing world. I salute Ann Landers on this historic occasion, and I wish her many more years of success. I am pleased to include at this time, the New York Daily News, October 16, 1985, 30th anniversary of Ann Landers column, for your enjoyment and reading pleasure.

A FOND THANK YOU FROM YOURS TRULY

Dear Readers: Today is my 30th anniversary as Ann Landers. I have written seven columns a week, 365 days a year, since Oct. 16, 1955. This adds up to 10,950 columns. Never has there appeared in this space a notice saying, "Ann Landers is on vacation."

It was my dear friend, Will Munnecke, then vice president and general manager of the Sun-Times, who suggested that I go see Larry Fanning about entering the Ann Landers contest. I was green as grass, never had held a job before, never had written a line for publication and had never been inside a newpaper building.

Larry was underwhelmed by my credentials. (I was a wife and mother and enjoyed writing letters to relatives.) I confessed that I didn't need the money but if they wanted to pay me it was okay. Neither Fanning nor Munnecke was optimistic about my chances of winning the contest. But they cheered me on and wished me luck. Miracle of miracles, I won. ("Good morning, Ann Landers!")

Larry Fanning was my mentor. He taught me how to write. He also edited every word I wrote for 10 years—every column, every booklet, every book, every magazine article, every speech. I couldn't pay him a dime. He wouldn't accept it. "It's part of my job," he said. We both knew it wasn't.

Months before Larry moved to Anchorage, Alaska he told me, "If I get hit by a bread truck, Trez is your man." And so he was. Dick Trezevant, another Fanning protege, became my editor. For 14 years this brilliant, tough but tender guy kept the Landers copy on course. When Trez left I was lucky again. Ralph Otwell, the executive editor of the Sun-Times, took over. A few years later, when the paper was sold, Ralph left. He suggested Virginia Van Vynckt, chief of the features copy desk. I'd never met her. She turned out to be a gem.

I could never have made it without my devoted and competent staff. They keep my office running smooth as silk, handle the phones that never stop ringing, arrange my travel schedule and speaking dates, and save me from myself at least a dozen times a week.

My column is sold all over the world by News America Syndicate. Rick Newcombe, the chief, is the brightest and most energetic man in the business. As you can see, the success of the Landers column goes far beyond what limited talent I may possess. I have had every break in the book.

I could not let this day pass without a word of thanks to my dozens of consultants all over the country who give so generously of their time and counsel. For the price of this paper my readers have access to the most distinguished physicians, dentists, psychiatrists, lawyers, geneticists, business executives, judges, clergy—experts in every field.

These last 30 years have been incredibly rewarding. I cannot imagine a job that could have provided me with more satisfaction or a better opportunity to touch the lives of so many people.

I wish to thank you, my 85 million readers, for your loyalty. You've stood by me in my time of trouble and rejoiced in my triumphs. I consider you my friends.

I intend to crank out this column as long as you find me useful and the good Lord gives me the strength to do it. On this special day, I send love and thanks to each and every one of you.

UNFAIR TAX REFORM PROPOSALS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. HUBBARD. Mr. Speaker, I received an excellent letter from Mr. G. Bruce McAbery, personnel manager of the fine papers division of Westvaco Corp. located in Wickliffe, KY.

I believe my colleagues will be interested in Bruce McAbery's comments to me about pending tax reform proposals, especially his views in opposition to changing our tax laws and penalizing the many corporations like Westvaco which have paid their fair share of taxes. I agree with Bruce McAbery's concerns that Congress should not adopt tax reform legislation that will adversely affect his company's ability to remain competitive in the world market.

The letter from Bruce McAbery follows:

AUGUST 28, 1985.

Hon. CARROLL HUBBARD JR.,
Rayburn House Office Building,
Washington, DC.

DEAR CARROLL: Thank you for your letter regarding my 35 years of work for Westvaco. It doesn't seem possible but as they say, time does fly.

I would like to take this opportunity to express some thoughts on President Reagan's tax reform proposals. Some of them would have an undesirable impact on Westvaco. My major concerns are with the following specific proposals:

1. Recapture of tax benefits obtained from accelerated recovery systems from 1980 to 1986.

2. A less favorable capital investment recovery system and elimination of investment tax credits.

3. Changes in foreign tax credits.

4. Changes in timber related provisions concerning capital gains and management expenses.

I understand these proposals will have a $90 million impact on Westvaco's cash flow. This could cause top management to defer or eliminate some capital investment needed to improve competitive strength and maintain our stability of employment.

One factor of Westvaco's $1.6 billion capital improvement program, announced in 1984, was that tax credits would be available. Removal of such credits at this point would be unfair without provision of transition rules for committed projects. Likewise, the recapture concept is definitely discriminatory. How can tax law revisions be made retroactive? The $40 million spent on Wickliffe's paper machine last year may not have been authorized if management had reason to believe this credit would not be available.

Unlike those companies which have made recent headlines for non-payment of federal taxes, Westvaco has paid its fair share—over $197 million in the last four years.

I will appreciate your consideration of these views to make sure the tax reforms do not adversely affect Westvaco's ability to remain competitive in the world market. I would also appreciate it if you convey our concerns to your colleagues on the Ways

and Means Committee. I look forward to hearing your views on these issues.

Sincerely,

BRUCE G. MCABERY,
Personnel Manager.

MEESE FIGHTS BROAD SUPPORT FOR AFFIRMATIVE ACTION

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. EDWARDS of California. Mr. Speaker, today the President's Domestic Policy Council, headed by Attorney General Edwin Meese III, will discuss the pending plans to modify Executive Order 11246, which requires Federal contractors to use affirmative action to include women and minorities in the workforce. Attorney General Meese will propose that Federal contractors should no longer be required to use numerical goals and timetables to monitor the inclusion of minorities and women in the American workplace.

Attorney General Meese is fighting broad American support for affirmative action. American business is comfortable with these clear standards to combat discrimination. Corporations use numbers to monitor every aspect of their operations, and achieving civil rights goals should be no exception.

The American people disagree with Mr. Meese as well. They don't want over $160 billion of their tax dollars to be used to subsidize discrimination. A recent Harris poll showed that 69 percent of those polled believe that Mr. Meese is wrong to do away with Federal rules that guarantee affirmative action programs, and 75 percent support Federal laws requiring affirmative action programs for women and minorities in employment and education, provided there are no rigid quotas. The Harris poll also reports that there is a solid affirmative action commitment among Americans, with solid majorities firmly rejecting the Reagan administration attempts to cut back equal employment opportunity. I hope that this latest Harris poll will be of interest to our colleagues.

[From the San Jose Mercury News, Oct. 14, 1985]

MEESE UP AGAINST SOLID SUPPORT FOR AFFIRMATIVE ACTION

Attorney General Edwin Meese's campaign to drastically change previous affirmative action programs will meet with stiff resistance from Americans. A 69-27 percent majority believes that Meese is wrong to want to "do away with federal rules that guarantee affirmative action programs in the federal government and to end 53 affirmative action programs around the country."

Americans were asked if they favor or oppose "federal laws requiring affirmative action programs for women and minorities in employment and education, provided there are no rigid quotas." A 75-21 percent majority claims to support such efforts. Just a year ago, a smaller 67-18 percent majority held the same view.

Under landmark Supreme Court decisions such as the Bakke and Weber cases, rigid quotas were ruled to be illegal. However, the court has urged affirmative action programs that give special consideration in jobs and education for women and minorities without setting rigid quotas. These legal bases for affirmative action programs are now undergoing a stiff challenge, led by Meese.

The latest nationwide Harris Poll, conducted by telephone among a cross section of 1,255 adults between Sept. 5 and Sept. 8, also probed the views of the public in a series of projective questions—three positive and three negative, asked in alternating sequence in order not to bias the responses. The results show that the opinions of Americans have moved dramatically toward a pro-affirmative action position.

By 71-27 percent, a majority now agrees with the claim, "If there are no affirmative action programs helping women and minorities in employment and education, then those groups will continue to fail to get their share of jobs and higher education, thereby continuing past discrimination in the future." Three years ago, a 57-39 percent majority held that view, and in 1978, 45-36 percent were in agreement. In seven years, a movement of 26 points has taken place.

By 82-17 percent, a majority believes, "As long as there are no rigid quotas, it makes sense to give special training and advice to women and minorities so they can perform better on the job." This is up from 71-20 percent in 1978.

By 85-14 percent, a majority agrees, "After years of discrimination, it is only fair to set up special programs to make sure that women and minorities are given every chance to have equal opportunities in employment and education." In 1978, a 73-19 percent majority expressed that view.

The three positive statements tested by the latest Harris Poll have gained stronger endorsement from Americans, but the three negative statements on affirmative action have failed to catch fire at all.

By 64-35 percent, a majority rejects the claim, "Minorities and women are not entitled to any special consideration." In 1982, a slightly lower 60-37 percent majority disagreed with this point of view.

By 59-39 percent, a majority disagrees, "Once affirmative action programs for women and minorities are started, the result is bound to be reverse discrimination against white men." In 1978, a 47-38 percent plurality rejected this possibility.

By 71-27 percent, a majority denies the charge, "White men learn faster, are better qualified, and will continue to hold down the better jobs, no matter how many affirmative action programs for women and minorities are started." In 1978, a slightly smaller 67-23 percent majority rejected this point of view.

With solid majorities endorsing pro-affirmative action statements and also rejecting anti-affirmative action statements, it is evident that the die has been cast. If Meese and others try to reverse previously established affirmative action programs by changing federal policy, as well as seeking a reversal of U.S. Supreme Court policy, they are up against a deeply entrenched pro-affirmative action commitment among Americans.

ARE THE SANDINISTAS REALLY COLORED RED?

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. BROOMFIELD. Mr. Speaker, is the charade over in Nicaragua? Have the Sandinistas finally decided to show their real political colors and their real intentions? I believe the answer is yes. Now more than ever, the world can see what that failed revolution has brought to the Nicaraguan people.

All along, the Contras have claimed that the Sandinista junta has betrayed the real goals and objectives of the original revolution in that poor country. The Sandinistas have brought repression and economic collapse. They have brought conscription of young people and are ensuring that Nicaragua becomes little more than a clone of Cuba. The junta has brought the People's Church which teaches more ideology than theology and the suppression of the Catholic Church in that Christian country. That group of Marxist-Leninist ideologies is driving the private sector out of Nicaragua. They have even disillusioned the peasants, who should have been the ultimate beneficiaries of the revolution. The Ortega brothers are cleverly making huge profits from their extensive business activities in that country while pretending to be poor and struggling revolutionaries with the lifestyles of two ascetics. In essence, the Sandinistas have done more damage to Nicaragua than Somoza and his band of thieves could ever have done.

With the recent decision by Commandante Ortega to suspend a variety of rights to include the right to public assembly, to strike, to freedom of expression, to movement about the country, to organize into labor groups and many others, he has essentially closed the door on freedom in Nicaragua. These unfortunate actions are being justified as a response to so-called sabotage by the United States and the alleged activities of some political parties and the church. All the world can now see that the Sandinistas are building a police state and police states cannot accept any form of dissent be it from political parties or from the Catholic Church.

While criticizing the United States in the World Court case, justice, for Nicaraguans, should clearly begin at home. Recent reports reveal that the comandantes are continuing to pervert and undermine the legal system there in order to eliminate all political opposition. In many cases, due process is completely ignored. At this point in time, the Sandinistas appear to be about as inept in public relations as Yasser Arafat. Their image has clearly suffered. Their coloration, however, has not. It is rapidly becoming bright red.

With these concerns in mind, I commend the following New York Times editorial on Nicaragua to my colleagues in the Congress.

[From the New York Times, Oct. 18, 1985]

NICARAGUA BARES THE NIGHTSTICK

Nicaragua's Sandinista regime has now suspended by decree the few freedoms it had grudgingly accorded its domestic opponents. There is no reason to swallow President Orega's claim that the crackdown is the fault of "the brutal aggression by North America and its internal allies." A more likely explanation is an eruption of discontent over a crumbling economy and military conscription. But until now, despite the war with the U.S.-backed "contra" rebels based in Honduras and Costa Rica, the Sandinistas needed no new powers to crush or cow political and religious dissent.

So why did the new Nicaragua abandon even the pretense that it tolerates pluralism? The junta's decree makes explicit its power to detain without cause, to stifle the press, to control all movement of peoples, to disband labor unions, to ban political rallies and to open mail. The posting of these familiar rules of tyranny appears to be the resolution of an internal debate—a clear victory for Interior Minister Tomás Borge, who has long clamored for "firmer measures," especially against a hostile Roman Catholic Church.

Most likely, Mr. Borge is finally getting his nightstick because the junta no longer sees any benefit in placating dovish Americans and European Socialists. The Sandinistas never intended to share power. When the U.S. Congress reversed itself and voted to support President Reagan's aid to antileftist rebels, they must have decided they had nothing more to lose by revealing their true political colors. And what may have tipped the balance was fear that dissent was spreading from the church and middle classes to trade unions and the peasantry.

In declaring its colors, the Managua junta has now embarrassed and undermined its Latin allies. The crackdown comes as diplomats of the four Contadora countries—Mexico, Venezuela, Colombia and Panama—meet in Panama. With a self-imposed deadline, they hope to compose a regional security pact that has been stalled by arguments over permissible force levels and verification. A key element of that pact, however, would be every signatory's respect for democracy and human rights. Nicaragua's march in the opposite direction will further damage this mediation.

The shrewd way to overcome the suspicion and hostility of the United States would have been to rally a united people behind the revolutionary Government. But steadily, the Sandinistas have backed themselves into the corner designed for them by their most bitter foes. Their avowal of repression is the contras' biggest victory so far.

FRESNO, CA, CELEBRATES ITS CENTENNIAL YEAR

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. LEHMAN of California. Mr. Speaker, I would like to call to my colleagues' attention the centennial birthday of Fresno, CA, which will take place on October 27, 1985. In 100 short years Fresno has grown and blossomed into a striking community, marked by prosperous business and industry among vast and productive farmland, and a confluence of citizens representing many cultures.

Fresno began as a small, dusty hamlet of 1,100 people in 1885. The site was chosen by Leland Stanford who foresaw the agricultural potential of this San Joaquin Valley oasis. A railroad stop enabled a variety of people to come to the area to take advantage of the rich soil and uncluttered countryside. From its beginning, Fresno was a farming community, a distinction it holds to this day.

I was raised on a farm outside Fresno, in one of the many small communities surrounding the town. From early in my life I developed a deep appreciation for the importance of agriculture, as well as a strong pride for the area in which I lived. There is a common sentimentality about our roots, a deserved reverence for the value of the land and its capacity to produce—shared even by the city folks in downtown Fresno.

A notable attribute of Fresno is its ideal central location in the State of California. It is located at the foot of the Sierra-Nevada mountain range, providing quick and easy access to many beautiful lakes, trails, vistas, and rivers. Fresno is a 2-hour drive from Yosemite National Park, 3 hours from beaches at Pismo, Morro Bay, and San Francisco and 4 hours from Los Angeles.

There is also a wide, ethnic diversity in Fresno. Chinese, Armenian, and Latino communities have always been prominent, though there are now over 80 identifiable ethnic groups residing in the area. This diversity brings richness of culture and texture of excitement to Fresno. No one could accuse it of being homogenous. In a single weekend you can find a Chinese art exhibit, a Japanese festival, and an Armenian dinner.

The people of our town have never hesitated to become active in local politics and planning committees. In 1906, Fresno established the sixth oldest college in the State, which eventually became California State University at Fresno. There has also been a growing interest in culture and the arts. Fresno now has an art museum, a symphony, a dance repertory, and several theater groups. It is also the home of a beloved NIT championship collegiate basketball team and hosts the Fresno Bulldogs football team. Despite tremendous growth and development, Fresno has maintained a friendly, informal small town atmosphere geared toward family, recreation, and community. It is an ideal place to raise a family, large enough to offer a wide range of activities, yet never losing that small town, "know your neighbor" friendliness.

I want to commend the people of Fresno and its leaders for maintaining a commitment to basic ideals and at the same time moving ahead into its next century. We celebrate the growth of a community which provides so many necessary human resources, yet holds onto the values of family, community involvement, and respect for the land.

STOP BALLISTIC MISSILE TESTING

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. LEVINE of California. Mr. Speaker, today's New York Times contains an article by former CIA Director Stansfield Turner with a simple, innovative, and effective approach to arms control and reducing the dangers of nuclear war.

Admiral Turner suggests that President Reagan propose to Mikhail Gorbachev that both the United States and the Soviet Union immediately halt all testing of nuclear ballistic missiles.

I urge President Reagan to give careful consideration to Admiral Turner's suggestion. It may be the last, best hope for arms control we have.

I ask unanimous consent that the full text of Admiral Turner's article be printed at the conclusion of my remarks.

[From the New York Times, Oct. 22, 1985]

A NOTE TO GORBACHEV

(By Stansfield Turner)

WASHINGTON.—Dear Mr. President:

Abraham Lincoln drafted one of our country's most historic documents on the back of an envelope. You can do the same when you meet with Mikhail S. Gorbachev in November.

The Gettysburg Address helped hold our nation together. You could help avoid nuclear war. On your envelope you could write the following:

"The Union of Soviet Socialist Republic and the United States of America hereby agree never again to test a ballistic missile."

And then slip it to Mr. Gorbachev.

Such an agreement would probably be the shortest and most explicit international protocol in history. It would also leave one of the most powerful legacies for peace.

If there were no testing of ballistic missiles for a number of years, neither we nor the Soviets would remain confident about the accuracy of these weapons. That would mean that we would both be uncertain about being able to conduct a surprise, precision attack to disable the other's strategic arsenal. Creating uncertainty about the success of surprise attacks would do much to diminish the most dangerous tensions over nuclear weapons and reduce the risk of mistakes during a crisis.

It would also signal your joint desire to curtail the arms race, at least in ballistic missiles. Today we're proceeding with the MX missile in order to catch up with the Soviet capability to hit hardened targets by surprise. With this approach, you would simply lessen the Soviet's hard target capability. It would not disarm either one of us, as we could each retain all the ballistic missiles we wanted. But these missiles would no longer be useful for surprise attacks.

True, the Soviets may not see this as an equitable bargain because about 87 percent of their strategic warheads are on ballistic missiles compared to about 78 percent on our side. That's not really a big issue, but you could always have an added sweetener in your pocket, such as withdrawing the Pershing missiles from West Germany. If Mr. Gorbachev turned down that combina-

tion, he would almost certainly lose the contest for world opinion, no matter what he is holding up his sleeve to drop on the Summit table.

The alternative to a simple proposal like this would appear to be protracted negotiations on a traditional arms control treaty. This proposal will enable you to get some momentum going more quickly and, in the process, markedly improve the entire tone of United States-Soviet relations.

It will also ensure your leaving a lasting mark for peace.

CONGRESSIONAL SALUTE TO THE FREE PUBLIC LIBRARY OF THE CITY OF PATERSON UPON THE CELEBRATION OF ITS CENTENNIAL ANNIVERSARY AND COMMEMORATION OF ITS DANFORTH MEMORIAL LIBRARY AS A NATIONAL HISTORIC LANDMARK

HON. ROBERT A ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. ROE. Mr. Speaker, on Sunday, October 27 the residents of my congressional district and State of New Jersey will join together with the Honorable Mayor-Senator Frank X. Graves, Jr., and other esteemed dignitaries to celebrate the centennial anniversary of the founding of the Free Public Library of the City of Paterson and the commemoration of its main library, the Danforth Memorial Library, as a national historic landmark. I know that you and our colleagues here in the Congress will want to join with me in extending our heartiest congratulations and best wishes to the distinguished director, Hon. Leo E. Fichtelberg, other officers, trustees, and community leaders who have actively participated in the organization and administration of this most prestigious educational and cultural center of current and historic collections of literary and artistic materials which have truly enriched our community, State, and Nation.

Mr. Speaker, the exemplary leadership and outstanding efforts of our citizens so important to our quality of life are in the vanguard of the American dream and today we express our appreciation to the people of the city of Paterson who, through their fidelity, devotion, and personal commitment, have provided a haven for knowledge, learning, wisdom, and enlightenment for young and adults alike—the Free Public Library of the City of Paterson. I particularly commend to you the honor roll of distinguished citizens who have served the library as officers or trustees over this past century. The current roster of the board of library trustees of the Free Public Library of the City of Paterson is as follows:

Paterson Free Public Library Board of Trustees—The Honorable: Flossie Walker, president; Jerry M. Bello, Gail Yannarelli, Harvey Dente, Shirley Dale, Fred Nachimson, Pat R. Trotta, Anthony Ardis, Nellie Pou, and Leo E. Fichtelberg, director.

Mr. Speaker, the Paterson Free Public Library is steeped in the history of the community and the devoted services of its citizenry. Its beginnings date back to October 23, 1885, when the library opened its doors as the first free public library in our State of New Jersey. At that time it housed a collection of 4,000 books and assorted magazines and newspapers. This volume soon became inadequate, however, as the citizens of Paterson eagerly read all the library had to offer. Today's library, by comparison, offers not only books and periodicals, but also audiovisual materials, information services, an art collection, and children's programs—with branch libraries in various parts of the city.

In addition to the magnificence of its collections of books and other publications, we share great pride in the highly regarded collection of paintings, sculpture, and prints at the Paterson Free Public Library. This collection of masterpieces of art which is valued at nearly $1 million includes many prized works including William Merritt Chase's oil painting, "In the Park," valued at around $150,000; Jonathan Eastman Johnson's 1872 oil, "The Bath," reputed to be worth almost $250,000; and several works by noted naturalist John George Brown. The library's own history is represented by a portrait of William Prall, Paterson's representative to the New Jersey State General Assembly who initiated the "free public library" legislation in 1884. Much of the collection stems from a 1925 donation by Mrs. Garret A. Hobart, as a memorial to her husband, a key member of the library's board of trustees and former Vice President of the United States.

The first library building of the Paterson Free Public Library was the Stimson House, located on Church Street. The library soon outgrew this building, and in 1888 the board of trustees gratefully accepted the house and grounds of the late Charles Danforth, offered as a gift by his daughter, Mrs. Mary E. Ryle. This property was located on the corner of Market and Church Streets. The first Danforth Memorial Library building burned to the ground in the Great Fire of 1902. Mrs. Ryle again offered her help and donated almost $200,000 toward rebuilding the library.

The new Danforth Memorial Library, located at 250 Broadway, Paterson was designed by Henry Bacon, a noted American architect whose most famous work is the Lincoln Memorial. The new building was completed in 1905. Since then, the building has undergone several additions and renovations. It is an imposing and beautiful building, providing the people of Paterson with all the services a modern library can offer.

Mr. Speaker, during its centennial celebration the Paterson Free Public Library will also be commemorating a most significant historic preservation program, the designation of this main branch, the Danforth Memorial Library, as a national historic landmark. The building is most striking in design. The exterior is gray limestone, and includes a frieze containing the names of 33 classical writers. Four limestone columns grace the entrance to the building. Inside, the most impressive element is the marble grand staircase leading to the second floor, highlighted above by a skylight.

Bacon's design of the Lincoln Memorial drew inspiration from his earlier Danforth Memorial. The library and the memorial each contain a colonnade of the Ionic order and a commemorative frieze. The highlight of Bacon's career came in 1923 when he was awarded the gold medal of the American Institute of Achievement, presented by President Harding.

The Paterson Free Public Library is proud that its main branch, a tribute to a city pioneer and a distinguished American architect, has been honored by its inclusion in the National Register of Historic Places.

Mr. Speaker, in reflecting upon the history of our great country and the deeds of our people who have made our representative democracy second to none among all nations throughout the world, I am pleased to call this centennial anniversary celebration to your attention and seek this national recognition of the people of the city of Paterson in bringing into fruition, maintaining and expanding its free public library for a communion of understanding, exchange of ideas, recreation, and communication on the arts, cultures, and sciences of the past, present, and future. We do indeed salute the trustees and administrators of the Free Public Library of the City of Paterson upon the celebration of their 100th anniversary and commemoration of their main library, the Danforth Memorial Library, as a national historic landmark.

THE ILLINOIS IMBALANCE AND WHAT CAN BE DONE

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. PORTER. Mr. Speaker, it is no secret that the State of Illinois ranked 49th out of 50 in terms of per capita return on Federal tax dollars in 1984.

The people of Illinois do not object to paying reasonable taxes for those activities which rightfully fall under the domain of Federal responsibility. These include the maintenance and fortification of our Nation's defense capability, providing for the needy and helping them to acquire the tools to become productive members of our society, protecting our environment, maintaining the infrastructure upon which our economy relies, and encouraging the development of new technologies and new solutions to old problems.

The people of Illinois from my district—Illinois' 10th Congressional District—understand the need for a Federal role in these areas. However, my constituents do not understand the inability of this Congress to operate within the boundaries of fiscal responsibility. The business people and householders in my district must balance their books and they have little toler-

ance for a government which refuses to do the same.

Illinois' poor return from dollars given to the Federal Government, and the willingness of this Government to tolerate $200 billion deficits and our now $2 trillion national debt, hit my State, and the citizens of my district with a brutal double effect. Federal spending—both on virtuous endeavors and on those wasteful programs which should be terminated—provides economic stimulus for other regions of the country while having a net negative impact on my State and my district.

Illinois, however, is not granted immunity from the effects of unrestrained deficit spending. On the contrary, Illinois is one of the areas hardest hit by the consequences of fiscal irresponsibility. Interest rates, the price of financing our debt, remain relatively high and thus damage private capital formation, agricultural liquidity, and Illinois' standard of living. The inflow of foreign capital required to finance our red ink has caused a 40-percent appreciation in the value of the doliar which is the single leading cause of a trade deficit expected to hit $150 billion this year.

In Illinois, this has meant devastation for many manufacturers combating inexpensive imports and a substantial loss of export markets for agricultural products, a large drop in farm income, and a depression in the rural economy that extends to major agricultural suppliers and financial institutions.

In this Congress, I have spoken on many occasions of the irresponsibility of passing on to our children and grandchildren the bills which we are not now willing to pay. The people of my district realize that Federal deficit spending threatens our Nation's future, but they also suffer every day from the present effect of these deficits and they receive little of the fiscal stimulus generated by this unchecked spending.

It is no surprise, when one considers these facts, that the State of Illinois has experienced a net loss of 200,000 jobs in the last 4 years.

For this reason, it is important to keep the pressure on for real deficit reduction. But it is also important that the businesses in Illinois and in my district work hard to market their skills to the world's biggest consumer—Uncle Sam. For this reason, I am holding in my district a conference in conjunction with the Department of Commerce and the Department of the Army. "Doing Business With the Federal Government" will show business people from my area how to prepare bids for Government projects and will explore new export opportunities in our increasingly international economy.

Illinois has one of the potentially finest business environments in the entire Nation. Northeastern Illinois has the benefits of a highly educated labor force, a well-developed transportation infrastructure, a dynamic environment for numerous large and small businesses, and a supportive State government. Federal contracts with Illinois companies and nonprofit institutions totaled $3.07 billion in fiscal year 1984. I am confident that the northeastern Illinois economic environment can successfully service a much larger share of Government contracts. As Federal agencies increasingly turn toward privatization and contracting-out as a way of improving efficiency and reducing expenses, the Government contracting market will continue to increase.

I am confident that the superb businesses which employ workers in my State and in my district can stand toe to toe with any competitor in the procurement of Government contracts. I am hopeful that the procurement conference will give them the knowledge they need to combine with already well-developed business skills in pursuit of contracts which will supply the Government with top quality products at the lowest price while stimulating employment and growth in northeastern Illinois. The Federal Government will also benefit from this conference because, in the future, they will have new competitive bidders to choose from in awarding contracts. In addition, I am hopeful that business people from my area will discover new export opportunities and take full advantage of the potential which foreign markets hold. And Congress must do its part for the revitalization of America by eliminating budget deficits and thereby afford our industries a level playing field.

THE STAR LEDGER CALLS FOR LOWER INTEREST RATES

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 22, 1985

Mr. COURTER. Mr. Speaker, unemployment nationally has been stuck over 7 percent for over a year with no downward movement. This is a level normally associated with a recession. Eight million people are out of work. Real growth has fallen dramatically from 1983–84 levels. Commodity prices are collapsing. And the dollar is far too strong against foreign currencies, wrecking havoc in our manufacturing and export sectors.

The members of the Federal Open Market Committee and Chairman Paul Volcker should realize that there are no signs of inflation in the financial markets, only signs of deflation. The Federal Reserve is steering monetary policy by looking into a rearview mirror.

I urge the Fed to immediately cut the discount rate and the Federal funds rate by a full point so that the liquidity needed to get the economy moving again can be made available to business and investors. The late bond expert at Solomon Bros., Sidney Homer, said low interest rates are the hallmark of the civilized society. And as the Newark Star Ledger points out in the following editorial, lower interest rates and stable prices are the key to job creation and economic growth. I urge my colleagues to read this excellent editorial, and support efforts to require the Fed to bring interest rates down to normal historical levels.

The editorial from the Star Ledger follows:

TIME TO LOOSEN

Economics has been dubbed the dismal science, and with good reason. In looking at the state of the world economy, economists frequently seem to adopt the gloomiest possible stance, often gloomier than the facts warrant.

Ever since the U.S. economy left behind its recessionary woes at the beginning of 1983 and started to climb again, the economists have been highly nervous. Good economic news disagrees with them; they need an unrelieved dose of misery to make them happy.

It was only a question of time before inflation would once more overwhelm us, most economic forecasters predicted. They said that in 1983 and when inflation didn't emerge immediately, they predicted that 1984 would be the year of the return of high prices. When that didn't work out, the forecasts were revised once more, with the inflation expected to hit us this year.

Once again, these forecasts have proved far off the mark. The latest statistics on inflation show it still well under control. The Consumer Price Index, the best-known of the guides on inflation, has been giving favorable reports month after month.

The latest figures show that inflation for the month of August increased by a scant two-tenths of a percent, or at an annual pace of 2.4 percent, for the first eight months of 1985, the inflation rate is slightly higher, 3.3 percent, but still well below the 4 percent pace of last year.

Despite what the nay-sayers claim, the inflation rate is going down, not up. The inflation level is the most favorable it has been since 1967.

The economic growth rate news is not as favorable as the news on inflation. The Gross National Product increased by only 2.8 percent during the third quarter of this year. While this was well above the 2 percent in the quarter before, and the 0.3 percent of the first quarter, it is still well below the 4.5 percent to 5 percent that the Reagan Administration had been seeking.

The economy could do with some stimulus, particularly in the form of lower interest rates. With inflation in check, the time for this move is now.
